

# NIH Update Following ACD Recommendations on Enhancing Rigor, Transparency, and Translatability in Animal Research

Michael S. Lauer, MD

NIH Deputy Director for Extramural Research

NIH Advisory Committee to the Director (ACD) Meeting (Virtual)

June 9, 2022

# ACD Enhancing Rigor, Transparency, and Translatability in Animal Research Working Group Members

## External Members

**Barbara Wold, PhD (Co-Chair)**

Bren Professor of Molecular Biology  
Merkin Institute for Translational Research  
California Institute of Technology

**Nancy Ator, PhD**

Professor of Behavioral Biology  
Johns Hopkins School of Medicine

**Lais Berro, PhD**

Postdoctoral Fellow  
University of Mississippi Medical Center

**Eliza Bliss-Moreau, PhD**

Associate Professor; Core Scientist University of California, Davis

**Romer A. Gonzalez Villalobos, MD, PhD, FAHA**

Senior Principal Scientist  
Janssen Research and Development, LLC

**F. Claire Hankenson, DVM, MS, DAACLAM**

Attending Veterinarian; Director, Campus Animal Resources; Professor  
Michigan State University

**Veronique Kiermer, PhD**

Publisher & Executive Editor  
PLOS

**Keisa W. Mathis, PhD**

Assistant Professor  
University of North Texas Health Science Center

**Sarah Nusser, PhD**

Professor of Statistics  
Iowa State University

**Sarah Nusser, PhD**

Professor of Statistics  
Iowa State University

**Regina Nuzzo, PhD**

Senior Advisor for Statistics  
American Statistical Association

**Eric Prager, PhD**

Associate Director, External Affairs Cohen Veterans Bioscience

**F. Daniel Ramirez, MD, MSc**

Cardiac Electrophysiology Fellow University of Ottawa  
Heart Institute CHU Bordeaux, IHU Liryc

**Karen Svenson, PhD**

Senior Scientific Program Manager and Research Scientist  
Jackson Laboratory

# ACD Enhancing Rigor, Transparency, and Translatability in Animal Research Working Group Members

## USG MEMBERS

**Lawrence A. Tabak, DDS, PhD (Co-Chair)**  
Principal Deputy Director, NIH

**Brian Berridge, DVM, PhD, DACVP**  
Associate Director, National Toxicology Program;  
Scientific Director Division National Toxicology Program  
National Institute of Environmental Health Science, NIH

**Paul Brown, PhD**  
Associate Director for Pharmacology and Toxicology  
Office of New Drugs, Center for Drug Evaluation and  
Research, FDA

**Janine Clayton, MD**  
Director  
Office of Research on Women's Health, NIH

**Joshua A. Gordon, MD, PhD**  
Director  
National Institute of Mental Health, NIH

**Michael Lauer, MD**  
Deputy Director for Extramural Research  
Office of Extramural Research, NIH

**Robyn Lee-Stubbs, MS, CPIA, PStat®**  
IACUC Chair/Statistician  
United States Army Medical Research Institute of Chemical Defense

**Glenn Merlino, PhD**  
Scientific Director for Basic Research  
Center for Cancer Research, National Cancer Institute, NIH

**Shai Silberberg, PhD**  
Director for Research Quality  
National Institute of Neurological Disorders and Stroke, NIH

**Carrie Wolinetz, PhD**  
Acting Chief of Staff; Associate Director  
Office of Science Policy, NIH

# Recommendations: Five Themes

1. Improve Study Design and Analytic Rigor

2. Address Bias, Incomplete Reporting and Questionable Research Practices

5. Measure and Evaluate Effectiveness and Costs

3. Improve Relevance and Use of Animal Models

4. Improve Methodologic and Results Reporting

# Overview

- EAWG detailed review of recommendations
- DPCPSI ORIP NOSI and concept clearance on rigor, reproducibility, and translatability of animal research
- Planned workshops
- Existing resources and opportunities to better leverage them
- Ongoing efforts to enhance rigor and peer review
- Shorter-term considerations for discussion

EAWG = Extramural Activities Working Group

DPCPSI ORIP = Division of Program Coordination, Planning, and Strategic Initiatives

NOSI = Notice of Special Interest

# Notice of Special Interest (NOSI): Development of Resources and Technologies for Enhancing Rigor, Reproducibility, and Translatability of Animal Models in Biomedical Research

**Notice Number:**

NOT-OD-22-039

## Key Dates

---

**Release Date:**

December 7, 2021

---

**First Available Due Date:**

February 16, 2022

---

**Expiration Date:**

May 08, 2024

## Related Announcements

[PAR-21-167](#) - Development of Animal Models and Related Biological Materials for Research (R21 Clinical Trial Not Allowed)

## Issued by

Division of Program Coordination, Planning and Strategic Initiatives, Office of Research Infrastructure Programs ([ORIP](#))

# ORIP NOSI Goals

- Exploratory/developmental and highly innovative projects aimed at developing broadly applicable technologies, tools, and resources for validating animal models and enhancing the rigor, reproducibility, and translatability of animal research
- [Proposals] ... must either address research interests of multiple NIH ICs, explore multiple body or organ systems, or be applicable to diseases and processes that impact multiple body or organ systems.

