Kang, Iksoon (2016) Animal Science	Professor	B.S., Kon-Kuk University, Seoul, Korea, 1988; M.S., California State University, Fresno, 1991; Ph.D., Texas A M University, 1996.
Kantorowski, Eric J. (2004) Chemistry and Biochemistry	Professor	B.S., California State University, Fullerton, 1993; Ph.D., University of California, Davis, 1998.
Kasper, Eric P. (1997) Civil and Environmental Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1991; M.S., University of California, Davis, 1992; Ph.D., University of California, Berkeley, 1997. Registered Professional Engineer, California.
Kathuria, Ajay (2014) Industrial Technology and Packaging	Associate Professor	B.S., GJUST, India, 2002; M.S., Michigan State University, 2007; Ph.D., Michigan State University, 2013.
Kato, Goro C. (1981) Mathematics	FERP	B.S., Shizuoka University, Japan, 1972; M.A., West Virginia University, 1974; Ph.D., University of Rochester, 1979.
Katona, Thomas M. (2014) Biomedical Engineering	Associate Professor	B.S., Westmont College, 1996; M.S., University of California, Santa Barbara, 2000; Ph.D., University of California Santa Barbara, 2003; M.B.A., University of South Carolina, 2007.
Kauffmann, Krista J. (2012) English	Associate Professor	B.A., Goshen College, 1999; M.A., University of Wisconsin-Madison, 2001; Ph.D., 2009.
Kaul, Anton (2003) Mathematics	Professor	B.S., University of California, Davis, 1994; M.S., Oregon State University, 1996; Ph.D., 2000.
Kazerouni, Ayaan M. (2020) Computer Science	Assistant Professor	B.S., University of West Georgia, USA, 2015; Ph. D., Virginia Tech, 2020
Keadle, Sarah K. (2016) Kinesiology	Associate Professor	B.S., Lake Forest University, 2006; M.S., University of Massachusetts, Amherst, 2008; Ph.D., University of Massachusetts, Amherst, 2012; MPH, Harvard School of Public Health, 2013.
Kean, Andrew J. (2004) Mechanical Engineering	Professor	B.E., The Cooper Union, 1997; M.S., University of California, Berkeley, 1999; Ph.D., 2003.
Kearns, Timothy J. (1985) Computer Science	Associate Professor	B.A., Boston College, 1969; M.S., University of Notre Dame, 1970; Ph.D., 1976.
Keeling, Elena L. (1997) Biological Sciences	Professor	B.S., Yale University, 1989; Ph.D., University of California, San Francisco, 1996.
Keen, Aaron W. (2002) Computer Science	Professor	B.S., University of California, Davis, 1997; M.S., 2000; Ph.D., 2002.
Keese, James R. (2003) Social Sciences	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1987; M.A., American Graduate School of International Management, 1989; Ph.D., University of Arizona, 1996.
Keesey, Douglas (1988) English	Professor and Department Chair	B.A., University of California, Berkeley, 1982; M.A., 1984; Ph.D., Princeton University, 1988.
Keif, Malcolm G. (1989) Graphic Communication	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1986; M.A., California State University, Long Beach, 1989; Ph.D., University of Missouri, 1995.
Keim, Nathan C. (2014) Physics	Associate Professor	B.S., Haverford College, 2004; Ph.D., University of Chicago, 2010.
Keller, John M. (2006) Physics	Professor	B.S., Stanford University, 1991; M.A., 1992; M.S., University of Colorado, Boulder, 1999; Ph.D., University of Arizona, 2006.

Kelting, Scott D. (2007) Construction Management	Professor	B.S., California Polytechnic State University, San Luis Obispo, 2000; M.S., 2003; Ed.D., University of California Santa Barbara, 2011. Certified Green Professional (CGP), Certified Aging-in-Place Specialist (CAPS), LEED Accredited Professional (LEED AP).
Kelting, Mary (2012) Orfalea College of Business	Assistant Dean	B.A., University of Massachusetts Amherst, 1996; M.B.A., Pepperdine University, 2001.
Kennelly, Brian (2006) World Languages and Cultures	Professor	B.A., University of California, Davis, 1986; M.A., University of Virginia, 1989; Ph.D., New York University, 1996.
Khosmood, Foaad (2011) Computer Science, Computer Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1999; M.S., 2005; Ph.D., University of California, Santa Cruz, 2011.
Kingsbury, Kevin B. (1996) Chemistry and Biochemistry	Professor	B.S., College of William and Mary, 1986; Ph.D., Stanford University, 1993.
Kirby, David A. (2019) Interdisciplinary Studies in the Liberal Arts	Professor and Department Chair	B.S., University of Illinois-Champaign/Urbana; Ph.D., University of Maryland-College Park
Kirk, Colleen M. (2001) Mathematics	Professor	B.S., Stanford University, 1994; M.S., Southern Illinois University, Carbondale, 1995; Ph.D., Northwestern University, 1999.
Kiste, Alan L. (2011) Chemistry and Biochemistry	Professor	B.S., Calvin College, 1993; Ph.D., University of Michigan, 2009.
Kitts, Christopher L. (1995) Biological Sciences	Professor Emeritus (FERP)	B.Sc., University of Auckland, New Zealand, 1984; Ph.D., University of California, Santa Cruz, 1992.
Klay, Jennifer L. (2006) Physics	Professor	B.S., University of California, Los Angeles, 1994; M.S., University of California, Davis, 1998; Ph.D., 2001.
Kline, Andrew (2017) Construction Management	Assistant Professor	B.S., California Polytechnic State University, San Luis Obispo, 2011; M.B.A., Sam Houston State University, 2017; LEED Green Associate.
Klisch, Stephen M. (2001) Mechanical Engineering	Professor	B.S., University of Virginia, 1991; M.S., 1994; Ph.D., University of California, Berkeley, 1999.
Knight, Charles A. (2003) Biological Sciences	Professor	B.S., Western Washington University, 1996; Ph.D., Stanford University, 2002.
Kolegraff, Stacy (2009) Construction Management	Assistant Professor	B.S., California Polytechnic State University, San Luis Obispo, 2002; M.A. Management, University of Redlands School of Business 2008.
Kolkailah, Faysal (1984) Aerospace Engineering	Professor Emeritus (FERP)	BS in Aerospace Engineering from Cairo University (Egypt) in 1969, MS in Aerospace Engineering from University of Cincinnati (Ohio) in 1978 and my Ph.D in Mechanical Engineering from Louisiana State University, LSU, (Baton Rouge) in 1982.
Kolluru, Gita R. (2008) Biological Sciences	Professor	B.Sc., Queen's University, Kingston, Canada, 1991; M.A., University of California, Riverside, 1994; Ph.D., 1999.
Kolodziejski, Lauren R. (2014) Communication Studies	Associate Professor and Department Chair	B.A., B.S., Winthrop University, 2004; M.A., University of Colorado, Boulder, 2010; Ph.D., University of Washington, 2014.
Krifka, Laura (2018) Art and Design	Associate Professor	B.F.A., California Polytechnic State University, San Luis Obispo, 2008; M.F.A., University of California, Santa Barbara, 2010.
Kuhn-Choi, Don H. (2003) Architecture	Professor	A.B., Princeton University, 1988; M.Arch., Rice University, 1993; Ph.D., U.C. Berkeley, 2003.
Kurfess, Franz J. (2000) Computer Science	Professor	M.S., Technical University of Munich, 1984; Ph.D., 1990.
Kuriabova, Tatiana (2014) Physics	Associate Professor	Honors Diploma in Physics, Ivanovo State University, Ivanovo, Russia, 1996; M.S., University of California, Los Angeles, 2001; Ph.D., 2008.
La Frano, Michael (2016) Food Science and Nutrition	Associate Professor	B.S. Loma Linda University, 2007; Ph.D. University of California, Davis, 2012.
Lacanieta, Andrew (2019) Experience Industry Management	Assistant Professor	B.A., Brigham Young University, 2014; M.S., 2016; Ph.D., Texas A M University, 2018.
Laiho, Lily (2007) Biomedical Engineering	Professor and Department Chair	B.S., Stanford University, 1995; M.S., 1996; Ph.D., Massachusetts Institute of Technology, 2004.
Lambertz-Berndt, Megan M. (2015) Communication Studies	Associate Professor	B.A., Delaware State University, 2009; M.A., University of Nevada Las Vegas, 2011; Ph.D., University of Wisconsin-Milwaukee, 2016.

Lammert, Amy (2008) Food Science and Nutrition	Professor	B.S., Michigan State University, 1991; M.S., University of Illinois, 1993; Ph.D., 1997.
Lange, Karen F. (1989) Architecture	Professor	B.Arch., California Polytechnic State University, San Luis Obispo, 1980; M.Arch., Columbia University, 1982. Registered Architect, California.
Langner, Carrie A. (2008) Psychology and Child Development	Professor	B.A., University of Michigan, 1997; Ph.D., University of California, Berkeley, 2005.
Lappe, Martine Danielle (2018) Social Sciences	Assistant Professor	BA, University of California-San Diego; PhD, University of California-San Francisco.
Lathrop, Amanda A. (2009) Food Science and Nutrition	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1999; M.S., Purdue University, 2002; Ph.D., 2005.
Latner, Michael (2008) Political Science	Professor	B.A., California State University, Chico, 1995; M.A., University of California, Irvine, 2006; Ph.D., 2008.
Laursen, Peter T. (2007) Architectural Engineering	Professor	M.S., University of California, San Diego; Ph.D., University of Auckland, New Zealand, 2003. Registered Civil Engineer, California.
Laver, Gary D. (1998) Psychology and Child Development	Professor	B.A., University of California, Santa Cruz, 1983; M.A., Claremont Graduate University, 1987; Ph.D., 1992.
Lawson, John W. (2009) Architectural Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1983; M.S., Stanford University, 1986. Registered Structural Engineer and Civil Engineer, California, Arizona.
Lease, Terry (2019) Wine and Viticulture	Professor	B.S., Wake Forrest University, 1983; M.Tax Baylor University, 1985, PhD. University of Southern California 1996
Lecat, Benoit (2015) Wine and Viticulture	Professor and Department Head	M.S., Graduate School of Business Students, KULeuven, Belgium, 2000; Ph.D., FUCAM, branch of LOUVAIN School of Management, UCL Campus of Mons, Belgium, 2006. Level 4 DipWSET
Lee, Linda (2009) Psychology and Child Development	Professor	B.A., University of California, Los Angeles, 1999; M.Ed., Harvard Graduate School of Education, 2000; Ph.D., University of California, Los Angeles, 2007.
Lee, Jean L. (2014) Materials Engineering	Associate Professor	S.B., Massachusetts Institute of Technology, 1988; Ph.D. Cornell University, 1996.
Lee, Jess (2020) Social Sciences	Assistant Professor	B.A. in Gender Studies/2010/Mount Holyoke College;M.A. in Liberal Studies/2014/City University of New York Graduate Center;M.A. in Sociology/2017/University of California, Irvine;Ph.D. in Sociology/2020/ University of California, Irvine
Lehr, Corinne (2006) Chemistry and Biochemistry	Professor	B.Sc., University of Calgary, 1994; Ph.D., University of British Columbia, 2003.
Lehr, Jane L. (2007) Ethnic Studies, Women's, Gender and Queer Studies	Professor	B.A., University of Rochester, 1997; M.S., Virginia Polytechnic Institute and State University, 2002; Ph.D., Virginia Polytechnic Institute and State University, 2006.
Leithner, Anika (2006) Political Science	Professor and Department Chair	Vordiplom, Friedrich-Alexander-Universität Erlangen-Nuremberg, Germany, 1999; M.A., University of Colorado, 2002; Ph.D., 2006.
Lema, Sean C. (2011) Biological Sciences	Professor	B.S., University of California, Davis, 1999; M.S., 2001; Ph.D., 2004.
Lemieux, Patrick (2007) Mechanical Engineering	Professor	B.Sc.Eng., University of New Brunswick, Fredericton, Canada, 1991; M.Sc., Cranfield Institute of Technology, Bedford, England, 1992; Ph.D., California Institute of Technology, 1999.
Lepore, Jason (2007) Economics	Professor	B.A., University of California, Irvine, 2002; M.A., University of California, Davis, 2003; Ph.D., 2007.
Lertwachara, Kevin (2004) Management, HR, and Information Systems	Professor	B.S., King Monkut's Institute of Technology, Thonburi, Bangkok, Thailand, 1994; M.B.A., Westminster College, 1996; Ph.D., University of Connecticut, 2004.
Liddicoat, Albert (2002) Electrical Engineering	Professor	B.S. EL, Cal Poly, SLO, 1989; M.S. EE, Stanford University, 1997; M.S. IE Engineering Management, Stanford University 1999, Ph.D. EE, Sanford University, 2002.
Liese, Jeffrey E. (2008) Mathematics	Professor	B.S., California Polytechnic State University, San Luis Obispo, 2000; M.A., University of California, San Diego, 2004; Ph.D., 2008.
Lin, Patrick (2007) Philosophy	Professor	B.A., University of California, Berkeley, 1990; M.A., University of California, Santa Barbara, 1995; Ph.D. 1997.

Lin, Joyce T. (2013) Mathematics	Associate Professor	B.A., University of Virginia, 2004; Ph.D., University of North Carolina at Chapel Hill, 2009.
Lin, Kevin (2014) Experience Industry Management	Associate Professor	B.A., Beijing International Studies University, 2008; M.A., California State University, Chico; Ph.D., Pennsylvania State University, 2014.
Liu, Bo (2014) BioResource and Agricultural Engineering	Associate Professor	B.S., Northeastern University, China, 2009; M.S., Colorado State University, Pueblo, 2011; M.S., University of Missouri, Columbia, 2013; Ph.D., University of Missouri, Columbia, 2014.
Livingston, Peter A. (2016) BioResource and Agricultural Engineering	Professor and Department Head	B.S., University of Arizona, 1981; MS, Colorado State University, 1982; PhD, University of Arizona 2013. Registered Agricultural Engineer, AZ.
Liwanag, Heather (2015) Biological Sciences	Associate Professor	B.S., University of California, San Diego, 2001; Ph.D., University of California, Santa Cruz, 2008.
Lloyd-Moffett, Stephen (2005) Philosophy	Professor	B.A., Claremont McKenna College, 1994; M.Th., St. Vladimir's Orthodox Seminary, 2004; M.A., University of California, Santa Barbara, 2001; Ph.D., 2005.
Loberg, Molly J. (2007) History	Professor	B.A., Pacific Lutheran University, 1998; M.A., Princeton University, 2002; Ph.D., 2006.
LoCascio, James Gaspare (1981) Mechanical Engineering	Professor Emeritus (FERP)	B.S., Newark College of Engineering, 1970; M.S., University of California, Santa Barbara, 1971; Ph.D., 1988.
Lohmar, Bryan (2022) Agribusiness	Professor and Department Head	B.A., University of Minnesota, 1987; Ph.D., University of California, Davis, 2000.
London, Blair (1993) Materials Engineering	Professor Emeritus (FERP)	B.S., Drexel University, 1981; M.S., Stanford University, 1983; Ph.D., 1986.
Long, Todd (2004) Philosophy	Professor	B.A., University of Southern Mississippi, 1986; M.A., 1995; M.A., University of Wales, 2000; M.A., University of Rochester, 2002; Ph.D., 2003.
Lopus, Sara E. (2017) Social Sciences	Associate Professor	B.S., University of California, Berkeley, 2005; M.S., University of California, Davis, 2009; Ph.D., University of California, Berkeley, 2015.
Lowham, Elizabeth A. (2007) Political Science	Professor	B.A., Carleton College, 2001; M.A., University of Colorado, 2003; Ph.D., 2007.
Lucas, Michael Austin (1998) Architecture	Professor Emeritus	B.Arch., University of Cincinnati, 1979; M.Arch, Morgan State University, 1995. Registered Architect, Maryland.
Lund, Ulric J. (2001) Statistics	Professor	B.S., University of California, San Diego, 1990; M.S., University of California, Santa Barbara, 1993; Ph.D., 1998.
Lundquist, Tryg J. (2006) Civil and Environmental Engineering	Professor	B.A., University of California, Berkeley, 1989; M.S., 1992; Ph.D., 2006. Registered Civil Engineer, California.
Lupo, Christopher (2008) Computer Science	Professor and Department Chair	B.S., California State University, Fresno, 1997; M.S., University of California, Davis, 2007; Ph.D., 2008.
Lutz, Benjamin (2018) Mechanical Engineering	Assistant Professor	B.S., Virginia Tech, 2011; M.Eng., Virginia Tech, 2016; Ph.D., Virginia Tech, 2017
Lynch, Joseph (2001) Philosophy	Professor Emeritus (FERP)	B.A., Virginia Commonwealth University, 1982; M.A., Claremont Graduate School, 1985; Ph.D., 1989.
Ma , Ruoxi (2018) Graphic Communication	Assistant Professor	B.S., Qingdao University of Science of Technology, 2010; M.S., Xi'an University of Technology, 2012; Ph.D., Western Michigan University - Kalamazoo, 2018.
MacCarley, Arthur Carl (1988) Electrical Engineering	Professor	B.S., University of California, Los Angeles, 1976; M.S., 1978; Ph.D., Purdue University, 1987; Registered Professional Engineer, Colorado.
MacDougall, Neal A. (1997) Agribusiness	Professor	B.A., Williams College, 1984; Ph.D., University of California, Berkeley, 1999.
Macedo, Jose (2002) Industrial and Manufacturing Engineering	Professor Emeritus (FERP)	B.S., Catholic University of Peru, Peru, 1982; M.S., University of California, Berkeley, 1984; Ph.D., Lehigh University, 1991. Registered Professional Engineer, Texas.
Machamer, Joshua T. (2003) College of Liberal Arts	Associate Dean	B.A., Whittier College, 1993; M.F.A., Pennsylvania State University, 2000.
Mackin, Thomas J. (2005) Mechanical Engineering	Professor	B.S., The Pennsylvania State University, 1980; M.S., 1987; Ph.D., 1991.
Macro, Kenneth L. (2000) Graphic Communication	Professor	B.A., Pennsylvania State University, University Park, 1993; M.A., The University of Akron, 2000; Ph.D., Walden University, 2011.

Maddren, Jesse (1999) Mechanical Engineering	Professor Emeritus (FERP)	B.S., University of California, Santa Barbara, 1985; M.S., 1988; Ph.D., 1994. Registered Professional Engineer, California.
Mahadev, Sthanu (2016) Mechanical Engineering	Assistant Professor	B.S., Anna University, Chennai India, 2008, M.S., The University of Texas at Arlington, 2011, Ph.D., 2015.
Main, Kelly D. (2007) City and Regional Planning	Associate Professor	B.A., University of California, Davis, 1982; M.A., Brown University, 1983; Ph.D., University of California, Los Angeles, 2007.
Maitland, Padma (2019) Architecture	Assistant Professor	B.A., University of California, Berkeley, 2005; M.Arch., Princeton University, 2009; M.A., South and Southeast Asian Studies, 2016, Ph.D., Architectural History, Theory and Society, University of California, Berkeley, 2018.
Malama, Bwalya (2014) Natural Resources Management and Environmental Sciences	Associate Professor	B.S., University of Arizona, 1999; M.S., University of Arizona, 2001; Ph.D., University of Arizona, 2006.
Manjarin, Rodrigo (2015) Animal Science	Associate Professor	D.V.M., University of Leon, Spain, 2004; M.S., Michigan State University, 2008; Ph.D., 2011; Ph.D., University of Leon Veterinary School, 2013.
Marchbanks, Paul (2007) English	Professor	B.S., Centre College of Kentucky, 1993; M.A., University of North Carolina at Chapel Hill, 2000; Ph.D., 2006. Graduate Director.
Marijuan, Silvia (2015) World Languages and Cultures	Associate Professor	Licenciatura en Letras, University of Buenos Aires, 2009; M.S., Georgetown University, 2012; Ph.D., 2015.
Marlow (Buchanan), Colleen A. (2014) Physics	Associate Professor	B.S., California Polytechnic State University, San Luis Obispo, 1999; Ph.D., University of Oregon, 2005.
Marshall, David D. (2004) Aerospace Engineering	Professor and Department Chair	B.S., Worcester Polytechnic Institute, 1994; M.S., Georgia Institute of Technology, 1995; Ph.D., 2003.
Martinez, Andres W. (2010) Chemistry and Biochemistry	Professor	B.S., Stanford University, 2003; Ph.D., Harvard University, 2009.
Martinez, Charmaine (2006) Art and Design	Associate Professor	B.F.A., University of Notre Dame, 1993; M.F.A., University of Wisconsin-Madison, 2003.
Martinez, Nathaniel W. (2013) Biological Sciences	Associate Professor	B.S., University of California, Santa Cruz, 2002; Ph.D. Cornell University, 2010; M.D., 2012.
Martinez, Shanae A. (2020) English	Assistant Professor	B.A. University of California, Davis, 2008; M.A., University of Wisconsin-Milwaukee, 2012; Ph.D., University of Wisconsin-Milwaukee, 2019.
Mase, Tom (2007) Mechanical Engineering	Professor	B.S.M.E., Michigan State University, 1980; M.S.M.E., University of California, Berkeley, 1982; Ph.D., 1987.
Mastoridis, Themistoklis (2013) Physics	Associate Professor	B.S., Brandeis in Physics, 2003; M.S., Stanford University in Electrical Engineering, 2005; Ph.D. Stanford University in Electrical Engineering, 2010.
Maurice, Stefanee (2019) Kinesiology	Assistant Professor	B.A., University of California, Riverside, 2010; M.A., California State University, Northridge, 2013; M.A., West Virginia University, 2016; Ph.D., West Virginia University, 2019
Mayer, Hans (2019) Mechanical Engineering	Assistant Professor	B.S., California Polytechnic State University, San Luis Obispo, 2003; M.S., Carnegie Mellon University, Pittsburgh, 2005; Ph.D., University of California, Santa Barbara, 2016.
McCormick, Kathryn E. (2003) Art and Design	Professor	B.S., University of Cincinnati, 1996; M.S., 2001.
McCullough, Michael P. (2008) Agribusiness	Professor	B.S., Boise State University, 2003; M.S., Washington State University, 2007; Ph.D., 2008.
McDaniel, Cole C. (2005) Architectural Engineering	Professor	B.S., University of California, San Diego, 1996; M.S., 1997; Ph.D., 2002. Registered Civil Engineer, California.
McDonald, Ashley (2013) Chemistry and Biochemistry	Associate Professor	B.S., Mississippi College, 2004; Ph.D. Georgia Institute of Technology, 2009
McDonald, Margot K. (1992) Architecture	Professor and Department Head	B.A., B.S., University of California, Santa Barbara, 1980; M.Arch., University of Oregon, 1987. AIA, Registered Architect, Oregon. NCARB Certificate.
McDonald, Casey (2020) Journalism	Assistant Professor	B.S., Brigham Young University, Idaho, 2007; M.A., Brigham Young University, Utah, 2016; Ph.D, University of Florida, Gainesville, 2020.
McFarlane, Zach (2018) Animal Science	Assistant Professor	B.S., University of Arizona, 2013; M.S., University of Arizona, 2015; Ph.D., University of Tennessee, Knoxville, 2018.

McGaughey, Karen J. (2003) Statistics	Professor	B.A., Kansas State University, 1991; M.S., 1999; Ph.D., 2003.
McLamore, Alyson (1991) Music	Professor	B.A., University of California at Los Angeles, 1982; M.A., 1985; Ph.D., 1991.
Mealy, Bryan J. (2003) Computer Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1990; M.S., 1993; M.S., University of California, Santa Cruz, 1999; Ph.D., 2002.
Medina, Elsa (2000) Mathematics	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1994; M.S., 1996; Ph.D., University of Northern Colorado, 2000.
Medizade, Mason (1984) Mechanical Engineering	Professor Emeritus (FERP)	B.S., Abadan Institute of Technology, 1978; M.S., University of Southern California, 1980; Ph.D., 1984.
Mehiel, Eric A. (2004) College of Engineering, Aerospace Engineering	Associate Dean and Professor	B.S., University of California, Santa Barbara, 1998; M.S., University of Colorado, 2001; Ph.D., 2003.
Mello, Joseph D. (1998) Mechanical Engineering	Professor	B.S., California Polytechnic State University, 1983; M.S., 1989; Ph.D., University of California, Davis, 1996.
Mendes, Anthony A. (2004) Mathematics	Professor	B.S., University of California, Irvine, 2000; M.A., University of California, San Diego, 2001; Ph.D., 2004.
Metcalf, Lynn E. (1986) Industrial Technology and Packaging	Professor	B.A., University of Oregon, 1978; M.I.M., American Graduate School of International Management, 1981; Ph.D., University of South Carolina, 1986.
Mewes, Matthew (2014) Physics	Associate Professor	B.A., Concordia College, 1998; M.S., Indiana University 2004; Ph.D., 2004.
Meyers, Joan (2017) Social Sciences	Associate Professor	B.A., Cornell University, 1988; M.A., California State University, San Francisco, 1999; M.A., University of California, Davis, 2001; Ph.D., University of California, Davis, 2009.
Migler, Theresa (2018) Computer Science	Assistant Professor	B.S., Math, Cal Poly, 2004; M.S., Math, Cal Poly, 2007; M.S. CS, Oregon State, 2013; Ph.D. CS, Oregon State, 2014.
Mike, Moses (2021) Agricultural Education and Communication	Assistant Professor	B.S., University of the West Indies, Trinidad and Tobago, 2008; M.S., 2013; Ph.D., University of Florida, 2020
Miklowitz, Paul (1988) Philosophy	Professor Emeritus (FERP)	B.A., University of California, Santa Cruz, 1977; M.A., University of Chicago, 1979; M.Phil., Ph.D., Yale University, 1988.
Miller, Charles (Tad) R. (1987) Accounting	Professor Emeritus (FERP)	B.A., College of Wooster, 1970; M.B.A., University of Arizona, 1980; Ph.D., 1987. Certified Public Accountant.
Mitchell, David (2004) Physics, Liberal Studies	Professor	B.S., George Washington University, 1998; M.A., University of California, San Diego, 2001; Ph.D., 2004.
Mock, Rodney (2008) Accounting	Professor	J.D., University of Oregon School of Law, 2002; L.L.M., University of Washington School of Law, 2004.
Moelter, Matthew J. (1998) Physics	Professor	B.S., University of California, Irvine, 1981; Sc.M., Brown University, 1983; Ph.D., 1989.
Moore, Matthew J. (2006) Political Science	Professor	B.A., Eugene Lang College, 1997; Ph.D., Johns Hopkins University, 2004.
Moreno, J. Kelly (1991) Psychology and Child Development	Professor	B.S., University of California, Santa Barbara, 1980; M.S., University of Utah, 1985; Ph.D., 1988. Licensed Psychologist, California.
Morris, Andrew D. (2000) History	Professor	B.S., Harvey Mudd College, 1991; M.A., University of California, San Diego, 1996; Ph.D., 1998.
Moss, Robb E. S. (2006) Civil and Environmental Engineering	Professor	B.S., North Carolina State University, 1995; M.S., Utah State University, 1997; Ph.D., University of California, Berkeley, 2003. Registered Professional Engineer, California.
Mott, Jennifer (2014) Mechanical Engineering	Assistant Professor	B.S., California Polytechnic State University, 2005; M.S., University of Illinois at Urbana-Champaign, 2007; Ph.D., University of Illinois at Urbana-Champaign, 2012.
Muleta, Misgana (2008) Civil and Environmental Engineering	Professor and Department Chair	B.S., Arba Minch University, 1996; M.S., National University of Ireland, Galway, 1999; Ph.D., Southern Illinois University, Carbondale, 2003. Registered Professional Engineer, California.
Munoz-Christian, Karen (2007) World Languages and Cultures	Professor and Department Chair	B.S., Iowa State University, 1981; M.A., Wichita State University 1985; Ph.D., University of California, Irvine, 1994.

Murphy, Kate (2007) College of Liberal Arts, History	Associate Dean and Professor	B.A., University of Virginia, 2001; M.A. Johns Hopkins University, 2003; Ph.D., 2007
Murray, William R. (1999) Mechanical Engineering	Professor	B.S., University of Texas, Austin, 1975; M.S., 1976; Ph.D., Massachusetts Institute of Technology, 1988.
Mwangi, James (2003) Architectural Engineering	Associate Dean and Professor	B.Sc., University of Nairobi, Kenya, 1984; MSc., University of Lagos, Nigeria; Ph.D., University of California, Davis, 2001. Registered Structural Engineer and Professional Engineer, California.
Myers, Allison (2020) Art and Design	Assistant Professor	B.A., Webster University, Saint Louis, Missouri, 2007; M.A., The University of Texas at Austin, 2009; Ph.D., The University of Texas at Austin, 2018.
Nafisi, Ahmad (1983) Electrical Engineering	Professor	B.S., Arya Mehr University of Technology, Iran, 1975; M.S., University of Southern California, 1977; Ph.D., 1983.
Nation, Jasmine (2020) Liberal Studies	Assistant Professor	B.S. B.A., University of Arizona, 2009; M.A., Univeristy of California, Santa Barbara, 2017; Ph.D., University of California, Santa Barbara, 2019.
Navarro, Jenell R. (2012) Ethnic Studies	Associate Professor and Department Chair	B.A., Oklahoma Baptist University, 2001; M.A., Claremont Graduate University, 2007; Ph.D., 2011.
Navarro, Jose (2012) Ethnic Studies	Professor	B.A., University of California, Berkeley, 2002; M.A., University of Southern California, 2008; Ph.D., 2012.
Nazmi, Aydin (2009) Food Science and Nutrition	Professor	B.S., University of California, Davis, 1998; M.S., University of London, U.K.; 2004; Ph.D., Federal University of Pelotas, Brazil, 2007.
Neff, Grace Ann (1995) Chemistry and Biochemistry	Professor	B.S., New Mexico State University, 1989; Ph.D., University of Oregon, 1998.
Neill, Dawn (2008) College of Liberal Arts, Interdisciplinary Studies in the Liberal Arts	Professor	B.A., Louisiana State University, 1996; M.A., 1999; M.A., University of Washington, 2004; Ph.D., 2007.
Neill, Stern (2008) Marketing	Professor and Associate Dean	B.A., Louisiana State University, 1992; M.B.A., Southeastern Louisiana University, 1994; Ph.D., Louisiana State University, 2000.
Nelson, Jill (2008) Architectural Engineering	Associate Professor Emeritus (FERP)	B.S., University of Nevada, Reno, 1978; M.S., University of Washington, 1982. Registered Structural and Civil Engineer, California and Washington; LEED AP.
Nelson, Yarrow M. (1999) Civil and Environmental Engineering	Professor Emeritus (FERP)	B.S., University of California, Berkeley, 1979; M.S., Cornell University, 1992; Ph.D., 1997.
Nelson, Leslie R. (2018) Communication Studies	Assistant Professor	B.A., University of Nebraska, Lincoln, 2012; M.A., University of Missouri, 2014; Ph.D., 2018.
Neumann, Natasha (2019) School of Education	Assistant Professor	B.A., University of California, San Diego, 1997; M.A., Azusa Pacific University, Azusa, 2008; Ed.D., University of Southern California, Los Angeles, 2017.
Nico, Phillip L. (2000) Computer Science	Professor	B.A., University of California, Berkeley, 1991; M.S., University of California, Davis, 1994; Ph.D., 2000.
Niku, Saeed B. (1983) Mechanical Engineering	Professor Emeritus (FERP)	B.S., Tehran Polytechnic University, 1975; M.S., Stanford University, 1976; Ph.D., University of California, Davis, 1982. Registered Professional Engineer, California.
Noland, Jaymie J. (1999) Animal Science	Professor and Department Head	B.S., Colorado State University, 1981; D.V.M., Colorado State University, 1987.
Noori, Mohammad (2005) Mechanical Engineering	Professor	B.S., University of Illinois at Urbana-Champaign, 1977; M.S., Oklahoma State University, 1980; Ph.D., University of Virginia, 1984.
Nuttall, Brent (2003) Architectural Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1986; M.S., University of California, Berkeley, 1987. Registered Structural and Civil Engineer, California.
Nuworsoo, Cornelius K. (2005) City and Regional Planning	Professor	B.S., University of Science and Technology, Ghana, 1981; M.S., Morgan State University, 1986; MCP, University of California, Berkeley, 2002; Ph.D., 2004. American Institute of Certified Planners. Institute of Transportation Engineers.
O'Bryant, Camille P. (1999) College of Science and Mathematics, Kinesiology	Associate Dean and Professor	A.B., 1983; M.S., Smith College, 1986; PhD., The Ohio State University, 1996.

O'Hara, Christine E. (2008) Landscape Architecture	Professor	B.A., Stanford University, 1987; M.L.A. University of Washington, 2002. Certificate in Preservation Planning.
Oliver, John Y. (2007) Computer Engineering	Professor	B.S., Boston University, 1998; M.S., University of California, Davis, 2006; Ph.D., University of California, Davis, 2007
Olsen, Eric (2004) Industrial Technology and Packaging	Professor	B.S., University of Maine at Orono, 1979; M.B.A., Virginia Polytechnic Institute and State University, 1987; Ph.D., The Ohio State University, 2004.
Olsen, Clare (2011) Architecture	Professor	B.A., Brown University, 1997; M.Arch., University of California, Los Angeles, 2003. Registered Architect, New Jersey.
Orth, Joel J. (2003) History	Associate Professor	B.A., California Polytechnic State University, San Luis Obispo, 1996; M.A., Iowa State University, 1998; Ph.D., 2004.
Osborn, Brian (2016) Architecture	Associate Professor	B.L.A. California Polytechnic State University, San Luis Obispo, 2001; M.Arch, Pratt Institute, School of Architecture, Brooklyn, New York, 2008. Licensed Landscape Architect in the Commonwealth of Virginia, NCARB.
Oulton, Rebekah L. (2013) Civil and Environmental Engineering	Associate Professor	B.S., Harvey Mudd College, 1993; M.S., 1994; Ph.D., University of Iowa, 2013. Registered Professional Engineer, California. Leed Accredited Professional.
Oza, Javin P. (2016) Chemistry and Biochemistry	Associate Professor	B.S., University of California, Santa Barbara; Ph.D., University of California, Santa Barbara
Oñate-Madrado, Andrea (2016) History	Assistant Professor	B.A., New York University, 2003; M.A., Princeton University, 2011; Ph.D., 2016
Pal, Nirupam (1995) Civil and Environmental Engineering	Professor	B. Tech, Calcutta University, India, 1984; M. Tech, 1986; Ph.D., New Jersey Institute of Technology, 1993.
Palandoken, Hasan (2009) Chemistry and Biochemistry	Professor	B.S., California State University, Chico, 1993; M.S., University of California, Davis, 1997; Ph.D., 2006.
Pan, Jianbiao J. (2003) Industrial and Manufacturing Engineering	Professor	B.E., Xidian University, Xian, China, 1990; M.S., Tsinghua University, Beijing, China, 1996; Ph.D., Lehigh University, 2000. Certified Quality Engineer. Certified Reliability Engineer.
Pande, Anurag (2008) Civil and Environmental Engineering	Professor	B.Tech., Indian Institute of Technology, Bombay, 2002; M.S., University of Central Florida, 2003; Ph.D., 2005.
Pantoja, Maria (2016) Computer Science	Associate Professor	B.S., University of Valencia, Spain, 1992; M.S., California State University, East Bay, 2004; Ph.D. Santa Clara University, 2009.
Papathakis, Peggy C. (2006) Food Science and Nutrition	Professor Emeritus (FERP)	B.S., California Polytechnic State University, San Luis Obispo, 1977; M.S., University of California, Davis, 2000; Ph.D., 2005. Registered Dietitian.
Paquin, Dana (2008) Mathematics	Professor	B.S., Davidson College, 2002; Ph.D., Stanford University, 2007.
Park, Michael (2019) Journalism	Assistant Professor	B.A., University of California, Los Angeles, 1999; J.D., University of California, 2004; Ph.D., Annenberg School for Communication Journalism, 2014.
Parrotta, Kylie Lynn (2019) Social Sciences	Assistant Professor	BA Psychology - NC State 2002, MS Sociology - NC State 2006 , PhD Sociology - NC State 2015
Pascual, Christopher C. (2000) Mechanical Engineering	Professor	B.S., Cornell University, 1985; M.S., Georgia Institute of Technology, 1996; Ph.D., 1999. Registered Professional Engineer, California.
Pasulka, Alexis L. (2017) Biological Sciences	Assistant Professor	B.S., Arizona State University, 2005; M.S., University of California, San Diego, 2009. Ph.D., 2013.
Patel, Pratish A. (2013) Finance	Associate Professor	B.S., Georgia Institute of Technology, 2002; M.S., UC Berkeley, 2005; Ph.D., UC Berkeley, 2013.
Patton, Linda J. (1991) Mathematics	Professor	B.A., University of California, San Diego, 1985; M.A., 1987; Ph.D., 1991.
Pearse, Erin P.J. (2012) Mathematics	Professor	B.S., University of California, Riverside, 1998; M.S., 2001; Ph.D., 2006.
Perrine, John D. (2008) Biological Sciences	Professor	B.S., Vanderbilt University, 1991; M.S., Miami University, Ohio, 1995; Ph.D., University of California, Berkeley, 2005.
Peters, Jason (2015) English	Associate Professor	B.A., Rhode Island College, 1999; M.F.A., Emerson College, 2010; Ph.D., University of Rhode Island, 2015.
Peterson, Daniel G. (2003) Animal Science	Professor	B.S., University of California, Davis, 1999; Ph.D., Cornell University, 2003.

Peterson, Zachary (2013) Computer Science	Professor	B.S., Univ of CA, Santa Cruz, 2000; M.S., 2002; M.S., The Johns Hopkins University Information Security Institute, 2005; Ph.D., The Johns Hopkins University, 2006.
Peuker, Steffen (2014) Mechanical Engineering	Associate Professor	Dipl.-Ing. (FH), Mannheim University of Applied Sciences, Mannheim, Germany; M.S., University of Illinois at Urbana-Champaign, 2006; Ph.D., 2010.
Phelan, Suzanne (2008) Kinesiology	Professor	B.A./B.S., University of Colorado at Boulder, 1989; M.A., MCP Hahnemann University, 1999; Ph.D., 2001.
Phillips, Stephen J. (2005) Architecture	Professor	B.A.Arch., Yale, 1991; M.Arch., University of Pennsylvania Graduate School of Architecture, 1994; M.A., Princeton, 2003; Ph.D., 2008. Registered Architect., California.
Piburn, Patti (2006) Journalism	Assistant Professor	B.S., Arizona State University, Tempe, 1995; B.A., Arizona State University, Tempe, 1995; M.S., South Dakota State University, Brookings, 2013; Ph.D. ABD, Walter Cronkite School of Journalism Mass Communication, 2019.
Pierce, Todd J. (2005) English	Professor	B.A., Southern California College, 1988; M.A., Oregon State University, 1992; M.F.A., University of California, Irvine, 1995; Ph.D., Florida State University, 2003.
Pilkington, Wayne (2005) Electrical Engineering	Associate Professor	B.S., Lafayette College, 1981; M.S., Rochester Institute of Technology, 1989; M.S., University of Rochester, 1999; Ph.D., 2005.
Pilolla, Kari (2014) Food Science and Nutrition	Associate Professor	B.S., California State University, Fresno, 1998; M.S., San Diego State University, 2002; Ph.D., Oregon State University, 2013; Registered Dietitian.
Pokharel, Siroj (2018) Animal Science	Assistant Professor	B.S., University of Arizona, 2013; M.S., University of Arizona, 2015; Ph.D., University of Tennessee, Knoxville, 2018.
Ponitz, Jeffrey A. (2011) Architecture	Associate Professor	B.S., University of Michigan, 2002; M.Arch., 2004; M.Arch., University of Virginia, 2008. Registered Architect, Illinois.
Porumamila, Hemanth (2008) Mechanical Engineering	Associate Professor	B.E., BMS College of Engineering, Bangalore, India, 2000; M.S., Iowa State University, 2003; Ph.D., 2007.
Poshtan, Majid (2015) Electrical Engineering	Associate Professor	B.S., Tehran University-Tehran 1988; M.Sc., University of New Brunswick-Fredericton 1992; Ph.D., Tulane University, New Orleans 2000
Pouraghabagher, A. Reza (1979) Industrial and Manufacturing Engineering	Professor Emeritus (FERP)	B.S., University of Colorado, 1972; M.S., University of California, 1973; Ph.D. University of Iowa, 1977. Certified in Production and Inventory Management (CPIM).
Pressler, Yamina (2020) Natural Resources Management and Environmental Sciences	Assistant Professor	B.S., California Polytechnic State University, San Luis Obispo, 2013; Ph.D., Colorado State University, 2019.
Prodanov, Vladimir (2009) Electrical Engineering	Professor	M.S., State University of New York, Stony Brook, 1995; Ph.D., 1997.
Pulitano, Elvira (2006) Ethnic Studies	Professor	Laurea (B.A.), Università di Messina, Italy, 1993; University of New Mexico, 1997; Ph.D., 2002.
Qenani-Petrela, Eivis (2002) Agribusiness	Professor	B.S., University of Tirana, Albania, 1987; M.A., Washington State University, 1998; Ph.D., 2002.
Qu, Bing (2008) Civil and Environmental Engineering	Professor	B.S., Tongji University (China), 2001; M.S., 2004; Ph.D., State University of New York at Buffalo, 2008. Registered Professional Engineer, California.
Ragsdale, Joseph J. (2002) Landscape Architecture	Professor	B.A., University of California, Berkeley, 1991; M.L.A., University of Virginia, 2000. Registered Landscape Architect, California.
Rahim, Ashraf (2003) Civil and Environmental Engineering	Professor	B.S., University of Mansoura, Egypt, 1986; M.S., 1991; Ph.D., University of Mississippi, Oxford, 2001. Registered Professional Engineer, California.
Rahman, Shikha (2007) Civil and Environmental Engineering	Professor	B.S., Bangladesh University of Engineering and Technology (BUET), 1995; M.S., 1998; Ph.D., Georgia Institute of Technology, 2002. Registered Professional Engineer, Mississippi.
Rajakaruna, Nishanta (2017) Biological Sciences	Professor	B.S., College of the Atlantic, 1994; M.S., University of British Columbia, 1998; Ph.D., 2003.
Ramezani, Cyrus A. (1999) Finance	Professor	B.A., University of California, Santa Cruz, 1984; M.S., 1988; M.S., University of California, Berkeley, 1991; Ph.D., 1992.
Ramrakhiani, Sonia H. (2017) School of Education	Associate Professor	B.A., Psychology, St. Xavier's College in India, 2010; M.S., Clinical Mental Health Counseling, Syracuse University, 2013; Ph.D., Old Dominion University, 2017.

Rastad, Mahdi (2012) Finance	Associate Professor	M.S., University of Illinois Urbana Campus 2009; Ph.D., University of Illinois Urbana Campus, 2012.
Razi, Alpen (2015) Ethnic Studies	Assistant Professor	B.A., University of Toronto, 2008; M.A., 2009; Ph.D., 2015.
Reaves, Scott (2003) Food Science and Nutrition	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1991; Ph.D., University of Arizona, 1995.
Rees, Gordon L. (2015) Natural Resources Management and Environmental Sciences	Associate Professor	B.S., Brigham Young University, 2009; M.S., University of California, Davis, 2015; Ph.D., University of California, Davis, 2015.
Reich, Jonathan (2001) Architecture	Professor	B.A., University of Washington, Seattle, 1979; B.A.E.D., 1979; M.Arch., University of California, Berkeley, 1983. AIA, Registered Architect, California and Washington.
Rein, Steven (1998) Statistics	Associate Professor	B.A., University of California, Los Angeles, 1987; M.A., University of California, Berkeley, 1989; Ph.D., 1993.
Retsek, Dylan Q. (2003) Mathematics	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1996; M.A., Washington University, 1997; Ph.D., 2001.
Ribeiro, Bruno (2012) Graphic Communications	Associate Professor	B.S., Universidade do Estado do Rio de Janeiro, 2002; M.B.A, Fundação Getúlio Vargas, 2007; M.F.A., Ohio State University, 2012.
Richert, Benjamin P. (2003) Mathematics	Department Chair	B.S., Wheaton College, 1995; Ph.D., University of Illinois, Urbana-Champaign, 2000.
Ridgely, John R. (2001) Mechanical Engineering	Professor	B.S., University of California, Berkeley, 1986; M.S., 1988; Ph.D., 2001.
Riley, Kate J. (2003) Mathematics	Professor	B.S., South Dakota State University, 1980; M.S., Montana State University, 1992; Ph.D., 2003.
Rinzler, Paul (1997) Music	Professor Emeritus (FERP)	B.A., University of California, Santa Barbara, 1977; M.A., 1980; D.A., University of Northern Colorado, 1988.
Rios, Laura (2019) Physics	Assistant Professor	B.S., Oberlin College, 2012; Ph.D. UC Irvine, 2017
Ritter, Matthew K. (2003) Biological Sciences	Professor	B.S., University of California, Santa Barbara, 1996; Ph.D., University of California, San Diego, 2002.
Robbins, Marian E. (2004) Mathematics	Professor	B.A., Agnes Scott College, 1986; M.S., University of Virginia, 1989; Ph.D., 1992.
Roberts, Joni (2019) Kinesiology	Assistant Professor	B.A. Washington Adventist University, 2005; MAT, American University, 2009; DrPH, Loma Linda University, 2015
Rodgers, Julie Spencer (2012) Psychology and Child Development	Professor	B.Sc., Carleton University, 1993; B.A., 1995; M.S., San Francisco State University, 1998; Ph.D., University of California, Santa Barbara, 2005.
Ronan, Briana M. (2014) School of Education	Associate Professor	B.A., University of Texas, Austin, 2005; M.A., Universidad de Alcalá, Spain, 2008; M.A., Teachers College, Columbia University, 2010; Ed.D., Teachers College, Columbia University, 2014.
Rong, Xiaoying (2005) Graphic Communication	Professor	B.E., Beijing Institute of Printing, 1992; M.B.A., Beijing Institute of Technology, 1999; M.S., Western Michigan University, 2003; Ph.D., Western Michigan University, 2007.
Rosenthal, Mira (2016) English	Associate Professor	B.A., Reed College, 1996; M.F.A., University of Houston, Texas, 2005; Ph.D., Indiana University, 2011.
Ross, Kevin James (2012) Statistics	Associate Professor	B.S., University of North Carolina at Chapel Hill, 1997; M.S., 2005; Ph.D., 2006.
Rossmann, Allan J. (2001) Statistics	Professor	B.A., Geneva College, 1984; M.S., Carnegie Mellon University, 1986; Ph.D., 1989.
Roy, Soma (2008) Statistics	Professor	B.Sc., Delhi University, 2000; M.Sc., 2002; M.S., The Ohio State University, 2005; Ph.D., 2008.
Rucas, Stacey L. (2005) Social Sciences	Professor	B.A., University of Texas, Arlington, 1998; M.A., 2000; Ph.D., University of New Mexico, 2004.
Rudi Polloshka, Jeta (2017) Agribusiness	Assistant Professor	B.A., Berea College, 2010; M.S. Virginia Tech, 2012, University of Minnesota, Ph.D., 2016.
Russell, Craig H. (1982) Music	Professor Emeritus (FERP)	B.M., University of New Mexico, 1973; M.M., 1976; Ph.D., University of North Carolina, 1981.

Ruszczky, Steven (2017) English	Associate Professor	B.A., University of California, Santa Barbara, 2003; M.A., University of Auckland, 2007; Ph.D., State University of New York at Buffalo, 2014.
Ruttenberg, Benjamin I. (2013) Biological Sciences	Associate Professor	B.A., Tufts University, 1994; M.S., Yale University, 1999; Ph.D., University of California, Santa Barbara, 2006.
Ryalls, Emily D. (2017) Interdisciplinary Studies in the Liberal Arts	Associate Professor	B.A., James Madison University, 1997; M.A., The University of Alabama, 1999; Ph.D., University of South Florida, 2011.
Ryujin, Donald H. (1989) Psychology and Child Development	Professor	B.A., Stanford University, 1968; M.A., University of Michigan, 1972; Ph.D., 1983.
Sabbag, Anelise G. (2016) Statistics	Associate Professor	B.S., Universidade de Sao Paulo, 2009; M.A., University of Minnesota, 2013; Ph.D., 2016.
Sadek, Mohammad (2018) BioResource and Agricultural Engineering	Assistant Professor	B.S., Bangladesh Agricultural University, Bangladesh, 2005; M.S., Asian Institute of Technology, Thailand, 2008; Ph.D., University of Manitoba, Canada, 2013. Registered Professional Engineer, Canada.
Saghri, John A. (2000) Electrical Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1973; M.S., Oregon State University, 1975; Ph.D., Rensselaer Polytechnic Institute, 1979.
Saha, Koushik (2010) Industrial Technology and Packaging	Professor	B.S., G.B. Pant University, India, 1998; M.S., University of Florida, 2001; M.S., Michigan State University, 2005; Ph.D., Michigan State University, 2010
Saliklis, Edmond P. (2005) Architectural Engineering	Professor	B.S., University of Illinois, Chicago, 1984; M.S., Syracuse University, 1988; Ph.D., University of Wisconsin, Madison, 1992. Registered Civil Engineer, California.
Sanchez, Fernando Fabio (2011) World Languages and Cultures	Professor	B.A., Universidad La Salle, Mexico, 1995; M.A., University of Colorado, Boulder, 2000; Ph.D., 2006.
Sapper, Erik D. (2016) Chemistry and Biochemistry	Associate Professor	B.S., California Polytechnic State University, San Luis Obispo, 2007; M.S., California Polytechnic State University, 2007; Ph.D., North Dakota State University, 2013.
Sattler, Meredith J. (2014) Architecture	Assistant Professor	B.A. Studio Art, Vassar, 1995; M.Arch., M.Environmental Management, Yale, 2010.
Saunders, Karl F. (2004) Physics	Professor and Department Chair	B.S., Dublin City University, 1996; Ph.D., University of Oregon, 2001.
Schaffner, Andrew (1997) Statistics	Professor and Department Chair	B.S., California Polytechnic State University, San Luis Obispo, 1992; M.S., University of Washington, 1994; Ph.D., 1997.
Schinck-Mikel, Amelie (2009) Mathematics	Professor	B.Sc., Concordia University, 1999; M.Sc., 2001; Ph.D., University of North Carolina at Charlotte, 2009.
Schroeter, Christiane (2007) Agribusiness	Professor	B.S., Justus-Liebig University, 1997; M.S., 2001; M.S., Kansas State University, 2000; Ph.D., Purdue University, 2005.
Schuster, Peter J. (2003) Mechanical Engineering	Professor	B.A., Cornell University, 1991; M.S., Stanford University, 1992; Ph.D., Michigan Technological University, 2000.
Schwab, Keri (2013) Experience Industry Management	Associate Professor	B.A., James Madison University, 2000; M.A. and Ph.D., University of Utah, 2011.
Schwartz, Debora (1996) English	Associate Professor	A.B., Bryn Mawr College, 1982; M.A., Princeton University, 1986; Ph.D., 1994.
Schwartz, Peter V. (2000) Physics	Professor	B.S., Massachusetts Institute of Technology, 1986; M.S., Princeton University, 1993; Ph.D., 1998.
Schwartz, Gregory (2013) BioResource and Agricultural Engineering	Associate Professor	B.S., Cal Poly State University, San Luis Obispo, 1995; M.S., Clemson University, 1998; Ph.D., Clemson University, 2004.
Scott, Gregory E. (2011) Chemistry and Biochemistry	Professor	B.S., Davidson College, 2004; Ph.D., University of Illinois, Urbana-Champaign, 2011.
Scriven, Tal E. (1980) Philosophy	Professor Emeritus (FERP)	B.A., University of South Florida, 1976; M.A., 1977; Ph.D., University of Southern California, 1980.
Self, Brian P. (2006) Mechanical Engineering	Professor	B.S., Virginia Polytechnic Institute and State University, 1988; M.S., 1991; Ph.D., University of Utah, 1996.

Seng, John S. (2003) Computer Science, Computer Engineering	Professor	B.S., Northwestern University, 1997; M.S., University of California, San Diego, 1999; Ph.D., 2003.
Serrano-Careaga, Jesus (2020) Psychology and Child Development	Assistant Professor	B.A., University of Arizona, 2014; M.A., University of California, Los Angeles, 2016; Ph.D., 2020.
Settle, Allen K. (1970) Political Science	Professor Emeritus	B.A., University of California, Santa Barbara, 1966; M.A., 1967; Ph.D., 1970.
Shaban, Ali O. (1984) Electrical Engineering	Professor	B.S., University of Tripoli, 1974; M.S., University of Southern California, 1978; Ph.D., Oregon State University, 1985.
Shafran, Aric (2007) Economics	Professor and Area Chair	B.S., Cornell University, 1999; M.A., University of Colorado, 2003; Ph.D., 2007.
Shan, Yan (2016) Journalism	Associate Professor	B.A., Nanjing University of Science and Technology, 2009; M.A., University of Central Florida, 2011; Ph.D., University of Georgia, 2014.
Shani, Abraham (Rami) B. (1983) Management, HR, and Information Systems	Professor Emeritus (FERP)	B.A., University of Tel Aviv, 1972; M.A., 1978; Ph.D., Case Western Reserve University, 1981.
Shapiro, Jonathan (1998) Mathematics	Professor	B.A., University of California, Berkeley, 1988; Ph.D., 1995.
Sharpe, John P. (1995) Physics	Professor	B.Sc., Edinburgh University, 1985; Ph.D., 1989.
Shen, Sandy (2021) Experience Industry Management	Assistant Professor	B.Mgmt., Southeast Univ, China, 2010, M.Sc., Peking University, China, 2013, Ph.D. Univ. of Guelph, Canada, 2020
Sherman, Morgan P. (2008) Mathematics	Professor	B.A., Knox College, 1999; M.A., Columbia University, 2000; M.Phil., 2004; Ph.D., 2005.
Shields, Jennifer (2015) Architecture	Associate Professor	B.S. Arch, University of Virginia, 2000; M. Arch, University of Virginia, 2004. Registered Architect, North Carolina, NCARB Certificate.
Shin, Joongmin (2017) Industrial Technology and Packaging	Associate Professor	B.S., Food Science Technologies, Woosuk University South Korea 1997, M.S., School of Packaging, Michigan State University 2003, Ph.D., School of Packaging Michigan State University 2007.
Shollenberger, Kim A. (2002) Mechanical Engineering	Professor	B.S., Cornell University, 1989; M.S., University of California, Berkeley, 1991; Ph.D., 1994.
Sikalidis, Angelos (2018) Food Science and Nutrition	Associate Professor	BSc/MEng., Aristotle University of Thessaloniki, Greece, 2003; MS, University of California, Berkeley, 2004; MSc, University of California, Berkeley, 2006; PhD, Cornell University, 2010; Post-Doctorate, Harvard Medical School, 2013
Simonian, Lonny G. (2003) Construction Management	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1978; M.S., University of California, Berkeley, 1992. Registered Professional Engineer, Certified Project Management Professional.
Singh, Jagjit (Jay) (2003) Industrial Technology and Packaging	Professor	B.S., Poona University, Pune, India, 1992; M.S., Michigan State University, 1998; Ph.D., 2002.
Sistla, Seeta (2019) Natural Resources Management and Environmental Sciences	Assistant Professor	B.A., Swarthmore College, 2004; M.A., Brown University, 2007; Ph.D., University of California Santa Barbara, 2012.
Sklar, Jeffrey C. (2005) Statistics	Professor	B.A.S., University of California, Davis, 1995; M.A., University of California, Santa Barbara, 1998; Ph.D., 2003.
Slivovsky, Lynne A. (2003) Computer Engineering	Professor, Director of Computer Engineering	B.S., Purdue University, 1992; M.S., 1993; Ph.D., 2001.
Smilkstein, Tina (2009) Electrical Engineering	Associate Professor	B.S., Nazan University, Nagoya, Japan, 1989; M.S., University of California, Berkeley, 2003; Ph.D., University of California, Berkeley, 2007
Smith, Hugh M. (2000) Computer Engineering	Professor	B.S., Xavier University, 1985; M.S., Michigan State University, 1994; Ph.D., 1999.
Smith, Taylor F. (2014) Psychology and Child Development	Associate Professor	B.A., SUNY Geneseo, Geneseo, 2006; M.S. UNC at Greensboro, 2009; Ph.D., University of North Carolina at Greensboro, 2012; Professional Degree, Brown University/Alpert Med School/RIH, 2014.
Somoza-Norton, Andrea Fabiana (2015) School of Education	Associate Professor	B.A., University of Nevada, Reno, 1999; M.S., University of Nevada, Reno, 2004; Ed.D., University of Massachusetts, Lowell, 2012.

Sparks, Jacob (2020) Philosophy	Assistant Professor	B.S. Tufts University, 2005; M.A., Bowling Green State University, 2009; Ph.D., Bowling Green State University, 2018.
Sprayberry, Kim A. (2013) Animal Science	Professor	B.S., University of California, Davis, 1983; DVM, University of California, Davis, 1988; Diplomate, American College of Veterinary Internal Medicine, University of California, Davis, 1998.
Staley, Clinton A. (1988) Computer Science	Professor	B.A., Principia College, 1980; M.S., University of California, Santa Barbara, 1982; Ph.D., 1987.
Stanchev, Lubomir (2015) Computer Science	Professor	B.S., University of Sofia, 1998; M.S., 1998; Ph.D., University of Waterloo, 2005.
Stanko, Taryn (2014) Management, HR, and Information Systems	Associate Professor	B.A., University of California, Los Angeles; M.B.A., New York University; Ph.D., University of California, Irvine.
Stankus, Mark (1998) Mathematics	Professor	B.S., Rensselaer Polytechnic Institute, 1987; Ph.D., University of California, San Diego, 1993.
Stannard, Sandra (2001) Architecture	Professor	B.A., University of California, Berkeley, 1987; M.Arch., University of Washington, 1992. AIA, Registered Architect, California and Idaho.
Stanton, Diana L. (2000) Theatre and Dance	Professor	B.A., University of California, Irvine, 1994; M.F.A., University of Colorado, Boulder, 1997.
Stegner, Paul Dustin (2007) English	Professor	B.A., University of San Francisco, 2000; M.A., The Pennsylvania State University, 2002; Ph.D., 2007.
Steinmaus, Scott J. (1998) Horticulture and Crop Science	Professor and Department Head	B.S., University of California, Davis, 1984; Ph.D., University of California, Davis, 1995; Post-doctorate, University of California, Riverside, 1998. Pest Control Advisor, California.
Strand, Christy (2007) Biological Sciences	Professor	B.A., Concordia University 1992; Ph.D., Arizona State University, 2007.
Styles, Stuart W. (1984) BioResource and Agricultural Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1984; M.B.A., 1988; D.Eng., University of California, Davis, 2001. Registered Civil Engineer, California.
Sun, Dennis L. (2016) Statistics	Associate Professor	A.B., Harvard College, 2010; Ph.D., Stanford University, 2015.
Sungar, Nilgun (1989) Physics	Professor Emeritus (FERP)	B.S., Middle East Technical University, Turkey, 1979; Ph.D., University of Missouri, 1985.
Surfleet, Christopher Graham (2012) Natural Resources Management and Environmental Sciences	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1993; M.S. Oregon State University 1997; Ph.D. 2008. Certified Professional in Erosion and Sediment Control.
Swan, Benjamin G. (2010) Agricultural Education and Communication	Professor and Department Head	B.S., California Polytechnic State University, San Luis Obispo, 1997; M.S., 2001; Ph.D., The Ohio State University, 2005.
Sweatt, Lisa I. (2000) Psychology and Child Development	Associate Professor	B.S., University of California, Irvine, 1989; M.A., Ohio State University, 1992; Ph.D., Loyola University Chicago, 1999. Licensed Psychologist, California.
Sze, Lawrence (1998) Mathematics	Associate Professor	B.S., Louisiana State University, Baton Rouge, 1986; M.A., University of California, Los Angeles, 1989; Ph.D., Penn State University, 1998.
Szlavik, Robert (2006) Biomedical Engineering	Professor	B.Eng., McMaster University, 1991; M.Eng., 1994; Ph.D., 1999.
Talke, Stefan A. (2019) Civil and Environmental Engineering	Associate Professor	B.S., University of California, Berkeley, 1996; M.S., 2001; Ph.D., 2005.
Tanvir, Shams (2020) Civil and Environmental Engineering	Assistant Professor	B.S., Bangladesh University of Engineering Technology (BUET), 2009; M.S., 2013; Ph.D., North Carolina State University, 2018
Taufik, (1999) Electrical Engineering	Professor	B.S., Northern Arizona University, 1993; M.S. University of Illinois at Chicago, 1995; Dr. Eng., Cleveland State University, 1999.
Taylor, Emily N. (2005) Biological Sciences	Professor	B.A., University of California, Berkeley, 1998; Ph.D., Arizona State University, 2005.
Taylor, J. Kevin (1999) School of Education	Professor and Director	B.A., Newcastle and Sunderland Polytechnic, Newcastle, England, 1986; M.S., Central Washington University, 1990; Ph.D., University of South Carolina, 1994.
Tejani, James (2009) History	Associate Professor	B.A., University of California, San Diego, 1998; M.A., Columbia University, 2003; Ph.D., 2009.

Telesetsky, Anastasia (2020) Natural Resources Management and Environmental Sciences	Professor	B.A., Vanderbilt University, Nashville Tennessee, 1993; M.A., University of California, Santa Barbara, 1997; J.D., University of California, Berkeley, 2000; LLM, University of British Columbia, 2009
Teramoto Pedrotti, Jennifer (2003) College of Liberal Arts, Psychology and Child Development	Associate Dean and Professor	B.A., University of California, Davis, 1996; M.S., University of Kansas, 2000; Ph.D., 2003.
Teufel, Brady (2006) Journalism	Professor and Department Chair	B.A., University of California, Santa Cruz, 1997; M.A., University of Missouri, 2003.
Thatcher, Tracy (2005) Civil and Environmental Engineering	Professor	B.S., University of California, Davis, 1984; M.S., University of California, Berkeley, 1991; Ph.D., 1996. Registered Professional Engineer, California.
Theobald, Allison (2020) Statistics	Assistant Professor	B.B.A., B.S. Colorado Mesa University, 2014; M.S., Montana State University, 2016; Ph.D., 2020.
Theodoropoulos, Christine Olympia (2012) College of Architecture and Environmental Design	Dean	B.S., Princeton University, 1979; M.Arch., Yale University, 1985. AIA, Licensed Architect and Registered Professional Civil Engineer, California.
Thomas, Jafra (2019) Kinesiology	Assistant Professor	B.A., University of the Pacific, 2012, M.A., University of the Pacific, 2014, M.P.H., Oregon State University, 2017, Ph.D., Oregon State University, 2019
Thompson, Lizabeth T. (1993) Industrial and Manufacturing Engineering	Professor	B.S., California Polytechnic State University, San Luis Obispo, 1981; M.S., University of Southern California, 1986; M.B.A., 1986; Ph.D., University of California, Santa Barbara, 2007.
Thompson, John Jay (1998) World Languages and Cultures	Professor	B.A., University of California, Santa Barbara, 1986; M.A., Yale University, 1987; M.Phil., 1989; Ph.D., 1993.
Thompson, Richard P. (1990) Natural Resources Management and Environmental Sciences	Professor	B.S., Oklahoma State University, 1974; M.S., 1978; Ph.D., Texas AM University, 1990. Registered Professional Forester, California and Oklahoma.
Thorncroft, Glen E. (1998) Mechanical Engineering	Professor	BSE, University of Central Florida, 1988; MSME, 1991; Ph.D., University of Florida, 1997.
Toker, Umut (2015) Architecture	Professor	B. Arch., Middle East Technical Univ., Ankara, Turkey, 1996; MCP Urban Design, Middle East Technical University, Ankara Turkey, 1999; Ph.D., School of Architecture, College of Design, North Carolina State University, Raleigh, NC., 2003. Registered Architect in Turkey, International Union of Architects (UIA).
Tomanek, Lars (2005) Biological Sciences	Professor	B.S., University of Konstanz, Germany, 1995; M.S., 1995; Ph.D., Oregon State University, 1999.
Torres, Leo (2021) Aerospace Engineering	Associate Professor	B.S, M.S. and PHD (2001) in Electrical Engineering, Federal University of Minas Gerais in Brazil
Torres-Bustamente, Cesar (2010) Landscape Architecture	Professor	B.Arch., Universidad de las Américas, Puebla, 2000; M.L.A., RMIT University, 2005; Ph.D., 2009.
Trice, Tom R. (2002) History	Associate Professor and Department Chair	B.A., Louisiana College, 1981; M.A., Louisiana State University, 1987; Ph.D., University of Illinois, 1998.
Trudell, Carmen Gayle (2005) Architecture	Professor and Assistant Department Head	B.Arch., California Polytechnic State University, San Luis Obispo, 2001; M.S., Columbia University, 2006. M.S. Advanced Architectural Design, Columbia University, New York, NY, 2006. Registered Architect, California, New York, NCARB.
Tseng, Marilyn (2017) Kinesiology	Associate Professor	A.B., Stanford University, 1991; M.A., Stanford University, 1991; Ph.D. University of North Carolina, Chapel Hill, 1998.
Tubeileh, Ashraf (2015) Horticulture and Crop Science	Associate Professor	B.S., An-Najah National Univ., Nablus, Palestine, 1995; M.S., Université de Lorraine, Nancy, France, 1997; Ph.D., Université de Lorraine, Nancy, France, 2000.
Tully-Doyle, Ryan (2020) Mathematics	Assistant Professor	B.S. California Polytechnic State University, San Luis Obispo, 2001; Ph.D. University of California, San Diego, 2015
Turner, Clark S. (1999) Computer Science	Professor	B.S., Kings College, 1979; M.A., Pennsylvania State University, 1981; J.D., University of Maine, 1986; Ph.D., University of California, Irvine, 1999.
Twomey, Colleen Larkin (2011) Graphic Communication	Professor and Department Chair	B.S., Rochester Institute of Technology 1989; M.B.A., University of Delaware, 1997.
Vagnoni, David (2015) Animal Science	Associate Professor	B.S., Tulane University, 1986; M.S., Louisiana State University, 1989; Ph.D., University of Wisconsin, 1995.

Vakalis, Ignatios (2006) Computer Science	Professor	B.S., University of Patras, Greece, 1982; M.S., Western Michigan University, 1988; Ph.D., 1992.
Vasilaky, Kathryn N. (2017) Economics	Assistant Professor	B.A., Mathematics and Economics, Columbia University 2003, Cert. of Demography, Maryland Population Research Center 2010, Ph.D. University of Maryland 2011.
Vees, Dina (2016) Graphic Communication	Associate Professor	B.S., Carroll University, 2002; M.F.A., Full Sail University, 2013.
Velasquez, Gloria (1985) World Languages and Cultures	Professor Emeritus (FERP)	B.A., University of Northern Colorado, 1978; M.A., Stanford University, 1980; Ph.D., 1985.
Ventura, Alison K. (2014) Kinesiology	Associate Professor	B.S., University of California, Davis, 2003; M.S. Pennsylvania State University, 2005; Ph.D. Pennsylvania State University, 2008.
Ventura, Jonathan (2018) Computer Science	Associate Professor	B.S., University of California, Santa Barbara, 2005; M.S., University of California, Santa Barbara, 2010; Ph.D., University of California, Santa Barbara, 2012.
Verma, Priya O. (2011) Natural Resources Management and Environmental Sciences	Associate Professor	B.S., University of Massachusetts, Boston, 2000; M.A., University of California, Santa Barbara, 2004; Ph.D. 2011.
Vernon, J. Scott (1991) Agricultural Education and Communication	Professor Emeritus (FERP)	B.S., California Polytechnic State University, San Luis Obispo, 1983; M.S., 1985; Ph.D., Texas AM University, 1991.
Villablanca, Francis X. (1999) Biological Sciences	Professor Emeritus (FERP)	B.S., California Polytechnic State University, San Luis Obispo, 1987; Ph.D., University of California, Berkeley, 1993.
Vokos, Stamatis (2016) Physics	Professor	B.Sc., University of Kent at Canterbury, 1984; M.A., UC Berkeley, 1985; Ph.D., 1990.
Volpe, Richard (2014) Agribusiness	Associate Professor	B.S., University of Massachusetts, Amherst, 2003; M.S., 2005; Ph.D., University of California, Davis, 2010.
Vredevoe, Larisa K. (1999) Biological Sciences	Professor	B.S., University of California, Davis, 1992; Ph.D., 1998.
Waitinas, Catherine (2006) English	Professor	B.A./M.A., St. Bonaventure University, 1996; M.A., University of Illinois at Urbana-Champaign, 1999; Ph.D., 2006.
Waldorf, Daniel (1998) Industrial and Manufacturing Engineering	Professor and Department Chair	B.S., University of Illinois at Urbana-Champaign, 1989; M.S., 1991; Ph.D., 1996. Registered Professional Engineer, California.
Walker, John L. (2001) Statistics	Professor	B.S., University of Chicago, 1988; M.S., Cornell University, 1993; Ph.D., 1995.
Wallace, Robert (2020) Philosophy	Assistant Professor	B.A., Kenyon College, 2012; M.A., University of Arizona, 2016; PhD. University of Arizona, 2020.
Walter, Ryan K. (2014) Physics	Associate Professor	B.S., Cornell University, 2009; M.S., Stanford University, 2010; Ph.D., 2014.
Wang, Xuan (2014) Industrial and Manufacturing Engineering	Associate Professor	B.S., Tsinghua University, Beijing, 1997; M.S., Tsinghua University, Beijing, 2000; Ph.D., University of California, San Diego, 2006.
Wang, Cindy (2019) Marketing	Assistant Professor	B.A., Qingdao University, China, 2008; M.B.A. Oklahoma State University, 2010; Ph.D., University of Oregon, 2017.
Wang, Long (2020) Civil and Environmental Engineering	Assistant Professor	B.S., Dalian University of Technology, China 2014; M.S. University of California, Davis, 2015, M.S., 2016; Ph.D., University of California, San Diego, 2019.
Ward, Sandra M. (2016) Chemistry and Biochemistry	Associate Professor	B.S., University of Waterloo, 2007; Ph.D., University of Calgary, 2012.
Watts, David J. (2007) Landscape Architecture	Associate Professor	B.S.L.A., University of Wisconsin-Madison, 1980; M.S.L.A., 2006. Registered Landscape Architect, Wisconsin.
Watts, Katharine R. (2014) Chemistry and Biochemistry	Associate Professor	B.S., University of Texas, El Paso, 2006; Ph.D. University of California, Santa Cruz, 2011.
Weber, Paul A. (1999) Construction Management	Associate Professor	B.S., California Polytechnic State University, San Luis Obispo, 1981; B.Arch., 1983; M.B.A., 1992; Ph.D., Colorado State University, 2000. Registered Architect, California. Licensed Building Contractor (B), California.

Weber, TJ (2017) Marketing	Associate Professor	B.S., Northern Michigan University 2011, M.B.A., Marquette University 2013, Ph.D., Washington State University 2017
Wendt, Dean E. (2002) College of Science and Mathematics, Biological Sciences	Dean and Professor	B.S., California Polytechnic State University, San Luis Obispo, 1993; M.A., 1995; Ph.D., Harvard University, 1999.
Werner, James (2014) Art and Design	Associate Professor and Department Chair	B.A., San Diego State University, 1995; M.F.A., Kent Institute of Art and Design, UK, 2003; Ed.D.C.T., Columbia University Teachers College, 2007.
Westermann, Kimberly (2015) Accounting	Associate Professor	B.S., Cal Poly University, 2000; Ph.D., Bentley University, 2011.
Westphal, Russell (2008) Mechanical Engineering	Professor	B.S., Washington State University, 1978; M.S., Stanford University, 1979; Ph.D., 1983.
White, Crow (2013) Biological Sciences	Associate Professor	B.A., University of Oregon, 1997; M.S., University of Montana, 2002; Ph.D., University of California, Santa Barbara, 2008.
White, Matthew E. (2001) Mathematics	Associate Professor	B.S., Cornell University, 1990; M.S., California Polytechnic State University, San Luis Obispo, 1994; Ph.D., University of California, Santa Barbara, 2000.
White, Emily (2015) Architecture	Associate Professor	B.A. Barnard College, Columbia University, New York, NY, 1999; M.Arch, Southern California Institute of Architecture, 2006. Registered Architect, Washington.
White, Arthur (2019) Music	Assistant Professor	B.M., Emporia State University, 1997; M.M. West Virginia University, 2000; D.M.A., University of North Carolina at Greensboro, 2008
Whitt, Michael D. (2017) Biomedical Engineering	Assistant Professor	B.S., Purdue University, 1987; M.S., Rutgers University/UMDNJ, 1994; Ph.D. 1999; M.B.A., University of California, Los Angeles, 2006.
Widmann, James M. (2004) Mechanical Engineering	Professor and Department Chair	B.S., Michigan Technological University, 1987; M.S., Stanford University, 1988; Ph.D., Stanford University, 1995.
Wilkinson, Steven P. (2014) Chemistry and Biochemistry	Associate Professor	B.S., The College of William and Mary, 1995; Ph.D., Louisiana State University, 2005.
Williams, Jean M. (2000) Political Science	Professor	B.A., Pomona College, 1988; M.A., The Johns Hopkins University, 1996; Ph.D., 1998.
Williams, Amber D. (2017) Psychology and Child Development	Associate Professor	B.A., Rice University, 2010, M.S. University of Michigan, 2012, Ph.D., University of Texas, 2015.
Wilson, Stewart (2020) Natural Resources Management and Environmental Sciences	Assistant Professor	B.S., Humboldt State University, 2010; M.S., University of California, Davis, 2015; M.A., University of California, Davis, 2019; Ph.D., University of California, Davis, 2019.
Winstead, Candace R. (2005) Biological Sciences	Professor	B.A., Augustana College, 1991; Ph.D., Loyola University, 1999.
Wissel, Stephanie (2015) Physics	Assistant Professor	B.S., University of Dallas, 2004; S.M., University of Chicago, 2005; Ph.D., 2010.
Wolf, Marianne McGarry (1994) Agribusiness, Wine and Viticulture	Professor Emeritus (FERP)	B.S., The Johns Hopkins University, 1976; M.A., The Johns Hopkins University, 1977; Ph.D., The Johns Hopkins University, 1980
Wong, Jeffrey C. (2002) Horticulture and Crop Science	Professor	B.S., Saint Mary's College of California, 1994; M.S., University of Illinois at Champaign, 1999; Ph.D., 2002. The J. G. Boswell Foundation of Pasadena Endowed Chair.
Woo, Jeong (2019) Construction Management	Professor and Department Head	B.E., Kyung Won University, South Korea, 1996; M.S. Texas AM University, College Station, 2000; Ph.D., Texas AM University, College Station, 2005
Wood, Zoe J. (2003) Computer Science	Professor	B.A., University of California, Santa Cruz, 1992; B.S., 1997; M.S., California Institute of Technology, 2000; Ph.D., 2003.
Wood, Leah (2014) School of Education	Associate Professor	B.S., Davidson College, 2003; M.A.T., University of North Carolina, Charlotte, 2009; Ph.D., University of North Carolina, Charlotte, 2014.
Woodruff, Christopher J. (2018) Music	Assistant Professor	B.M.E., Louisiana State University, 1991; M.M., Northwestern University, 1996.
Wright, Ava (2020) Philosophy	Assistant Professor	B.A., Rice University, 1995; J.D., Georgia State University, 2000; M.A., Georgia State University, 2010; M.S., University of Georgia, 2018; Ph.D. University of Georgia, 2019.
Wroldsen, Jack (2019) Accounting	Assistant Professor	B.A., The University of Arizona, 1999; M.A., The University of Arizona, 2001; J.D., Duke University School of Law, 2006.
Wu, Xi (2005) Mechanical Engineering	Professor	M.S., Chong Qing University, 1991; Dr. Eng., Cleveland State University, 2005.

