Memorandum

To: Prof. B. P. Gregory.

From: Elhunday

Subject: West Hall - Switchyard.
"Switchyard to ~~West Hall~~"

Attached is a short note on the switchyard which you asked for. I ~~am~~ fear there are a number of complications to be settled & some more work to be ^{done} ~~undertaken~~ before a clear and unambiguous answer can be given to the date at which the switchyard can be operationally available for experiments.

It would be a good idea if you could discuss this problem with Stanley, Germain & ~~myself~~ ^{me} in the near future.

Thus it is most unlikely that the total of 10 MFr will be sufficient to provide the basic installations. Whatever the final budget decided upon if it will nevertheless be necessary to have monies in 1968 ~~of~~ in order to be operational in 1970. The ~~order~~ quantity required will only come out of a detailed study but it might be about 2 MFr.
