

## raw source code

```
public Integer getMinElement(List myList) {  
    if(myList.size() >= 0) {  
        return ListManager.getFirst(myList);  
    }  
    return 0;  
}
```

## abstracted code

```
public TYPE_1 METHOD_1 ( TYPE_2 VAR_1 )  
{ if ( VAR_1 . METHOD_2 ( ) >= INT_1 )  
{ return TYPE_3 . METHOD_3 ( VAR_1 ) ; }  
return INT_1 ; }
```

## abstracted code with idioms

```
public TYPE_1 METHOD_1 ( List VAR_1 )  
{ if ( VAR_1 . size ( ) >= 0 )  
{ return TYPE_2 . METHOD_3 ( VAR_1 ) ; }  
return 0 ; }
```