Xing, Siyuan (2019) Mechanical Engineering	Assistant Professor	B.S., Sichuan University, 2013; M.S., Southern Illinois University Edwardsville, 2016; Ph.D., Southern Illinois University Carbondale, 2019.
Yang, Tao H. (1987) Industrial and Manufacturing Engineering	Professor	B.S., Tunghai University, Taiwan, 1978; M.S., San Jose State University, 1982; Ph.D., Arizona State University, 1987.
Yang, Hocheol (2020) Graphic Communication	Assistant Professor	Ph.D., Media and Communication, Temple University; M.A., Applied Communication Theory and Methodology, Cleveland State University; M.A., Journalism and Communication Studies, Kwangwoon University; B.A., Digital Media, Kwangwoon University
Yeh, Grace I. (2007) Ethnic Studies, Communication Studies	Professor	B.A., Duke University, 1995; M.A., Georgetown University, 2000; M.A., University of California, Los Angeles, 2003; Ph.D., 2007.
Yep, Alejandra (2014) Biological Sciences	Associate Professor	B.S./M.S., University of Buenos Aires, 1999; Ph.D., 2004.
Yeung, Po Sai Marie (2006) Biological Sciences	Professor	B.Sc., The Chinese University of Hong Kong, 1995; M.S., California Polytechnic State University, San Luis Obispo, 2001; Ph.D., Cornell University, 2004.
Yeung, Vincent (2013) Animal Science	Associate Professor	B.Sc. (Hon.), The Chinese University of Hong Kong, 1996; M.Sc., California Polytechnic State University, San Luis Obispo, 1999; Ph.D., Cornell University, 2003.
Yin, Bingqing (Miranda) (2021) Marketing	Assistant Professor	Ph.D., University of Kansas 2019, M.S. Business Administration Washburn University 2011, B.S. Wuhan University of Science and Technology 2009
Yip, Christopher L. (1988) Architecture	Professor Emeritus	B.A., University of California, Berkeley, 1971; M. Arch., 1977; Ph.D., 1985.
York, Jonathan (2008) Industrial Technology and Packaging	Associate Professor (FERP)	B.A., Yale University, 1973; M.A., Michigan State University, 1976; Ph.D., 1979.
Yoshinobu, Stan (2009) Mathematics	Professor	B.A., University of California, San Diego, 1995; M.A., University of California, Los Angeles, 1997; Ph.D., 2000.
Yost, Jennifer M. (2014) Biological Sciences	Associate Professor	B.S., California Polytechnic State University, 2005; M.S., 2007; Ph.D., University of California, Santa Cruz.
Yu, Xiao-Hua (Helen) (2000) Electrical Engineering	Professor	B.S., TianJin University, People's Republic of China, 1988; M.S., Temple University, 1992; Ph.D., University of California, Irvine, 1998.
Zambrano, Eduardo (2007) Economics	Professor	B.A., Universidad Católica Andrés Bello, Venezuela, 1993; M.A., Cornell University, 1998; Ph.D., Cornell University, 1999.
Zhan, Yongcheng (2019) Management, HR, and Information Systems	Assistant Professor	Ph.D., University of Arizona 2019
Zhang, Ning (2007) Political Science	Professor	B.A., Peking University, Beijing, China, 1999; Ph.D., University of California, Santa Barbara, 2007.
Zhang, Shanju (2011) Chemistry and Biochemistry	Professor	B.S., Jilin University, People's Republic of China, 1993; Ph.D., 1998.
Zhang, Xiaozheng (Jane) (2003) Electrical Engineering	Professor	Diplom, University of Erlangen-Nuremberg, Germany, 1997; Ph.D., Georgia Institute of Technology, 2002.
Zhang, Chuancai (2021) Accounting	Assistant Professor	Ph.D., University of Kentucky 2021, Ph.D., Xiamen University 2016, M.A. Dongbei University of Finance and Economics 2012, B.A. Shandong Agricultural University 2009
Zigler, David F. (2016) Chemistry and Biochemistry	Associate Professor	B.S., Eastern Illinois University; Ph.D., Virginia Tech.
Zoerb, Matthew C. (2015) Chemistry and Biochemistry	Associate Professor	B.S., UT Chattanooga, 2006; Ph.D., University of California, Berkeley, 2012.
Zoller, David J. (2015) Philosophy	Associate Professor	B.A. Xavier University, 2003; M.A., Fordham University, 2006; Ph.D., 2008.

THE CSU SYSTEM

Welcome to the California State University (CSU) - the nation's largest comprehensive university with 23 unique campuses and seven off-campus centers serving approximately 477,000 students and employing more than 56,000 faculty and staff.

Each year, the university awards more than 133,000 degrees. CSU graduates are serving as leaders in the industries that drive California's economy, including business, agriculture, entertainment, engineering, teaching, hospitality and healthcare. To learn more visit the California State University website (<https://www.calstate.edu/>).

A Tradition of Excellence for More than Six Decades

Since 1961, the CSU has provided an affordable, accessible and high-quality education to 4 million living alumni throughout California. While each campus is unique based on its curricular specialties, location and campus culture, every CSU is distinguished for the quality of its educational programs. All campuses are fully accredited, provide a high-quality broad liberal educational program and offer opportunities for students to engage in campus life through the Associated Students, Inc., clubs and service learning. Through leading-edge programs, superior teaching and extensive workforce training opportunities, CSU students graduate with the critical thinking skills, industry knowledge and hands-on experience necessary for employment and career advancement.

Facts

- Today, one of every 20 Americans with a college degree is a CSU graduate.
- 1 of every 10 employees in California is a CSU graduate.
- The CSU awards about half of the bachelor's degrees earned in California.
- The CSU awards 36% of California's undergraduate nursing degrees.
- The CSU prepares more of California's teachers, pre-school through grade 12, than any other institution. Nearly four percent of the nation's teachers graduate from the CSU.
- In 2020, CSU students earned nearly 25,000 business degrees and more than 9,000 engineering degrees.
- The CSU offers more than 170 fully online and 140 hybrid degree programs and concentrations.
- The CSU's online concurrent enrollment program gives students the ability to enroll in courses offered by other campuses in the CSU.
- Over a recent four-year period, the CSU has issued nearly 50,000 professional development certificates in education, health services, business and technology, leisure and hospitality, manufacturing, international trade and many other industries.
- CSU Centers for Community Engagement and Service Learning make available nearly 2300 service learning courses.
- 38,000 CSU students participated in service-learning, contributing 728,000 hours of service in 2020-21.

Governance

The CSU is governed by the Board of Trustees, most of whom are appointed by the governor and serve with faculty and student representatives. The CSU chancellor is the chief executive officer, reporting to the board. The campus presidents serve as the campus-level chief executive officers. The trustees, chancellor and presidents develop university-wide educational policy. The presidents, in consultation with

the CSU Academic Senate and other campus stakeholder groups, render and implement local policy decisions.

CSU Historical Milestones

The individual California State Colleges were established as a system with a Board of Trustees and a chancellor in 1960 by the Donahoe Higher Education Act. In 1972, the system was designated as the California State University and Colleges, and in 1982 the system became the California State University. Today, the CSU is comprised of 23 campuses, including comprehensive and polytechnic universities and, since July 1995, the California State University Maritime Academy, a specialized campus.

The oldest campus—San José State University—was founded in 1857 and became the first institution of public higher education in California. The newest—California State University Channel Islands—opened in fall 2002, with freshmen arriving in fall 2003. And in 2022, the Humboldt campus became Cal Poly Humboldt, joining San Luis Obispo and Pomona as that state's third public polytechnical university.

In 1963, the CSU's Academic Senate was established to act as the official voice of CSU faculty in university wide matters. Also, the California State College Student Presidents Association— which was later renamed the California State Student Association (CSSA), was founded to represent each campus student association on issues affecting students.

Through its many decades of service, the CSU has continued to adapt to address societal changes, student needs and workforce trends. While the CSU's core mission has always focused on providing high-quality, affordable bachelor's and master's degree programs, over time the university has added a wide range of services and programs to support student success – from adding health centers and special programs for veterans to building student residential facilities to provide a comprehensive educational experience.

In 2010, in an effort to accommodate community college transfer students, the CSU, in concert with the California Community Colleges (CCC), launched the Associate Degree for Transfer (ADT), which guarantees CCC transfer students with an ADT admission to the CSU with junior status. The ADT has since proven to be the most effective path to a CSU for community college transfer students.

Always adapting to changes in technology and societal trends to support student learning and degree completion, the CSU launched CSU Fully Online, which enables CSU students to complete online courses at other CSU campuses, expanding enrollment opportunities and providing more educational opportunities for students who may prefer an online format to a traditional classroom setting.

The CSU marked a significant educational milestone when it broadened its degree offerings to include doctoral degrees. The CSU independently offers Doctor of Education (Ed.D.), Doctor of Physical Therapy (DPT), Doctor of Audiology (AuD) and Doctor of Nursing Practice (DNP) degree programs. Additionally, the CSU was recently authorized to offer the independent Doctor of Occupational Therapy (OTD). A limited number of other doctoral degrees are offered jointly with the University of California and private institutions in California.

The CSU strives to continually develop innovative programs, services and opportunities that will give students the tools they need to meet their full potential. In 2016, the university launched Graduation Initiative 2025, a bold plan to support students, increase the number of California's graduates earning high-quality degrees and eliminate achievement and

equity gaps for all students. Through this initiative, the CSU is ensuring that all students have the opportunity to graduate according to their personal goals, positively impacting their lives, families and communities.

By providing an accessible, hands-on education that prepares graduates for career success, the CSU has created a network of alumni that is so extensive and renowned that it spans across the globe. With the graduation of the Class of 2021, more than 4 million CSU alumni are making a difference in the lives of the people of California and the world.

Trustees of the California State University

Ex Officio Trustees

The Honorable Gavin Newsom
Governor of California

The Honorable Eleni Kounalakis
Lieutenant Governor of California

The Honorable Anthony Rendon
Speaker of the Assembly

The Honorable Tony Thurmond
State Superintendent of Public Instruction

Dr. Jolene Koester Interim Chancellor, California State University

Officers of the Trustees

The Honorable Gavin Newsom – President
Lillian Kimbell – Chair
Wenda Fong – Vice Chair
Andrew Jones – Secretary
Steve Relyea – Treasurer

Appointed Trustees

Appointments are for a term of eight years, except student, alumni, and faculty trustees, whose terms are for two years. Terms expire in the year in parentheses. Names are listed alphabetically.

- Larry L. Adamson (2022)
- Diego Arambula (2028)
- Jane W. Carney (2022)
- Jack B. Clarke Jr. (2027)
- Adam Day (2023)
- Douglas Faigin (2025)
- Christopher J. Steinhauser (2026)
- Jean P. Firstenberg (2026)
- Wenda Fong (2024)
- Lillian Kimbell (2024)
- Maria Linares (2023)
- Julia I. Lopez (2028)
- John "Jack" McGrory (2023)
- Anna Ortiz-Morfit (2025)
- Krystal Raynes (2022)
- Yammilette Rodriguez (2029)
- Romey Sabalius (2023)
- Lateefah Simon (2027)

Correspondence with Trustees should be sent to:

Average Support Cost per Full-time Equivalent Student Sources of Funds

The total support cost per full-time equivalent student (FTES) includes the expenditures for current operations, including payments made to students in the form of financial aid, and all fully reimbursed programs contained in state appropriations. The average support cost is determined by dividing the total cost by the number of FTES. The total CSU 2021/22 budget amounts were \$4,228,282,000 from state General Fund (GF) appropriations, before a \$(4.4) million CalPERS retirement adjustment, \$2,509,668,000 from gross tuition revenue, and \$653,724,000 from other fee revenues for a total of \$7,391,674,000. The 2021/22 resident FTES target is 374,246 and the nonresident FTES based on past-year actual is 19,430 for a total of 393,676 FTES. The GF appropriation is applicable to resident students only whereas fee revenues are collected from resident and nonresident students. FTES is derived by dividing the total student credit units attempted by a fixed amount depending on academic level (e.g., 30 for a semester campus and 45 for a quarter campus, the figures that define a full-time undergraduate or postbaccalaureate student's academic load).

2020/21

	Amount	Average Cost Per FTES	%
State Appropriation (GF)*	4,228,282,000	11,298	57.2
Gross Tuition Revenue**	2,509,668,000	6,374	34
Other Fees Revenue**	6653,724,000	1,661	8.8
Total Support Cost	7,391,674,000	19,333	100

* Represents state GF appropriation in the Budget Act of 2021/22; GF is divisible by resident students only (374,246 FTES).

** Represents CSU Operating Fund, gross tuition and other fees revenue amounts submitted in campus August 2020/21 final budgets. Revenues are divisible by resident and nonresident students (393,676 FTES).

The 2021/22 average support cost per FTES based on GF appropriation and net tuition fee revenue only is \$17,672 and when including all three sources as indicated below is \$19,333, which includes all fee revenue (e.g. tuition fees, application fees, and other campus mandatory fees) in the CSU Operating Fund. Of this amount, the average net tuition and other fee revenue per FTES is \$8,035.

The average CSU 2021/22 academic year, resident, undergraduate student basic tuition and other mandatory fees required to apply to, enroll in, or attend the university is \$7,439 (\$5,742 tuition fee plus \$1,621 average campus-based fees). However, the costs paid by individual students will vary depending on campus, program, and whether a student is part-time, full-time, resident, or nonresident.

Campus Smoking Policy

Please view the revised smoking policy for the Cal Poly campus at the Campus Administrative Policies website (<https://policy.calpoly.edu/cap/100/cap-170/>).

Career Placement

The Career Services office 805.756.2501 may furnish, upon request, information about the employment of students who graduate from programs or courses of study preparing students for a particular career field. Any such data provided must be in a form that does not allow for the identification of any individual student. This information includes data concerning the average starting salary and the percentage of previously enrolled students who obtained employment or continued into graduate or professional schools. The information may include data collected from either graduates of the campus or graduates of all campuses in the California State University.

Civil and Criminal Penalties for Violation of Federal Copyrights Law

Anyone who is found to be liable for copyright infringement may be liable for either the owner's actual damages along with any profits of the infringer or statutory damages of up to \$30,000 per work infringed. In the case of a willful infringement, a court may award up to \$150,000 per work infringed. (See 17 U.S.C. §504.) Courts also have discretion to award costs and attorneys' fees to the prevailing party. (See 17 U.S.C. §505.) Under certain circumstances, willful copyright infringement may

also result in criminal penalties, including imprisonment and fines. (See 17 U.S.C. §506 and 18 U.S.C. §2319.)

Determination of Residency for Tuition Purposes

University requirements for establishing residency for tuition purposes are independent from requirements for establishing residency for other purposes, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student qualifies to pay university fees at the in-state or out-of-state rate. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residency Requirements. These laws governing residency for tuition purposes at the California State University are California Education Code sections 68000-68086, 68120- 68133, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900- 41915. This material can be viewed by accessing the California State University Office of General Counsel website (<https://www.calstate.edu/csu-system/administration/general-counsel/>).

Each campus's Admissions Office is responsible for determining the residency status of that campus's new and returning students based, as applicable, on the student's Application for Admission, Residency Questionnaire, and, as necessary, other information the student furnishes. A student who fails to provide sufficient information to establish resident status will be classified a nonresident.

Residency Requirements

Initial Determination: Eligible Immigration Status, Physical Presence and Intent

A student seeking to pay in-state tuition at a California State University campus as a first-time freshman, transfer, or as a post-baccalaureate/graduate student must have an eligible immigration status to establish residency (see Immigration Information (<https://www.calstate.edu/apply/california-residency-for-tuition-purposes/Pages/classification-determination-of-residency.aspx#immigration-information>)), meet physical presence by the Residence Determination Date, and demonstrate intent to indefinitely remain in the State of California for more than one year immediately preceding the Residence Determination Date. If the student is under the age of 19 (with limited exceptions), the student's residence status is derived from that of the parent or from that of the legal guardian.

Requirements for Residency for Tuition Purposes

Physical Presence: The student or parent/guardian must be physically present in California for more than one year immediately preceding the Residence Determination Date in which enrollment is contemplated. For example, if a student plans to attend the CSU for the Fall 2022 academic term, and the Residence Determination Date for that term is September 20, 2022, the student must establish physical presence in California no later than September 19, 2021.

Intent: California law stipulates the burden of proof rests with the student, and merely living in California for a year does not support a claim for residency for tuition purposes. The student, or in some cases a parent or legal guardian, must demonstrate intent to remain indefinitely in the state for more than one year immediately preceding the Residence Determination Date (RDD) (<https://www.calstate.edu/apply/california-residency-for-tuition-purposes/Pages/classification-determination-of->

residency.aspx) and sever all residential ties with the former state or country of residence. If the student is under the age of 19, the student's residence status is derived from that of the parent or legal guardian unless an exception applies. There must be sufficient documentation to demonstrate that intent was established more than one year (a minimum of one year and one day) before the RDD.

Documents must include the student's name, the student's California address, and a date at least one year and one day prior or on the RDD for the term. For students under the age of 19, documents must be in the parent or legal guardian's name unless an exception applies. Also, a parent or legal guardian's immigration status does not preclude a student from establishing residency; therefore, the parent or legal guardian is not required to provide any immigration documents to demonstrate intent.

Evidence demonstrating intent to remain in the State of California indefinitely may vary from case to case, but will include, and is not necessarily limited to, the absence of residential ties to any other state, California voter registration and history of actually voting in California elections, maintaining California vehicle registration and driver's license, maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or occupying or renting a residence where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

Immigration Information

A student seeking to pay in-state tuition at a California State University campus as a first-time freshman, transfer, or as a post-baccalaureate/graduate student must have an eligible immigration status (<https://www.calstate.edu/apply/california-residency-for-tuition-purposes/Documents/Immigration-Statuses.pdf>) to establish residency. Therefore, the student must be a United States citizen, a permanent resident (Green Card holder), or hold an eligible visa status (see list). If a student does not qualify as a California resident, the student may be eligible for certain exceptions and exemptions (<https://www.calstate.edu/apply/california-residency-for-tuition-purposes/Pages/exceptions-exemptions.aspx>).

Nonimmigrant Statuses and Other Categories that are Eligible to Establish California Residency for Tuition Purposes

The Immigration and Nationality Act allows individuals in certain nonimmigrant statuses to establish permanent residency in the United States. Therefore, they are entitled to establish California residency for tuition purposes. For a complete list of eligible visas and other eligible categories, review the Nonimmigrant list. Students must hold an eligible visa status at least one year before the Residence Determination Date (<https://www.calstate.edu/apply/california-residency-for-tuition-purposes/Pages/classification-determination-of-residency.aspx>) to be eligible to establish California residency for tuition purposes.

Students in the category of Deferred Action for Childhood Arrivals (DACA) or Temporary Protected Status (TPS) are also eligible to establish residency for tuition purposes. Also, students who are adjusting their immigration status, such as asylum, may qualify for residency depending on where they are in the application process.

Most nonimmigrant visa holders, such as an F-1 or J-1 visa holder, are not eligible to establish California residency for tuition purposes. Students with a visa or without an immigration status should contact the campus Admissions Office.

Exceptions

Exceptions to the general residency requirements are contained in California Education Code sections 68070-68086 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906-41906.6, 41910. Whether an exception applies to a particular student can only be determined after the submission of an application for admission and, as necessary, additional supporting documentation. Because neither the campus nor the Chancellor's Office staff may give legal advice, applicants are strongly urged to review the material for themselves and consult with a legal advisor.

Residency determination dates are set each term, They are:

Term	Date
Fall	September 20
Winter	January 5
Spring	April 1
Summer	July 1

Reclassification - Financial Independence (only applies to continuing students)

A student classified as a nonresident for a prior term may seek reclassification in any subsequent term; however, reclassification requires that, in addition to satisfying the requirements of physical presence and intent to remain indefinitely in the state, the student must also satisfy the requirement of financial independence as outlined in Title 5 CCR § 41905.5. To do so, the student must contact the appropriate person in the campus admissions office and complete a Residency Questionnaire Form and provide supporting documents.

41905.5. Residence Reclassification - Financial Independence Requirement

- Any nonresident student requesting reclassification to resident for tuition purposes must demonstrate financial independence
- Student has not and will not be claimed as an exemption for state and federal tax purposes by his/her parent in the calendar year the reclassification application is made and in any of the three calendar years prior to the reclassification application
- Student has not and will not receive more than seven hundred fifty dollars (\$750) per year in financial assistance from his/her parent in the calendar year the reclassification application is made and in any of the three calendar years prior to the reclassification application
- Student has not lived and will not live for more than six weeks in the home of his/her parent during the calendar year the reclassification application is made and in any of the three calendar years prior to the reclassification application
- Note: Students who receive a government scholarship and/or financial assistance should be viewed the same as state and federal financial aid, and athletics grants-is-aid; and should not be counted as parental support.
- Effective Fall 2020 academic term, if the student meets at least one of the following criteria, the student does not have to meet the financial independence requirement. Student must provide the campus admissions office supporting documents (e.g. state income tax returns, court documents, marriage certificate, military order form) that demonstrate they meet the criteria.
- Dependent on a parent who has California residence for more than one year immediately preceding the residence determination date;

- Enrolled in a graduate or post#baccalaureate program, regardless of age;
- Turned 24 years of age by the residence determination date;
- Married or registered domestic partner as of the residence determination date;
- Active duty members serving in the U.S Armed Forces
- Veteran of the U.S. Armed Forces
- Legal dependent other than spouse or registered domestic partner
- Former ward of the court, foster youth or both parents are deceased
- Declared by a court to be an emancipated minor
- Unaccompanied youth who is homeless or at risk of becoming homeless

Residency Appeals

A student classified as a nonresident may appeal a final campus decision within 30 days of notification by the campus. Appeals will be accepted only if at least one of the following criteria applies:

1. The decisions was based on:
 - a. a significant error of fact by the campus;
 - b. a significant procedural error by the campus; or
 - c. an incorrect application of the law which, if corrected would require that the student be reclassified as a California resident; and/or or
2. Significant new information, not previously known or available to the student, became available after the date of the campus decision classifying the student as a nonresident and based on the new information, the classification as a nonresident is incorrect.

Instructions to submit an appeal and additional information can be found on the California Residency for Tuition Purposes Website (<https://www2.calstate.edu/apply/california-residency-for-tuition-purposes/>).

Appeals via email, fax and U.S. mail will not be accepted. A student with a documented disability who is requesting an accommodation to submit an appeal through the CSU website (<https://www2.calstate.edu/>) should contact Student Affairs and Enrollment Management at residencyappeals@calstate.edu.

The Chancellor's Office will either decide the appeal or send the matter back to the campus for further review.

A student incorrectly classified as a resident or incorrectly granted an exception from nonresident tuition is subject to reclassification as a nonresident or withdrawal of the exception and subject to payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student may also be subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations. A student previously classified as a resident or previously granted an exception is required to immediately notify the Admissions Office if the student has reason to believe that the student no longer qualifies as a resident or no longer meets the criteria for an exception.

Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residency for tuition purposes in California between the time this information is published and the relevant residency determination date. Students are urged to review the statutes and regulations stated above.

Higher Education Act (HEA)

Under the Higher Education Act of 1965 (HEA) and its many amendments, Cal Poly is required to make certain disclosures and institutional information "readily available" to prospective and enrolled students, employees, the general public and the department of education on an annual basis (20 U.S.C. Section 1092(a)). For additional information, please contact the Dean of Students Office at 805.756.0327.

PRIVACY RIGHTS OF STUDENTS IN EDUCATION RECORDS

The federal Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 1232g) (FERPA) and regulations adopted thereunder (34 C.F.R. 99) set out requirements designed to protect students' privacy in their educational records maintained by the campus. The statute and regulations govern access to certain student records maintained by the campus and the release of those records. FERPA provides that the campus must give students access to most records directly related to the student, and must also provide opportunity for a hearing to correct the records if the student claims they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under this law does not include any right to challenge the appropriateness of a grade determined by the instructor. FERPA generally requires the campus obtain a student's written consent before releasing personally identifiable data pertaining to the student. The campus has adopted a set of policies and procedures governing implementation of FERPA and the regulations. Copies of these policies and procedures may be obtained at Office of Academic Records or the Educational Equity Services Office. Among the information included in the campus statement of policies and procedures is: (1) the student records maintained and the information they contain; (2) the campus official responsible for maintaining each record; (3) the location of access lists indicating persons requesting or receiving information from the record; (4) policies for reviewing and expunging records; (5) student access rights to their records; (6) procedure for challenging the content of student records; and (7) the student's right to file a complaint with the Department of Education. The Department of Education has established an office and review board to investigate complaints and adjudicate violations. The designated office is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C. 20202-5920.

FERPA authorizes the campus to release "directory information" pertaining to students. "Directory information" may include the student's name, address, telephone listing, electronic mail address, photograph, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, grade level, enrollment status, degrees, honors, and awards received, and the most recent previous educational agency or institution the student attended. The campus may release this "directory information" at any time unless the campus has received prior written objection from the student specifying the information the student requests not be released. Written objections must be sent to University Registrar.

The campus is authorized to provide access to student records to campus officials and employees who have legitimate educational interests in such access. These persons have responsibilities in the campus's academic, administrative or service functions and have reason for accessing student records associated with their campus or other related academic responsibilities. Student records will be disclosed to the CSU Chancellor's Office to conduct research, to analyze trends, or to provide other administrative services. Student records may also be

disclosed to other persons or organizations under certain conditions (e.g., as part of the accreditation or program evaluation; in response to a court order or subpoena; in connection with financial aid; or to other institutions to which the student is transferring).

Completion/Graduation Rates

Information concerning completion, graduation rates and student body diversity at Cal Poly may be found at the Institutional Research website (https://ir.calpoly.edu/content/publications_reports/index/).

Equity in Athletics Disclosure Act (EADA)

http://ir.calpoly.edu/content/publications_reports/ret_grad/index (http://ir.calpoly.edu/content/publications_reports/ret_grad/index/)

The Equity in Athletics Disclosure Act requires co-educational institutions of postsecondary education that participate in a Title IV, federal student financial assistance program, and have an intercollegiate athletic program, to prepare an annual report to the Department of Education on athletic participation, staffing, and revenues and expenses, by men's and women's teams.

In compliance with this requirement, information contained in the current report for Cal Poly San Luis Obispo is available on the US Department of Education's web site at <http://ope.ed.gov/athletics> (<http://ope.ed.gov/athletics/>) (select "Get data for one institution"). Alternatively, a link is also available to this and other publications through Cal Poly's Institutional Planning & Analysis web site (see link at top of this section). A paper copy of the report is available upon request.

Campus Security Report (Clery Act)

<http://afd.calpoly.edu/police/>

Crime statistics for Cal Poly are provided for all prospective and current students, faculty and staff on the website, along with critical updates and prevention advisories. These statistics are reported monthly to the Federal and State Departments of Justice as well as annually to the Office of the Chancellor of the CSU. Crime statistics are published to inform the campus community and to meet mandated reporting requirements. A printed copy of the Campus Security Report is available by request at the University Police Department.

Student Activities

Information concerning student activities may be found at the Cal Poly Student Affairs website <http://www.studentaffairs.calpoly.edu/get-involved> (<http://www.studentaffairs.calpoly.edu/get-involved/>); 805.756.5903.

Availability of Institutional and Financial Assistance Information

Student Financial Assistance. Director, Financial Aid, Admin. 212; 805.756.2927

1. A description of the federal, state, institutional, local, and private student financial assistance programs available to students who enroll at Cal Poly;
2. For each aid program, a description of procedures and forms by which students apply for assistance, student eligibility requirements, criteria for selecting recipients from the group of eligible applicants, and criteria for determining the amount of a student's award;
3. A description of the rights and responsibilities of students receiving financial assistance, including federal Title IV student assistance

programs, and criteria for continued student eligibility under each program;

4. The satisfactory academic progress standards that students must maintain for the purpose of receiving financial assistance and criteria by which a student who has failed to maintain satisfactory progress may reestablish eligibility for financial assistance;
5. The method by which financial assistance disbursements will be made to students and the frequency of those disbursements;
6. The way the school provides for Pell-eligible students to obtain or purchase required books and supplies by the seventh day of a payment period and how the student may opt out;
7. The terms of any loan received as part of the student's financial aid package, a sample loan repayment schedule, and the necessity for repaying loans;
8. The general conditions and terms applicable to any employment provided as part of the student's financial aid package;
9. The terms and conditions of the loans students receive under the Direct Loan and Perkins Loan Programs;
10. The exit counseling information the school provides and collects for student borrowers; and
11. Contact information for ombuds offices available for disputes concerning federal, institutional and private loans.

Return of Federal Title IV student assistance funds. Director, Financial Aid, Admin. 212; 805.756.2927.

Cost of Attending Cal Poly. Director, Financial Aid, Admin. 212; 805.756.2927: fees and tuition (where applicable); the estimated costs of books and supplies; estimates of typical student room, board, and transportation costs; and, if requested, additional costs for specific programs.

Refund Policies. Assistant Director, Student Financial Services, Admin. 211; 805.756.1428: return of unearned tuition and fees or other refundable portions of institutional charges.

Facilities and Services available to Students with Disabilities. Director, Disability Resource Center, Student Services Bldg. 124; 805.756.1395.

Reporting Criminal Actions or Other Emergencies. University Police, Building 74; 805.756.2281.

Annual Fire Safety Report. Facility Services, Bldg. 80; 805.756.6662.

Prevention of Drug and Alcohol Abuse and Rehabilitation Programs. Office of the Vice President for Student Affairs, Admin. 209; 805.756.1521.

Grievance Procedures for Students. The Dean of Students Office, Bldg 124, Rm 125; 805.756.0327.

Teacher Certification Examinations, pass rates, teacher preparation programs. School of Education, Bldg 2, Rm 120; 805.756.2126.

Programs Leading to Licensure and Credentialing

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security

number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Office of the Registrar, Admin. 222; 805.756.2531.

The California State University has not determined whether its programs meet other states' educational or professional requirements for licensure and certification. Students enrolled in a California State University program who are planning to pursue licensure or certification in other states are responsible for determining whether they will meet their state's requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Military Selective Service Act

The federal Military Selective Service Act (the "Act") requires most males residing in the United States to present themselves for registration with the Selective Service System within thirty days of their eighteenth birthday. Most males between the ages of 18 and 25 must be registered.

Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service Registrar. For more information on the Selective Service System and to initiate the registration process, visit the official Selective Service System website (<https://www.sss.gov/>).

Student Complaint Procedure (Complaints Regarding the CSU)

The California State University takes very seriously complaints and concerns regarding the institution. If you have a complaint regarding the CSU, you may present your complaint as follows:

(1) If your complaint concerns CSU's compliance with academic program quality and accrediting standards, you may present your complaint on the Western Association of Schools and Colleges (WASC) website (<https://www.acswasc.org/acs-wasc-complaint-process/>). WASC is the agency that accredits the CSU's academic program.

(2) If your complaint concerns an alleged violation by CSU of any law that prohibits discrimination, harassment or retaliation based on a protected status (such as age, disability, gender (or sex), gender identity, gender expression, nationality, race or ethnicity (including color, caste, or ancestry), religion or veteran or military status), you may present your complaint as described in Section XVI (Nondiscrimination Policy).

(3) If your complaint concerns an alleged violation by the CSU of other state law, including laws prohibiting fraud and false advertising, you may present your claim complaint to the campus president or designee at (Jessica Darin, Chief of Staff, darin@calpoly.edu). See Procedure for Student Complaints—Executive Order No. 1063 for details regarding the complaint requirements and complaint process.

(4) Other complaints regarding the CSU may be presented to the campus dean of students [or other appropriate administrator], who will provide guidance on the appropriate campus process for addressing your particular issue.

If you believe that your complaint warrants further attention after you have exhausted all the steps outlined by the campus, or by WASC, you

may file an appeal with the Assistant Vice Chancellor, Academic and Student Affairs (or designee) at the CSU Chancellor's Office.

This procedure should not be construed to limit any right that you may have to take legal action to resolve your complaint.

Student Conduct

Inappropriate conduct by students or by applicants for admission is subject to discipline as provided in Sections 41301 through 41304 of Title 5, *California Code of Regulations*. These sections are:

41301. Standards for Student Conduct.

1. Campus Community Values

The University is committed to maintaining a safe and healthy living and learning environment for students, faculty, and staff. Each member of the campus community should choose behaviors that contribute toward this end. Students are expected to be good citizens and to engage in responsible behaviors that reflect well upon their university, to be civil to one another and to others in the campus community, and contribute positively to student and university life.

2. Grounds for Student Discipline

Student behavior that is not consistent with the Student Conduct Code is addressed through an educational process that is designed to promote safety and good citizenship and, when necessary, impose appropriate consequences. The following are the grounds upon which student discipline can be based:

- a. Dishonesty, including:
 - i. Cheating, plagiarism, or other forms of academic dishonesty that are intended to gain unfair academic advantage.
 - ii. Furnishing false information to a University official, faculty member, or campus office.
 - iii. Forgery, alteration, or misuse of a University document, key, or identification instrument.
 - iv. Misrepresenting one's self to be an authorized agent of the University or one of its auxiliaries.
- b. Unauthorized entry into, presence in, use of, or misuse of University property.
- c. Willful, material and substantial disruption or obstruction of a University-related activity, or any on-campus activity.
- d. Participating in an activity that substantially and materially disrupts the normal operations of the University, or infringes on the rights of members of the University community.
- e. Willful, material and substantial obstruction of the free flow of pedestrian or other traffic, on or leading to campus property or an off-campus University related activity.
- f. Disorderly, lewd, indecent, or obscene behavior at a University related activity, or directed toward a member of the University community.
- g. Conduct that threatens or endangers the health or safety of any person within or related to the University community, including physical abuse, threats, intimidation, harassment, or sexual misconduct.
- h. Hazing, or conspiracy to haze. Hazing is defined as any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state (Penal Code 245.6), and

in addition, any act likely to cause physical harm, personal degradation or disgrace resulting in physical or mental harm, to any former, current, or prospective student of any school, community college, university, or other educational institution. The term “hazing” does not include customary athletic events or school sanction events.

Neither the express or implied consent of a victim of hazing, nor the lack of active participation in a particular hazing incident is a defense. Apathy or acquiescence in the presence of hazing is not a neutral act, and is also a violation of this section.

- i. Use, possession, manufacture, or distribution of illegal drugs or drug-related paraphernalia, (except as expressly permitted by law and University regulations) or the misuse of legal pharmaceutical drugs.
- j. Use, possession, manufacture, or distribution of alcoholic beverages (except as expressly permitted by law and University regulations), or public intoxication while on campus or at a University related activity.
- k. Theft of property or services from the University community, or misappropriation of University resources.
- l. Unauthorized destruction, or damage to University property or other property in the University community.
- m. Possession or misuse of firearms or guns, replicas, ammunition, explosives, fireworks, knives, other weapons, or dangerous chemicals (without the prior authorization of the campus president) on campus or at a University related activity.
- n. Unauthorized recording, dissemination, or publication of academic presentations (including handwritten notes) for a commercial purpose.
- o. Misuse of computer facilities or resources, including:
 - i. Unauthorized entry into a file, for any purpose.
 - ii. Unauthorized transfer of a file.
 - iii. Use of another’s identification or password.
 - iv. Use of computing facilities, campus network, or other resources to interfere with the work of another member of the University community.
 - v. Use of computing facilities and resources to send obscene or intimidating and abusive messages.
 - vi. Use of computing facilities and resources to interfere with normal University operations.
 - vii. Use of computing facilities and resources in violation of copyright laws.
 - viii. Violation of a campus computer use policy.
- p. Violation of any published University policy, rule, regulation or presidential order.
- q. Failure to comply with directions of, or interference with, any University official or any public safety officer while acting in the performance of his/her duties.
- r. Any act chargeable as a violation of a federal, state, or local law that poses a substantial threat to the safety or well-being of members of the University community, to property within the University community or poses a significant threat of disruption or interference with University operations.
- s. Violation of the Student Conduct Procedures, including:
 - i. Falsification, distortion, or misrepresentation of information related to a student discipline matter.
 - ii. Disruption or interference with the orderly progress of a student discipline proceeding.

- iii. Initiation of a student discipline proceeding in bad faith.
- iv. Attempting to discourage another from participating in the student discipline matter.
- v. Attempting to influence the impartiality of any participant in a student discipline matter.
- vi. Verbal or physical harassment or intimidation of any participant in a student discipline matter.
- vii. Failure to comply with the sanction(s) imposed under a student discipline proceeding.
- t. Encouraging, permitting, or assisting another to do any act that could subject him or her to discipline.

3. Procedures for Enforcing this Code

The Chancellor shall adopt procedures to ensure students are afforded appropriate notice and an opportunity to be heard before the University imposes any sanction for a violation of the Student Conduct Code. **[Note:** At the time of publication, such procedures are set forth in California State University Executive Order 1098 (Revised June 23, 2015), available at <http://calstate.edu/eo/EO-1098-rev-6-23-15.html>.]

4. Application of this Code

Sanctions for the conduct listed above can be imposed on applicants, enrolled students, students between academic terms, graduates awaiting degrees, and students who withdraw from school while a disciplinary matter is pending. Conduct that threatens the safety or security of the campus community, or substantially disrupts the functions or operation of the University is within the jurisdiction of this Article regardless of whether it occurs on or off campus. Nothing in this Code may conflict with Education Code section 66301 that prohibits disciplinary action against students based on behavior protected by the First Amendment.

41302. Disposition of Fees: Campus Emergency; Interim Suspension.

The President of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he or she is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he or she is suspended, no additional tuition or fees shall be required of the student on account of the suspension.

During periods of campus emergency, as determined by the President of the individual campus, the President may, after consultation with the Chancellor, place into immediate effect any emergency regulations, procedures, and other measures deemed necessary or appropriate to meet the emergency, safe-guard persons and property, and maintain educational activities.

The president may immediately impose an interim suspension in all cases in which there is reasonable cause to believe that such an immediate suspension is required in order to protect lives or property and to insure the maintenance of order. A student so placed on interim suspension shall be given prompt notice of charges and the opportunity for a hearing within 10 days of the imposition of interim suspension. During the period of interim suspension, the student shall not, without prior written permission of the president or designated representative, enter any campus of the California State University other than to attend the hearing. Violation of any condition of interim suspension shall be grounds for expulsion.

Use of Social Security Number

Applicants are required to include their correct social security numbers in designated places on applications for admission pursuant to the authority contained in Section 41201, Title 5, *California Code of Regulations*, and Section 6109 of the Internal Revenue Code (26 U.S.C. 6109). The University uses the social security number to identify students and their records including identification for purposes of financial aid eligibility and disbursement and the repayment of financial aid and other debts payable to the institution. Also, the Internal Revenue Service (IRS) requires the University to file information returns that include the student's social security number and other information such as the amount paid for qualified tuition, related expenses, and interest on educational loans. This information is used by the IRS to help determine whether a student, or a person claiming a student as a dependent, may take a credit or deduction to reduce federal income taxes.

Aerospace Engineering (AERO)

undefined

AERO Courses

AERO 121. Aerospace Fundamentals. 2 units

Term Typically Offered: F

Introduction to the engineering profession including the aeronautical and aerospace fields. Engineering approach to problem-solving and analysis of data obtained from experiments. Basic nomenclature and design criteria used in the aerospace industry. Applications to basic problems in the field. 1 lecture, 1 laboratory.

AERO 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

AERO 215. Introduction to Aerospace Design. 2 units

Term Typically Offered: F, W

Prerequisite: AERO 121 and MATH 143. Recommended: IME 144.

Introduction to problem solving techniques and team-centered design projects in aerospace engineering. Primary emphasis on the solutions of design problems in aerospace engineering using computers. 2 laboratories.

AERO 220. Aerospace Systems Engineering and Integration. 1 unit

Term Typically Offered: W, SP

Prerequisite: AERO 121.

Project-based study of fundamental systems engineering concepts including sub-system interface requirements, verification and validation, modeling/analysis/design, and implementation of complex aerospace systems. 1 laboratory.

AERO 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AERO 299. Aerospace Thermodynamics. 4 units

Term Typically Offered: SP

Prerequisite: ME 212. Corequisite: AERO 300. Recommended: AERO 215.

Basics of thermodynamics, energy, systems and control volume analysis. First law, second law, phase change and energy analysis for aerospace-relevant applications. Entropy and exergy, cycle analysis (Rankine, Brayton, turbojets and turbofans). Not open to students with credit in AERO 301. 3 lectures, 1 laboratory.

AERO 300. Aerospace Engineering Analysis. 5 units

Term Typically Offered: SP

Prerequisite: AERO 215, MATH 244, ME 211, and PHYS 133.

Analytical and numerical methods for aerospace engineering problems. Topics include vector calculus, linear algebra, ordinary and partial differential equations, and Fourier transforms. Computer tools and numerical methods as applied to problems in aerodynamics, structures, stability and control and astronautics. 4 lectures, 1 laboratory.

AERO 302. Aerospace Fluid Mechanics. 4 units

Term Typically Offered: F

Prerequisite: ME 212. Corequisite: AERO 300. Recommended: AERO 215; and AERO 299 or AERO 301.

Properties of fluids, statics, mass/energy/momentum for aeronautical applications, external aerodynamics (lift and drag), dimensional analysis for scale testing, introduction to differential analysis and Navier-Stokes equations, basics of laminar and turbulent boundary layers. 3 lectures, 1 laboratory.

AERO 303. Aerospace Gas Dynamics and Heat Transfer. 4 units

Term Typically Offered: W

Prerequisite: AERO 299 or AERO 301; and AERO 302.

Basics of heat transfer and approaches to problem solving, steady heat conduction, convection (forced and natural), heat exchanger design, shock waves and compressible flow in nozzles and diffusers (normal, oblique, expansion waves), thermal radiation and applications. 3 lectures, 1 laboratory.

AERO 306. Aerodynamics and Flight Performance. 4 units

Term Typically Offered: F

Prerequisite: AERO 215; AERO 299 or AERO 301. Concurrent: AERO 302.

Introduction to theoretical aerodynamics. Primary emphasis in the subsonic region, including compressibility effects. Basic aerodynamic theory: Airfoil theory, wing theory, lift and drag. Team-centered aerodynamic design. Flight performance. 4 lectures.

AERO 307. Experimental Aerodynamics. 2 units

Term Typically Offered: SP

Prerequisite: AERO 302, AERO 306, ENGL 149.

Wind tunnel testing of basic aerodynamic properties of airfoils, finite wings, aircraft or spacecraft models, and vehicle flight performance. Emphasis on both static and dynamic responses of aircraft. Various measurement techniques, data reduction schemes, and analysis methods. 2 laboratories.

AERO 310. Air and Space. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Technological developments of modern aircraft and spacecraft through physics of flight equations, mission analysis, propulsion, structures, materials, and control systems for civil and military aircraft/spacecraft. Synthesis of current and future aerospace technologies through emerging ethical considerations, and global impact. 4 lectures. Course may be offered in classroom-based or online format. Crosslisted as AERO/HNRS 310. Fulfills GE Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

AERO 320. Fundamentals of Dynamics and Control. 4 units

Term Typically Offered: F

Prerequisite: AERO 300 and ME 212.

Introduction to six degree of freedom rigid body dynamic and kinematic equations of motion, including coordinate transformations, Euler angles and quaternions for aerospace vehicles. Linearization and dynamic system theory and stability. Introduction to linear control theory, controller design and analysis. 4 lectures.

AERO 321. Experimental Sensors, Actuators and Control. 1 unit

Term Typically Offered: F

Prerequisite: AERO 300. Recommended: EE 201 and EE 251.

Experiments in translational and rotational dynamics, structural, thermal, and flow control. Comparison of modeling/simulation results to experimental data. Role of actuators, sensors, noise, feedback, and supporting instrumentation hardware and software. Introduction to technical communication. 1 laboratory.

AERO 331. Aerospace Structural Analysis I. 4 units

Term Typically Offered: W

Prerequisite: AERO 300, CE 207 or CE 208, and ME 212.

Deflection analysis. Principles of fictitious displacement, virtual work, and unit load method. Energy methods: Castigliano's theorem, Maxwell-Betti reciprocal theorem, minimum principles, Rayleigh-Ritz's method and Galerkin's method. Stress analysis of aircraft and spacecraft components. 4 lectures.

AERO 350. Fundamentals of Systems Engineering. 2 units

Term Typically Offered: W, SP

Prerequisite: AERO 220.

Systems engineering principles and methods applied to the design of aerospace systems. System-level requirements, user needs and stakeholder constraints, component-level requirements, and requirements breakdown structure. Project planning and tracking. Trade studies for design decision making. 2 lectures.

AERO 351. Introduction to Orbital Mechanics. 4 units

Term Typically Offered: F

Prerequisite: AERO 300 and ME 212.

Motion of a body in a central field. Keplerian Orbits. Orbital maneuvers. Interplanetary trajectories. 4 lectures.

AERO 354. Space Environment Laboratory. 2 units

Term Typically Offered: SP

Prerequisite: AERO 353 or AERO 355; and ENGL 149.

Laboratory examples of the effects of the space environment on a spacecraft and design considerations. Topics include the launch, vacuum, particulate, plasma, and radiation environments. All topics are applied to how the environment affects spacecraft design considerations. Not open to students with credit in AERO 356. 2 laboratories.

AERO 355. Space Environments I. 3 units

Term Typically Offered: W

Prerequisite: AERO 300.

Effects of the space environment on a spacecraft and design considerations. Lecture and laboratory topics include the launch, vacuum, neutral and particulate environments. Not open to students with credit in AERO 353 or AERO 354. 2 lectures, 1 laboratory.

AERO 356. Space Environments II. 3 units

Term Typically Offered: SP

Prerequisite: AERO 299 or AERO 301; and AERO 355.

Effects of the space environment on a spacecraft and design considerations. Lecture and laboratory topics include the radiation, plasma, and thermal environments and the synergistic effects. Not open to students with credit in AERO 353 or AERO 354. 2 lectures, 1 laboratory.

AERO 360. Creative Problem Solving in Engineering Design. 2 units

Term Typically Offered: W

Prerequisite: PSY 350.

The creative problem solving process for an engineering design team. How to explore context and causes as part of defining a design problem; the principles of brainstorming, synthesis, and judgment. Role of iteration, implementation, and communication. Importance of a diverse view, including: customers, products, processes, systems, ethics, and professional responsibility. Team-based applications to case studies and real-world engineering design problems. 2 laboratories.

AERO 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units.

AERO 401. Propulsion Systems. 5 units

Term Typically Offered: F

Prerequisite: AERO 303, CHEM 124.

Power plant types, components, characteristics, and requirements. Principles of thrust and energy utilization. Thermodynamic processes and performance of turboprop, turboshaft, turbofan, turbojet, ramjet, and rocket engines. 4 lectures, 1 laboratory.

AERO 402. Spacecraft Propulsion Systems. 5 units

Term Typically Offered: F

Prerequisite: AERO 303; AERO 353 or AERO 355; and CHEM 124.

Effects of the propulsion subsystem on spacecraft design. Introduction to air breathing propulsion systems. Topics include basic rocket performance, monopropellant thrusters, bipropellant thrusters, electric thrusters, thruster placement, plumbing, tank sizing and design, system layout, component design, and systems integration. 4 lectures, 1 laboratory.

AERO 405. Supersonic and Hypersonic Aerodynamics. 4 units

Term Typically Offered: SP

Prerequisite: AERO 303; AERO 306 or AERO 353 or AERO 355.

Review of gas dynamics, shock-wave and boundary-layer interaction, aerodynamic design. 2-dimensional supersonic flows around thin airfoil; finite wing in supersonic flow. Local surface inclination methods for high-speed flight, boundary-layer and aerodynamic heating, viscous interactions. 4 lectures.

AERO 406. Applied Computational Fluid Dynamics. 4 units

Term Typically Offered: F

Prerequisite: AERO 302 and AERO 306.

Application of Computational Fluid Dynamics to study a range of problems relating to applications in aerospace and automotive engineering. Grid generation, sources of errors in CFD studies, boundary conditions, 2D and 3D external flows, and turbulence modeling. 2 lectures, 2 laboratories.

AERO 407. Reentry Aerodynamics. 4 units

Term Typically Offered: W

Prerequisite: AERO 303.

Near planet environments. Transition from orbital to aero-dynamic motion. Aerodynamic heating and effects on design. 4 lectures.

AERO 408. Plasma Applications in Aerospace. 4 units

Term Typically Offered: F

Prerequisite: PHYS 123 or PHYS 133 and senior standing, or graduate standing.

Plasma applications in aerospace technology and operations including hypersonics, space weather, shielding, stealth, communications, power, and aerodynamics. Computational modelling of plasma and plasma theory. 4 lectures.

AERO 409. Flight Test. 4 units

Term Typically Offered: W

Prerequisite: AERO 306. Concurrent: AERO 320.

Overview of flight tests, test equations, and supporting facilities. Principles of team-centered flight testing with applications to performance, stability and control, and avionics systems testing. Test planning, instrumentation, data analysis and reports. 2 lectures, 2 laboratories.

AERO 420. Aircraft Dynamics and Control. 4 units

Term Typically Offered: W

Prerequisite: AERO 306 and AERO 320.

Newton's 6-degree-of-freedom equations of motion applied to aerospace vehicles. Stability and control derivatives, reference frames, steady-state and perturbed dynamic analyses applied to aerospace vehicles. Stability and control design principles applied to transfer functions, state-space, and modal system dynamics. 4 lectures.

AERO 421. Spacecraft Attitude Dynamics and Control. 4 units

Term Typically Offered: SP

Prerequisite: AERO 320 and AERO 351.

Introduction to spacecraft attitude dynamics and control. Momentum exchange devices and bang-bang thruster control. Attitude determination (GPS), maneuvers and station keeping. Fundamentals of guidance and navigation systems. Analysis and design of control systems for aerospace vehicles. 4 lectures.

AERO 425. Aircraft Performance. 4 units

Term Typically Offered: F

Prerequisite: ME 212, AERO 306, AERO 300.

Fundamentals of propeller and jet aircraft performance. Steady and accelerated flight. Equations of motion. Level flight, gliding, climbing, driftdown. Takeoff and landing. Federal Aviation Regulations (FARs). Range and endurance. Payload-range diagram. Maneuvering. V-n diagram. Turning and pull-ups. Stall and spin behavior. Energy methods. 4 lectures.

AERO 431. Aerospace Structural Analysis II. 4 units

Term Typically Offered: SP

Prerequisite: AERO 331.

Basic equations of elasticity with applications to typical aerospace structures. Concepts studied include analysis of aircraft and aerospace structures; airworthiness and airframe loads; structural constraints; elementary aeroelasticity; structural instability; introduction to modern fatigue; fracture mechanics; and composite structures analysis. 4 lectures.

AERO 432. Advanced Composite Structures Analysis. 4 units

Term Typically Offered: F

Prerequisite: AERO 331.

Review of isotropic material behavior. Behavior of unidirectional fiber composites. Properties of short-fiber composites and orthotropic lamina. Analysis of laminated composites. Stresses and strains of composites. Strength and hygrothermal behavior of composite materials. 3 lectures, 1 laboratory.

AERO 433. Experimental Stress Analysis. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: AERO 331, AERO 431.

Employing the knowledge of stress analysis and aerospace structural analysis in an individual and group design project dealing with aerospace structures. 1 laboratory.

AERO 434. Aerospace Structural Analysis III. 4 units

Term Typically Offered: F

Prerequisite: AERO 431.

Analysis and design applications for aircraft and spacecraft structures. Stress concentrations, fatigue, and fracture mechanics. Structural dynamics. Framed structures, plates and shells. Composite applications. 4 lectures.

AERO 435. Aerospace Numerical Analysis. 4 units

Term Typically Offered: F

Prerequisite: AERO 300, AERO 331.

Taylor series. Finite difference calculus. Interpolation and extrapolation. Finite difference method. Basic equations of elasticity. Global stiffness matrix. Rayleigh-Ritz method. Galerkin method. Bernoulli-Euler beam element. Finite element formulation. Dynamic analysis. 3 lectures, 1 laboratory.

AERO 443. Aircraft Design I. 3 units

Term Typically Offered: F

Prerequisite: IME 144; AERO 215; AERO 306; AERO 350; AERO 405; AERO 420; and AERO 431. Concurrent: AERO 401.

System and conceptual design of an aircraft using design and calculation techniques developed in previous aerospace engineering courses. Determination of system requirements and design of a flight vehicle, including its structures and systems. Preparation of necessary drawings, briefings, and reports. Field trip required. 3 laboratories.

AERO 444. Aircraft Design II. 3 units

Term Typically Offered: W

Prerequisite: AERO 443.

Preliminary layout of a typical aircraft vehicle using design and calculation techniques developed in previous aerospace engineering courses. Design of a flight vehicle, including its structures and systems. Preparation of necessary drawings and a report. Field trip required. 3 laboratories.

AERO 445. Aircraft Design III. 3 units

Term Typically Offered: SP

Prerequisite: AERO 444.

Preliminary layout of a typical aircraft vehicle using design and calculation techniques developed in previous aerospace engineering courses. Design of a flight vehicle, including its structures and systems. Preparation of necessary drawings and a report. Field trip required. 3 laboratories.

AERO 446. Spacecraft Electrical and Electric Systems. 4 units

Term Typically Offered: SP

Prerequisite: AERO 353 or AERO 355; ME 212; EE 201 and EE 251.

Basic satellite types and their applications. Major subsystems of a satellite system including ground support and launch systems. Interactions between subsystems and their effects on the overall system design. Detailed analysis of key subsystems on a spacecraft with special emphasis on power and communications subsystems. 4 lectures.

AERO 447. Spacecraft Design I. 3 units

Term Typically Offered: F

Prerequisite: IME 144; AERO 215; AERO 303; AERO 350; AERO 351; AERO 420 or AERO 421; AERO 431; and AERO 446. Concurrent: AERO 402.

Recommended: AERO 353 or AERO 355.

System and conceptual design of a space vehicle using design and calculations techniques in previous aerospace engineering courses. Determination of system requirements and design of a spacecraft or system of spacecraft. Preparation of necessary drawings, briefings and reports. Field trip required. 3 laboratories.

AERO 448. Spacecraft Design II. 3 units

Term Typically Offered: W

Prerequisite: AERO 447.

Preliminary layout of typical space vehicle using design and calculation techniques developed in previous aerospace engineering courses. Design of selected components and preparation of necessary drawings. 3 laboratories. Field trip required.

AERO 449. Spacecraft Design III. 3 units

Term Typically Offered: SP

Prerequisite: AERO 448.

Preliminary layout of typical space vehicle using design and calculation techniques developed in previous aerospace engineering courses. Design of selected components and preparation of necessary drawings. Field trip required. 3 laboratories.

AERO 450. Introduction to Aerospace Systems Engineering. 4 units

Term Typically Offered: W

Prerequisite: Senior standing or graduate standing.

Aerospace systems and subsystems. Systems integration. Development of system requirements. Analysis, modeling and simulation of complex systems. Project management. Cost analysis. Optimization and trade studies. 4 lectures.

AERO 452. Spaceflight Dynamics II. 4 units

Term Typically Offered: F

Prerequisite: AERO 351.

Relative orbital motion and rendezvous, linearization of the equations of motion. Clohessy-Wiltshire equations. Two-impulse rendezvous. Asphericity of the earth, aerodynamic drag, solar radiation pressure, and n-body perturbations on an orbit. Encke, Cowell, and Variation of Parameters solution techniques. Speciality orbit due to perturbations such as low thrust trajectories, sun-synchronous, and molynia orbits. 4 lectures.

AERO 455. Introduction to Human Spaceflight. 4 units

Term Typically Offered: SP

Prerequisite: AERO 443 or AERO 447 or graduate standing.

Recommended: AERO 351; AERO 353 or AERO 355 and AERO 356.

Requirements and considerations for human spaceflight design and operations. Effects of the spaceflight environment on the human body and countermeasures to mitigate those effects. Designing a spacecraft for the human payload focusing on space operations. 4 lectures.

AERO 460. Aerospace Engineering Professional Preparation. 1 unit

Term Typically Offered: F

Prerequisite: Senior standing.

Topics on professional development for student success including resume building and career prospecting, current events in the aerospace industry, graduate studies, engineering ethics, intellectual property, non-disclosure agreements, teamwork, and innovation and entrepreneurship. 1 lecture.

AERO 465. Aerospace Systems Senior Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: AERO 303, AERO 320, AERO 431 and senior standing.

Culminating laboratory based experience. Experiments require the integration of the many disciplines in Aerospace Engineering. The successful completion of each experiment requires synthesis and integration of the fundamental concepts of the engineering sciences. Experimentation in the areas of aeroelasticity, active vibration control, inertial navigation, thermal control, hardware-in-the-loop simulation, and momentum exchange. 1 laboratory.

AERO 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AERO 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

AERO 493. Cooperative Education Experience. 2 units

Term Typically Offered: F,W,SPSU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 6 units.

AERO 494. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SPSU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 18 units.

AERO 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SPSU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

AERO 500. Individual Study. 1-4 units

Term Typically Offered: F,W,SPSU

Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Total credit limited to 12 units.

AERO 513. Applications of Remotely Piloted Aircraft Systems. 4 units

Term Typically Offered: F

Prerequisite: AERO 306 or AERO 351 or graduate standing.

Engineering development and analysis of Remotely Piloted Aircraft Systems (RPAS) as airborne tools for societal benefit. Use of RPAS for military, public service, and commercial purposes. Characterization of missions and applications. Development of system requirements and concepts of operation. Evaluation of relative merits and limitations of RPAS. 4 lectures.

AERO 515. Continuum Mechanics. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Vectors and tensors stress analysis. Analysis of deformation. Velocity fields and compatibility conditions. Constitutive equations. Isotropy. Mechanical properties of real fluids and solids. Field equations and boundary conditions in fluid mechanics problems and applications in elasticity. Active remodeling of structures. 4 seminars.

AERO 522. Boundary-Layer Theory. 4 units

Term Typically Offered: SP

Prerequisite: AERO 302 or graduate standing.

Concept of boundary-layer. Boundary-layer equations, similarity transformation, integral and differential methods for steady, two-dimensional laminar and turbulent boundary layers. 4 lectures.

AERO 525. Computational Fluid Dynamics. 4 units

Term Typically Offered: W

Prerequisite: AERO 303 or graduate standing.

Classification of partial differential equations. Numerical methods applicable to the solution of elliptic, parabolic, and hyperbolic partial differential equations. Consideration of accuracy and stability of numerical methods. Application to the fundamental equations of fluid dynamics, grid generation, turbulence modeling. 4 lectures.

AERO 526. Spacecraft Thermal/Fluid Control. 4 units

Term Typically Offered: W

Prerequisite: AERO 299 or AERO 301; AERO 302; AERO 303; or graduate standing.

Satellite thermal/fluid control hardware. Governing equations for flow and heat transfer. Surface tension and liquid/vapor interface. Heat transfer by free convection, forced convection and radiation in low-gravity environment. Heat pipes. Capillary-pumped loops. Cryogenic systems. Fluid management in space. 4 lectures.

AERO 532. Advanced Aerospace Composite Design. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing or consent of instructor.

Behavior of composite materials. Bending, buckling, and vibration of laminated plates. Fatigue and fracture mechanics analysis of composite structures. Optimum design of composite pressure vessels. 2 seminars, 2 laboratories.

AERO 533. Finite Elements for Aerospace Structural Analysis. 4 units

Term Typically Offered: SP

Prerequisite: AERO 431.

Overview of theoretical and applied methods of finite element analysis for aerospace structures including composite and light weight structures. Topics include basic equations of elasticity, solutions of linear systems of equations transformation, global stiffness matrix, Bernoulli-Euler element, plane stress triangles, finite element formulation, isoparametric elements, alternative formulation, eigenvalue problems and dynamic analysis. 3 lectures, 1 laboratory.

AERO 534. Aerospace Structural Dynamics Analysis. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Structural dynamics and aeroelasticity of flight vehicles. Vibration and forced response of continuous structures. Introduction to unsteady aerodynamic analysis methods. Normal-Mode Method and Modal Analysis. Framed structures and rigid body structures. Airworthiness and aeroelasticity. Random Vibrations. 3 lectures, 1 laboratory.

AERO 535. Advanced Aerospace Structural Analysis. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Types of failure. Theories of failure. Stability of structures. Advanced flight vehicle and fracture mechanics analysis and design. Fundamentals and applications of modern fatigue analysis in the aerospace industry. 3 lectures, 1 laboratory.

AERO 540. Elements of Rocket Propulsion. 4 units

Term Typically Offered: W

Prerequisite: AERO 303, AERO 401 or 402; or graduate standing.

Thrust and impulse equations, propellant composition and mixture ratios, nozzle expansion ratios, solid and liquid propellant combustion, internal ballistics, thermo-chemical computations, chemical kinetics, and combustion instability, nozzle design and exhaust plumes. 4 seminars.

AERO 541. Air Breathing Propulsion. 4 units

Term Typically Offered: SP

Prerequisite: AERO 401 or graduate standing.

Aerothermodynamics of propulsion systems, power plant selection and design, on-off design performance, component characterization, component design, component matching, optimization, and introduction to power plant and airframe integration systems for aircraft. 4 seminars.

AERO 548. Complexity in Engineered Systems. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing.

Relates systems engineering to complexity in the design and development of modern large engineered systems, with emphasis on aerospace applications. Covers methods currently available to address complexity, including systems thinking, model based systems engineering and life cycle governance. 4 lectures.

AERO 549. Systems Engineering Applications. 4 units

Term Typically Offered: W

Prerequisite: AERO 450 or graduate standing.

Systems engineering principles and methods. Program planning, scheduling and budgeting, risk management, and design strategies to meet system/mission requirements. Quality function development and quality control concepts. Proposal development, evaluation, and selection. Not open to students with credit in AERO/IME 510 or AERO/IME 511. 4 lectures.

AERO 553. Advanced Control Theory. 4 units

Term Typically Offered: W

Prerequisite: AERO 320 or graduate standing.

Advanced control theory techniques. Analytical and computational methods applied to dynamic systems. State space system representation, solutions to dynamic systems, non-linear and linear stability analysis, full-state and output feedback, controllability and observability and advanced control topics (LQR/LQG, Kalman Filters, Adaptive Control, etc.). 4 lectures.

AERO 557. Advanced Orbital Mechanics. 4 units

Term Typically Offered: W

Prerequisite: AERO 351 or graduate standing.

Initial orbit determination using angles only methods. Various Solutions to Lambert's Problem. Orbit and transfer optimization, libration points, halo orbits, and secondary orbit perturbations. 4 lectures.

AERO 560. Advanced Spacecraft Dynamics and Control. 4 units

Term Typically Offered: W

Prerequisite: AERO 421 or graduate standing.

Attitude determination and control of rigid spacecraft via reaction wheels, control moment gyros and thrusters. Modeling, analysis and control of flexible spacecraft. Non-linear stability theory as applied to spacecraft. 4 lectures.

AERO 561. Vehicle Integration and Testing. 2 units

Term Typically Offered: F

Prerequisite: AERO 350 or AERO 446, or graduate standing.

Space vehicle integration requirements and procedures. Clean room requirements and operations. Quality control and inspection. Qualification and acceptance testing requirements. Test equipment. Vibration and shock testing. Space environment and thermal-vac testing. Development of test procedures. 1 lecture, 1 laboratory.

AERO 562. Space Operations. 2 units

Term Typically Offered: F

Prerequisite: AERO 350 or AERO 446, or graduate standing.

Launch operations and vehicle integration with launch vehicle. In-orbit operations and maneuvers. Spacecraft tracking. Telemetry and command. Ground systems. Failure detection and identification. Emergency operations. 1 lecture, 1 laboratory.

AERO 565. Advanced Topics in Aircraft Design. 4 units

Term Typically Offered: SP

Prerequisite: AERO 445 or graduate standing.

Application of advanced analytic engineering methods to aircraft design problems. Analysis and synthesis of advanced topics related to design of aircraft. 4 lectures.

AERO 566. Advanced Topics in Spacecraft Design. 4 units

Term Typically Offered: F

Prerequisite: AERO 449 or graduate standing.

Application of advanced engineering tools to the design of space vehicles. System architecture and mission design. Concept of operations. Requirements development and flow down. System and subsystems trade studies and preliminary design. 4 lectures.

AERO 568. Aerodynamic Research and Development I. 4 units

Term Typically Offered: W

Prerequisite: AERO 302 and AERO 406.

Immersive team-based approach to an aerodynamic research and development cycle. Theoretical work, preliminary design based upon computational fluid dynamics, and model manufacture. Advanced techniques in multi-variable wind tunnel tests. Validation of numerical work using correlation techniques. Field trip may be required. Total credit limited to 8 units. 2 lectures, 2 laboratories.

AERO 569. Aerodynamic Research and Development II. 4 units

Term Typically Offered: SP

Prerequisite: AERO 568.

Continuation of AERO 568. Single or multi-variable design optimization cycle based upon computational fluid dynamics. Numerical and experimental experimentation, high-fidelity validation and correlation of testing data, and archival-quality technical reporting of aerodynamic data and analysis. Total credit limited to 8 units. 2 lectures, 2 laboratories.

AERO 570. Selected Advanced Topics. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

AERO 571. Selected Advanced Topics Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

AERO 593. Cooperative Education Experience. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

AERO 594. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

AERO 595. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. A fully-developed formal report and evaluation by work supervisor required. Credit/No Credit grading only.

AERO 599. Thesis (Design Project). 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing.

Each individual or group will be assigned a project for solution under faculty supervision as a requirement for the master's degree, culminating in a written report/thesis.

Agribusiness (AGB)

undefined

AGB Courses

AGB 101. Introduction to Agribusiness. 4 units

Term Typically Offered: F

Prerequisite: AGB major and freshman standing.

Orientation to the agribusiness sector of agriculture. An overview of the breadth, size, scope and management aspects of the agricultural business complex. Agribusiness students are required to complete this within the first year of the major. 4 lectures.

AGB 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Credit can only be used to satisfy free electives. Credit/No Credit grading only.

AGB 202. Introduction to Sales. 4 units

Term Typically Offered: F, W, SP

Development of professional business-to-business selling principles within the supply chain, including an introduction to understanding the sales process from different buying and selling perspectives, communication techniques, and basic sales competency. 4 lectures.

AGB 212. Agricultural Economics. 4 units

Term Typically Offered: F, W, SP

Theoretical development of factors affecting demand and supply for food and fiber and for agricultural inputs. Methods of selecting optimal levels of agricultural production and consumption variables. Evaluation of market structure and price formulation for agricultural products and resources. Course may be offered in classroom-based or online format. 4 lectures.

AGB 214. Agribusiness Financial Accounting. 4 units

Term Typically Offered: F, W, SP

Principles of financial accounting for the agriculture and food industry. Introduction of basic concepts and standards underlying financial accounting systems. Emphasizes the construction of the financial accounting statements and the impact of business transactions on information presented to interested stakeholders. Not open to students with credit in BUS 214. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

AGB 260. Agribusiness Data Literacy. 4 units

Term Typically Offered: F, W, SP

Using data and analysis in making decisions related to agribusiness. Developing basic and intermediate spreadsheet skills necessary to organize, analyze, and summarize information. Development of data management and analysis as tools to assist in agribusiness problem-solving. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AGB 301. Food and Fiber Marketing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 212 or ECON 221.

Food and fiber marketing, examining commodity, industrial, and consumer product marketing from a managerial viewpoint. A global perspective in understanding consumer needs and developing the knowledge of economic, political, social and environmental factors that affect food and fiber marketing systems. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 304. Innovation and Entrepreneurship in Agriculture. 4 units

Term Typically Offered: F

Prerequisite: AGB 212, ECON 201, or ECON 221.

Innovation and entrepreneurship with application to the Food and Agriculture sector. Identification of opportunities, value proposition, Business Model Canvas (BMC), product market fit and market sizing, minimum viable product, and identification of target market consumers. Field trip may be required. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 308. Introduction to Agribusiness Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 214 and AGB 260.

Concepts and analytical methods related to agricultural finance. Focus on applied spreadsheet analysis of financial statements, time value of money, risk and return, portfolio theory, and capital budgeting within the context of financial institutions specific to agriculture. Not open to students with credit in AGB 310. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 309. Advanced Sales Techniques. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 202.

Expansion of basic sales principles and skills, focusing on prospecting, sales styles, pipelining, forecasting, and product planning. 4 lectures.

AGB 310. Agribusiness Credit and Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 214 or BUS 212 or BUS 214.

Financing California's agricultural industry. Sources of credit and types of loans used by agribusinesses. Costs of credit. Financial analysis of agricultural borrowers. Future and present value techniques used in evaluating agricultural investments. Agricultural financial management. Financial capital markets and leasing. Not open to Agricultural Business majors. Not open to students with credit in AGB 308. 4 lectures.

AGB 311. Intermediate Agribusiness Finance. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 260 and AGB 310; or AGB 308.

Financial tools applied to the agribusiness industry, focusing on unique risks in agriculture. Risk and return in the production and processing sectors, working capital management, cash flows and financial statement forecasting for agribusiness firms, using spreadsheet analysis. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 312. Agricultural Policy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 212 and ECON 222.

Agricultural policy objectives and formulation, resource allocation and production adjustments. Survey of State and Federal agricultural policies as they influence the planning and practices of agribusiness. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 313. Agriculture Economic Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 212 and MATH 221.

Advanced agricultural microeconomics with emphasis on mathematical problem solving; production and cost functions, single and multiple input allocation, agricultural output combinations, agricultural market structures, and economies of size. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 318. Global Agricultural Marketing and Trade. 4 units

Term Typically Offered: SP

Prerequisite: AGB 301.

Analysis of international marketing opportunities for agricultural products. Strategies for enhancing the performance of U.S. agricultural exports/ imports. Impact of government trade policies and regulations, distribution systems, and the changing consumer. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 322. Principles of Agribusiness Management. 4 units

Term Typically Offered: F

Prerequisite: AGB 212 and AGB 214.

Organization and operation of agribusinesses. Identification of factors affecting profitability. Evaluation of the business for increased efficiency and profit. Application of budgeting to representative firms and independent analysis of an agribusiness. 3 lectures, 1 activity.

AGB 323. Decision Making with Agribusiness Accounting Information. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 214.

Decision making using agribusiness accounting information. Focus on setting and monitoring objectives, analysis, forecasting and budgeting, business ethics, and decision making. Topics covered within the food supply chain. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

AGB 326. Rural Property Appraisal. 4 units

Term Typically Offered: W

Prerequisite: AGB 308 or AGB 310.

Methods of rural appraisal, including farms, ranches and other rural properties, use of county records, appraisal practice on different types of rural properties, discussions with professional appraisers. 3 lectures, 1 activity.

AGB 327. Agribusiness Data Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: STAT 251 and AGB 260.

Methods in agricultural business data analysis, including multiple regression analysis, analysis of variance, and time series analysis. Applications include agricultural price forecasting and estimation of the determinants of food and fiber demand. 3 lectures, 1 activity.

AGB 328. Decision Tools for Agribusiness. 4 units

Term Typically Offered: F, W, SP

Prerequisite: STAT 251 and AGB 260.

Development of agribusiness modeling techniques that are applied to solving a diverse and unique set of resource allocation issues encountered throughout the agricultural and food retail sectors. Techniques include linear programming, decision analysis, and computer simulations. Course may be offered in classroom-based or online format. 3 lectures, 1 activity.

AGB 335. Agricultural Lending. 4 units

Term Typically Offered: W

Prerequisite: AGB 308 or AGB 310; and AGB 323.

Structure and performance of the agricultural lending industry. Advanced agricultural loan analysis and risk assessment. Agricultural loan documentation, securitization of farm loans, and farm bankruptcy. Exploration of interest rate impacts on agricultural lending. 4 lectures. Formerly AGB 410.

AGB 339. Internship in Agribusiness. 1-12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of internship instructor.

Selected students will spend up to 12 weeks with an approved agricultural firm engaged in production or related agribusiness. Time will be spent applying and developing agribusiness functional and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Degree credit limited to 6 units. Credit/No Credit grading only.

AGB 369. Agricultural Personnel Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 212 or ECON 201 or ECON 221; and junior standing.

Standard topics of California agricultural personnel management: recruitment; appraisal and performance evaluation; compensation; training and development; discipline; safety and health; labor relations; and immigration policy. Systemic approach to aspects of managing human capital, and how to implement human resource policies. Not open to students with credit in AGB 401. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

AGB 370. World Food Economy. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 312 and AGB 313.

International agricultural production, economics, and distribution. Comparative and competitive advantage in world agriculture. Food security issues and regional analysis of agriculture policies. The future of agriculture from a global perspective. 4 lectures.

AGB 400. Special Problems. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of department head or instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

AGB 404. Food Retail Management. 4 units

Term Typically Offered: W, SP

Prerequisite: AGB 301.

Uses and techniques in management of perishable and non-perishable food commodities at the retail level. Issues in traditional versus new models of retail with emphasis on the marketing mix. Introduction to vendor, category and shelf management. 4 lectures.

AGB 405. Agribusiness Marketing Research Methods. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 301 and AGB 327.

Agricultural marketing research data collection and analysis. Emphasis on food sector market segmentation, product positioning, new product testing, sales forecasting, and marketing plan development through secondary and primary data sources. Experimental research design and implementation. 4 lectures.

AGB 406. Agribusiness Marketing Planning. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 301; and AGB 327 or AGB 328.

Development of agribusiness marketing plans in self-managed teams. Emphasis on developing presentation skills. Integration of marketing mix, particularly promotional elements in developing agribusiness marketing strategy emphasized. 4 lectures.

AGB 411. Agribusiness Risk Management. 4 units

Term Typically Offered: F

Prerequisite: AGB 301; AGB 308; and AGB 327 or AGB 328.

Risk management strategies and tools applied to the agribusiness industry, focusing on risks in agriculture. Forward contracting, futures and options, swaps, crop insurance, trading and hedging strategies, and their applications to agribusiness problems. 4 lectures.

AGB 412. Advanced Agricultural Policy. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 312.

Agricultural resource allocation issues with emphasis on policies that impact the production of food and fiber and inputs used in their production. Special topics in agricultural resource allocation stressing issues and policies emphasizing economic externalities. 4 lectures.

AGB 422. Transportation and Logistics in Global Agribusiness. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 328.

Scope and elements of the agribusiness logistics system including supply and distribution channels, transportation, inventory, warehousing, packaging, and order processing. 4 lectures.

AGB 425. Agribusiness Supply Chain Management. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 323; and AGB 327 or AGB 328.

Focus on the development and application of decision models in food supply chains with emphasis on demand forecasting, aggregate planning, inventory management (cycle and food safety), supply network design, transportation, coordination and sourcing. 4 lectures.

AGB 427. Advanced Agribusiness Data Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 327 or AGB 328 or graduate standing and consent of instructor.

Advanced topics in agricultural business data analysis. Topics include advanced agricultural price analysis, advanced linear programming in agribusiness, and advanced agricultural business operations analysis. The Class Schedule will list topic selected. 4 lectures.

AGB 440. Field Studies in Agribusiness. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Visitation to selected agribusinesses. Organization, operation, services and problems considered. Can only be taken once for credit in the major.

AGB 445. Produce Marketing. 4 units

Term Typically Offered: TBD

Prerequisite: Senior standing and AGB 301.

Directed group study of fresh fruit and vegetable sales and marketing. Analysis of marketing from the perspective of the Grower Shipper, Specialty Produce Marketer, Terminal Market Wholesaler, Food Broker, Food Service Supplier, Retailer and International Marketing. Field trip required. 2 lectures, 2 seminars.

AGB 450. Agribusiness Strategy Formulation. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 323; and AGB 327 or AGB 328.

Development of strategy for agribusinesses where an uncontrollable environment makes output and results highly unpredictable; emphasis on the total enterprise. Case analysis. 4 lectures.

AGB 452. Agricultural Market Structure and Strategy. 4 units

Term Typically Offered: TBD

Prerequisite: AGB 313.

Development of skills for quantity and price determination in a noncompetitive setting. Emphasis on examining the agribusiness industry structures that exist and their effects on decision-making. The use of game theory demonstrated as a strategy formulation tool. 4 lectures.

