

Intro to Data Structures

Lecture #6 – Cleaning Up Loose Ends

September 7, 2014

Mark Stehlik

Outline for Today

- Debrief Quiz 1
- Discuss HW 1
 - Which methods to write in what order?
 - Approach to testing/cases to consider
 - Block comments vs. inline comments
 - Local variables vs. instance variables vs. class variables
 - Modifying the Person class

The Scanner class (review)

Reading an int from the console (stdin):

```
Scanner s = new Scanner(System.in);  
int i = s.nextInt();
```

other useful Scanner methods:

nextDouble() - double

next() - String
