

```
1  /*Exemplo minimo de um suposto erro do tipo DEAD STORE  
2  identificado pela ferramenta Infer - falso positivo*/
```

```
3  #include <stdio.h>
```

```
4  
5  int main () {
```

```
6      int a = 20;
```

```
7      int b = 10;
```

```
8      int *ptr_a = &a;
```

Value stored to 'ptr_a' during its initialization is never read

```
9  
10     ptr_a = &b;
```

```
11     printf("Value:%d\n", *ptr_a);
```

```
12  
13     return 0;
```

```
14 }
```
