

```

1  /*Exemplo minimo de um erro do tipo "memory leak"
2  que Ã© identificado pela ferramenta Infer - true positive*/
3
4  #include <stdio.h>
5  #include <stdlib.h>
6
7  typedef struct st{
8      int value;
9  }st;
10
11 st * create(int value){
12     st *new = malloc(sizeof(st));
13
14     if(new == NULL) return NULL;
15
16     new -> value = value;
17     return new;
18 }
19
20 int main(){
21     st *new = create(5);
22
23     printf("Value:%d\n", new->value);
24
25     return 0;
26 }

```

2 ← Memory is allocated →

3 ← Assuming 'new' is not equal to null →

4 ← Taking false branch →

1 Calling 'create' →

5 ← Returned allocated memory →

6 ← Potential leak of memory pointed to by 'new'