# Concept Clearance

- DPCPSI ORIP presented to Council of Councils on May 19, 2022
- Grant mechanisms
  - 2-year R21
  - 5-year R01
  - 4-year R24 and U24
  - Small business
- Proposed projects must demonstrate how proposed resources and technologies will impact rigor and reproducibility of animal studies

<https://dpcpsi.nih.gov/sites/default/files/Day1-1150AM-ORIP-Concept-Rigor-Reproducibility-Zou-slidesREV.pdf>

<https://dpcpsi.nih.gov/sites/default/files/Day1-1150AM-ORIP-Concept-Rigor-Reproducibility-Zou-background-508.pdf>

# Other Planned Workshops

- ORIP: animal models and related resources for COVID research
  - Leverages NIH-wide portfolio analysis
- ORIP: enhance rigor and reproducibility by managing extrinsic factors
  - Assess equipment, instrumentation, and extramural construction projects
- National Academies Institute for Laboratory Animal Research (ILAR) project on effective communication with the general public about scientific research that requires work with animals

# Existing Resources

## Statistical Topics for Reproducible Animal Research

Andrew W. Brown and David B. Allison, Indiana University School of Public Health-Bloomington; Tapan Mehta and Stephen Watts, University of Alabama at Birmingham, R25 GM116167

Preclinical research involving animal models can be improved when appropriate experimental, analytical, and reporting practices are used. We produced a series of animated vignettes with quantitative experts and laboratory scientists discussing aspects of study design, interpretation,

## Controls in Animal Studies for Rigor and Reproducibility

Christina N. Bennett and Marsha Lakes Matyas, American Physiological Society, R25 GM116166

This teaching module was designed to help biomedical researchers understand the changing standards of practice for studies using animals as research models. This module is comprised of three sections that focus on developing strong skills in designing animal studies, analyzing results from those studies, and reporting findings that are reproducible. Modules are designed to be used by higher education institutions, laboratory groups, individuals, and professional societies.

# Highlighting Other Resources

---

## Resources for Preparing Your Application

Learn how to prepare a rigorous application with select excerpts of rigor from awarded applications, authentication plan examples, and resources like the experimental design assistant (EDA), guidance on sample size calculation, [and more](#).

### Is the following information reported in the study?:

- |   |   |
|---|---|
| ✗ Power/Sample Size Calculation               | ✓ Randomized into Groups                          |
| ✓ Blinded for Treatment                       | ✓ Blinded for Outcome Measures                    |
| ✓ Pharmacokinetic Measures                    | ✓ Pharmacodynamic Measures                        |
| ✓ Toxicology Measures                         | ✓ ADME Measures                                   |
| ✓ Biomarkers                                  | ✓ Dose  |
| ✓ Formulation                                 | ✓ Route of Delivery                               |
| ✓ Duration of Treatment                       | ✓ Frequency of Administration                     |
| ✓ Age of Animal at the Beginning of Treatment | ✓ Age of Animal at the End of Treatment           |
| ✓ Sex as a Biological Variable                | ✓ Study Balanced for Sex as a Biological Variable |
| ✗ Number of Premature Deaths                  | ✗ Number of Excluded Animals                      |
| ✓ Statistical Plan                            | ✓ Genetic Background                              |
| ✗ Inclusion/Exclusion Criteria Included       | ✓ Conflict of Interest                            |

# Ongoing Rigor Efforts

- CSR Advisory Council Workgroup on Simplifying Review Criteria
  - Focus on what's important: five to three criteria
    - Should it be done? → Importance of the science
    - Can it be done well? → Feasibility and rigor
    - Will it be done? → Investigators and environment
  - Further ACD discussion later this year
- NIH Data Management and Sharing Policy (later this ACD)

# NINDS Activities

---

Funding Opportunity Title

Creating an Educational Nexus for Training in Experimental Rigor (CENTER) (UC2 Clinical Trial Not Allowed)

---

Funding Opportunity Title

Materials to Enhance Training in Experimental Rigor (METER) (UE5 Clinical Trial Not Allowed)

[These] Funding Opportunity Announcements (FOAs) ... together aim to facilitate teaching of fundamental principles of rigorous biomedical research by developing an innovative online educational resource for use by a broad range of researchers in an array of learning environments.

# Possible Short to Intermediate Efforts

- Guide Notice to encourage use of ARRIVE Guidelines when reporting results of NIH-funded animal research
  - Many journals already encourage or require ARRIVE
- Fund statistical cores to support animal researchers at under-resourced institutions
- Non-monetary prize to highlight exemplary work in study design and analysis in animal research
