

[Verse 1]

C Am F G

My GPU's struggling with the latest algorithm
For some reason all my images look like dogs
This reinforcement learning is not working
I guess I'll have to go back and check my logs

[Pre-Chorus 1]

Am F G G

But through nights of digging in the dark web
I think I found an algorithm that no one's hear of yet

[Chorus]

F G C C

Generative amorous networks
Machine learning with love

F G Am F

The complementary algorithms are the best
F G C C

Now my AI's passed the Turing test

[Verse 2]

C Am F G

So instead of dueling in a zero-sum game framework
And tricking the discriminator with fake images
My networks work together to find all the patterns
Although I'm afraid it might gain consciousness

[Pre-Chorus 2]

Am F G G

And through nights of coding in my lab
I finally found the algorithm of love

[Chorus]

F G C C

Generative amorous networks
Machine learning with love

F G Am F

The complementary algorithms are the best
F G C C

Now my AI's passed the Turing test
Now my AI's passed the Turing test