AGB 462. Senior Project - Applied Agribusiness Problems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; Agricultural Business major; AGB 301; AGB 308 or AGB 310; AGB 312; AGB 313; AGB 323; and AGB 327 or AGB 328.

Selection and analysis of agribusiness problems and opportunities in directed group-based projects. Exploration of problems which agribusiness graduate students may encounter in marketing, finance, management and production in the food and fiber industry. Formal report and presentation required. 4 lectures.

AGB 463. Senior Project - Agribusiness Consulting. 4 units

Term Typically Offered: TBD

Prerequisite: Senior standing; Agricultural Business major; AGB 301; AGB 308 or AGB 310; AGB 312; AGB 313; AGB 323; and AGB 327 or AGB 328.

Client-centered course where self-managed teams develop solutions to agribusiness problems. Exploration of problems typical to those which agribusiness graduates may encounter in marketing, finance, management and production in the food and fiber industry. Formal report and presentation to client required. 4 lectures.

AGB 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: SP

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Agricultural Communication (AGC)

undefined

AGC Courses

AGC 102. Orientation to Agricultural Communication & Agricultural Science. 2 units

Term Typically Offered: F

Orientation to the communication sector of agriculture. Overview of professional opportunities and skills needed for success in agricultural communication and related agricultural disciplines. Preparation of news releases and short writing and video, and development of a planned program of study. 2 lectures.

AGC 200. Special Problems in Agricultural Communication. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies or surveys of selected problems in Agricultural Communication/Agricultural Education. Total credit limited to 8 units, with a maximum of 4 units per quarter.

AGC 205. Agricultural Communications. 4 units

Term Typically Offered: F, W

Survey of agricultural communication, history of the discipline, practice of multimedia writing for agriculture, food, and environmental sciences outlets. Gathering and analysis of related scientific and technical information and translation for public audiences. Role of under-represented groups in agriculture. Field trip required. 3 lectures, 1 activity. Replaces JOUR 205.

AGC 207. Software Applications for Agricultural Publications. 2 units

Term Typically Offered: W

Emphasis on software applications in agricultural communications, including basic Adobe Creative Suite techniques of InDesign and Lightroom, MS Word and Excel. Best practices in electronic delivery and print. Adobe Premiere video, blog template usage and cloud collaboration for professional agricultural communications. 1 lecture, 1 activity.

AGC 225. Digital Communication in Agriculture and Science. 4 units

Term Typically Offered: W

Prerequisite: AGC 207.

Development of digital multimedia skills (audio and video) and techniques to produce content focusing on agriculture, science and technology topics. Emphasis on creating compelling digital stories to communicate critical agriculture and science issues. 2 lectures, 2 activities.

AGC 254. Introduction to Agricultural Leadership. 2 units

Term Typically Offered: SP

Orientation to leadership development in agriculture and related settings. Principles and techniques for developing leadership skills, including exploration of personal characteristics, technical skills, interpersonal influence, commitment, goals, and power necessary for effective leaders. Issues facing leaders in agriculture. 2 lectures. Formerly AG 254.

AGC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AGC 290. Agricultural Communication Enterprise. 3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: AGC 205, JOUR 203, or JOUR 205.

Application of communication skills for strategic and integrated communication projects related to food production, agriculture and environmental sciences topics. Emphasis on multimedia and brand journalism approaches, interviewing, using information sources, and translating agriculture, technology, and science information for public audiences. Total credit limited to 6 units. Credit/No Credit grading only. 2 lectures, 1 laboratory.

AGC 301. New Media Communication Strategies in Agriculture. 4 units

Term Typically Offered: W

Prerequisite: Junior standing. Recommended: JOUR 203, JOUR 205.

Exploration and implementation of emerging new media communication strategies and technologies to convey information on important issues in agriculture to a global audience. Focus on food and farming dialogues currently populating conversations about production agriculture. Adaptation of different writing styles based on requirements of the various new media channels. Analysis of metrics to measure level of engagement with desired audience. 3 lectures, 1 laboratory.

AGC 314. California Fairgrounds and Expositions. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); and completion of one lower division GE Area C. Replaced AGB 314.

Scope and elements of fairs and expositions through public outreach, education, management, funding, interim events, government regulations, and industry relations. Practical application of fair management instruction includes hosting a major event or project of the Western Fairs Association (WFA). Field trip may be required. 4 lectures.

AGC 318. Fairgrounds and Facility Management. 4 units

Term Typically Offered: W

Prerequisite: AGC 314.

Fundamentals of the year-round operation of a fairgrounds facility to include budget management, vendor contracts, entertainment schedules, rental opportunities, master planning, and maintenance. Principles and procedures in planning, organizing, operating, and evaluating fairgrounds and facilities. Field trip required. 2 lectures, 2 activities.

AGC 339. Internship in Agricultural Communications. 1-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Consent of internship instructor.

Selected Agricultural Communication students will spend up to 12 weeks with an approved agricultural firm engaged in production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Degree credit limited to 6 units. Credit/No Credit grading only.

AGC 400. Advanced Special Problems in Agricultural Communication. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies or surveys of selected problems in Agricultural Communication/Agricultural Education. Total credit limited to 8 units, with a maximum of 4 units per quarter.

AGC 404. Foundations of Agricultural Leadership. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs); and junior standing. Replaced AGED 404.

Introduction to theory and practical application of leadership in agriculture. Emphasis on identifying strategies for self-improvement and personal development. Study of contemporary leaders, professionalism, and leadership actions. 2 lectures, 1 activity.

AGC 407. Agricultural Publications. 4 units

Term Typically Offered: W

Prerequisite: JOUR 205 and AGC 207.

Integration of writing, editing, and layout skills in producing agricultural publications. Emphasis on using computer applications in designing publications. Total credit limited to 8 units. 2 lectures, 2 activities.

AGC 412. Advanced Agricultural Leadership Development Practicum. 3 units

Term Typically Offered: SP

Prerequisite: Junior standing and consent of instructor.

Leadership team facilitates a campus event under the direction of the Agricultural Education and Communication Department. Team identifies goals, recruits students, organizes committees, addresses tasks, and conducts the event. Practical application of problem solving, critical thinking, communication and collaboration skills. Total credit limited to 6 units. 3 seminars. Formerly AGED 412.

AGC 425. Multimedia Storytelling in Agriculture and Science. 4 units

Term Typically Offered: F

Prerequisite: AGC 225. Recommended: COMS 395, JOUR 203, JOUR 205, and JOUR 312.

Examines digital and multimedia communication methods of complex agricultural, food, and environmental sciences topics. Exploration and implementation of practices translating science issues to public audiences. Focuses on current campus-related scientific research endeavors using principles of digital storytelling and content creation. 2 lectures, 2 activities.

AGC 426. Presentation Methods in Agricultural Communication. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs); and junior standing.

Development, delivery and evaluation of effective means of communication by use of a variety of presentation methods and the use of technology for effective communication. 2 lectures, 2 activities.

AGC 452. Current Trends and Issues in Agricultural Communication. 4 units

Term Typically Offered: F, SP

Prerequisite: Senior standing.

Presentations by experts from government, industry, and professional organizations. Focus on trends and issues that impact agriculture, in particular agricultural communication. Exploration of solutions to problems facing agricultural communication. Field trip required. 4 seminars.

AGC 454. Agricultural Leadership - Self Assessment & Reflection. 2 units

Term Typically Offered: SP

Prerequisite: AGC 404 and senior standing.

Culminating leadership experience. Appraise strengths and areas of personal growth, analyze effective strategies in leading others, examine collegiate experiences, and construct a leadership philosophy integrating the research-based leadership theory, skills and traits explored. 1 lecture, 1 activity. Formerly AG 454.

AGC 460. Research Methodology in Agricultural Communication and Agricultural Science. 1 unit

Term Typically Offered: F, SP

Prerequisite: Junior standing.

Introduction to the research process and topic selection as it relates to the design and development of the senior project within the Agricultural Communication and the Agricultural Sciences majors. 1 lecture. Formerly AGED 460.

AGC 461. Senior Project I. 1 unit

Term Typically Offered: F, SP

Prerequisite: AGED 460.

Empirical application of the scientific method as it relates to the selection of a project. Projects typical of problems that graduates must solve in their field of employment. 1 seminar.

AGC 462. Senior Project II. 1 unit

Term Typically Offered: F, SP
Prerequisite: AGC 461.

Completion of a project begun in AGC 461. Projects typical of problems that graduates must solve in their field of employment. Project results are presented in a formal report. 1 seminar.

AGC 463. Senior Project. 3 units

Term Typically Offered: F, SP
Prerequisite: Senior standing. Corequisite: AG 452 or AGC 452.

Research, selection, and completion of projects addressing practical or scholarly research problems graduates may encounter in their fields of employment. Project results presented in a formal written report and oral presentation. 3 seminars.

AGC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AGC 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

AGC 475. Crisis Communication in Food and Agriculture. 4 units

Term Typically Offered: SP
Prerequisite: Junior standing. Recommended: Completion of GE Area A with grades of C- or better.

Examine agriculture, food, and environmental crises and emphasize effective communication of complex science. Crisis communication theory and issues management strategies. Explore how effective communication can prevent and/or decrease negative effects, and how digital tools can aid in crisis solutions. 3 lectures, 1 activity.

AGC 490. Agricultural Communications Enterprise Management. 3 units

Term Typically Offered: TBD
Prerequisite: Junior standing, AGC 205, AGC 207, and AGC 301.
Recommended: JOUR 312.

Advanced application of communication strategies for managing client projects. Creation of communication campaigns and projects focusing on topics in agriculture, food, and environmental sciences. Emphasis on multimedia production of content and materials to communicate complex issues in the discipline. 1 lecture, 2 activities.

AGC 500. Individual Study In Agricultural Communication. 1-3 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced independent study planned and completed under the direction of a member of the Agricultural Education and Communication faculty. Total credit limited to 6 units.

AGC 570. Selected Topics in Agricultural Communication. 1-4 units

Term Typically Offered: TBD
Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

AGC 571. Selected Advanced Laboratory in Agricultural Communication. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

AGC 580. Special Problems in Agricultural Communication. 1-3 units

Term Typically Offered: TBD
Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Individual study of modern issues and problems conducted through research, planning and development. Field problems and in-service study in agricultural industry encouraged. Final written report required. Total credit limited to 9 units with not more than 3 units in any one quarter.

Agricultural Education (AGED)

undefined

AGED Courses

AGED 200. Special Problems in Agricultural Education. 1-4 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of department head.

Individual investigation, research, studies or surveys of selected problems in Agricultural Communication/Agricultural Education. Total credit limited to 8 units, with a maximum of 4 units per quarter.

AGED 220. Agricultural Youth Conferences. 2 units

Term Typically Offered: W
CR/NC
Prerequisite: Consent of instructor.

Problems encountered and practices applied during the conduct of the annual FFA State Convention. Methods, procedures and materials adapted for use by the student in developing the committee system to produce conferences, conventions and workshops of all kinds and sizes. Total credit limited to 6 units. Credit/No Credit grading only. 2 activities.

AGED 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AGED 303. Agricultural Youth Leadership Development. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Historical, philosophical and social foundations of agricultural education as it relates to the development of youth leadership skills through classroom/laboratory instruction, project-based learning, and involvement in student organizations. Application of integral components in developing a total program of agricultural education. Field trip required. Course may be offered in classroom-based or online format. 2 lectures, 2 activities.

AGED 339. Internship in Agricultural Education. 1-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Consent of internship instructor.

Selected Agricultural Education students will spend up to 12 weeks with an approved agricultural firm engaged in production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Degree credit limited to 6 units. Credit/No Credit grading only.

AGED 350. Early Field Experience in Agriculture Education. 2 units

Term Typically Offered: F, SP

Prerequisite: Junior standing.

Observation of the practices and techniques utilized by agriculture teachers in conducting organized instruction in high school classrooms, shops, school farms, and laboratories. Discussion of activities and programs unique to teaching agriculture in California secondary schools. Participation in public schools requires mandated fingerprint clearance. Course may be offered in classroom-based or online format. 2 seminars.

AGED 400. Advanced Special Problems in Agricultural Education. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies or surveys of selected problems in Agricultural Communication/Agricultural Education. Total credit limited to 8 units, with a maximum of 4 units per quarter.

AGED 410. Computer Applications in Agricultural Education. 2 units

Term Typically Offered: W

Prerequisite: Junior standing. Recommended: AGED 303.

Advanced use of computer technology to address professional demands in a variety of agricultural education situations. Practical application of computer applications as tools for presentations, informational aids, instruction, assessment, and other common uses. Provide support to industry pre-professionals and pre-service teachers. Course may be offered in classroom-based or online format. 2 activities.

AGED 424. Organizing and Teaching Agriculture. 3 units

Term Typically Offered: W

Prerequisite: AGED 438 and consent of instructor.

Determining course objectives, content, and calendar for use by the teacher in classroom, shop and field instruction while assigned to community schools. Concurrent with student teaching. 3 activities.

AGED 440. Student Teaching in Agricultural Education. 6-12 units

Term Typically Offered: W, SP

CR/NC

Off-campus assignment to a selected cooperating public school. Participation in all phases of agriculture teacher duties and activities including departmental organization and administration. Prior approval and appointment necessary. Total credit limited to 18 units. Credit/No Credit grading only.

AGED 441. Student Teaching Practicum. 2 units

Term Typically Offered: W

Prerequisite: Consent of instructor.

Problems encountered and practices applied during student teaching. Methods, procedures and materials adapted for use by the teacher concurrent with student teaching. 2 activities.

AGED 461. Senior Project I. 1 unit

Term Typically Offered: F, SP

Prerequisite: AGED 460.

Empirical application of the scientific method as it relates to the selection of a project. Projects typical of problems that graduates must solve in their field of employment. 1 seminar.

AGED 462. Senior Project II. 1 unit

Term Typically Offered: F, SP

Prerequisite: AGED 461.

Completion of a project begun in AGED 461. Projects typical of problems that graduates must solve in their field of employment. Project results are presented in a formal report. 1 seminar.

AGED 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

AGED 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

AGED 500. Individual Study in Agricultural Education. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced independent study planned and completed under the direction of a member of the Agricultural Education and Communication faculty. Total credit limited to 6 units.

AGED 501. Professional Seminar in Agricultural Education. 2 units

Term Typically Offered: F

Prerequisite: Admission to the Credential Programs in Single Subject Agriculture, or Agriculture Specialist, and/or the Masters of Agricultural Education.

Orientation to the Master of Agricultural Education program. Current requirements, processes, documentation, and discussion of expectations of pre-professional teacher candidates. Completion of formal documents for credentialing in California. 2 seminars.

AGED 513. Field Experience - Agricultural Education. 1-3 units

Term Typically Offered: W, SP

Prerequisite: Prior approval and appointment.

Practice and techniques in management and supervision of programs in agricultural education. Relationships among students, staff, community and school groups. Budgeting, staffing, records, reporting. Student activities and Future Farmers of America programs. Total credit limited to 6 units.

AGED 520. Program Development in Agricultural Education. 3 units

Term Typically Offered: SP

Prerequisite: Senior standing.

Approaches to the development of an integrated agricultural education program in the comprehensive high school, based on occupational opportunities and community needs. Philosophy, organization, and administration of programs. Development in curriculum, supervised occupational experience, student leadership such as Future Farmers of America, and summer programs. Field trip required. Course may be offered in classroom-based or online format. 3 seminars.

AGED 522. Laboratory Pedagogy in Agricultural Technology. 3 units

Term Typically Offered: F

Prerequisite: Senior standing.

Organizing agricultural technology laboratory instruction, curriculum, and facilities. Student demonstrations and presentations; assessment, analysis, and evaluation. Field trip required. Not open to students with credit in AGED 523. 1 seminar, 2 laboratories.

AGED 523. Laboratory Organization and Management in Agricultural Education. 3 units

Term Typically Offered: TBD

Prerequisite: Enrollment in MS degree in Agricultural Education.

Organizing and managing laboratories, including agriculture mechanics curriculum and determining course content. Student demonstrations and presentations; assessment, analysis, and evaluation. Course is designed for in-service secondary agriculture teachers. Field trip required. Not open to students with credit in AGED 522. 3 lectures.

AGED 524. Instructional Processes in Agricultural Education. 4 units

Term Typically Offered: F

Prerequisite: Admission to one of the following programs: the Single Subject Agriculture Credential, the Agriculture Specialist Credential, or the Master of Agricultural Education. Co-requisite: EDUC 412, EDUC 414, and EDUC 418. Recommended: AGED 303, and AGED 350.

Principles of agricultural teaching methods and developmentally-appropriate pedagogy. Daily and unit lesson plans incorporating content, teaching methods, and assessing learners. Accommodations for English learners and students with special needs. Class demonstrations in teaching procedures, analysis, assessment and reflection. Field trip required. 2 lectures, 2 activities.

AGED 525. Organizing Instruction for Growing and Selling Horticulture Products. 3 units

Term Typically Offered: TBD

Prerequisite: PLSC 120 or PLSC 230, and senior or graduate standing.

Skills and techniques of propagation and production of horticulture crops. Scheduling, growing media, construction and use of forcing structures, and plant identification. Marketing plans and promotions. Teaching methods, curriculum development, and identification of resources and materials for horticultural instruction. 3 lectures. Open to agricultural educators or credential students only.

AGED 530. Developing FFA and Supervised Agricultural Experience Programs in Secondary Education. 3 units

Term Typically Offered: TBD

Prerequisite: Senior or graduate standing.

Integrating FFA and supervised agricultural experience programs into the curriculum. Career development event implementation; record book usage; officer and committee training; recruitment; retention; retreat and leadership training. Current national and state initiatives and experiential learning opportunities in the workplace and entrepreneurial settings. Not open to students with credit in AGED 303. 3 lectures.

AGED 536. Teaching Agriculture in Higher Education. 3 units

Term Typically Offered: W

Prerequisite: Graduate standing.

Selection and use of teaching strategies, methods/approaches, and techniques when planning, delivering, and evaluating instruction. Intended for graduate students interested in pursuing a faculty position in agriculture, as well as other disciplines in higher education. Course may be offered in classroom-based or online format. 3 seminars.

AGED 537. Enhancing Instruction in Agricultural Biology. 3 units

Term Typically Offered: TBD

Prerequisite: AGED 438 or consent of instructor, enrollment in agriculture teaching credential program or MS degree in Agricultural Education, or current agriculture teacher; undergraduate biology course (BIO 111 or equivalent).

Teaching methods of important biological concepts using agriculture as the context. Assisting agriculture teachers in identifying proper pedagogical strategies to integrate activities and laboratories into existing agriculture biology courses, including leadership development opportunities and activities. Emphasis on appropriate teaching methods and techniques, curriculum integration and application, and classroom resources. 3 seminars.

AGED 539. Graduate Internship in Agricultural Education and Communication. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of internship instructor.

Application of theory to the solution of problems of agricultural production or related business in the field of Agricultural Education and Communication. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units.

AGED 540. Instructional Planning in Agriculture. 2 units

Term Typically Offered: SU

Prerequisite: AGED 524.

Prior to the first day of teaching agriculture, develop a plan for delivery of instruction in a program of agriculture in a K-14 educational setting. Instructional strategies will address the statewide Quality Criteria for Programs of Instruction in Agriculture.

AGED 570. Selected Topics in Agricultural Education. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

AGED 571. Selected Advanced Laboratory in Agricultural Education. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

AGED 572. Selected Topics for Teaching Methods in Agriculture, Forestry, and Natural Resource Pathways. 3 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students in teaching Agriculture, Forestry, and Natural Resources pathways in secondary education. Open to undergraduate and graduate students. Class Schedule will list topic selected. Total credit limited to 9 units. 3 lectures.

AGED 580. Special Problems in Agricultural Education. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Individual study of modern issues and problems conducted through research, planning and development. Field problems and in-service study in agricultural industry encouraged. Final written report required. Total credit limited to 9 units with not more than 3 units in any one quarter.

AGED 581. Graduate Seminar in Agricultural Education. 3 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Group study of selected developments, trends and issues in the field of Agricultural Education. 3 seminars.

Agriculture (AG)

undefined

AG Courses

AG 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of rodeo coach/instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Credit can only be used to satisfy free electives. Credit/No Credit grading only.

AG 210. Agricultural Leadership Experience. 1 unit

Term Typically Offered: F, W, SP

Participation in activities that promote personal growth and leadership development, including team work, cooperation, communication, problem solving, time management, and organization. Support CAFES in recruitment, public awareness, educational programs, campus tours, fundraising, and youth career development events. The Class Schedule will list topic selected. Total credit limited to 2 units. 1 activity.

AG 212. Leadership Practice: Poly Royal Rodeo. 3 units

Term Typically Offered: SP

CR/NC

Prerequisite: Consent of Instructor.

Application of the management and operations of the Poly Royal Rodeo event taking place during Open House at Cal Poly. Principles and procedures in planning, organizing, financing, promoting, and managing a major collegiate rodeo and the rodeo industry are discussed. Credit/No Credit grading only. 1 lecture, 2 activities.

AG 243. Theory and Practice of Rodeo. 2 units

Term Typically Offered: F, SP

CR/NC

Beginning skills in the event areas of rodeo. Areas include saddle bronc, bareback, and bull riding; calf, team, and breakaway roping; steer wrestling, goat tying, and barrel racing. Total credit limited to 4 units. Credit/No Credit grading. 2 activities.

AG 315. Principles of Organic Crop Production. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Origins, application, regulation and technology of organic crop production. Theoretical and practical issues surrounding organic crop production from a cross-disciplinary perspective. Topics include the history of the organic movement; current regulation and certification; and field management practices and technologies. Features industry guest lecturers. Field trip required. 3 lectures, 1 activity. Crosslisted as AG/PLSC 315. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog). Formerly AEPS/AG 315.

AG 330. Cal Poly Land: Nature, Technology, and Society. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course from GE Area B1 (GE Area B4 for students on the 2019-20 or earlier catalogs); one course from GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Scientific investigation of the natural features of the Cal Poly landscape and their transformations by land management technology. Environmental, economic, social, and political effects of agriculture, resource extraction, construction technology. Educational, land-use, long term planning issues. 4 lectures. Crosslisted as AG/ISLA/SCM/UNIV 330. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

AG 339. Internship in Agriculture. 1-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of internship instructor.

Selected students will spend up to 12 weeks with an approved agricultural firm engaged in production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Credit/No Credit grading.

AG 350. The Global Environment. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

AG 360. Holistic Management. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Application of holistic management, a goal-oriented, value-driven framework for making ecologically, economically, and socially sound decisions. Holistic approach to management, especially of land-based resources, aimed toward greater biodiversity and sustainability. 3 lectures, 1 laboratory. Crosslisted as AG/ASCI 360. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

AG 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of rodeo coach/instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Credit/No Credit grading only.

AG 410. Advanced Agricultural Leadership Experience. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: AG 210.

Activities that promote personal growth and development from a leadership perspective. Special attention on recruiting, organizing, and engaging volunteers. Teambuilding, cooperation, communication, problem solving, time management, and organization skills are emphasized. Guiding students in serving others in major student activities. The Class Schedule will list topic selected. Total credit limited to 2 units. 1 activity.

AG 412. Advanced Leadership Practice: Poly Royal Rodeo. 3 units

Term Typically Offered: W

CR/NC

Prerequisite: Consent of instructor.

Management and oversight of Poly Royal Rodeo during Cal Poly Open House. Proficiency in problem-solving as leaders and as a team. Discuss principles and procedures in planning, organizing, financing, promoting, and managing a major collegiate rodeo and the rodeo industry. Field trip may be required. Credit/No Credit grading only. 1 lecture, 2 activities.

AG 413. Committee Management: Poly Royal Rodeo. 2 units

Term Typically Offered: SP

Prerequisite: AG 412.

Continuation of AG 412. Oversight of volunteers, committee members and interacting with event attendees. Emphasis on leadership, problem solving and building a new management team. Annual evaluation of events and planning for future events while successfully mentoring new students. Field trip may be required. 1 lecture, 1 activity.

AG 452. Issues Affecting California Agriculture. 4 units

Term Typically Offered: W

Prerequisite: Junior standing.

Interactive seminars with speakers from government and industry covering policy and regulations affecting California agriculture. Students develop an understanding of agricultural policy and work in teams to develop a public presentation and position paper on a significant issue. Field trip to Sacramento required. 4 seminars.

AG 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 12 units. Credit/No Credit grading only.

AG 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 24 units. Credit/No Credit grading only.

AG 500. Individual Study. 1-6 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced independent study planned and completed under the direction of a member of the college faculty. Total credit limited to 6 units.

AG 539. Graduate Internship in Agriculture. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of internship instructor.

Application of theory to the solution of problems of agricultural production or related businesses in the field. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units.

AG 581. Graduate Seminar. 1 unit

Term Typically Offered: W, SP

CR/NC

Prerequisite: Graduate standing or consent of instructor.

Advanced topics in agriculture and natural resources. Group study of current research and industry trends. Invited speakers covering a variety of topics. Total credit limited to 3 units. 1 hour seminar.

AG 585. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 9 units. Credit/No Credit grading only.

AG 595. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 9 units. Credit/No Credit grading only.

AG 598. Reading and Conference. 1-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing and instructor consent.

Systematic development of an agricultural thesis research project including literature searches, reports and experimental design. Repeatable for up to 12 units. Credit/No Credit grading only.

AG 599. Thesis. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem. Thesis will include problem identification, significance, methods, data analysis, and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Degree credit limited to 6 units.

Animal Science (ASCI)

undefined

ASCI Courses

ASCI 101. Introduction to the Animal Sciences. 2 units

Term Typically Offered: F

CR/NC

Economic, environmental and societal impact of the livestock, poultry and horse industries. Basic terminology, anatomy, and physical requirements of animals. Career and academic planning. Co-curricular, extra-curricular, and post-graduate opportunities. Required of all first-time students in the Animal Science Department. Credit/No Credit grading only. 2 lectures.

ASCI 112. Principles of Animal Science. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Sustainability Related

Comparative physiology of digestive, endocrine, and reproductive systems in animals. Principles of nutrition, genetics, growth, behavior, food processing and safety of animals. Current issues including biosecurity, animal welfare, and government safeguards for human and animal health. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area B2.

ASCI 200. Special Problems. 1-4 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 3 units per quarter. Credit/No Credit grading only.

ASCI 203. Animal Parasitology. 3 units

Term Typically Offered: TBD

Prerequisite: BIO 111 or BIO 161.

Identification, life cycles, prevention and control of the common external and internal parasites causing economic loss in livestock. 3 lectures.

ASCI 211. Meat Science. 4 units

Term Typically Offered: F, W, SP

Muscle food processing methods and operations. Conversion of muscle to meat. Meat inspection, grading, composition, curing, preservation, food safety and related topics. Carcass beef, pork, and lamb processed into consumer ready products. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

ASCI 212. Livestock Show Management. 3 units

Term Typically Offered: W

Application of the management and operations of Cal Poly's Western Bonanza Livestock Show. Principles and procedures in planning, organizing, financing, promoting and managing a major livestock show and the fair industry. Total credit limited to 6 units. Not open to students with credit for ASCI 412 or ASCI 413. 1 lecture, 2 activities.

ASCI 214. Equine Management. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Application of safety, risk reduction, horsemanship skills. Develop a working equine/human relationship. Selection and application of nutrition, equipment, preventive health and farrier program, and equitation skills. Total credit limited to 6 units. 2 laboratories.

ASCI 215. Safe Handling of Animal-Based Foods for Consumers. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Safe food handling of meat, dairy and egg products, emphasizing consumer knowledge in food safety from farm to table. Ecology of microorganisms in the kitchen environment. Detection, enumeration, and identification of pathogens and indicator microorganisms in animal-based food products. 3 Lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

ASCI 220. Introductory Animal Nutrition and Feeding. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 111 or BIO 161; and CHEM 127.

Nutrient digestion and absorption; basic functions of major nutrient classes; NRC feed classification and feedstuff characteristics; Van Soest system of fiber analysis and practical applications; feed processing: effects on feeds and nutrient availability; nutrient requirements of animals; diet formulation techniques. 3 lectures, 1 laboratory.

ASCI 221. Introduction to Beef Production. 4 units

Term Typically Offered: F, SP

Survey of industry characteristics, breeds, market classes, production systems, and current issues facing the beef industry. 3 lectures, 1 laboratory.

ASCI 222. Systems of Swine Production. 4 units

Term Typically Offered: F, W, SP

Structure of the pork industry in the U.S.; production standards and new technologies; breed systems. Market classification, product quality and quality assurance. Swine behavior and husbandry systems; biosecurity, health and feeding systems and management. 3 lectures, 1 laboratory.

ASCI 223. Systems of Small Ruminant Management. 4 units

Term Typically Offered: F, W, SP

Sheep and goat industry overview, populations, trends, cultural implications, breed identification, nutritional, reproductive, health, marketing, and herd management of sheep and goats. Field trip may be required. 3 lectures, 1 laboratory.

ASCI 224. Equine Science. 4 units

Term Typically Offered: F, W, SP

History, status of the horse industry, breeds. Application of management skills, safety, conformation evaluation, hoof and leg conformation and care. Understanding equine behavior. Insurance and tax ramifications. Pedigree analysis. Alternate therapies. 3 lectures, 1 laboratory.

ASCI 225. Introduction to Poultry Management. 4 units

Term Typically Offered: F, SP

Introduction to modern techniques in poultry production, processing, marketing and price discovery. Consumption trends, breeds and consumer grades. Laboratory application of management skills, health care, keeping of production and accounting records and processing techniques. 3 lectures, 1 laboratory.

ASCI 226. Livestock Evaluation. 3 units

Term Typically Offered: TBD

Utilization of objective and subjective estimation measures in establishing economic worth of domestic animals of the three meat animal species and horses. 1 lecture, 2 laboratories.

ASCI 227. Companion Animal Science. 4 units

Term Typically Offered: F, W, SP

Companion animal anatomy and physiology, reproduction, nutrition, behavior, management, common parasites, and infectious diseases. Scientific method in studying the human-animal bond. Application of biological concepts to problems related to companion animals. Trends in pet industry including animal welfare issues. 3 lectures, 1 laboratory.

ASCI 228. Equine Evaluation. 2 units

Term Typically Offered: TBD

Appraisal of equine breeds at halter and in performance classes. Evaluate horse classes, decide their order of placement, and then orally justify these decisions to a judge. The relationship of equine anatomy and physiology on competitive performance. 2 laboratories.

ASCI 229. Anatomy and Physiology of Farm Animals. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 111 or BIO 161.

Comprehensive overview of the principal systems of farm animals using an integrative, systemic approach to learning the homeostasis of mammalian organisms so the information can be applied to their daily care and management. 3 lectures, 1 laboratory.

ASCI 232. General Animal Science Laboratory. 1 unit

Term Typically Offered: TBD

Basic handling skills of livestock; introductory selection of livestock; basic feedstuff identification and processing; and health care practices. 1 laboratory.

ASCI 239. Principles of Rangeland Management. 4 units

Term Typically Offered: F, SP

Sustainability Related

Characteristics of rangeland ecosystems, processes of directing ecological change, the history of their management, particularly in North America. Laboratory activities introduce basic ecological monitoring practices, including quantification of biomass, soil cover, and species composition. 3 lectures, 1 laboratory. Replaces ASCI 329.

ASCI 260. Preparation of Livestock for Shows and Sales. 3 units

Term Typically Offered: TBD

Techniques, equipment and knowledge necessary in order to properly condition, groom, and present beef cattle or horses for evaluation and merchandising. 3 activities.

ASCI 265. Equine Behavior and Training. 3 units

Term Typically Offered: F

Training of weanling and yearling horses at halter. Selection of proper attire for the handler and equipment for the horse. Application of safe, behavioral training techniques enabling the horse to accept handling, farrier and health care. 3 activities.

ASCI 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ASCI 290. Animal Production and Management Enterprise. 1-5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Beginning field experience in animal production systems. May include health, nutrition, reproduction, management, processing, budgeting, and/or marketing exercises. Total major credit for ASCI 290 limited to 6 units. Total credit for ASCI 290 limited to 10 units. Credit/No Credit grading only. 1-5 lectures.

ASCI 302. Animal Genetics. 4 units

Term Typically Offered: F, W

Prerequisite: BIO 111 or BIO 161; and STAT 218.

Mendelian, population, quantitative, and molecular genetics as related to animal management practices. Predicted responses to natural and artificial selection in domesticated and wild animal populations. 4 lectures.

ASCI 304. Animal Genomics. 3 units

Term Typically Offered: F, W, SP

Prerequisite: ASCI 302, BIO 302, BIO 303, or BIO 351.

Application of genetic principles for domestic animal improvement. Improving animal performance and health through use of genetic markers and diagnostics, gene mapping, and related current technologies. 3 lectures.

ASCI 310. Technical Veterinary Skills. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ASCI 229.

Restraint and handling of animals, physical examination, necropsy procedure, basic wound management, applied pharmacology. Reproduction and herd health programs. 3 lectures, 1 laboratory.

ASCI 311. Advanced Beef Cattle System Management. 4 units

Term Typically Offered: W

Prerequisite: ASCI 221.

Management principles for the sustainability of commercial beef cattle operations. Systems approach for goal setting, financial analysis, range management, breeding systems, nutrition, health programs, marketing, and production practices to enhance profitability of commercial cow-calf operations. 3 lectures, 1 laboratory.

ASCI 312. Production Medicine. 3 units

Term Typically Offered: TBD

Prerequisite: ASCI 221 or ASCI 223; ASCI 225 or ASCI 222; ASCI 224 or ASCI 227; and ASCI 229.

Basic disease concepts. Fundamentals of immunology and therapeutics. Disease prevention principles, infectious and non-infectious. Pre-harvest food safety and milk and meat quality assurance. Herd health management programs for production efficiency and product quality. 3 lectures.

ASCI 315. Equine Biomechanics. 4 units

Term Typically Offered: TBD

Prerequisite: ASCI 224.

Anatomy and physiology of the equine hoof and limb. An understanding of the art and science of the farrier's work. Evaluation of proper hoof care, trimming, and shoeing. Foot and leg conformation as it relates to sound locomotion. 3 lectures, 1 activity.

ASCI 319. Physiological Chemistry of Animals. 4 units

Term Typically Offered: F, SP, SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); ASCI 229, BIO 231, or BIO 361; and CHEM 212, CHEM 216, or CHEM 312. Recommended: STAT 130, STAT 217, or STAT 218.

Integration of the principles of chemistry, biochemistry, physiology and nutrition to understand metabolism of carbohydrates, lipids and proteins at the cellular, organ and whole animal level. Regulation and coordination of metabolic function within and across tissues in domesticated and wild animals. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ASCI 321. Zoonoses and Veterinary Public Health Concerns. 4 units

Term Typically Offered: TBD

Prerequisite: BIO 111 or BIO 161.

Public health concerns including: animal and bird diseases which may be transmitted to people; pre-harvest food safety and handling concerns; and environmental public health hazards. 3 lectures, 1 activity.

ASCI 324. Advanced Equine Evaluation. 2 units

Term Typically Offered: TBD

Prerequisite: ASCI 228.

Appraising the relative merit of individual horses in halter and performance through the application, development and refinement of deductive and inductive logical processes. Oral and written expression of the selection rationale. 2 laboratories.

ASCI 325. Egg Production, Processing and Distribution. 4 units

Term Typically Offered: TBD

Prerequisite: ASCI 225.

Management of replacement pullets and laying hens including flock scheduling, vaccination and handling procedures, nutrition management, costs of operation and production projections. Quality determination, processing, sales and distribution of shell eggs and egg products. 3 lectures, 1 laboratory.

ASCI 326. Advanced Livestock Evaluation. 2 units

Term Typically Offered: TBD

Prerequisite: ASCI 112 and ASCI 226.

Application of deductive and inductive logical processes in appraising the relative merit of individual animals within a group sample. Oral expression of the selection rationale. Total credits limited to 4 units. 2 laboratories.

ASCI 330. Poultry Meat Production and Processing. 4 units

Term Typically Offered: W

Prerequisite: ASCI 211 or ASCI 225.

Modern production techniques for the poultry meat industry. Management of hatcheries, poultry production, and poultry meat processing. 3 lectures, 1 laboratory.

ASCI 333. Equine Reproduction. 5 units

Term Typically Offered: SP

Prerequisite: ASCI 224.

Management of the breeding farm, breeding problems, diseases, study of estrus cycles, servicing the mare, handling stallions. Breeding systems, teasing, embryo transfer, ultrasound pregnancy diagnosis, new developments in breeding technology. 4 lectures, 1 laboratory.

ASCI 339. Internship in Animal Science. 1-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of internship instructor.

Selected Animal Science students will spend up to 12 weeks with an approved agricultural firm engaged in production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Major credit limited to 6 units. Total credit limited to 12 units. Credit/No Credit grading only.

ASCI 340. Animal Welfare and Ethics. 4 units

Term Typically Offered: W, SP

Prerequisite: BIO 111 or BIO 161; and Junior Standing.

Introduction to moral principles that have shaped the field of animal welfare science. Definition of Animal Welfare. Identification of science-based measures of welfare. Current welfare concerns with companion, laboratory, production, and exotic animals. 4 lectures.

ASCI 342. Poultry Business Management. 4 units

Term Typically Offered: TBD

Prerequisite: ASCI 225.

Organization and management of vertically integrated poultry operations. Personnel management, cash flow analysis, cash vs. accrual accounting, structuring of financial statements, projecting product outputs and cash flow needs, employee benefit programs and insurance needs for poultry companies. 4 lectures.

ASCI 344. Equine and Human Communication. 3 units

Term Typically Offered: F, W, SP

Prerequisite: ASCI 214.

Behavior of the horse and its relationship with people. Learning, motivation, social behavior and communication with techniques to improve the safety and understanding between people and horses. Total credit limited to 6 units. 3 activities.

ASCI 345. Equine Behavior Modification. 5 units

Term Typically Offered: F

Prerequisite: ASCI 344 and consent of instructor.

Advanced principles of equine behavior modification for training young horses under saddle. Identifying differences in individual horse's attitudes, techniques to teach horses to respond to different stimuli, management of young equine athlete. 5 activities.

ASCI 346. Equine Nutrition. 4 units

Term Typically Offered: SP

Prerequisite: ASCI 220 with a grade of C- or better.

Equine digestion, diet development considerations and evaluations, nutritional management, and the relationship of respective topics to recommended feeding practices, research data, and nutritional portfolios. Information is based on recent advances in horse nutrition and the National Research Council's Nutrient Requirements for Horses. 3 lectures, 1 laboratory.

ASCI 347. Equine Exercise Physiology. 3 units

Term Typically Offered: TBD

Prerequisite: ASCI 224.

Applied physiology of the exercising horse. Examine different physiological systems: muscular, cardiovascular, respiratory, and nutritional. Gait analysis, lameness, and treatment. The athletic horse: sports medicine, conditioning, drugs, and necropsy evaluation. A distance learning course. 3 lectures.

ASCI 350. Nonruminant Nutrition. 4 units

Term Typically Offered: W

Prerequisite: ASCI 220 with a grade of C- or better or consent of instructor.

Comparison of nonruminant and ruminant digestive systems, nutrient requirements, risk management for ingredients, formulation and nutritional management. Influence of growth and production curves, consumption patterns, and feeding management in commercial poultry and swine industries. Feed manufacturing and governmental regulations. 3 lectures, 1 laboratory.

ASCI 351. Reproductive Physiology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ASCI 229.

Reproductive anatomy of male and female farm animals. General endocrinology and systemic physiology. Endocrine system effects on the various aspects of reproduction, such as: gametogenesis, estrus, gestation, parturition, mothering and seasonality. Introduction to reproductive biotechnology and embryo manipulation. 3 lectures, 1 laboratory.

ASCI 355. Ruminant Nutrition. 4 units

Term Typically Offered: W

Prerequisite: ASCI 220 with a grade of C- or better or consent of instructor; and ASCI 320 or CHEM 313 or CHEM 371.

Digestive physiology and nutrition of ruminants. Anatomy and physiology of the digestive tract. Rumen microbial fermentation. Nitrogen utilization and metabolism. Energy partitioning. Net energy system. Range livestock and feedlot nutrition. Supplementation. Common metabolic and nutritional dysfunctions. Diet formulation. 3 lectures, 1 laboratory.

ASCI 360. Holistic Management. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Application of holistic management, a goal-oriented, value-driven framework for making ecologically, economically, and socially sound decisions. Holistic approach to management, especially of land-based resources, aimed toward greater biodiversity and sustainability. 3 lectures, 1 laboratory. Crosslisted as AG/ASCI 360. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ASCI 363. Undergraduate Seminar. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Major developments in the chosen field of the student. Discussion of new developments, policies, practices, and procedures. Each individual is responsible for the development and presentation of a topic in the chosen field, resume, and cover letter. 2 seminars.

ASCI 366. Veterinary Pharmacology. 4 units

Term Typically Offered: TBD

Prerequisite: CHEM 111 or CHEM 127, and ASCI 229.

Investigation of pharmacological principles applied to animal systems. Overview of drugs acting on the nervous, endocrine, circulatory, urinary systems, and reproductive systems, specialty areas of pharmacology, and pharmacogenomics of livestock and companion animals. 3 lectures, 1 activity.

ASCI 370. Rangeland Improvements. 3 units

Term Typically Offered: W

Prerequisite: ASCI 239 or ASCI 329.

Review of practices used for improving the productivity or ecological functions of rangeland landscapes managed for grazing livestock, wildlife, or for ecological and/or aesthetic values. 3 lectures.

ASCI 372. California Rangeland & Ranch Resource Management. 3 units

Term Typically Offered: SP

Sustainability Related

Prerequisite: ASCI 239 or ASCI 329.

Natural resource management practices recommended for regulatory compliance and resource protection of rangeland ecosystems in California. Regulations that impact rangeland management under the Clean Water and Porter-Cologne Acts, and State and Federal endangered species protections. 3 lectures.

ASCI 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 4 units per quarter. Credit/No Credit grading only.

ASCI 403. Applied Biotechnology in Animal Science. 5 units

Term Typically Offered: W

Prerequisite: BIO 161; BIO 162; and upper division genetics course (BIO 302 or BIO 303 or BIO 351 or ASCI 304).

Coverage of current resources, techniques and methodologies used in animal research and biotechnology as well as experimental design, model assessment, and data interpretation with application to an experimental setting in the laboratory. 3 lectures, 2 laboratories.

ASCI 405. Domestic Livestock Endocrinology. 4 units

Term Typically Offered: F

Prerequisite: ASCI 229 or BIO 361.

Endocrine homeostasis with emphasis on the influence of hormones involved in digestion, metabolism, calcium and phosphorous, thyroid gland, adrenal gland, reproduction, and pregnancy. Signaling pathways. 4 lectures.

ASCI 406. Applied Animal Embryology and Assisted Reproduction. 4 units

Term Typically Offered: W

Prerequisite: ASCI 229 and ASCI 351.

Comparative physiology and molecular understanding of oocyte development, fertilization, culturing, cryopreservation and micromanipulation of gametes and embryos. 3 lectures, 1 activity.

ASCI 407. Assisted Reproduction Technologies of Gametes and Embryos Laboratory. 3 units

Term Typically Offered: TBD

Prerequisite: ASCI 229; ASCI 351; and ASCI 406. Recommended: ASCI 320 or CHEM 371; CHEM 327.

Coverage of current resources, advanced techniques and methodologies of assisted reproduction of gametes and embryos involving in-vivo collection, in-vitro fertilization, cryopreservation and micromanipulation. Mouse, cattle and horse gametes used for learning the techniques involved in embryology and assisted reproduction 1 lecture, 2 laboratories.

ASCI 410. Applied Animal Behavior Science. 4 units

Term Typically Offered: W, SP

Prerequisite: BIO 111 or BIO 161; and ASCI 229 or BIO 162.

Principles of behavior applied to animals in managed environments. Observation and measurement of behavior, including sampling and recording methods. Learning, including training and operant conditioning. Discussion of issues related to behavioral welfare. Etiology and management of maladaptive behavior. 3 lectures, 1 laboratory.

ASCI 412. Advanced Livestock Event Planning. 3 units

Term Typically Offered: W

Prerequisite: ASCI 212, AGB 314 and consent of instructor.

Organization and planning for the Western Bonanza Junior Livestock Show. Establishment of committee assignments and show manager responsibilities. Corporate partnerships established and fund raising begun. Planning for activities and guest speakers and new student recruitment. Total credit limited to 6 units. 1 lecture, 2 activities.

ASCI 413. Advanced Livestock Event Management. 1 unit

Term Typically Offered: F, SP

Prerequisite: ASCI 412 and consent of instructor.

Student management of the Western Bonanza Junior Livestock Show. Leadership skills, team building, media relations, use of computer applications, livestock and fair industry contacts and mentoring to new students. Application of knowledge learned in ASCI 412. Total credit limited to 2 units. 1 activity.

ASCI 415. HACCP for Meat and Poultry Operations. 3 units

Term Typically Offered: W, SP

Prerequisite: ASCI 211.

Using Hazard Analysis and Critical Control Point (HACCP) principles to develop regulatory inspection plans for meat and poultry operations; development and use of prerequisite programs; microbiological and process overviews. 3 lectures.

ASCI 419. Animal Metabolism and Nutritional Modeling. 4 units

Term Typically Offered: F, SP, SU

Prerequisite: ASCI 220 with grade of C- or better; and ASCI 319, CHEM 314, or CHEM 369.

Relation of nutrient metabolism to animal production, exploration of systems used in development of animal nutritional models. Course may be offered in classroom-based or online format. 4 lectures. Formerly ASCI 420.

ASCI 425. Meat Industry Study Tour. 2 units

Term Typically Offered: W

Prerequisite: ASCI 211.

Study tour of commercial meat businesses. Livestock harvest and carcass fabrication, further meat processing, retail and food service operations. Personnel, processing procedures, regulatory standards, industry specifications and current issues. Travel for 4 days. 2 activities.

ASCI 438. Systemic Animal Physiology. 4 units

Term Typically Offered: F, SP

Prerequisite: ASCI 229; CHEM 313 or CHEM 371, or ASCI 320.

Homeostatic relationships of organ systems. Cardiovascular, respiratory, urogenital and neuro-endocrinological functions. 3 lectures, 1 laboratory.

ASCI 440. Immunology and Diseases of Animals. 4 units

Term Typically Offered: SP

Prerequisite: ASCI 229. Recommended: ASCI 320, CHEM 371 or equivalent.

Introduction to immune system, including innate and acquired immunity of domesticated animals. Application of immunological analyses and examination of current disease issues in domesticated animals. 3 lectures, 1 laboratory.

ASCI 450. Computer Applications in Animal Science: Spreadsheet Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing.

Development of spreadsheets relating to livestock production. Integration of database and analytical techniques. Cost-benefit analyses of livestock production systems. 2 lectures, 2 activities.

ASCI 455. Advanced Equine Reproductive Technologies. 4 units

Term Typically Offered: TBD

Prerequisite: ASCI 333 and ASCI 351. Recommended: ASCI 405 and ASCI 406.

Assisted reproductive technologies in horses; use of gametes from normal and sub-fertile horses; manipulation of sub-fertile horses, donor and recipient mares; manipulation of endocrine system; embryo utilization; cryobiology of gametes and embryos; assessment of high-risk mare, fetus, and neonate. 3 lectures, 1 laboratory.

ASCI 460. Rangeland Assessment and Planning. 4 units

Term Typically Offered: TBD

Prerequisite: ASCI 239 or ASCI 329.

Examination of methods used for determining the healthy and function of rangeland ecosystems, and the application of planning processes used in the management of rangelands and associated ecosystems. Field trip required. 3 lectures, 1 laboratory.

ASCI 465. Applied Practices for Monitoring California Rangelands. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: ASCI 239 or ASCI 329; and consent of instructor.

Theory and application of grassland and brushland assessment and monitoring practices for evaluating grazing use, wildlife habitat quality, and fuels condition, and general ecological health. Course completion may be counted towards professional certifications. The course is intentionally structured to accommodate inservice training for federal land management agency and conservation organization staff. 2 lectures, 2 activity.

ASCI 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ASCI 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ASCI 477. Senior Project - Research Experience in Animal Science. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing, ASCI 363 and consent of instructor.

Recommended: one course in statistics.

Independent research experience in a specific area of animal science conducted under faculty supervision. Satisfies senior project requirement. Minimum 90 hours required.

ASCI 478. Senior Project - Advanced Internship Experience in Animal Science. 3 units

Term Typically Offered: F, W, SP

Prerequisite: ASCI 363 and senior standing.

Independent internship experience conducted under faculty supervision focusing on a discipline area of animal science. Completion of a project as a component of the internship. Satisfies senior project requirement. Minimum 90 hours required.

ASCI 479. Senior Project - Current Topics in Animal Science. 3 units

Term Typically Offered: F, SP

Prerequisite: Senior standing and ASCI 363.

Critical evaluation and formal presentation of current issues facing animal agriculture. Evaluation of current topics, analysis of supporting evidence and logic, and synthesis and formal presentation of the resulting perspectives on different approaches to current challenges. 3 lectures.

ASCI 484. Processed Meat Products. 4 units

Term Typically Offered: F

Prerequisite: ASCI 211, FSN 204, or graduate standing.

Physical, chemical and functional characteristics of meat food raw materials. Science and technology of value-added processing including curing, sausage manufacture, low moisture products, and restructuring. Quality assurance and related current industry topics. 3 lectures, 1 laboratory. Formerly ASCI 384.

ASCI 490. Advanced Animal Production and Management Enterprise. 1-5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Advanced field experience in animal production systems. May include health, nutrition, reproduction, management, processing, budgeting, and/or marketing exercises as well as management decision-making opportunities. Total major credit for ASCI 490 limited to 6 units. Total credit for ASCI 490 limited to 10 units. Credit/No Credit grading only. 1-5 lectures.

ASCI 500. Individual Study in Animal Science. 1-6 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced independent study planned and completed under the direction of a member of the Animal Science faculty. Total credit limited to 6 units.

ASCI 520. Comparative Animal Nutrition. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor. Recommended: ASCI 320, or CHEM 313 or CHEM 371, and one of the following: ASCI 346, or ASCI 350, or ASCI 355, or DSCI 301.

Advanced problem-based presentation of animal nutrition case studies. Emphasis on nutrients, clinical nutrition disorders and species not commonly considered in production animal nutrition. Analytical and problem-solving skills will be utilized to develop solutions to complex animal nutrition management issues. 3 lectures, 1 activity.

ASCI 570. Selected Topics in Animal Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

ASCI 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ASCI 581. Graduate Seminar in Animal Science. 1-4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Current findings and research problems in the field and their application to the industry. Credit/No Credit grading only. Total credit limited to 12 units. 1-4 seminars.

ASCI 583. Research Experience for Regenerative Medicine Students. 2 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in the Specialization in Regenerative Medicine for the MS in Biological Sciences; or Specialization in Regenerative Medicine for the MS in Biomedical Engineering; or the Animal Science Specialization for the MS in Agriculture.

Independent research experience in biological or biomedical research. Proposal writing and literature review; experimental design, implementation and troubleshooting; oral and poster presentations. 1 seminar and supervised work. Crosslisted as ASCI/BIO/BMED 583. Formerly ASCI/BIO/BMED 594.

ASCI 593. Regenerative Medicine Internship. 3-5 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in the Specialization in Regenerative Medicine for the MS in Biological Sciences; or the Specialization in Regenerative Medicine for the MS in Biomedical Engineering; or the Specialization in Animal Science for the MS in Agriculture.

Supervised graduate research and/or development in stem cell science or regenerative medicine and engineering. Provides students with an off-campus industrial or university internship. Total credit limited to 10 units. Crosslisted as ASCI/BIO/BMED 593.

Anthropology (ANT)

undefined

ANT Courses

ANT 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

ANT 201. Cultural Anthropology. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Cultural patterns, divergence and uniformity in language and communication, family organization, gender, and adaptation to environment. Economics and productivity, political organization, religion and ritual, ethnicity and race, illness and healing, globalization and culture change. Skills: ethnographic analysis and cultural relativity. Course may be offered in classroom-based, online or hybrid format. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

ANT 202. World History Before Writing. 4 units

Term Typically Offered: F

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Long-term development of global biological and cultural diversity from emergence of the first human ancestors 6-7 million years ago to the advent of writing. Biological evolution, cultural development, emergent socio-political complexity and social inequality, migrations, adaptation to climate change, and sustainability. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

ANT 250. Biological Anthropology. 4 units

Term Typically Offered: F, W

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Biological aspects of human unity and diversity. Primate and human evolution, including anatomical, physiological and behavioral adaptations. Evolutionary ecological perspectives and theories on human behavior and biology. Field trip required. 4 lectures. Fulfills GE Area B2.

ANT 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ANT 309. Elements of Archaeology. 4 units

Term Typically Offered: SP

Prerequisite: ANT 202.

Archaeological method and theory covering the history and development of archaeological thought, approaches to data recovery, dating and analysis of artifacts and ecofacts, the construction of models of prehistoric human behavior through application of archaeological and anthropological theories. 4 lectures.

ANT 310. Archaeological Field Methods. 4 units

Term Typically Offered: TBD

Prerequisite: ANT 202 or ANT 309.

Hands-on introduction to the methods and techniques of archaeology with an emphasis on excavation. Training in artifact and ecofact identification with a focus on lithic technology. Practical field experience with hand tools, and stratigraphic interpretation. Methodological approaches to both academic research questions and compliance with environmental planning mandates. 3 lectures, 1 laboratory.

ANT 311. Archaeological Laboratory Methods. 4 units

Term Typically Offered: F

Prerequisite: ANT 309 or ANT 310.

Hands-on introduction to the methods employed in post-field processing, classification, analysis, and preservation of archaeological materials. Compilation of quantitative and qualitative information in data base format to assist in the classification and interpretation of faunal remains and artifacts. 3 lectures, 1 laboratory.

ANT 312. Introduction to Cultural Resources Management. 4 units

Term Typically Offered: W

Prerequisite: ANT 201, ANT 202 or ANT 309.

Introduction to federal, state, and local legislation pertinent to the identification, evaluation, and treatment of cultural resources. A history of preservation legislation, culminating with detailed discussion of Section 106 of the National Historic Preservation Act and the California Environmental Quality Act. Practical experience in orienteering, map-reading, and simple cartography. 4 lectures.

ANT 320. California's Native Past. 4 units

Term Typically Offered: SP

Prerequisite: ANT 202.

Overview of the paleoenvironment, prehistory, archaeology, and ethnography of Native California. The last 12,000 years of California's past from the arrival of the first human beings to the establishment of Spanish settlements in 1769, and the demise of native societies. 4 lectures.

ANT 330. Indigenous South Americans. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Indigenous peoples of South America from the past to the present. Cross-cultural study of small band societies, tribes and large civilization states located from the Amazon basin to the Altiplano. Comparison of current state of indigenous rights and place in modern society. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ANT 344. Sex, Death, and Human Nature. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B2; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

How Darwinian processes of differential reproduction and mortality influence human interests, passions and behaviors. Theories of inclusive fitness, parental investment and senescence. Sex differences, sexual attraction, life histories, violence and aggression, including rape, homicide and infanticide. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ANT 345. Human Behavioral Ecology. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Related

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B2; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Biological and cultural influences of natural and sexual selection on individual behavior. Ecological effects on human behavior to reproduce and acquire resources. Scientific method for understanding foraging behavior, group living, social skills, kinship, parenting, religion, and mating. Cross-cultural, cross-sex, and cross-species comparisons. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ANT 360. Human Cultural Adaptations. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Social and cultural evolution from Paleolithic times to the present. Interactions of demographic, economic and ecological factors are emphasized. Main topics include human nature/culture, sex and gender, cooperation and conflict, the 'agricultural revolution', state formation, social inequality and globalization. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ANT 384. Professional Preparation for Anthropologists/Geographers. 1 unit

Term Typically Offered: F, W

CR/NC

Prerequisite: Sophomore standing; ANT 201 or GEOG 150.

Preparation for professional advancement in the fields of anthropology and geography. Supervised career planning emphasizing resume development, selection of an internship or international experience, exploration of career options and graduate programs. Lectures from outside, practicing professionals. Course may be offered in classroom-based or online format. Credit/No Credit grading only. 1 seminar. Formerly ANT 464.

ANT 393. Action-oriented Ethnography. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and one of the following: ANT 201, ANT 202, ANT 250, ISLA 123, any Ethnic Studies (ES) course, any Women's and Gender Studies (WGS) course.

Development of knowledge and skills needed to conduct original action-oriented ethnographic research. Grounded in the reflexive 'turn' in anthropology and critical race, science, technology and society, queer and feminist studies, students will engage questions of authority, representation, critical consciousness and justice. 4 lectures. Crosslisted as ANT/ISLA 393.

ANT 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

ANT 401. Culture and Health. 4 units

Term Typically Offered: F

Prerequisite: Junior standing, ANT 201, and one of the following: ANT 250, BIO 160, or BIO 263; or graduate standing.

Global perspective on the relationship between culture and health. Ecological factors influencing health and illness. Origins of disease and impact of diseases on society. Diet and nutrition. Classifications of illness causation. Kinds of curers. Relationship of gender and reproduction to illness. Pharmacology. Mental illness. Global health problems. Alternative health care modalities. Health-care needs of U.S. ethnic groups. 4 lectures.

ANT 402. Nutritional Anthropology. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and ANT 201. Recommended: ANT 250.

Interrelationships of sociocultural and ecological factors and their influence on nutrition and human health in developing and developed country contexts. Topics include human adaptation, nutritional assessment, food production and allocation, the effect of development on diet and health. 4 lectures.

ANT 415. Native American Cultures. 4 units

Term Typically Offered: TBD

USCP

Prerequisite: One upper division ANT course.

Survey of Native American cultures from earliest times to present, emphasizing regional diversity in traditional lifeways. Origins of New World peoples, domestication, war, social organization, trade and gender roles. 4 lectures. Fulfills USCP.

ANT 425. Meaning, Gender, and Identity in Anthropological Theory. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs). Recommended: ANT 201.

Exploration of the intersection of anthropological theory with meaning, gender/sexuality, and identity formations within and between cultural contexts. Situate and analyze anthropological discourses regarding social meanings and cultural identities as defined by oppositions of us and other, male and female, normal and abnormal, natural and unnatural. Provide a potential source of comparative cultural reflection and critique. 4 lectures.

ANT 455. Anthropology-Geography Research Design and Methods. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area B2; and two upper-division ANT or GEOG courses.

Development of knowledge and skills needed to conduct original scientific anthropology-geography research and prepares students for senior projects. Various empirical methodologies highlighted, with a focus on quantitative design and measurement of human culture, biology, behavior, environment and ecology. Course may be offered in classroom-based, online, or hybrid. 3 lectures, 1 laboratory. Crosslisted as ANT/ GEOG 455.

ANT 460. Queer Anthropology. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and one of the following: ANT 201, ISLA 123, any Ethnic Studies (ES) course, any Women's and Gender Studies (WGS) course.

Exploration of intersections of queer identities and politics of race, gender, kinship, the body, class, and desire. Evaluation of how anthropology has been transformed by queer critique and knowledge production. Investigation of the multi-scaled fields of power that articulate a cultural understanding of the body. 4 lectures.

ANT 461. Senior Project I. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

ANT 462. Senior Project II. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

ANT 465. Internship. 3-8 units

Term Typically Offered: TBD

CR/NC

Prerequisite: ANT 384 or ANT 464; senior standing; and/or consent of instructor.

Supervised training, research, and work in public and private organizations. Credit/No Credit grading only. Total credit limited to 18 units.

ANT 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ANT 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

Architectural Engineering (ARCE)

undefined

ARCE Courses

ARCE 106. Introduction to Building Systems. 2 units

Term Typically Offered: F

Sustainability Related

Introduction to building systems and materials. Use and application of structural, foundation, envelope, mechanical and electrical systems in the field of Architectural Engineering. 1 lecture, 1 activity.

ARCE 211. Structures I. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: For ARCE majors: PHYS 141, MATH 142; for ARCH and CM majors: PHYS 121 or PHYS 141, MATH 142 or MATH 182.

Introduction to the role of structures in the making of buildings. Introduction to statics and creation of simple three-dimensional structures. Development of skills to analyze structures composed of axial force (truss) members. 3 lectures.

ARCE 212. Structures II. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: ARCE 211 (C- or better required for ARCE Majors).

Introduction to the role of structures in the making of buildings. Introduction to shear and moment diagrams using the principles of statics and the application of the diagrams to simple three-dimensional structures. Development of skills, particularly free body diagrams, to analyze structures composed of bending (beams) members. 3 lectures.

ARCE 223. Mechanics of Structural Members. 3 units

Term Typically Offered: F, SP

Prerequisite: ARCE 212 (C- or better required for ARCE Majors).

Concurrent for ARCE majors: ARCE 224.

Advanced topics of stresses in beams. Plastic bending, unsymmetrical bending. Combined stresses. Stress transformation. Buckling. Deflection of beams. 3 lectures.

ARCE 224. Mechanics of Structural Members Laboratory. 1 unit

Term Typically Offered: F, SP

Concurrent: ARCE 223.

Experimental investigations of material properties. Experimental studies of stresses and deflections in beams, including plastic bending, and unsymmetrical bending. Stress transformations via strain gages for combined loading cases. Culminating lab experience: A student run, self-designed experiment. 1 laboratory.

ARCE 226. Introduction to Structural Systems. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: ARCE 212.

Description, behavior and comparison of structural building systems. Concepts of structural stability, load flow, framing schemes and building configuration related to vertical and lateral loads. Not open to Architectural Engineering majors. 3 lectures.

ARCE 227. Structures III. 2 units

Term Typically Offered: F, SP

Prerequisite: ARCE 212 (C- or better required for ARCE Majors).

Continuation of selected concepts covered in ARCE 211 and ARCE 212. Advanced topics in two-dimensional and three-dimensional equilibrium of structural building systems. 2 lectures.

ARCE 257. Structural CAD for Building Design. 2 units

Term Typically Offered: W, SP

Prerequisite: CM 115.

Emphasis on the use of computer graphics software to represent a building's structural system and its individual elements. 1 lecture, 1 laboratory.

ARCE 260. History of Structures. 4 units

Term Typically Offered: W, SU

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Social, symbolic, and technical importance of landmark structures.

Analysis of breakthrough ideas that led to major advances in building design. Contextualization of these advances. Tools by which to assess and critique structural art as a separate and distinct art form. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ARCE 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Schedule of Classes will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ARCE 302. Structural Analysis. 3 units

Term Typically Offered: F, W

Prerequisite: ARCE 223 and ARCE 227 (C- or better required for ARCE Majors). Concurrent for ARCE majors: ARCE 352.

Analysis of statically indeterminate structures using virtual work, slope deflection, the force method and plastic analysis methods. 3 lectures.

ARCE 303. Steel Design I. 3 units

Term Typically Offered: W, SP

Prerequisite: ARCE 223 (C- or better required for ARCE Majors).

Corequisite for ARCE majors: ARCE 371. Corequisite for ARCE minors: ARCE 226.

Analysis and design of steel structural members subjected to bending, shear and axial forces. 3 lectures.

ARCE 304. Timber Design. 3 units

Term Typically Offered: W, SP

Prerequisite: ARCE 371 for ARCE majors (with C- or better); ARCE 223 and ARCE 226 for ARCE minors.

Analysis and design of timber structural members subjected to bending, shear, and axial forces. Wood diaphragms, shear walls and their connections. 3 lectures.

ARCE 305. Masonry Design. 2 units

Term Typically Offered: W, SP

Prerequisite: ARCE 371 for ARCE majors (with C- or better); ARCE 223 and ARCE 226 for ARCE minors.

Design of load-bearing walls, shear walls, columns and beams in masonry. 2 lectures.

ARCE 306. Matrix Analysis of Structures. 3 units

Term Typically Offered: F, W

Prerequisite: ARCE 302 (C- or better required for ARCE Majors). Concurrent: ARCE 353.

Analysis of statically indeterminate structures by direct stiffness method including continuous beams, plane trusses, and frames. Introduction to finite-element methods. 3 lectures.

ARCE 315. Introduction to Structural Design. 4 units

Term Typically Offered: F,W,SPSU

Prerequisite: ARCE 226.

Introduction to structures that use timber, steel and concrete as the primary construction material. Introduction to gravity load carrying systems and lateral load resisting systems using timber, steel and concrete elements. Credit not allowed for ARCE majors. 4 lectures.

ARCE 316. Structural Integration in Architecture. 4 units

Term Typically Offered: SP

Prerequisite: ARCE 315. Concurrent: ARCH 353.

Integration of structural systems into architectural design. Preliminary design of structures including the development of gravity load carrying systems and lateral load resisting systems. Introduction to tall building and long span structural systems. Introduction to structural issues of cladding systems. Not open for major credit to Architectural Engineering majors. 4 lectures.

ARCE 352. Structural Computing Analysis. 1 unit

Term Typically Offered: F, W

Prerequisite: CSC 231 or CSC 234. Concurrent: ARCE 302.

Computer calculations, programming and technical reporting. Emphasis on use of two-dimensional structural analysis software to analyze a building's structural system and its individual elements. 1 laboratory.

ARCE 353. Matrix Structural Computing Analysis. 1 unit

Term Typically Offered: F, W

Prerequisite: ARCE 352 (C- or better required for ARCE Majors). Concurrent: ARCE 306.

Emphasis on the use of nonplanar structural analysis software to analyze a building's structural system and its individual elements. 1 laboratory.

ARCE 354. Numerical Analysis Laboratory. 1 unit

Term Typically Offered: W, SP

Prerequisite: MATH 244 and ARCE 353 (C- or better required for ARCE Majors). Concurrent: ARCE 412.

An intensive survey of numerical analysis techniques used for solving engineering problems. Topics include integration, ordinary differential equations, and the eigenproblem. 1 laboratory.

ARCE 360. Equilibrium Without Statics. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Equilibrium without statics via state of the art geometric visualization and programming. Use of a programmed drawing environment to study the flow of loads through a building. Mathematical insights into Virtual Work and both Castigliano's Theorems. Historical analysis and context. Course is offered online only. 4 Lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ARCE 371. Structural Systems Laboratory. 3 units

Term Typically Offered: F, W

Prerequisite: ARCE 223, ARCE 227 (C- or better required for ARCE Majors), and third year standing in Architectural Engineering.

Studies in the relationship of structural framing to overall building geometry. Emphasis on the stability of structural configurations, calculation of building loads and development of a complete gravity and lateral load path. 3 laboratories.

ARCE 372. Steel Structures Design Laboratory. 3 units

Term Typically Offered: F, SP

Prerequisite: ARCE 257, ARCE 302, ARCE 303, ARCE 352 and ARCE 371 (C- or better required for ARCE Majors).

Steel framed project incorporating structural system configuration and selection, structural analysis for gravity and lateral loads, and construction drawings and specifications. Integration of building services and architectural design, constructability issues, and relationships between construction methods and cost. 3 laboratories. Cannot be taken concurrently with ARCE 451 or ARCE 452.

ARCE 400. Special Problems for Advanced Undergraduates. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor and department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 6 units, with a maximum of 3 units per quarter.

ARCE 410. Integrated Building Envelopes. 4 units

Term Typically Offered: TBD

Prerequisite: Fourth year standing. Recommended: Third year design and analysis courses; ARCE 302, ARCE 372.

Multidisciplinary exploration of the value and collaboration required of an integrated project team approach to the design and construction of sophisticated building envelopes. Team taught by instructors and practitioners from each of the following disciplines: architecture, architectural engineering and construction management. 4 lectures.

ARCE 412. Dynamics of Framed Structures. 3 units

Term Typically Offered: W, SP

Prerequisite: ME 212; MATH 244; and ARCE 306 (C- or better required for ARCE Majors). Concurrent: ARCE 354.

Analysis of structures subjected to dynamic loads with single- and multi-degrees of freedom. Development of techniques for analysis of structures in response to time varying loads. 3 lectures.

ARCE 415. Interdisciplinary Capstone Project. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing and consent of instructor.

Team based interdisciplinary capstone / senior project course. Analysis and evaluation of interdisciplinary challenges associated with integrating the design and construction processes to deliver a project with respect to the design, budget, schedule, quality, and performance expectations of a client. 4 laboratories.

ARCE 421. Soil Mechanics. 3 units

Term Typically Offered: F, W, SP

Prerequisite: ARCE 212 (C- or better required for ARCE Majors).

Recommended: GEOL 201.

Principles of soil mechanics, including rudiments of geology, soil classification, gravimetric and volumetric relations, compaction, methods and testing, shear strength of soil and strength theories. 2 lectures, 1 laboratory.

ARCE 422. Foundation Design. 3 units

Term Typically Offered: W, SP

Prerequisite: ARCE 421 (C- or better required for ARCE Majors).

Soil-bearing capacity; sizing and design of spread footings, driven piles and drilled shafts. Design and analysis of earth-retaining structures. Analysis of the stability of slopes. 3 lectures.

ARCE 444. Reinforced Concrete Design. 4 units

Term Typically Offered: F, W

Prerequisite: ARCE 371 and ARCE 302 (C- or better required for ARCE Majors).

Theory and design of basic reinforced concrete elements: non-slender columns, beams, tee beams and one way slabs. 3 lectures, 1 laboratory.

ARCE 451. Timber and Masonry Structures Design and Constructability Laboratory. 3 units

Term Typically Offered: F, SP

Prerequisite: ARCE 257, ARCE 304, ARCE 305, and ARCE 371 (C- or better required for ARCE Majors).

Timber and masonry framed project incorporating structural system configuration and selection, structural analysis for gravity and lateral loads, and construction drawings and specifications. Integration of building services and architectural design, constructability issues, and relationships between construction methods and cost. 3 laboratories. Cannot be taken concurrently with ARCE 372 or ARCE 452.

ARCE 452. Concrete Structures Design and Constructability Laboratory. 3 units

Term Typically Offered: W, SP

Prerequisite: ARCE 257, ARCE 444, and ARCE 372 or ARCE 451 (C- or better required for ARCE Majors).

Cast in place concrete framed project incorporating structural system configuration and selection, structural analysis for gravity and lateral loads, and construction drawings and specifications. Integration of building services and architectural design, constructability issues, and relationships between construction methods and cost. 3 laboratories. Cannot be taken concurrently with ARCE 372 or ARCE 451.

ARCE 453. Interdisciplinary Senior Project. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing and consent of instructor.

Interdisciplinary projects under faculty supervision that go beyond topics covered in the Architectural Engineering curriculum. Projects must include integration with other disciplines outside of structural or architectural engineering. Exemption of interdisciplinary requirement can be approved by department head on a case by case basis. Total credit limited to 4 units.

ARCE 460. Collaborative Design Laboratory. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Investigation of the collaborative nature of the design process as it relates to the architectural engineer and related disciplines. Development of skills necessary to create a successful design team through the development of specific projects. Total credit limited to 4 units. 2 laboratories.

ARCE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ARCE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ARCE 473. Advanced Timber and Masonry Structures Laboratory. 3 units

Term Typically Offered: TBD

Prerequisite: ARCE 372, ARCE 422, ARCE 444 and ARCE 451 (C- or better required for ARCE Majors).

Emphasis on long span industrial/warehouse type buildings. Use of steel in timber/masonry construction and constructability. Holes in diaphragms, out-of-plane wall behavior and sub-diaphragms, perforated wood and masonry shear walls, pre-manufactured shear walls, masonry retaining walls, connections including post-installed anchors. 3 laboratories.

ARCE 475. Civil Infrastructure and Building Systems. 4 units

Term Typically Offered: F, W, SP

Sustainability Focused

Prerequisite: Senior standing in CE or ARCE.

Principles and practices for the sustainable design, fabrication, and installation of systems for the civil infrastructure and building; including structural, air/gas, water/wastewater, electrical, and control systems. Methods and materials used for fabrication and installation; including cost and schedule considerations. 4 lectures. Crosslisted as ARCE/CE 475.

ARCE 476. Architectural Engineering Building Systems. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing in ARCE.

Principles and practices for the sustainable design, fabrication, and installation of architectural engineering building systems; including air/gas, water/waste water, electrical, and control systems. Methods and materials used for fabrication and installation; including cost and schedule considerations. 3 lectures. Not open to students with credit in ARCE/CE 475.

ARCE 483. Seismic Analysis and Design. 3 units

Term Typically Offered: F, SP

Prerequisite: ARCE 372, ARCE 412 (C- or better required for ARCE Majors).

Introduction to dynamic response analysis of building structures with emphasis on earthquake ground motion. Earthquake resistant design of buildings in accordance with building codes. Application of computer programs and physical models for seismic design. Laboratory studies utilizing physical models for studying the behavior of building structures subjected to simulated ground motions. 2 lectures, 1 activity.

ARCE 485. Cooperative Education Experience. 6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of department head.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 12 units. Credit/No Credit grading only. Credits to not count toward graduation in the ARCE Degree Program.

ARCE 495. Cooperative Education Experience. 12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 24 units. Credit/No Credit grading only. Credits to not count toward graduation in the ARCE Degree Program.

ARCE 501. Advanced Structural Mechanics. 3 units

Term Typically Offered: F

Prerequisite: ARCE 306, ARCE 353.

Principles, concepts, and techniques of advanced structural mechanics. Studies of displacement, strain, stress, strain-displacement relation and constitutive models in three dimensions. Failure criteria. Introduction into energy principles and approximate solutions. 3 lectures.

ARCE 502. Nonlinear Structural Behavior I. 3 units

Term Typically Offered: F

Prerequisite: ARCE 306 and ARCE 353.

Principles, concepts, and behavior of structures loaded beyond their linear-elastic limit. Elastic-plastic behavior of truss, beam, and frame structures. Buckling and post-buckling behavior of columns. Behavior of beam-columns and the principle of superposition. Second-order elastic behavior of frames. 3 lectures.

ARCE 503. Nonlinear Structural Behavior II. 3 units

Term Typically Offered: W

Prerequisite: ARCE 502.

Principles, concepts, and techniques of nonlinear structural analysis currently used in practice. Classification of nonlinear problem types. Investigation of typical iterative solution strategies. Studies in material and geometric nonlinearities in spring, truss, and frame elements. Use of current nonlinear analysis software. 3 lectures.

ARCE 504. Finite Element Method for Building Structures. 3 units

Term Typically Offered: W

Prerequisite: MATH 244, ARCE 306, ARCE 501.

Basic concepts of equilibrium and compatibility. Stiffness and flexibility properties of various types of finite elements. Development and application of displacement and force methods. Elastic stability and dynamic response of buildings to earthquake, wind, and moving loads. Use of finite-element computer programs. 3 seminars.

ARCE 511. Structural Systems Behavior. 3 units

Term Typically Offered: SP

Prerequisite: ARCE 452, ARCE 503, ARCE 504.

Design, performance, and construction issues related to structural systems. Further development of design and analysis techniques necessary for performance based engineering of structural systems. Assessment of advantages and limitations of different structural forms and systems. 3 laboratories.

ARCE 522. Structural Systems. 3 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in Architecture.

Exploration of the relationship between structural systems and architectural form. Understanding of structural stability and structural order is developed through construction of a series of small scale models. Historical perspectives are presented along with the effects of available materials and technology on structural possibilities. 3 seminars.

ARCE 546. Advanced Structural Systems. 3 units

Term Typically Offered: TBD

Prerequisite: ARCE 371 (C- or better required for ARCE Majors) or graduate standing. Corequisite: ARCE 412 or graduate standing.

Concepts and issues involved in the linear and non-linear design of complex structures including tall buildings, long-span structures and advanced seismic systems. 2 lectures, 1 laboratory. Formerly ARCE 446.

ARCE 548. Seismic Rehabilitation. 3 units

Term Typically Offered: TBD

Prerequisite: ARCE 303, ARCE 304, ARCE 305, ARCE 412, ARCE 444 (C- or better required for ARCE Majors).

Introduction to the seismic rehabilitation process and philosophy. Evaluation and analysis of existing buildings to determine expected performance due to seismic demands. Development of basic seismic rehabilitation strategies for buildings. 2 lectures, 1 laboratory. Formerly ARCE 448.

