

$$n(0^\circ) = \frac{\Delta\epsilon(0^\circ)}{\epsilon_1(0^\circ)} = \frac{U(0^\circ)}{U_1(0^\circ)}$$

(a)

$$\epsilon_1(\theta) = \epsilon_1(0^\circ) \times \sec \theta$$

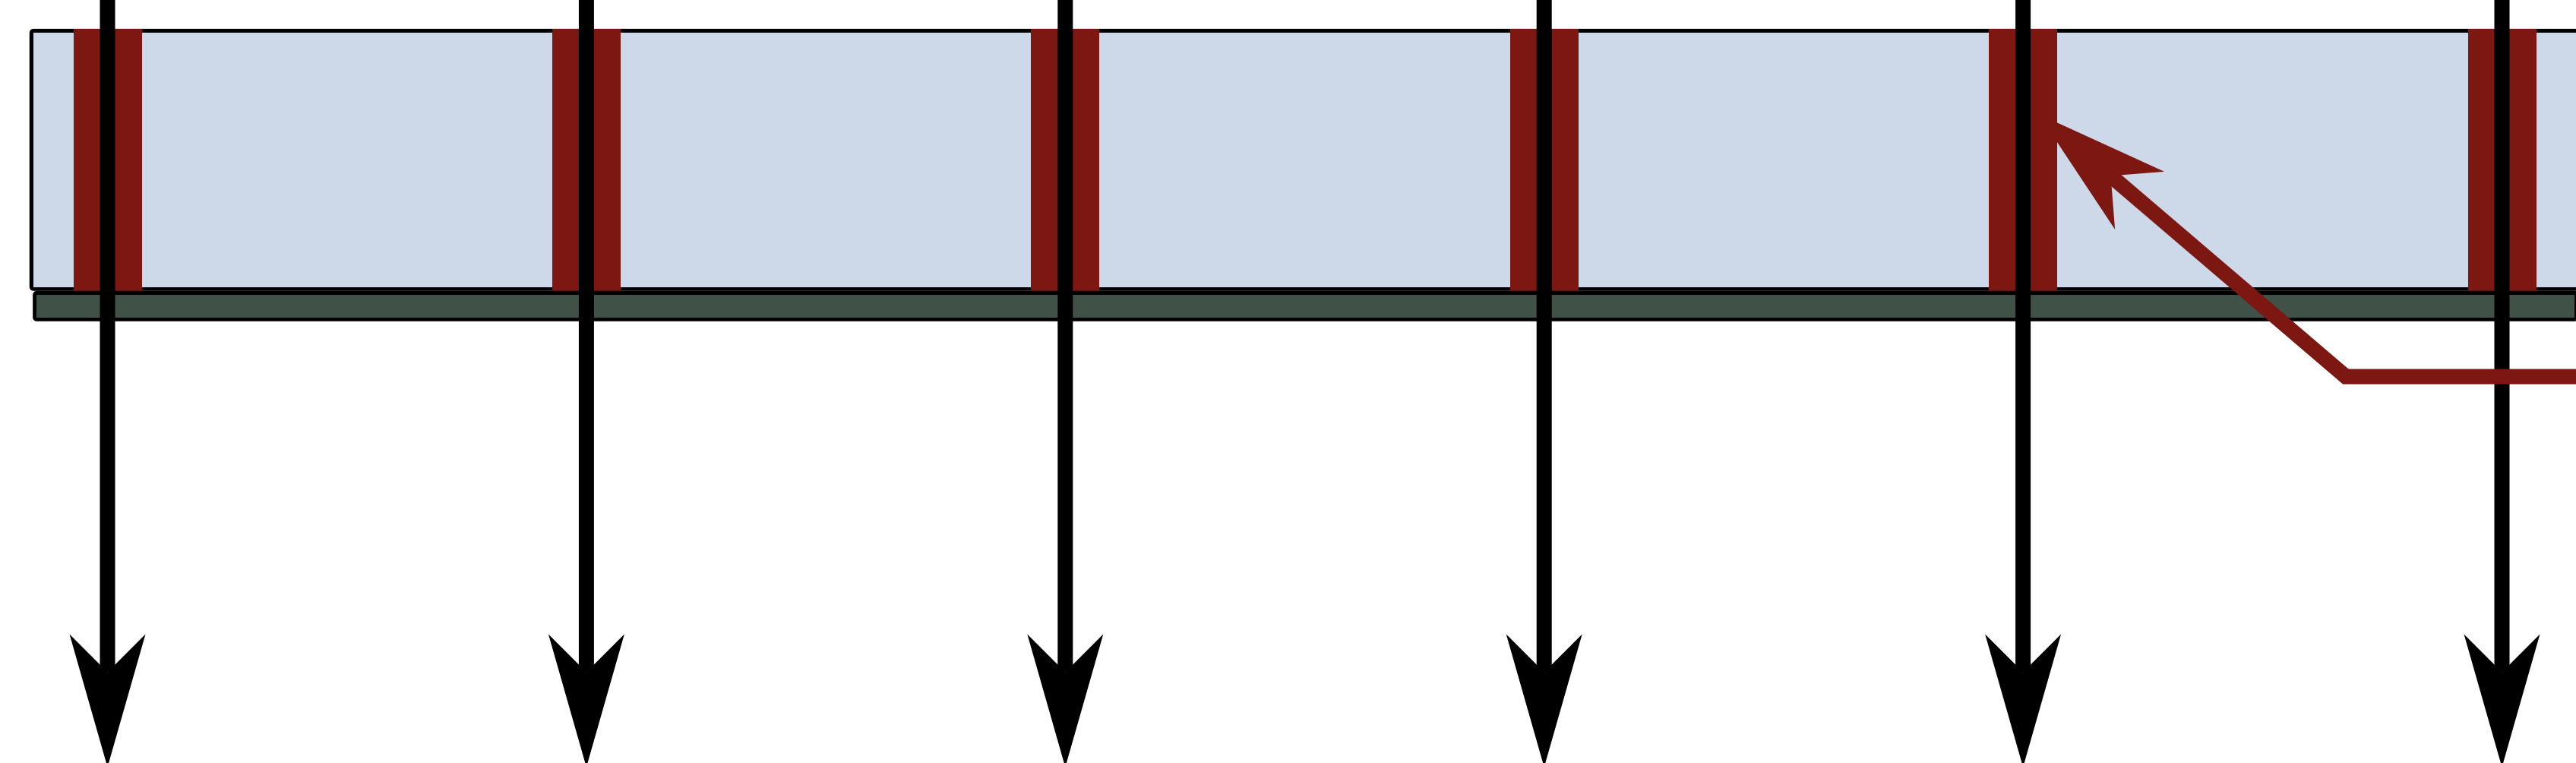

$$\Delta\epsilon(\theta) = \epsilon_1(\theta) \times n(\theta) =$$

$$= [\epsilon_1(0^\circ) \cdot \sec \theta] \times [n(0^\circ) \cdot \cos \theta] =$$

$$= \epsilon_1(0^\circ) \times n(0^\circ) = \Delta\epsilon(0^\circ)$$

$$s \times \cos \theta$$

(b)

$$s$$

$$\epsilon_1(0^\circ)$$

$$\Delta\epsilon(0^\circ) = \epsilon_1(0^\circ) \times n(0^\circ)$$
