Eastern Enlargement:
The Sooner, the Better?

EDITED BY
SVEN ARNDT, HEINZ HANDLER AND DOMINICK SALVATORE

Vienna, July 2000

CONTENTS

<i>Preface</i>	1
<i>European Academy of Excellence 2000</i>	
<i>Eastern Enlargement: The Sooner the Better?</i>	4
1. Background and aim	4
2. Issues for discussion	5
2.1. Session 1a: Narrowing the structural gap	5
2.2. Session 1b: In search of the optimal exchange rate regime	7
2.3. Session 2: The effects of fragmentation on employment	8
<i>What will Eastern Enlargement do to Accession Countries?</i>	
<i>Christina Burger, Heinz Handler</i>	10
1. Introduction	10
2. Income differences and their role for the adjustment process	11
3. Macroeconomic and exchange-rate stability as the basis for gaining competitiveness	13
4. Implementing the <i>acquis communautaire</i>	18
5. How to gain competitiveness in accession countries?	21
6. Eastern Enlargement: The sooner the better?	24
7. References	26

Narrowing the Structural Gap

<i>Narrowing the Structural Gap in Transition Economies</i>	
<i>Dominick Salvatore</i>	30
1. Introduction	30
2. Economic conditions in transition economies	31
3. Transition process and progress	37
3.1. A model of transition	37
3.2. Transition progress	40
4. Relative structure and international competitiveness of transition economies	41
5. International trade theory, trade restructuring and the revealed comparative advantage of transition economies	44
5.1. A model of trade restructuring during transition	44
6. Exchange rate arrangements	51
7. Conclusions	53
8. References	55
<i>Narrowing the Structural Gap: Structural Change in the Transition Economies, 1989 to 1999</i>	
<i>Michael Landesmann</i>	58
Introduction	58
1. Broad patterns of structural change: Deindustrialization – tertiarization – de-(and re-)agrarization	60
2. Employment, participation rates and unemployment	63
3. Patterns of industrial restructuring	66
4. Convergence in structures?	74
5. Trade specialization	78
5.1. Patterns of trade specialization with the EU: inter-industry specialization	78

5.2. Patterns of trade specialization with the EU: vertical product differentiation and product quality catching-up	82
6. Some conjectures on the dynamics of comparative advantage	84
6.1. Productivity and wage catching-up	86
6.2. Product quality catching-up by CEE producers in EU markets	89
7. FDI involvement by branch	93
8. Structural change in central and eastern Europe, EU accession and the further course of east-west European integration: concluding remarks	97
9. References	102

Which Reforms will be Necessary Following Eastern Enlargement?

Alfred Steinherr **104**

1. Introduction	104
2. The particular features of Eastern Enlargement	105
3. Integration goals and tasks	107
4. Allocation of tasks	112
5. Decision-making and organisational structure	113
6. The ideal extension of the EU	114
7. Conclusion	115
8. References	117

The Role of Time in EU Enlargement

Fritz Breuss **118**

1. Introduction	118
2. A simple model of EU enlargement	119
3. Who gains and who loses from a rapid enlargement?	123

4. Conclusions	129
5. References	129
6. Appendix: A simple model of EU enlargement	130

Trade Protection in Five EU Member Candidate Countries by Exchange Rate Adjustment, Customs Tariffs and Non-Tariff Measures

Gerhard Fink **133**

1. Introduction	133
2. Exchange rate policy	135
3. Customs tariffs	138
4. Non tariff barriers in the five EU member candidate countries	139
5. Technical barriers to trade	140
6. Labeling requirements	143
7. Breakdown by industry and country	146
8. Summary and conclusions	146
9. References	148

The EIB's possibilities to participate in infrastructural investments

Ewald Nowotny **150**

1. What is the EIB?	150
2. EIB and infrastructure investment	151
3. EIB and the northern dimension	152

Exchange Rate Regime in Central and Eastern Europe

<i>Exchange Rate Arrangements in Central and Eastern Europe</i> <i>Robert A. Mundell</i>	158
--	------------

<i>What Monetary Regime for Accession Countries?</i> <i>Jürgen von Hagen</i>	166
--	------------

<i>Exchange Rate Arrangements in Central and Eastern Europe – Comments</i> <i>Laszlo Halpern</i>	169
--	------------

<i>The Costs and Benefits of Euro-Isolation in Central-Eastern Europe before or instead of EMU Membership</i> <i>D. Mario Nuti</i>	171
--	------------

1. Introduction	171
2. Euroisation to date	173
3. Advantages of euroisation	175
4. Possible disadvantages: differences from EMU membership	177
5. Possible disadvantages: unsuitability of any peg to the euro	180
6. Costs and benefits for ECB and the EMU members	183
7. Convergence?	188
8. Improved trade access versus monetary integration	190
9. Conclusions	191
10. References	192

<i>Exchange rate systems and financial stability: Some general considerations</i>	
<i>Wolfgang Filc</i>	195
1. The role of financial markets in ensuring stable macroeconomic development	195
2. Requirements for financial market stability	197
2.1. Microeconomic requirements	197
2.2. Macroeconomic requirements	198
3. The contribution of the international monetary system to a stable international financial architecture	201
3.1. The role of exchange rates for aggregate economic stability	201
3.2. The system of "managed exchange rate flexibility"	202
4. References	209
<i>The Experience with Exchange Rate Adjustments during Transformation: The Case of the Czech Republic</i>	
<i>Marie Vavrejnova</i>	211
<i>Fragmentation of the Value Added Chain</i>	
<i>Eastern Enlargement and the Evolving Global Economy</i>	
<i>Sven W. Arndt</i>	216
1. Introduction	216
2. Recent developments	217
3. The gains from component specialisation and production sharing	220
4. Concluding remarks	225
5. References	226

International Fragmentation: A Policy Perspective

<i>Wilhelm Kohler</i>	227
1. Introduction	227
2. Is there a clear and useful meaning of "globalization"?	228
3. Fragmentation: A new form of globalization	230
4. Outsourcing: A trade off between cost savings and loss of employment?	232
5. Gain and pain: Overall welfare and redistribution	237
6. Fragmentation barriers: The role of preferential trading agreements	242
7. Conclusions	245
8. References	247

Outsourcing of Austrian Manufacturing to Eastern Countries: Effects on Productivity and the Labor Market

<i>Rene Dell'mour, Peter Egger, Klaus Gugler, Michael Pfaffermayr, Yvonne Wolfmayr-Schnitzer</i>	249
1. Introduction	249
2. The main stylized facts for Austrian manufacturing	251
2.1. Magnitude of international outsourcing	252
2.2. Magnitude and development of intrafirm trade	261
2.3. Evidence on employment of direct investing firms at the firm level	265
2.4. Outsourcing and total factor productivity growth	271
2.5. Outsourcing and the labor market	272
3. Econometric estimates of the impact of outsourcing for Austrian manufacturing	277
3.1. Productivity effects	277
3.2. Outsourcing and the effects on skill-specific employment	280
3.3. Induced mandated wage changes	285
4. Conclusions and policy implications	291
5. References	293

6. Appendix	296
6.1. Measuring international outsourcing by imports of intermediates	296
6.2. Estimating the impact of fragmentation on total factor productivity	297
6.3. Measuring the effects of outsourcing on wage inequality – mandated factor price changes.	299
6.4. Variables and data sources	301
 <i>Foreign Direct Investment of Austrian Firms in the CEECs</i> <i>Christina Burger</i>	 303
 <i>Conference Participants</i>	 309
 <i>Index</i>	 313
 <i>Publications</i>	 323