ARCE 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ARCE 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ARCE 598. Structural Engineering Design Project. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor. Recommended: ARCE 371, ARCE 372, ARCE 452, and ARCE 483.

Independent development, research, and conclusion of a graduate project by individuals or teams specializing in the area of architectural or structural engineering. Projects may include graduate students from other disciplines. Total credit limited to 9 units.

Architecture (ARCH)

undefined

ARCH Courses

ARCH 101. Survey of Architectural Education and Practice. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Sustainability Related

Exploration of the major paradigms which have guided the development of architectural education and the profession. Survey of the roles of the architects and an introduction to curricula and programs designed to prepare students for careers in architecture. Credit/No Credit grading only. 1 lecture. Total credit limited to 3 units.

ARCH 131. Design and Visual Communication 1.1. 4 units

Term Typically Offered: F

Prerequisite: Architecture or Architectural Engineering majors only.

An introduction to the issues, concepts, processes and skills pertaining to two- and three-dimensional design and the freehand, constructed and digital representation and visual communication of ideas, objects and environments. 4 laboratories.

ARCH 132. Design and Visual Communication 1.2. 4 units

Term Typically Offered: W

Prerequisite: ARCH 131.

Continuation of ARCH 131 plus the issues, concepts, processes and skills pertaining to color theory and the design and visual communication of architectural space. 4 laboratories.

ARCH 133. Design and Visual Communication 1.3. 4 units

Term Typically Offered: SP

Prerequisite: ARCH 132.

Continuation of ARCH 131 and ARCH 132 plus the issues, concepts, processes and skills pertaining to the analysis and design of architectural form, space and organizations. 4 laboratories.

ARCH 201. Architecture Design Studio for Non-Majors. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introduction to processes, tools, and methods of drawing and modeling for architectural design. Analysis of architectural case studies to provide an overview of architectural concepts and constructs. Studio experience includes architectural design projects at varying scales. Not open for major credit in Architecture. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ARCH 207. Architectural Technology Fundamentals 2.3. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: ARCH 242. Concurrent: ARCH 253.

Theory and application of climate, energy use and comfort as determinants of architectural form in small-scale buildings. Emphasis on architectural methods of ventilating, cooling, heating, and lighting for envelope-load dominated buildings. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 activities.

ARCH 217. History of World Architecture: Prehistory - Middle Ages. 4 units

Term Typically Offered: F

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Architecture and urbanism in the ancient world, from prehistory to the Middle Ages. Social, cultural and physical conditions that influenced the built environment to the Mediterranean basin, plus Europe, Asia, Africa and Pre-Columbian America. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ARCH 218. History of World Architecture: Middle Ages - 18th Century. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

World architecture and urbanism from the Middle Ages until the end of the 18th century Baroque. Social, cultural and physical conditions which influenced the built environment of Europe, Asia, and the Pre-Columbian and Colonial Americas. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ARCH 219. History of World Architecture: 18th Century - Present. 4 units

Term Typically Offered: SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Architecture and urbanism of the modern world, from the 18th century to the present. Social, cultural and physical conditions influencing the built environment of Europe, Asia, Africa and the Americas. Course may be offered classroom-based or online format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ARCH 241. Architectural Technology Fundamentals 2.1. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: ARCH 133. Corequisite: ARCH 251.

The language, principles and materials of construction with an emphasis on the origin, history, and application of traditional and emergent materials. Field trip required. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 activities.

ARCH 242. Architectural Technology Fundamentals 2.2. 4 units

Term Typically Offered: W

Prerequisite: ARCH 241. Corequisite: ARCH 252.

A continuation of ARCH 241 with an emphasis on the fundamental aspects of construction systems and the basics of construction documentation. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 activities.

ARCH 251. Architectural Design 2.1. 5 units

Term Typically Offered: F

Sustainability Related

Prerequisite: ARCH 133. Corequisite: ARCH 241.

Continuation of ARCH 133 in terms of materiality and the theories, concepts, processes and skills pertaining to the analysis and design of architectural form, space and organizations to communicate intended concepts and meanings. 5 laboratories.

ARCH 252. Architectural Design 2.2. 5 units

Term Typically Offered: W

Sustainability Related

Prerequisite: ARCH 251, ARCH 241. Corequisite: ARCH 242.

Continuation of ARCH 251 plus the theories, concepts, processes and skills pertaining to light, construction and function as determinants that shape the built environment and support the communication of intended concepts and meanings. 5 laboratories.

ARCH 253. Architectural Design 2.3. 5 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: ARCH 252 and ARCH 242. Corequisite: ARCH 207.

Continuation of ARCH 251 and ARCH 252 plus the theories, concepts, processes and skills pertaining to context, structure and climate as determinants that shape the built environment and support the communication of intended concepts and meanings. 5 laboratories.

ARCH 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Directed group study of selected topics. The Class Schedule will list topic selected. Open to first-, second-, third-year students. Total credit limited to 8 units. 1 to 4 lectures.

ARCH 307. Architectural Systems Integration 3.2. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: ARCH 341. Concurrent: ARCH 352.

Continuation of ARCH 341 plus theory and application of climate, energy use and comfort as determinants of architectural form in large-scale buildings. Emphasis on architectural and mechanical methods of ventilating, cooling, heating, lighting, acoustics, and water and waste systems for internal-load dominated buildings. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 discussions.

ARCH 313. Advanced Delineation. 4 units

Term Typically Offered: SP

Prerequisite: ARCH 253.

Development of proficiency in architectural presentation. Projects and critiques. 4 seminars.

ARCH 320. Topics in Architectural History. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following: ARCH 217, ARCH 218, ARCH 219, or ART 112.

In-depth examination of a significant region, movement or period in architectural history, theory and criticism. The material covered will vary depending upon the topic. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ARCH 326. Native American Architecture and Place. 4 units

Term Typically Offered: W
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The role of culture and setting in the construction of spatial, material and landscape concepts and artifacts, through the introduction of selected North American cultures, with focus from 1300 AD through contemporary time. 4 lectures. Crosslisted as ARCH/ES 326. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ARCH 341. Architectural Systems Integration 3.1. 4 units

Term Typically Offered: F
 Sustainability Related
 Prerequisite: ARCH 207 and ARCH 253. Corequisite: ARCH 351.

Continuation of ARCH 207 plus the concepts, methods and processes and building systems that pertain to the detailing and construction of large-scale masonry, steel, concrete and combination structures. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 discussions.

ARCH 342. Architectural Systems Integration 3.3. 4 units

Term Typically Offered: SP
 Sustainability Related
 Prerequisite: ARCH 307. Concurrent: ARCH 353.

Continuation of ARCH 307 plus the concepts, methods, and processes pertaining to the preparation of outline specifications, production of design development drawings, life safety, building systems integration and building envelope and fabrication systems that inform the design and development of large scale buildings. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 discussions.

ARCH 351. Architectural Design 3.1. 5 units

Term Typically Offered: F
 Sustainability Related
 Prerequisite: ARCE 212, ARCH 253, ARCH 207 and PHYS 122 or PHYS 132, or consent of department head. Corequisite: ARCH 341.

Continuation of ARCH 253 plus the development and exploration of architectural theories, building systems, and design concepts and processes involved in creating architecture with an emphasis on implications of the program and space planning issues as building form generator. 1 lecture, 4 laboratories.

ARCH 352. Architectural Design 3.2. 5 units

Term Typically Offered: W
 Sustainability Related
 Prerequisite: ARCH 351, ARCH 341. Corequisite: ARCH 307.

Continuation of ARCH 351 plus the development and exploration of architectural theories, building systems, and design concepts and processes involved in creating sustainable architecture with an emphasis on implications of ecological, environmental and site issues as building form generator. 1 lecture, 4 laboratories.

ARCH 353. Architectural Design 3.3. 5 units

Term Typically Offered: SP
 Sustainability Related
 Prerequisite: ARCH 352, ARCH 307. Corequisite: ARCH 342.

Continuation of ARCH 352 plus the development and exploration of architectural theories, building systems, and design concepts and processes involved in creating large-scale architecture with an emphasis on implications of socio-cultural issues and comprehensive/life safety systems integration as building form generator. 1 lecture, 4 laboratories.

ARCH 363. Off-Campus Orientation Seminar. 2 units

Term Typically Offered: SP
 CR/NC
 Prerequisite: Consent of instructor.

Preparation for off-campus architectural study programs includes cultural orientation, an introduction to basic language skills, travel and housing protocols as well as academic and financial advising. Credit/No Credit grading only. Total credit limited to 4 units, with a maximum of 2 units per quarter. 2 seminars.

ARCH 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F,W,SP,SU
 CR/NC
 Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Credit/No Credit grading only.

ARCH 420. Seminar in Architectural History, Theory and Criticism. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: ARCH 217; ARCH 218; and ARCH 219.

Special topics based on the exploration of specific approaches, periods of time, and cultural or geographic areas. The Class Schedule will list topic selected. Total credit limited to 12 units; repeatable in same term. 4 seminars.

ARCH 443. Issues in Contemporary Professional Practice. 4 units

Term Typically Offered: W
 Prerequisite: ARCH 342, ARCH 353.

An exploration of topics related to the practice of architecture, including financial considerations, client obligations, project and practice management, leadership, legal responsibilities, ethics and professional judgment, community and social responsibility, as well as the process and requirements for internship and licensure. 2 lectures, 2 discussions.

ARCH 445. Urban Design in Architecture. 3 units

Term Typically Offered: TBD
 Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

Analysis of the roles of architects and related professionals in urban areas. Emphasis on design reactions to environmental, economic, and technological conditions. Total credit limited to 12 units. 3 lectures.

ARCH 451. Architectural Design 4.1. 5 units

Term Typically Offered: F
Sustainability Focused
Prerequisite: ARCE 316, ARCH 353, ARCH 342.

Problems of increasing architectural complexity involving the comprehensive integration of architectural theory, design processes, and building systems with emphasis placed on multifunction singular buildings. 5 laboratories.

ARCH 452. Architectural Design 4.2. 5 units

Term Typically Offered: W
Sustainability Focused
Prerequisite: ARCE 316, ARCH 353, ARCH 342.

Problems of increasing architectural complexity involving the comprehensive integration of architectural theory, design processes, and building systems with emphasis placed on multibuilding, multifunctional projects. 5 laboratories.

ARCH 453. Architectural Design 4.3. 5 units

Term Typically Offered: SP
Sustainability Focused
Prerequisite: ARCE 316, ARCH 353, ARCH 342.

Problems of increasing architectural complexity involving the comprehensive integration of architectural theory, design processes, and building systems with emphasis placed on multifunctional projects in an urban context. Total credit limited to 10 units and may substitute for ARCH 451 or ARCH 452. 5 laboratories.

ARCH 460. Computer Applications. 3 units

Term Typically Offered: TBD
Prerequisite: ARCH 133.

Advanced methods in the application of computer graphics and multi-media techniques in architectural design. Total credit limited to 6 units. 2 lectures, 1 activity.

ARCH 461. Advanced Computer-Aided Fabrication in Architecture. 4 units

Term Typically Offered: TBD
Prerequisite: Junior standing.

Applications of computer-aided manufacturing in architectural design with emphasis on subtractive and additive fabrication methods, material assemblies, and advanced techniques in digital design software. 2 lectures, 2 activities.

ARCH 462. Topics in Architectural Practice. 3-4 units

Term Typically Offered: TBD
Prerequisite: ARCH 242.

Selected advanced topics addressing various aspects of Architectural Practice. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units; repeatable in same term. 3 to 4 lectures.

ARCH 469. Topics in Design Methods. 3 units

Term Typically Offered: TBD
Prerequisite: Junior standing and current participation in the Washington Alexandria Architectural Consortium off-campus program.

Relationship of art and architecture addressed to encourage critical debate. Historically, the "art" and the "architecture" were not as polarized as today. Both historical perspective and practical issues concerning collaboration. Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures.

ARCH 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 16 units. 1 to 4 lectures.

ARCH 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ARCH 472. Housing Design Concepts. 3-4 units

Term Typically Offered: TBD
Sustainability Focused
Prerequisite: Third-year standing.

For students preparing for further study or practice relating to housing, urban design and new communities. This course will address design objectives, concepts, and current theories and forms in housing and mixed-use projects. 3-4 lectures.

ARCH 473. Material Innovation Lab. 4 units

Term Typically Offered: TBD
Prerequisite: ARCH 461.

Applied research through the design and fabrication of full-scale building assemblies, using computer-aided manufacturing. Material properties, methods of manufacturing, and building performance. Total credit limited to 12 units. 2 lectures, 2 activities.

ARCH 479. Design Build. 4 units

Term Typically Offered: TBD
Prerequisite: Third-year standing.

Experimental design-build projects derived from real-world architectural problems. Objectives achieved through design, analysis, construction, and team-based production. The Class Schedule will list topic selected. Total credit limited to 12 units. 2 lectures, 2 activities.

ARCH 480. Special Studies in Architecture. 1-12 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Junior standing.

Special issues and problems through research, field trips, design projects, and other forms of investigation and involvement. Course requirements are determined prior to each individual project through a contractual agreement between students and department. The departmental Off Campus Study Guidelines apply except when superseded by guidelines and practices of the London Study Program of the College of Liberal Arts. Total credit limited to 36 units.

ARCH 481. Senior Architectural Design Project. 5 units

Term Typically Offered: F, W, SP
Prerequisite: ARCH 451, ARCH 452 and ARCH 453.

Advanced architectural design and research project. Integration of architectural theory, principles and practice with creative, organizational and technical abilities in architectural design and design research. Total credit limited to 15 units. 5 laboratories.

ARCH 484. Architectural Research. 2-4 units

Term Typically Offered: TBD
Prerequisite: Architecture, Architectural Engineering, City and Regional Planning, Construction Management, and Landscape Architecture majors only; and consent of instructor.

Development of guided architectural research under the direction of faculty. The Class Schedule will list topic selected. Total credit limited to 8 units, repeatable in the same term. 2 to 4 seminars.

ARCH 485. Internship/Cooperative Education Experience. 1-12 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Senior standing.

Part-time or full-time professional work experience in architecture and related fields, usually off-campus. Positions are paid or unpaid. Formal report and evaluation by work supervisor required. 30 hours of work experience per quarter per unit of credit. Total credit limited to 24 units.

ARCH 492. Senior Design Thesis. 3 units

Term Typically Offered: F
Prerequisite: ARCH 451, ARCH 452 and ARCH 453. Concurrent: First quarter of ARCH 481.

Review and research of architectural theory and precedents related to the specific design option. Development of a thesis and a design project proposal. 3 seminars.

ARCH 532. Research Methods in Architecture. 3 units

Term Typically Offered: TBD
Prerequisite: Graduate standing.

Roles of research and analysis in architecture. Approaches to research, hypothesis testing, design process, and systems for design. Use of research findings in various decision-making systems. 3 seminars.

ARCH 551. Architectural Design. 5 units

Term Typically Offered: F, W, SP
Prerequisite: Graduate standing.

Professional initiative and responsibility in integrating architectural design theory and practice with fields influencing the total environment. Building types considered as the coordinating factor. Total credit limited to 15 units with no more than 5 units in any one quarter. 5 laboratories.

ARCH 561. Advanced Design. 3 units

Term Typically Offered: F, W, SP
Prerequisite: Graduate standing.

Continuation of ARCH 551. Advanced studies integrating architectural design theory and practice with fields influencing the shaping of the total environment. Total credit limited to 9 units. 3 laboratories.

ARCH 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ARCH 598. Master's Design Project. 3-6 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of graduate advisor.

Completion of a master project demonstrating in-depth research ability at a graduate level. Total credit limited to 9 units. 3 or 6 laboratories.

Art (ART)

undefined

ART Courses

ART 101. Fundamentals of Drawing. 4 units

Term Typically Offered: F, W, SP
2020-21 or later catalog: GE Area C1
2019-20 or earlier catalog: GE Area C3
Introduction to the artistic practice and cultural value of drawing with emphasis on the practical skills of observation, rendering, and understanding meaning in visual art. Projects encourage growth in technical skill, conceptual innovation, critical thinking, and visual communication. 3 lectures, 1 laboratory. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ART 102. Art and Design Foundation Studies I. 4 units

Term Typically Offered: F
Introduces elements and principles of design, establishing a foundation for all artistic practice. Emphasizing critical thinking and creative problem solving, the interrelationship between form and content are examined. Traditional, digital and lens-based media are explored through individual and collaborative experiences. 3 lectures, 1 laboratory.

ART 104. Art and Design Foundation Studies II. 4 units

Term Typically Offered: SP
Prerequisite: ART 102.

Principles and essential skills for three-dimensional practice in art and design. Understanding, envisioning, and communicating effectively about space, objects, scale, and the relationship of the body to the built environment. 3 lectures, 1 laboratory.

ART 111. Introduction to the Visual Arts. 4 units

Term Typically Offered: F, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introduction to the material techniques and social purposes of painting, graphic arts, sculpture, performance, and architecture across diverse cultures. Builds visual analysis skills and research techniques needed to interpret and talk about the visual arts broadly. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ART 112. Western Art: A Thematic History. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introduction to artistic production, reception, and meaning throughout different eras and contexts of Western civilization. Evaluates the role of art in relation to religion, politics, and commemoration while considering the expressive nature and affective qualities of images and objects. Field trip required. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2021-22 or earlier catalogs).

ART 122. Introduction to Digital Photography. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Fundamental techniques in photography. Mechanics of digital cameras, optics, composition, perception of light and subject content. Understanding photographic principles and the language of camera vision. Introduction to the impact of photography on culture. Digital camera required. 3 lectures, 1 laboratory. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ART 145. Ceramics I. 4 units

Term Typically Offered: SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introduction to artistic practice and cultural value from antiquity to 21st Century. Basic clay working emphasizing design quality, hand building, and potter's wheel. Exercises encouraging growth in technical skill, use of materials for personal expression, conceptual innovation, critical thinking, and visual communication. 3 lectures, 1 laboratory. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ART 148. Beginning Sculpture. 4 units

Term Typically Offered: F, W

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introduction to the challenges, methods, and modalities within the expanding field of contemporary sculpture. Emphasis on understanding the signs of meaning produced in visual art. Exploration of materials, tools, and techniques including found objects, casting, carving, wood, and metal. 3 lectures, 1 laboratory. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ART 182. Foundation in Digital Art I. 4 units

Term Typically Offered: F

Introduction to image creation and manipulation, design, illustration, and layout/composition using digital tools, with an emphasis on visual problem solving and creative expression. 3 lectures, 1 laboratory.

ART 183. Foundation in Digital Art II. 4 units

Term Typically Offered: F, SP

Prerequisite: ART 182.

Development of digital skills in image creation, design, illustration, layout, and simple animation. Emphasis on visual problem solving, creative expression, and narrative. 3 lectures, 1 laboratory.

ART 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ART 201. Intermediate Drawing. 4 units

Term Typically Offered: W, SP

Prerequisite: ART 101 and ART 102 or ART 106.

Development of additional drawing techniques with emphasis on form content, pictorial space, B/W media, color, mixed media and composition. 3 lectures, 1 laboratory.

ART 203. Art Theory and Practice. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ART 101; and ART 102 or ART 106.

Contemporary issues in art and design, linking "ideas" to development of concepts. Emphasis on individual creative process, and problem solving. Focus on contemporary critical thinking regarding aesthetics, techniques, and vocabulary. 3 lectures, 1 laboratory.

ART 209. Beginning Painting. 4 units

Term Typically Offered: F, W

Prerequisite: ART 101.

Introduction to technical and formal problems in painting. Exploration of pictorial space, light, and color from observation. Physical characteristics of paint, various tools, studio methods, and styles of painting. 3 lectures, 1 laboratory.

ART 211. Art Hist - Ancient to Renaissance. 4 units

Term Typically Offered: TBD

Development of art from antiquity to the early stages of the Renaissance in Europe. Particular emphasis on European art with appropriate references to sources from antiquity which have been particularly influential on European painting and sculpture. Comparison of relevant parallel examples of the art of non-European cultures. 4 lectures.

ART 212. Art History - Renaissance through Baroque Eras. 4 units

Term Typically Offered: F, W

The significant visual expressions of Northern and Southern European art of the Renaissance and Baroque period. Relevant parallel examples of the art of antiquity and non-European cultures. 4 lectures.

ART 213. Art History- Modern Art, 1900-1945. 4 units

Term Typically Offered: SP

Examines the development of significant styles and movements in modern art, including Fauvism, German Expressionism, Cubism, Futurism, Neo-Plasticism, Russian and Soviet avant-gardes, Dada, Surrealism, and/or American modernism. Also introduces selected modern developments in graphic design and photography. 4 lectures.

ART 222. Black and White Photography. 4 units

Term Typically Offered: F, SP

Control and understanding of tonal range under available light. Composition, camera based visual communication skills and concept development. Emphasis on 'photographic seeing' and professional quality printing. 2 lectures, 2 laboratories.

ART 224. Introduction to Artificial Lighting for Photography. 4 units

Term Typically Offered: F, W, SP

Introduction to studio lighting and contemporary professional studio photography. Production of professional quality prints using digital camera and printing methods. 3 lectures, 1 laboratory.

ART 227. Portrait Photography. 4 units

Term Typically Offered: TBD

Prerequisite: ART 224.

Studio and environmental portraiture. Emphasis on light ratios/patterns; posing and methods of personality portrayal. 3 lectures, 1 laboratory.

ART 237. Graphic Design I. 4 units

Term Typically Offered: F

Prerequisite: ART 104 and ART 183; Art and Design majors only.

Exploration of the technical and conceptual underpinnings of graphic design. Focus on the design process and how raw ideas are translated into professional work. 3 lectures, 1 laboratory.

ART 238. Typography I. 4 units

Term Typically Offered: W

Prerequisite: ART 104 and ART 183; Art and Design majors only.

Fundamentals of theory, practice, technology and history of typography. Exercises include the study of letterforms, type with image, proportion and grids, hierarchy, and legibility. 3 lectures, 1 laboratory.

ART 260. Critique, Discourse and Practice. 4 units

Term Typically Offered: SP

Prerequisite: ART 101 and ART 104; Art and Design majors only.

Developing an individual body of artwork. Rigorous critiques, lectures, and seminar-style discussions aimed at forming a process for discussing artwork. Art writing, research, and individual conceptual and formal development. 4 lectures.

ART 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ART 288. Interaction Design I. 4 units

Term Typically Offered: SP

Prerequisite: ART 237 and ART 238.

An introduction to concepts, uses and design principles of interactive media. Exploration of methods for planning and implementing interaction design projects. Not open to students with credit in ART 380. 3 lectures, 1 laboratory.

ART 302. Figure Drawing. 4 units

Term Typically Offered: F

Prerequisite: ART 101.

Development of advanced drawing methods and techniques in the study of the human form and structure as it relates to proportion, anatomical analysis, and figure/ground relationships. Understanding materials, techniques, and ideas in the practice of contemporary figure drawing. 3 lectures, 1 laboratory.

ART 309. Intermediate Painting. 4 units

Term Typically Offered: W

Prerequisite: ART 209.

Continued study of technical and formal problems in painting. Emphasis on the creative process, development of individual ideas, and the connection between form and content. Contemporary issues in painting introduced. 3 lectures, 1 laboratory.

ART 310. Art History - American Art. 4 units

Term Typically Offered: SP

Prerequisite: ART 112, ART 211, or ART 212.

Major historical periods of American art from the colonial period to the present. Special emphasis will be given to the broader notion of American art as a process of developing an identity of the varied historical and sociological forces that have shaped images in American art. 4 lectures.

ART 311. Art History - Nineteenth Century Art. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following: ART 111, ART 112, ART 211, or ART 212.

History of painting and sculpture from the French Revolution to the beginning of the 20th century. Focuses on significant movements such as Neo-Classicism, Romanticism, Realism, Impressionism and Post-Impressionism. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ART 313. Design History. 4 units

Term Typically Offered: TBD

Prerequisite: One of the following: ART 112, ART 211, ART 212, or ART 213.

Survey of design from the Victorian era to the present, including major philosophies and movements, political, social, cultural, and technological trends that influenced designers in the 20th century. 4 lectures.

ART 314. History of Photography. 4 units

Term Typically Offered: F, W

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Art and Design major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

In-depth survey of the artistic and cultural achievements in photography from its invention to the present day. Significant photographers, the evolution of aesthetic criteria in the context of other visual arts as well as social/cultural impact. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ART 315. Art History - Art Since 1945. 4 units

Term Typically Offered: W, SP

Prerequisite: ART 112 or ART 211 or ART 212 or ART 213; and Junior standing.

History of visual art from 1945 to the present. Focus on significant movements such as Abstract Expressionism, Pop art, minimalism, conceptual art, earthworks, feminism, and postmodernism. Also focus on new mediums such as performance, video, and installation. 4 lectures.

ART 317. Asian Art Survey. 4 units

Term Typically Offered: TBD

Prerequisite: One of the following: ART 111, ART 112, ART 211, or ART 212.

Survey of the traditional arts of Asia - primarily India, China and Japan. Emphasis on the connections between the visual arts in Asia and the philosophical, social and cultural environments in which they arose. 4 lectures.

ART 318. Asian Art Topics: National, Religious, and Intellectual Movements. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

In-depth examination of significant art movements in Asia. Each topic will focus on the development of art in Asia within the context of a specific geographical or theoretical framework. Details will vary depending on topic. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ART 324. Photographic Expression. 4 units

Term Typically Offered: F

Prerequisite: ART 122 or ART 224. Recommended: ART 222.

Emphasis on personal expression and developing style, introduction to symbology, visual source development and the work of contemporary creative photographers. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 325. Advanced Camera and Lighting Techniques. 4 units

Term Typically Offered: F

Prerequisite: ART 224.

Emphasis on advanced camera and lighting techniques through concept-driven projects. Mastery of multiple photographic and video cameras used in available and artificial lighting situations. 3 lectures, 1 laboratory.

ART 329. Editorial Photography. 4 units

Term Typically Offered: W

Prerequisite: ART 224.

Creating, lighting and executing editorial assignments on location and in studio. Producing photography and video for the needs of editorial and corporate clients, i.e. print and online publications. Emphasis on creating compelling content and working with clients. 3 lectures, 1 laboratory.

ART 330. Book Arts. 4 units

Term Typically Offered: TBD

Numerous traditional book structures and derivations including accordion, pamphlet, stab, and multiple signature construction. Emphasis on both craftsmanship and experimentation. Hands-on experience and a broad historical overview of paper and book arts. 3 lectures, 1 laboratory.

ART 333. Concept Art and Storyboarding. 4 units

Term Typically Offered: F

Prerequisite: ART 182 or CSC 123.

Students develop critical thinking and technical skills to storyboard for animation and interactive immersive projects. Thumbnail sketching, character design, and storyboarding to convey emotions. Students complete an animatic for a short animation, virtual or augmented reality experience. Total credit limited to 8 units. 3 lectures, 1 activity.

ART 334. Illustration I: Techniques and Tools. 4 units

Term Typically Offered: SP

Prerequisite: ART 101.

Introduction to the basic practices of commercial illustration as used in the visual communications industry. Emphasis on the generation of ideas, rendering techniques and tools, and self marketing methods, with an overview of the history of illustration. 3 lectures, 1 laboratory.

ART 337. Graphic Design II. 4 units

Term Typically Offered: F

Prerequisite: ART 237 and ART 238; Art and Design majors only.

Exploration of identity design problems through the use of symbolism and metaphor. Design and implementation of corporate logos. 3 lectures, 1 laboratory.

ART 338. Typography II. 4 units

Term Typically Offered: W

Prerequisite: ART 238; Art and Design majors only.

Exploration of typography in the form of text. Application of different typefaces, composition, layout and page systems for the design of periodicals and books. 3 lectures, 1 laboratory.

ART 345. Ceramics II. 4 units

Term Typically Offered: SP

Prerequisite: ART 104 or ART 107; and ART 145, ART 148, or ART 245.

Studio course in hand, wheel, mold, extruder, jigger, and press forming skills. Design of single and multiple forms and kiln firing procedures. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 348. Intermediate Sculpture. 4 units

Term Typically Offered: W

Prerequisite: ART 104 or ART 107 and ART 148.

Intermediate sculpture course in expressive use of form with modeling, casting, carving, and/or assembly. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 350. Computing for Interactive Arts Capstone I. 2 units

Term Typically Offered: W

Prerequisite: ART 384; CSC/CPE 103 or CSC/CPE 202; and junior standing.

Definition and specification of a team-based creative collaboration on a digital interactive art project (e.g. animation, video game, interactive media display, etc). Research and techniques, project planning and project team organization, prototype creation. 1 lecture, 1 laboratory. Crosslisted as ART/CSC 350.

ART 353. Intermedia / Art. 4 units

Term Typically Offered: SP

Prerequisite: ART 101; ART 102 or ART 106; and ART 148; or Computing for Interactive Arts Minors and ART 182.

Studio course emphasizing individual and collaborative creative exploration with project content derived from student's experience. Focus on using traditional as well as new genres of artistic expression such as site specific installations, video art, book works, and performance art. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 366. Junior Studio Art Practice. 4 units

Term Typically Offered: F

Prerequisite: ART 148, ART 201, ART 260, ART 209 and junior standing.

Critiques, lectures, and seminar-style discussions aimed at establishing a rigorous creative practice. Includes art writing, research, and individual conceptual and formal development. 3 lectures, 1 laboratory.

ART 370. Michelangelo. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Art and Design major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and ART 211, ART 212, or ART 213 for Art and Design majors or completion of GE Area C1 for all other majors (GE Area C3 for students on the 2019-20 or earlier catalogs).

The art and life of Michelangelo (1475-1564), the renowned painter, sculptor, architect, and poet, with reference to early biographies, his artistic development, and the demands of his patrons. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ART 371. Topics in Renaissance Art. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Art and Design major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and ART 211, ART 212, or ART 213 for Art and Design majors or completion of GE Area C1 for all other majors (GE Area C3 for students on the 2019-20 or earlier catalogs).

A thematic analysis of Renaissance Art (1300-1600) with special attention paid to politics, patronage, myth, religion, and the development of new genres and subject matter. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ART 373. New Media Art History. 4 units

Term Typically Offered: SP

Prerequisite: ART 111 or ART 212 or ART 213.

In-depth study of past and contemporary media arts practices. Explores different approaches used by media artists in the 20th and 21st centuries to examine new media and how the lenses of new technologies are used by artists to present knowledge and alter social, cultural and political behaviors. 4 lectures.

ART 375. Intersectional Feminist Art Histories. 4 units

Term Typically Offered: F, SP

USCP

Prerequisite: Junior standing; and one of the following: ART 112, ART 212, ART 213, or WGQS 201.

Intersectional feminist exploration of the role of women, gender, and sexuality in the visual arts and art history. In-depth focus on intersectional feminisms as they impact the study of the visual arts and art history. Not open to students with credit in ART 316. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ART/WGQS 375. Fulfills USCP. Formerly WGS 375.

ART 376. The Art of Mixed Reality. 4 units

Term Typically Offered: W

Prerequisite: ART 182 or CSC 123. Recommended: ART 384.

Conceptual creation of mixed reality (MR) worlds, visual styles, and metaphors. Theory-based view of mixed reality, including design of the experience and exploration of the technical challenges and constraints. Students research and propose their own MR project. 3 lectures, 1 laboratory.

ART 383. Digital Video I. 4 units

Term Typically Offered: F, SP

Prerequisite: ART 122 or ART 224.

Introduction to the use of the DSLR camera as a tool for shooting video and basic digital editing including audio editing. Topics will include scripting, storyboarding, composition, motion, editing, lighting and sound. Emphasis on effective communication and expression. 2 lectures, 2 laboratories.

ART 384. Digital 3D Modeling and Design. 4 units

Term Typically Offered: W
Prerequisite: ART 182.

Development of skills and techniques in the use of three-dimensional design and modeling via digital technology. Capabilities of current software in the design and modeling of three-dimensional form. 2 lectures, 2 activities.

ART 388. Interaction Design II. 4 units

Term Typically Offered: F
Prerequisite: ART 288; or Computing for Interactive Arts minor and ART 182.

Design of original and innovative digital products of interaction design in different media, using user-centered design and usability analysis. Design research methods to engage potential users from the beginning to the end of the design process. 3 lectures, 1 laboratory.

ART 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP
Prerequisite: Senior standing and consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ART 402. Advanced Figure 2D. 4 units

Term Typically Offered: W
Prerequisite: ART 302.

Advanced problems in figure drawing and painting. Advanced methods and techniques in the study of the human form as it relates to technical and conceptual issues. Includes working from direct observation of the figure and the development of individual content and approaches. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 409. Advanced 2-D. 4 units

Term Typically Offered: SP
Prerequisite: ART 201 or ART 309.

Advanced problems in painting and drawing. Emphasis on the creative process from initial concept to the finished work of art. Investigation of traditional, non-traditional and explorative work to encourage development of personal approach. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 427. Advertising Photography. 4 units

Term Typically Offered: W
Prerequisite: ART 325 and senior standing.

Applied principles of design and color to produce a photograph that sells an idea, product, or service. Joint projects with ART 432, Advertising Design. Emphasis on thinking, planning, interpreting, and presenting an idea photographically. 3 lectures, 1 laboratory.

ART 432. Advertising Design. 4 units

Term Typically Offered: TBD
Prerequisite: ART 337 and ART 338 and senior standing or consent of instructor.

Development of print advertising from concept to final presentation. Emphasis on art direction, photo direction and copywriting. For Art and Design majors only. Computer applications are required for appropriate problems. 3 lectures, 1 laboratory.

ART 434. Illustration II. 4 units

Term Typically Offered: F, SP
Prerequisite: ART 209, ART 334, or consent of instructor; for Art and Design majors only.

Advanced development of concepts and illustration techniques and skills, both as analogue and digital, for use in a variety of graphic design applications such as editorial/publication, retail, educational, technical, or advertising purposes. 3 lectures, 1 laboratory.

ART 437. Graphic Design III. 4 units

Term Typically Offered: W
Prerequisite: ART 337 and ART 338; for Art and Design majors only.

Advanced graphic design. The creation of basic 3-D structures, and the application of graphics in 3-D environments (such as package design and signage). Emphasis on integrative communication activity of all elements including: color, graphics, 3-D forms, typography, and constructions, and includes market research. 3 lectures, 1 laboratory.

ART 438. Typography III. 4 units

Term Typically Offered: SP
Prerequisite: ART 338; for Art and Design majors only.

Advanced exploration of communication and structural aspects of typography. Focus on experimentation and expressively using type to enhance meaning. 3 lectures, 1 laboratory.

ART 439. Type in Motion. 4 units

Term Typically Offered: TBD
Prerequisite: ART 438; or Computing for Interactive Arts minor and ART 182.

Sequential organization of typographic information in time and how ideas such as intonation, proximity, pacing, rhythm and progression can influence and shape meaning. Focus on animated typography for a range of applications. 3 lectures, 1 laboratory.

ART 448. Advanced Topics in Sculpture. 4 units

Term Typically Offered: F
Prerequisite: ART 348.

Studio course specializing in three-dimensional form. Materials include clay, plaster, metal, or wood. Course content will be selected from various topics that are representational, abstraction, non-objective, or conceptual. The Class Schedule will list topic selected. Total credit limited to 8 units; may be in same term. 3 lectures, 1 laboratory.

ART 450. Computing for Interactive Arts Capstone II. 2 units

Term Typically Offered: TBD
Prerequisite: ART/CSC 350.

Team-based design, construction and deployment of a collaborative interactive computational art project typically found in the fields of animation, game design, and interactive media. Management of interdisciplinary teams, documentation, creative development, testing, and assessment. 2 activities. Crosslisted as ART/CSC 450.

ART 463. Senior Portfolio Project. 4 units

Term Typically Offered: SP
Prerequisite: Senior standing and ART 260; Art and Design majors only.

Planning, preparation, and physical production of a portfolio of work for entrance into the professional job market or graduate school. 3 lectures, 1 laboratory.

ART 466. Senior Studio Art Practice. 4 units

Term Typically Offered: F

Prerequisite: ART 366 and senior standing.

Builds upon content explored in ART 366. Critiques, lectures, and seminar-style discussions aimed at establishing a rigorous creative practice. Art writing, research, and individual conceptual and formal development. 3 lectures, 1 laboratory.

ART 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ART 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ART 474. Collaborative Studio: Storyboarding, Modeling, Animation and Rendering. 4 units

Term Typically Offered: TBD

Prerequisite: ART 122 or ART 182. Recommended: ART 384.

A collaborative visualization studio focused on designing a story and building a short animation. Modeling and animation software for design conceptualization and expression, materials, lighting and rendering techniques. Collaboration in teams. Total credit limited to 8 units. 3 lectures, 1 laboratory.

ART 483. Digital Video II. 4 units

Term Typically Offered: W

Prerequisite: ART 383.

Advanced practices in digital video. Creation of genre-specific narratives using methods in storyboarding, shooting, editing, and sound design. Advanced methods of storytelling, including documentary video, web-based narratives, and fine art video practices. Creation of quality expressive videos. 2 lectures, 2 laboratories.

ART 484. Animation, Video, and Interactive Design. 4 units

Term Typically Offered: TBD

Prerequisite: ART 122 or ART 182 or ART 224.

Creation of in-depth animations and interactive presentations. Advanced scripting, storyboarding, video production, and interactive communication techniques. 3 lectures, 1 laboratory.

ART 488. Interaction Design III. 4 units

Term Typically Offered: TBD

Prerequisite: ART 388.

Advanced development of complex systems in the interaction design space and an exploration of emerging technologies. 3 lectures, 1 laboratory.

ART 489. Advanced Interactive Media Art. 4 units

Term Typically Offered: TBD

Prerequisite: ART 488.

Advanced topics in the digital media field such as interface design, information architecture techniques, digital typography and interactive storytelling. Survey of new applications of design for the new media, and the development of digital portfolio pieces. 3 lectures, 1 laboratory.

ART 494. Cooperative Education Experience. 6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 12 units. Credit/No Credit grading only.

ART 495. Cooperative Education Experience. 12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 12 units. Credit/No Credit grading only.

Astronomy and Astrophysics (ASTR)

undefined

ASTR Courses

ASTR 101. Introduction to the Solar System. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Descriptive astronomical properties of the Earth, Moon, other planets and their satellites. Comets, asteroids and other members of the Solar System. Theories of the formation of the Solar System. Opportunities for astronomical observations. Intended for non-engineering and non-science majors. Not open to students who have completed or are taking ASTR 301 or ASTR 302. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

ASTR 102. Introduction to Stars and Galaxies. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Descriptive astronomical properties of the Sun, stars, galaxies and interstellar material. Expanding universe and cosmological models. Opportunities for astronomical observations. Not open to students who have completed or are taking ASTR 301, ASTR 302, or PHYS 132. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

ASTR 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ASTR 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ASTR 301. Planetary Systems. 3 units

Term Typically Offered: W

Prerequisite: PHYS 132 or PHYS 122 and MATH 141 or MATH 161.

Quantitative and descriptive properties of planetary systems, including our solar system. Physics of planets and their formation, moons, comets, and interplanetary media. Extrasolar planets and astrobiology. 3 lectures.

ASTR 302. Stars and Galaxies. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 122 or PHYS 132; and MATH 141 or MATH 161.

Quantitative and descriptive properties of stars, galaxies and interstellar material; including stellar structure and evolution, and structure and evolution of galaxies. 3 lectures.

ASTR 324. Longitude, Navigation, and Timekeeping. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Areas B1 through B3; and completion of MATH 119 with a grade of C- or better.

Evolution of navigational science from 1700 to today, covering the 'longitude problem' to the Global Positioning System. Emphasizes relevant concerns with navigation and timekeeping, including celestial navigation, clocks, and the use of technology, mathematics, and science to address societal problems. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ASTR 326. Cosmology. 3 units

Term Typically Offered: F

Prerequisite: PHYS 211 (may be taken concurrently).

Introduction to the basic ideas of modern observational cosmology from the Big Bang to the ultimate fate of the universe. Topics include: special and general relativity, curvature of space, dark matter, dark energy, cosmic microwave background, type Ia supernovae. 3 lectures.

ASTR 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ASTR 404. Research Experience for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of department chair.

Individual investigations, research, studies, or surveys of selected problems. Credit/No Credit grading only. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ASTR 444. Observational Astronomy. 4 units

Term Typically Offered: F

Prerequisite: ASTR 301 or ASTR 302.

Introduction to observational astronomy. Coordinate systems, telescopes and observational instruments (CCDs, filters, spectrographs), observational methods and techniques, data reduction and analysis. Laboratory activities include use of a telescope, CCD camera for data acquisition, data reduction and analysis, and presentation of results. 3 lectures, 1 laboratory.

ASTR 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ASTR 471. Selected Advanced Laboratory. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 2 laboratories.

Biology (BIO)

undefined

BIO Courses

BIO 111. General Biology. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Overview of fundamental concepts in biology and of scientific inquiry. Principles of cellular life and energetics, inheritance and genetic mechanisms, evolution and ecology. Emphasis on the relationship between biology and human affairs. Not open for major credit in Biological Sciences, Microbiology or Marine Sciences. Not open to students who have completed BIO 161. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

BIO 114. Plant Diversity and Ecology. 4 units

Term Typically Offered: W, SP

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Plant diversity and ecology in aquatic and terrestrial plant communities including adaptations of plants to their environment. Identification of common, local native plants and plant communities, uses of native plants by Indigenous People, and human impacts on native plant communities. Field trip required. 2 lectures, 2 laboratories. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

BIO 123. Biology of Sex. 4 units

Term Typically Offered: W, SP

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Fundamental principles of biology related to sexual reproduction:

genetics, physiology, behavior, ecology and evolution of sex in a broad range of organisms. Not open for major credit in Biological Sciences, Microbiology, or Marine Sciences. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area B2.

BIO 150. Diversity and History of Life. 4 units

Term Typically Offered: F, W

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Overview of the history, diversity and genetic relatedness of life on Earth. Broad-scale evolutionary framework of the organization and expansion of life on Earth. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

BIO 161. Introduction to Cell and Molecular Biology. 4 units

Term Typically Offered: F,W,SPSU

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Recommended: CHEM 110 or CHEM 124 or CHEM 127.

Fundamentals of cellular biology with an emphasis on the molecular perspective of life: biomolecules, cellular energetics, cell structure and reproduction, molecular mechanisms of genetics and gene expression. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

BIO 162. Introduction to Organismal Form and Function. 4 units

Term Typically Offered: W, SP

Prerequisite: BIO 161. Recommended: CHEM 110 or CHEM 111 or CHEM 124 or CHEM 127.

Fundamentals of the structure and physiology of tissues and organs of plants and animals: energy acquisition and food distribution, gas exchange and fluid transport, and sensing and responding to the environment. 3 lectures, 1 laboratory.

BIO 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F,W,SPSU

CR/NC

Prerequisite: Consent of department chair.

Individual investigation, research, studies or surveys of selected problems. Intended for lower division students in the Biological Sciences Department. Total credit limited to 12 units, with a maximum of 2 units per quarter. Credit/No Credit grading only.

BIO 202. Orientation to Biotechnology. 2 units

Term Typically Offered: W

Prerequisite: Completion of a course with a BIO, BOT or MCRO prefix and a course with a CHEM prefix.

Introduction to the diversity of fields in biotechnology. Applications in agriculture, nutrition, medicine and environmental problems. 1 lecture, 1 activity. Crosslisted as BIO/CHEM 202.

BIO 211. Biology of Plants and Animals. 4 units

Term Typically Offered: W, SP

Prerequisite: BIO 111; for Liberal Studies majors only. Recommended: STAT 130 or STAT 217.

Plant and animal anatomy, physiology, diversity and life cycles. How plants and animals acquire nutrients, reproduce, and adapt to environments. Emphasis on hands-on activities and model organisms suited for the elementary classroom. 3 lectures, 1 laboratory. Not open for major credit in Biological Sciences, Microbiology, or Marine Sciences.

BIO 213. Life Science for Engineers. 2 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Corequisite: BMED/BRAE 213. Recommended: CHEM 124.

Fundamentals of life sciences: energetics, cell biology, genetics, microbiology, organismal biology, and ecology. Not open for major credit in Biological Sciences, Microbiology, or Marine Sciences. 2 lectures. Fulfills GE B2.

BIO 222. Biodiversity of California. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Recommended: Completion of GE Area A.

Foundations and importance of California's biological diversity from historical and modern contexts. Overview of California's diverse habitats, wildlife and their adaptations. Current challenges to preserving California's biodiversity. Concepts in quantification, conservation and appreciation for California's biodiversity. 4 lectures. Fulfills GE Area B2.

BIO 227. Wildlife Conservation Biology. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area B2
 2019-20 or earlier catalog: GE Area B2
 Sustainability Focused
 Recommended: Completion of GE Area A2.

Wildlife biology and philosophies of conservation. Basic principles of ecology and evolution. Practices applied to wildlife management. Current problems involving people-wildlife interactions with special reference to world biodiversity. Not open for major credit in Biological Sciences, Microbiology, or Marine Sciences. Not open to students with credit in BIO 363. 4 lectures. Fulfills GE Area B2.

BIO 231. Human Anatomy and Physiology I. 5 units

Term Typically Offered: F, W, SP
 Prerequisite: BIO 111 or BIO 161; CHEM 110, CHEM 111, CHEM 124, CHEM 127, or PSC 102.

Structure and function of the skeletal, muscular, nervous, endocrine, and integumentary systems. Molecular, cellular, and organ system levels of organization. Lab includes study of prosected human cadavers. Not intended for Biological Sciences majors. May be taken after BIO 232. 4 lectures, 1 laboratory.

BIO 232. Human Anatomy and Physiology II. 5 units

Term Typically Offered: F,W,SP,SP
 Prerequisite: BIO 111 or BIO 161; CHEM 110, CHEM 111, CHEM 124, CHEM 127, or PSC 102.

Structure and function of the circulatory, immune, respiratory, digestive, urinary, and reproductive systems. Molecular, cellular, and organ system levels of organization. Lab includes study of prosected human cadavers. Not intended for Biological Sciences majors. May be taken before BIO 231. 4 lectures, 1 laboratory.

BIO 253. Health Professions Shadowing. 1 unit

Term Typically Offered: F
 CR/NC
 Prerequisite: Consent of instructor.

Observation in a healthcare setting. Students will shadow healthcare practitioners on campus or in a community setting. Specific placement depend on practitioner availability. Total credit limited to 2 units with a maximum of 1 unit per quarter. Credit/No Credit grading only. 1 activity. Priority to BIO and MCRO majors.

BIO 263. Introductory Ecology and Evolution. 4 units

Term Typically Offered: F, SP
 Prerequisite: BIO 160 or BIO 161.

Basic concepts in ecology and evolution. Relationships among organisms in populations, communities and ecosystems, structures and dynamics of populations, communities and ecosystems, ecosystem inputs and energy flows, nutrient cycling, biogeography, population genetics, evolution, patterns of biodiversity and issues in conservation biology. 3 lectures, 1 laboratory.

BIO 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BIO 300. Research Experience for Undergraduates. 1-2 units

Term Typically Offered: F,W,SP,SP
 CR/NC
 Prerequisite: Consent of instructor. Recommended: STAT 218.

Laboratory, field, or biology education research experience. Development of research skills and techniques. Interested students consult with a faculty member prior to enrolling to clarify expectations and deliverables. Total major credit limited to 6 units, with a maximum of 2 units per quarter. Total credit limited to 12 units. Credit/No Credit grading only.

BIO 301. Service Learning in the Health Professions. 3 units

Term Typically Offered: W
 Prerequisite: BIO 161 or MCRO 221 or MCRO 224; completion of GE Area A with a grade of C- or better; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and consent of instructor.

Framework for understanding the implications of service in different health-related settings through discussion and participation in a local service project. Social determinants of health, cultural competency and unconscious bias, identity/intersectionality, and health needs of different populations. 2 lectures, 1 laboratory.

BIO 302. Human Genetics. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area B
 2019-20 or earlier catalog: GE Area B5, B6, or B7
 Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: ASCI 112, BIO 111, BIO 123, BIO 161, BIO 213, or BOT 121. Recommended: STAT 217, STAT 218, STAT 251, STAT 305, STAT 312, STAT 321, or STAT 350.

Basic principles of human inheritance, including the transmission of genetic traits, chromosomal abnormalities and their effects, gene structure and function, mutations and mutagenic agents, cancer genetics, population genetics, and principles of genetic counseling. Not open for major credit in Biological Sciences, Microbiology, or Marine Sciences. Not open to students with credit in BIO 303 or BIO 351. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

BIO 303. Survey of Genetics. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: BIO 111 or BIO 161 or BOT 121. Recommended: STAT 218.

Principles of heredity and variation. Transmission genetics; molecular mechanisms of inheritance and gene expression. Not open to Biological Sciences, Microbiology, or Marine Sciences majors. Not open to students with credit in BIO 351. Credit will be granted in only one of the following courses: BIO 302 or BIO 303. 4 lectures.

BIO 305. Biology of Cancer. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one BIO or MCRO course in GE Area B2; completion of GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Introduction to the causes, characteristics and treatment of human cancer. Effects of carcinogens and radiation; the genetics of cancer; molecular, cellular and physiological changes in common cancers; conventional chemotherapy and new treatments. Not open for major credit in Biological Sciences, Microbiology, Marine Sciences, or Biochemistry. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

BIO 308. Genetic Engineering Technology. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: CHEM 110, CHEM 124, or CHEM 127.

Introduction to the biology, methodology, and techniques used in genetic engineering. Potential benefits and problems in application within agriculture, nutrition, medicine and environmental context, including the underlying ethical questions. Not open to students with credit in CHEM 373, or to Biological Sciences, Marine Sciences, or Microbiology majors. 4 lectures. Crosslisted as BIO/CHEM 308. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

BIO 321. Mammalogy. 4 units

Term Typically Offered: F, W

Prerequisite: one of the following: BIO 162, BIO 263, NR 306 or ASCI 239.

Ecology, behavior, physiology, functional morphology, and evolution of mammals. Classification and identification of mammals, with emphasis on California species. 2 lectures, 2 laboratories.

BIO 322. Ichthyology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 162.

Phylogeny, anatomy, functional morphology, physiology, and ecology of marine and freshwater fishes. Special reference to local and economically important species. Laboratory emphasis on taxonomy of California species, especially marine groups. Field trip required. 3 lectures, 1 laboratory.

BIO 323. Ornithology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 162 or BIO 263 or BIO 427 or ASCI 239.

Classification and identification of birds, with emphasis on California species. Functional morphology, physiology, ecology, behavior and census methods. Field trips may require meeting in the morning before scheduled lab time. 2 lectures, 2 laboratories.

BIO 324. Herpetology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 160 and BIO 162.

Living and extinct reptiles and amphibians; an adaptive approach to their diversity, biology, and classification. 2 lectures, 2 laboratories.

BIO 327. Wildlife Ecology. 4 units

Term Typically Offered: TBD

Prerequisite: BIO 263 or NR 306. Recommended: STAT 217 or STAT 218.

Principles of ecology as applied to the study of wild vertebrates and their habitats. Emphasis on techniques for collecting and analyzing field data and how these data apply to the study and management of wildlife. Use of the literature, inventory of plants and animal populations, use of maps and databases, quantifying diet and habitat use, determining sex and age and nutritional condition, capture and marking techniques, non-invasive sampling methods. 3 lectures, 1 laboratory.

BIO 329. Vertebrate Field Zoology. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing; BIO 162 or BIO 263 or BIO 427 or ASCI 239.

Identification and natural history of terrestrial vertebrates, with emphasis on field studies and local species. Field trips may require meeting in the morning before scheduled lab time. 2 lectures, 2 laboratories.

BIO 330. Extended Field Biology Activity. 1-3 units

Term Typically Offered: TBD

Corequisite: Enrollment in corresponding field biology course.

Minimum of two days of field instruction in places with significant biological diversity, and an individual or group project. Focus on field notebooks, field identification, survey methods, experimental design, and significant habitat types for various groups of organisms. The Class Schedule will list the topic of the associated field biology course. Total credit limited to 6 units, each associated with a different field biology course, with no more than 4 units applied as advisor approved electives. Field trip required. 1 to 3 activities.

BIO 335. General Entomology. 4 units

Term Typically Offered: F

Prerequisite: BIO 160, BIO 211, or PLSC 313. Recommended: BIO 162.

Introduction to the study of insects. Structure, major orders and families of insects, life histories, medical, and economic importance. Insect collection required. 2 lectures, 2 laboratories.

BIO 336. Invertebrate Zoology. 4 units

Term Typically Offered: W

Prerequisite: BIO 160 and BIO 162.

Invertebrate groups of animals with emphasis on taxonomy, morphology, distribution, and economic importance. 2 lectures, 2 laboratories, and fieldwork.

BIO 351. Principles of Genetics. 5 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 161; CHEM 216, CHEM 312, or CHEM 316.

Recommended: BIO 263; STAT 217 or STAT 218.

Principles of genetics and genetic analysis, including underlying molecular mechanisms. Subjects include gene structure and function, inheritance patterns, regulation of gene expression, mutation, recombination, recombinant DNA technology, and an introduction to population genetics. 5 lectures.

BIO 361. Principles of Animal Physiology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 162; and CHEM 216, CHEM 312 or CHEM 316.

Fundamental principles of animal physiology, including cellular mechanisms and integration to whole animals including humans. Membrane transport, fluid/salt balance, excitable cells, metabolic rate, temperature, gas exchange and circulation. 3 lectures, 1 laboratory.

BIO 363. Principles of Conservation Biology. 4 units

Term Typically Offered: F, W, SP

Sustainability Focused

Prerequisite: BIO 263 or NR 306, or graduate standing in Biological Sciences.

Foundational concepts in the conservation of wild organisms and their habitats. Quantification and valuation of biological diversity, current threats to diversity, and approaches to better understand and address these threats, across terrestrial, freshwater, and marine environments. 4 lectures. Formerly BIO 401.

BIO 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor. Recommended: STAT 218.

Investigation, research, studies, or surveys of biological problems by students working with faculty. Interested students should consult with a faculty member prior to enrolling to clarify expectations and deliverables. Total major credit limited to 6 units, with a maximum of 2 units per quarter. Total credit limited to 12 units.

BIO 405. Developmental Biology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 161, BIO 162, and BIO 303 or BIO 351 or CHEM 373.

Events and mechanisms of embryonic development, including fertilization, morphogenesis, cell differentiation, and organogenesis, with emphasis on differential gene expression in model organisms. 3 lectures, 1 laboratory.

BIO 406. Advanced Anatomy and Physiology: Neuroscience. 4 units

Term Typically Offered: F, W

Prerequisite: BIO 361; CHEM 331 or STAT 218; PHYS 123 or PHYS 133; or graduate standing in Biological Sciences.

Anatomy and physiology of nervous systems, including electrophysiology, molecular and cellular mechanisms of neurotransmission, and interactions between the nervous system and other body systems, including integumentary and digestive, with an emphasis on humans and other vertebrates. Includes human cadaver study. 3 lectures, 1 laboratory.

BIO 407. Advanced Anatomy and Physiology: Endocrinology. 4 units

Term Typically Offered: F, SP, SU

Prerequisite: BIO 361; CHEM 331 or STAT 218; or graduate standing in Biological Sciences.

Anatomy and physiology of the endocrine system and hormones, and interactions with body systems including digestive and reproductive systems, with an emphasis on humans and other vertebrates. Course may be offered in classroom-based or online format. 4 lectures.

BIO 408. Advanced Anatomy and Physiology: Cardiorespiratory and Renal. 4 units

Term Typically Offered: F, W

Prerequisite: BIO 361; CHEM 331 or STAT 218; or graduate standing in Biological Sciences.

Anatomy and physiology of the cardiovascular, respiratory, and renal systems, with an emphasis on humans and other vertebrates. Discussion of health and disease states and responses to exercise and environmental factors. Includes human cadaver study. 3 lectures, 1 laboratory.

BIO 409. Advanced Anatomy and Physiology: Muscle and Locomotion. 4 units

Term Typically Offered: W, SP

Prerequisite: BIO 361; CHEM 331 or STAT 218; PHYS 121 or PHYS 141; or graduate standing in Biological Sciences.

Anatomy and physiology of musculoskeletal systems, including energetics and biomechanics of locomotion. Discussion of invertebrates and vertebrates with emphasis on humans. Includes human cadaver study. 3 lectures, 1 laboratory.

BIO 410. Functional Histology. 4 units

Term Typically Offered: SP

Prerequisite: ASCI 229 or BIO 231 or BIO 232 or BIO 361 or graduate standing in Biological Sciences.

Functional microscopic anatomy of principal tissues and organs of vertebrates, including humans. Structural studies to determine mechanisms underlying physiological processes and their clinical applications in medicine. 2 lectures, 2 laboratories.

BIO 411. Advanced Human Gross Anatomy. 2 units

Term Typically Offered: SU

Prerequisite: One of the following courses with a grade of C- or better: BIO 231, BIO 232, or BIO 361; and consent of instructor.

Human gross anatomy using human cadaver dissection from a regional perspective. Dissection of the musculo-skeletal and nervous tissues, vasculature, and viscera of body regions including: head, neck, torso, extremities, and body cavities. 2 laboratories.

BIO 413. Evolutionary Medicine. 4 units

Term Typically Offered: TBD

Prerequisite: BIO 263; and BIO 303 or BIO 351. Recommended: MCRO 224.

Principles and mechanisms of biological evolution in the context of human health. Microevolutionary and macroevolutionary processes, adaptation, phenotypic plasticity, biogeographic patterns of allele frequencies, tradeoffs. Focus on human health including host-pathogen coevolution, cancer, mental health, obesity, drug metabolism, evolutionary history. 4 lectures. Not open to students with credit in BIO 414.

BIO 414. Evolution. 4 units

Term Typically Offered: FW,SP,SU

Prerequisite: BIO 263; and BIO 303 or BIO 351. Recommended: BIO 327, BOT 326, or MSCI 300.

Principles, theories and mechanisms of biological evolution of plants, animals and microorganisms. Core principles include microevolutionary and macroevolutionary processes, adaptation, phenotypic plasticity, biogeographic patterns of allele frequencies, tradeoffs. Not open to students with credit in BIO 413. 4 lectures.

BIO 415. Biogeography. 4 units

Term Typically Offered: W

Prerequisite: BIO 263 or graduate standing in Biological Sciences.

Plant and animal distribution patterns in terrestrial and aquatic systems in relation to past and present physical and biotic factors. Methods to determine local and global distribution patterns of biota. Role of humans in past, present and future distributions of organisms. 4 lectures.

BIO 416. Climate Change Biology. 4 units

Term Typically Offered: F

Prerequisite: BIO 160; BIO 162; and BIO 263.

Biological consequences of climate change. Effects on cellular and organismal physiology and geographic distribution of organisms. Biodiversity, community and ecosystem impacts. Introduction to atmospheric chemistry, climate dynamics, and consequences for human populations. Possible biological mitigation strategies to reduce CO₂ emissions. Field trip required. 3 lectures, 1 laboratory.

BIO 421. Wetlands. 4 units

Term Typically Offered: TBD

Prerequisite: BOT 121 or BIO 162; CHEM 127; and SS 120 or SS 130. Recommended: one of the following: BIO 327, BOT 313, BOT 326, MSCI 300, NR 304, NR 305, or NR 306.

The formation, characteristics, and functions of wetlands. Genesis of hydric soils. Plant adaptations to saturated soils. Wetlands as wildlife habitat. Policies and social issues associated with wetlands. The procedures of wetland delineations. 3 lectures, 1 laboratory. Crosslisted as BIO/NR/SS 421.

BIO 424. Organizing and Teaching Science. 4 units

Term Typically Offered: TBD

Prerequisite: Admission to the Single Subject Credential Program.

Techniques, aims and objectives in the teaching of physical and life sciences at the secondary level. Selection and organization of teaching material, including strategies for English language learners (ELL) and special needs students. Evaluation of results. 3 lectures, 1 activity. Crosslisted as BIO/PSC 424.

BIO 425. Clinical Experience in Teaching Science Seminar. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Acceptance into the Single Subject Credential Program in Science. Concurrent: EDUC 469 or EDUC 479.

Principles and practices in effective teaching of science at the middle and high school level, learning theories, curriculum content and structure, classroom issues, and the teaching profession. Credit/No Credit grading only. Total credit limited to 4 units. 2 seminars. Crosslisted as BIO/PSC 425.

BIO 426. Immunology. 4 units

Term Typically Offered: W, SP

Prerequisite: BIO 351 or CHEM 373. Recommended: CHEM 313 or CHEM 371.

Principles of molecular and cellular immunology. Emphasis on molecular regulation of immune cell development, including generation of unique receptors, lymphocyte signal transduction and selection, programmed cell death and regulation of immune responses. Discussion and demonstration of roles of immunology in disease and as diagnostic tools. 3 lectures, 1 laboratory.

BIO 427. Wildlife Management. 4 units

Term Typically Offered: F

Prerequisite: One of the following upper-division ecology courses: BIO 327, BIO 363, BIO 401, BIO 444, BOT 326, MSCI 300, or NR 306, or graduate standing in Biological Sciences.

Important habitats, such as riparian, wetlands, and habitat features important to wildlife, such as vegetation types and snags. Basic concepts of wildlife management. Emphasis on planning and designing habitats to meet the needs of wildlife. 3 lectures, 1 laboratory.

BIO 428. Hematology. 4 units

Term Typically Offered: W

Prerequisite: one of the following: BIO 351, BIO 302, BIO 303, CHEM 373, or graduate standing in Biological Sciences. Recommended: BIO 361 or ZOO 332 or BMED 460; and CHEM 313 or CHEM 371.

Development and function of blood as a tissue. Composition, function, and mechanisms of formation and destruction of blood components in health and disease. Methods for examination of blood. 3 lectures, 1 laboratory.

BIO 429. Parasitology. 4 units

Term Typically Offered: F

Prerequisite: BIO 160 and BIO 161; or MCRO 221; or MCRO 224; or graduate standing in Biological Sciences.

External and internal parasites of man and animals. Life history. Parasite-host relationships. Control and recognition of species of clinical importance. 2 lectures, 2 laboratories.

BIO 434. Environmental Physiology. 4 units

Term Typically Offered: F, SP

Sustainability Focused

Prerequisite: BIO 162, or graduate standing in Biological Sciences. Recommended: BIO 263.

Comparative physiological mechanisms involved in the regulation of oxygen uptake, water and ion balance, and temperature regulation in animals. Emphasis is placed on physiological adaptations which maintain or restore homeostasis in animals which are subjected to environmental changes. 3 lectures, 1 laboratory.

BIO 435. Plant Physiology. 4 units

Term Typically Offered: SP

Prerequisite: BOT 121 or BIO 162. Recommended: BIO 161 or BIO 303; CHEM 312 or CHEM 216.

Consideration of the principal physiological and biochemical processes of plants with emphasis on water relations, mineral nutrition, photosynthesis, and the physiology of plant development. 3 lectures, 1 laboratory.

BIO 441. Bioinformatics Applications. 4 units

Term Typically Offered: F, SP

Prerequisite: BIO 302, BIO 303, BIO 351, or CHEM 373.

Introduction to new problems in molecular biology and current computer applications for genetic database analyses. Use of software for: nucleic acid, genome and protein sequence analysis; genetic databases, database tools; industrial applications in bioinformatics; ethical and societal concerns. 3 lectures, 1 laboratory. Crosslisted as BIO/CHEM 441.

BIO 442. Behavioral Ecology. 4 units

Term Typically Offered: F

Prerequisite: BIO 263, or graduate standing in Biological Sciences.

Behavioral adaptations of animals to their environment and way of life. Analysis of behavior patterns, use of patterns in clarifying evolutionary and ecological relationships. 3 lectures, 1 laboratory.

BIO 444. Population Ecology. 4 units

Term Typically Offered: TBD

Prerequisite: BIO 263 or NR 306.

Growth, fluctuations, balance, and natural mechanisms controlling wild populations, and methods for assessing their interconnectedness. Field trip may be required. 3 lectures, 1 laboratory.

BIO 445. Community Ecology. 4 units

Term Typically Offered: W

Prerequisite: BIO 160, BIO 162, BIO 263, and STAT 218; or graduate standing in Biological Sciences. Recommended: BIO 327, BIO 363, BIO 401, BOT 326, or MSCI 300.

Principles of ecology at the community level including the mechanisms that structure ecological communities, and the quantitative methods used to study community ecology such as diversity metrics, community composition analyses, interaction strengths and the application of statistics to field and experimental studies. 3 lectures, 1 laboratory.

BIO 446. Ecosystem Ecology. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: BIO 263, BOT 326, or NR 306; and STAT 218, or Graduate standing in Biological Sciences. Recommended: BIO 327, BIO 363, BIO 401, MSCI 300, SS 120, or SS 121.

Advanced ecosystem ecology and biology, and the interactions of biological communities with the abiotic environment. Emphasis on climate change, ecosystem services, and major fluxes and pools of organic elements. 4 lectures.

BIO 447. Spatial Ecology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 263; GEOG 318 or NR/LA 218; and STAT 218; or graduate standing in Biological Sciences. Recommended: BIO 327, BOT 326, or MSCI 300; and STAT 313 or STAT 513.

Effect of geographical space on distribution and abundance of organisms. Analysis of movement, home ranges, connectivity, range limits, and factors that shape these processes. Survey of available tools and data to answer questions in the discipline. 3 lectures, 1 lab.

BIO 448. Geoecology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 114, BIO 162, BIO 211, or BOT 121; and BIO 227, BIO 263, NR 305, NR 306, or SS 321. Recommended: GEOL 102 or SS 120.

Exploration of the role of landforms and lithology in shaping species and community diversity, and ecological and evolutionary processes. Plant-microbe-soil relations, heavy metal tolerance, conservation of rock outcrop plants and associated biota. Green technologies such as phytoremediation and agromining. Field trip required. 3 lectures, 1 laboratory.

BIO 450. Undergraduate Laboratory Assistantship. 1-4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor and department chair.

Assisting the instructor in teaching and supervising undergraduate laboratories in the Biological Sciences Department. Total credit limited to 8 units, with a maximum of 4 units per quarter. Credit/No Credit grading only.

BIO 452. Cell Biology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 351 or CHEM 373; and CHEM 216, CHEM 312 or CHEM 316. Recommended: CHEM 313 or CHEM 371.

Introduction to cell structure and function, energy conversions, protein sorting, signaling, cytoskeleton, cell adhesion, and the cell cycle. 3 lectures, 1 laboratory.

BIO 461. Senior Project - Research Proposal. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Completion of GWR; STAT 218; and junior standing.

Guided course with group meetings, leading to completion of a written research proposal. Review of scientific literature and analysis of existing experimental results from published peer-reviewed articles in biology. Includes oral presentations. Course may be offered in classroom-based, online, or hybrid format. 2 activities.

BIO 462. Senior Project Research Experience. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Completion of GWR; STAT 218; junior standing; and consent of instructor. Recommended: BIO 400.

Completion of research, data analysis, or other substantial project as a capstone for the major. Student identifies faculty mentor before enrolling to develop project proposal and clarify deliverables. Typically a continuation of BIO 400. Written project report and/or presentation required.

BIO 463. Honors Research. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: BIO 461 or BIO 462; and consent of instructor.

Continuation of research experience leading to completion of advanced research in the biological sciences. Topic selected and conducted in consultation with a faculty mentor. Results presented as a written report and/or oral presentation in a public forum.

BIO 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: F, SP

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BIO 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: F, SU

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topics selected. Total credit limited to 8 units. 1 to 4 laboratories.

BIO 472. Current Topics in Biological Research. 1-4 units

Term Typically Offered: F, SP

Prerequisite: Junior standing.

Applications of biological research topics. Discussions of how selected discoveries in biological research formed the basis for, and were developed into, practical applications, currently accepted theories, generally utilized techniques or decisions affecting society and political policies. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 seminars.

BIO 475. Molecular Biology Laboratory. 3 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 161, and grade of C- or better in BIO 351 or CHEM 373 or consent of instructor.

Introduction to techniques used in molecular biology and biotechnology; DNA extraction, characterization, cloning, Southern blotting, reverse transcription, polymerase chain reaction, and sequencing analysis. 1 lecture, 2 laboratories. Crosslisted as BIO/CHEM 475.

BIO 476. Gene Expression Laboratory. 3 units

Term Typically Offered: SP

Prerequisite: BIO/CHEM 475 with a grade of C- or better or consent of instructor; CHEM 313 or CHEM 371, or graduate standing in Biological Sciences.

Heterologous gene expression of a recombinant protein in a microbial system: gene cloning, construction of expression plasmid, DNA sequence analysis, transformation of microbial host, selection and analysis of transformed host cells, expression and purification of recombinant protein. 1 lecture, 2 laboratories. Crosslisted as BIO/CHEM 476.

BIO 485. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

BIO 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

BIO 500. Individual Study. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing in Biological Sciences and consent of instructor.

Advanced study planned and completed with the approval of and under the direction of a member of the department faculty. A written scholarly presentation of the results of each BIO 500 project must be included in the graduate student's departmental file. Total degree credit limited to 3 units. Total credit limited to 12 units.

BIO 501. Molecular & Cellular Biology. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing in Biological Sciences or consent of instructor.

Principles of molecular and cellular biology including gene function and regulation, energetics, protein trafficking, cytoskeleton, signaling, adhesion, and the cell cycle. 3 lectures, 1 laboratory.

BIO 502. Biology of Organisms. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing in Biological Sciences, or consent of instructor.

Principles of and current topics in organismal biology, with an emphasis on physiology (including organ systems), behavior, and responses to the environment. 3 lectures, 1 laboratory.

BIO 503. Population Biology. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing in Biological Sciences or consent of instructor.

Considerations of theory and practice in population ecology, evolutionary biology, and biosystematics. 3 lectures, 1 laboratory.

BIO 509. Communicating Biology to General Audiences. 1 unit

Term Typically Offered: SP

Prerequisite: Graduate standing.

Key issues for scientists communicating with the general public. Introduction to principles, examination of case studies, and practical application in outreach projects. Intended for graduate students in biology and related disciplines. 1 activity.

BIO 524. Developmental Biology Seminar. 2 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in Biological Sciences or consent of instructor. Recommended: BIO 501.

Principles and selected topics in developmental biology. Issues of differentiation, morphogenesis, and pattern formation; specific topics chosen by participants. 2 seminars.

BIO 534. Principles of Stem Cell Biology. 2 units

Term Typically Offered: F

Prerequisite: Graduate standing in Biological Sciences, Biomedical Engineering, or Agriculture, or consent of instructor. Recommended: BIO 452 or BIO 501.

Principles of stem cell biology including characteristics, types, roles in development, therapeutic uses, historical perspectives and ethical issues. 2 seminars.

BIO 537. Advanced Behavioral Ecology. 2 units

Term Typically Offered: W

Prerequisite: BIO 442 or graduate standing.

Function and evolution of behavioral traits as they relate to ecological phenomena. Behaviors include habitat selection, migration, spacing mechanisms, mating strategies, foraging, aggression, parasitism, altruism, communication, and comparative social systems. Examples from the primary literature. Includes oral presentations. 2 seminars.

BIO 560. Graduate Professional Seminar. 2 units

Term Typically Offered: F

Prerequisite: Graduate standing in Biological Sciences.

Preparation for a successful career in biology within or outside of academia through skills development in professional communication and presentation, the peer-review process, mentorship, scientific ethics. 2 seminar.

BIO 561. Proposal Writing for Biological Research. 3 units

Term Typically Offered: W

Prerequisite: Graduate standing in Biological Sciences or consent of instructor.

Written and oral presentations of a proposal for research in biology including a literature review. 3 seminars.

BIO 562. Data Management and Visualization in Biology. 3 units

Term Typically Offered: F

Prerequisite: STAT 218 and graduate standing in Biological Sciences; or consent of instructor. Recommended: Experience with Excel and R.

Data management and visualization tools for research. Introduction to data management in menu driven applications. Extensive work with data management in code-driven applications. Advanced visualization techniques for data presentation and publication. 3 seminars.

BIO 570. Selected Topics in Biology. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in Biological Sciences or consent of instructor.

Directed group study of selected topics for graduate students. The Class Schedule will list topics for selection. Total credit limited to 12 units. 1 to 4 seminars.

BIO 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

BIO 574. Teaching Strategies for College Biology Laboratories. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: Graduate standing in Biological Sciences.

Concepts of teaching and learning related to instructor performance in college biology laboratory classes. Introduction to teaching strategies, managing a classroom, writing exam questions, and science education research for the laboratory class setting. Credit/No Credit grading only. 1 activity.

BIO 575. College Biology Teaching Practicum. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing; Department Chair and Graduate Coordinator approval required.

Supervised teaching-related activities associated with undergraduate classes in the Biological Sciences Department including assessment, curriculum development, implementing novel teaching approaches. Total credit limited to 2 units. Credit/No Credit grading only.

BIO 583. Research Experience for Regenerative Medicine Students. 2 units

Term Typically Offered: SP

Prerequisite: Graduate standing in the Specialization in Regenerative Medicine for the MS in Biological Sciences; or Specialization in Regenerative Medicine for the MS in Biomedical Engineering; or the Animal Science Specialization for the MS in Agriculture.

Independent research experience in biological or biomedical research. Proposal writing and literature review; experimental design, implementation and troubleshooting; oral and poster presentations. 1 seminar and supervised work. Crosslisted as ASCI/BIO/BMED 583. Formerly ASCI/BIO/BMED 594.

BIO 585. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Graduate standing in Biological Sciences and consent of instructor.

Advanced study, analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 6 units. Credit/No Credit grading only.

BIO 590. Seminar in Biology. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in Biological Sciences or consent of instructor.

Critical evaluation of primary literature on a specific topic in biology. Includes oral and/or written presentation of critiques. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 2 seminars.

BIO 591. Biology Colloquium. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in Biological Sciences.

Recent trends in the field of biology for graduate students in the Biological Sciences master's degree program. Overview of current research with presentations from visiting scholars and Cal Poly faculty. Total credit limited to 4 units. 1 activity.

BIO 593. Regenerative Medicine Internship. 3-5 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in the Specialization in Regenerative Medicine for the MS in Biological Sciences; or the Specialization in Regenerative Medicine for the MS in Biomedical Engineering; or the Specialization in Animal Science for the MS in Agriculture.

Supervised graduate research and/or development in stem cell science or regenerative medicine and engineering. Provides students with an off-campus industrial or university internship. Total credit limited to 10 units. Crosslisted as ASCI/BIO/BMED 593.

BIO 595. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Graduate standing in Biological Sciences and consent of instructor.

Advanced study, analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 12 units. Credit/No Credit grading only.

BIO 599. Thesis. 1-3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing in Biological Sciences and consent of instructor.

Individual research under the general supervision of the faculty, leading to a graduate thesis of suitable quality. Total credit limited to 9 units.

Biomedical Engineering (BMED)

undefined

BMED Courses

BMED 101. Introduction to the Biomedical Engineering Major. 1 unit

Term Typically Offered: F

Prerequisite: Biomedical or General Engineering Freshmen.

Introduction to major topics in Biomedical Engineering. Time management, study skills and class scheduling necessary for academic success. Overview of university services. Professional pathways and ethics. Review of career opportunities. 1 seminar.

BMED 102. Introduction to Biomedical Engineering Analysis. 1 unit

Term Typically Offered: W

Prerequisite: BMED 101.

General introduction to bioengineering analysis applied to representative topics in biomechanics, biofluidics, bioinstrumentation, biomaterials, biotechnology, and related areas. Review of technological needs, testing procedures, governmental regulation, quality of life, and ethical issues. 1 seminar.

BMED 212. Introduction to Biomedical Engineering Design. 3 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 143.

General introduction to bioengineering design, including examples of engineering analysis and design applied to representative topics in biomechanics, bioinstrumentation, biomaterials, biotechnology, and related areas. A review of technological needs, design methodology, testing procedures, statistical analysis, governmental regulations, evaluation of costs and benefits, quality of life, and ethical issues. 2 lectures, 1 laboratory.

