

Table of contents

1 Overview of protein serine/threonine phosphatases.....	1
Patricia T.W. Cohen.....	1
Abstract	1
1.1 Protein serine/threonine phosphatases and their classification.....	1
1.2 The PPP family.....	2
1.2.1 Phylogenetic and structural relationships in the PPP family.....	2
1.2.2 Functional genomic analyses of the PPP family	5
1.3 The PPM family	12
1.3.1 Phylogenetic and structural relationships in the PPM family	12
1.3.2 Functional genomic analyses of the PPM family.....	13
1.4 The FCP family	14
Acknowledgements	15
References	15
2 Protein phosphatase 1	21
Viktor Dombrádi, Endre Kókai and Ilona Farkas	21
Abstract	21
2.1 Biochemical characterization of protein phosphatase 1	21
2.2 Cloning of the catalytic subunit of protein phosphatase 1	22
2.3 The structure of the protein phosphatase 1 catalytic subunit.....	24
2.4 Non-catalytic (regulatory) subunits and interacting proteins of protein phosphatase 1	26
2.5 Functions of Protein Phosphatase 1	29
2.5.1 Cell cycle regulation	29
2.5.2 Glycogen metabolism	31
2.5.3 Contractility	32
2.5.4 Morphogenesis.....	34
2.5.5 Spermatogenesis	35
2.5.6 Memory and learning.....	35
2.6 Conclusions	35
Acknowledgements	36
References	36
List of abbreviations:.....	43
3 Protein phosphatase 2A: A multifunctional regulator of cell signaling.....	45
Marc C. Mumby.....	45
Abstract	45
3.1 Introduction	45
3.2 The PP2A core dimer	46
3.2.1 The catalytic subunit	46
3.2.2 The scaffold subunit.....	49

3.3 PP2A regulatory subunits	51
3.3.1 PP2A holoenzyme formation.....	52
3.3.2 The R2 family	54
3.3.3 The R3 family	58
3.3.4 The R4 family	59
3.3.5 The R5 family	60
3.4 PP2A interacting proteins.....	62
References	63

4 Calcineurin: Roles of the Ca²⁺/calmodulin-dependent protein phosphatase in diverse eukaryotes..... 73

Zoe Hilioti and Kyle W. Cunningham.....	73
Abstract.....	73
4.1 Overview of calcineurin structure and function	73
4.2 Phylogenetic distribution of calcineurin in nature.....	75
4.3 Calcineurin-sensitive processes.....	77
4.3.1 Roles of calcineurin in Metazoa, a brief overview	77
4.3.2 Roles of calcineurin in Fungi.....	78
4.3.3 Roles of calcineurin in Mycetozoa	82
4.3.4 Absence of calcineurin in plants and alga.....	83
4.3.5 Roles of calcineurin in other eukaryotes.....	84
4.4 Summary and future prospects	84
References	85

5 Roles of mammalian protein phosphatase 2C family members in the regulation of cellular functions 91

Shinri Tamura, Ming Guang Li, Ken-ichiro Komaki, Masato Sasaki and Takayasu Kobayashi.....	91
Abstract.....	91
5.1 Introduction.....	91
5.2 Structure of the PP2C catalytic site.....	92
5.3 Regulation of stress-activated protein kinase signaling pathways.....	94
5.3.1 PP2C α	94
5.3.2 PP2C β	95
5.3.3 Wip1	95
5.3.4 PP2C ϵ	96
5.4 Cell cycle regulation.....	96
5.4.1 PP2C α and PP2C β	96
5.4.2 PP2C δ	97
5.5 Regulation of actin cytoskeleton organization	97
5.5.1 PP2C α	97
5.5.2 POPXs	97
5.6 Regulation of Wnt signaling pathways	98
5.6.1 PP2C α	98
5.6.2 ILKAP (PP2C δ).....	99

5.7 Regulation of the cystic fibrosis transmembrane conductance regulator	99
5.7.1 PP2C α	99
5.8 Regulation of pre-mRNA splicing.....	100
5.8.1 PP2C γ	100
5.9 Conclusions and Perspectives.....	101
References	102
6 PP5: the TPR phosphatase	107
Michael Chinkers.....	107
Abstract	107
6.1 Introduction	107
6.2 PP5: a TPR protein.....	108
6.3 Expression and localization	109
6.4 Regulation of PP5 activity.....	111
6.5 Inhibitors of PP5.....	112
6.6 PP5 binding proteins	113
6.6.1 ANP receptor	113
6.6.2 Heat shock protein 90 (hsp90)	114
6.6.3 ASK1	117
6.6.4 G α_{12} and G α_{13}	117
6.6.5 Copines	118
6.6.6 PP2A.....	118
6.6.7 Anaphase-promoting complex	120
6.6.8 CRY2.....	120
6.6.9 Other PP5-interacting proteins.....	121
6.7 Genetics of PP5	121
6.7.1 <i>S. cerevisiae</i>	121
6.7.2 <i>C. elegans</i>	122
6.7.3 <i>D. melanogaster</i>	122
6.7.4 Antisense studies.....	123
6.8 Conclusions	124
References	125
7 Protein histidine phosphatases in signal transduction and metabolism	131
Susanne Klump, Gunther Bechmann, Anette Mäurer, Josef Krieglstein	131
Abstract	131
7.1 Introduction	131
7.2 Protein histidine kinases at a glance.....	133
7.3 Histidine phosphatases in vertebrates.....	133
7.3.1 Proteins as a substrate	134
7.3.2 Phosphopeptides as a substrate	135
7.3.3 Phosphohistidine as a substrate.....	136
7.4 Histidine and aspartate phosphatases in bacteria.....	137
7.4.1 Aspartate phosphatases	138
7.4.2 Histidine phosphatases.....	139

