Bibliography on Linear Logic

This bibliography is a by-product of the seminar on *Linear Logic and Applications* held at Carnegie Mellon University in Spring 1995. This seminar was organized by Frank Pfenning, Iliano Cervesato and Carsten Schürmann. Although it concentrates on linear logic and its applications in computer science, a few related references concerning other substructural logics (such as relevance logic or the Lambek calculus) are included.

This, like any bibliography, is incomplete. Any corrections, updates, comments, suggestion, new entries, new URL's for papers, etc. are very much appreciated. In particular, help us filling the "??". Please, send feedback to the maintainers.

When compiling this bibliography, we had the chance to access material from Andre Scedrov's and Harold Schellinx and Anne S. Troelstra's linear logic bibliographies, as well as from the DIKU types bibliography. We would like to acknowledge their authors.

This document is available in the following formats:

- BibTeX: `http://www.cs.cmu.edu/~carsten/linearbib/linear.bib`
- Html: `http://www.cs.cmu.edu/~carsten/linearbib/linearbib.html`
- Postscript: `http://www.cs.cmu.edu/~carsten/linearbib/linearbib.ps`
- DVI: `http://www.cs.cmu.edu/~carsten/linearbib/linearbib.dvi`

This bibliography is currently maintained by Iliano Cervesato (*iliano@cs.cmu.edu*) with the help of Carsten Schürmann (*carsten@cs.cmu.edu*) and Frank Pfenning (*fp@cs.cmu.edu*).