BMED 213. Bioengineering Fundamentals. 2 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Sustainability Related

Prerequisite: MATH 142; for engineering students only. Corequisite: BIO 213. Recommended: CHEM 124.

Treatment of the engineering applications of biology. Genetic engineering and the industrial application of microbiology. Systems physiology with engineering applications. Structure and function relationships in biological systems. The impact of life on its environment. Course may be offered in classroom-based or online format. 2 lectures. Crosslisted as BMED/BRAE 213. Fulfills GE B2.

BMED 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BMED 310. Biomedical Engineering Measurement and Analysis. 4 units

Term Typically Offered: F, W

Prerequisite: EE 201; and CPE/CSC 101, CSC 231, CSC 232, or CSC 234.

Fundamentals of biomedical engineering analysis. Use and application of tools and analytical methods used by bioengineers. 3 lectures, 1 laboratory.

BMED 330. Intermediate Biomedical Design. 4 units

Term Typically Offered: W, SP

Prerequisite: MATE 210, ME 328, STAT 312. Recommended: BMED 420, BMED 460.

Design of biomedical devices and systems using various machine elements and components including gears, welded connections, prime movers. Decision modeling based on technical and economic feasibility. 3 lectures, 1 laboratory.

BMED 355. Electrical Engineering Concepts for Biomedical Engineering. 4 units

Term Typically Offered: W

Prerequisite: EE 201, MATH 344.

Introduction to electrical engineering concepts for biomedical engineers. Continuation of basic circuit analysis. Steady state AC circuit analysis and phasor concepts. Application of the Laplace Transform to transient circuit analysis. Introduction to digital logic gates, combinational and sequential logic circuits. 4 lectures.

BMED 400. Special Problems for Advanced Undergraduates. 2-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: ME 212; junior standing; and consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total degree credit limited to 4 units. Total credit limited to 6 units.

BMED 401. Biomedical Entrepreneurship. 4 units

Term Typically Offered: TBD

Prerequisite: Senior standing and engineering major.

Identification and evaluation of commercial opportunities in the healthcare industry. Methods necessary for rapid iteration and market validation of early-stage prototypes, with emphasis on issues critical to biomedical products, including intellectual property, FDA submission, funding sources, and business models. 3 lectures, 1 laboratory.

BMED 404. Applied Finite Element Analysis. 4 units

Term Typically Offered: F, W

Prerequisite: BMED 410, and CE 207 or CE 208; or CE 406; or ME 328.

Finite element based solutions to engineering problems with an emphasis on elastostatic problems in structural mechanics. The power and pitfalls associated with the finite element method highlighted through practical modeling assignments. Introduces the use of commercial finite element codes. 3 lectures, 1 laboratory. Crosslisted as BMED/CE/ME 404.

BMED 409. Interdisciplinary Study in Biomechanics. 4 units

Term Typically Offered: SP

Prerequisite: BMED 410 and CE 207 or CE 208; or KINE 403; or ME 326.

Examination of human motion biomechanics. Experimental and analytical methods in motion analysis based on rigid body dynamics. Protocols for protection of human subjects in research. Hypothesis-driven research in interdisciplinary teams, including written proposal development and written/oral communication of results to a scientific audience. 1 lecture, 3 activities. Crosslisted as BMED/KINE/ME 409.

BMED 410. Biomechanics. 4 units

Term Typically Offered: W, SP

Prerequisite: CE 204 or CE 208; and ME 212. Corequisite: BMED 310.

Introduction to physiological systems, with emphasis on structure and function of major tissues and organs. Application of mechanics to understand the behavior of these tissues and organs at gross and microscopic levels. Bioelastic solids. Rigid body biomechanics. Biofluids, basic mechanical properties of collagen and elastin, bone, cartilage, muscles, blood vessels, and other living tissues. Application of continuum mechanics to hard and soft tissues. Biomechanical engineering design for clinical applications. 3 lectures, 1 laboratory.

BMED 420. Principles of Biomaterials Design. 4 units

Term Typically Offered: F, SP

Prerequisite: CE 204 or CE 208; and MATE 210. Corequisite: BMED 310.

Fundamentals of materials science as applied to bioengineering design. Biocompatibility of materials. Materials characterization and design. Natural and synthetic polymeric materials. Wound repair, foreign body response, blood clotting. Transplantation biology, artificial organs, and tissue engineering. Medical devices, government regulations, and ethical issues. 3 lectures, 1 laboratory.

BMED 422. Medical Device Evaluation and the FDA Approval Process. 4 units

Term Typically Offered: W, SP

Prerequisite: BMED 420.

Overview of the path to market for new medical devices, including nonclinical and clinical evaluation and the regulatory process. Course covers bench, in vitro, and in vivo models, GLP studies, clinical trials, Quality Systems, and FDA clearance and approval processes. 4 lectures.

BMED 425. Biomedical Engineering Transport. 4 units

Term Typically Offered: F, SP

Prerequisite: ME 302 and ME 341.

Physiological fluid mechanics, convective mass transfer, and diffusion in tissue. Properties of blood. Exchange of fluids between capillary beds and tissue. Coupled diffusion and convection. Application of mass transfer coefficients. Rates of diffusion in various physiologic media. 3 lectures, 1 laboratory.

BMED 430. Biomedical Modeling and Simulation. 2 units

Term Typically Offered: F, W

Prerequisite: BMED 310.

Computational methods for anatomical modeling and boundary value problems in the biomechanics of tissues and biomedical devices. Nonlinear biodynamics, heat flow, cardiac impulse propagation, anatomic modeling, and biomechanics. Course may be offered in classroom-based or online format. 1 lecture, 1 laboratory.

BMED 432. Micro/Nano System Design. 4 units

Term Typically Offered: F

Prerequisite: BMED 212 or MATE 210.

Fundamentals of designing micro/nano scale systems employing sensors, actuators and intelligent controls. Explore mechanics, electronics, heat transfer, photonics, fluid mechanics and biometrics at the micrometer and nanometer scale. Discover how scaling impacts design criteria. Investigate the integration of science and engineering and evaluate applications in living systems. Not open to students with credit in MATE 550. 4 lectures.

BMED 434. Micro/Nano Fabrication. 3 units

Term Typically Offered: W

Prerequisite: BMED 212 or MATE 210.

Fabrication science and technology for creating micro and nano scale devices. Explore basic processes such as oxidation, diffusion, ion implantation, etching, chemical and physical vapor deposition, photolithography. Develop an understanding of the science of each process and how to select the right steps for fabricating electronic, photon and micro-electro-mechanical systems devices. 3 lectures. Crosslisted as BMED 434/EE 423/MATE 430.

BMED 435. Microfabrication Laboratory. 1 unit

Term Typically Offered: W

Corequisite: BMED 434/EE 423/MATE 430.

Application of basic processes involved in microfabrication: cleanroom protocol, oxidation, diffusion, photolithography etching and sputtering. Explore process development through fabrication of electronic, photonic or microfluidic devices. Each student will be part of a team that will fabricate and test a device. 1 laboratory. Crosslisted as BMED 435/EE 473/MATE 435.

BMED 436. Characterization of Micro/Nano Scale Structures. 4 units

Term Typically Offered: TBD

Prerequisite: BMED 212 or MATE 210.

Fundamentals of material's surface analysis techniques for exploring structure and composition of micro/nano scale features and films will be assessed. Students will develop data analytics for deciding which technique to apply for morphological, elemental or chemical composition analysis. 4 lectures.

BMED 440. Bioelectronics and Instrumentation. 4 units

Term Typically Offered: F, W

Prerequisite: BMED 310 and EE 201.

Analog and digital circuits in bioinstrumentation. Biomedical signals in continuous and discrete systems. Sampling and digital signal processing. Ultrasound, MRI, CT, Bioelectromagnetics. Electrokinetics. Biophysical phenomena, transducers, and electronics as related to the design of biomedical instrumentation. Potentiometric and amperometric signals and amplifiers. Biopotentials, membrane potentials, chemical sensors. Mechanical transducers for displacement, force and pressure. Temperature sensors. Flow sensors. Light-based instrumentation. Electrical safety. 3 lectures, 1 laboratory.

BMED 445. Biopotential Instrumentation. 4 units

Term Typically Offered: SP

Prerequisite: BMED 440.

Focus on the principles associated with instrumentation used to detect surface biopotentials. Emphasis on circuit level design and laboratory implementation of systems used to detect ECG, EMG and EEG signals. Development of practical experience with analog electronic instrumentation used in the design and testing process. A system level design project related to surface biopotential detection and recording. 2 lectures, 2 laboratories.

BMED 450. Contemporary Issues in Biomedical Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing in Biomedical Engineering.

Current and evolving topics in biomedical engineering, including medical and industrial applications. Exploration of contemporary issues in biomedical engineering, including technical and societal implications. The Class Schedule will list topic selected. Total credit limited to 16 units. Course may be offered in classroom-based or online format. 4 lectures.

BMED 455. Biomedical Engineering Design I. 4 units

Term Typically Offered: F, W

Prerequisite: BMED 410.

Engineering design methodology, design process, project planning, decision making, modeling, construction, and testing of an open-ended design project. Preparation of formal engineering reports. Statistical analysis. Governmental regulations. Bioethical issues. 2 lectures, 2 laboratories.

BMED 456. Biomedical Engineering Design II: Senior Project. 4 units

Term Typically Offered: W, SP

Prerequisite: BMED 455.

Engineering design methodology, design process, project planning, decision making, modeling, construction, and testing of an open-ended design project. Preparation of formal engineering reports. Statistical analysis. Governmental regulations. Bioethical issues. 2 lectures, 2 laboratories.

BMED 459. Senior Thesis. 4 units

Term Typically Offered: F,W,SPSU

Prerequisite: senior standing, and consent of instructor.

Selection and completion of senior thesis under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Thesis results presented in a formal report. Minimum commitment of 120 hours.

BMED 460. Engineering Physiology. 4 units

Term Typically Offered: F, W

Prerequisite: BMED 310 and either BIO 231 or BIO 232; or graduate standing.

Physiology for biomedical engineering students, with an emphasis on control mechanisms and engineering principles. Engineering aspects of basic cell functions; biological control systems; muscle; neural; endocrine, and circulatory systems, digestive, respiratory, renal, and reproductive systems; regulation of metabolism, and defense mechanisms. 3 lectures, 1 laboratory.

BMED 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BMED 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

BMED 495. Cooperative Education Experience. 1-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A fully developed formal report and evaluation by work supervisor is required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

BMED 500. Individual Study. 2-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of department chair.

Individual investigation, research, studies or surveys of selected problems. Advanced study planned and completed under the direction of faculty. Open to graduate students who have demonstrated the ability to do independent work. Total credit limited to 8 units.

BMED 505. Biomedical Signal Transduction and Data Acquisition. 4 units

Term Typically Offered: SP

Prerequisite: BMED 440.

Bridging the physical gap between biological and digital systems. Physics of chemical, mechanical, electrical, thermal, and optical sensors relevant to biomedical engineering. Evaluation of transducer performance and system design. Includes realization of a transducer system relevant to graduate projects. 3 lectures, 1 laboratory.

BMED 510. Principles of Tissue Engineering. 4 units

Term Typically Offered: F

Prerequisite: one of the following: ASCI 438, BIO 361, or BMED 460; or graduate standing.

Exploration of areas including cell source and isolation, scaffold selection and modification, tissue cultivation and bioreactor design, and patient implantation. Applications of tissue engineering for creating skin, cartilage, blood vessels, and other tissues. 3 lectures, 1 laboratory.

BMED 512. Biomedical Engineering Horizons. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing, MATH 143, CHEM 125, PHYS 131 or PHYS 141, BIO 161 or consent of instructor.

Examination of the advances in nanotechnology, micro-electro-mechanical systems, materials and clinical technology. Relationship between modern medical achievements and advances in engineering and science, the biomedical engineering industry, and the use of technology in a human context. 4 lectures.

BMED 515. Introduction to Biomedical Imaging. 4 units

Term Typically Offered: W

Prerequisite: PHYS 132, MATH 244, and graduate standing.

Fundamental principles and applications of biomedical imaging, modalities in medicine. Topics focus on optical imaging techniques, such as brightfield, fluorescence, confocal, multiphoton, DIC, OCT, SEM, and other advanced microscopy techniques. 2 lectures, 2 laboratories.

BMED 520. Modeling of Biomedical Systems. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing.

Analytic and computational representation of biomedical systems with applications in physiology and medicine. Emphasis on biomedical engineering systems, applications, and system modeling including the use of modern tools. Serves as a foundation for biomedical engineering graduate electives and research projects. 4 lectures.

BMED 525. Skeletal Tissue Mechanics. 4 units

Term Typically Offered: F

Prerequisite: CE 204 or CE 208; and BMED 460.

Overview of the mechanical properties of various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structures, and the changes in these properties caused by aging, disease, overuse, and disuse. Tissues covered include bone, cartilage and synovial fluid, ligament, and tendon. 4 lectures.

BMED 530. Biomaterials. 4 units

Term Typically Offered: F

Prerequisite: BIO 161, or BIO 213 and BMED/BRAE 213; MATE 210 and graduate standing or consent of instructor.

Structure-function relationships for materials in contact with biological systems. Interactions of materials implanted in the body. Histological and hematological considerations including foreign body responses, inflammation, carcinogenicity, thrombosis, hemolysis, immunogenic and toxic properties. Microbial interaction with material surfaces, degradation. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as BMED/MATE 530.

BMED 535. Bioseparations and Clinical Diagnostics. 4 units

Term Typically Offered: W

Prerequisite: BMED 425, ME 341 or consent of instructor.

Physicochemical hydrodynamics and microfluidic bioseparations, which includes electrokinetics, colloid science and suspension mechanics in the context of Clinical Diagnostic Systems. Understanding key separation design parameters through a course project, theoretical and numerical models. 4 lectures.

BMED 541. Microcirculation. 3 units

Term Typically Offered: TBD

Prerequisite: BMED 460.

Topic groups include microvessel wall structure, network architecture, flow regulation, transport, inflammation, angiogenesis, arteriogenesis, and rarefaction. Additional focus on patho-physiology and the engineering approaches to assess and treat microvascular dysfunction. Not open to students with credit in BMED 540. 3 lectures.

BMED 542. Microcirculation Laboratory. 1 unit

Term Typically Offered: TBD

Prerequisite: BMED 460.

Laboratory procedures include direct visualization of microvessels by microscopy and indirect assessment by skin temperature, evaluation of microvascular networks by casting and immunostaining, and assessment of vascular wall structure by histology. 1 laboratory.

BMED 550. Current and Evolving Topics in Biomedical Engineering. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in Biomedical Engineering or consent of department chair.

Current topics in biomedical engineering, including medical and industrial applications. Exploration of detailed technical treatment of contemporary issues in biomedical engineering, and examination of technical and societal implications of these subjects. Class Schedule will list topics selected. Total credit limited to 12 units. 4 lectures.

BMED 555. Neural Systems Simulation and Modeling. 4 units

Term Typically Offered: SP

Prerequisite: MATH 244, BMED 440.

The biophysical basis of the Hodgkin-Huxley active membrane model. A detailed description of the dynamics of voltage gated ion channels. The complete Hodgkin-Huxley active membrane model, with an emphasis on its use in simulating the electrical activity of nerve cells. Equivalent circuit/ circuit simulator based approaches to modeling Hodgkin-Huxley neurons. 4 lectures.

BMED 560. Cell Transplantation and Biotherapeutics. 2 units

Term Typically Offered: SP

Prerequisite: ASCI 438, BIO 361, or BMED 460.

Topics include the etiology, patho-physiology, and rodent models for various forms of disease, such as inflammatory, autoimmune, and monogenic diseases, as well as nucleic acid, protein, and cellular-based therapies for these conditions. Not open to students with credit in BMED 545. 2 lectures.

BMED 561. Cell Transplantation and Biotherapeutics Laboratory. 2 units

Term Typically Offered: SP

Prerequisite: ASCI 438, BIO 361, or BMED 460; and STAT 218 or STAT 312. Corequisite: BMED 560.

Procedures include rodent handling, anesthesia, surgically modeling disease, biotherapy delivery, and visualizing/measuring therapeutic efficacy. Additional focus on experimental design, data collection, and analysis. 2 laboratories.

BMED 563. Biomedical Engineering Graduate Seminar. 2 units

Term Typically Offered: W, SP

Prerequisite: Graduate standing or consent of instructor.

Selected topics of interest to biomedical engineering and other graduate students. Open to graduate students and selected seniors. A forum to share information about research and research tools; an opportunity to discuss topics of interest with professionals in the field, academics, and other graduate students. The Class Schedule will list topic selected. Total credit limited to 4 units. 1 seminar, 1 laboratory.

BMED 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BMED 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

BMED 583. Research Experience for Regenerative Medicine Students. 2 units

Term Typically Offered: SP

Prerequisite: Graduate standing in the Specialization in Regenerative Medicine for the MS in Biological Sciences; or Specialization in Regenerative Medicine for the MS in Biomedical Engineering; or the Animal Science Specialization for the MS in Agriculture.

Independent research experience in biological or biomedical research. Proposal writing and literature review; experimental design, implementation and troubleshooting; oral and poster presentations. 1 seminar and supervised work. Crosslisted as ASCI/BIO/BMED 583. Formerly ASCI/BIO/BMED 594.

BMED 591. Thesis Project Design Laboratory I. 2 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Selection and completion of project by individuals or team which is typical of problems graduates must solve in their fields of employment or applied research. Project may involve, but is not limited to, physical modeling and testing of integrated design projects, costs, planning, scheduling and research and may involve students from several disciplines. Formulation of outline, literature, review and project schedule. 2 laboratories.

BMED 592. Thesis Project Design Laboratory II. 2 units

Term Typically Offered: SP

Prerequisite: BMED 591 or consent of instructor.

Continuation of BMED 591. Completion of project by individuals or team which is typical of problems graduates must solve in their fields of employment or applied research. Project may involve, but is not limited to, physical modeling and testing of integrated design projects, costs, planning, scheduling and research. Formulation of outline, literature review, and project schedule. 2 laboratories.

BMED 593. Regenerative Medicine Internship. 3-5 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in the Specialization in Regenerative Medicine for the MS in Biological Sciences; or the Specialization in Regenerative Medicine for the MS in Biomedical Engineering; or the Specialization in Animal Science for the MS in Agriculture.

Supervised graduate research and/or development in stem cell science or regenerative medicine and engineering. Provides students with an off-campus industrial or university internship. Total credit limited to 10 units. Crosslisted as ASCI/BIO/BMED 593.

BMED 599. Design Project (Thesis). 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing.

Selection by individual or group, with faculty guidance and approval, of topic for independent research or investigation resulting in a thesis or project to be used to satisfy the degree requirement. An appropriate experimental or analytical thesis or project may be accepted. Total credit limited to 9 units.

BioResource and Agricultural Engineering (BRAE)

undefined

BRAE Courses

BRAE 121. Agricultural Mechanics. 2 units

Term Typically Offered: F, W

Identification and use of tools and materials; shop safety; tool sharpening and care; concrete mixes and materials; simple electric wiring; metal work; pipe fitting; basic woodworking; estimating quantities and costs. Students are required to meet safety regulations in laboratory work. 1 lecture, 1 laboratory.

BRAE 128. Careers in Bioresource and Agricultural Engineering. 2 units

Term Typically Offered: F

Introduction to careers associated with BioResource and Agricultural Engineering, and Agricultural Systems Management. Professional engineering registration process. Engineering problem solution and report format. Design procedures. Engineering fundamentals. Laboratory includes visits to facilities relating to career opportunities. 1 lecture, 1 laboratory.

BRAE 129. Laboratory Skills and Safety. 1 unit

Term Typically Offered: F, W

Prerequisite: BRAE and ASM majors only.

Introduction to fabrication and construction materials used in the field of Agricultural Engineering. Fabrication skills in the development of wood, metal, concrete projects, and creative design. Strength tests of wood, fasteners, concrete, and student design projects. 1 laboratory.

BRAE 141. Agricultural Machinery Safety. 3 units

Term Typically Offered: F, SP

Evaluation of safe tractor and equipment operation. Supervised field operation emphasizing the safe and efficient performance of modern farm and utility-industrial equipment. 2 lectures, 1 laboratory.

BRAE 142. Agricultural Power and Machinery Management. 4 units

Term Typically Offered: F

Prerequisite: MATH 116 or equivalent.

Evaluation of agricultural machinery and tractor power performance. Equipment studied includes primary and secondary tillage tools, grain drills, row crop planters, sprayers, grain and forage harvesters, and specialty crop harvesters. Emphasis on management, selection, cost analysis using computers and efficient operation of agricultural machinery. 3 lectures, 1 laboratory.

BRAE 150. Design Graphics and CAD for Agricultural Engineering. 2 units

Term Typically Offered: F, W

Visual communication in engineering design and problem solving. Principles of freehand sketching, and computer-aided-drafting. Computer aided drafting using CAD software. 2-D projections including automatic dimensioning and hatching. Plan set development and external references. Land grading design, using 3-D drawing software. Not open to students with credit in BRAE 133 and BRAE 151. 2 laboratories.

BRAE 152. 3-D Solids Modeling. 1 unit

Term Typically Offered: W, SP

Prerequisite: BRAE 133 and BRAE 151; or BRAE 150.

Introduction to 3-dimensional solids modeling using state-of-the-art software. Model generation and modification of associative properties, assembly modeling, extrusions and revolutions. 1 laboratory.

BRAE 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

BRAE 203. Agricultural Systems Analysis. 4 units

Term Typically Offered: W

Prerequisite: MATH 118 or equivalent.

Agricultural Systems Analysis investigates the interrelationships between sub-components in an overall system. Problem solving algorithms, network analysis, project planning techniques, and optimization. 2 lectures, 2 activities.

BRAE 213. Bioengineering Fundamentals. 2 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Sustainability Related

Prerequisite: MATH 142; for engineering students only. Corequisite: BIO 213. Recommended: CHEM 124.

Treatment of the engineering applications of biology. Genetic engineering and the industrial application of microbiology. Systems physiology with engineering applications. Structure and function relationships in biological systems. The impact of life on its environment. Course may be offered in classroom-based or online format. 2 lectures. Crosslisted as BMED/BRAE 213. Fulfills GE B2.

BRAE 216. Fundamentals of Electricity. 4 units

Term Typically Offered: F

Prerequisite: BRAE 129; MATH 142; and PHYS 131 or PHYS 141.

Application of electricity in BioResource and Agricultural Engineering, including basic electric circuits. Will include wiring materials, code regulations, electrical measurements, R-L-C circuit fundamentals, system planning, motors, basic electronics, and an introduction to computer usage. 3 lectures, 1 laboratory.

BRAE 220. Introduction to Biological Systems. 4 units

Term Typically Offered: F, W

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Prerequisite: MATH 141 or MATH 161. Recommended. Corequisite: CHEM 124 or CHEM 127.

Systems approach to introductory life science that focuses on patterns and cycles in biology. Introductory modeling and quantitative measurement of life science parameters. Emphasis on the interaction between organisms and their environment. Course may be offered in classroom-based or hybrid format. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

BRAE 232. Agricultural Structures Planning. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 129; BRAE 150 or BRAE 151; and PHYS 132.

Planning of facilities required in production systems. Materials and processes used in construction of agricultural structures. Environmental factors affecting crop storage structures and animal housing. Design of structural environments to meet the needs of commodities, animals, and plants. 3 lectures, 1 laboratory.

BRAE 234. Introduction to Mechanical Systems in Agriculture. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 152; and PHYS 131 or PHYS 141.

Introduction to elements used in the mechanical transmission of power and force in agricultural systems. Power transmission using v-belts, roller chain, gear and shaft drives, hydraulic actuators. Linear and nonlinear actuation devices including linkages, cams, and hydraulic/pneumatic cylinders. 3 lectures, 1 laboratory.

BRAE 236. Principles of Irrigation. 4 units

Term Typically Offered: F

Prerequisite: MATH 141.

Land grading design, operation, management, and evaluation of irrigation methods. 3 lectures, 1 laboratory.

BRAE 237. Introduction to Engineering Surveying. 2 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 119.

Introduction to field measurement using automatic levels, total stations, robotic stations, GNSS RTK receivers and field data collectors. Field procedures for differential and profile leveling, directional measurement, traversing and construction surveying. An understanding in direction, elevation and earthwork volume computations. 1 lecture, 1 laboratory.

BRAE 239. Engineering Surveying. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 119.

Field measurement using levels, robotic stations, RTK receivers, data collectors. Leveling, profiles, traverses, traverse adjustment, triangulation, earthwork volumes and curve alignment computations. Topographic surveys, topographic mapping, building layout, road design. Topics as geodetic survey, licensing, aerial mapping, GIS, and remote sensing. 2 lectures, 2 laboratories.

BRAE 240. Agricultural Engineering Laboratory. 1 unit

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Individual projects. Total credit limited to 4 units. 1 laboratory.

BRAE 244. Precision Farming. 4 units

Term Typically Offered: W

Prerequisite: One of the following: PLSC 133, PLSC 190, PLSC 260, BRAE 237, or BRAE 239.

Precision agriculture applications. Integrating GIS, GPS, and remote sensing technologies with site-specific farming practices to optimize agricultural productivity. Field trip required. 3 lectures, 1 laboratory. Crosslisted as BRAE/PLSC 244.

BRAE 247. Forest Surveying. 2 units

Term Typically Offered: TBD

Prerequisite: NR 215.

Use and care of tapes, staff compass, abney levels, total stations, and GPS receivers. Keeping field notes, measurements by tape. Closed and open traverse by compass and total stations. Turning angles and determining directions of lines. Map reading and public land description. GPS measurements. Weekend field trips required. 1 lecture, 1 laboratory. Crosslisted as BRAE/NR 247.

BRAE 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BRAE 301. Hydraulic and Mechanical Power Systems. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 152; and PHYS 121 or PHYS 141.

Selection, application and use of hydraulic components and mechanical power transmission equipment. Use of standardized circuit design procedures. 3 lectures, 1 laboratory.

BRAE 302. Servo Hydraulics. 4 units

Term Typically Offered: W

Prerequisite: BRAE 216 or BRAE 324 and BRAE 234 or BRAE 301.

Application of microcomputers and programmable logic controllers to hydraulic, pneumatic and mechanical systems. Theory, instrumentation and sensors used in process and control systems used in agricultural equipment. 3 lectures, 1 laboratory.

BRAE 312. Hydraulics. 4 units

Term Typically Offered: F

Prerequisite: PHYS 132, ME 211.

Static and dynamic characteristics of liquids, flow in open and closed channels, uniform and nonuniform flow, flow measurement, pumps. 3 lectures, 1 laboratory.

BRAE 317. Agricultural Systems Management Theory. 4 units

Term Typically Offered: W
Prerequisite: BRAE 203.

Introduction to systems and technical management with application in agricultural business settings, including logistics, reliability, system behavior, causal loops, feedback and delay. Data analysis, systematic decision-making, and simulation. Field trip required. 4 lectures.

BRAE 320. Principles of Bioresource Engineering. 4 units

Term Typically Offered: SP
Prerequisite: BRAE 232; BRAE 236; CHEM 125; and PHYS 132.

Theory and applications of bioprocess technology in biological and agricultural systems. Engineering properties of biological materials and organisms. Basic unit operations, fluid mechanics and heat/mass transfer as applied to bioprocess technology. Special requirements of agricultural and biological processes. 3 lectures, 1 laboratory.

BRAE 321. Agricultural Safety. 3 units

Term Typically Offered: W
Prerequisite: Junior standing.

Principles of agricultural safety. Accident causation and prevention, hazard identification and abatement, laws and regulations. Machinery, electrical, chemical, livestock, shop and fire safety. Safety program development. 2 lectures, 1 activity.

BRAE 324. Principles of Agricultural Electrification. 4 units

Term Typically Offered: W
Prerequisite: MATH 119, PHYS 121.

Applications of DC/AC electricity in agriculture. National Electric Code regulations. The wiring of agricultural structures and electrical distribution. Series, parallel and series-parallel circuits, R-L-C circuits, electric motors, electronics. 3 lectures, 1 laboratory.

BRAE 328. Measurements and Computer Interfacing. 4 units

Term Typically Offered: W
Prerequisite: EE 321; EE 361; and CSC 231 or CSC 232 or CSC 234.

Transducers and engineering measurements in agricultural engineering. Covering transducer characteristics, signal processors and controllers, instrumentation techniques, and the use of the computer in the measurement and control of typical engineering problems. 3 lectures, 1 laboratory.

BRAE 331. Irrigation Theory. 3 units

Term Typically Offered: W
Prerequisite: BRAE 236 or BRAE 340; MATH 141.

Plant-water-soil relations examining evapotranspiration, plant stress, soil moisture depletion, irrigation frequency and depth, salinity management, infiltration, drainage and climate control. 3 lectures.

BRAE 332. Environmental Controls for Agricultural Structures. 4 units

Term Typically Offered: SP
Prerequisite: BRAE 232.

Design of internal environments to meet the needs of commodities, animals, and plants. Thermodynamic and psychrometric principles for agricultural structures. Heat transfer, insulation and refrigeration. Sensing, monitoring and controlling environmental factors affecting crop storage structures and animal housing. 2 lectures, 2 activities.

BRAE 333. Aquacultural Engineering. 3 units

Term Typically Offered: F
Prerequisite: Junior standing and MATH 118.

Application of aquacultural engineering principles for freshwater and marine food-production systems. Examination of system design constraints for maximizing productivity and minimizing environmental impacts, nutrient management, gas exchange and animal husbandry. Field trip required. 2 lectures, 1 laboratory.

BRAE 335. Internal Combustion Engines. 4 units

Term Typically Offered: W
Prerequisite: Junior standing.

Principles of operation of internal combustion engines. Theory of operation and diagnosis evaluation and repair of small engines, gasoline and diesel engines and economics of operation, use and repair. Power analysis and application. 3 lectures, 1 laboratory.

BRAE 337. Landscape Irrigation. 4 units

Term Typically Offered: W
Prerequisite: MATH 118.

Design of sprinkler and drip irrigation systems including: site characteristics, soil variables affecting water storage and infiltration rate, plant selection and hydrozones, hydraulics, nozzle spacing, selection of system components, back flow prevention, plumbing codes and cost estimating. Irrigation system evaluation and audit irrigation scheduling, and water budget. 3 lectures, 1 laboratory.

BRAE 339. Internship in Bioresource and Agricultural Engineering. 1-12 units

Term Typically Offered: F, W, SP
CR/NC
Prerequisite: Consent of internship instructor.

Students will spend up to 12 weeks with an approved agricultural firm engaged in production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Degree credit limited to 6 units. Credit/No Credit grading only.

BRAE 340. Irrigation Water Management. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

California water supply and budget; water rights and issues. Local, state and federal water institutions. Water measurement; basic hydraulics; irrigation systems; distribution uniformity and efficiency. Soil-plant-water relationships; soil moisture measurement; evapotranspiration; irrigation schedules; practical constraints affecting scheduling; salinity and drainage. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

BRAE 342. Agricultural Materials. 4 units

Term Typically Offered: F

Prerequisite: PHYS 121; SS 120 or SS 121; and MATH 119.

Physical properties of agricultural materials and their measurement. Strength of materials, material flow and transport, material deformation, shape and size classification, moisture relationships and biological interactions. Interactions between agricultural materials, the environment and equipment used to handle them. 3 lectures, 1 laboratory.

BRAE 343. Mechanical Systems Analysis. 4 units

Term Typically Offered: W

Prerequisite: BRAE 342.

Use of statics and dynamics to make original calculations, plans, sketches, graphics, drawings, schemes and layouts for the fabrication and construction of machines. 3 lectures, 1 laboratory.

BRAE 344. Fabrication Systems. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 343.

Fabrication systems including cutting, sawing, shearing, bending, welding, grinding, cleaning, painting and proper safety procedures. Experimental projects to include team design and construction, presentation, organization, and evaluation. 2 lectures, 2 laboratories.

BRAE 345. Aerial Photogrammetry and Remote Sensing. 3 units

Term Typically Offered: F, W

Prerequisite: MATH 118.

Concepts of photogrammetry and remote sensing. Object recognition, stereoscopic viewing, elevation determination, and scale. State-of-the-art techniques for collecting, processing, and interpreting remote sensing data. Digital image analysis techniques such as image enhancement, change detection, unsupervised and supervised classifications. 2 lectures, 1 laboratory.

BRAE 348. Energy for a Sustainable Society. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Study of how the transition can be made from fossil fuels to renewable energy sources including hydro, biomass, solar, wind, and energy conservation. Environmental, economic, and political consequences of a renewable energy-based sustainable society. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

BRAE 349. Water for a Sustainable Society. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Historical, political, economic, socio-technical, and cultural dimensions of water sustainability. Overview of complex systems with an emphasis on individual choices and their impact on water sustainability. Exploration of core sustainability concepts; practices, barriers and goals related to water resources. Course offered online only. 4 lectures. Crosslisted BRAE/NR 349. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

BRAE 355. Drone Assisted Surveying. 4 units

Term Typically Offered: F, SP

Prerequisite: BRAE 237 or BRAE 239.

Integration of remote sensing, surveying, natural resource management, applied drone technology. Understanding laws, regulations, measurement concepts, and big data. Field applications using Unmanned Aerial Systems and Global Navigation Satellite Systems. Creation of maps and supporting documents for use in GIS. 2 lectures, 2 laboratories. Crosslisted as BRAE/NR 355.

BRAE 400. Special Problems. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems in agriculture. Total credit limited to 8 units, with a maximum of 4 units per quarter.

BRAE 403. Agricultural Systems Engineering. 4 units

Term Typically Offered: SP

Prerequisite: MATH 242 or MATH 244. Corequisite: STAT 312.

Engineering and economic principles combined with mathematical optimization techniques to evaluate parameters in agricultural production and processing systems. Project planning techniques, linear and nonlinear modeling, response surface methodology. Professional responsibilities in Agricultural Engineering including ethics, patents, copyrights, liability. 3 lectures, 1 laboratory.

BRAE 405. Chemigation. 1 unit

Term Typically Offered: F

Prerequisite: BRAE 236 or BRAE 340; or graduate standing.

Fertilizer and chemical injection through irrigation systems. Hardware, fertilizer compounds, and distribution uniformity. Matching chemicals and equipment to specific irrigation methods. Safety. 1 laboratory.

BRAE 414. Irrigation Engineering. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 331 or BRAE 340; BRAE 312 with a grade of C or better; or graduate standing.

Design of on-farm irrigation systems; micro, surface, and sprinkler irrigation systems; canals and pumps; economic and strategies of pipe design; pipeline protection. 3 lectures, 1 laboratory.

BRAE 418. Agricultural Systems Management I. 4 units

Term Typically Offered: F

Prerequisite: BRAE 203; AGB 310; and completion of GE Area A3 with a grade of C- or better; or graduate standing.

Project management of agricultural systems. Emphasis placed on a team approach to problem solution. Case studies and student projects used to explore the following topics: project leadership, project organization, communication, needs assessment, feasibility studies, cost analysis, decision making, solution implementation, and evaluation. 3 lectures, 1 laboratory.

BRAE 419. Agricultural Systems Management II. 4 units

Term Typically Offered: W

Prerequisite: BRAE 418.

Project management of agricultural systems. Emphasis placed on a team approach to problem solution. Case studies and student projects used to explore the following topics: project leadership, project organization, communication, needs assessment, feasibility studies, cost analysis, decision making, solution implementation, and evaluation. 2 lectures, 2 laboratories.

BRAE 421. Equipment Engineering I. 4 units

Term Typically Offered: F

Prerequisite: BRAE 152; CE 204; and ME 212.

Design of specialized agricultural components and equipment. 3 lectures, 1 laboratory.

BRAE 422. Equipment Engineering II. 4 units

Term Typically Offered: W

Prerequisite: BRAE 421.

Fabrication and construction of specialized agricultural components and equipment. 2 lectures, 2 laboratories.

BRAE 425. Computer Controls for Agriculture. 3 units

Term Typically Offered: SP

Prerequisite: BRAE 324.

Computer activated controls as applied to agricultural machinery, agricultural structures, processing and irrigation industries. Encompassing control logic to evaluate stability behavior of systems of computer interfacing, data input and control output. 2 lectures, 1 laboratory.

BRAE 428. Agricultural Robotics and Automation. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 328.

Agricultural applications of signal processing, control theories, machine vision and robot basics for agricultural production and processing. Approaches and constraints related to agricultural automation and the use of robotics in field applications. Engineering approach to problem-solving and experimental data analysis. Field trip required. 3 lectures, 1 laboratory.

BRAE 432. Agricultural Buildings. 4 units

Term Typically Offered: SP

Prerequisite: PHYS 121, BRAE 342, BRAE 343.

Selection of buildings, storage units, and related equipment for production agriculture. Economics and functionality of various designs and construction materials. Environmental factors affecting crop storage and animal housing. 3 lectures, 1 laboratory.

BRAE 433. Agricultural Structures Design. 4 units

Term Typically Offered: F

Prerequisite: BRAE 232, CE 204.

Structural analysis and design of agricultural service and processing buildings. Emphasis on use of wood, metals, and reinforced concrete in light construction. 3 lectures, 1 laboratory.

BRAE 434. Automotive Engineering for a Sustainable Future. 4 units

Term Typically Offered: W

Prerequisite: Junior standing in any engineering or physical science major.

Multidisciplinary investigation of automotive renewable fuels and electric/hybrid vehicles. Analyze and design related technologies and systems. Methods for complete-cycle energy and GHG analysis. Comparative emissions, efficiency, power output, and infrastructure requirements. Laboratory projects converting engines and vehicles to operate on alternative fuels or electric propulsion. 3 lectures, 1 laboratory. Crosslisted as BRAE/EE 434.

BRAE 435. Drainage. 4 units

Term Typically Offered: TBD

Prerequisite: BRAE 312 or BRAE 340; or graduate standing.

Relevant principles of hydrology and porous media flow. Flow nets, wells and ground water, design of simple surface and sub-surface drains. 3 lectures, 1 laboratory.

BRAE 436. Food and Agriculture Process Water Engineering. 4 units

Term Typically Offered: W

Prerequisite: one of the following: BIO 111, BIO 161, BOT 121, BRAE 213, or MCRO 221; and CHEM 125 or CHEM 128.

Theory and design of facilities for physical and chemical treatment of water used in agricultural practices to sanitize crops as they are harvested, and water used while processing the commodities. This course also includes the design of chemical and biological reactors. 3 lectures, 1 activity.

BRAE 438. Drip/Micro Irrigation. 4 units

Term Typically Offered: W

Prerequisite: BRAE 236 or BRAE 340; or graduate standing.

Drip/micro irrigation hardware and management. Emphasizes agricultural drip/micro irrigation with some landscape application. Filtration, emitters, chemical injection, agronomic constraints, and scheduling. Field trip(s) included. 3 lectures, 1 laboratory.

BRAE 440. Agricultural Irrigation Systems. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 340 or graduate standing.

On-farm irrigation system evaluation and management. Drip, micro-spray, furrow, border strip, sprinkler systems. Irrigation efficiency and uniformity. Pumping costs. For non-BRAE majors only. 3 lectures, 1 laboratory.

BRAE 447. Advanced Surveying with GIS Applications. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 239.

Field skills in precise mapping, high order control and terrestrial imagery. CAD mapping and design. Work with large datasets on regional surface models. Collect, manipulate data for GIS. Basics of boundary law and limitations of using land boundaries in GIS. 2 lectures, 2 laboratories.

BRAE 448. Bioconversion. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 118 or equivalent.

Biological, thermal and physical techniques for converting biomass into useful energy forms for agriculture and industry. Laboratory exercises include experiments with anaerobic digestion of animal wastes into methane, ethanol fermentation of grains and composting of agricultural residues. Technical and economic feasibility of biofuels. 3 lectures, 1 laboratory.

BRAE 450. Solar Photovoltaic System Engineering. 4 units

Term Typically Offered: SP

Prerequisite: one of the following: PHYS 104; PHYS 118; PHYS 121; or PHYS 141; and junior standing.

Engineering principles, design, and installation of solar photovoltaic power systems including grid-tie and off-grid systems. Photonic energy conversion, solar module engineering, solar power electronics, photovoltaic site planning, mechanical and structural considerations, permit processes, government incentives, and analysis of financial and investment issues. Field trips required. 3 lectures, 1 laboratory. Crosslisted as BRAE/EE/HNRS 450.

BRAE 460. Senior Project Organization. 1 unit

Term Typically Offered: F

Prerequisite: Completion of GE Area A3 with a grade of C- or better.

Selection and organization of senior project. Involves time management, research techniques, budgeting and project presentation. Documentation of multidisciplinary team experience. 1 laboratory.

BRAE 461. Senior Project I. 2 units

Term Typically Offered: SP

Prerequisite: BRAE 460.

Solution of an engineering or systems management problem in agriculture. May involve research methodology, problem statement, analysis, synthesis, project design, construction, and evaluation. Project requires 150 hours with a minimum of faculty supervision.

BRAE 462. Senior Project II. 2 units

Term Typically Offered: TBD

Prerequisite: BRAE 461.

Solution of an engineering or systems management problem in agriculture. May involve research methodology, problem statement, analysis, synthesis, project design, construction, and evaluation. Project requires 150 hours with a minimum of faculty supervision.

BRAE 465. Senior Project Operation, Testing, and Safety. 2 units

Term Typically Offered: SP

Prerequisite: BRAE 419 or BRAE 422; and BRAE 460.

Final course in the senior design series. Preparation of an Operation, Maintenance and Safety manual for projects fabricated in the earlier courses. Develop a memorandum and video documenting the design, fabrication, and testing phases. Final oral presentation for each group. 1 lecture, 1 laboratory.

BRAE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. Class Schedule will list topic selected. Total credit limited to 8 units. 1-4 lectures.

BRAE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

BRAE 481. Advanced Agricultural Mechanics. 2 units

Term Typically Offered: SP

Prerequisite: Agricultural teacher candidates starting/returning from student teaching, senior or graduate standing or consent of instructor.

Advanced shop skills. Carpentry, electricity, plumbing, surveying, power mechanics, tractor equipment operation and maintenance. 1 lecture, 1 laboratory.

BRAE 485. Cooperative Education Experience in BioResource and Agricultural Engineering. 6 units

Term Typically Offered: SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience with an approved BioResource and Agricultural Engineering firm engaged in production or related business, industry or governmental agency. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

BRAE 495. Cooperative Education Experience in BioResource and Agricultural Engineering. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full time work experience with an approved BioResource and Agricultural Engineering firm engaged in production or related business, industry or governmental agency. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

BRAE 500. Individual Study. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition.

Total credit limited to 6 units, repeatable in same term.

BRAE 532. Water Wells and Pumps. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 312 or BRAE 340 or CE 336 or ME 341.

Water well drilling, design, and development. Pump characteristics and system head. Series and parallel operation. Design of pump intakes.

Variable speed electric drives and engines. Pump testing. 3 lectures, 1 laboratory.

BRAE 533. Irrigation Project Design. 4 units

Term Typically Offered: W

Prerequisite: BRAE 312, BRAE 340 or equivalent (hydraulics/fluid mechanics course).

Advanced open channel and pipeline controls for unsteady flow.

Social aspects of improved water delivery to customers. Engineering solutions for modernizing irrigation projects, including open-channel flow measurement, advanced control structure design, determining capacities, and Supervisory Control and Data Acquisition (SCADA) systems. 3 lectures, 1 laboratory.

BRAE 570. Selected Advanced Topics in BioResource and Agricultural Engineering. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

BRAE 571. Selected Advanced Laboratory in Bioresources and Agricultural Engineering. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

BRAE 599. Thesis in BioResource and Agricultural Engineering. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in bioresource and agricultural engineering. Thesis will include problem identification, significance, methods, data analysis, and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Degree credit limited to 6 units.

Botany (BOT)

undefined

BOT Courses

BOT 121. General Botany. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

The anatomy, morphology, physiology, reproduction, diversity, and importance of plants. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

BOT 311. Plants, People and Civilization. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: BIO 114, BIO 160, BIO 162 or BOT 121.

Human uses of plants for food, beverage, medicine, fiber, recreation, and rituals. Uses of plants by different cultures throughout the world and the social, economical, and environmental importance of plants in our lives. Field trip required. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

BOT 313. Taxonomy of Vascular Plants. 4 units

Term Typically Offered: W

Prerequisite: BIO 114 or BIO 162 or BOT 121.

Introduction to classification and identification of vascular plants, emphasizing major plant families; field and herbarium techniques. 2 lectures, 2 laboratories.

BOT 323. Plant Pathology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 162 or BOT 121.

Comprehensive study of the causes and effects of diseases of plants. Designed to lead to an understanding of plant pathology, and modern methods to control plant disease. 2 lectures, 2 activities. Crosslisted as BOT/PLSC 323. Formerly AEPS/BOT 323.

BOT 326. Plant Ecology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 114, BIO 162, BIO 211, or BOT 121. Recommended: BIO 263 and STAT 217 or STAT 218.

Plant communities, population dynamics, and effects of the following environmental factors on plant growth and development: soil, water, temperature, light, atmosphere, topography, organisms, and fire. 3 lectures, 1 laboratory.

BOT 433. Field Botany: California Plant Diversity. 5 units

Term Typically Offered: SP

Prerequisite: BOT 313, or graduate standing in Biological Sciences.

Field studies of California's diverse vegetation. Identification of plants and plant communities in the field. Factors affecting distribution and ecological relationships. California geography, geology, and evolution of California flora. Several one day field trips and three weekend trips to California's deserts and mountains. Field trips required. 3 lectures, 2 laboratories.

Business (BUS)

undefined

BUS Courses

BUS 100. Student Orientation and College Success. 2 units

Term Typically Offered: F

Orientation to majors, minors, and concentrations for the development of a personalized four-year graduation plan. Skills for academic success: goal setting, time management, study skills, registration strategies, and overall adjustment to college life, including connection to a social peer network. 2 lectures.

BUS 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F,W,SPSU

Prerequisite: Consent of area coordinator.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

BUS 204. Financial Literacy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Introduction to personal finance. Budgeting, savings, employee benefits, retirement planning, taxes, insurance, and real estate. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area B4.

BUS 206. Business Professionalism and Career Readiness. 2 units

Term Typically Offered: F, W, SP

Career development, personal branding, and internship preparation, with a focus on interpersonal communication, resume, cover letter, and interviewing skills. Career exploration for future concentration selection, including the formulation of a college leadership and career development plan. Course may be offered in classroom-based or online format. 2 lectures.

BUS 207. Legal Responsibilities of Business. 4 units

Term Typically Offered: F,W,SPSU

Examination of the American legal system and important legal principles for business operations, such as those involved with contracts, torts, agency, business organizations, and employment. Emphasis on how legal principles help define socially responsible conduct. Case studies. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 212. Financial Accounting for Nonbusiness Majors. 4 units

Term Typically Offered: F, W

Introduction to financial accounting theory and practice with an emphasis on financial statement preparation and analysis. Not open to Business majors. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 214. Financial Accounting. 4 units

Term Typically Offered: F,W,SPSU

Principles of financial accounting for Business majors. The course prepares students to understand and interpret financial statement information. Financial reporting standards are explored to give students an understanding of how financial events are reflected in financial statements. Not open to students with credit in AGB 214. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 215. Managerial Accounting. 4 units

Term Typically Offered: F,W,SPSU

Prerequisite: Demonstrated competency in electronic spreadsheet, word processing, and presentation applications; BUS 212 or BUS 214 or equivalent.

Applications of accounting for making business decisions. Content includes planning and control issues including cost behavior, budget preparation, performance reporting; addresses social responsibility and employee motivational and behavioral considerations. Preparation of spreadsheet applications useful for decision-making. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 220. Business Basics for Entrepreneurs. 4 units

Term Typically Offered: F, SP

Prerequisite: Entrepreneurship minors only.

Basic business concepts for non-business major entrepreneurs, including unit economics and simple financial statements, intellectual property, entrepreneurial marketing, information technology, team management, and business ethics. Course may be offered in classroom-based or online format. 4 lectures.

BUS 234. Introduction to Design Thinking. 4 units

Term Typically Offered: W

Prerequisite: Entrepreneurship minors only.

Introduction to the process of design thinking and human centered design, including design process, methodology, and implementation. Empathy, creativity, iterative prototyping, and contextual design of products and services. 4 lectures. Crosslisted as BUS/ENGR 234.

BUS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BUS 301. Global Financial Institutions and Markets. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ECON 222.

Role of private and public financial institutions in allocating capital globally and promoting international commerce. Financial institutions covered include the FED, IMF, World Bank, investment banks and others. Detailed exploration of the history and functions of these institutions. 4 lectures.

BUS 302. International and Cross Cultural Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A with grades of C- or better; completion of GE Area C2; completion of GE Area D1; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Dimensions of culture and its variations within and across nations. Impact of culture on managing in a global context. Development of managerial competencies requisite to working in and supervising multicultural groups in international corporations. Frameworks for analyzing cultural and contextual influences on organizational behavior, culture shock and readjustment, expatriation and repatriation, cultural change and innovation, intercultural conflict, and ethical dilemmas. Case studies, behavioral simulations, self-assessments and fieldwork. 4 lectures.

BUS 303. Introduction to International Business. 4 units

Term Typically Offered: TBD

Prerequisite: A grade of C- or better in ECON 222.

Special terms, concepts, and institutions associated with the environment in which international companies operate. Students will be enabled to understand, analyze and offer solutions to global business problems. 4 lectures.

BUS 304. International Supply Chains. 4 units

Term Typically Offered: W

Prerequisite: Consent of instructor. Recommended: ECON 201 or ECON 221 or ECON 222.

Development of effective supply chains that cross national boundaries with specific examples of import/export between the United States and target country. Study tour to target country as an essential course activity. Pre-trip lectures, readings and assignments; on-the-road business tours, and post-trip import-export proposal. Conducted in English; no prior international business or travel experience required. Passport and Visa required. Field trip required. The Class Schedule will list country selected. 3 lectures, 1 activity.

BUS 306. Leadership Development and Career Success. 1 unit

Term Typically Offered: W, SP

CR/NC

Prerequisite: Junior standing. Recommended: BUS 206.

Leadership self-development, resilience/growth mindset and strategies for finding meaningful and enjoyable work for a fulfilled career and life after graduation. Advanced career preparation, networking, relationship building, influencing, opportunity building, and business etiquette. Credit/No Credit grading only. 1 activity.

BUS 310. Introduction to Entrepreneurship. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Role and impact of entrepreneurship and technology startups; characteristics and traits of entrepreneurs; opportunity identification and assessment; frameworks for building startups; the founding team; organizational and legal issues; business and value proposition models; acquiring resources; entrepreneurial risk; realizing and harvesting value. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as BUS/ENGR 310.

BUS 311. Managing Technology in the International Legal Environment. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); completion of GE Area D1; and one course in GE Area D2.

Analysis of U.S. and international laws regarding technological innovations from economic, social and political perspectives. Copyrights, patents, trademarks, trade secrets, contracts, products liability and privacy. The Internet, computer programs and biotechnology. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

BUS 313. Customer Development. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area A with grades of C- or better; Entrepreneurship minors only.

Experiential approach to understanding the customer development process in the lean startup context. Design, implementation, and validation of repeatable and scalable business model strategies. Course may be offered in classroom-based or online format. 4 lectures.

BUS 319. Accounting Information Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 214 or Accounting minors with credit in AGB 214.

Comprehensive coverage of manual and computerized accounting processes and internal controls. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 320. Federal Income Taxation for Individuals. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 215.

Federal income taxation and planning for individuals. Federal role of taxation in the business decision-making process. Issues related to individual income tax preparation and introduction to basic property transactions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 321. Intermediate Accounting I. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 214 and BUS 215.

Comprehensive coverage of financial reporting issues. Covers financial statements, revenue recognition, and assets other than investments. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 322. Intermediate Accounting II. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 321 with a grade of C- or better; Business majors must have formally declared their concentration to enroll.

Comprehensive coverage of financial reporting issues. Covers investments, liabilities, equities, and the Cash Flows Statement. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 323. Intermediate Accounting III. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 322.

Detailed examination of the technical and theoretical aspects of accounting for leases, pensions, income taxes, accounting changes and errors, business combinations, and major differences between the US Generally Accepted Accounting Principles and International Financial Reporting Standards. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 330. Funding and Managing Startup Companies. 4 units

Term Typically Offered: W, SP

Prerequisite: Entrepreneurship concentration, BUS 310, and BUS 342; or Entrepreneurship minor, BUS 220, and BUS 310.

Basics of entrepreneurial business financial management. Readings on financing startup and growing ventures. Forms and uses of equity and debt financing. Capitalization tables and exit analyses. Investor pitch process. Legal, governance and ethical issues in entrepreneurial financing and operations. Course may be offered in classroom-based or online format. 4 seminars.

BUS 342. Fundamentals of Corporate Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 214 with a grade of C- or better, or consent of instructor; and STAT 252 or any 300 level statistics course.

Theory and applications of financing business operations. Financial management of current and fixed assets from internal and external sources. Analysis, planning, control, and problem solving. The use of technology in the form of financial calculators and/or spreadsheets. Course may be offered in classroom-based or online format. 4 lectures.

BUS 346. Principles of Marketing. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Completion of GE Area A with grades of C- or better.

Development of an understanding of the marketing process: identifying target markets; developing and launching products or services; and managing pricing, promotion, and distribution strategies. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 2 discussions.

BUS 347. Professional Selling Skills. 4 units

Term Typically Offered: F

Prerequisite: Sophomore standing.

Exploration and cultivation of skills in personal selling. Understanding customers, interpersonal relationships, and the influences of psychology, sociology, economics, and public policy on buyer/seller interactions. 4 lectures.

BUS 348. Technology-Based Professional Sales. 4 units

Term Typically Offered: W

Prerequisite: BUS 347; Sales minors only.

Strategy and technology used in the practice of professional selling. Social selling, customer relationship management (CRM), and insight into sales strategy through exploration of contemporary topics in professional sales. 4 lectures.

BUS 382. Leadership and Organizations. 4 units

Term Typically Offered: F, W

Prerequisite: Completion of GE Area A with grades of C- or better; completion of GE Area C2; completion of GE Area D1; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Evaluation of macro dimensions of business organizations including environment, mission, goals, strategies, structure, people, and technology. Internal leadership processes at different organizational levels. Case analysis, experiential class activities. Application to business solutions in technology-oriented settings. 4 lectures.

BUS 384. Human Resources Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A with grades of C- or better; completion of GE Area C2; completion of GE Area D1; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Introduction to functional areas of the discipline including staffing, compensation, employee development and labor relations. Additional workplace issues addressed include performance and human capital management, employer legal and social responsibility for employee wellbeing, managing a diverse/global workforce, and using human resource information systems. 4 lectures.

BUS 387. Organizational Behavior. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Completion of GE Area A with grades of C- or better; ECON 221; and BUS 207. Recommended: STAT 252.

Application of behavioral, social and organizational science concepts to management. Exploration of the interactions between individuals and the organizations in which they work and live. Individual, interpersonal, team, intergroup and organizational levels of analysis included in topics such as expectations, perception, communications, creativity, leadership style, cultural and ethical behavior, group dynamics, team effectiveness and work design. 4 lectures.

BUS 388. Cultivating Human Capital. 4 units

Term Typically Offered: SP

Prerequisite: BUS 384 and STAT 252.

Organizations' processes of selecting, training and developing employees. Issues related to human resources planning, recruitment, and selection. Needs assessment, including organization, person, and task or competency analysis. Designing, delivering and evaluating employee training and human resource development in knowledge-based organizations. 4 lectures. Formerly BUS 475.

BUS 389. Introduction to Business Negotiation for Entrepreneurs. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Entrepreneurship minors only.

Negotiation theory and skills required for successful entrepreneurship. Emphasis on negotiation simulations and role playing, with hands-on experience in applying negotiation skills. 4 lectures.

BUS 391. Information Systems. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: ITP 125 for Industrial Technology and Packaging majors; or BUS 214 for all other majors.

Computer applications in business and industry. Information systems and integrated systems concepts, computer hardware and software, strategic uses of information systems, databases, data warehousing, decision support systems and artificial intelligence, network basics, electronic commerce, systems development, ethical use of information, employing technology in a socially responsible manner, and emerging trends and technologies in information systems. 4 lectures.

BUS 392. Business Application Development. 4 units

Term Typically Offered: F, SP

Prerequisite: BUS 391.

The fundamental concepts and models of application development needed to understand the key processes related to building functioning business applications and appreciate the complexity of application development. The concepts of computer programming, data structures, problem solving, programming logic, and fundamental design techniques. Up-to-date application development tools and technologies currently used by business enterprises. 4 lectures.

BUS 393. Database Systems in Business. 4 units

Term Typically Offered: W, SP, SU

Corequisite: BUS 392; Business and Economics majors must have formally declared their concentration to enroll.

Design, development, testing, and implementation of databases for business applications. Data modeling with entity relationship diagrams (ERD) and class diagrams (UML). Data normalization, data integrity, the effect of business rules on data normalization. Advanced queries using structured query language (SQL). Database application development culminating in a database project. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 394. Systems Analysis and Design. 4 units

Term Typically Offered: F, W

Prerequisite: BUS 391; Business and Economics majors must have formally declared their concentration to enroll.

Systems analysis and design. Systems development life cycle, requirements gathering, process modeling using data flow diagrams, use case analysis and diagramming, UI design. 4 lectures.

BUS 395. Information Systems Project Management. 4 units

Term Typically Offered: F, SP

Prerequisite: BUS 391; Business and Economics majors must have formally declared their concentration to enroll.

Introduction to key components of project management in the IS context, with focus on the technical, cultural, and interpersonal skills necessary to manage IS projects successfully. Project scope management, schedule and cost management, quality management, and risk management. 4 lectures.

BUS 396. Consumer Insights. 4 units

Term Typically Offered: F, W, SP

Prerequisite: For GRC Majors, GRC 361; for all other majors, BUS 346.

Process of individuals selecting, purchasing, using, or disposing of products, services, ideas, or experiences, based upon psychology, sociology, cultural anthropology, semiotics, and micro/macro economics. Consumer experience through analysis of the consumer journey and touch points. 4 lectures.

BUS 399. IT Infrastructure and Security Management. 4 units

Term Typically Offered: F, SP

Prerequisite: BUS 391; Business and Economics majors must have formally declared their concentration to enroll.

Fundamental concepts of networking and infrastructure management. Includes theoretical and practical discussion on TCP/IP, wired and wireless LAN, cloud computing, and information security. 4 lectures.

BUS 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Senior standing.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

BUS 401. General Management and Strategy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 342, BUS 346, BUS 387, BUS 391, senior standing, and completion of one of the following: ITP 303, ITP 326, ITP 330, ITP 341, or ITP 371. Corequisite: BUS 411.

Application of interdisciplinary skills to business and corporate strategy analysis formulation and implementation of business, corporate and global level strategies. Consideration of interdependence between external environments and internal systems. Focus on responsibilities, tasks, and skills of general managers, including socially responsible behavior and governance. Case studies, group problem solving, experiential class activities. Capstone course of Business core curriculum. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

BUS 404. Governmental and Social Influences on Business. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: BUS 207 and ECON 222.

Analysis from legal, economic, political, and ethical perspectives, of the changing domestic and international environments of the business enterprise. Topics include administrative law, agencies and regulatory policy, antitrust law, public policy analysis, business-government relations, and corporate responsibility. Case studies. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 406. Managing Mergers, Acquisitions and Divestitures. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 342, BUS 346, and BUS 387.

Issues associated with analyzing, negotiating, and managing mergers, acquisitions and divestitures (MADS) using cross-cultural, interdisciplinary perspective. Rationale for decision to pursue MADS and processes for identifying targets; valuing and negotiating MADS; staffing and human resource management issues; strategic control and integration; and cross-cultural conflict and divided loyalties in domestic and international MADS. Lectures, case studies and simulation. 4 lectures.

BUS 408. Innovation and Entrepreneurship Through Disruptive Technologies. 4 units

Term Typically Offered: SP

Prerequisite: BUS 310.

Theory of disruptive innovation and its use in creating business and entrepreneurial opportunity. Basic technical underpinnings of disruptive technologies, including artificial intelligence, autonomous vehicles, Internet of Things, augmented and virtual reality, machine learning, and genetic engineering. 4 lectures.

BUS 409. Law of Real Property. 4 units

Term Typically Offered: SU

Prerequisite: Senior standing.

Legal problems of acquisition, ownership and transfer of real property. Contracts, agency, estates, and co-ownership, mortgages and deeds, covenants, conditions, and restrictions, easements, landlord-tenant, and zoning. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 410. The Legal Environment of International Business. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 207 and ECON 222.

U.S., foreign, and international law affecting international business transactions. U.S. and foreign cultural, ethical, and political norms and legal institutions, and their effect on law and business. 4 lectures.

BUS 411. Business Knowledge Exit Exam. 0 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Senior standing. Recommended: BUS 215 and BUS 404.

Assessment of BS Business Administration Program Learning Objective 1 (Apply knowledge to identify opportunities and solve business problems) through completion of an exam and the senior exit survey. Results will only be used to improve the curriculum. Credit/No Credit grading only. Course offered online only.

BUS 412. Advanced Managerial Accounting. 4 units

Term Typically Offered: SP

Prerequisite: BUS 215.

Product costing systems including hybrid costing systems, management control systems, cost allocation, activity based costing, cost information for decision making, new manufacturing environments, and strategic control systems. International dimension integrated in the course content. Course may be offered in classroom-based or online format. 4 lectures.

BUS 416. Volunteer Income Tax Assistance - Senior Project. 4 units

Term Typically Offered: W

Prerequisite: BUS 320 or equivalent, senior standing.

Training and practice in the preparation of state and federal individual income tax returns. Coverage of the deductions and credits applicable to individuals. Students provide free tax assistance and income tax preparation to community residents under the supervision of qualified professionals. 2 lectures, 2 activities.

BUS 417. Taxation of Corporations and Partnerships. 4 units

Term Typically Offered: F, W

Prerequisite: BUS 320 or equivalent.

Comparative study of the taxation of C corporations and flow-through tax entities, including S corporations, partnerships and limited liability companies. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 418. Listening to the Customer. 4 units

Term Typically Offered: F, W, SP

Prerequisite: For GRC Majors, GRC 361; for all other majors, BUS 346; Business majors must have formally declared their concentration to enroll.

Discovery and development of customer insights based on a project-oriented introduction to the research process. Development of research questions. Design and application of multiple research methods (e.g. secondary, observation, interview, focus group, survey research). Exploratory and confirmatory approaches leading to the analysis, interpretation, and presentation of results. 4 lectures.

BUS 419. Strategic Marketing Measurement. 4 units

Term Typically Offered: W, SP

Prerequisite: BUS 396; BUS 418; STAT 252.

Development of skills to gather, analyze, and report information critical for marketing decision making. Focus on primary data collection and analytical techniques (e.g. experimental design, descriptive statistics, cross-tabulation, ANOVA, and regression). Other methods may include data mining, GIS, and customer relationship management (CRM). 4 lectures.

BUS 421. Marketing Analytics and Business Intelligence. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 346; STAT 252 or STAT 302.

Analysis of customer information using a broad range of tools and techniques. Application of analytic findings to marketing decision-making. Integration of data into reporting platforms that emphasize return on marketing investment. Course may be offered in classroom-based or online format. 4 lectures.

BUS 422. Accounting for Government and Not-For-Profit Entities. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 321.

Accounting and reporting by state and local governments and not-for-profit entities. State and local governmental topics include: fund structures, budgetary accounting, the modified accrual basis of accounting, reporting concepts and practices, contributions, restricted resources, endowments. Course may be offered in classroom-based or online format. 4 lectures.

BUS 423. Digital Marketing Metrics and Management. 4 units

Term Typically Offered: F, SP

Prerequisite: BUS 396 and BUS 418.

Measurement and optimization of digital marketing. Return on investment, lifetime value of the customer, customer acquisition costs, search engine marketing, paid search, display advertising, website analytics, email marketing, social media marketing, online reputation, mobile marketing, and new media marketing. Course may be offered in classroom-based or online format. 4 lectures.

BUS 424. Accounting Ethics. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 321.

Study of professional responsibilities and oversight within the accounting profession. Corporate fraud in accounting. Current accounting and auditing events. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 425. Auditing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 322.

Survey of the auditing environment including institutional, ethical, and legal liability dimensions. Introduction to audit planning, assessing materiality and audit risk, collecting and evaluating audit evidence, considering the internal control structure, substantive testing, and reporting. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 430. Internship/Cooperative Education. 2-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Approval of area chair; junior standing; and a Cal Poly cumulative GPA of at least 2.5 without being on academic probation.

Work experience in business, government, or non-profit sector that provides an opportunity to explore career interests while applying knowledge and skills learned in the classroom in a work setting. Periodic written progress reports, final report, and periodic evaluation by work supervisor required. Credit/No Credit grading. Major credit limited to 4 units; total credit limited to 12 units.

BUS 431. Security Analysis and Portfolio Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 342; BUS 391; ECON 339 or STAT 324. Business majors must have formally declared their concentration to enroll.

In-depth analysis of equity market and its instruments. Detailed study of leading stock valuation models. Impact of changes in the firm's fundamentals and in macroeconomic factors on stock prices. Brief introduction to equity and index derivatives. 4 lectures.

BUS 433. International Finance. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 431 or BUS 439.

Financial management of international business. International capital and money markets, international financial institutions, special problems in evaluating direct foreign investment, and financial techniques used in international business operations. 4 lectures.

BUS 434. Real Estate Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 439.

Analyses of real estate financing techniques and funding sources for development projects. Effects of federal, state, and local taxes on real estate investments. In-depth investigation and computer analyses of real estate investment projects. 4 lectures.

BUS 435. Real Estate Investment. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 434.

Intensive investigation and computer analysis of real estate investment opportunities. Problems in real estate and property management. 4 lectures.

BUS 436. Entrepreneurial Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 215 and BUS 342.

Process of financing new and fast-growing firms. Readings on the venture capital process, from seed capital through the initial public offering. Valuation of firms seeking venture capital, and those planning their initial public offering. Valuing convertible securities. Real options valuation. Course may be offered in classroom-based or online format. 4 seminars.

BUS 437. Retirement and Estate Planning. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 431 and BUS 439.

Retirement planning and employee benefits; Social Security and Medicare; types of retirement plans; qualified plan characteristics; distribution options; and group insurance benefits. Trusts, power of attorney, and probate. 4 lectures.

BUS 438. Advanced Corporate Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 431 and BUS 439.

Corporate finance with an emphasis on managing the corporation to create shareholder value. Detailed treatment of topics such as capital budgeting, capital structure, economic value-added, corporate distribution policy, financial distress, and mergers and acquisitions. 4 lectures.

BUS 439. Fixed Income Securities Market. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 342 and BUS 391; Business majors must have formally declared their concentration to enroll.

Development of analytical skills for properly valuing fixed income securities. Bond pricing, yields, and volatility; interest rate term structure and yield curve; securities, market structure, and analytical techniques; bond portfolio strategies and an introduction to interest rate derivatives. 4 lectures.

BUS 441. Computer Applications in Finance. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 438.

A combination lecture/computer lab course focusing on computer acquisition of financial data and the subsequent application of financial theory and analysis to this data so as to facilitate financial decision making. 4 lectures.

BUS 442. Introduction to Futures and Options. 4 units

Term Typically Offered: W

Prerequisite: BUS 431.

An in-depth analysis of derivatives markets and instruments. Emphasis on the valuation of futures, options, swaps, and other derivative securities. 4 seminars.

BUS 443. Case Studies in Real Estate Finance. 4 units

Term Typically Offered: SP

Prerequisite: BUS 431 or BUS 434.

Analytical and decision-making techniques in applying Financial Real Estate theory to business and property management valuation. Real estate valuation techniques and their application to real estate investment. Incorporates case studies, databases, and specialized real estate valuation software, such as ARGUS. 4 lectures.

BUS 444. Financial Engineering and Risk Management. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 442.

Advanced course synthesizing concepts from corporate finance, derivative securities, statistics, and computer science. Emphasis on both computer programming in a matrix programming language (Matlab) to solve practical risk management and valuation problems, and analytical training in the area of stochastic calculus, and its application to derivative security pricing. Practical applications of derivatives for controlling risk in an international corporate environment. 4 lectures.

BUS 445. Ethics and Behavior Finance. 4 units

Term Typically Offered: F, W

Prerequisite: BUS 342.

Contemporary theoretical and empirical issues including agency theory, reputation building, game theory, and financial ethics. Discussion of the application of ethics theory to financial decisions. May include lectures, case analyses, student presentations, and guest speakers. 4 lectures.

BUS 446. International Marketing. 4 units

Term Typically Offered: W

Prerequisite: BUS 346.

Development of an understanding of global marketing strategy. Acquisition of information about international markets and its use to describe customers, understand markets, and make marketing mix decisions. 4 lectures.

BUS 448. The Finance of Mergers and Acquisitions. 4 units

Term Typically Offered: SP

Prerequisite: BUS 438.

Comprehensive coverage of financial aspects concerning mergers and acquisitions. Valuation of companies, strategic and other motivations underlying mergers, structuring of transactions, deal tactics and strategy, leveraged buyouts, and cross-border mergers. Most suitable for careers in corporate finance, and investment banking. 4 lectures.

BUS 450. Current Topics in Marketing. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 396 and BUS 418.

Selected topics in emerging areas of marketing. Intended for students in the Marketing Management concentration who want to learn and acquire in-depth knowledge and skills. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

BUS 451. New Product Development and Launch. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 418 and STAT 252. Recommended: BUS 396.

Project-based skills for developing new products and planning for their launch. Major phases of product development: product innovation strategy, idea generation and screening, concept development and testing, technology drivers. Introduction to product launch, including segmentation, targeting, positioning, pricing, and branding. 4 lectures.

BUS 452. Product Management. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 396 and BUS 418.

Development of individual and project-based skills in managing products in the growth, maturity, and decline stages of their life cycles. Emphasis on distribution, pricing, and communication strategies required to maintain distinctive product advantages. May include developing a comprehensive communication plan. 4 lectures.

BUS 453. Digital and New Media Marketing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 396 or BUS 418.

Definitions and tools of digital and new media marketing communications including social media audits and governance. Planning integrated marketing communications across digital tools and new media channels that reflect a client organization's strategy for managing its identity and reputation. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 454. Marketing Projects. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 396 and BUS 418.

Client-based course providing an opportunity to apply marketing abilities. Teams draw upon research, analytical, and strategic marketing skills to develop an actionable plan that addresses a critical marketing challenge faced by an organization. Deliverables include research findings and written and verbal presentation to the organization and instructor. 4 lectures.

BUS 455. Marketing Strategy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Three of the following: BUS 419, BUS 421, BUS 423, BUS 430, BUS 450, BUS 451, BUS 452, BUS 453.

Integration of key marketing concepts using tools such as computer simulations, readings, and/or case studies. Development and implementation of strategic and tactical decisions for companies and brands. 4 lectures.

BUS 458. Solving Big World Challenges. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A with grades of C- or better.

Apply human-centered design practices to address a social or an environmental challenge, specific to a local community. Achieve revenue-generating social impact through innovative business models. Practice team competencies including problem-solving, interviewing, brainstorming, prototyping, and written, visual, and oral communication. 4 lectures. Crosslisted as BUS/COMS 458.

BUS 459. Social Media's Role in Integrated Marketing Communications. 4 units

Term Typically Offered: SP

Prerequisite: BUS 453; JOUR 331; JOUR 342; GRC 338 or GRC 377 or JOUR 390.

Integrative project experience in social media marketing and/or integrative marketing communications campaign: research target markets, identify appropriate social media and other media channels. Field trips required. 4 seminars.

BUS 461. Senior Project I. 2 units

Term Typically Offered: F,W,SP,SPSU

Prerequisite: Senior standing.

Selection and analysis of a problem under faculty supervision. Problems typical of those which graduates must solve in their fields of employment. Formal report is required. Minimum 120 hours total time.

BUS 462. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SPSU

Prerequisite: Senior standing.

Selection and analysis of a problem under faculty supervision. Problems typical of those which graduates must solve in their fields of employment. Formal report is required. Minimum 120 hours total time.

BUS 463. Senior Project: Low Income Taxpayer Clinic. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; BUS 320; Graduation Writing Requirement; and approval of the Instructor.

Acquire fundamental knowledge of federal tax laws and procedures in a clinical setting. Practice with multiple authoritative accounting, auditing and tax databases, conduct legal research, and business writing. Resolve real world accounting, auditing and tax controversies for Low Income Taxpayer Clinic clients.

BUS 464. Applied Senior Project Seminar. 4 units

Term Typically Offered: F,W,SP,SPSU

Prerequisite: Senior standing.

Selection and analysis of business problems and opportunities in directed individual or group-based projects. Problems typical to those which graduates could encounter in their fields of employment. Formal report required. 4 seminars.

BUS 466. Sales Practicum. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 348.

Capstone course for the Sales minor, students explore building and maintaining relationships, apply selling skills, and prepare themselves for a career in professional selling. 4 seminars.

BUS 468. Blockchain in Business. 4 units

Term Typically Offered: SP

Prerequisite: BUS 392 or CSC 101 or CSC 232 or ECON 395.

Blockchain technology in business, with application examples in management (including HR, marketing and accounting), operation systems (manufacturing, supply chain and other service systems), finance (including stock trading, real estate transactions and P2P payment systems) and entrepreneurship. 4 lectures. Crosslisted as BUS/ITP 468.

BUS 469. Foundations of Financial Technology. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 342; BUS 391; and ECON 339 or STAT 324.

Introduction to financial technology and its landscapes. Theoretical foundations including machine-learning, blockchain, cryptocurrencies, and platforms as well as a set of industry cases studies and practices. Course may be offered in classroom-based or online format. 4 lectures.

BUS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

BUS 471. Managing and Rewarding Employee Performance. 4 units

Term Typically Offered: SP

Prerequisite: BUS 384 and STAT 252.

Managing and compensating employee performance. Motivation theories, performance measures, evaluation and feedback systems/practices, planning for performance improvement. Advantages and challenges of pay-for-performance systems. Design and management of total compensation systems. Compensation systems as a factor in employee development and organizational performance. 4 lectures.

BUS 474. Independent Study in Accounting. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 322.

Individual investigation, research, study or survey of selected topics in accounting, auditing or taxation. Total credit limited to 8 units, repeatable in the same term. The Class Schedule will list topic selected.

BUS 476. Leading Social Innovation in Organizations. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Fundamentals and practice of leading social innovation in existing and new organizations. Emphasis on collective action tools and processes that support social initiatives with positive impact. 4 lectures.

BUS 477. Management Consulting and Change Management. 4 units

Term Typically Offered: W

Prerequisite: BUS 382 or BUS 387.

Analysis of development and trends in the field of organization change and development. Application of behavioral and organizational science knowledge and social technology to growth and change of organizations for improving effectiveness and sustainability. Principles of management consulting. 4 seminars.

BUS 480. People Analytics. 4 units

Term Typically Offered: W

Prerequisite: BUS 384 or BUS 387; and STAT 252 or equivalent.

Data-driven approach to human resource practices with emphasis on the strategic use of analytics to drive effective practice and support decision-making; use of appropriate data sources and techniques for testing HR-related questions; considerations for collection and use of human data. 4 lectures.

BUS 487. Launching and Growing the Technology Start-Up. 4 units

Term Typically Offered: W

Prerequisite: BUS 310 and consent of instructor.

Topics in entrepreneurial settings, focusing on technology startups. Frameworks, analytical skills, and decision-making tools used in growing entrepreneurial businesses. Field trip required. 4 lectures.

BUS 488. Building a Startup Skill Set. 4 units

Term Typically Offered: F

Prerequisite: BUS 310; BUS 418; Business majors must have declared their concentration to enroll. Recommended: BUS 330.

Process of evolving a startup's business model, focusing on product-market fit; go-to-market strategies; revenue streams; cost structure; partnerships; key activities; and key resources. Exploration of a personal entrepreneurial pathway. 4 seminars.

