

PC-ICCN Clinical Workup Checklist

Health-care providers: the following is a list of diagnostic tests required before a patient can be referred to the Post-COVID-19 Interdisciplinary Clinical Care Network (PC-ICCN).

If your patient is exhibiting any of these symptoms, please order the corresponding tests. Once other diagnoses have been ruled, you can refer your patient to the Network.

- Fatigue
 - CBC, ferritin, TSH, B12
 - OSA testing (if high risk)
 - PHQ-9 for depression
 - GAD-7 for anxiety
- Brain fog
 - CBC, ferritin, TSH, B12