7.5 Nucleoside diphosphate kinases.....	140
7.6 Concluding remarks	141
Acknowledgements	141
References	141
8 Anchoring of protein kinase and phosphatase signaling units	145
Philippe Collas, Thomas Küntziger, and Helga B. Landsverk	145
Abstract	145
8.1 Introduction.....	145
8.2 Intracellular targeting of cAMP signaling by A-kinase anchoring proteins.....	146
8.3 A signaling complex formed by AKAP79, PP2B/calcineurin, PKA, PKC, and MAGUK	147
8.4 AKAP220 anchors PKA, PP1, and GSK-3 β in a quaternary complex.....	148
8.5 Yotiao anchors PKA and PP1 at the NMDA receptor.....	150
8.6 Kinase/phosphatase adaptors at the centrosome/microtubule system .	150
8.6.1 Microtubule association.....	150
8.6.2 Centrosome association	152
8.7 Integration of cAMP and Ca ²⁺ signaling at the cardiomyocyte nuclear envelope by mAKAP.....	154
8.8 Targeting of PP1 to the nuclear envelope by AKAP149: implications on cell cycle progression	155
8.8.1 Targeting of PP1 to the nuclear envelope by AKAP149 is essential for reentry into interphase.....	156
8.8.2 AKAP149 is a B-type lamin specifier	157
8.8.3 AKAP149-PP1 association in G1: control of nuclear integrity ...	157
8.9 Anchoring of AMY-1 to S-AKAP84/AKAP149.....	158
8.10 Perspectives.....	158
Acknowledgments.....	159
References.....	159
List of abbreviations.....	164
9 Functional proteomics in phosphatase research.....	167
Nicole C. Kwiek, Timothy A. J. Haystead	167
Abstract	167
9.1 Introduction to functional proteomics	167
9.1.1 Protein phosphatase-1 research: Identification of novel regulatory subunits	168
9.1.2 Yeast two-hybrid systems and arrays	169
9.1.3 Microcystin affinity chromatography	170
9.2 PP1 research: Defining the regulation of regulatory subunits.....	174
9.2.1 Phosphorylation site analysis.....	175
9.2.2 Identification of the endogenous smooth muscle myosin phosphatase-associated kinase.....	176

9.3 PP1 Research: Identifying substrates of a PP1/regulatory subunit complex.....	177
9.3.1 Reg1p targets PP1 to dephosphorylate hexokinase II in <i>Saccharomyces cerevisiae</i>	177
9.4 Conclusions.....	180
Acknowledgments.....	180
References.....	180
10 Structure and function of the T-cell protein tyrosine phosphatase.....	185
Annie Bourdeau, Krista M. Heinonen, Daniel V. Brunet, Pankaj Tailor, Wayne S. Lapp, Michel L. Tremblay.....	185
Abstract.....	185
10.1 Cloning and characterization of T-cell protein tyrosine phosphatase (TC-PTP)	185
10.1.1 The gene.....	185
10.1.2 The promoter.....	186
10.1.3 The protein.....	186
10.2 Expression and localization of TC-PTP	188
10.2.1 TC-PTP tissue expression.....	188
10.2.2 Intracellular localization of TC-PTP.....	188
10.3 Analysis of TC-PTP function in vitro.....	190
10.3.1 Identification of downstream substrates.....	190
10.3.2 Cell cycle regulation and TC-PTP	192
10.4 Analysis of TC-PTP function in vivo.....	193
10.4.1 TC-PTP knockout mice.....	193
10.4.2 TC-PTP and hematopoiesis.....	193
10.4.3 TC-PTP and immune function	194
10.4.4 p53 and TC-PTP	195
10.5 Conclusion.....	196
Acknowledgments.....	197
References.....	197
11 Protein tyrosine phosphatase-based therapeutics: lessons from PTP1B.....	201
Jannik N. Andersen and Nicholas K. Tonks	201
Abstract.....	201
11.1 Introduction.....	201
11.2 PTP1B structure and mechanism.....	202
11.3 Substrate-trapping mutant PTPs.....	203
11.4 The biological function of PTP1B.....	205
11.5 Insights from the structure of PTP1B-substrate complexes.....	207
11.6 The development of PTP1B as a therapeutic target.....	210
11.7 Structure-based design of PTP1B inhibitors.....	211
11.8 Conclusions and perspectives.....	219
Acknowledgments.....	223
References.....	223

