

What food would you recommend to enhance my REM sleep?

I recommend consuming a food item that is rich in **Methionine** (g). To incorporate Methionine into your diet, you can consider adding foods such as lean meats (beef, chicken, turkey), fish, eggs, and dairy products like milk, cheese, and yogurt.

Could you explain why do you recommend me this?

I recommend consuming foods rich in **Methionine** to improve your REM sleep duration because the nutrition effects indicate that **Methionine** has a positive impact on REM sleep duration, with an increase of 19.1345 per unit. This means that increasing your intake of Methionine through food sources can potentially lead to longer REM sleep periods
