

CosmoPhotoz - GLM PhotoZ estimation

Data Input

☒ Use PHAT0 data

Data for training

[Browse...](#) No file selected.

Data to estimate photoZ

[Browse...](#) No file selected.

Control and options

☐ Use robust PCA

Number of Principal Components:

8

Points in Pred vs. Obs. plot:

5000

Note: if 0, all points will be used.

Method:

Bayesian

Family:

Gamma
