

## DESIGN RECOMMENDATIONS

### TECHNICAL REQUIREMENTS

- T-R1** The interface adapts to the level of skills of the operator
- T-R2** The system can be used by low educated operators
- T-R3** The system can be used by physically and cognitively impaired operators
- T-R4** The system can be used by people with low computer skills
- T-R5** The system enforces the correct procedures
- T-R6** The operator feels satisfied from the interaction experience
- T-R7** Interaction with the system generates a low level of stress for the operators

### ELSI REQUIREMENTS

- ELSI-R1** The system prevents inducing strain itself
- ELSI-R2** The system considers anonymized personal data
- ELSI-R3** The system uses collected data not for any disadvantage for the employer
- ELSI-R4** The system depicts relevant user requirements and prevents discrimination
- ELSI-R5** The system should meet all relevant safety criteria
- ELSI-R6** The system should not distract the operator
- ELSI-R7** The system should not cause injuries by means of inductive measuring technology