12 The CD45 phosphotyrosine phosphatase	231
Denis R. Alexander.....	231
Abstract	231
12.1 Introduction.....	231
12.2 CD45 regulates lymphocyte development.....	232
12.3 CD45 regulates the Src family tyrosine kinases	234
12.3.1 In T cell antigen receptor signalling	234
12.3.2 In B cell antigen receptor signalling	236
12.3.3 In integrin receptor signalling	237
12.3.4 In chemokine receptor signalling.....	237
12.4. The subcellular localisation of CD45 in relation to its substrates ...	238
12.4.1 CD45 and lipid rafts.....	238
12.4.2 CD45 and the immune synapse.....	239
12.5 How are the actions of CD45 regulated?.....	240
12.6 The role of CD45 isoforms.....	241
12.6.1 The exogenous ligand model	243
12.6.2 The size exclusion model.....	243
12.6.3 The cis-cis interaction model	244
12.6.4 The homodimerisation model	245
12.7 Concluding remarks	246
Acknowledgements	247
References	247
13 Receptor protein tyrosine phosphatases.....	253
Jeroen den Hertog.....	253
Abstract	253
13.1 Introduction.....	253
13.2 The function of RPTPs in vivo.....	254
13.2.1 DRPTPs in fly axonogenesis	255
13.2.2. RPTP function in the mouse	256
13.2.3 RPTPs and zebrafish.....	259
13.3 RPTP signalling	260
13.3.1 RPTP substrates	260
13.3.2 Ligand binding to RPTPs.....	263
13.3.3 Regulation of RPTPs by dimerization	264
13.3.4 Regulation of RPTPs by redox signalling.....	266
References	267
14 The Shp-2 tyrosine phosphatase.....	275
Lisa A. Lai, Chunmei Zhao, Eric E. Zhang, and Gen-Sheng Feng.....	275
Abstract	275
14.1 Introduction	275
14.2 Shp-2 function in development	276
14.3 Shp-2 and human diseases.....	277
14.4 Shp-2 in cell proliferation and differentiation	280
14.5 Shp-2 and cell motility	281

14.6 Shp-2 and cell apoptosis.....	282
14.7 Shp-2 and cytoplasmic signaling.....	283
14.7.1 Shp-2 plays a positive role in the Ras/MAPK pathway.....	284
14.7.2 Shp-2 is involved in the regulation of the JAK/STAT pathway.....	285
14.7.3 Shp-2 functions in other signaling pathways.....	286
14.8 Interaction of Shp-2 with scaffold proteins.....	286
14.8.1 Interaction with GAB proteins.....	286
14.8.2 Interaction with FRS proteins.....	288
14.8.3 Interaction with SHPS-1.....	289
14.9 Concluding remarks.....	290
Acknowledgements.....	290
References.....	290

15 SHP-1 twelve years on: structure, ligands, substrates and biological roles.....	301
Jean Gerard Sathish, Reginald James Matthews.....	301
Abstract.....	301
15.1 Introduction.....	301
15.2 Expression.....	302
15.3 Structure.....	303
15.3.1 SH2 domains and their ligands.....	303
15.3.2 PTP domain and substrate(s).....	309
15.3.3 Carboxy-terminus and potential adaptor role.....	312
15.4 Function.....	313
15.4.1 T lymphocytes.....	313
15.4.2 B lymphocytes.....	315
15.4.3 Natural killer cells.....	316
15.4.4 Myeloid lineage cells.....	317
15.5 Summary.....	319
Acknowledgements.....	319
References.....	319

16 The dual-specific protein tyrosine phosphatase family.....	333
Andres Alonso, Ana Rojas, Adam Godzik, Tomas Mustelin.....	333
Abstract.....	333
16.1 Introduction.....	333
16.2 Phylogeny and classification.....	338
16.3. Structural features of the DSP family.....	339
16.3.1 The catalytic domain.....	339
16.3.2 The rhodanese domain.....	344
16.4 Interaction of DSPs with their substrates.....	346
16.4.1 Interaction of classical DSPs with MAPKs.....	346
16.4.2 Interaction of atypical DSPs with their substrates.....	348
16.5 Regulation of DSPs.....	348
16.5.1 Transcriptional regulation of classical DSPs.....	348

16.5.2 Catalytic activation of classical DSPs by substrate binding	349
16.5.3 Regulation of DSPs by phosphorylation	350
16.6 Physiological roles	350
16.7 Conclusions and future perspectives	352
Acknowledgements	353
References	353

17 Tyrosine phosphatases in cancer: Targets for therapeutic intervention	359
Daniel F. McCain and Zhong-Yin Zhang	359
Abstract	359
17.1 Introduction	359
17.2 PTPases that activate SRC	360
17.3 PTPases involved in growth factor or cytokine signaling	362
17.4 FAP-1: A PTPase that suppresses apoptosis	363
17.5. The cell cycle	363
17.5.1 CDC25	364
17.5.2 KAP	365
17.5.3 CDC14	366
17.5.4 PRL	367
17.6 Conclusions	368
