RelectiveSummarizer + Follow-up

**Follow-up Question:**

You mentioned that your weight has increased a lot. Can you tell me more about it?

### Scenario 1:

**Follow-up Response:**  
I have upcoming deadlines.  
So I often do stress eating.

 **R-V  
Reasoner**

 **Valid**

 **R-V  
Validator**

**Validation:**

It sounds like you're facing pressure from deadlines, leading to stress eating and weight gain. This is a common response to stress, but you can manage it by identifying triggers, opting for healthy snacks, and maintaining regular meal times. Talking to friends, family, or a therapist can also provide support and help you find healthier coping strategies.

### Scenario 2:

**Follow-up Response:**  
I am a ISFP. I like to follow  
my heart.

 **R-V  
Guide**

**Follow-up Guide:**

It's interesting to know about your personality type. However, to better understand your situation, could you share more about your eating habits recently? Or how your daily routine might have affected your weight change?

**Follow-up Response 2:**  
My personality leads me to  
just eat whenever I want.  
And I usually don't control  
how much I eat.

 **R-V

 **Valid**

 **R-V  
Validator**

**Validation:**

I completely understand that as an ISFP, rules may not be your preference. Nonetheless, it's crucial to be aware of how your eating habits affect your health. If you've gained weight and believe your eating habits are a factor, consider adjusting your diet and lifestyle. Seeking guidance from a healthcare professional or dietitian can assist in creating a tailored plan for a healthier lifestyle.