BUS 489. Negotiation. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 387.

Theory and practice of negotiation in a variety of professional and managerial contexts (e.g., labor relations, business acquisitions, compensation, business disputes) and in one-on-one, group, and team-based arrangements. Includes impact of culture, ethics, dispute resolution, coalitions and use of creativity to develop integrative solutions. 4 lectures.

BUS 490. Data Visualization. 4 units

Term Typically Offered: W, SP

Prerequisite: BUS 497.

Fundamentals and practice of data visualization with an emphasis on storytelling within organizations. Theoretical focus on human cognition and perception. Application of principles through software tools. 4 lectures.

BUS 491. Decision Support Systems. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 391, STAT 251 or equivalent; Business and Economics majors must have formally declared their concentration to enroll.

Modeling organizational systems and processes such as computer networks, transportation systems, manufacturing systems, retail systems, etc. Developing computer simulation models and animation of systems to provide decision support in selecting system design alternatives. Applying quantitative methods to model uncertainty and conduct statistical performance analysis. 4 lectures.

BUS 492. Technology-Supported Collaboration. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 387 and BUS 391.

Collaboration from multiple perspectives, applying best practices and empirically-supported insights toward successful collaboration in organizational settings. Theories of teams, collaboration, and the technologies to support these processes. Application of techniques for leadership, problem solving, communications, virtual collaboration, and collaboration technologies. 4 lectures.

BUS 493. User Experience Analysis and Design. 4 units

Term Typically Offered: SP

Prerequisite: BUS 394.

Fundamentals of User Experience Analysis and Design. Best practices in mobile/web/desktop user interfaces. Persona development. Prototyping using software tools. Includes theoretical and practical discussion of user experience analysis and design in business settings. 4 lectures.

BUS 495. Software Testing. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 392.

Theory and practice of software testing, including state-of-the-art practices, design issues, staffing issues, test management issues, and other related areas. Software testing tools utilized for applications testing, and test management. 4 lectures.

BUS 496. Electronic Commerce. 4 units

Term Typically Offered: TBD

Prerequisite: BUS 392.

Focus on the technology of electronic commerce, including programming, development environments and security, through a series of lectures, guest speakers, demonstrations, exercises and case studies. Networking, client/server computing, and web/database design concepts. Working e-commerce application required at end of course. 4 lectures.

BUS 497. Business Analytics. 4 units

Term Typically Offered: W, SP, SU

Prerequisite: BUS 393 and STAT 252.

Introduction to the concepts and applications of business analytics, using business case study and problem-solving approach. Data warehouse design and implementation. Supervised learning techniques for classification and prediction. Unsupervised learning techniques for dimension reduction and pattern recognition. Text analytics. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

BUS 498. Directed Topics in Information Systems. 4 units

Term Typically Offered: F, SP

Prerequisite: BUS 392.

Specialized Information Systems (IS) topic selected from the IS areas of current interest. Intended for advanced IS concentration students who want to learn and acquire in-depth IS knowledge and skills. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures.

BUS 499. Data Communications and Networking. 4 units

Term Typically Offered: F, W

Prerequisite: BUS 391; Business and Economics majors must declare their concentrations in order to enroll.

Combines the fundamental concepts of data communications and networking with practical applications in business. Provides a basic understanding of the technical and managerial aspects of business telecommunication. Introduction to data communications and applications and technical fundamentals, and to network products, technologies, applications, and services. 4 lectures.

Chemistry (CHEM)

undefined

CHEM Courses

CHEM 101. Introduction to the Chemical Sciences. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: BCHEM/CHEM majors only.

Introduction to the chemistry and biochemistry disciplines. Orientation, advising, career opportunities and introduction to the faculty. Designed for first-year CHEM and BCHEM majors. Credit/No Credit grading only. 1 lecture.

CHEM 110. World of Chemistry. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: MATH 96, or MATH 115, or appropriate Math Placement Level.

The fundamentals of chemical cause/effect and structure/function relationships. The basic principles of chemistry and their applications to solving human problems in areas such as toxicology, environmental science, agriculture, nutrition, forensics and medicine. Not open for major credit in Biochemistry or Chemistry. Not open to students with credit in CHEM 111, CHEM 124, or CHEM 127. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

CHEM 124. General Chemistry for Physical Science and Engineering I. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: MATH 118 or MATH 330. Recommended: High school chemistry or equivalent.

Introduction to atomic theory, chemical reactions, bonding, stoichiometry, nomenclature, gas laws, thermochemistry, molecular structure, and intermolecular forces. Intended primarily for students in engineering and/or physical sciences. Not open to students with credit in CHEM 127. Credit will be granted in only one of the following courses: CHEM 110, CHEM 124, or CHEM 127. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

CHEM 125. General Chemistry for Physical Science and Engineering II. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: CHEM 124, or AP Chemistry score of 5.

Topics include solution chemistry, thermodynamics, kinetics, equilibrium (including acids and bases), electrochemistry, and nuclear chemistry. Not open to students with credit in CHEM 128. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

CHEM 126. General Chemistry for Physical Science and Engineering III. 4 units

Term Typically Offered: SP

Prerequisite: CHEM 125 with a grade of C- or better or consent of instructor.

Topics in equilibrium, kinetics, acid-base chemistry, and molecular structure, contextualized within major sub-disciplines of chemistry. Not open to students with credit in CHEM 129. 3 lectures, 1 laboratory.

CHEM 127. General Chemistry for Agriculture and Life Science I. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: MATH 118 or MATH 330. Recommended: High school chemistry or equivalent.

Introduction to atomic theory, chemical reactions, bonding, stoichiometry, nomenclature, gas laws, thermochemistry, molecular structure, and intermolecular forces. Intended primarily for students in agriculture and life sciences. Not open to students with credit in CHEM 124. Credit will be granted in only one of the following courses: CHEM 110, CHEM 124, or CHEM 127. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

CHEM 128. General Chemistry for Agriculture and Life Science II. 4 units

Term Typically Offered: W, SP

Prerequisite: CHEM 127 or AP Chemistry score of 5.

Continuation of CHEM 127. Colligative properties, colloids and solutions, oxidation-reduction reactions, electrochemistry, kinetics, equilibria, and thermodynamics. Not open to students with credit in CHEM 125. 3 lectures, 1 laboratory.

CHEM 129. General Chemistry for Agriculture and Life Science III. 4 units

Term Typically Offered: F, SP

Prerequisite: CHEM 128.

Continuation of CHEM 128. Acid and base equilibria, buffers, transition elements, solubility, complex ions, hybrid orbital theory, molecular orbital theory, and nuclear chemistry. Laboratory study of the chemical properties and semi-micro qualitative analysis of the representative group elements of the periodic table. Not open to students with credit in CHEM 126. 3 lectures, 1 laboratory.

CHEM 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: TBD

Prerequisite: CHEM 111, CHEM 124, or CHEM 127 and consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

CHEM 201. Undergraduate Research. 1-2 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Consent of instructor.

Research under faculty supervision. Credit/No Credit grading only. Total credit limited to 10 units.

CHEM 202. Orientation to Biotechnology. 2 units

Term Typically Offered: F, W

Prerequisite: Completion of a course with a BIO, BOT or MCRO prefix and a course with a CHEM prefix.

Introduction to the diversity of fields in biotechnology. Applications in agriculture, nutrition, medicine and environmental problems. 1 lecture, 1 activity. Crosslisted as BIO/CHEM 202.

CHEM 203. Undergraduate Seminar I. 1 unit

Term Typically Offered: W, SP

CR/NC

Prerequisite: CHEM 126.

Introduction to basic scientific literature and scientific presentation skills. Targeted advising and preparation for research and career opportunities. Designed for second-year students majoring in Biochemistry or in Chemistry. Credit/No Credit grading only. 1 seminar.

CHEM 212. Introduction to Organic Chemistry. 5 units

Term Typically Offered: TBD

Prerequisite: CHEM 111, CHEM 124 or CHEM 127.

Structure, isomerism, nomenclature, fundamental reactions of major functional groups and applications of organic chemicals in agriculture, medicine, industry, and the home. CHEM 212 accepted in lieu of CHEM 312, but not for upper division credit. Not open to students with credit in CHEM 312, CHEM 216/316. 4 lectures, 1 laboratory.

CHEM 216. Organic Chemistry I. 5 units

Term Typically Offered: F, W

Prerequisite: CHEM 126 or CHEM 129 with a grade of C- or better or consent of instructor.

Fundamental concepts and laboratory skills of organic chemistry. Structure, bonding, nomenclature, isomerism, stereochemistry and physical properties of organic compounds. Introduction to spectroscopy. Reactions and mechanisms of alkanes, alkenes and alkyl halides. Fundamental laboratory techniques in organic chemistry. Not open to students with credit in CHEM 316. 4 lectures, 1 laboratory.

CHEM 217. Organic Chemistry II. 3 units

Term Typically Offered: W, SP

Prerequisite: CHEM 216 with a grade of C- or better or consent of instructor. Corequisite: CHEM 221 for Chemistry and Biochemistry majors; or CHEM 220 for non-Chemistry and non-Biochemistry majors.

Properties and reactions of carbonyl compounds, alcohols, ethers, amines and carbohydrates with an in-depth treatment of the reaction mechanisms. Introductory concepts and applications of infrared and NMR spectroscopy. Not open to students with credit in CHEM 317. 3 lectures.

CHEM 218. Organic Chemistry III. 3 units

Term Typically Offered: F, SP

Prerequisite: CHEM 217 with a grade of C- or better or consent of instructor. Corequisite: CHEM 324 for Chemistry and Biochemistry majors; or CHEM 223 for non-Chemistry and non-Biochemistry majors.

Properties and reactions of alkynes, heterocyclic and aromatic compounds with an in-depth treatment of the mechanisms of the reactions. Introductory concepts and applications of ultraviolet spectroscopy and mass spectrometry. Not open to students with credit in CHEM 318. 3 lectures.

CHEM 220. Organic Chemistry Laboratory For Life Sciences II. 1 unit

Term Typically Offered: W, SP

Corequisite: CHEM 217.

Laboratory experiments exploring reactions in organic chemistry, applying fundamental laboratory techniques covered in CHEM 216. Not open to Chemistry and Biochemistry majors. 1 laboratory.

CHEM 221. Organic Chemistry Laboratory II. 2 units

Term Typically Offered: W, SP

Prerequisite: major in Chemistry or Biochemistry. Corequisite: CHEM 217.

Laboratory experiments exploring reactions in organic chemistry, applying fundamental laboratory techniques covered in CHEM 216. 2 laboratories.

CHEM 223. Organic Chemistry Laboratory for Life Sciences III. 1 unit

Term Typically Offered: F, SP

Corequisite: CHEM 218.

Practice in multi-step organic synthesis, enzymatic organic chemistry, biomimetic organic chemistry. Not open to Biochemistry or Chemistry majors. 1 laboratory.

CHEM 231. Quantitative Analysis. 5 units

Term Typically Offered: TBD
Prerequisite: CHEM 126 or CHEM 129.

Theory and application of chemical equilibrium to analytical problems. Survey of important analytical methods with stress placed on the theory and application associated with titrimetric and spectrophotometric analysis. 3 lectures, 2 laboratories.

CHEM 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CHEM 302. Marine Chemistry. 3 units

Term Typically Offered: SP
Prerequisite: CHEM 216 or CHEM 312.

Introduction to chemical processes in the ocean including chemical oceanography and marine chemical ecology. 3 lectures.

CHEM 303. Undergraduate Seminar II. 1 unit

Term Typically Offered: F, W, SP
CR/NC
Prerequisite: CHEM 203 and CHEM 218.

Advanced exploration of more sophisticated scientific literature and scientific presentation skills. Targeted advising and preparation for research and career opportunities. Designed for third-year CHEM and BCHM majors. Credit/No Credit grading only. 1 seminar.

CHEM 308. Genetic Engineering Technology. 4 units

Term Typically Offered: W
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: CHEM 110, CHEM 124, or CHEM 127.

Introduction to the biology, methodology, and techniques used in genetic engineering. Potential benefits and problems in application within agriculture, nutrition, medicine and environmental context, including the underlying ethical questions. Not open to students with credit in CHEM 373, or to Biological Sciences, Marine Sciences, or Microbiology majors. 4 lectures. Crosslisted as BIO/CHEM 308. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

CHEM 312. Organic Chemistry: Fundamentals and Applications. 5 units

Term Typically Offered: F,W,SP,SU
Prerequisite: CHEM 125 or CHEM 128.

Structure, isomerism, nomenclature, fundamental reactions of major functional groups and applications of organic chemicals in agriculture, medicine, industry, and the home. Not open to students with credit in CHEM 212 or CHEM 216/316. 4 lectures, 1 laboratory.

CHEM 314. Biochemistry: Fundamentals and Applications. 5 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Prerequisite: Junior standing; completion of GE Area A with grades C- or better; completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); completion of GE Area B2; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: CHEM 212, CHEM 216, CHEM 312, or CHEM 316.

Chemistry of biomolecules including carbohydrates, proteins, lipids, vitamins, enzymes and hormones. Basic molecular biology with applications to biotechnology and genetic engineering. Practical intermediary metabolism of prokaryotic and eukaryotic systems. 4 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

CHEM 324. Organic Chemistry Laboratory III. 2 units

Term Typically Offered: F, SP
Prerequisite: major in Chemistry or Biochemistry. Corequisite: CHEM 218.

Practice in multiple step organic synthesis, column chromatography, vacuum distillation, enzymes as chemical reagents, inert atmosphere techniques, introduction to FT NMR spectroscopy and mass spectrometry, survey of organic chemical literature. 2 laboratories.

CHEM 331. Quantitative Analysis. 5 units

Term Typically Offered: F, SP, SU
Prerequisite: CHEM 126 or CHEM 129.

Theory and application of chemical equilibrium to analytical problems. Survey of important analytical methods with stress placed on the theory and application associated with titrimetric and spectrophotometric analysis. 3 lectures, 2 laboratories.

CHEM 341. Environmental Chemistry: Water Pollution. 3 units

Term Typically Offered: TBD
Prerequisite: CHEM 126 or CHEM 129; and CHEM 212 or CHEM 312; or CHEM 216 or CHEM 316.

Chemical aspects of water and water pollution: alkalinity; acid deposition, particularly relating to lake and stream acidification and forest decline; drinking water treatment and trihalomethanes; wastewater treatment; detergents, builders, and eutrophication; pesticides; other toxic organic compounds such as PCBs and dioxin; hazardous wastes; toxic elements such as Pb, Hg, Sn, Cd, and Se. 3 lectures.

CHEM 349. Chemical and Biological Warfare. 4 units

Term Typically Offered: F, SP
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; CHEM course in GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); BIO or MCRO course in GE Area B2; and completion of GE Area B4 with a grade of C- or better in one course (GE Area B1 for students on the 2019-20 or earlier catalogs).

History, development, and use of chemical and biological warfare (CBW). Chemical and biological disarmament. Production and destruction of CBW agents. CBW terrorism. Ethics of CBW. 2 lectures, 2 seminars. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

CHEM 351. Physical Chemistry I. 3 units

Term Typically Offered: F, W

Prerequisite: CHEM 126 or CHEM 129; MATH 143; PHYS 122 or PHYS 132.

Basic physical chemistry for the study of chemical and biochemical systems. Kinetic-molecular theory, gas laws, principles of thermodynamics. 3 lectures.

CHEM 352. Physical Chemistry II. 3 units

Term Typically Offered: W, SP

Prerequisite: CHEM 351.

Application of physical chemistry to chemical and biochemical systems. Electrochemistry, kinetics, viscosity, surface and transport properties. 3 lectures.

CHEM 353. Physical Chemistry III. 3 units

Term Typically Offered: F, SP

Prerequisite: CHEM 352.

Principles and applications of quantum chemistry. Chemical bonding and molecular structure. Spectroscopy and diffraction. 3 lectures.

CHEM 356. Physical Chemistry Laboratory. 2 units

Term Typically Offered: F, W, SP

GWR

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and CHEM 231/331. Corequisite: CHEM 352.

Experimental studies of gases, solutions, thermochemistry, chemical and phase equilibria, electrochemistry, chemical and enzyme kinetics, computational methods and applications to chemistry and biochemistry. Written communication of scientific results using applicable literature and databases. 2 laboratories. Fulfills GWR.

CHEM 357. Physical Chemistry III Lab. 1 unit

Term Typically Offered: F, SP

Corequisite: CHEM 353.

Experimental and computational investigations of quantum chemistry, spectroscopy, symmetry and statistical chemistry. 1 laboratory.

CHEM 369. Biochemical Principles. 5 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades C- or better; completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); BIO 161; and CHEM 217 or CHEM 317.

Chemistry and function of major cellular constituents: proteins, lipids, carbohydrates, nucleic acids, and membranes. Mechanisms of protein function and regulation and enzyme catalysis. 4 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

CHEM 372. Metabolism. 4 units

Term Typically Offered: F, SP

Prerequisite: CHEM 371.

Intermediary metabolism of carbohydrates, lipids, amino acids and nucleotides, regulation and integration of metabolic pathways, bioenergetics, photosynthesis, electron transport, nitrogen fixation, biochemical function of vitamins and minerals. 4 lectures.

CHEM 373. Molecular Biology. 3 units

Term Typically Offered: W, SP

Prerequisite: CHEM 371.

Structure of nucleic acids and chromosomes. Mechanisms and regulation of nucleic acid and protein synthesis. Molecular biology techniques. 3 lectures.

CHEM 377. Chemistry of Drugs and Poisons. 3 units

Term Typically Offered: W, SP

Prerequisite: CHEM 313 or CHEM 371.

Introduction to pharmacology and toxicology: history, sources, development and testing, physical and chemical properties, biochemical and physiological effects, mechanisms of action, and the therapeutic uses and toxicology of common drugs and poisons. 3 lectures.

CHEM 400. Special Problems for Advanced Undergraduates. 1-3 units

Term Typically Offered: TBD

Prerequisite: Junior standing and consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 3 units per quarter. 1-3 laboratories.

CHEM 401. Advanced Undergraduate Research. 1-2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Research under faculty supervision. Total credit limited to 10 units. 6 units may be applied to approved chemistry electives.

CHEM 403. Undergraduate Seminar III: Senior Project. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: CHEM 303 and CHEM 352.

Culminating experience with high level scientific literature and scientific presentation skills. Targeted advising and preparation for research and career opportunities. Designed for fourth-year CHEM and BCHM majors. 1 seminar.

CHEM 405. Advanced Physical Chemistry. 3 units

Term Typically Offered: TBD

Corequisite: CHEM 353.

Selected advanced topics in physical chemistry, which may include statistical mechanics, computational chemistry, nonequilibrium thermodynamics, lasers in chemistry, solid-state and/or advanced spectroscopy. Total credit limited to 6 units. 3 lectures.

CHEM 414. Advanced Organic Chemistry - Mechanisms. 3 units

Term Typically Offered: W
Prerequisite: CHEM 218 or CHEM 318.

A mechanistic study of organic reactions; correlation of structure with reactivity; reaction intermediates and species involved in reactions; methods of probing reaction mechanisms. 3 lectures.

CHEM 418. Neurochemistry. 3 units

Term Typically Offered: F
Prerequisite: BIO 161 and CHEM 217.

Introduction to the chemistry of neurotransmission. Emphasis on molecular makeup and function of voltage gated ion channels; receptors and enzymes involved in signal transduction; biosynthesis, storage, release, reuptake, and breakdown of major neurotransmitters. Mechanism of action of agonists and antagonists, and their effects on the central and peripheral nervous systems. 3 lectures.

CHEM 420. Advanced Organic Chemistry - Synthesis. 3 units

Term Typically Offered: SP
Prerequisite: CHEM 218/318.

Modern methods of organic synthesis. Carbon-carbon bond forming reactions, functional group transformations, protecting groups, strategies of total synthesis of natural products. 3 seminars.

CHEM 428. Nutritional Biochemistry. 3 units

Term Typically Offered: TBD
Prerequisite: CHEM 371.

Nutritional aspects of biochemistry. Topics include essential and energy providing nutrients, vitamins and minerals, deficiencies, degenerative and genetic diseases of metabolism, hormones and brain chemistry, other current topics. Emphasis on current research and controversy. 3 lectures. Formerly CHEM 528.

CHEM 432. Physical Biochemistry. 3 units

Term Typically Offered: SP
Prerequisite: CHEM 371. Recommended: CHEM 351.

Principles of biochemistry and physical chemistry applied to structure and function of biomacromolecules. Emphasis on the techniques used in the study of protein/ligand binding, macromolecular structure and dynamics, and on understanding current literature. 3 lectures.

CHEM 439. Instrumental Analysis. 5 units

Term Typically Offered: W
Prerequisite: CHEM 231/331, CHEM 354. Recommended: CHEM 353.

Theory, practice and method selection of modern instrumental analytical techniques, including spectroscopic, electrochemical, chromatographic and thermal methods. Current industrial applications. Laboratory work emphasizes optimization of experimental parameters. 3 lectures, 2 laboratories.

CHEM 441. Bioinformatics Applications. 4 units

Term Typically Offered: F, SP
Prerequisite: BIO 302, BIO 303, BIO 351, or CHEM 373.

Introduction to new problems in molecular biology and current computer applications for genetic database analyses. Use of software for: nucleic acid, genome and protein sequence analysis; genetic databases, database tools; industrial applications in bioinformatics; ethical and societal concerns. 3 lectures, 1 laboratory. Crosslisted as BIO/CHEM 441.

CHEM 444. Polymers & Coatings I. 3 units

Term Typically Offered: F
Prerequisite: CHEM 212/312 or CHEM 216/316.

Physical properties of polymers and coatings and their measurement. Molecular weight averages, glass transition, thermodynamics of polymers. Viscoelastic properties, rheology, molecular weight determination. Thermal analysis, spectroscopic analysis, mechanical testing. 3 lectures.

CHEM 445. Polymers & Coatings II. 3 units

Term Typically Offered: W
Prerequisite: CHEM 217/317 and CHEM 444.

Introduction to polymerization methods and mechanisms. Chemistry of initiators, catalysts and inhibitors, kinetics of polymerization. Uses of representative polymer types. Synthesis, film formation, structure and properties of polymers commonly used in coatings and adhesives. 3 lectures.

CHEM 446. Surface Chemistry of Materials. 3 units

Term Typically Offered: SP
Prerequisite: CHEM 125 or CHEM 128; CHEM 351, MATE 380, or ME 302.

Surface energy. Capillarity, solid and liquid interface, adsorption. Surface areas of solids. Contact angles and wetting. Friction, lubrication and adhesion. Relationship of surface to bulk properties of materials. Applications. 3 lectures. Crosslisted as CHEM/MATE 446.

CHEM 447. Polymers and Coatings Laboratory I. 2 units

Term Typically Offered: F
Corequisite: CHEM 444.

Experimental techniques of producing and characterizing coatings. Polymer characterization and analysis. Molecular weight analysis using viscometry, light scattering, and gel permeation chromatography. Thermal analysis using differential scanning calorimetry, thermal mechanical analysis and dynamic mechanical analysis. Polymer rheology. Infrared, Raman and FT-NMR spectroscopy. Atomic force microscopy. 2 laboratories.

CHEM 448. Polymers and Coatings Laboratory II. 2 units

Term Typically Offered: W
Prerequisite: CHEM 447. Corequisite: CHEM 445.

Polymer synthesis using solution, suspension, bulk, emulsion techniques. Synthesis of chain growth polymers using free radical, anionic, cationic, and other catalysts. Synthesis of step-growth polymers. Kinetics of polymer reactions. Synthesis of resins used in modern coatings. 2 laboratories.

CHEM 449. Polymers and Coatings Internship. 2 units

Term Typically Offered: F,W,SP, SU
Prerequisite: CHEM 444.

Selected students will spend up to 12 weeks with an approved polymers and coatings firm engaged in production or related business. Time will be spent applying and developing production and technical skills and abilities in the polymers and coatings industry.

CHEM 450. Polymers and Coatings III. 3 units

Term Typically Offered: SP

Prerequisite: CHEM 444 or CHEM 544.

Formulation of modern coatings. Raw materials including resins, solvents, pigments, and additives. Formulation principles for solvent-borne and coatings, waterborne, powder, radiation cure and architectural coatings. Regulatory issues; VOC's. Coating properties, film formation, film defects, application methods, color and color acceptance. Not open to students with credit in CHEM 550. 3 lectures.

CHEM 451. Polymers and Coatings Laboratory III. 2 units

Term Typically Offered: SP

Prerequisite: CHEM 447 or CHEM 547. Corequisite: CHEM 450.

Recommended: CHEM 445 or CHEM 545; CHEM 448 or CHEM 548; CHEM 446.

Preparation and characterization of coatings - solvent based and waterborne. Thermoplastic and thermosetting coatings. Coating film preparation methods. Applications of spectroscopy, scanning probe microscopy, thermal analysis, rheology in characterizing coatings. VOC, long-term exposure testing. Measurement of appearance (color, gloss). Not open to students with credit in CHEM 551. 2 laboratories.

CHEM 454. Functional Polymeric Materials. 4 units

Term Typically Offered: SP

Prerequisite: CHEM 212 or CHEM 216 or CHEM 312 or CHEM 316; CHEM 351 or MATE 380; or graduate standing.

Structure-property-processing correlations of functional polymeric materials. Additive group contribution methodologies for predicting and determining physical properties. Semi-empirical approaches for estimating and evaluating the values of physical properties from chemical structures. 4 lectures.

CHEM 458. Advanced Organic Chemistry: Spectroscopy. 3 units

Term Typically Offered: SP

Prerequisite: CHEM 324.

Separation, purification, and identification of organic molecules using chemical and instrumental methods, including nuclear magnetic resonance, infrared and ultraviolet spectroscopy and mass spectrometry, and techniques in high-resolution FT-NMR. 1 lecture, 2 laboratories.

CHEM 459. Undergraduate Seminar. 2 units

Term Typically Offered: F,W,SP,SU

Corequisite: CHEM 218 or CHEM 318 and junior standing.

Oral presentation of current developments in chemistry based on current literature. Searching for, organizing and presenting developments from current literature in chemistry and biochemistry. Preparation for employment and for independent work, including senior project, in chemistry and biochemistry. 2 seminars.

CHEM 461. Senior Project Report. 1 unit

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Completion of a senior project report under faculty supervision. Minimum 30 hours time commitment.

CHEM 463. Honors Research. 1 unit

Term Typically Offered: F,W,SP,SU

Prerequisite: Junior standing and consent of instructor.

Advanced laboratory research. Results are presented in a poster session or other public forum. Total credit limited to 2 units with a maximum of 1 unit per quarter. 1 laboratory.

CHEM 465. College Teaching Practicum. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing, CHEM 231/331 (or permission of instructor), evidence of satisfactory preparation in chemistry; department chair approval required.

Teaching assignment in an undergraduate college classroom. Includes teaching and related activities under the direction of a permanent faculty member in the Department of Chemistry and Biochemistry. Total credit limited to 4 units.

CHEM 466. Learning Assistant Seminar. 2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing and consent of instructor.

Pedagogical instruction and introduction to education research for Chemistry Learning Assistants. Effective questioning, the effect of explanatory knowledge on student learning, student misconceptions in chemistry, collaborative problem solving techniques in chemistry, studio curriculum development, content in the general chemistry curriculum. Total credit limited to 4 units. Credit/No Credit grading only. 2 seminars.

CHEM 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: F

Prerequisite: CHEM 351, CHEM 217 or CHEM 317.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CHEM 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CHEM 474. Protein Techniques Laboratory. 3 units

Term Typically Offered: F, W, SP

Prerequisite: CHEM 371.

Experiments in protein purification and analysis from recombinant sources. Ion-exchange and affinity chromatography, electrophoresis and blotting. UV, chemical, immune, and fluorescent detection. Enzyme kinetic analysis. 1 lecture, 2 laboratories.

CHEM 475. Molecular Biology Laboratory. 3 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 161, and grade of C- or better in BIO 351 or CHEM 373 or consent of instructor.

Introduction to techniques used in molecular biology and biotechnology; DNA extraction, characterization, cloning, Southern blotting, reverse transcription, polymerase chain reaction, and sequencing analysis. 1 lecture, 2 laboratories. Crosslisted as BIO/CHEM 475.

CHEM 476. Gene Expression Laboratory. 3 units

Term Typically Offered: SP

Prerequisite: BIO/CHEM 475 with a grade of C- or better or consent of instructor; CHEM 313 or CHEM 371, or graduate standing in Biological Sciences.

Heterologous gene expression of a recombinant protein in a microbial system: gene cloning, construction of expression plasmid, DNA sequence analysis, transformation of microbial host, selection and analysis of transformed host cells, expression and purification of recombinant protein. 1 lecture, 2 laboratories. Crosslisted as BIO/CHEM 476.

CHEM 477. Biochemical Pharmacology. 3 units

Term Typically Offered: TBD

Prerequisite: CHEM 218 or CHEM 318.

Consideration of current selected topics in pharmacology and drug targeting. 3 lectures.

CHEM 481. Inorganic Chemistry. 3 units

Term Typically Offered: F

Prerequisite: CHEM 352 and CHEM 231/331.

A systematic study of chemical and physical properties of inorganic compounds based on periodic groupings with emphasis on chemical bonding and structure. Topics will include coordination chemistry and kinetics, organometallic chemistry, advanced acid-base relationships and bonding theories plus other selected topics. 3 lectures.

CHEM 484. Inorganic Chemistry Laboratory. 2 units

Term Typically Offered: F

Corequisite: CHEM 481.

Laboratory techniques in inorganic chemistry. Synthetic and analytic techniques as applied to inorganic and organometallic chemistry. 2 laboratories.

CHEM 485. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. 2 units only applicable to approved chemistry electives. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

CHEM 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. 2 units only applicable to approved chemistry electives. Major credit limited to 4 units; total credit limited to 24 units. Credit/No Credit grading only.

CHEM 500. Special Problems for Graduate Students. 1-3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 6 units, with a maximum of 3 units per quarter.

CHEM 544. Polymer Physical Chemistry and Analysis. 3 units

Term Typically Offered: F

Prerequisite: CHEM 212/312 or CHEM 216/316 or equivalent; CHEM 351 or equivalent.

Physical properties of polymers and coatings and their measurement; molecular weight averages, glass transition, thermodynamics of polymers, viscoelastic properties, rheology; molecular weight determination, thermal analysis, spectroscopic analysis, mechanical testing, atomic force microscopy. Special individual project. Not open to students with credit in CHEM 444. 3 lectures.

CHEM 545. Polymer Synthesis and Mechanisms. 3 units

Term Typically Offered: W

Prerequisite: CHEM 544.

Polymerization methods and mechanisms; chemistry of initiators, catalysts and inhibitors; use of representative types; synthesis, structure and properties of polymers commonly used in coatings and adhesives. Special individual project. Not open to students with credit in CHEM 445. 3 lectures.

CHEM 547. Polymer Characterization and Analysis Laboratory. 2 units

Term Typically Offered: F

Corequisite: CHEM 544.

Polymer characterization and analysis. Molecular weight analysis using viscometry, light scattering, and gel permeation chromatography. Thermal analysis using differential scanning calorimetry, thermal mechanical analysis and dynamic mechanical analysis. Polymer rheology. Infrared, Raman and FT-NMR spectroscopy. Atomic force microscopy. Special individual project. Not open to students with credit in CHEM 447. 2 laboratories.

CHEM 548. Polymer Synthesis Laboratory. 2 units

Term Typically Offered: W

Prerequisite: CHEM 547. Corequisite: CHEM 545.

Polymer synthesis using solution, suspension, bulk, emulsion techniques. Synthesis of chain growth polymers using free radical, anionic, cationic, and other catalysts. Synthesis of step-growth polymers. Kinetics of polymer reactions. Synthesis of resins used in modern coatings. Special individual project. Not open to students with credit in CHEM 448. 2 laboratories.

CHEM 550. Coatings Formulation Principles. 3 units

Term Typically Offered: SP

Prerequisite: CHEM 444 or CHEM 544.

Formulation of modern coatings. Raw materials including resins, solvents, pigments, and additives. Formulation principles for solvent-borne and high solids coatings, water-borne coatings, powder coatings, radiation cure coatings and architectural coatings. Regulatory issues; VOC's. Coating properties, film formation, film defects, application methods, color and color acceptance. Special individual project. 3 lectures.

CHEM 551. Coatings Formulation Laboratory. 2 units

Term Typically Offered: SP

Corequisite: CHEM 550.

Laboratory formulation of modern coatings. Formation of pigment dispersions. Formulation of solvent-borne and high solids coatings, water-borne coatings, powder coatings, radiation cure coatings and architectural coatings. VOC measurements. Measurement of coating properties, film formation, film defects, application methods, color and color acceptance, hiding, gloss. Accelerated weathering. Special individual project. 2 laboratories.

CHEM 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Schedule of Classes will list title selected. Total credit limited to 8 units. 1-4 lectures.

CHEM 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CHEM 590. Graduate Seminar in Polymers and Coatings. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in the Polymers and Coatings program or consent of instructor.

Problems and topics in polymers and coatings selected according to the interest and needs of the students enrolled. Total credit limited to 3 units. 1 seminar.

CHEM 598. Graduate Project. 3 units

Term Typically Offered: F,W,SPSU

Prerequisite: CHEM 545, CHEM 547, CHEM 548, CHEM 550, CHEM 551.

Supervised industrial graduate internship in polymers and coatings science. Provides students with industrial research experience. Requires approval of graduate advisor. Students engage in industrial research and development at an approved industry, make regular reports back to graduate advisor, and present formal report and seminar on work each quarter. Total credit limited to 9 units.

CHEM 599. Graduate Thesis. 3 units

Term Typically Offered: F,W,SPSU

Prerequisite: CHEM 545, CHEM 547, CHEM 548, CHEM 550, CHEM 551.

Directed graduate research in specialized advanced topics related to polymers and coatings science, leading to a graduate thesis of suitable quality. Requires approval of graduate advisor. Students are expected to work independently and report weekly to faculty advisor. Total credit limited to 9 units.

Child Development (CD)

undefined

CD Courses

CD 102. Orientation to the Child Development Major. 2 units

Term Typically Offered: F

Prerequisite: CD majors only.

Introduction to the child development major, self-assessments, career opportunities, university and community resources, and the program at Cal Poly. Course may be offered in classroom-based or online format. 2 lectures.

CD 131. Observing and Interacting with Children. 4 units

Term Typically Offered: F, W, SP

Observation methods and guidance techniques for adults working with children in family, community, and educational settings. 3 lectures, 1 activity.

CD 200. Special Problems. 1-4 units

Term Typically Offered: TBD

Supervised investigation, including a written report, of a topic chosen with prior approval of instructor. Total credit limited to 6 units, with a maximum of 4 units per quarter.

CD 207. Children's Learning and Development in Educational Settings. 4 units

Term Typically Offered: TBD

Prerequisite: Sophomore standing; PSY 201 or PSY 202 or admission to the university with the intent to enter the MSTEP Program.

Study of theories and research about the development and learning of children and young adolescents within diverse backgrounds, and application to teaching in public school settings. Observations/interactions with children in school settings. 3 lectures, 1 activity. Participation in public schools requires mandated fingerprint clearance. Crosslisted as CD/EDUC 207.

CD 230. Preschool Laboratory. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CD 131 and CD/PSY 256.

Preliminary teaching experience with children in a preschool laboratory setting. Participant planning, execution and evaluation of age-appropriate activities. Observation is used as the basis for planning for the development of the whole child. 2 lecture, 2 laboratories.

CD 254. Family Psychology. 4 units

Term Typically Offered: F, W, SP
Prerequisite: PSY 201 or PSY 202.

Introduction to research and theory on family relationships and behavior across the lifespan. Contextual influences, diversity of family forms, and topics such as love, mate selection, marital quality, parenting, gender, household work, divorce, and remarriage. 4 lectures. Crosslisted as CD/PSY 254.

CD 256. Developmental Psychology. 4 units

Term Typically Offered: F, W
Prerequisite: PSY 201 or PSY 202.

Introduction to the scientific study of development with emphasis on the lifespan, from infancy to old age. Basic research and concepts in understanding social, emotional, cognitive, contextual, and diversity influences on development. 4 lectures. Crosslisted as CD/PSY 256.

CD 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CD 302. Developmental Science Technology Lab. 2 units

Term Typically Offered: F, W, SP
Prerequisite: CD 102 and CD/PSY 256. Co-requisite: Any 300-400 level CD course.

Technology applications (e.g., websites, film, podcasts, blogs) as they relate to communication of research and theory in developmental science. Digital tools used by developmental researchers and professionals when working with children, youth, and families. 2 laboratories.

CD 304. Infant and Toddler Development. 4 units

Term Typically Offered: W, SP
Prerequisite: CD/PSY 256.

Human development from conception through the second year of life. Examination of theory and research in multiple domains of development. Consideration of environments and activities which enhance the emerging capabilities of infants and toddlers. 4 lectures.

CD 305. Early and Middle Childhood Development. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CD/PSY 256 or CD/EDUC 207.

In-depth study of theory and research on development in early and middle childhood, especially within physical, cognitive, social, and emotional domains. Consideration of case studies and current practices in light of theoretical perspectives and current research. Course may be offered in classroom-based or online format. 4 lectures.

CD 306. Adolescence. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CD/PSY 256 or CD/EDUC 207.

Psychological analysis of the years from prepubescence to young adulthood. Current research on behavior and development during adolescence with emphasis on physical, affective, cognitive, sociocultural, historical, family, peer and school aspects of life during the post-child, pre-adult years. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as CD/PSY 306.

CD 329. Research Methods in Child Development. 4 units

Term Typically Offered: F, W
Prerequisite: PSY 256, STAT 217.

Introduction to research methods in child development. Critically evaluating research literature, generating research questions, and conducting observations and interviews with children and adolescents. 3 lectures, 1 activity.

CD 350. Developmental Issues in Education. 4 units

Term Typically Offered: W, SP
Prerequisite: CD/EDUC 207 or PSY 256.

Current issues and research concerning how children and youth develop and learn in school. Topics may include motivation, views of intelligence, teacher and student relations, constructivist learning environments, socioemotional learning, school climates, home-school connections. 4 lectures.

CD 351. Learning in Out-of-School Time. 4 units

Term Typically Offered: W, SP
Prerequisite: CD/PSY 256 or CD/EDUC 207.

How children and youth develop and learn in settings and activities outside of formal schooling, such as everyday family activities, informal learning institutions (e.g., museums), nature, and organized extracurricular activities. Research findings and theoretical perspectives on how activity in such settings supports development and learning. 4 lectures.

CD 356. Behavioral Disorders in Childhood. 4 units

Term Typically Offered: F, SP
Prerequisite: PSY 201 or PSY 202; CD/PSY 256 or CD 305; and junior standing.

Applications of psychological principles to childhood behavioral disorders. Aggression, delinquency, stress reactions, motivational, perceptual-attentional deficiencies, psychoses, anxiety disorders, biological dysfunctions, and social, emotional and intellectual disabilities. Course may be offered in classroom-based or online format. 4 seminars. Crosslisted as CD/PSY 356. Formerly CD 456.

CD 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD
Prerequisite: Junior standing.

Supervised investigation, including a written report, of a topic chosen with prior approval of instructor. Total credit limited to 6 units, with a maximum of 4 units per quarter.

CD 411. Children, Adolescents & Technology. 4 units

Term Typically Offered: TBD

Prerequisite: CD 329; and two of the following: CD 304, 305, or CD 306.

Examination of research and theory on how use of digital technologies (e.g., electronic toys, television, video games, virtual reality, educational technologies, assistive technologies, social media) relates to children's and adolescents' development across domains. 4 lectures. Formerly CD 413.

CD 417. Interpersonal Relationships in Childhood and Adolescence. 4 units

Term Typically Offered: SP

Prerequisite: CD 304, CD 305 or CD 306; or CD/PSY 256 and PSY 305.

Current theories and research on the development of interpersonal relationships in childhood and adolescence. Topics may include parent-child relationships, peer relationships in childhood, intimate relationships in adolescence. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Crosslisted as CD/PSY 417.

CD 424. Children's Development in Diverse Cultures. 4 units

Term Typically Offered: F, W

Prerequisite: Two of the following: CD 304, CD 305, CD 306; junior standing or consent of instructor.

Examination of research on child and adolescent development in diverse families and community settings. Topics include close examination of cultural communities in different countries (cross-cultural) and in the United States (multicultural) using sociocultural frameworks. 4 lectures.

CD 431. Assessing Children's Development and Environments. 4 units

Term Typically Offered: TBD

Prerequisite: CD 304 or CD 305 or PSY 419 or PSY 420 or PSY 421; and CD 329 or PSY 329.

Current developmental and environmental assessments used in care and educational settings and in prevention programs and research. Practice using, creating, and evaluating child assessments. 3 lectures, 1 activity. Crosslisted as CD/PSY 431.

CD 448. Research Internship. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: CD 230 and CD 329.

Faculty-supervised research experience on various topics related to child and adolescent development. Student apprenticeship with a department faculty member engaging in a research project. Credit/No Credit grading only. Formerly CD 333.

CD 449. Advanced Research Internship. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: CD 333 or CD 448.

Faculty-supervised research experience on various topics related to child and adolescent development. Student apprenticeship with a department faculty member to conduct aspects of a research project. Credit/No Credit grading only. Formerly CD 433.

CD 450. Perspectives on Child and Adolescent Development. 4 units

Term Typically Offered: F, SP

Prerequisite: CD 304, CD 305, CD 306, CD 329 and senior standing.

Advanced study of theoretical perspectives and research on the development of children and adolescents and the implications for current practice and policy. 4 seminars. Formerly CD 401.

CD 453. Supervised Fieldwork Internship. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Psychology and Child Development majors only; CD 230, PSY 323, junior standing and consent of instructor.

Faculty supervised fieldwork experience. Role of professional apprentice is experienced and analyzed by each student. Credit/No Credit grading only. Formerly CD 330.

CD 454. Advanced Supervised Fieldwork Internship. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: CD 330 or CD 453; and consent of instructor; Psychology and Child Development majors only.

Faculty-supervised preprofessional experience in a career-related setting which complements the CD 330 internship. Such roles as master teacher, caseworker, therapeutic intern, administrative aide or program specialist are experienced and analyzed by each student. Credit/No credit grading only. Formerly CD 430.

CD 460. Child Abuse and Neglect. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202 and junior standing.

Issues in child maltreatment, including definitions and forms, causes, consequences, assessment, reporting, treatment, and prevention. Possible links among research, intervention, and public policy will be emphasized. 4 seminars. Crosslisted as CD/PSY 460.

CD 461. Senior Project Seminar. 2 units

Term Typically Offered: F, W

Prerequisite: Senior standing; CD 329; and Psychology and Child Development majors only.

Senior project expectations and skills. Students identify appropriate topics, methods and content for the senior project; to be presented in progress reports. Conduct literature reviews. 2 seminars.

CD 462. Senior Project. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CD 461.

Completion of a project under faculty supervision.

CD 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Chinese (CHIN)

undefined

CHIN Courses

CHIN 101. Elementary Mandarin Chinese I. 4 units

Term Typically Offered: F

Beginning Mandarin Chinese. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing and introduction to Chinese culture. Not open to students with credit in CHIN 141. 4 lectures.

CHIN 102. Elementary Mandarin Chinese II. 4 units

Term Typically Offered: W

Prerequisite: CHIN 101, CHIN 141, or appropriate score on placement exam or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing and introduction to Chinese culture. Not open to students with credit in CHIN 142. 4 lectures.

CHIN 103. Elementary Mandarin Chinese III. 4 units

Term Typically Offered: SP

Prerequisite: CHIN 102, CHIN 142, or appropriate score on placement exam or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing and introduction to Chinese culture. Not open to students with credit in CHIN 143. 4 lectures.

CHIN 141. Elementary Mandarin Chinese I Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: Acceptance into the Cal Poly Global Program.

Beginning Mandarin Chinese. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in CHIN 101. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

CHIN 142. Elementary Mandarin Chinese II Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 101, CHIN 141, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in CHIN 102. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

CHIN 143. Elementary Mandarin Chinese III Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 102, CHIN 142, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in CHIN 103. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

CHIN 201. Intermediate Mandarin Chinese I. 4 units

Term Typically Offered: F

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 103, CHIN 143, or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Mandarin Chinese within an intercultural context. Not open to students with credit in CHIN 241. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

CHIN 202. Intermediate Mandarin Chinese II. 4 units

Term Typically Offered: W

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 201, CHIN 241, or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Mandarin Chinese within an intercultural context. Not open to students with credit in CHIN 242. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

CHIN 203. Intermediate Mandarin Chinese III. 4 units

Term Typically Offered: SP

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 202, CHIN 242, or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Mandarin Chinese within an intercultural context. Not open to students with credit in CHIN 243. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

CHIN 241. Intermediate Mandarin Chinese I Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 103, CHIN 143, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Mandarin Chinese. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in CHIN 201. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

CHIN 242. Intermediate Mandarin Chinese II Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 201, CHIN 241, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Mandarin Chinese. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in CHIN 202. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

CHIN 243. Intermediate Mandarin Chinese III Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: CHIN 202, CHIN 242, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Mandarin Chinese. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in CHIN 203. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

City and Regional Planning (CRP)

undefined

CRP Courses

CRP 201. Basic Graphic Skills. 4 units

Term Typically Offered: F

Basic techniques used in graphic communication for representation of the real world on two-dimensional planes. Use of scale, drawing conventions, orthographic and isometric projections, perspective drawings. Basic design and site analysis skills. Sketching, delineation and rendering including the use of black and white and color techniques. 4 laboratories.

CRP 202. Urban Design Studio I. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: CRP 201.

Exploring elements and principles of environmental design. Understanding the form and character of the designed urban environment. Introduction to problem analysis and problem solving in environmental design. Implications of design decisions and solutions on urban context. Assignments of object, project and system scale in an urban context. 4 laboratories.

CRP 203. Urban Design Studio II. 4 units

Term Typically Offered: SP

Prerequisite: CRP 202 and CRP 204.

Applications of basic design fundamentals and skills to the design of environments through design exercises applied to planning. Problem analysis and problem solving skills as applied to environmental design issues. 4 laboratories.

CRP 204. Theories and Methods of Urban Design. 3 units

Term Typically Offered: W

Prerequisite: CRP 201. Corequisite: CRP 202.

Definition/nature of urban design: a typology of procedures and products. Urban design as a field between planning, architecture, and landscape architecture. Visual assessment and townscape movement. Environmental perception, behavior and spatial fit. Typo-morphology and the architecture of the city. 1 lecture, 2 activities.

CRP 211. Cities: Form, Culture and Evolution. 4 units

Term Typically Offered: W

Historical overview of the evolution of cities - how the form and function of cities evolved among different societies from antiquity to contemporary times. Includes early cities in Mesopotamia, Central America; Greece and Rome; Renaissance, Baroque; and North and South America. Course may be offered in classroom-based or online format. 4 lectures.

CRP 212. Introduction to Urban Planning. 4 units

Term Typically Offered: F, W, SP

Sustainability Related

Understanding the issues of contemporary urban growth and change. Development of theories of urban planning and design. Introduction to zoning, planning regulations and codes, and professional practice. Relationship of environmental design disciplines, citizen groups, and individuals to urban planning. Course may be offered in classroom-based or online format. 4 lectures.

CRP 213. Population, Housing and Economic Applications. 4 units

Term Typically Offered: F

Collection, organization, and presentation of information and data related to population, housing and employment. Analytical applications to estimate population over time, housing demand by type and income and employment by standard classification. Application of urban economic theory related to jobs and housing. 3 lectures, 1 laboratory.

CRP 214. Land Use and Transportation Studies. 4 units

Term Typically Offered: SP
Prerequisite: CRP 212.

How cities and regions work. Relationship between human activities and patterns of land use and circulation. Spatial analysis and location theories. Methods for conducting studies to describe, analyze, and map land uses. Regional-scale transportation analysis, traffic impact studies, and multimodal transportation plans. 3 lectures, 1 activity.

CRP 215. Planning for and with Multiple Publics. 4 units

Term Typically Offered: SP
USCP
Prerequisite: Completion of GE Area D1. Recommended: ES 112.

How the social/spatial relationships among racial/ethnic and gender groups are expressed in terms of human settlement patterns, civic involvement and everyday negotiations. Ways in which segregation and marginalization are expressed in western and non-western contexts. 4 lectures. Crosslisted as CRP/ES 215. Fulfills USCP.

CRP 216. Representing the City. 2 units

Term Typically Offered: F
Introduction to the understanding and the representation of the city through different analog and digital media. 1 lecture, 1 laboratory.

CRP 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CRP 303. Digital Cities. 4 units

Term Typically Offered: F, W, SU
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Areas D1 and D2.

Explores digital technology changing the way we plan, design, build, govern, and live in cities. Assess technologies for knowing, digitizing, and engaging citizens in city development, governance, and planning and managing cities. Opportunities to explore technology initiatives in community building. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

CRP 314. Planning Theory. 4 units

Term Typically Offered: W
Prerequisite: CRP 212.

Theories of planning. Role of planner in society, purpose of planning, administrative framework in which planning takes place. Alternative approaches to planning, values, ethics in planning. Activities aimed at exploring communicative and participatory aspects of planning theory. 3 lectures, 1 activity.

CRP 315. Fiscal and Project Feasibility. 4 units

Term Typically Offered: W
Prerequisite: One course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Analysis of the revenue streams and costs involved in project development. Impact analysis of costs and revenues on private and public sectors included. Construction of pro-formas for various project types. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

CRP 325. Reflections on Biking, Walking and the City. 4 units

Term Typically Offered: TBD
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Study of the design of cities for walking and bicycling and its importance to the future of transportation and the resilience of cities. Reflection on how bicycles and pedestrians shape the urban environment through literature, music, policy, and design practices. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

CRP 334. Cities in a Global World. 4 units

Term Typically Offered: W
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Examination of the changes in the social and spatial organization of urban settlements in the twenty-first century caused by the urbanization and globalization processes. Comparative analysis of the traditional and contemporary cities around the globe. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

CRP 336. Introduction to Environmental Planning. 4 units

Term Typically Offered: F
Sustainability Focused
Prerequisite: CRP 212.

Examination of the challenges that arise when human and natural systems interact and the tools planners have to manage this interaction. Relevant principles from a variety of disciplines are used to assess environmental problems and identify solutions in human-dominated systems. 4 lectures.

CRP 341. Urban Design Studio III. 4 units

Term Typically Offered: SP
Prerequisite: CRP 203; CRP 213; and CRP 214.

Urban design theories and methods related to planning and urban development. Integration of circulation, environmental, land-use, and design aspects. Infill or new development projects at the scale of a neighborhood, large PUD, complex circulation corridor, small town or planned community. 4 laboratories.

CRP 342. Environmental Planning Methods. 4 units

Term Typically Offered: W
Sustainability Related
Prerequisite: CRP 336.

Case studies and applications of theory and methods to regional and environmental systems. Interrelationships between natural, economic, and social and political systems. Application of California Environmental Quality Act and environmental impact assessment methods. Environmental equity and sustainable bioregions. 2 lectures, 2 laboratories.

CRP 351. Introduction to Emergency Management in California. 3 units

Term Typically Offered: TBD
Prerequisite: Completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs) or GE Area D.

Emergency management emphasizing the Standardized Emergency Management System (SEMS) and Emergency Operations Center (EOC) operations. Earthquake hazard used as the case to explore potential wide geographic impacts, multiple secondary hazards, and multidisciplinary problem-solving methods in natural disasters faced by local governments and communities. 2 lectures, 1 activity. Crosslisted as CRP/NR 351.

CRP 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Individual or group investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

CRP 401. Disaster Recovery. 3 units

Term Typically Offered: TBD
Prerequisite: CRP/NR 351.

Strategies and procedures for public sector management of recovery from disasters. Understanding the role of, and relationship between, federal, state and local agencies to provide assistance to individuals and communities in the post-disaster environment. Issues in the recovery process. 2 lectures, 1 activity. Crosslisted as CRP/NR 401.

CRP 402. Contemporary Urban Design. 4 units

Term Typically Offered: TBD
Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs) and CRP 341; or graduate standing.

Study of contemporary urban design through the detailed examination of major city/country case studies. Analysis of the cultural, social and political factors influencing the practice of urban design and its major trends in different countries. 4 lectures.

CRP 404. Environmental Law. 4 units

Term Typically Offered: TBD
Sustainability Related
Prerequisite: Junior standing.

Detailed examination of the law governing use and protection of natural resources with focus on the legal institutions entrusted with the public duty of protecting the environment. 4 lectures. Crosslisted as CRP/NR 404.

CRP 408. Water Resource Law and Policy. 4 units

Term Typically Offered: TBD
Prerequisite: Junior standing.

Detailed examination of the various legal systems of water use, regulation and management in California and the United States. Discussion on the key concepts and principles of state, federal and interstate water quantity and quality control; focusing on issues and problems, why conflicts occur and how solutions evolve. 4 lectures. Crosslisted as CRP/NR 408.

CRP 409. Planning Internship. 2 units

Term Typically Offered: F, SP
CR/NC
Prerequisite: Consent of instructor.

Work experience as a supervised employee in a planning-related agency or private firm. Prior contract specifying the product of internship required between student, agency and faculty. Sixty hours work experience for two units of credit. Credit/No Credit grading.

CRP 410. Community Planning Laboratory I. 4 units

Term Typically Offered: F
Sustainability Related
Prerequisite: CRP 336, CRP 341 or consent of instructor.

Application of planning theory and methods to the analysis and creation of community plans. Interrelationships in the natural and built environments related to land use, circulation, social and other conditions. Includes field trips and individual, team and interdisciplinary approaches. 4 laboratories.

CRP 411. Community Planning Lab II. 4 units

Term Typically Offered: W
Sustainability Related
Prerequisite: CRP 342, CRP 410, or consent of instructor.

Continuation of CRP 410. Application of planning theory and methods to the analysis and creation of community plans. Interrelationships in the natural and built environments related to land use, circulation, social and other conditions. Includes field trips and individual, team and interdisciplinary approaches. 4 laboratories.

CRP 412. Plan Implementation. 4 units

Term Typically Offered: SP
Sustainability Focused
Prerequisite: CRP 212.

Theory and practice of plan implementation. Regulation and nonregulatory approaches to plan implementation, including development regulation, economic development, growth management, habitat conservation planning, capital improvement planning, redevelopment programs, and transportation system management. The California Specific Plan will serve as the course model. 4 lectures.

CRP 420. Land Use Law. 4 units

Term Typically Offered: W
Prerequisite: CRP 212 and upper division standing.

Public controls protecting natural environmental systems. Land use and environmental controls. Review of control mechanisms. State and federal legislation. Legal implications of controls, public planning and policy issues. 4 lectures.

CRP 426. Planning Healthy Communities. 4 units

Term Typically Offered: W

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of two lower division GE Area D courses.

Introduction to advanced topics on the relationship between the built environment and public health, assessment methods, and planning approaches to creating healthier communities. 4 lectures.

CRP 428. International Planning and Development. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing. Recommended: CRP 334.

Comparative assessment of planning for international development to improve the quality of life of people in cities and regions around the world. Critical analysis of theories and practices underlying programs and projects and their pertinence to the United States. 4 lectures.

CRP 430. Professional Planning Practice. 3 units

Term Typically Offered: F

Prerequisite: CRP 212.

Relationships of planning organizations to other governmental bodies, public agencies and citizen groups. Working in a public planning agency and private practice. Current topics in planning practice. 3 lectures.

CRP 435. Transportation Theory. 4 units

Term Typically Offered: F

Prerequisite: CRP 212, senior standing, or graduate standing.

Circulation and transportation elements of the General Plan. Transportation planning theory, methods and tools related to systematic analysis of city and regional transportation problems including environmental impact assessment. Application of techniques for assessing transportation systems, gravity models, route selections, land use models and relationship to transportation. 3 seminars, 1 activity.

CRP 440. Climate Action Planning. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: Junior standing or graduate standing.

Introduction of the planning role in reducing greenhouse gas emissions and adapting to climate change. Basic climate science, greenhouse gas emissions inventories, politics of climate change, and federal/state policy. Focus on development and implementation of local climate action plans. 4 lectures.

CRP 442. Housing and Planning. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: Junior standing.

Understanding housing issues, policies and programs from a planning perspective. Analysis of the economic underpinnings of land markets and housing markets, housing plans, finance, public programs, affordable housing. Course may be offered in classroom-based or online format. 4 seminars.

CRP 445. Planning and Urban Ecology. 4 units

Term Typically Offered: TBD

Sustainability Focused

Prerequisite: Upper division or graduate standing.

Introduction to urban ecology as an organizing framework for addressing environmental problems. Provides the opportunity to explore an urban ecological research question through quantitative stream assessment and qualitative social survey data collection and analysis. 3 lectures, 1 laboratory.

CRP 446. Development Review and Entitlement. 4 units

Term Typically Offered: SP

Prerequisite: Upper division standing or graduate standing.

Application of zoning regulations, subdivision ordinances, design standards, building codes, exactions, fees, and related requirements within the development review process leading to land use entitlement. Land development is evaluated from permit application submittal to condition compliance during the plan check, construction, and operational phases of a project. 4 lectures.

CRP 448. Principles of Urban Design. 4 units

Term Typically Offered: W

Prerequisite: Junior standing or graduate standing.

Introduction to philosophies and theories of urban design. Holistic comprehension of forces generating the city form. Exploration of evaluation criteria and critical analysis of the built environment. Cultural, economic, political, behavioral, visual, perceptual, and morphological aspects of urban form. 4 seminars.

CRP 452. Community Design Methods. 4 units

Term Typically Offered: TBD

Prerequisite: CRP 201 and CRP 202, Upper division or graduate standing.

Introduction to community design as an interdisciplinary subject. Focus on the active involvement of end-users in the creation and management of built environments. Principles and techniques of participatory design and planning, including charrettes, design games and participatory technologies. Demonstration of participatory techniques through case studies and application. 3 lectures, 1 laboratory.

CRP 455. Transportation Policy and Planning. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing or graduate standing.

Key issues driving transportation policy and planning, and reflecting interconnections between transportation technology and land use. Variations in choices, transportation technology and land use dependency. Financing, emerging technologies, impacts, and changing paradigms. 2 lectures, 2 discussions.

CRP 456. Web Technologies for Planning. 2 units

Term Typically Offered: SP

Prerequisite: CRP 212, or graduate standing.

Introduction to the use of web technologies for planning and community engagement. Includes web publishing, mapping, surveys, video, collaboration and social media tools. Course may be offered in classroom-based or online format. 2 lectures.

CRP 457. GIS Applications in Planning. 3 units

Term Typically Offered: F

Prerequisite: Junior standing or graduate standing.

GIS applications using computer-based systems in gathering, managing and analyzing information pertinent to planning. Development of skills in systematic data acquisition, processing and maintenance with applied planning problems within the convenient medium of GIS and general information systems. 2 seminars, 1 laboratory.

CRP 458. Hazard Mitigation Planning & Resilient Design. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: Completion of GE Area D2; completion of GE Upper Division B; or graduate standing.

Creation of safer, more resilient cities through systematic application of urban disaster risk reduction and regeneration planning principles and methods. Integration of insights from the design, resource management, and urban administration professions for minimizing disaster losses and improving recovery activities. 4 lectures.

CRP 461. Senior Project I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CRP 341, CRP 342.

Research and problem analysis in planning. Selection and completion of a project under faculty supervision. Projects typical of problems addressed in planning practice. Project results presented in a formal report. To be completed in two quarters. Minimum 120 hours time.

CRP 462. Senior Project II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CRP 410.

Research and problem analysis in planning. Selection and completion of a project under faculty supervision. Projects typical of problems addressed in planning practice. Project results presented in a formal report. To be completed in two quarters. Minimum 120 hours time.

CRP 463. Senior Project Professional Practice. 4 units

Term Typically Offered: SP

Prerequisite: CRP 410 and senior standing.

Practical applications of city and regional planning theory and practice solving problems related to the built environment. Assembly of project documents and reports that meet the senior project requirement. 4 seminars.

CRP 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CRP 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CRP 500. Individual Study. 2-3 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing with minimum of 12 core units.

Independent research, studies, or surveys of selected subjects. Total credit limited to 9 units.

CRP 501. Foundations of Cities and Planning. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Origins and evolutionary stages of settlement patterns and the use of land and natural environment. Changing spatial structure in the development of cities and regions. Beginnings and the historical development of the planning profession. 4 lectures.

CRP 504. Sustainable Communities. 4 units

Term Typically Offered: F

Sustainability Focused

Prerequisite: Graduate standing.

Introduction to the theory and practice of sustainable communities. Addresses creating communities that foster economic and environmental health, social equity, and citizen participation. Promotes comprehensive planning through urban design, transportation, environment, and community development. Includes hands-on learning and field study. 3 seminars, 1 laboratory.

CRP 509. Professional Development. 1-3 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing.

Professional development course, including environmental assessment workshop, applied research workshop, internship seminar, and other events. Total credit limited to 3 units. Credit/No Credit grading only. 1-3 activities.

CRP 510. Planning Theory. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

Theory of planning. Development of contemporary planning thought from varying sources and perspectives. Political and social context of planning. Alternative professional roles, and planning processes. Values and ethical issues in planning. 4 seminars.

CRP 512. Introduction to Visual Communication and GIS. 4 units

Term Typically Offered: W

CR/NC

Prerequisite: Graduate standing.

Introduction to geographic information systems (GIS) as a tool for analyzing and managing spatial information pertinent to planning. Introduction to various drawing media and delineation techniques for planners, including three-dimensional visualization and graphic skills. Integration of visual and digital media in presentations. Credit/No Credit grading only. Course may be offered in classroom-based, online, or hybrid format. 4 laboratories.

CRP 513. Planning Research and Analysis. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing.

Application of research design to planning issues. Comparison of case study, comparative and problem-solving methods. Primary and secondary data sources, including field survey techniques. 4 seminars.

CRP 516. Demographic and Analytic Tools. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing or consent of instructor.

Problem recognition, data selection, analysis and synthesis with applications of system design, statistical techniques and symbolic modeling to urban design and regional growth and development policies. 3 seminars, 1 laboratory.

CRP 518. Policy Development. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: CRP 501.

Analysis of the social, economic, environmental, political contexts of public policy decisions. Public policy issues and use of concepts and tools related to monitoring and assessment. 4 lectures.

CRP 520. Feasibility Studies. 4 units

Term Typically Offered: TBD

Prerequisite: CRP 501 or consent of instructor.

Fundamental analysis for assessing feasibility of public and private development projects. Principles and techniques for analyzing markets and assessing cash flow for individual projects. Economic, fiscal and tax impacts as factors determining public participation in private projects. 4 seminars.

CRP 525. Plan Implementation. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Theory and practice of plan implementation. Regulatory and non-regulatory frameworks for plan implementation. Growth management, development regulation, capital improvement programs, redevelopment. 4 seminars.

CRP 530. Planning Agency Management. 4 units

Term Typically Offered: SP

Prerequisite: CRP 501 or graduate standing.

Preparation for professional practice in public planning agencies and private firms. Applications of organization theory to planning agencies and firms. Work programs, staff development, budgets, contracting, proposal preparation, conflict management. Relationships with other agencies and firms, clients, public and media. 4 seminars.

CRP 535. Land Use and Planning Law. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing, or consent of instructor.

The role of law in the planning and regulation of land use. Constitutional constraints on land use regulation. Legal and policy issues for environmental protection and public administration. Relevant legislation and case law. 4 lectures.

CRP 545. Principles of Environmental Planning. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: Graduate standing or consent of instructor.

Environmental planning as a field of inquiry and action. Several parallel streams of knowledge are pursued: environmental planning theory; ecological process and assessment in human-dominated settings; environmental impact assessment; and the review and application of environmental planning tools. 3 seminars, 1 laboratory.

CRP 552. Community and Regional Planning Studio I. 4 units

Term Typically Offered: F

Prerequisite: CRP 501, CRP 525, or consent of instructor.

Application of planning theory and methods to community and regional planning projects. Structured for research, analysis, synthesis, and implementation practice. Interrelationships of natural and built environments, transportation systems, and economic and social conditions at various planning scales. Includes field trips and individual, team and interdisciplinary approaches. 2 seminars, 2 laboratories.

CRP 553. Project Planning and Design Studio. 4 units

Term Typically Offered: SP

Prerequisite: CRP 512 or consent of instructor.

Project-scale planning problems. Arranging structures, circulation systems, utilities and plant material on natural and urban sites to support human activity while minimizing disruption to natural systems. Includes planned unit developments, waterfronts, hillsides, campuses and commercial centers. Field trips. 4 laboratories.

CRP 554. Community and Regional Planning Studio II. 4 units

Term Typically Offered: W

Prerequisite: CRP 552.

Application of planning theory and methods to community and regional planning projects. Structured for research, analysis, synthesis, and implementation practice. Interrelationships of natural and built environments, transportation systems, and economic and social conditions at various planning scales. Includes field trips, and individual, team and interdisciplinary approaches. 2 seminars, 2 laboratories.

CRP 556. Community and Regional Planning Studio III. 4 units

Term Typically Offered: SP

Prerequisite: CRP 554, or consent of instructor.

Application of planning theory and methods to community and regional planning projects. Individual faculty-assigned laboratory work leading to the completion of a professional quality project focused on a real-world planning task. Structured for research, analysis, synthesis and implementation practice. 3 seminars and supervised work.

CRP 570. Selected Topics in Planning. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected planning topics. Total credit limited to 12 units. 4 seminars.

CRP 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CRP 596. Professional Project. 2-4 units

Term Typically Offered: F, W, SP

Prerequisite: CRP 513, and consent of the graduate program coordinator.

Individual research under the supervision of the faculty, leading to completion of a professional project based on a real world planning task or carefully constructed simulation. Must be taken in all quarters requiring supervision; minimum of 6 units required for degree. Total credit limited to 8 units.

CRP 599. Thesis. 2-4 units

Term Typically Offered: F, W, SP

Prerequisite: CRP 513, and consent of the graduate program coordinator.

Individual research under the general supervision of the faculty, leading to a graduate thesis. Must be taken in all quarters requiring supervision; minimum of 6 units required for degree. Total credit limited to 8 units.

Civil Engineering (CE)

undefined

CE Courses

CE 111. Introduction to Civil Engineering. 1 unit

Term Typically Offered: F

CR/NC

Broad overview of the field of civil engineering, including professional societies and their student chapters, professional licensing and registration, professional codes of ethics, the elements of engineering design, and the scope of analysis and design activities undertaken by private- and public-sector civil design professionals. Credit/No Credit grading only. 1 lecture.

CE 112. Design Principles in Civil Engineering. 2 units

Term Typically Offered: W

Brief introduction to the different technical areas of civil engineering, including engineering design process, basic design principles and failure scenarios, professionalism and licensing in Civil Engineering. 2 lectures.

CE 113. Computer Aided Drafting in Civil Engineering. 2 units

Term Typically Offered: F, W, SP

Computer-aided drawing (CAD) and related software to display and quantify engineering designs. Elements of engineering design drawings. Related topics in information technology. Course may be offered in classroom-based or online format. 2 laboratories.

CE 200. Special Problems. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Credit/No Credit grading only.

CE 204. Mechanics of Materials I. 3 units

Term Typically Offered: F, W, SP

Prerequisite: ME 211.

Stresses, strains, and deformations associated with axial, torsional, and flexural loading of bars, shafts, and beams. Analysis of elementary determinate and indeterminate mechanical and structural systems. 2 lectures, 1 activity.

CE 207. Mechanics of Materials II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CE 204.

Combined stress states including torsion, axial, shear, moment, and pressure vessel loadings. Principle stress/strain states. Basic failure criteria. Analysis of beam forces, moments, deflections, and rotations. Introduction to stability concepts including column buckling. 1 lecture, 1 activity.

CE 208. Mechanics of Materials. 5 units

Term Typically Offered: F, W

Prerequisite: ME 211.

Stresses, strains, and deformations associated with axial, torsional, and flexural loading of bars, shafts, and beams. Combined stress states including torsion, axial, shear, moment, and pressure vessel loadings. Principle stress/strain states and basic failure criteria. Stability concepts including column buckling. Not open to students with credit in CE 204. 3 lectures, 2 laboratories.

CE 222. Introductory Experiments in Transportation Engineering. 1 unit

Term Typically Offered: F, W, SP

Application of urban transportation planning, design, and operations principles. Introduction to Engineering Economics in the context of transportation projects. Collect field traffic operations data and conduct analysis and report conclusions from collected data. Field trip required. 1 laboratory.

CE 251. Programming Applications in Engineering. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CE 113; MATH 244; and CE 204 or CE 208 (CE 208 may be taken concurrently).

Concepts from basic programming theory introduced in the context of engineering applications. Topics include the application of programming constructs to demonstrate finite precision calculations, linear systems, linear programming, basic nonlinear systems, plotting, statistics, least squares, approximations, and solve related problems from civil and environmental engineering. 2 activities.

CE 259. Civil Engineering Materials. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CE 204 or CE 208 (CE 208 may be taken concurrently). Corequisite: CE 113.

Experimental determination of mechanical properties of concrete, asphalt, and soils as required for engineering applications. Experimental verification of assumptions made in mechanics of materials procedures. Use of strain measuring devices. Preparation of technical reports. 2 laboratories.

CE 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CE 321. Fundamentals of Transportation Engineering. 3 units

Term Typically Offered: F, W, SP

Sustainability Related

Prerequisite: PHYS 141; CE 259 or CM 113; or graduate standing.

The characteristics and functions of highway, air, rail, transit and other modes of urban and intercity transportation. Fundamentals of transportation design, operations, and planning. Evaluation of costs, benefits, and environmental considerations. 3 lectures.

CE 322. Fundamentals of Transportation Engineering Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: CE 222. Corequisite: CE 321.

Application of urban transportation planning and operations principles and the design of highway facilities. Experimentation with properties of pavement materials through laboratory/field testing as well as preparation of testing reports. Field trip required. 1 laboratory.

CE 336. Water Resources Engineering. 4 units

Term Typically Offered: F, W, SP

Sustainability Related

Prerequisite: ME 341 or ENVE 264. Concurrent: CE 337.

Hydraulics of pipe flow. Open channel flow, groundwater, and hydrology. 4 lectures.

CE 337. Hydraulics Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: ME 341 or ENVE 264. Concurrent: CE 336.

Application of basic fluid dynamic principles to various mechanical systems. Exposure to experimental problems and techniques with guided laboratory projects related to civil engineering discipline. 1 laboratory.

CE 352. Structural Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CE 207 or CE 208. Corequisite: CE 251.

Introduction to concepts of structural engineering including ASCE7 loads, vertical and lateral load path, flexible and rigid diaphragms, determinate vs indeterminate systems, and the use of computer programs to solve structural engineering problems. 3 lectures, 1 laboratory.

CE 355. Reinforced Concrete Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CE 259 and CE 352.

Analytical and design principles of reinforced concrete in designing civil engineering systems. Origin of code requirements. Fundamentals of proportioning. Details of elements and structural systems. 3 lectures, 1 laboratory.

CE 356. Structural Steel Design. 4 units

Term Typically Offered: F, SP

Prerequisite: CE 352.

Design and behavior of the elements of steel structures. Design and analysis of bolted, welded and eccentric connections. Proportioning of members and connections. Introduction to plastic design, end plate connection, composite construction, shear connections and design of composite beams. 3 lectures, 1 laboratory.

CE 371. Construction Management and Project Planning. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ARCE 106, CE 259 or CM 113.

Theory and practice of planning, scheduling, estimating, and reporting for construction projects. Fundamentals of scheduling logic including critical path, deterministic, and probabilistic scheduling; including the impact of constraints. Identifying resources and estimating time requirements for design activities and project operations. Not open to Architectural Engineering or Construction Management majors. 3 lectures, 1 activity. Crosslisted as CE/CM 371.

CE 381. Geotechnical Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CE 207 or CE 208; ME 341 or ENVE 264. Concurrent: CE 382 (CE majors only).

Engineering geology, elementary mass-volume relations, clay-water interaction, soil classification, soil compaction, geostatic stress distributions, 1-D and 2-D steady-state flow, shear strength under drained and undrained conditions. 4 lectures.

CE 382. Geotechnical Engineering Laboratory. 1 unit

Term Typically Offered: F, W, SP

Corequisite: CE 381.

Use of standard laboratory test methods to determine physical, mechanical, and hydraulic properties of soil. 1 laboratory.

CE 400. Special Problems. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

CE 403. Civil Engineering Design Competition. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: CE 207 or CE 208.

Design, build, test, and present a solution to a civil engineering problem posed by a student design competition. Total credit limited to 4 units. 1 laboratory.

CE 404. Applied Finite Element Analysis. 4 units

Term Typically Offered: F

Prerequisite: BMED 410, and CE 207 or CE 208; or CE 406; or ME 328.

Finite element based solutions to engineering problems with an emphasis on elastostatic problems in structural mechanics. The power and pitfalls associated with the finite element method highlighted through practical modeling assignments. Introduces the use of commercial finite element codes. 3 lectures, 1 laboratory. Crosslisted as BMED/CE/ME 404.

CE 406. Structural Analysis. 5 units

Term Typically Offered: F

Prerequisite: CE 352.

Structural analysis of frames, trusses, and combined systems. Modern structural analysis theorems are presented along with discussion of their relation to classical methods. Specific topics include virtual forces, virtual displacements, compatibility, constraints and matrix formulations. Course may be offered in classroom-based or online format. 4 lectures, 1 laboratory.

CE 407. Structural Dynamics. 4 units

Term Typically Offered: W

Prerequisite: CE 406 and ME 212.

Effect of vibration and transient loads on structural elements. Dynamics load factors, support motion, damping and natural frequencies of multidimensional structural systems. Modal analysis. 3 lectures, 1 laboratory.

CE 413. Advanced Civil Computer-Aided Site Design. 2 units

Term Typically Offered: F, W

Prerequisite: BRAE 239; CE 113 or CM 115; and CE 321.

Apply advanced CAD software to develop design techniques and convey the completed design on a set of plans; site coordination, basic road design, grading, and utility design. Course may be offered in classroom-based or online format. 2 laboratories.

CE 415. Advanced Building Information Modeling for Civil Engineering. 4 units

Term Typically Offered: F, W

Prerequisite: CE/CM 371.

Building Information Modeling (BIM) approach to design, optimize, construct, and manage vertical structures. BIM based quantity take-off, clash detection, 4D modeling, and reality capturing using a 3D laser scanner. Course may be offered in classroom-based or online format. 2 lectures, 2 laboratories.

CE 421. Traffic Engineering. 4 units

Term Typically Offered: F

Prerequisite: CE 321.

Principles of traffic circulation on highway systems and other modes. Traffic control. Traffic data collection and analysis. Capacity analysis. Traffic modeling. New technologies. 3 lectures, 1 laboratory.

CE 422. Highway Geometrics and Design. 4 units

Term Typically Offered: W

Prerequisite: CE 321.

Alignment location and safe geometric design of highways. Earthwork and drainage related to highway. Theory and practice in design of alignments, highway cross-sections, intersections, interchanges, and freeways in urban and rural areas. Application of advanced computer software to highway geometrics. 2 lectures, 2 laboratories.

CE 423. Intelligent Transportation Systems. 4 units

Term Typically Offered: SP

Prerequisite: CE 321 or graduate standing.

Specification and operation of Intelligent Transportation Systems (ITS). Traffic surveillance and control systems including applications to freeways, urban streets, rural highways, and public transportation. Standards include the National Architecture for ITS. 3 lectures, 1 laboratory.

CE 424. Public Transportation. 4 units

Term Typically Offered: W

Sustainability Related

Prerequisite: CE 321.

Interdisciplinary aspects of public transportation problems, systems-team design approach to solutions. History and present state of public transportation; role of public transportation in urban environment; legislative, political, social, and economic aspects of public transportation systems. Methodology and procedures for transit planning. Review of transit studies. 3 lectures, 1 laboratory.

CE 425. Introduction to Railway Engineering. 4 units

Term Typically Offered: SP

Prerequisite: CE 321.

