

A.

B.

C.

D.

**Supplementary Fig 1.** Precision/recall tradeoff during post-processing, and training loss curves. **A)** Recall vs. precision parameterized over post-processing intensity threshold and minimum neuron size, respectively, for (2+1)D network on V1 dataset. **B)** Pixel classification error across training iterations for (2+1)D network on V1 dataset. **C-D)** Same as A and B, but for MEC dataset. **E)** Pixel classification error across training iterations for 2D network on V1 dataset.

E.
