

# Contents

	Preface	iii
I	Teaching Introductory Physics	1
1	Introduction	2
	Desired Student Outcomes	3
	Five Lessons for Teachers	4
	Toward an Active-Learning Environment	5
	Does It Work?	7
2	Teaching Introductory Physics	10
	Things to Consider	10
	Laboratories and Recitations	20
3	Physics Education Research	23
	What Is Physics Education Research?	23
	Summary of Findings from Physics Education Research	25
	Examples of Students' Alternative Conceptions	28
	Knowledge Structures and Problem Solving	36
	Implications for Instruction—The Five Lessons	40
4	An Active-Learning Classroom	46
	So What's Wrong with Lectures?	46
	Active Learning	48
	A Dozen Things You Can Do to Change Physics Education	49
	Just the FAQs	61

II	Topics in Introductory Physics	63
5	Vectors and Mathematics	66
6	Motion and Kinematics	71
7	Force and Newton's Laws	95
8	Impulse and Momentum	122
9	Energy	129
10	Oscillations	149
11	Waves	156
12	Thermal Physics	167
13	Thermodynamics	180
14	Electrostatics	191
15	Electric Fields	211
16	The Electric Potential	221
17	Current and Conductivity	236
18	DC Circuits	245
19	Magnetic Fields	255
20	Electromagnetic Induction	268
21	Geometrical Optics	275
22	Physical Optics	288
23	Quantum Physics	303
	References and Resources	326