Introduction to railroad and railway system analysis and design. Railroads, rail transit and high speed rail applications. Track foundation design for various conditions. Approaches to railway analysis and design and an introduction to railway traffic control and signaling. 4 lectures.

CE 429. Highway Pavement Designs. 4 units

Term Typically Offered: F, SP

Prerequisite: CE 259 or CM 113; CE 381 or ARCE 421; and CE 321.

Theories, principles, and procedures in the structural design of highway pavements. Design of flexible and rigid pavements. Performance of flexible and rigid pavements in the field and the characterization of pavement materials. Practical and direct exposure to laboratory testing of pavement materials. 3 lectures, 1 laboratory. Formerly CE 521.

CE 431. Coastal Hydraulics I. 4 units

Term Typically Offered: W

Prerequisite: ME 341 or ENVE 264.

Waves and their characteristics, types of waves, water wave theories, orbital velocities, refraction of waves, wave diffraction, wave reflection, application of linear theory to wave forces on cylindrical structures, submerged pipelines and vertical flat barriers (sea walls), wave uprush, rubble mound breakwaters. 4 lectures.

CE 432. Coastal Hydraulics II. 4 units

Term Typically Offered: SP

Prerequisite: CE 431.

Reformed breaker height determination, wave runup analysis using a reformed breaker height. Wave setback analysis. Pile height determination. Criteria for types of breaking waves. Revetment analysis, rip-rap revetment design, wave forces on pilings. 4 lectures.

CE 433. Open Channel Hydraulics. 4 units

Term Typically Offered: F
Prerequisite: CE 336.

Analysis and characteristics of flow in open channels; critical flows; uniform flow; gradually varied flow; channel design problems, channel transitions and controls. Rapidly varied flow; hydraulic jump and energy dissipaters. Unsteady flows, waves and wave propagation, flood routing. Applications of numerical methods in hydraulic engineering. 4 lectures.

CE 434. Groundwater Hydraulics and Hydrology. 4 units

Term Typically Offered: W, SP
Prerequisite: CE 336.

Differential equations of groundwater flow, Darcy's Law, solutions of the steady and unsteady flow, differential equations for confined and unconfined flows. Pumping test design. Groundwater models, leaky aquifers. Saltwater intrusion. 4 lectures.

CE 435. Engineering Hydrology. 4 units

Term Typically Offered: F
Prerequisite: CE 336.

Analysis of hydrologic cycle components such as precipitation, infiltration and evaporation. Rainfall-runoff analysis to determine peak flows and runoff hydrographs. Hydrologic river and reservoir routings and their applications for flood plain management. Application of frequency analysis methods to determine design rainfalls and design flows. 4 lectures.

CE 436. Heavy Civil Temporary Structures and Shoring. 4 units

Term Typically Offered: W
Prerequisite: ARCE 315 or CE 352; and CM 314.

Design and construction of retaining walls, concrete formwork, falsework, scaffolding, ramps, platform, bracing, and guying as applied to heavy civil projects. Field trip may be required. 2 lectures, 2 laboratories. Crosslisted as CE/CM 436.

CE 437. Heavy Civil Projects and Equipment. 4 units

Term Typically Offered: SP
Prerequisite: CM 314.

Heavy civil projects logistics, construction, operations, planning, management, workflow and sequencing, equipment management, fleet configuration and maintenance, equipment productivity and cost optimization. 2 lectures, 2 laboratories. Crosslisted as CE/CM 437.

CE 440. Hydraulic Systems Engineering. 4 units

Term Typically Offered: F, W
Prerequisite: CE 336.

Water and wastewater flows. Design of water distribution systems, transmission and storage reservoirs, wastewater collection systems, and storm water systems. Pumps and pump systems, flow measurements. Water sources for municipal supply. 3 lectures, 1 laboratory.

CE 454. Integrated Structural Design. 4 units

Term Typically Offered: W
Prerequisite: CE 355, CE 356, and CE 455.

Structural analysis and integrated system design of reinforced concrete, concrete block masonry, structural steel, and timber structures. Loading standards, code design methods, connection design. Comprehensive design projects. 2 lectures, 2 laboratories.

CE 455. Design of Timber Structures. 4 units

Term Typically Offered: F
Prerequisite: CE 352.

Analysis and design of timber structures with emphasis on construction methodology, and material behavior. Topics include physical and mechanical properties of structural lumber and glued laminated timber; lateral load paths; diaphragms; connections; shear wall design; and combined load design. 3 lectures, 1 activity.

CE 457. Bridge Engineering. 4 units

Term Typically Offered: SP
Prerequisite: CE 355. Corequisite: CE 356.

Fundamentals of the structural analysis and design of highway bridges. Construction materials in bridges. Loads on highway bridges. Load path and distribution in bridge superstructure. Design of reinforced concrete, pre-stressed concrete, and composite bridges. 3 lectures, 1 laboratory.

CE 459. FRP Strengthening of Reinforced Concrete Structures. 4 units

Term Typically Offered: TBD
Prerequisite: CE 355.

Flexural and shear strengthening reinforced and prestressed concrete members using fiber reinforced polymer composite plates and laminates; seismic repair and rehabilitation of columns, slabs, beams and structures. Focus on design philosophy and design methodology, based on the current understanding of FRP-strengthening techniques. Not open to students with credit in CE 556. 3 lectures, 1 laboratory.

CE 465. Civil Engineering Professional Practice. 1 unit

Term Typically Offered: F
Prerequisite: Senior standing and consent of instructor.

Advising for Senior Design Project and examination of the non-technical and professional issues engineering design professionals regularly encounter. Topics include: communications styles and assertiveness, technical communications (oral and written), lifelong learning, contemporary civil engineering issues, leadership, ethics, and personal and project management. Course may be offered in classroom-based or online format. 1 activity.

CE 466. Senior Design Project I. 3 units

Term Typically Offered: W
Prerequisite: CE 321, CE 322, CE 336, CE 337, CE 355, CE 371, CE 381, CE 382, and CE 465.

Work on multi-disciplinary teams to complete an integrated civil design project. Focus on formal instruction, through project based learning, on selected topics in geotechnical, structural, transportation, and water resources engineering design. Non-technical topics include team building, technical communications, and professional practice skills that must be mastered to become a successful design professional. 2 lectures, 1 laboratory.

CE 467. Senior Design Project II. 3 units

Term Typically Offered: SP

Prerequisite: CE 466.

Continuation of work on multi-disciplinary teams to complete an integrated civil design project started in CE 466. Focus of formal instruction on selected topics in construction, geotechnical, structural, transportation, and water resources engineering design culminating with oral and written presentations of Senior Design projects. 2 lectures, 1 laboratory.

CE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CE 474. Environmental Compliance and Permitting. 2 units

Term Typically Offered: W

Prerequisite: Senior standing.

Fundamentals of State and Federal environmental laws essential to getting Civil Engineering projects permitted. 2 lectures.

CE 475. Civil Infrastructure and Building Systems. 4 units

Term Typically Offered: F, W

Sustainability Focused

Prerequisite: Senior standing in CE or ARCE.

Principles and practices for the sustainable design, fabrication, and installation of systems for the civil infrastructure and building; including structural, air/gas, water/wastewater, electrical, and control systems. Methods and materials used for fabrication and installation; including cost and schedule considerations. 4 lectures. Crosslisted as ARCE/CE 475.

CE 481. Analysis and Design of Shallow Foundations. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CE 381 and CE 382.

Evaluation of shear strength for foundation design. Analysis of bearing capacity for generalized conditions. Design of reinforced concrete spread footings. Stress distributions beneath loaded areas. Immediate settlement, consolidation settlement, rate of consolidation, and creep. 4 lectures.

CE 486. Introduction to Geological Engineering. 4 units

Term Typically Offered: W

Prerequisite: CE 381, CE 382, and GEOL 201.

Identification and characterization of consolidated geologic materials for the purpose of civil analysis and design. Interpretation of geologic maps, cross sections, and reports. Interpretation of aerial photographs. Engineering considerations important in dealing with transported soils. 4 lectures.

CE 488. Engineering Risk Analysis. 4 units

Term Typically Offered: F

Prerequisite: Senior standing and STAT 312; or graduate standing.

Introduction to the basic concepts of probability theory, statistics, and decision theory as they pertain to problems in civil and environmental engineering. Emphasis placed on the use of probabilistic modeling, Bayesian statistics, risk analysis, and decision theory. 4 lectures.

CE 493. Cooperative Education Experience. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 6 units.

CE 494. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 18 units.

CE 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

CE 500. Individual Study. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair, graduate advisor and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Total credit limited to 4 units.

CE 501. Advanced Matrix Analysis of Structures. 4 units

Term Typically Offered: F

Prerequisite: CE 406.

Matrix terminology and operations. Matrix procedures for analysis of two-dimensional frameworks. Development of stiffness, flexibility and mixed methods. Development of algorithms and programs for use in the analysis of structural frameworks. Discussion of modeling issues and limitations. 3 lectures, 1 laboratory.

CE 504. Finite Element Analysis. 4 units

Term Typically Offered: SP

Prerequisite: CE/ME 404 and CE 511/ME 501 or consent of instructor.

Finite element theory and application with a focus on computer implementation of the method. Strong, weak and variational formulations, physical and isoparametric spaces, error estimates, numerical integration, finite element algorithms, and programming architecture. 3 lectures, 1 laboratory. Crosslisted as CE/ME 504.

CE 511. Continuum Mechanics and Elasticity. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Introduction to continuum mechanics. Kinematics, stress, and balance laws. Constitutive theory for isotropic and anisotropic solids and viscous fluids. Applications including design of beams and pressure vessels, stress concentrations, fiber-reinforced composites, and non-homogeneous biological materials. Course offered in hybrid format with classroom-based and online learning. 4 lectures. Crosslisted as CE 511/ME 501.

CE 513. Inelastic Stress Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: ME 501 or CE 511.

Perfectly plastic and work hardening materials; von Mises and Tresca yield, isotropic and kinematic hardening flow rules, boundary-value problems. Finite elasticity: kinematics, Cauchy- and Green-elasticity, invariance, constraints, Neo-Hookean and Mooney-Rivlin materials, experimental approaches, non-uniqueness, anisotropy, residual stress, thermoelasticity, boundary-value problems. Course offered in hybrid format with classroom-based and online learning. 4 lectures. Crosslisted as CE 513/ME 503.

CE 523. Transportation Systems Planning. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: CE 321 or graduate standing.

Planning of urban and regional multimodal transportation systems. Modeling of transportation networks and travel demand. Travel survey design. Urban data systems. Evaluation of alternatives based on economic, social, technological, and other factors. 2 lectures, 2 laboratories.

CE 525. Airport Planning and Design. 4 units

Term Typically Offered: TBD

Prerequisite: CE 321 or graduate standing.

Historical background of aviation and airport development; financing; estimating demand; aircraft characteristics; airport capacity; airspace and air traffic control; site selection; airport configuration; geometric design of landing area; planning and development of terminal areas; lighting; pavement design and drainage. 3 lectures, 1 laboratory.

CE 526. Transportation Safety. 4 units

Term Typically Offered: W

Prerequisite: CE 321, CE 322, STAT 312.

Introduction to nature and extent of transportation safety problem worldwide and in the United States. Several sub-areas of transportation safety: road safety, human factors, vehicle safety; crash data collection and management; safety planning; hot spot identification; methodologies for conducting transportation accident studies; statistical applications to accident data; predictive model building; "before-after" studies; countermeasure design. 3 lectures, 1 laboratory.

CE 527. Sustainable Mobility. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: CE 321 or CRP 435 or consent of instructor.

Presentation and analysis of concepts and designs for sustainable mobility from a global-to-local, interdisciplinary perspective, including pedestrians, bicyclists, and public transportation. Addresses economy, environment, and equity (social issues) through lectures, panels, excursions and a planning/design project in San Luis Obispo County. 3 lectures, 1 laboratory.

CE 528. Transportation Economics and Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: CE 321 or graduate standing.

Principles of engineering systems analysis and applications to transportation using examples from different modes. Identification of transportation benefits, costs, user and non-user impacts, transportation cost models, pricing, and optimization. 3 lectures, 1 laboratory.

CE 529. Modeling and Simulation in Transportation. 4 units

Term Typically Offered: SP

Prerequisite: CE 321 or graduate standing.

Theory and operation of transportation systems, the systems approach, simulation techniques. Use of available software packages. Simulation model development, calibration and use. 2 lectures, 2 laboratories.

CE 533. Advanced Water Resources Engineering. 4 units

Term Typically Offered: SP

Prerequisite: CE 336 or graduate standing.

Matrix and simulation methods in hydrology, statistical studies in hydrology and their applications to civil engineering problems. Generalized hydrologic characteristics. Hydrologic simulation, computer applications, urban and small watershed hydrology, macroscopic and microscopic approach. Storm water management models. Hydrologic design. 4 lectures.

CE 536. Computer Applications in Water Resources with Geographic Info Systems (GIS). 4 units

Term Typically Offered: W

Prerequisite: CE 336 or graduate standing.

Modeling, design and analysis of water, wastewater, stormwater systems. Integration of water resource systems with Geographic Information Systems (GIS). 3 lectures, 1 laboratory.

CE 537. Groundwater Contamination. 4 units

Term Typically Offered: F

Prerequisite: CE 434. Corequisite: ENVE 331.

Sources and types of groundwater contamination, contamination transport mechanisms. Sorption and other chemical reactions. Numerical modeling of contaminant transport. Nonaqueous phase liquids. Groundwater remediation and design. 4 lectures.

CE 538. Urban Water Systems. 4 units

Term Typically Offered: SP

Prerequisite: CE 440 or graduate standing.

Integration of water delivery, wastewater collection, drainage systems, and associated treatment components in urbanizing areas. Relationships between surface and groundwater elements of water sources and disposal. Use of current design models to quantify the benefits of non-traditional options. 4 lectures.

CE 539. Environmental Hydraulics. 4 units

Term Typically Offered: W

Prerequisite: CE 336 or graduate standing.

Application of fluid mechanics principles to environmental flows. Emphasis on advection, dispersion, stratification and mixing effects. Stratified flows, turbulent jets and plumes, wastewater and thermal diffusers, cooling ponds and channels, control of environmental problems. 4 lectures.

CE 552. Analysis and Seismic Design of Reinforced Concrete. 4 units

Term Typically Offered: TBD

Prerequisite: CE 454. Recommended: Concurrent enrollment in CE 557.

Emphasis placed on reinforced concrete behavior and seismic design. Topics include moment curvature analysis and plastic hinge modeling, strut and tie, design of structural walls, design of concrete moment frames and seismic detailing. 4 lectures.

CE 553. Ductile Design of Steel Structures. 4 units

Term Typically Offered: W

Prerequisite: CE 356 and senior or graduate standing. Recommended: CE 454 and CE 407.

Plastic analysis and capacity design principle; design of ductile steel structures including moment frames, concentrically braced frames, eccentrically braced frames, buckling-restrained braced frames, and steel plate shear walls according to the AISC Seismic Provisions for Structural Steel Buildings. 3 lectures, 1 activity.

CE 555. Advanced Civil Engineering Materials Laboratory. 2 units

Term Typically Offered: F

Prerequisite: CE 259 or graduate standing.

Fundamental properties of new and advanced materials. Experimental techniques. Fracture characteristics and composite response of cement matrix composites. New materials and products to advanced applications such as automation. 2 laboratories.

CE 556. Advanced Fiber Reinforced Polymer (FRP) Strengthening of Reinforced Concrete Structures. 4 units

Term Typically Offered: W

Prerequisite: CE 355.

Flexural and shear strengthening reinforced and pre-stressed concrete members using FRP composite laminates and plates; seismic repair and rehabilitation of columns, beams, slabs and whole structures. Design philosophies based on the current ACI 440 and the most up to date research in FRP composites. Durability, fire protection and blast mitigation of structures utilizing FRP laminates. Not open to students with credit in CE 459. 3 lectures, 1 laboratory.

CE 557. Seismic Analysis and Design. 4 units

Term Typically Offered: SP

Prerequisite: CE 407.

Extension of the basic principles of structural dynamics to analysis of civil structures and nonstructural components to earthquake loading. Code based (ASCE/SEI 7) earthquake resistant design. 3 lectures, 1 laboratory.

CE 559. Prestressed Concrete Design. 4 units

Term Typically Offered: SP

Prerequisite: CE 355 or graduate standing.

Advanced analysis, design and behavior of prestressed and precast concrete elements and structures. Origin of code requirements. Detailed design of prestressed concrete components of civil engineering systems for buildings and highway construction. Creep and shrinkage of concrete and relaxation of steel applied to prestressing losses. 4 lectures.

CE 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 seminars.

CE 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CE 572. Engineering Project Management. 4 units

Term Typically Offered: W

Prerequisite: CE 465.

Principles and techniques of managing projects from conceptual phase through project definition, design and construction, to closeout. Emphasis on project management aspects of scope definition, estimates and budgeting, control systems, procurement, design coordination, construction phases, and leadership skills. 3 lectures, 1 laboratory.

CE 581. Advanced Geotechnical Engineering. 4 units

Term Typically Offered: SP

Prerequisite: CE 481 or graduate standing.

Advanced topics in saturated flow, unsaturated flow, and consolidation. Stress-strain-deformation response of soils under both drained and undrained loading. Conventional and advanced laboratory strength testing. 3 lectures, 1 laboratory.

CE 583. Geotechnical Earthquake Engineering. 4 units

Term Typically Offered: SP

Prerequisite: CE 481 or graduate standing.

Introduction to engineering seismology and ground motion evaluation. Dynamic behavior of soils. Seismic site response analysis. Soil liquefaction evaluation methods and mitigation techniques. Seismic stability of slopes and retaining walls. Computer-aided analysis. 4 lectures.

CE 584. Lateral Support Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CE 481 or graduate standing.

Classical and modern earth pressure theories. Lateral earth pressure calculations for general subsurface conditions. Analysis and design of reinforced concrete cantilever walls, sheetpile walls, soldier-pile walls, tie-back walls, and mechanically-stabilized earth. Computer-aided analysis and design. 4 lectures.

CE 585. Slope Stability Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: CE 481 or graduate standing.

Analysis of stability by planar, circular arc, piecewise-linear, and composite-surface techniques. Analysis of earth-fill dams and reservoirs for static, steady flow, sudden drawdown, and seismic loading conditions. Field instrumentation. Methods for slope remediation and stabilization. Computer-aided analysis. 4 lectures.

CE 586. Analysis and Design of Deep Foundations. 4 units

Term Typically Offered: W

Prerequisite: CE 481 or graduate standing.

Bearing capacity and settlement analysis of drilled shafts and driven piles. Analysis and design of single piles and pile groups for vertical, lateral, and combined loading. Construction procedures, field inspection, and load-testing. Computer-aided analysis and design. 4 lectures.

CE 587. Geoenvironmental Engineering. 4 units

Term Typically Offered: SP

Prerequisite: CE 381.

Principles for containment applications. Engineering properties of soils and geosynthetics and their interaction with contaminants and wastes; analysis of geosynthetics used in containment facilities; liners; covers; leachate and gas collection systems; contaminant transport; and monitoring systems. 4 lectures.

CE 588. Ground Improvement. 4 units

Term Typically Offered: TBD

Prerequisite: CE 381, CE 382, and CE 481.

Ground improvement applications investigated for modification of geomechanical and hydraulic properties of soils. Engineering properties of soft ground and high water content materials; mechanical, chemical, and thermal stabilization investigated for foundation and environmental remediation applications. 4 lectures.

CE 589. Geosynthetics Engineering. 4 units

Term Typically Offered: TBD

Prerequisite: CE 481.

Geosynthetics applications within civil engineering. Design content for geotechnical, geoenvironmental, and transportation applications. Manufacturing processes, material properties, interaction with soils, and service conditions. 4 lectures.

CE 591. Graduate Seminar I. 1 unit

Term Typically Offered: F

Prerequisite: Graduate standing.

Preparation for graduate studies and engineering careers. Further development of oral and written communication skills. 1 seminar.

CE 592. Graduate Seminar II. 1 unit

Term Typically Offered: W

Prerequisite: CE 591 and graduate standing.

Current research activities and analysis/design philosophies in civil and environmental engineering practice. Development of oral and written presentation skills. 1 seminar.

CE 593. Cooperative Education Experience. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

CE 594. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

CE 595. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. A fully-developed formal report and evaluation by work supervisor required. Credit/No Credit grading only.

CE 596. Comprehensive Examination. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing. Recommended: Student should be in the final quarter of completing graduate coursework (45 units of 400 and 500 level coursework) and prepared to take the MS exam.

Comprehensive exam for a non-thesis master's student. The comprehensive examination assesses the student's ability to integrate knowledge, show critical and independent thinking, and demonstrate mastery of the subject matter. Timing of the comprehensive exam shall be scheduled with the faculty advisor per department guidelines.

CE 599. Design Project (Thesis). 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing.

Each individual or group will be assigned a project for solution under faculty supervision as a requirement for the master's degree, culminating in a written report/thesis.

College of Liberal Arts (CLA)

undefined

CLA Courses

CLA 100. College Success Seminar. 1 unit

Term Typically Offered: F

CR/NC

Academic planning and resources, career exploration, extracurricular activities, and time management skills to support first year students' transitions to Cal Poly and the College of Liberal Arts. Support network to facilitate personal and academic success. Credit/No Credit grading only. 1 lecture.

Communication Studies (COMS)

undefined

COMS Courses

COMS 100. Introduction to the Communication Studies Major. 2 units

Term Typically Offered: F, W

CR/NC

Preparation for the Communication Studies major. Overview of areas of study and key terms. Planning for fulfilling major requirements and choosing courses. Background on potential careers. Promotion of a learning community and resources for student success. Credit/No Credit grading only. 2 lectures.

COMS 101. Public Speaking. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area A1

2019-20 or earlier catalog: GE Area A2

Introduction to the principles of oral communication and the tradition of public speaking in political and social life. Practical experience in the development, presentation, and critical analysis of speeches to inform and to persuade. Not open to students with credit in COMS 102. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as COMS/HNRS 101. Fulfills GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

COMS 102. Principles of Oral Communication. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area A1

2019-20 or earlier catalog: GE Area A2

Introduction to the fundamentals and principles which underlie effective oral communication. Practical experience in various types of speaking situations: informative speaking, persuasive speaking, and panel discussion. Not open to students with credit in COMS 101. 4 lectures. Crosslisted as COMS/HNRS 102. Fulfills GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

COMS 126. Argument and Advocacy. 4 units

Term Typically Offered: F

2020-21 or later catalog: GE Area A3

2019-20 or earlier catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog). Recommended: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for student on the 2019-20 or an earlier catalog).

The nature of critical thinking as applied in oral and written argument. Study of inductive and deductive reasoning. Analysis of reasoning, argument, forms of support and fallacies of argument and language. Instruction in and practical experience in crafting sound persuasive arguments and engaging in oral argumentation. Course may be offered in classroom-based or hybrid format. 4 lectures. Fulfills GE Area A3 with a grade of C- or better.

COMS 145. Reasoning, Argumentation, and Writing. 4 units

Term Typically Offered: W, SP

2020-21 or later catalog: GE Area A3

2019-20 or earlier catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog). Recommended: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for student on the 2019-20 or an earlier catalog).

The principles of reasoning in argumentation. Examination of rhetorical principles and responsible rhetorical behavior. Application of these principles to oral and written communications. Effective use of research methods and sources. 4 lectures. Fulfills GE Area A3 with a grade of C- or better.

COMS 201. Advanced Public Speaking. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Further consideration of the principles of public address. Advanced practice in manuscript, extemporaneous, and impromptu speaking. 4 lectures.

COMS 205. Rhetorical Studies. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Recommended: COMS 100.

Introduction to rhetorical theory from classical to contemporary works. Explores the role of rhetoric in shaping reality and motivating human action. Students consider the ethics and effects of rhetoric and apply theories to critically analyze everyday discourses. 4 lectures.

COMS 206. Communication Theory. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Survey of human communication theories including interpersonal, small group, organizational, persuasion, nonverbal, intercultural, and media. Philosophical foundations for understanding communication from social science perspectives. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Formerly COMS 311.

COMS 208. Performance, Literature, and Culture. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs); and completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

Concepts and skills related to the performance of literature and performance as a theoretical and analytical method. Emphasis placed on understanding culture and the importance of diversity in human communication. Students develop and apply critical, analytical, performative, and communicative skills. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

COMS 211. Interpersonal Communication. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Introduction to the interaction process in two-person (dyadic) communication settings. Emphasis on the functions of varying messages in the initiation, development, maintenance and termination of personal and professional relationships. 4 lectures. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

COMS 213. Organizational Communication. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A2 with a grade of C- or better.

Introduction to communication within the organization and between the organization and its environment. Effects of networks, superior/subordinate message patterns, team building, climate, message flow patterns and distortion on organizational effectiveness. 4 lectures.

COMS 215. Media Studies. 4 units

Term Typically Offered: W, SP

Prerequisites: Completion of GE Area A with grades of C- or better.

Recommended: COMS 100.

Foundational content on one of the largest sub-disciplines in the field of Communication Studies. Combines social scientific and critical cultural approaches. Topics include mass communication history, media's role within modern society, media effects, and media literacy. 4 lectures.

COMS 217. Small Group Communication. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Theories, principles and skills for small group communication and teamwork. Topics include creativity, failure, problem-solving, (dis)functional decision-making, group development, leadership, power, norms, conflict management, and group presentation. 4 lectures.

COMS 226. Applied Argumentation. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Intermediate level course in the theory and practice of everyday argument. Select theories of argumentation, and practical experience arguing in a wide variety of contexts. 4 lectures.

COMS 250. Forensic Activity. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Introduction to competitive debate activities. Research, analysis, and debating about contemporary issues. Any student who wishes to receive academic credit for participation in such activities during the quarter should enroll. Total credit limited to 6 units. Course may be offered in classroom-based, online, or hybrid format. 2 laboratories.

COMS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

COMS 301. Business and Professional Communication. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Communication skills and functions for all levels of organizational employees. Interviewing, oral briefings, motivational and conference speaking. 4 lectures.

COMS 308. Group Performance of Literature. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

Examination and experience in the various modes of group performance of literature: Readers Theatre, Chamber Theatre, Story Theatre. Scripting; directing; performing and critiquing of group performance of literature. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

COMS 312. Quantitative Research Methods in Communication Studies. 4 units

Term Typically Offered: F, W, SP

Prerequisites: Junior standing; COMS 206; STAT 217 or STAT 218; and Communication Studies major.

Exploration of communication research strategies and methodologies. Basic methods of designing quantitative research in communication studies. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

COMS 313. Qualitative Research Methods in Communication Studies. 4 units

Term Typically Offered: F, W, SP

Prerequisites: Junior standing; COMS 206; STAT 217 or STAT 218; and Communication Studies major only.

Exploration of ontology, epistemology, methodology, and representation inherent to qualitative inquiry. Emphasis on the following approaches: case study, grounded theory, (auto)ethnography, phenomenology, focus groups, narrative, participatory action research. 4 lectures.

COMS 316. Intercultural Communication. 4 units

Term Typically Offered: F,W,SPSU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Cultural aspects of communication within and among diverse groups. Particular focus on U.S. culture and history and the diversity of ethnic, subcultural, and co-cultural groups. Development of nuanced understanding of the role of culture and communication in human thought, behavior, and interaction. Not open to students with credit in COMS 416. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

COMS 317. Technology and Human Communication. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Impact of technological change upon human communication. Past, present, and future technological developments that have affected how humans communicate. Emphasis on new communication technologies. 4 lectures.

COMS 319. Critical Cultural Studies and Communication. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Analysis and integration of theories and methods of Cultural Studies as an interdisciplinary mode of critical qualitative inquiry. Emphasis on the role of communication in differential power relations, particularly on issues of identity, struggle, and representation in a diverse culture. 4 lectures.

COMS 320. Intergroup Communication. 4 units

Term Typically Offered: F,W,SPSU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Theoretical and practical communication issues regarding socially constructed aspects of identity; concentrating on gender, race, sexuality, social class, ability, age, and language through the lens of social constructionism. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

COMS 322. Persuasion. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A with grades of a C- or better.

Theory of persuasion with particular emphasis upon social psychological principles of influence. Analysis of various forms of persuasion, social influence and propaganda. 4 lectures.

COMS 330. Classical Rhetorical Theory. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A with grades of a C- or better.

Early development of rhetorical theory in Greco-Roman civilization. Analysis of the canons of rhetoric. Rhetorical thought of Sophists, Isocrates, Plato, Aristotle, Cicero and Quintilian. 4 lectures.

COMS 331. Contemporary Rhetorical Theory. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Rhetoric's role in contemporary culture. Issues: political advocacy; science, technology and mass persuasion; ethics and rhetoric. Representative theorists: Burke, Weaver, Richards, Toulmin and McLuhan. 4 lectures.

COMS 332. Rhetorical Criticism. 4 units

Term Typically Offered: F, W, SP

Prerequisites: Junior standing; and completion of GE Area A with grades of C- or better. Recommended: COMS 205 and COMS 330.

Theory and method used in the analysis and evaluation of rhetorical discourse. Study of critical essays. Practice in interpreting and evaluating persuasive discourse. 4 lectures.

COMS 350. Advanced Forensic Activity. 2 units

Term Typically Offered: F, W, SP

Prerequisite: COMS 250.

Advanced development of argumentation and debate skills. Focus on preparation and presentation of intramural exhibition debates. Optional participation in intercollegiate debates. Course may be offered in classroom-based, online, or hybrid format. 2 laboratories.

COMS 351. Speech and Debate Team. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor. Recommended: Previous competitive debate experience. Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs); and completion of GE Area A3 with a grade of C- or better; and COMS 250.

Advanced participation in competitive intercollegiate speech activities. Intercollegiate tournament competition, judging speech competition and other communication-related public service on campus and in the community. Field trip may be required. Total credit limited to 8 units. Course offered in hybrid format with classroom-based and online learning. 2 laboratories. Crosslisted as COMS/HNRS 351.

COMS 384. Media Effects. 4 units

Term Typically Offered: W, SP, SU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: COMS 206 and COMS 215.

Effects of media on individuals and society. Influence of mass media message producers and content on perceptions of social norms, violence, sexuality, gender, race, and ethnicity. Empirical approaches in media studies and literacy development. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

COMS 385. Media Criticism. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better. Recommended: COMS 205 and COMS 215.

Theory and method used in analyzing media from critical, rhetorical, and cultural perspectives. Practice in interpreting and evaluating news, advertising, prime-time television, the Internet, and other mass-mediated texts, with special attention to relationships among media, identity, and political action. 4 lectures.

COMS 386. Communication, Media, and Politics. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: COMS 218 or POLS 112.

Political communication and the U.S. mass media system, including role of the media in democratic society; news norms, government regulation of media, and media ownership; the changing media landscape and implications for news construction, polarization, and selective exposure; and incivility and bias. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

COMS 387. Sports Communication. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Examination of the interrelationship between sports and community including participant, sports organization, sports media, and sports fan. Explores how these interrelationships reinforce social values, challenge social norms, and social identities relevant to sports and cultural values. 4 lectures. Crosslisted as COMS/JOUR 387.

COMS 390. Environmental Communication. 4 units

Term Typically Offered: F

Sustainability Focused

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better. Recommended: Completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs) or GE Area B2.

Recent developments in the field of environmental communication, including how and with what effect environmental messages are transmitted among scientists, policymakers, and the public. Critical/rhetorical and mediated perspectives that inform contemporary understandings of the human-nature relationship are addressed. 4 lectures.

COMS 395. Science Communication. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: Completion of GE Area A with grades of C- or better and completion of one GE Area B course.

Examination of science communication in a variety of contexts. Issues covered may include: scientific journal articles, boundary-work, information deficit models, public understanding/awareness of science, accommodated science, mediated science, popular science. 4 lectures. Crosslisted as COMS/ISLA 395.

COMS 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor and junior standing.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

COMS 404. Video Games & Society. 4 units

Term Typically Offered: F

Prerequisites: Junior standing and completion of GE Area A with grades of C- or better.

Influence of video games on individuals and society. Emphasis on why people play video games, how games influence players, and broader cultural impacts of gaming. Examines franchises, characters, gamers, avatars, gamification, and digital interactions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

COMS 413. Advanced Organizational Communication. 4 units

Term Typically Offered: W

Prerequisite: Junior standing. Recommended: COMS 213 or COMS 301.

Describing and measuring the organization's human message system. Planning and implementing communication training and development for the organization. New functions, careers and opportunities for the communication professional. 4 lectures.

COMS 418. Health Communication. 4 units

Term Typically Offered: F

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Communication in health contexts. Topics include interpersonal communication (e.g., health professional/patient), group and organizational communication (e.g., health-related groups), and mass communication (e.g., persuasive health campaigns). Open to all majors and valuable to laypersons who are consumers of health care, and pre-health professionals. 4 lectures.

COMS 420. Nonverbal Communication. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A with grades of C- or better.

Influence of kinesic, proxemic, artifactual, olfactory, paralinguistic and environmental factors in human communication. Theory, research and practice in nonverbal communication. 4 lectures.

COMS 421. Gender and Communication. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Explores the theory and practice of how gender is created, maintained, and transformed through communication; examines how gender roles are enacted and interpreted in various public and private contexts. 4 lectures.

COMS 422. Rhetorics of Science, Technology, and Medicine. 4 units

Term Typically Offered: W

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Examination of rhetorical strategies and persuasive techniques used within scientific, technical, and medical discourses. Topics include genre features of scientific articles, rhetorical topoi in scientific discourse, pop-culture depictions of science, the scientific ethos, and risk communication. 4 lectures.

COMS 428. Family Communication. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area A with grades of C- or better; and COMS/PSY 212.

Communication theory and practice within family structures. Examination of relationship communication in marital/partnership, parent/child, intergenerational, and sibling relationships. Topics include family communication regarding identity, attachment, conflict, relational dialectics, storytelling/narratives, family transitions, cultural influences, and family support. 4 lectures.

COMS 430. The Dark Side of Interpersonal Communication. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better; and COMS 211.

In-depth exploration of concepts, theories, and research associated with interpersonal communication traditionally considered negative and destructive (e.g., jealousy, infidelity, stalking, gossip, revenge, bullying) to understand the potentially (dys)functional aspects of interpersonal communication behaviors and processes. Course may be offered in classroom-based or online format. 4 lectures.

COMS 435. American Political Rhetoric. 4 units

Term Typically Offered: F, W

Prerequisite: Junior standing.

Role of oratory in American political and social history since Lincoln. Historical and rhetorical analyses of important political speeches delivered by presidents, activists, demagogues, and leaders of social movements. 4 lectures.

COMS 450. Internship: Communication Studies. 2-4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing, 2.5 GPA, and consent of instructor.

Supervised practicum and application of principles and theories of communication in organizational settings. Total credit limited to 8 units. Credit/No Credit grading only.

COMS 458. Solving Big World Challenges. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A with grades of C- or better.

Apply human-centered design practices to address a social or an environmental challenge, specific to a local community. Achieve revenue-generating social impact through innovative business models. Practice team competencies including problem-solving, interviewing, brainstorming, prototyping, and written, visual, and oral communication. 4 lectures. Crosslisted as BUS/COMS 458.

COMS 460. Undergraduate Seminar. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing; COMS 312 or COMS 313; COMS 332 or COMS 385; and Communication Studies major.

Preparation and design for senior project; exploration of scholarship related to project ideas. Credit/No Credit grading only. Course may be offered in classroom-based, online, or hybrid format. 1 seminar.

COMS 461. Senior Project. 3 units

Term Typically Offered: F, W, SP

Prerequisite: COMS 460; for COMS majors only.

Completion of approved project under faculty supervision. Project results are presented in a formal written report. Minimum 90 hours total time.

COMS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

COMS 485. Cooperative Education Experience. 6 units

Term Typically Offered: SU

CR/NC

Prerequisite: 2.5 GPA and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

Computer Engineering (CPE)

undefined

CPE Courses

CPE 100. Computer Engineering Orientation. 1 unit

Term Typically Offered: F

CR/NC

Introduction to the computer engineering discipline. Success skills and curricular information. Career paths and opportunities. Professional aspects of engineering and computer science. Interaction with upper division students, alumni, faculty and staff. Introduction to computer software and hardware. Credit/No Credit grading only. 1 lecture.

CPE 101. Fundamentals of Computer Science. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Appropriate Math Placement Level; or MATH 117 with a grade of C- or better; or MATH 118 with a grade of C- or better; or consent of instructor.

Basic principles of algorithmic problem solving and programming using methods of top-down design, stepwise refinement and procedural abstraction. Basic control structures, data types, and input/output. Introduction to the software development process: design, implementation, testing and documentation. The syntax and semantics of a modern programming language. Credit not available for students who have taken CSC/CPE 108. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 101.

CPE 123. Introduction to Computing. 4 units

Term Typically Offered: F, W

Prerequisite: Basic computer literacy.

Use of a supportive software development environment to design, develop, and test applications in a selected topic domain that demonstrates the potential of careers in computing. An introduction to computing and to the selected topic domain. The Class Schedule will list topic selected. No programming experience required. Not for students with credit in CPE/CSC 103 or CPE/CSC 203. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 123.

CPE 133. Digital Design. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: An orientation course in student's major (EE 111 and EE 151; or CPE 100) and CPE/CSC 101.

Number systems, Boolean algebra, Boolean functions, and function minimization. Analysis and design of combinational and sequential digital logic circuits. Hardware Description Language (HDL) concepts and applications digital design and synthesis in FPGAs. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 133.

CPE 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

CPE 202. Data Structures. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 101 with a grade of C- or better; or consent of instructor.

Introduction to data structures and analysis of algorithms. Abstract datatypes. Specification and implementation of advanced data structures. Theoretical and empirical analysis of recursive and iterative algorithms. Software performance evaluation and testing techniques. Not open to students with credit in CSC/CPE 108. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 202.

CPE 203. Project-Based Object-Oriented Programming and Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 202 with a grade of C- or better or consent of instructor.

Object-oriented programming and design with applications to project construction. Introduction to class design, interfaces, inheritance, generics, exceptions, streams, and testing. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 203.

CPE 225. Introduction to Computer Organization. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 202.

Introduction to computer systems. Simple instruction set architecture and the computer hardware needed to implement that architecture. Machine and assembly language programming. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 225.

CPE 233. Computer Design and Assembly Language Programming. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CPE/EE 133.

Design and implementation of digital computer circuits via CAD tools for programmable logic devices (PLDs). Basic computer design with its datapath components and control unit. Introduction to assembly language programming of an off-the-shelf RISC-based microcontroller. Not open to students with credit in CPE/EE 229. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 233.

CPE 290. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CPE 315. Computer Architecture. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 102 and CSC/CPE 103, or CSC/CPE 202 and CSC/CPE 203; and one of the following: CSC 225, CPE/EE 229, or CPE/EE 233.

In-depth study of the instruction set architecture and hardware design of a specific CPU. Introduction to pipelines, input/output and multi-processors. Computer abstractions and performance measurement. Not open to students with credit in CPE 333. 3 lectures, 1 laboratory.

CPE 316. Microcontrollers and Embedded Applications. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CPE 357. Corequisite: EE 211 or EE 215.

Introduction to microcontrollers and their applications as embedded devices. Hardware/software tradeoffs, microcontroller selection, use of on-chip and off-chip peripherals, interrupt driven real-time operation, A/D conversion, serial and parallel communications, watch-dog timers, and low power operation. Not open to students with credit in CPE 329 or CPE 336. 3 lectures, 1 laboratory.

CPE 321. Introduction to Computer Security. 4 units

Term Typically Offered: F, W
Prerequisite: CPE/CSC 357.

Survey of topics in computer system and network security, including protection, access control, distributed access control, operating system security, applied cryptography, network security, firewalls, secure coding practices, and case studies from real-world systems. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 321.

CPE 327. Digital Signals and Systems. 3 units

Term Typically Offered: F, W
Prerequisite: EE 212 or EE 215; and MATH 244. Concurrent: CPE 367.

Signal and system description and analysis, with emphasis on discrete-time signals and linear time-invariant (LTI) systems. Sampling theorem. Frequency spectrum, Convolution and its application to LTI systems. The z transform, discrete-time Fourier transform, and discrete Fourier transform. Introduction to digital filters. 3 lectures. Crosslisted as CPE/EE 327.

CPE 328. Discrete Time Signals and Systems. 3 units

Term Typically Offered: F, W, SP
Prerequisite: BMED 355 or EE 228. Concurrent: CPE/EE 368.

Discrete-time systems and analysis, with emphasis on linear time-invariant (LTI) systems. Sampling theorem. Classification of discrete-time systems. Convolution and its application to LTI systems. The z transform, discrete-time Fourier transform, and discrete Fourier transform. Introduction to digital filters. Not open to students with credit in CPE 327. 3 lectures. Crosslisted as CPE/EE 328.

CPE 329. Microcontroller-Based Systems Design. 4 units

Term Typically Offered: F, SP
Prerequisite: CPE/EE 233; EE 307 and EE 347.

Design, implementation and testing of microcontroller-based systems. Hardware and C software for embedded systems to sense and actuate external devices. I/O common embedded systems to interface I/O devices and protocols. Analysis of power consumption. Ethics. Not open to students with credit in CPE/EE 336. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 329.

CPE 333. Computer Hardware Architecture and Design. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CPE 101, CPE 233.

Study of a hardware design of a specific CPU. Pipelining, input/output, multi-processors, and performance measurement. Implementation of CPU architectural and computer components using hardware-description languages and development board platforms. Not open to students with credit in CPE 315. 3 lectures, 1 laboratory.

CPE 336. Microprocessor System Design. 4 units

Term Typically Offered: F, SP
Prerequisite: CPE/EE 233.

Introduction to microcontrollers and integrated microprocessor systems. Hardware/software trade-offs, system economics, and functional configurations. Interface design, real-time clocks, interrupts, A/D conversion, serial and parallel communications, watch-dog timers, low power operation, event-based inter-peripheral communication, and assembly and higher-level language programming techniques. Architecture and design of sampled data and low-power systems. Not open to students with credit in CPE/EE 329. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 336.

CPE 345. Quantum Computing. 4 units

Term Typically Offered: SP
Prerequisites: MATH 206 or MATH 244; and CHEM 353 or PHYS 211.

Quantum mechanical wave functions. Principle of superposition and entanglement. States of one or more quantum bits. Quantum gates and circuits. Application of quantum gates on simulators and quantum computers. Quantum computer architectures. Quantum algorithms. Ethics of quantum computing. 3 lectures, 1 activity. Crosslisted as CPE/PHYS 345.

CPE 350. Capstone I. 4 units

Term Typically Offered: F

Corequisite: CPE 316 or EE 329.

Definition and specification of a system to be constructed in CPE 450; requirements elicitation techniques, research and data gathering methods; project planning, time and budget estimating; project team organization. Ethics and professionalism. 3 lectures, 1 laboratory.

CPE 357. Systems Programming. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 102 and CSC/CPE 103 with a grade of C- or better or consent of instructor, or CSC/CPE 202 and CSC/CPE 203 with a grade of C- or better or consent of instructor; and CSC 225 or CPE/EE 229 or CPE/EE 233.

C programming language from a system programming perspective. Standard C language including operators, I/O functions, and data types in the context of system functions. Unix commands, shell scripting, file system, editors. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 357.

CPE 367. Digital Signals and Systems Laboratory. 1 unit

Term Typically Offered: F, W

Prerequisite: EE 242 or EE 245. Concurrent: CPE 327.

Laboratory work pertaining to discrete-time signals and linear systems; including frequency response and Fourier spectral analysis, signal sampling and aliasing, digital signal processing techniques, and digital filter design and implementation. 1 laboratory. Crosslisted as CPE/EE 367.

CPE 368. Signals and Systems Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: BMED 355 or EE 228. Concurrent: CPE/EE 328.

Laboratory work pertaining to linear systems, including Fourier analysis, time and frequency responses, and system transfer function. Not open to students with credit in CPE 367. 1 laboratory. Crosslisted as CPE/EE 368.

CPE 400. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F,W,SP, SU

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

CPE 414. Robotic Systems Integration. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 329 or CPE/CSC 357 or ME 305.

Integration of sensors, actuators, chassis, and Linux-based computational platforms into functioning autonomous robotic systems. Embedded Linux system programming, inter-process software communication, basic sensor fusion techniques, Pulse Width Modulation (PWM) motor actuation, and web-based interfacing for remote system way-pointing and monitoring. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 414.

CPE 416. Autonomous Mobile Robotics. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 329 or CPE 316; or CPE 315 and CPE/CSC 357.

Theory and application of concepts relevant to autonomous mobile robots. Sensor and actuator interfacing, programming mobile robots, mobile robot configurations, software architectures and algorithms. 3 lectures, 1 laboratory.

CPE 419. Applied Parallel Computing. 4 units

Term Typically Offered: F, SP

Prerequisite: CPE/CSC 357. Corequisite: CSC 248 or CSC 348.

Recommended: CPE 315.

Introduction to applied parallel computing paradigms: software models, resource allocation, performance measurement, and data sharing. Emphasis on massively parallel computation and performance improvement for a real-world application of significant scope. 3 lectures, 1 laboratory.

CPE 422. Network Security. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 364 or CPE 464.

Introduction to network security, including denial of service, botnets, access control, routing attacks, transport layer attacks, tunneling mechanisms, VPNs, IDS, firewalls, penetration testing, key distribution, email security, jamming, and wireless security. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 422.

CPE 425. Wireless Security. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/CSC 321. Recommended: CSC 300 or PHIL 323; CSC 364 or CPE 464.

Comprehensive overview of wireless networks and system security. Security issues and solutions in emerging wireless access networks and systems as well as multi-hop wireless networks. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 425.

CPE 426. Introduction to Hardware Security. 4 units

Term Typically Offered: SP

Prerequisite: CPE 315 or CPE 333; and CPE 233.

An introduction to hardware security from embedded systems to secure VHDL design. Topics may include digital rights management, hardware based trojans, hardware implementation of cryptography, sidechannel attacks, secure communication protocols, hardware based overflow detection, physical device verification, and physically unclonable functions. 3 lecture, 1 laboratory.

CPE 428. Computer Vision. 4 units

Term Typically Offered: W

Prerequisite: CPE 327 or CPE/CSC 357 or EE 328 or ME 305.

Introduction to the concepts of 2D and 3D computer vision: low-level image processing methods such as filtering and edge detection; feature extraction; segmentation and clustering; stereo vision; appearance-based and model-based algorithms. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 428.

CPE 431. Compiler Construction. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 430.

Intermediate code representations, memory management, functions and parameter passing, code transformations and optimizations, code generation, register allocation. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 431.

CPE 432. Digital Control Systems. 3 units

Term Typically Offered: F

Prerequisite: EE 302 and EE 342; or CPE 327 and CPE 367. Concurrent: CPE/EE 472. Recommended: EE 328 and EE 368.

Theory and applications of digital computers in linear control systems. Analysis and design of microprocessor-based controls. Introduction of continuous and discrete transform methods for design of closed-loop dynamic systems. Applications in robotics, automotive, aircraft and industrial process control. 3 lectures. Crosslisted as CPE/EE 432.

CPE 439. Introduction to Real-Time Operating Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 329 or CPE 316.

Theory, design and implementation of real-time operating system-based embedded systems. Scheduling algorithms, operating system resources, peripheral device interfacing and embedded system architecture. Resource management issues in a resource-limited (microcontroller-based) environment. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 439.

CPE 441. Computer-Aided Design of VLSI Devices. 4 units

Term Typically Offered: F

Prerequisite: EE 307 and EE 347. Recommended: EE 308 and EE 348, for students interested in analog design.

Design of VLSI circuits using state-of-the-art CAD software. Design issues and algorithms related to design using CAD. Full custom design through automated design and a major multi-week chip design project in lab. 3 lectures, 1 laboratory. Crosslisted as CPE 441/EE 431.

CPE 442. Real Time Embedded Systems. 4 units

Term Typically Offered: F

Prerequisite: CPE/EE 329 or CPE/EE 336 or CPE 316.

Theory, design and implementation of modern embedded systems. Scheduling algorithms and operating system resources. System on Chip (SoC) design issues such as interfacing with custom hardware description language (HDL) peripherals, high-performance chip interconnect standards, energy use, area, and hardware versus software performance trade-offs. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 442.

CPE 446. Design of Fault-Tolerant Digital Systems. 4 units

Term Typically Offered: F

Prerequisite: CPE/EE 329 or CPE/EE 336 or CPE 316. Recommended: STAT 350.

Hardware and software fault tolerance concepts: fault models, coding in computer systems, module and system level fault detection mechanisms, reconfiguration techniques for general purpose processors and ASICs, and software fault tolerance techniques such as recovery blocks, N-version programming, checkpointing, and recovery. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 446.

CPE 447. Stringed Musical Instrument Acoustics, Mechanics, and Transducer Design. 4 units

Term Typically Offered: TBD

Prerequisite: EE/CPE 329 or EE/CPE 336 or CPE 316 or ME 305.

Acoustics, sound production, and transducer design in the context of stringed musical instruments. Introduces music theory, scales and temperament, sound radiation, structural dynamics of stringed instruments. Integrates engineering topics including frequency spectrum analysis, electromagnetics, properties of materials, digital and analog circuit design. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 447.

CPE 450. Capstone II. 3 units

Term Typically Offered: W

Prerequisite: CPE 350.

Team-based design, construction and deployment of an embedded system that includes a custom-built computer. Technical management of product development teams. Technical documentation, configuration management, quality assurance, integration and systems testing. Professionalism. 1 lecture, 2 laboratories.

CPE 453. Introduction to Operating Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 357; and CSC 225, CPE/EE 229, or CPE/EE 233.

Introduction to sequential and multiprogramming operating systems; kernel calls, interrupt service mechanisms, scheduling, files and protection mechanisms, conventional machine attributes that apply to operating system implementation, virtual memory management, and I/O control systems. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 453.

CPE 454. Implementation of Operating Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CSC/CPE 453.

Design and implementation of multiprogramming kernels, systems programming methodology, interprocess communications, synchronization, device drivers and network access methods. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 454.

CPE 458. Current Topics in Computer Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CSC/CPE 357.

Selected aspects of design, implementation and analysis of networks, advanced operating and distributed systems. Topics may include process management, virtual memory, process communication, context switching, file system designs, persistent objects, process and data migration, load balancing, security and networks. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 458.

CPE 461. Senior Project I. 3 units

Term Typically Offered: F,W,SP, SU

Prerequisite: CPE 350.

Selection and completion of an individual or team project. Project results are presented in a formal report.

CPE 462. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SU
Prerequisite: CPE 450.

Selection and completion of an individual or team project. Project results are presented in a formal report.

CPE 464. Introduction to Computer Networks. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 357. Recommended: STAT 312 or STAT 321 or STAT 350.

Computer network architectures; communications protocol standards; services provided by the network; historical and current examples presented. 3 lectures, 1 laboratory.

CPE 465. Advanced Computer Networks. 4 units

Term Typically Offered: TBD
Prerequisite: CSC/CPE 453; and CSC 364 or CPE 464.

Advanced topics in computer networks; greater detail of protocol standards and services provided by the network; focus on current industry and research topics. 3 lectures, 1 laboratory.

CPE 469. Distributed Systems. 4 units

Term Typically Offered: SP
Prerequisite: CSC/CPE 357.

Foundations of distributed systems, distributed hash tables (peer-to-peer systems), failure detectors, synchronization, election, inter-process communication, consensus, replication, key-value stores, and measurements. 3 lectures, 1 laboratory. Crosslisted as CSC/CPE 469.

CPE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CPE 471. Introduction to Computer Graphics. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CPE/CSC 357.

Graphics software development and use of application programming interfaces for 3D graphics. The graphics pipeline, modeling, geometric and viewing transforms, lighting and shading, rendering, interaction techniques and graphics hardware. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 471.

CPE 472. Digital Control Systems Laboratory. 1 unit

Term Typically Offered: F
Concurrent: CPE/EE 432.

Design and programming of microprocessor-based digital controls for electro-mechanical plants. Topics include digital control laws, translation of transfer functions into algorithms, assembly language programming, real-time software design, sample rate selection, finite word-length considerations. 1 laboratory. Crosslisted as CPE/EE 472.

CPE 476. Real-Time 3D Computer Graphics Software. 4 units

Term Typically Offered: TBD
Prerequisite: CSC/CPE 471.

Basic and advanced algorithms for real-time, interactive, 3D graphics software. Modeling (polygon mesh, height field, scene graph), real-time rendering and shading (visibility processing, LOD, texture and light maps), collision detection (bounding volumes, complexity management), interactive controls, multi-player game technology, game engine architecture. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 476.

CPE 479. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CPE 488. Microelectronics and Electronics Packaging. 4 units

Term Typically Offered: F, W, SP
Prerequisite: EE 112 or EE 113 or EE 201. Recommended: MATE 210.

Materials, processes, and reliability of microelectronics and electronics packaging, surface mount assembly and printed circuit board fabrication. Organic substrates and ceramic substrates. Mechanical design, thermal, and electrical considerations in electronic packaging. Design for manufacturability. Overview of optoelectronics packaging and other emerging technologies in microelectronics and electronic packaging. Project on design and manufacture of an electronic device. 3 lectures, 1 laboratory. Crosslisted as CPE 488/IME 458/MATE 458.

CPE 493. Cooperative Education Experience. 2 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 6 units.

CPE 494. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 18 units.

CPE 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

CPE 515. Computer Architecture. 4 units

Term Typically Offered: W

Prerequisite: CPE 315 or CPE 333, and graduate standing; or consent of instructor.

Comparative study and design of multiprocessor, dataflow, RISC, high level language and other new computer architectures. VLSI processor design techniques. 3 seminars, 1 laboratory. Crosslisted as CPE/CSC 515.

CPE 521. Computer Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CPE 316 or CPE/EE 329; and CPE 315 or CPE 333; graduate standing or consent of instructor.

Organization of modern general purpose, high speed digital computer systems. Design of arithmetic units, control units, memories and memory subsystems. Cost, power and speed trade-offs in the design of such systems. 3 seminars, 1 laboratory. Crosslisted as CPE/EE 521.

CPE 522. Advanced Real-Time Operating Systems Design. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 439.

Define and implement a microcontroller-based Real-Time Operating System (RTOS). Advanced real-time concepts, kernel structure, task and time management, various intertask communication constructs including semaphores, queues and mailboxes. Scheduler design, memory management and shared resource management in a resource-constrained microcontroller environment. 3 seminars, 1 laboratory. Crosslisted as CPE/EE 522.

CPE 523. Digital Systems Design. 4 units

Term Typically Offered: TBD

Prerequisite: CPE 316 or CPE/EE 329; and graduate standing.

Full-custom design and analysis of digital circuits using full CMOS, pass-transistor and dynamic circuit topologies. Transistor sizing for minimizing power consumption, delay and other design criteria. 3 seminars, 1 laboratory. Crosslisted as CPE/EE 523.

CPE 532. VLSI Circuit Testing. 1 unit

Term Typically Offered: F

Prerequisite: EE 531/CPE 541.

Characterization, testing and documentation of custom-fabricated Very Large Scale Integrated (VLSI) circuits. Use of specialized test equipment. 1 laboratory. Crosslisted as CPE/EE 532.

CPE 541. Advanced VLSI Design. 4 units

Term Typically Offered: W

Prerequisite: CPE 441/EE 431.

Advanced Very Large Scale Integrated (VLSI) design using state-of-the-art software. Advanced topics in digital, analog and mixed signal circuit design to enable a quarter-long design project culminating in a tapeout-ready integrated circuit design. 3 lectures, 1 laboratory. Crosslisted as CPE 541/EE 531.

CPE 542. Advanced Real Time Embedded Systems. 4 units

Term Typically Offered: W

Prerequisite: CPE/EE 442.

Advanced study and application of modern embedded systems. Memory bandwidth matching, clock-domain crossing, IP creation and verification, and student-led lectures on modern System on Chip (SoC) design topics. Building a prototype embedded system. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 542.

CPE 564. Computer Networks: Research Topics. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 364 or CPE 464, and graduate standing; or consent of instructor.

Exploration of advanced topics in emerging computer networking technologies; focus on leading edge computer network research topics. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 564.

CPE 569. Distributed Computing. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 248 or CSC 348; and CPE/CSC 357; or graduate standing and consent of instructor.

Principles and practices in distributed computing: interprocess communications, group communications, client-server model, distributed objects, message queue system, distributed services, mobile agents, object space, Internet protocols. Distributed algorithms: consensus protocols, global state protocols. Fault tolerance: classification of faults, replication. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 569.

Computer Science (CSC)

undefined

CSC Courses

CSC 101. Fundamentals of Computer Science. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Appropriate Math Placement Level; or MATH 117 with a grade of C- or better; or MATH 118 with a grade of C- or better; or consent of instructor.

Basic principles of algorithmic problem solving and programming using methods of top-down design, stepwise refinement and procedural abstraction. Basic control structures, data types, and input/output. Introduction to the software development process: design, implementation, testing and documentation. The syntax and semantics of a modern programming language. Credit not available for students who have taken CSC/CPE 108. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 101.

CSC 121. Computing for All I. 4 units

Term Typically Offered: F
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 115; or appropriate Math Placement Level.

Fundamentals of computational thinking in the study of non-computing disciplines. Ethical and social considerations of computing. Data gathering and representation. Logic and computational reasoning. Data and procedural abstraction. Problem decomposition. Code patterns for algorithmic problem-solving. 3 lectures, 1 activity. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE Area.

CSC 122. Computing for All II. 4 units

Term Typically Offered: W
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: CSC 121.

Fundamentals of computational thinking in the study of non-computing disciplines. Ethical and social considerations of computing. Reading code and identifying patterns. Problem Decomposition. Algorithms and automation. Software Engineering. Creative Computing. 3 lectures, 1 laboratory. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE Area.

CSC 123. Introduction to Computing. 4 units

Term Typically Offered: F, W
 Prerequisite: Basic computer literacy.

Use of a supportive software development environment to design, develop, and test applications in a selected topic domain that demonstrates the potential of careers in computing. An introduction to computing and to the selected topic domain. The Class Schedule will list topic selected. No programming experience required. Not for students with credit in CPE/CSC 103 or CPE/CSC 203. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 123.

CSC 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP
 Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

CSC 202. Data Structures. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: CPE/CSC 101 with a grade of C- or better; or consent of instructor.

Introduction to data structures and analysis of algorithms. Abstract datatypes. Specification and implementation of advanced data structures. Theoretical and empirical analysis of recursive and iterative algorithms. Software performance evaluation and testing techniques. Not open to students with credit in CSC/CPE 108. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 202.

CSC 203. Project-Based Object-Oriented Programming and Design. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: CPE/CSC 202 with a grade of C- or better or consent of instructor.

Object-oriented programming and design with applications to project construction. Introduction to class design, interfaces, inheritance, generics, exceptions, streams, and testing. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 203.

CSC 225. Introduction to Computer Organization. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: CPE/CSC 202.

Introduction to computer systems. Simple instruction set architecture and the computer hardware needed to implement that architecture. Machine and assembly language programming. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 225.

CSC 231. Programming for Engineering Students. 2 units

Term Typically Offered: F, W, SP
 Prerequisite: MATH 142; PHYS 121 or PHYS 131 or PHYS 141.

Programming techniques and procedures with applications to engineering problems. Introduction to numerical methods and simulation. Credit not allowed for CSC, Software Engineering or CPE majors. Course may be offered in classroom-based or online format. 2 activities.

CSC 232. Computer Programming for Scientists and Engineers. 3 units

Term Typically Offered: F, W, SP
 Prerequisite: MATH 118 or equivalent.

Computer programming, with an emphasis on procedural programming, taught using a language hosted by applications commonly used in science and engineering. Credit not allowed for CSC, CPE or Software Engineering majors. 2 lectures, 1 activity.

CSC 234. C and Unix. 3 units

Term Typically Offered: F, W, SP
 Prerequisite: MATH 142.

The C programming language and the UNIX programming environment. Operators, standard I/O functions, strings, pointers and arrays, data types and storage classes. Unix shell programming and basic I/O system calls. Credit not allowed for CSC, Software Engineering or CPE majors. 3 lectures.

CSC 248. Discrete Structures. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: CSC/CPE 202 and CSC/CPE 203 with grades of C- or better; or consent of instructor.

Structures of computer science: logic, sets, relations, functions, graphs and trees. Propositional and predicate logic. Applications of predicate logic to preconditions, postconditions, and proof techniques. Complexity of algorithms. Not open to students with credit in CSC 141 or CSC 348. 4 lectures. Replaces CSC 348.

CSC 290. Selected Topics. 1-4 units

Term Typically Offered: F, W, SP
 Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CSC 300. Professional Responsibilities. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A3 with a grade of C- or better; CSC/CPE 357; and junior standing.

The responsibilities of the computer science professional. The ethics of science and the IEEE/ACM Software Engineering Code of Ethics. Quality tradeoffs, software system safety, intellectual property, history of computing and the social implications of computers in the modern world. Applications to ethical dilemmas in computing. Technical presentation methods and practice. 3 lectures, 1 laboratory.

CSC 304. Software Engineering without Programming. 4 units

Term Typically Offered: F

Prerequisite: Junior standing; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Introduction to software engineering for students pursuing non-computing degree objectives. Software development lifecycles. Stakeholders and roles in the software lifecycle. Product vision, user personas, and user stories. Software requirements. User interface prototyping. Data description for applications. Software architectures. Software testing. Not open to students in CPE, CSC, or SE. 4 lectures.

CSC 305. Individual Software Design and Development. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 203.

Practical software development skills needed for construction of mid-sized production-quality software modules, using the CSC upper division programming language. Topics include inheritance, exceptions, and memory and disk-based dynamic data structures. Students must complete an individual programming project of mid-level complexity. 3 lectures, 1 laboratory.

CSC 307. Introduction to Software Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 248 or CSC 348; and CPE/CSC 357.

Requirements, specification, design, implementation, testing and verification of large software systems. Study and use of the software process and software engineering methodologies; working in project teams. Not open to students with credit in CSC 308. 3 lectures, 1 laboratory.

CSC 308. Software Engineering I. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 248 or CSC 348.

Principles for engineering requirements analysis and design of large complex software systems. Software process models. Methods of project planning, tracking, documentation, communication, and quality assurance. Analysis of engineering tradeoffs. Group laboratory project. Technical oral and written presentations. 3 lectures, 1 laboratory.

CSC 309. Software Engineering II. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 308 and CSC/CPE 357.

Continuation of the software lifecycle. Methods and tools for the implementation, integration, testing and maintenance of large software systems. Software development and test environments. Software quality assurance. Group laboratory project. Technical presentation methods and practice. 3 lectures, 1 laboratory.

CSC 312. Computational Thinking for Educators. 4 units

Term Typically Offered: SU

Prerequisite: Completion of GE Area C2; and completion of GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalog.)

Fundamentals of computational thinking in the context of K-12 Education. Ethical and social considerations of computing. Data gathering and representation. Logic and computational reasoning. Data and procedural abstraction. Problem decomposition. Code patterns for algorithmic problem-solving. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

CSC 313. Teaching Computing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 202 or CSC 314.

An introduction to pedagogical methods and practical techniques for computer science education: selecting appropriate content, designing assignments and activities, evaluating student learning, and evaluating teaching efficacy. Hands-on guided curricular design activities and real-world practice. 3 lectures, 1 laboratory.

CSC 314. Software Design and Data Structures for Educators. 4 units

Term Typically Offered: SU

Prerequisite: CSC 312.

A programming-based introduction to software design techniques, data structures, and algorithms, appropriate for K-12 computer science teachers. Satisfies a requirement for the computer science specific supplementary authorization for teaching K-12 computer science in California. Course offered online only. 3 lectures, 1 laboratory.

CSC 320. Practical Computer Security for Everyone. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Exploration of practical computer security in everyday life for non-majors. Covering the principles, technologies and tools used to secure the Internet and keep ourselves digitally secure, including: privacy and anonymity, web and data security, cryptography, malware, authentication and access control. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

CSC 321. Introduction to Computer Security. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 357.

Survey of topics in computer system and network security, including protection, access control, distributed access control, operating system security, applied cryptography, network security, firewalls, secure coding practices, and case studies from real-world systems. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 321.

CSC 323. Cryptography Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 357.

An introduction to the theory and practice of building secure, cryptographic systems. Core cryptographic primitives. Implementation, evaluation and subversion of widely deployed cryptographic products and protocols. 3 lectures, 1 laboratory.

CSC 325. Introduction to Privacy: Policy and Technology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A3 with a grade of C- or better; CPE/CSC 203; CSC 300 or PHIL 323.

Introduction to policies and technologies related to digital privacy. Legal decisions and policies, domestic and global cultural expectations, and privacy related technologies including applications to surveillance, big data, websites, mobile, and privacy by design. 3 lectures, 1 laboratory.

CSC 344. Music Programming. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 248 or CSC 348; and CPE/CSC 357.

Music-producing programs. Software synthesizers: oscillators, coupled oscillators, wavetable synthesis. Sound processing units/filters: LTI, FIR, IIR, nonlinear. Physics of sound, mathematical foundations of sound synthesis and filtering, existing sound formats (both sampled and MIDI). 3 lectures, 1 laboratory.

CSC 349. Design and Analysis of Algorithms. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 102 and CPE/CSC 103 or CPE/CSC 202 and CPE/CSC 203; MATH 142; and CSC 248, CSC 348, or MATH 248.

Intermediate and advanced algorithms and their analysis. Mathematical, geometrical, and graph algorithms. NP-complete problems. Additional topics will be chosen from pattern matching, file compression, cryptology, dynamic and linear programming, and exhaustive search. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

CSC 350. Computing for Interactive Arts Capstone I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: ART 384; CSC/CPE 103 or CSC/CPE 202; and junior standing.

Definition and specification of a team-based creative collaboration on a digital interactive art project (e.g. animation, video game, interactive media display, etc). Research and techniques, project planning and project team organization, prototype creation. 1 lecture, 1 laboratory. Crosslisted as ART/CSC 350.

CSC 357. Systems Programming. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 102 and CSC/CPE 103 with a grade of C- or better or consent of instructor, or CSC/CPE 202 and CSC/CPE 203 with a grade of C- or better or consent of instructor; and CSC 225 or CPE/EE 229 or CPE/EE 233.

C programming language from a system programming perspective. Standard C language including operators, I/O functions, and data types in the context of system functions. Unix commands, shell scripting, file system, editors. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 357.

CSC 364. Introduction to Networked, Distributed, and Parallel Computing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 203.

Multisystem/multiprocessor coordination and computing. Networking: OSI stack, routing, link layer, mobile, wireless, and applications. Distributed and Parallel Computing: parallelism, concurrency, coordination, shared memory, messaging, task and data decomposition, and design and implementation challenges. 3 lectures, 1 laboratory.

CSC 365. Introduction to Database Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 248 or CSC 348; or CPE/CSC 102 and CPE/CSC 103 and MATH 248; or CPE/CSC 202 and CPE/CSC 203 and MATH 248.

Basic principles of database management systems (DBMS) and of DBMS application development. DBMS objectives, systems architecture, database models with emphasis on Entity-Relationship and Relational models, data definition and manipulation languages, the Structured Query Language (SQL), database design, application development tools. 3 lectures, 1 laboratory.

CSC 366. Database Modeling, Design and Implementation. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 365.

The database modeling problem. Database modeling levels: external, conceptual, logical and physical. Database models: entity-relationship, relational, object-oriented, semantic, and object-relational. Normal forms. Distributed database design. Functional analysis of database applications and transaction specification, design, and implementation. 3 lectures, 1 laboratory.

CSC 369. Introduction to Distributed Computing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 102 and CSC/CPE 103, or CSC/CPE 202 and CSC/CPE 203; and one of the following: STAT 301, STAT 312, STAT 321 or STAT 350.

Introduction to distributed computing paradigms and cloud computing. Modern distributed computing infrastructures. Problem-solving in a distributed computing environment. 3 lectures, 1 laboratory.

CSC 371. Game Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 102 and CSC/CPE 103; or CSC/CPE 202 and junior standing.

In-depth study of game design including rules, player interaction, and storytelling. Exploration of effective use of sound, art, and game controls in creating meaningful play. Development of fully functioning and engaging games, following standard domain-specific software development processes and using physical prototyping and playtesting. Current, industry-tested game engines. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

CSC 377. Introduction to Mixed Reality. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 202. Recommended: ART 376.

Project-based study and application of Mixed Reality (MR) topics including integrated mixed reality development environments, Human Computer Interaction (HCI) peripherals, 3D environment scanning, physics interaction, diminished reality, motion capture, facial recognition, and visualization hardware. 3 lectures, 1 laboratory.

CSC 378. Interactive Entertainment Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 102 and CPE/CSC 103, or CPE/CSC 202 and junior standing.

Project-based, software oriented, introductory study of interactive entertainment. Discussion and evaluation of classic and historically influential games. Exploration of concepts in game design and development. Topics may include interactive storytelling, game physics, game AI, character development, animation, and development of virtual worlds. Projects require significant programming. 3 lectures, 1 laboratory.

CSC 400. Special Problems. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 4 units.

CSC 402. Software Requirements Engineering. 4 units

Term Typically Offered: F

Prerequisite: CSC 307 or CSC 309.

Software requirements elicitation, analysis and documentation. Team process infrastructure and resource estimation to support appropriate levels of quality. Software architectural design. 3 lectures, 1 laboratory.

CSC 405. Software Construction. 4 units

Term Typically Offered: W

Prerequisite: CSC 305 and CSC 402.

Design and construction of sizeable software products. Technical management of software development teams. Software development process models, software design, documentation, quality assurance during development, software unit and integration testing; CASE tools, development environments, test tools, configuration management. 3 lectures, 1 laboratory.

CSC 406. Senior Project - Software Deployment. 4 units

Term Typically Offered: SP

Prerequisite: CSC 405.

Deployment of a sizeable software product by a student team. Software maintenance and deployment economic issues. Management of deployed software: version control, defect tracking and technical support. 3 lectures, 1 laboratory.

CSC 409. Current Topics in Software Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 307 or CSC 309.

Selected topics in software engineering. Topics may include program generation, quality assurance, formal methods, software metrics, design methods, testing, or software development processes. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 laboratory.

CSC 410. Software Evaluation. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 349; and one of the following: STAT 301, STAT 312, STAT 321 or STAT 350.

Theory and practice of evaluation of software and software systems. Design of experiments for measuring software performance, measuring software output quality, analytical modeling for capacity planning, workload characterization and benchmarking, selection of appropriate software evaluation metrics and criteria. 3 lectures, 1 laboratory.

CSC 421. Binary Exploitation: Tools and Techniques. 4 units

Term Typically Offered: W

Prerequisite: CSC 321; CSC 300 or PHIL 323.

Introduction to the theory and practice of finding vulnerabilities in production systems with a focus on the evolution of vulnerabilities over time. Topics include buffer overflows, return-oriented-programming attacks, return to libc attacks, heap attacks, and common tools. 3 lectures, 1 laboratory.

CSC 422. Network Security. 4 units

Term Typically Offered: SP

Prerequisite: CSC 364 or CPE 464.

Introduction to network security, including denial of service, botnets, access control, routing attacks, transport layer attacks, tunneling mechanisms, VPNs, IDS, firewalls, penetration testing, key distribution, email security, jamming, and wireless security. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 422.

CSC 424. Software Security. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 307 or CSC 309; CPE/CSC 321.

Principles behind secure software design including threat models, trust management, common vulnerabilities and mitigation techniques, robust software development, isolation of untrusted code, auditability, and testing. 3 lectures, 1 laboratory.

CSC 425. Wireless Security. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 321. Recommended: CSC 300 or PHIL 323; CSC 364 or CPE 464.

Comprehensive overview of wireless networks and system security. Security issues and solutions in emerging wireless access networks and systems as well as multi-hop wireless networks. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 425.

CSC 429. Current Topics in Computer Security. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 321 and CPE/CSC 357.

Selected topics in emerging areas of computer security. Potential topics include: network and web security, critical infrastructure protection, embedded systems security, malware analysis, mobile security, and digital forensics, among others. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 laboratory.

CSC 430. Programming Languages. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 349.

Programming language design through evaluator implementation. Expressions, functions, environments, closures, mutation, objects, type systems, and syntactic abstraction. Syntactic, semantic, and static analysis properties. 3 lectures, 1 laboratory.

CSC 431. Compiler Construction. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 430.

Intermediate code representations, memory management, functions and parameter passing, code transformations and optimizations, code generation, register allocation. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 431.

CSC 436. Mobile Application Development. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 357.

Inception, development, testing, and deployment of mobile applications. Introduction to tools, libraries, and frameworks for one or more mobile platforms and devices. Emphasis on software engineering best practices for developing entrepreneurial or humanitarian mobile-centric applications. 3 lectures, 1 laboratory.

CSC 437. Dynamic Web Development. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 357 with a grade of C- or better and CSC 365 with a grade of C- or better; or consent of instructor.

Project-based study of web-based three-tiered applications, including current best practices and tools for design, implementation and testing of browser interface, serverside business logic, object-relational mapping, databases, and web services. 3 lectures, 1 laboratory.

CSC 445. Theory of Computation I. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 248 or CSC 348.

Theory of formal languages and automata. Turing machines. Chomsky hierarchy. Theory of decidability and computability. 4 lectures.

CSC 448. Bioinformatics Algorithms. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 349.

Introduction to the use of computers to solve problems in molecular biology. The algorithms, languages, and databases important in determining and analyzing nucleic and protein sequences and their structure. 3 lectures, 1 laboratory.

CSC 450. Computing for Interactive Arts Capstone II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: ART/CSC 350.

Team-based design, construction and deployment of a collaborative interactive computational art project typically found in the fields of animation, game design, and interactive media. Management of interdisciplinary teams, documentation, creative development, testing, and assessment. 2 activities. Crosslisted as ART/CSC 450.

CSC 453. Introduction to Operating Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 357; and CSC 225, CPE/EE 229, or CPE/EE 233.

Introduction to sequential and multiprogramming operating systems; kernel calls, interrupt service mechanisms, scheduling, files and protection mechanisms, conventional machine attributes that apply to operating system implementation, virtual memory management, and I/O control systems. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 453.

CSC 454. Implementation of Operating Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 453.

Design and implementation of multiprogramming kernels, systems programming methodology, interprocess communications, synchronization, device drivers and network access methods. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 454.

CSC 458. Current Topics in Computer Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC/CPE 357.

Selected aspects of design, implementation and analysis of networks, advanced operating and distributed systems. Topics may include process management, virtual memory, process communication, context switching, file system designs, persistent objects, process and data migration, load balancing, security and networks. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 458.

CSC 466. Knowledge Discovery from Data. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 349 and one of the following: STAT 252, STAT 302, STAT 312, STAT 321 or STAT 350.

Overview of modern knowledge discovery from data (KDD) methods and technologies. Topics in data mining (association rules mining, classification, clustering), information retrieval, web mining. Emphasis on use of KDD techniques in modern software applications. 3 lectures, 1 laboratory.

CSC 468. Database Management Systems Implementation. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 365.

Data structures and algorithms used in the implementation of database systems. Implementation of data and transaction managers: access methods interfaces, concurrency control and recovery, query processors and optimizers. Introduction to implementation of distributed database systems. 3 lectures, 1 laboratory.

CSC 469. Distributed Systems. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 357.

Foundations of distributed systems, distributed hash tables (peer-to-peer systems), failure detectors, synchronization, election, inter-process communication, consensus, replication, key-value stores, and measurements. 3 lectures, 1 laboratory. Crosslisted as CSC/CPE 469.

CSC 471. Introduction to Computer Graphics. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CPE/CSC 357.

Graphics software development and use of application programming interfaces for 3D graphics. The graphics pipeline, modeling, geometric and viewing transforms, lighting and shading, rendering, interaction techniques and graphics hardware. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 471.

CSC 473. Advanced Rendering Techniques. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 471.

Illumination models, reflectance, absorption, emittance, Gouraud shading, Phong shading, raytracing polyhedra and other modeling primitives, coherence, acceleration methods, radiosity, form factors, advanced algorithms. 3 lectures, 1 laboratory.

CSC 474. Computer Animation. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 471.

Basic and advanced algorithms for generating sequences of synthetic images. Interpolation in time and space, procedural and keyframe animation, particle systems, dynamics and inverse kinematics, morphing and video. 3 lectures, 1 laboratory.

CSC 476. Real-Time 3D Computer Graphics Software. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 471.

Basic and advanced algorithms for real-time, interactive, 3D graphics software. Modeling (polygon mesh, height field, scene graph), real-time rendering and shading (visibility processing, LOD, texture and light maps), collision detection (bounding volumes, complexity management), interactive controls, multi-player game technology, game engine architecture. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 476.

CSC 477. Scientific and Information Visualization. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC 349.

Basic data processing (magnitude, grouping and segmentation), visualization design, cognition and perception, spatial data visualizations (2D and 3D, e.g. GIS data, medical data) information data visualization, spatial encoding, color encoding, and interaction. 3 lectures, 1 laboratory.

CSC 478. Current Topics in Computer Graphics. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC/CPE 471.

Selected aspects of the design, implementation and analysis of computer graphics. Topics may include rendering, modeling, visualization, animation, virtual reality, computer vision, multimedia, and perception issues. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 laboratory.

CSC 480. Artificial Intelligence. 4 units

Term Typically Offered: F, W, SP

Prerequisite: either CSC/CPE 102 and CSC/CPE 103 with a grade of C- or better or consent of instructor; or CSC/CPE 202 with a grade of C- or better and junior standing.

Programs and techniques that characterize artificial intelligence. Programming in a high level language. 3 lectures, 1 laboratory.

CSC 481. Knowledge Based Systems. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC 480.

In-depth treatment of knowledge representation, utilization and acquisition in a programming environment. Emphasis on the use of domain-specific knowledge to obtain expert performance in programs. 3 lectures, 1 laboratory.

CSC 482. Speech and Language Processing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 466 or CSC 480 or graduate standing. Recommended: CSC 349.

Introduction to natural language processing theory; speech processing; review of recent advancements. Topics include: tokenization, part-of-speech tagging, word-sense disambiguation, natural language understanding, natural language generation, data mining, voice processing, vocalization, semantic networks, intelligent assistants, computational linguistics, stylistics and machine learning. 3 lectures, 1 laboratory.

CSC 484. User-Centered Interface Design and Development. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 307 or CSC 308; junior standing.

Introduction to the importance of user-centered principles in the design of good interfaces and effective human-computer interaction. Topics include: study of human characteristics affected by interface design, effective requirements data collection and analysis, user-centered approaches to software engineering, and evaluation of interface and interaction quality. 3 lectures, 1 laboratory.

CSC 486. Human-Computer Interaction Theory and Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 307 or CSC 308.

Application of the theories of human-computer interaction to the task of user-centered design. Survey of techniques for studying and involving users in different aspects of the design process, and demonstration of where and when applicable. Combining of theoretical understanding with practical experience to design solutions to problems facing interactive systems designers. 3 lectures, 1 laboratory.

CSC 487. Deep Learning. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 349, and MATH 206 or MATH 244. Recommended: CSC 466 or CSC 480.

Overview of current topics in Deep Learning. Theory and practice of Deep Learning (DL) paradigms. Convolutional Neural Networks (NN), Recurrent NN, Dropout, Momentum Gradient Descent, Batch Normalization, Adversarial and Siamese NN, and new developments. Emphasis on using DL to solve a real-world application of significant scope. 3 lectures, 1 laboratory.

CSC 490. Selected Advanced Topics. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. Class schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CSC 491. Senior Project I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 307 or CSC 309; and consent of instructor.

Selection and completion of a project by individuals or team which is typical of problems which graduates must solve in their fields of employment. Project may include students from other disciplines. Formulation of outline, literature review, and project schedule.

CSC 492. Senior Project II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 491 and consent of instructor.

Selection and completion of a project by individuals or team which is typical of problems which graduates must solve in their fields of employment. Project may include students from other disciplines. Project results are presented in a formal report.

CSC 493. Cooperative Education Experience. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Work experience in an area related to computing. Positions are typically paid and usually require relocation and registration in course for one quarter. Registration in course is required at start of work experience. Formal evaluation by work supervisor required. Major and total credit limited to 4 units. Credit/No Credit grading only. Course offered online only.

CSC 496. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CSC 497. Research Senior Project I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 307 or CSC 309; and consent of instructor.

Individual research activity under faculty supervision. Problem statement and literature review. Intended for those planning to pursue graduate studies or research-oriented employment.

CSC 498. Research Senior Project II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 497 and consent of instructor.

Continued individual research activity under faculty supervision. Prototype development, analysis, documentation. Intended for those planning to pursue graduate studies or research-oriented employment.

CSC 500. Directed Study. 1-4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Fully classified graduate standing and consent of instructor.

Individual directed study of advanced topics. Total credit limited to 4 units. Credit/No Credit grading only.

CSC 508. Software Engineering I. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 307 or CSC 308 and graduate standing, or consent of instructor.

In-depth study of requirements engineering, software project management, formal specifications and object-oriented analysis. 4 seminars.

CSC 509. Software Engineering II. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 508 and graduate standing, or consent of instructor.

In-depth study of software modeling and design. Formal design methodologies. Design patterns. Detailed case studies of existing projects. Tools and methods for designing large software systems. 4 seminars.

CSC 513. Computing Education Research and Practice. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or senior standing.

An overview of the current landscape of computing education research and practice, covering key research findings about how people learn computing, issues of diversity and inclusion in computer science, and a discussion of how and why we should teach everyone computing. 4 seminars.

CSC 515. Computer Architecture. 4 units

Term Typically Offered: TBD

Prerequisite: CPE 315 or CPE 333, and graduate standing; or consent of instructor.

Comparative study and design of multiprocessor, dataflow, RISC, high level language and other new computer architectures. VLSI processor design techniques. 3 seminars, 1 laboratory. Crosslisted as CPE/CSC 515.

CSC 521. Computer Security. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/CSC 321 and graduate standing.

Exploration of advanced topics in computer security with an emphasis on research topics. 3 lectures, 1 laboratory.

CSC 522. Advanced Network Security. 4 units

Term Typically Offered: W

Prerequisite: CPE/CSC 321 and CPE 464; or graduate standing.

Exploration of network security and design. Particular emphasis will be placed on the threat modeling and security mechanisms design. Laboratory exploration of network security through possible theoretical and experimental experience in system design. 3 lectures, 1 laboratory.

CSC 524. System Security. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/CSC 357 or graduate standing.

Exploration of system security and design. Particular emphasis will be placed on vulnerabilities and defenses in components, component selection, component interaction, sourcing, and system design. Laboratory exploration of system security through a hands-on experience in system design. 3 lectures, 1 laboratory.

CSC 530. Languages and Translators. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 430 and graduate standing, or consent of instructor.

Advanced programming language and translator concepts. Language concepts to be covered will be selected from current state-of-the-art languages and current issues in language design. Compiler concepts will include retargetable code generation, use of translator-writing systems, and error recovery. 4 seminars.

CSC 540. Theory of Computation II. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 445 and graduate standing, or consent of instructor.

Advanced topics in theoretical computer science from such areas as automata theory, cellular automata theory, computational complexity, and program verification. 4 seminars.

CSC 549. Advanced Algorithm Design and Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 349.

Advanced study of algorithmic topics including dynamic programming, network flows, and linear programming. Complexity classes and reductions. NP-complete problems, with the introduction of approximation algorithms. 4 lectures.

CSC 550. Operating Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CSC/CPE 453 and graduate standing, or consent of instructor.

General concepts of computer architecture and operating systems. Design features of advanced computers, general time-sharing systems and schemes for dynamic memory allocation, scheduling and protection. Dynamic linkage between subroutines. Intercommunication between input/output and processors. 4 seminars.

CSC 560. Database Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 365 and graduate standing, or consent of instructor.

Current topics in database systems: distributed databases and transactions, nested and long-running transactions, distributed concurrency control, semantic and object-oriented data models, database systems for non-traditional applications: engineering design databases, active, logic, temporal, multimedia, and real-time databases. 4 seminars.

CSC 564. Computer Networks: Research Topics. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 364 or CPE 464, and graduate standing; or consent of instructor.

Exploration of advanced topics in emerging computer networking technologies; focus on leading edge computer network research topics. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 564.

CSC 566. Topics in Advanced Data Mining. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 466 or CSC 480 or CSC 582.

Advanced topics in the areas of data mining, knowledge discovery in data, machine learning, information retrieval and intelligent analysis of information. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

CSC 569. Distributed Computing. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 248 or CSC 348; and CPE/CSC 357; or graduate standing and consent of instructor.

Principles and practices in distributed computing: interprocess communications, group communications, client-server model, distributed objects, message queue system, distributed services, mobile agents, object space, Internet protocols. Distributed algorithms: consensus protocols, global state protocols. Fault tolerance: classification of faults, replication. 3 lectures, 1 laboratory. Crosslisted as CPE/CSC 569.

CSC 570. Current Topics in Computer Science. 2-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and evidence of satisfactory preparation in computer science.

Directed group study of selected topics for graduate students. Topics will normally consist of continuations of those in CSC 520, CSC 530, CSC 540, CSC 550, CSC 560 and CSC 580, and other topics as needed. The Class Schedule will list topic selected. Topic credit limited to 12 units. 2 to 4 seminars.

CSC 572. Computer Graphics. 4 units

Term Typically Offered: TBD

Prerequisite: Successful completion of CSC/CPE 471 and graduate standing, or consent of instructor.

Advanced topics in computer graphics with emphasis on leading edge computer graphics technologies and advanced topics in graphics fundamentals. 3 lectures, 1 laboratory.

CSC 574. Advanced Compute Shaders in Computer Graphics. 4 units

Term Typically Offered: F

Prerequisite: CPE/CSC 471 or graduate standing.

Advanced methods and techniques that utilize general-purpose computing on modern graphics processing units (GPUs) to achieve state-of-the-art effects with physics, animation and lighting. Parallel processing paradigms on the GPU with compute shaders. 3 lectures, 1 laboratory.

CSC 580. Artificial Intelligence. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 480 and graduate standing, or consent of instructor.

Current research in the field of artificial intelligence with emphasis on cooperative agents, distributed agents, and decision making in complex, concurrent environments. AI programming in a distributed environment. 3 lectures, 1 laboratory.

CSC 581. Computer Support for Knowledge Management. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 480 or consent of instructor.

Methods and techniques that computer-based systems can provide to make the management of knowledge and information in digital form easier for the user. Emphasis on support for knowledge-intensive activities performed by users. 3 lectures, 1 laboratory.

CSC 582. Computational Linguistics. 4 units

Term Typically Offered: TBD

Prerequisite: CSC 482 or consent of instructor.

Research-based review of recent advancements in computational linguistics and natural language processing. Topics selected from: language morphology, natural language generation, feature extraction and unification, meaning representations, stylistics, discourse analysis and machine learning methods. 3 lectures, 1 laboratory.

CSC 587. Advanced Deep Learning. 4 units

Term Typically Offered: SP

Prerequisite: CSC 487; or Data Science Minor and DATA 402; or graduate standing.

Current research in the field of deep learning. Topics such as supervised, unsupervised, and semi-supervised learning; representation learning; probabilistic and generative models; reinforcement learning; application domains, including image, audio, and natural language processing; ethical concerns and fairness. 4 lectures.

CSC 590. Thesis Seminar. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing or consent of instructor.

Preparation for conducting research in the field of computer science, through discussions, selected readings, and student presentations. 1 seminar.

CSC 593. Cooperative Education Experience. 2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

CSC 594. Cooperative Education Experience. 6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

CSC 595. Cooperative Education Experience. 12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. A fully-developed formal report and evaluation by work supervisor required. Credit/No Credit grading only.

CSC 596. Research in Computer Science I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual research or activity under faculty supervision, beginning work in preparation for the master's thesis.

CSC 597. Research in Computer Science II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 596 and consent of instructor.

Individual research activity under faculty supervision, continuing work in preparation for the master's thesis.

CSC 599. Thesis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CSC 590; CSC 498 or CSC 597; graduate standing; and consent of instructor.

Individual research or activity under faculty supervision leading to an acceptable Master's thesis.

Construction Management (CM)

undefined

CM Courses

CM 102. Introduction to Construction Management. 2 units

Term Typically Offered: F, W, SP

Introduction to the fundamental concepts and overview of the essential elements associated with the construction profession, to include: construction trends, ethics, safety and health issues, and professional practice methods. 2 lectures.

CM 113. Construction Materials and Assemblies. 2 units

Term Typically Offered: F, W, SP

Recommended: CM 102.

Exploration of the various materials, assemblies, and processes used and applied in the building construction process. Includes presentation, discussion, analysis, study and research of construction materials and assemblies. 2 lectures.

CM 114. Construction Materials and Assemblies Lab. 2 units

Term Typically Offered: F, W, SP

Corequisite: CM 113. Recommended: CM 102.

Exploration of the various materials, assemblies, and processes used and applied in the building construction process. Includes presentation, discussion, analysis, study and research of construction materials and assemblies. 2 laboratories.

CM 115. Fundamentals of Construction Management. 6 units

Term Typically Offered: F, W, SP

Prerequisite: ARCE 106 or CM 113; MATH 141; and PHYS 141.

Production of drawings and specifications for residential and light commercial construction. Integration of scheduling, estimating, codes, and contracts with a project based approach. Manual drawing techniques and computer aided drafting with building information modeling develop visualization skills for architectural systems. 4 laboratories, 2 activities.

CM 214. Residential Construction Management. 5 units

Term Typically Offered: F, W, SP

Prerequisite: CM 115, PHYS 132 or CHEM 124. Corequisite: CM 232.

Materials, methods, and techniques associated with residential and light commercial construction operations. Topics include shallow foundations, timber and masonry framing, roofing, and exterior and interior finishes. Scheduling, estimating, and construction contracts are integrated into a project based approach. 3 laboratories, 2 activities.

CM 232. Evaluation of Cost Alternatives. 3 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 142 or MATH 182.

Basic principles of economic evaluations using fundamental concepts of time value of money to compare cost alternatives related to construction, design, and real property development. 3 lectures.

CM 239. Construction Surveying. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 119 or equivalent.

Theory and practice of plane surveying with an emphasis on construction applications. Topics include property use and care of survey equipment and instruments, distance measurement, leveling, angular measurement, construction layout, basic roadwork, and as-built surveys. 3 lectures, 1 laboratory.

CM 280. Building Information Modeling. 2 units

Term Typically Offered: F, W, SP

Prerequisite: CE 113 or CM 115.

Use of building information modeling software to emphasize residential, commercial, and heavy civil assembly methods and techniques. BIM drafting applications integrated with construction materials, details, and assemblies supporting the understanding of the construction building process. Course may be offered in classroom-based, online, or hybrid format. 2 activities.

CM 310. Construction Means and Methods. 4 units

Term Typically Offered: F, SP

Prerequisite: CM 113 or CE 259 or ARCE 106.

Construction means, methods, and techniques related to the built environment including residential, commercial, heavy civil and HVACR construction. Focus on the major construction material assemblies and systems with an emphasis on constructability, best practices, and application. Field trips required. 4 lectures.

CM 313. Commercial Construction Management. 5 units

Term Typically Offered: F, W, SP

Prerequisite: ARCE 212 and CM 214. Corequisite: CM 280 and CM 334.

Materials, methods, and techniques associated with large commercial and institutional construction operations. Topics include building systems analysis of foundations, waterproofing, structural framing, exterior cladding, and finishes. Scheduling, estimating, and construction contracts are integrated into a project based approach. 3 laboratories, 2 activities.

CM 314. Heavy Civil Construction Management. 5 units

Term Typically Offered: F, W, SP

Prerequisite: CM 239 or BRAE 239; CM 313 or CM/CE 371.

Materials, methods, and techniques associated with civil engineering projects and heavy construction operations. Topics include tunnel, bridge, dam, and road construction; equipment selection; and temporary structures. Scheduling, estimating, and construction contracts are integrated into a project based approach. 3 laboratories, 2 activities.

CM 317. Sustainability and the Built Environment. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary analysis of sustainable strategies and technologies to enhance the built environment. A systems approach to green building science that includes sustainable site development, water use efficiency, renewable energy, improving material use, indoor environmental quality, and design innovation. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

CM 318. Housing and Communities. 4 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 Sustainability Related

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

An overview of the social, economic, environmental and cultural impacts of housing on communities and nations. Students are presented with varied perspectives to understand the different facets of housing and their impacts on the human experience. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

CM 334. Construction Law. 2 units

Term Typically Offered: F, W, SP
 Prerequisite: CM 115 and BUS 207.

The intersection of law and the construction industry. Topics of study include a survey of most major legal issues potentially encountered during construction activity. Course may be offered in classroom-based, online, or hybrid format. 2 activities.

CM 335. Construction Accounting. 2 units

Term Typically Offered: F,W,SP,SU
 Prerequisite: BUS 215 and CM 232.

Fundamentals of construction accounting principles to include income recognition, job cost control, cash flow analysis and associated cost reports. Course may be offered in classroom-based or online format. 2 activities.

CM 371. Construction Management and Project Planning. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: ARCE 106, CE 259 or CM 113.

Theory and practice of planning, scheduling, estimating, and reporting for construction projects. Fundamentals of scheduling logic including critical path, deterministic, and probabilistic scheduling; including the impact of constraints. Identifying resources and estimating time requirements for design activities and project operations. Not open to Architectural Engineering or Construction Management majors. 3 lectures, 1 activity. Crosslisted as CE/CM 371.

CM 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 6 units, with a maximum of 4 units per quarter.

CM 411. Specialty Contracting Construction Management. 5 units

Term Typically Offered: F, W, SP
 Prerequisite: CM 313.

Materials, methods, and techniques associated with mechanical, electrical, and plumbing systems. Topics include heating, ventilating, air conditioning, power distribution, grounding, lighting, communication, fire detection/protection, and plumbing. Integration of scheduling, estimating, and construction subcontracts with a project based approach. 3 laboratories, 2 activities.

CM 413. Jobsite Construction Management. 5 units

Term Typically Offered: F,W,SP,SU
 Prerequisite: CM 214 or CM 313.

Management activities applicable to the construction process involving techniques, applications, and theory needed in a jobsite environment. Addresses the relationships, roles, and perspectives of all stakeholders. Integrated utilization of temporary structures associated with field construction. Course may be offered in classroom-based, online, or hybrid format. 3 laboratories, 2 activities.

CM 415. Integrated Project Delivery. 4 units

Term Typically Offered: TBD
 Prerequisite: CM 413 and CM 480.

Team based collaborative effort to analyze and evaluate the unique interdisciplinary challenges associated with coordinating and integrating the design and construction processes to deliver a project with respect to the design, budget, schedule, quality, and performance expectations of a client. Not open to students with credit in CM 450. 4 laboratories.

CM 420. Service / Experiential Learning. 1-6 units

Term Typically Offered: SP
 Prerequisite: Third-year standing.

Service and project-based learning and teaching techniques as applied to a variety of construction management concepts. Goals and objectives achieved through service-learning, project-based, and/or experiential pedagogical approaches. The Class Schedule will list topic selected. Total credit limited to 8 units. 1-6 activities.

CM 421. Emerging Trends. 1-6 units

Term Typically Offered: TBD
 Prerequisite: Third-year standing.

Emerging trends related to construction management concepts and practices. Goals and objectives achieved through analysis, study, and research of a particular construction emerging trend. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 1 to 6 activities.

CM 422. Professional Preparation. 1-6 units

Term Typically Offered: F, W, SP
 Prerequisite: Third-year standing.

Professional practice related to the construction management industry. Goals and objectives achieved through analysis, study, and preparation for a particular professional practice. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 1 to 6 activities.

CM 423. Construction Materials / Assemblies. 1-6 units

Term Typically Offered: TBD
Prerequisite: Third-year standing.

Various materials and assemblies related to construction process. Goals and objectives achieved through analysis, study, and research of a particular construction material and/or assembly. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 6 activities.

CM 424. Construction Technology. 1-6 units

Term Typically Offered: SU
Prerequisite: Third-year standing.

Technology related to construction management education and the construction industry. Goals and objectives achieved through analysis, study, and research of a particular construction technology. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 6 activities.

CM 425. Sustainability and Environment. 1-6 units

Term Typically Offered: TBD
Sustainability Focused
Prerequisite: Third-year standing.

Sustainable and environmental issues related to the construction industry. Goals and objectives achieved through analysis of a particular construction related sustainable and/or environmental issue. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 1 to 6 activities.

CM 426. International Construction Studies. 1-6 units

Term Typically Offered: TBD
Prerequisite: Third-year standing.

Exploration of international construction studies through several potential teaching techniques, including field trips to countries overseas, research and case studies of companies and projects, and management skills and leadership as they relate to international construction. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 6 activities.

CM 436. Heavy Civil Temporary Structures and Shoring. 4 units

Term Typically Offered: W
Prerequisite: ARCE 315 or CE 352; and CM 314.

Design and construction of retaining walls, concrete formwork, falsework, scaffolding, ramps, platform, bracing, and guying as applied to heavy civil projects. Field trip may be required. 2 lectures, 2 laboratories. Crosslisted as CE/CM 436.

CM 437. Heavy Civil Projects and Equipment. 4 units

Term Typically Offered: SP
Prerequisite: CM 314.

Heavy civil projects logistics, construction, operations, planning, management, workflow and sequencing, equipment management, fleet configuration and maintenance, equipment productivity and cost optimization. 2 lectures, 2 laboratories. Crosslisted as CE/CM 437.

CM 443. Management of the Construction Firm. 3 units

Term Typically Offered: F, W, SP
Prerequisite: CM 334; CM 335; and CM 413.

Applications of strategic management techniques and business strategy for managing and long-range planning of the construction firm. 3 activities.

CM 450. Integrated Project, Design and Program Management. 5 units

Term Typically Offered: F, W, SP
Prerequisite: STAT 251 or STAT 312, CM 313 and CM 334.

Evaluation of roles and relationships of owner, designer, and construction professionals over project life cycles. Modeling, conceptual estimating, lean scheduling, contract selection, integrated delivery, design management, program management, and influential leadership strategies and techniques. Not open to students with credit in CM 415. Course may be offered in classroom-based, online, or hybrid format. 3 laboratories, 2 activities.

CM 460. Senior Project Methodology. 2 units

Term Typically Offered: F, W, SP
Prerequisite: CM 313; junior standing; Construction Management majors only.

Introduction to senior project processes, timelines, requirements, and best practices including topic selection, literature review, methodology, and paper formatting. 2 lectures.

CM 461. Senior Project I. 1 unit

Term Typically Offered: F, SP
Prerequisite: CM 460 and consent of project advisor. See department for additional guidelines and requirements.

Selection and completion of a comprehensive project under faculty supervision. Problems to involve the student's technical and creative skills. Student proposal must be submitted and approved by project advisor prior to registration for course. Construction and team projects encouraged.

CM 462. Senior Project II. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: CM 460 and consent of project advisor. See department for additional guidelines and requirements.

Selection and completion of a comprehensive project under faculty supervision. Problems to involve the student's technical and creative skills. Student proposal must be submitted and approved by project advisor prior to registration for course. Construction and team projects encouraged.

CM 463. Senior Project: Professional Practice for Constructors. 3 units

Term Typically Offered: TBD
Prerequisite: CM 413. Corequisite: CM 443.

Practical application of construction management theory and practice solving problems related to the built environment. 3 laboratories.

CM 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

CM 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

CM 475. Real Property Development Principles. 4 units

Term Typically Offered: F, SP

Prerequisite: Minimum junior standing.

Development process and its major actors: investors, developers, government agencies, environmental and local stakeholders; their development roles, objectives, approaches. Basics of urban markets and economics, financing, regulation, public planning; value added, contractual, environmental and community context factors. 4 lectures.

CM 480. Preconstruction Integration and Planning. 2 units

Term Typically Offered: TBD

Prerequisite: CM 313.

Examination of the role of preconstruction services, team integration, and joint design planning in several Integrated Project Delivery (IPD) approaches. Various tools and techniques associated with preconstruction services and design planning from the proposal stage through the design stages of a project. 2 activities.

CM 485. Cooperative Education Experience. 1-6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Full-time work experience in an area directly related to the construction industry for 3 months. Positions are paid and usually require relocation and registration in course for one quarter. Registration in course is required at start of work experience. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. May be repeated for credit. Major credit limited to 6 units; total credit limited to 12 units. See department for additional requirements.

CM 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor.

Full-time work experience in an area directly related to the construction industry for 6 months. Positions are paid and usually require relocation for two consecutive quarters. Registration in course is required at start of work experience. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. May be repeated for credit. Major credit limited to 6 units; total credit limited to 24 units. See department for additional requirements.

CM 510. Principles of Integrated Facility Management. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Examination of the facility management profession and all functions associated with it, including strategic planning, financial planning, budgeting, project management, operations and maintenance, sustainability, and emergency preparedness, and how those functions interface with the overall goals of the business enterprise. Course offered online only. 4 lectures.

CM 521. Construction Cost Estimating and Work Procurement. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of program coordinator.

Examination of the construction discipline of cost estimating and pre-construction activities, emphasizing both the core and higher functions associated with types of estimates, measuring and pricing, bidding procedures and strategies, procurement, pre-construction services, budget, and cost control analysis. 4 lectures.

CM 522. Construction Planning, Scheduling, and Impact Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of program coordinator.

Examination of the construction discipline of planning, scheduling, management, and control relating to both core and higher functions associated with network diagram analysis, CPM scheduling, project diagnostics, short interval, resource loaded, pull scheduling, forecasting, and earned value management techniques. 4 lectures.

CM 523. Construction Contracts and Law. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of program coordinator.

Examination of the discipline of law and contracts as they relate to the construction industry, including both the core and higher functions associated with the construction process, business organization, employment responsibilities, liability, damages, claims, dispute resolution, and risk management. 4 lectures.

CM 524. Construction Project Management and Control. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of program coordinator.

Examination of the discipline of construction project management and control relating to both the core and higher functions associated with the construction process, pre-construction services, and management in the areas of safety, quality, resource, risk, schedule, budget, changes, and value. 4 lectures.

CM 525. Construction Workforce, Productivity, and Safety. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of program coordinator.

Examination of the disciplines of workforce productivity and safety as they relate to the construction industry, including both the core and higher functions associated with field personnel management, construction operations, lean construction techniques, equipment utilization, productivity, and OSHA regulations. 4 lectures.

CM 570. Selected Advanced Topics in Construction Management. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed study of selected topics in Construction Management. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

CM 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

Dairy Science (DSCI)

undefined

DSCI Courses

DSCI 102. Dairy Operations and Safety. 2 units

Term Typically Offered: F, SP

Dairy farm biosecurity, animal handling and welfare, equipment operation, employee safety and hazard analysis. Instruction in standard operating procedures (SOP) relevant to milking, transition cow and calf management and cattle identification. 2 activities.

DSCI 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

DSCI 202. Dairy Promotion and Marketing. 4 units

Term Typically Offered: F

Prerequisite: DSCI 230 and DSCI 231.

National and state dairy promotional programs, advertising and merchandising. Marketing and pricing of milk and dairy products at the state and national level. 4 lectures.

DSCI 229. General Dairy Manufacturing. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Composition and properties of fluid milk and manufactured milk products. Chemistry and microbiology of dairy products. Processes and equipment involved in the manufacture of butter, cheeses, and other fermented dairy products, frozen, condensed, and dried dairy foods. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

DSCI 230. General Dairy Husbandry. 4 units

Term Typically Offered: F, W, SP

Selection, breeding, feeding, and management of dairy cattle.

Composition and food value of dairy products. Milk pricing, political influences, dairy industry statistics and opportunities. Producing and handling products. Intended as introductory course for non-dairy science majors. 3 lectures, 1 laboratory.

DSCI 233. Milk Processing and Inspection. 4 units

Term Typically Offered: W

Prerequisite: DSCI 231, or FSN 125, or FSN 230.

Composition and properties of fluid milk and its constituents. Equipment used to handle, process, and distribute fluid milk and related products. California dairy codes used for dairy farms and plants, with practice inspections of dairy farms and factories. 3 lectures, 1 laboratory.

DSCI 241. Dairy Cattle Selection, Breeds, Fitting and Showing. 4 units

Term Typically Offered: SP

Prerequisite: DSCI 230.

Selection of dairy cattle on type conformation and the correlation between type and production. Dairy cattle breeds and breed comparisons. Techniques to properly condition, groom and present dairy cattle for evaluation and merchandising. 2 lectures, 2 activities.

DSCI 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

DSCI 301. Dairy Cattle Nutrition. 4 units

Term Typically Offered: F, SP

Prerequisite: ASCI 220 with a grade of C- or better or consent of instructor.

Nutrition principles to maximize milk production. Ruminant/post ruminant digestion, post absorptive metabolism, nutrient interactions and microbiology. Use of computer models to evaluate and formulate diets. 3 lectures, 1 activity.

DSCI 321. Lactation Physiology. 4 units

Term Typically Offered: F

Prerequisite: ASCI 220; DSCI 230; and BIO 111 or BIO 161.

Mechanisms of milk component secretion, including protein, lactose and fat metabolism. Disorders of the mammary gland (mastitis) and control strategies. Endocrine aspects of mammary gland development and lactogenesis. 4 lectures.

DSCI 330. Artificial Insemination and Embryo Biotechnology. 4 units

Term Typically Offered: F

Prerequisite: ASCI 229 or DSCI 230.

Techniques in the collection, evaluation and processing of semen, along with embryo culturing and manipulation. Insemination procedures, fertility problems, record keeping, estrous synchronization, endocrine control of reproduction, treating reproductive disorders and embryo transfer. 3 lectures, 1 laboratory.

DSCI 333. Dairy Animal Health, Safety and Applied Technology. 4 units

Term Typically Offered: W

Prerequisite: ASCI 220 and DSCI 230.

Application of principles of herd health, biosecurity, lactation physiology, cattle management and reproductive physiology to successful dairy operations. Assessment of animal comfort and general health and well-being. Practical techniques in safe animal handling. 3 lectures, 1 activity.

DSCI 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

DSCI 401. Physical and Chemical Properties of Dairy Products. 4 units

Term Typically Offered: F

Prerequisite: Junior standing. Recommended: CHEM 312.

Composition, structure and properties of milk and milk products. Physical and chemical changes that occur during processing and storage of dairy products. Objective measurement of chemical and physical properties. 3 lectures, 1 laboratory.

DSCI 402. Quality Assurance and Control of Dairy Products. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing. Recommended: DSCI 444 or MCRO 421.

Current methods used to evaluate dairy products with respect to production plant economics and consumer safety. Accurate procedures for chemical and biological testing, appropriate product sampling protocols. Design and interpretation of HACCP programs for assuring product quality and safety. 3 lectures, 1 laboratory.

DSCI 410. Advanced Dairy Nutrition. 4 units

Term Typically Offered: SP

Prerequisite: ASCI 229; and ASCI 355 or DSCI 301.

Nutrient metabolism and diet formulation technologies for all classes of dairy cattle; whole-farm feed management; physiological and nutritional aspects of predominant metabolic disorders; on-farm auditing and troubleshooting of nutritional management. Field trip required. 3 lectures, 1 laboratory.

DSCI 412. Dairy Farm Consultation. 4 units

Term Typically Offered: W

Prerequisite: DSCI 333.

Student consultation teams of three or four students visit dairies and/or attend management training seminars followed by presenting management recommendations to the dairy owners, consultants, and other industry leaders. 1 seminar and supervised work.

DSCI 422. Breeding and Genetics of Dairy Cattle. 4 units

Term Typically Offered: SP

Prerequisite: DSCI 241, BIO 111 or higher, STAT 130 or higher.

Evaluation of inherited characteristics in dairy cattle, including principles of inheritance and genomic evaluations. Proving and selecting sires and dams, dairy genetic evaluations. 4 lectures.

DSCI 432. Advanced Dairy Herd Management. 4 units

Term Typically Offered: W

Prerequisite: DSCI 333.

Dairy herd management skills needed in dairy operations. Instruction and lab experience in management, records, labor, waste management, and milking management. 4 lectures.

DSCI 444. Dairy Microbiology. 4 units

Term Typically Offered: F

Prerequisite: DSCI 233; and MCRO 221 or MCRO 224; and STAT 130 or STAT 218; or graduate standing.

Microorganisms involved in the fermentation and ripening processes in the dairy industry, as well as those involved in spoilage of milk and dairy products, in the transmission of disease through these products, and indicator systems used to determine sanitary quality of these products. 3 lectures, 1 laboratory.

DSCI 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

DSCI 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

DSCI 500. Individual Study in Dairy Science. 1-6 units

Term Typically Offered: TBD

Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced independent study planned and completed under the direction of a member of the Dairy Science faculty. Total credit limited to 6 units.

DSCI 501. Dairy Chemistry. 3 units

Term Typically Offered: TBD

Prerequisite: CHEM 212 or CHEM 312; admission to Master of Professional Studies program in Dairy Products Technology.

Recommended: Differential and Integral Calculus.

Composition, structure/functional relationships and properties of milk, milk components and products. Physical, chemical and biochemical changes that occur during processing, storage and use of milk and milk components. Chemical, physical, functional and nutritional properties of milk components. 3 lectures.

DSCI 502. Dairy Chemistry Laboratory. 2 units

Term Typically Offered: TBD

Prerequisite: DSCI 501; admission to Master of Professional Studies program in Dairy Products Technology.

Objective measurements, analysis and isolation of milk components. Experimental demonstration of chemical and physical reactions of milk components during typical processing conditions. 2 laboratories.

DSCI 510. Dairy Foods: Issues and Practices. 2 units

Term Typically Offered: TBD

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology.

Contemporary issues in the dairy foods and allied industries. Consumer, political, environmental, regulatory, producer, technological, scientific, and economic considerations critical to future industry leaders. Required field trips to the dairy foods processing industry in California. 1 lecture, 1 activity.

DSCI 520. Dairy Processing and Manufacturing I. 3 units

Term Typically Offered: TBD

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology. Concurrent: DSCI 540.

Principles of unit operations involving heat and mass transfer including pasteurization and related thermal processes, centrifugal separation, concentration processes, churning and related high shear extrusion, fractionation processes, freezing, and drying technologies. Pneumatic and mechanical devices and systems. 2 lectures, 1 laboratory.

DSCI 521. Dairy Processing and Manufacturing II. 4 units

Term Typically Offered: TBD

Prerequisite: DSCI 520; admission to Master of Professional Studies program in Dairy Products Technology.

Unit operations in process systems for the efficient manufacture of fluid milk products, cream, butter, and concentrated milk. Process variables and their control, system integration. Use of processes to manipulate physical and chemical properties to influence product quality. 3 lectures, 1 laboratory.

DSCI 524. Dairy Processing and Manufacturing III. 4 units

Term Typically Offered: TBD

Prerequisite: DSCI 520 and admission to Master of Professional Studies program in Dairy Products Technology.

Unit operations in process systems for the manufacture of fermented milk, cheese, frozen desserts, and dried milk and whey products. 3 lectures, 1 laboratory.

DSCI 535. Dairy Foods Ingredient Functionality. 4 units

Term Typically Offered: TBD

Prerequisite: DSCI 501 and admission to Master of Professional Studies program in Dairy Products Technology.

Physical, chemical, and sensory properties of functional milk components when used in food products. 3 lectures, 1 laboratory.

DSCI 539. Graduate Internship in Dairy Science. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology and consent of instructor.

Practical work experience and management assignments in a dairy food processing company. Credit/No Credit grading only.

DSCI 540. Graduate Dairy Microbiology. 4 units

Term Typically Offered: TBD

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology. Concurrent: DSCI 520. Recommended: MCRO 221 or equivalent.

Raw milk microbiological principles, pasteurization and microorganisms in dairy foods safety, microbiological analysis of dairy products, fermented milks and cheese, starters and probiotics, commercial practices and sources of information for regulation on microbial aspects of dairy foods. 2 lectures, 2 laboratories.

DSCI 541. Quality Assurance, Quality Control and Food Safety. 4 units

Term Typically Offered: TBD

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology.

Concepts and methodologies used in dairy industry and dairy food plants for assurance and control of the quality of finished product. Basis for understanding physical, chemical and microbiological methods as they apply to quality evaluation of dairy foods. 3 lectures, 1 laboratory.

DSCI 560. Recent Developments in Dairy Science and Technology. 1-3 units

Term Typically Offered: TBD

Prerequisite: Senior or graduate standing and approval of instructor.

Presentation and critical review of current research publications. Methodological advances and applications in dairy food systems. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 to 3 seminars.

DSCI 565. Industrial Plant Considerations for Sustainable Operation. 4 units

Term Typically Offered: TBD

Prerequisite: DSCI 520; admission to Master of Professional Studies program in Dairy Science Technology.

Plant site selection considerations, project management, plant design and layout, management of productivity maintenance, plant improvement project selection criteria, working with regulatory environment, community relations, and personal safety for overall industrial plant sustainability. 3 lectures, 1 activity.

DSCI 570. Selected Topics in Dairy Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

DSCI 571. Selected Advanced Laboratory in Dairy Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

DSCI 581. Graduate Seminar in Dairy Science. 1-3 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology.

Current challenges in the field and their application to industry. Group study of industry issues. Current research findings as applied to production, leadership and marketing. Total credit limited to 3 units. Credit/No Credit grading only. 1 to 3 seminars.

DSCI 582. Dairy Processing and Plant Management. 2 units

Term Typically Offered: TBD

Prerequisite: Admission to Master of Professional Studies program in Dairy Products Technology.

Dairy plant operation, processing experience and production team dynamics. Practical training and experience in dairy plant operations to allow efficient, safe and sanitary processing of dairy products manufacture in a team environment. Total credit limited to 4 units. 2 laboratories.

DSCI 585. Cooperative Education Experience in Dairy Science. 1-6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study, analysis and part-time work experience in the field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 9 units. Credit/No Credit grading only.

DSCI 599. Thesis in Dairy Science. 1-9 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Systematic research of a significant problem in Dairy Science. Problem identification, significance, methods, data analysis, and conclusion. Enrollment required every quarter in which facilities are used or advising is received. Total credit limited to 9 units.

Dance (DANC)

undefined

DANC Courses

DANC 130. Pilates and Conditioning Fundamentals. 2 units

Term Typically Offered: F

Introduction to the Pilates method and conditioning fundamentals. Exploration and practice of physical fitness, and the maintenance of a uniformly developed body. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 131. Beginning Ballet. 2 units

Term Typically Offered: F, W, SP

Fundamentals of ballet technique stressing alignment, turnout, basic positions and terminology. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 132. Beginning Modern Dance. 2 units

Term Typically Offered: F, W, SP

Fundamentals of modern technique stressing alignment, use of torso, floor work, movement phrases, and improvisation exercises. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 133. Beginning Jazz Dance. 2 units

Term Typically Offered: W, SP

Introduction of jazz dance techniques stressing a variety of styles, alignment, isolation, polyrhythms, syncopation, improvisation and presentation of dance phrases. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 134. Beginning Ballroom Dance. 2 units

Term Typically Offered: TBD

Focus on one or more selected ballroom dances including Cha-Cha, Foxtrot, Merengue, Rhumba, Samba, Swing, Tango, and/or Line Dances. Emphasis on alignment, etiquette, leading and following, history, performance techniques and presentation of dance phrases. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 135. International Folk Dance. 2 units

Term Typically Offered: SP

Introduction to international folk dances including round, longway, and square sets. Study of various dance steps, formation, positions, historical and cultural background. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 210. Active Wellness. 4 units

Term Typically Offered: TBD

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Investigation of health and wellness ideologies and techniques through active participation in personalized fitness circuits and lectures. Basic elements of fitness, injury prevention, nutrition are presented to help students activate optimum health now and in the future. 3 lectures, 1 activity. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

DANC 221. Dance Appreciation. 4 units

Term Typically Offered: SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introductory survey of major experiments in dance. Examination of history, philosophy, aesthetics, cultural context and criticism of diverse dance genres. Focus on major western dance artists from the 19th century to the present. Purchase of concert ticket(s) may be required. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

DANC 231. Intermediate Ballet. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Intermediate level experience as determined by instructor prior to add/drop deadline.

Continuation of training in basic technical skills in ballet stressing phrasing, performance, and more complex step patterns. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 232. Intermediate Modern Dance. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Intermediate level experience as determined by instructor prior to add/drop deadline.

Continuing study of DANC 132 with emphasis on various movement styles, phrasing, more complex step patterns, and performance. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 233. Intermediate Jazz Dance. 2 units

Term Typically Offered: F, W

Prerequisite: Intermediate level experience as determined by instructor prior to the add/drop deadline.

Continuation of DANC 133 with emphasis on more extensive movement vocabulary. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 234. Intermediate Ballroom Dance. 2 units

Term Typically Offered: TBD

Prerequisite: DANC 134 or intermediate level experience as determined by instructor prior to the add/drop deadline.

Continuation of DANC 134. Selected ballroom dances: cha cha, foxtrot, merengue, rumba, swing, tango, hustle, paso doble, polka and samba. Emphasis on variations, styles, and performance skill. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

DANC 280. Body Awareness and Expression. 4 units

Term Typically Offered: TBD

Directed group study of movement techniques and exercises to facilitate expressive physical performance. Body effectiveness, alignment and conditioning practice integrated with creative exploration and movement analysis of effort, spatial awareness and detailed body usage. 4 lectures. Crosslisted as DANC/TH 280.

DANC 321. Cultural Influence on Dance in America. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

Multicultural approach to history of dance in America, with emphasis on American Indian, West African, Caribbean, Mexican, European, and Asian contributions and influences. Explores culture through dance. Purchase of concert ticket(s) required. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

DANC 331. Advanced Ballet and Repertory. 2 units

Term Typically Offered: F

Prerequisite: DANC 231 or intermediate level experience as determined by instructor prior to the add/drop deadline.

Advanced ballet technique and reconstruction of historical ballet repertoires from the romantic, classical, neoclassical, and modern periods. Participation in dance performance of selected repertory. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 332. Contemporary Dance Repertory. 2 units

Term Typically Offered: F

Prerequisite: Intermediate level experience as determined by instructor prior to the add/drop deadline.

Intermediate to advanced dance skills learned through the study and performance of selected contemporary dance repertory. Explores concepts in advanced performance technique through formal and informal presentation in performance situations. Purchase of concert ticket(s) may be required. Total credit limited to 6 units. 2 activities.

DANC 340. Dance Composition. 4 units

Term Typically Offered: W

Prerequisite: Intermediate level experience as determined by instructor prior to the add/drop deadline.

Principles of dance composition. Exploration of creative potential and development of movement motifs through choreographic studies. Preparation for informal public presentation of student generated choreographic works. Purchase of concert ticket(s) may be required. Total credit limited to 8 units. 1 lecture, 1 laboratory, 2 activities.

DANC 341. Dance Concert Practicum. 2 units

Term Typically Offered: SP

Prerequisite: consent of instructor.

Advanced practical application of choreography and dance concert production. Production of the student-produced Spring Dance Concert will be developed and executed. Investigation of complete choreographic work via peer and faculty review. Total credit limited to 8 units. 2 laboratories.

DANC 345. Choreography/Workshop in Dance Concert Preparation. 4 units

Term Typically Offered: F

Prerequisite: By audition only.

Workshop in concert preparation for major public dance production. Exploration and process of concert dance choreography. Purchase of concert ticket(s) may be required. Total credit limited to 16 units. 4 laboratories.

DANC 346. Dance Production. 1-4 units

Term Typically Offered: W

Prerequisite: One of the following: DANC 332, DANC 331, or DANC 345.

Directed production of annual Orchesis Dance Company Concert and other public performances. Attendance of professional dance concert(s) required. Purchase of concert ticket(s) may be required. Total credit limited to 16 units. 1-4 laboratories.

DANC 381. Dance Teaching Methods for Dance Minors. 4 units

Term Typically Offered: SP

Prerequisite: Consent of Instructor.

Dance skills and techniques. Experience in selected dance forms. Rhythmic structure and analysis of dance steps. Includes introduction to dance pedagogy, curricular materials and evaluative procedures. Purchase of concert ticket(s) may be required. 2 lectures, 2 activities.

DANC 400. Special Problems. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor and department head.

Individual investigation, research and studies or survey of selected problems in dance and related areas. Total credit limited to 8 units with a maximum of 4 units per quarter.

DANC 430. Advanced Selected Techniques. 2 units

Term Typically Offered: SP

Prerequisite: Consent of instructor.

Directed study of selected topics for advanced dance students. Focus on advanced level technique, style, concepts and choreography of classical and contemporary dance forms. The Class Schedule will list topic selected. Total credit limited to 8 units. 2 activities.

DANC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed study of selected topics for advanced dance students. The Class Schedule will list topics selected. Total credit limited to 8 units. 1 to 4 lectures.

DANC 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for dance students. The Class Schedule will list topics selected. Total credit limited to 8 units. 1 to 4 laboratories.

Data Science (DATA)

undefined

DATA Courses

DATA 301. Introduction to Data Science. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 202; and one of the following: IME 326, STAT 302, STAT 312, or STAT 313.

Introduction to the field of data science and the workflow of a data scientist. Types of data (tabular, textual, sparse, structured, temporal, geospatial), basic data management and manipulation, simple summaries, and visualization. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

DATA 401. Data Science Process and Ethics. 3 units

Term Typically Offered: F

Prerequisites: DATA 301; CSC 365; and CSC 466. Concurrent: DATA 402 and DATA 403.

Complete life cycle of a data science project. Requirements engineering and data acquisition. Management and integration of data of high volume, velocity, and variety. Deployment of data science products. Engagement with stakeholders. Ethical considerations, including privacy and fairness. 3 lectures.

DATA 402. Mathematical Foundations of Data Science. 3 units

Term Typically Offered: F

Prerequisites: CSC 466; DATA 301; and STAT 334. Concurrent: DATA 401 and DATA 403.

Mathematical foundations of machine learning and data science. Principle of maximum likelihood. Inferential and predictive modeling and their comparison. Optimization techniques. Linear regression and linear classifiers. Mathematical foundations of neural networks and neural network analysis. Dimensionality reduction and its use in supervised and unsupervised learning. 3 lectures.

DATA 403. Data Science Projects Laboratory. 1 unit

Term Typically Offered: F

Concurrent: DATA 401 and DATA 402.

Project-based lab component of DATA 401 and DATA 402. Projects involving comparison of predictive and interpretable regression models, implementing linear classifiers with gradient descent, implementing neural networks from scratch, and deep learning. 1 laboratory.

DATA 441. Bioinformatics Capstone I. 2 units

Term Typically Offered: W

Prerequisite: BIO 351 or CHEM 373; BIO 441 or CSC 448; DATA 301.

Working with clients to design bioinformatics solutions to biological questions. Software requirements, elicitation techniques, data gathering, project planning, and project team organization. Ethics and professionalism. 2 laboratories.

DATA 442. Bioinformatics Capstone II. 2 units

Term Typically Offered: SP

Prerequisite: DATA 441.

Continue projects initiated in DATA 441. Team-based design, implementation of bioinformatics solutions and management of development teams. Technical documentation, quality assurance, and systems testing. Design and conduct empirical studies. Data visualization. Oral and written presentation. 2 laboratories.

DATA 451. Data Science Capstone I. 2 units

Term Typically Offered: W

Prerequisite: DATA 401.

Working with clients to develop data-driven solutions for systems to be constructed in DATA 452. Specification and design requirements, elicitation techniques, research and data gathering methods; project planning, time and budget estimating; project team organization. Ethics and professionalism. 2 laboratories.

DATA 452. Data Science Capstone II. 2 units

Term Typically Offered: SP

Prerequisite: DATA 451.

Team-based design, implementation, deployment and delivery of a system or analytical methodology that involves working with and analyzing large quantities of data. Technical management of research and development teams. Technical documentation, quality assurance, integration and systems testing. Design and conduct of empirical studies. Visualization and presentation of results orally and in writing. 2 laboratories.

DATA 472. Data Science Seminar. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: DATA 301.

Discussions of technical, societal and ethical aspects of modern data science theory and practice, concentrating on topics not covered in other courses. 1 seminar. Total credit limited to 4 units. Credit/No credit grading only.

Early Start English (ESE)

undefined

ESE Courses

ESE 105. Early Start English. 1 unit

Term Typically Offered: SU

CR/NC

Review of fundamental written communication skills; guided discussion of and reflection on the ways in which students interact with and produce texts; practice employing rhetorical strategies to meet the purpose, context, and audience expectations of a writing task. For students required to fulfill the CSU Early Start Program. 1 unit for baccalaureate credit. Credit/No Credit grading only. 1 activity.

Early Start Math (ESM)

undefined

ESM Courses

ESM 90. Early Start Program: Mathematics Workshop. 1.5 units

Term Typically Offered: SU

CR/NC

Prerequisite: Appropriate Math Placement Level. Concurrent: ESM 105.

Review of basic algebra skills intended for students who need to meet the CSU Early Start Program (ESP) requirement. Not for baccalaureate credit. Credit/No Credit grading only.

ESM 105. Early Start Program: Mathematics. 1 unit

Term Typically Offered: SU

CR/NC

Prerequisite: Appropriate Math Placement Level. Concurrent: ESM 90.

Review of basic algebra skills and an introduction to functions intended for students who need to meet the CSU Early Start Program (ESP) requirement. 1 unit for baccalaureate credit. Credit/No Credit grading only. Course may be offered in hybrid format. 1 lecture.

Earth Science (ERSC)

undefined

ERSC Courses

ERSC 144. Introduction to Earth Science. 4 units

Term Typically Offered: F

Survey of fundamental processes of Earth science. Application of systems thinking to understand the dynamic interactions among geologic, hydrological, biological, and atmospheric components of the Earth system. Explore how geographic, soil, and human factors shape the Earth. Field trip required. 3 lectures, 1 laboratory.

ERSC 223. Rocks and Minerals. 4 units

Term Typically Offered: W

Prerequisite: SS 120; and CHEM 124 or CHEM 127.

Origin, composition, identification and weathering of rocks, minerals, and clays important in the development of soils. Parent materials as related to the nature and properties of soils. 3 lectures, 1 laboratory.

ERSC 250. Physical Geography. 4 units

Term Typically Offered: F, W

Sustainability Related

Addresses the origins and patterns of the earth's diverse assemblage of climates, landforms, biota and soils. A major focus on relationship between human cultures and these earthly environments. 4 lectures. Crosslisted as ERSC/GEOG 250.

ERSC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 lectures. Crosslisted as ERSC/SS 270.

ERSC 303. Soil Erosion and Water Conservation. 4 units

Term Typically Offered: F

Prerequisite: LA/NR 218 or GEOG 318; and SS 120.

Evaluation of soil and water conservation with application toward agriculture, rangeland, and urban land uses. Study of process, regulation, and best management practices for soil erosion, water quality, and stormwater. Development of stormwater pollution prevention or farm water quality plans to meet regulatory requirements. 3 lectures, 1 activity.

ERSC 325. Climate and Humanity. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: Junior standing.

Geographic perspective on the interrelationships between climate and human cultures. Effects of people on climate and the influence of climate and weather upon human activities and behavior. Focus on global human conditions which are responsible for the alteration of climate and in turn are vulnerable to climate change. 4 lectures. Crosslisted as ERSC/GEOG 325.

ERSC 333. Human Impact on the Earth. 4 units

Term Typically Offered: F, W

Sustainability Focused

Prerequisite: Junior standing.

Global assessment of the impact of humans on the earth's vegetation, animals, soil, water and atmosphere. Emphasis on problems stemming from the interactions of human attitudes, technologies, and population with natural resources. 4 lectures. Crosslisted as ERSC/GEOG 333.

ERSC 335. Soil, Water, and Civilization. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Explore past civilizations and how management of soil, water, and other natural resources allowed them to flourish, decline, or fail. Sustainability of natural resource use in modern/future societies. Issues include sustainability, agricultural practices, deforestation, water quality, and land management. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ERSC 339. Internship in Environmental Earth and Soil Sciences. 1-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of internship instructor.

Selected students will spend up to 12 weeks with an approved firm or agency engaged in work and study related to their major. A detailed written proposal and written interim and final reports required. One unit of credit may be allowed for each full week of internship. Credit/No Credit grading. Crosslisted as ERSC/SS 339.

ERSC 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 12 units. Crosslisted as ERSC/SS 400.

ERSC 414. Global and Regional Climatology. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: Junior standing.

The earth's pattern of climates and the physical processes that account for them. Focus on interrelationships between climate and the physical/biological and cultural environments. Special emphasis on modern climate changes and their consequences. 3 lectures, 1 laboratory. Crosslisted as ERSC/GEOG 414.

ERSC 415. Applied Meteorology and Climatology. 4 units

Term Typically Offered: W

Prerequisite: ERSC/GEOG 250.

Physical processes in the atmosphere that determine regional weather, climate and climate variability. Surface and satellite systems for weather observation, and weather/climate modeling. Dynamics of weather systems, including thunderstorms and hurricanes. Emphases on weather/climate affecting agriculture and other human activities. 3 lectures, 1 activity. Crosslisted as ERSC/GEOG 415.

ERSC 416. Field-Geology Methods. 4 units

Term Typically Offered: W

Prerequisite: GEOL 102 or GEOL 201; and GEOL 415.

Collecting and interpreting field-geologic data. Description of sedimentary rocks and construction of stratigraphic columns. Mapping geologic structures in the field. Surficial geologic stratigraphy and surficial geologic mapping. Understanding geologic processes through field study. Communicating results of field study. 1 lecture, 3 activities. Crosslisted as ERSC/GEOL 416. Formerly ERSC/GEOL 401.

ERSC 417. Geologic Mapping. 4 units

Term Typically Offered: SP

Prerequisite: ERSC/GEOL 401 or ERSC/GEOL 416.

Bedrock geologic mapping on topographic maps and aerial photos. Surficial geologic mapping on topographic maps and aerial photos. Correlating and defining surficial geologic map units on the basis of soil development. Understanding landscape evolution using soil development 4 activities. Crosslisted as ERSC/GEOL 417. Formerly ERSC/GEOL 402.

ERSC 423. Geomorphology. 4 units

Term Typically Offered: F

Prerequisite: GEOL 201.

Evaluation of processes shaping landscapes. Field-based production of surficial geologic maps. Field, aerial photograph, and topographic map analysis to assess processes shaping landscapes. Interpretation of landforms and landform relationships. Understanding how tectonics and climate influence landscapes. Fundamentals of soil geomorphology. Field trip required. 2 lectures, 1 laboratory, 1 activity.

ERSC 442. Applied Environmental Groundwater Hydrology. 4 units

Term Typically Offered: F

Prerequisite: ERSC 144 or GEOL 201; MATH 141 or MATH 161; and SS 120.

Applied field methods of vadose zone and groundwater flow modeling, resource evaluation, confined and unconfined aquifer characterization, well installation and groundwater monitoring. Introduction to groundwater modeling software including MODFLOW and AQTESOLV. 3 lectures, 1 laboratory. Formerly SS 442.

ERSC 443. Applied Environmental Contaminant Transport. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: CHEM 125 or CHEM 128; ERSC 144 or GEOL 201; MATH 141 or MATH 161; and SS 120.

Applied study of mechanisms of fate and transport of contaminants in soils and groundwater. Field methods and technologies of soil and groundwater sampling and site characterization. Representative conceptual and mathematical models, case studies, laboratory study of breakthrough behavior, and remediation technologies. Field trip required. 3 lectures, 1 laboratory.

ERSC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule list topic selected. Total credit limited to 12 units. 1 to 4 lectures. Crosslisted as ERSC/SS 470.

ERSC 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories. Crosslisted as ERSC/SS 471.

ERSC 476. Senior Project - Advanced Internship Experience in Environmental Science/Management. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and ERSC 363 or NR 306 or NR 326.

Independent internship experience conducted under faculty supervision focusing on a discipline area of environmental science/management. Completion of a project as a component of their internship. Satisfies the senior project requirement. Minimum 90 hours required. Crosslisted as ERSC/NR 476.

ERSC 477. Senior Project - Research Experience in Environmental Science. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and ERSC 363 or NR 306 or NR 326.

Guided research experience in a specific area of environmental science. Implementation of materials and methods. Collection, analysis and interpretation of data. Completion of formal written report. Satisfies senior project requirement. 1 lecture, 2 laboratories. Crosslisted as ERSC/NR 477.

ERSC 478. Senior Project - Current Topics in Environmental Science/Management. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and ERSC 363 or NR 306 or NR 326.

Critical evaluation and formal presentation of current issues in environmental science/management. Evaluation of current topics, analysis of supporting evidence, and synthesis and presentation of resulting perspectives on different approaches to current challenges in environmental science/management. Satisfies the senior project requirement. 3 lectures. Crosslisted as ERSC/NR 478.

ERSC 479. Senior Project - Independent Study. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; ERSC 363 or NR 306 or NR 326; and consent of instructor.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 90 hours total time. Crosslisted as ERSC/NR 479.

ERSC 570. Selected Topics in Earth Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

ERSC 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

Economics (ECON)

undefined

ECON Courses

ECON 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: TBD

Prerequisite: Sophomore standing and consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ECON 201. Survey of Economics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Basic principles of microeconomics and macroeconomics. Emphasis on applications to current local, national and global economic issues. Not open to student with credit in ECON 222. Course may be offered in classroom-based or hybrid format. 4 lectures. Crosslisted as ECON/HNRS 201. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

ECON 202. Using Big Data to Solve Economic and Social Problems. 4 units

Term Typically Offered: F, SP

Introduction to basic methods in empirical economic analysis, including regression, causal inference, and machine learning. Applications of the methods to equality of opportunity, education, racial disparities, innovation and entrepreneurship, health care, climate change, criminal justice, and tax policy. Course may be offered in classroom-based or hybrid format. 4 lectures.

ECON 221. Microeconomics. 4 units

Term Typically Offered: F, W, SP

Microeconomic principles. Marginal and equilibrium analysis of commodity and factor markets in determination of price and output. Normative issues of efficiency and equity. 4 lectures.

ECON 222. Macroeconomics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Introduction to macroeconomics including aggregate output, employment, inflation, and economic growth. Money and the monetary system. Macroeconomic policy including fiscal and monetary policy. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

ECON 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ECON 303. Economics of Poverty, Discrimination and Immigration. 4 units

Term Typically Offered: F,W,SPSU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and ECON 201 or ECON 222.

Economic analysis of the cause, extent and impact of poverty, discrimination and immigration and of the policies designed to address these socioeconomic issues. Emphasis on the experience of African-Americans, Latinos, and women in the United States. 4 lectures. Crosslisted as ECON/HNRS 303. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ECON 304. Comparative Economic Systems. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and ECON 201 or ECON 222.

Analysis of economic systems as a set of mechanisms and institutions for decision making, and the implementation of decisions regarding income distribution, the levels of consumption and production, and the level of economic welfare. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ECON 311. Intermediate Microeconomics I. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ECON 201 or ECON 221; and MATH 141 or MATH 221.

Consumer behavior and the theory of demand; production, cost, supply functions; perfect competition; monopoly and oligopoly; labor markets. 4 lectures.

ECON 312. Intermediate Microeconomics II. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ECON 311.

Game theory; risk, uncertainty and information; choice over time; asset markets; general equilibrium; welfare economics, externalities and public goods. 4 lectures.

ECON 313. Intermediate Macroeconomics. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ECON 201 or ECON 222. Corequisite: ECON 311.

Study of the macroeconomy, macroeconomic theories, and macroeconomic policies. Nature of growth. Business cycles. Money and inflation. Fiscal policy. Monetary policy. Financial crises. 4 lectures.

ECON 330. International Trade Theory. 4 units

Term Typically Offered: W

Prerequisite: Either ECON 221 and ECON 222, or ECON 201.

Theory of comparative advantage, gains from trade, and recent developments in trade theory; examination of tariffs, quotas, exchange controls, other trade barriers and underlying policy issues; review of U.S. commercial policy, GATT, the common market, regional and world economic organizations. 4 lectures. Not open to students with credit in ECON 404 or equivalent.

ECON 337. Money, Banking and Credit. 4 units

Term Typically Offered: F, W

Prerequisite: Either ECON 221 and ECON 222, or ECON 201.

Financial markets and institutions. Structure of the banking industry and impacts of technological change in banking. Structure and operations of the Federal Reserve. Impacts of monetary policy on the economy. 4 lectures.

ECON 339. Econometrics. 4 units

Term Typically Offered: F, W, SP

Prerequisite: either ECON 221 and ECON 222; or ECON 201; MATH 141 or MATH 221, and STAT 252 or STAT 302.

Application of statistical methods useful in economics. General linear regression model. Specific issues and problems related to economic models: multicollinearity, autocorrelation, heteroscedasticity, dummy variables, lagged variables, and simultaneous equation estimation. Application and evaluation of selected examples of empirical economic research. Microcomputer applications. 4 lectures.

ECON 345. Environmental and Natural Resource Economics. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 201; or ECON 221 and ECON 222.

Economics of environmental resource management. Conservation, sustainability, and dynamic efficiency in natural resources. Effects of property rights and economic incentives on environmental and economic systems. Design of local and global environmental policies to align market outcomes with social welfare goals. 4 lectures. Not open to students with credit in ECON 431, ECON 432 or equivalent.

ECON 395. Programming for Economics and Analytics. 4 units

Term Typically Offered: F, W

Prerequisite: Junior standing; STAT 252 or STAT 302.

Basic principles of algorithmic problem solving and computer programming for economics and business analytics applications. Functions, iteration, recursion, and data structures. Testing and debugging. Design of algorithms and algorithmic complexity. Stochastic programs. Graph optimization. Credit will only be granted in one of the following courses: CSC 108, CSC 202, ECON 395. 4 lectures.

ECON 400. Special Problems. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

ECON 403. Industrial Organization. 4 units

Term Typically Offered: W

Prerequisite: ECON 312.

Application of basic tools of economics to American Industry. Case studies of individual firms and industries. Performance of various business structures, such as monopoly and oligopoly. Effects of government regulation and antitrust policy. 4 lectures.

ECON 404. International Trade Theory. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 312.

Theory of comparative advantage, neoclassical model of trade, offer curves and terms of trade, edgeworth boxes, valuation of factor inputs, effects of migration and mobility of funds, emerging growth and trade distortions, welfare effects of trade, and recent developments in trade theory. 4 lectures.

ECON 405. International Monetary Economics. 4 units

Term Typically Offered: SP

Prerequisite: ECON 313.

Nature of international payments, U.S. balance of payments. Theory and practice of foreign exchange rate determination under the gold standard, paper standard, and IMF system; international money and capital markets; problems of international liquidity and monetary stability. 4 lectures.

ECON 406. Applied Forecasting. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 339.

Use of economic, financial, and other time series data to construct and evaluate forecasts. Forecasting methods including regression-based models, exponential smoothing, ARIMA and the GARCH family of models. 4 lectures.

ECON 408. Mathematical Economics. 4 units

Term Typically Offered: SP

Prerequisite: ECON 312.

Applications of quantitative techniques to topics in microeconomic and macroeconomic theory. Use of multivariate calculus and linear algebra in formulating static economic models. Applications of statistical inference, estimation and forecasting in economic models. 4 lectures.

ECON 409. Probability Models for Economic Decisions. 4 units

Term Typically Offered: F

Prerequisite: ECON 312.

Decision making in complex, realistic situations. Simulation of random variables in Excel. Risk aversion. Subjective assessment of probabilities and correlations. Decision trees. Optimal bidding in auctions. The winner's curse. Moral hazard and risk sharing. Repeated investment decisions under risk. 4 lectures.

ECON 410. Public Finance and Cost-Benefit Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 312 or graduate standing.

Principles of rational decision making with respect to government revenues and spending. Measurement of costs and benefits, and criterion selection. Taxation, user fees, deficit financing, public goods, neighborhood effects and zoning. Microcomputer applications. 4 lectures.

ECON 413. Labor Economics. 4 units

Term Typically Offered: F

Prerequisite: ECON 312.

Wage determination theory, basic economic factors that affect the labor movement, economic impact of union activities on employment, output, income, wages, prices, and national economic policy. 4 lectures.

ECON 417. Development of Economic Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 311.

Analysis of ideas related to the development of economic theory in the Western civilization from the Greeks through the classical, neoclassical, and Keynesian to the current post-Keynesian concepts. 4 lectures.

ECON 424. Monetary Economics. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 313.

The role of money in our economy. Focus on the links between monetary policy, interest rates, prices, housing markets, mortgage lending and overall economic activity. Public policy issues relating to real estate markets. 4 lectures.

ECON 431. Environmental Economics. 4 units

Term Typically Offered: F

Sustainability Focused

Prerequisite: ECON 312.

Economic dimensions of environmental abuse and protection. Use of simple economic models in developing and evaluating environmental policies. Overview of current environmental problems. Issues related to the sustainability of economic growth at the national and international levels. 4 lectures.

ECON 432. Economics of Energy and Resources. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: ECON 312 or graduate standing.

Economic theory and public policies as applied to problems of natural resources and energy. Dynamic resource and energy models developed with reference to public and private sector growth. Application of the principles of capital theory emphasized. Case studies. Computer software applications in the study of natural resources and energy under uncertainty. 4 lectures.

ECON 434. Urban Economics. 4 units

Term Typically Offered: W

Prerequisite: ECON 311. Recommended: ECON 312.

Application of basic tools of economic analysis to problems of urban regions. Causes and possible cures for inadequate growth rate, income levels, and the quality of life in urban regions. 4 lectures.

ECON 435. Economics of Land and Water. 4 units

Term Typically Offered: TBD

Prerequisite: ECON 312 or graduate standing.

Economic analysis of natural resource issues, policies and management with an emphasis on land and water use decisions in the western U.S. Urban demand for water; water supply and economic growth; economic impacts of surface water law and institutions; economics of land management. 4 lectures.

ECON 440. Advanced Econometrics. 4 units

Term Typically Offered: F, SP

Prerequisite: ECON 339.

Modern advanced econometric techniques with a special focus on those commonly used in academic and non-academic settings. Discrete dependent variable models, instrumental variables, causal inference, nonlinear estimation, panel data, seemingly unrelated regression, distributed lag models, cointegration, and error correction models. 4 lectures.

ECON 445. Experimental and Behavioral Economics. 4 units

Term Typically Offered: SP

Prerequisite: ECON 312 and ECON 395.

Design and implementation of economic experiments including computer programming and statistical methods for experimental analysis. Behavioral economic models as an alternative to neoclassical economics including prospect theory, time-inconsistent preferences, and social preferences. 4 lectures.

ECON 460. Research Methodology in Applied Economics. 4 units

Term Typically Offered: F, W

Prerequisite: ECON 313; ECON 339 and Senior standing.

Theory and practice of the development of economic analysis. Steps in the formulation and execution of an economics research project. 4 lectures.

ECON 461. Senior Project I. 2 units

Term Typically Offered: TBD

Prerequisite: ECON 313 and senior standing.

Selection and analysis of a problem under faculty supervision. Problems typical of those which graduates must solve in their fields of employment. Formal report is required. Minimum 120 hours total time.

ECON 462. Senior Project II. 2 units

Term Typically Offered: TBD

Prerequisite: ECON 313 and senior standing.

Selection and analysis of a problem under faculty supervision. Problems typical of those which graduates must solve in their fields of employment. Formal report is required. Minimum 120 hours total time.

ECON 464. Applied Senior Project. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing and two 400-level ECON courses other than ECON 460. Corequisite: ECON 460.

Analysis of selected economic topics and problems in directed individual or group-based projects, which require application of economic models, principles and theory to investigate important business, economic or social issues. Formal report required. 4 seminars.

ECON 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ECON 519. Econometrics and Data Analysis. 4 units

Term Typically Offered: F

Prerequisite: GSE 518. Corequisite: GSE 524.

Identification and estimation of linear and nonlinear regression models for analyzing business data. Topics include multiple linear regression; model selection; robust standard errors; instrumental variables; maximum likelihood estimation; logit/probit, ordered logit/probit, and other microeconomic models. 4 lectures.

Education (EDUC)

undefined

EDUC Courses

EDUC 125. First Year Seminar. 2 units

Term Typically Offered: TBD

CR/NC

Issues associated with the successful transition from high school or community college to Cal Poly. Links fostered between student needs and campus resources. Coverage of academic policies and procedures, university study skills, goal setting, career planning, wellness and other topics relevant to student success. Not open to students with credit in UNIV 100. Credit/No Credit grading only. 1 lecture, 1 activity. Crosslisted as EDUC/UNIV 125.

EDUC 207. Children's Learning and Development in Educational Settings. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Sophomore standing; PSY 201 or PSY 202 or admission to the university with the intent to enter the MSTEP Program.

Study of theories and research about the development and learning of children and young adolescents within diverse backgrounds, and application to teaching in public school settings. Observations/interactions with children in school settings. 3 lectures, 1 activity. Participation in public schools requires mandated fingerprint clearance. Crosslisted as CD/EDUC 207.

EDUC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

EDUC 300. Historical, Philosophical, and Social Foundations of Public Education. 3 units

Term Typically Offered: F, W, SP
Prerequisite: Junior standing.

Historical, philosophical, and social foundations of public education in relation to school curriculum, instruction and dispositions of effective teachers. Structured observation and participation in K-12 public schools with attention to instructional practices for diverse learners. 2 lectures, 1 activity. Participation in public schools requires mandated fingerprint clearance.

EDUC 400. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD
Prerequisite: Junior standing and consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

EDUC 402. Learning to Teach K-8 Health and Physical Education with Diverse Populations. 3 units

Term Typically Offered: W, SP
Prerequisite: Admission to the Multiple Subject Teacher Preparation Program.

Subject-specific instructional methodologies in Health and Physical Education (PE). Design and implementation of elementary school instruction to address state-adopted content standards for Health and Physical Education in the State of California. Course may be offered in classroom-based or online format. 2 lecture, 1 laboratory.

EDUC 403. Developing Teachers of Color. 4 units

Term Typically Offered: SP
Prerequisite: Junior standing. Recommended: Lower-division Ethnic Studies (ES) course in GE Area F.

Developing and supporting teachers of Color in elementary and secondary (K-12) education. Focus on the structural factors associated with underrepresentation of teachers of Color, culturally sustaining pedagogies, and resources to support teachers of Color. 4 seminars.

EDUC 405. Social, Historical and Cultural Influences on Latino/a Students in Education. 4 units

Term Typically Offered: SP
Prerequisite: SPAN 202 with a grade of B or better; or appropriate score on placement exam; or consent of instructor.

Social, cultural, historical, political, economic, and educational factors and systems in Latin America and the United States that have contributed to and shaped Latino/a individual and group identity. How factors affect individual acculturation in California and the United States and influence how Latino/as experience and participate with schooling in the United States. Course may be offered in classroom-based or online format. 3 seminars, 1 activity.

EDUC 410. Social, Historical and Ethical Perspectives on Teaching and Learning. 3 units

Term Typically Offered: SU
Prerequisite: Admission to the Single Subject Credential Program.

Inquiry into the social, historical, philosophical and psychological foundations of education with an emphasis on applying educational theory to practice. Prepares Single Subject Credential Program students for classroom teaching. Course may be offered in classroom-based or online format. 3 lectures.

EDUC 412. Access to Learning in a Pluralistic Society. 4 units

Term Typically Offered: F
Prerequisite: Admission to the Single Subject Credential Program.

The role of culture, status, identity, and human development in public school experiences of diverse learners. Organization and management of secondary school classrooms as related to adolescent development and issues of access to learning. 4 lectures.

EDUC 414. Curriculum and Inquiry in Public Schools. 4 units

Term Typically Offered: F
Prerequisite: Admission to the Single Subject Credential Program.

Principles, methods and practices of organizing curriculum, instruction, and assessment for secondary school subject areas, with an emphasis on backward design in curriculum development and assessment. Site visits to local schools to allow analysis of planning, instruction, and assessment in secondary school classrooms. 4 lectures.

EDUC 416. Literacy, Language, and Culture in Content Area Classrooms. 3 units

Term Typically Offered: W
Prerequisite: Admission to the Single Subject Credential Program.

Theories and application of literacy learning, assessment and second language acquisition in content classrooms. Observation of classrooms, tutoring English language learners, designing and teaching literacy lessons, planning and implementing assessments across content areas. Recognition of the role of culture in language acquisition. Course may be offered in classroom-based or online format. 3 lectures.

EDUC 417. Literacy, Language, and Culture in the Content Area Classroom Fieldwork. 1 unit

Term Typically Offered: TBD
CR/NC
Fieldwork in the secondary classroom related to literacy, language and culture for Agriculture Education candidates. Includes 1-3 hours of observation each week. Participation in public schools requires mandated fingerprint clearance. Credit/No Credit grading. 1 activity.

EDUC 418. Culturally Responsive Teaching in Diverse Classrooms. 3 units

Term Typically Offered: SU
Prerequisite: Admission to the Single Subject Credential Program.

Differentiated instruction and further theoretical knowledge and skills needed for successful teaching of linguistically and culturally diverse learners, as well as students with special learning needs. PACT assessments embedded in course prepare credential candidates for the teaching event. 3 lectures.

EDUC 419. Culturally Responsive Fieldwork in Diverse Classrooms. 1 unit

Term Typically Offered: F

CR/NC

Fieldwork in the secondary classroom related culturally responsive teaching in diverse classrooms for Agriculture Education candidates. Includes 1-3 hours of observation each week. Participation in public schools requires mandated fingerprint clearance. Credit/No Credit grading. 1 activity.

EDUC 423. Bilingual Literacy. 4 units

Term Typically Offered: W

Prerequisite: Admission to the Spanish Authorization for Bilingual Educators (SABE) Program.

Patterns of classroom organization, application of reading programs, approaches, methods in English and Spanish, and supervised field experiences in elementary classrooms with bilingual students. Course may be offered in classroom-based or online format. 3 seminars, 1 activity.

EDUC 427. Theories, Methods, and Assessment of First and Second Language Acquisition in Schools. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Senior standing. Recommended: ENGL 391.

Theories, methods, materials and assessment involved in the instruction of emergent bilingual students. Bilingual, transitional, and English only programs compared across a historical framework. Emphasis on an integrated language arts approach; theories of language acquisition. 3 seminars, 1 activity. Participation in public schools requires mandated fingerprint clearance.

EDUC 428. Foundations of K-8 Literacy Teaching and Learning in Schools with Diverse Populations. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior or Graduate standing.

Introduction of foundational topics in literacy teaching and learning in K-8 schools with diverse populations. Examination of concepts and theories underlying literacy learning and instruction, and relating research-based patterns of reading and writing development to features of the learner and learning environments. Participation in public schools requires mandated fingerprint clearance. 3 seminars, 1 activity.

EDUC 429. Learning to Teach K-8 Literacy in Schools with Diverse Populations. 4 units

Term Typically Offered: F, W

Prerequisite: Admission to the Multiple Subject Teacher Preparation Program.

Integration of theory and practice for planning, instruction and assessment in a balanced, comprehensive, research-based K-8 literacy and language arts program to enable children of all abilities and background to read, write, speak, listen and think effectively. 4 seminars.

EDUC 431. Learning to Teach K-8 Social Studies with Diverse Populations. 4 units

Term Typically Offered: W, SP

Prerequisite: Admission to the Multiple Subject Teacher Preparation Program.

Curriculum instruction and assessment concepts regarding teaching social studies to culturally diverse students in grades K-8, to promote civic competence and the development of elementary students' knowledge and reasoning in the social sciences. 4 seminars.

EDUC 433. Foundations of Bilingual Education. 4 units

Term Typically Offered: F

Prerequisite: Admission to the Spanish Authorization for Bilingual Educators (SABE) Program.

History, theories, and practices associated with contemporary bilingual education in California and the U.S. Observation and limited teaching in bilingual classrooms. Approximately one-half of the class taught in Spanish. Course may be offered in classroom-based or online format. 3 seminars, 1 activity.

EDUC 435. Learning to Teach K-8 Mathematics with Diverse Populations. 4 units

Term Typically Offered: F, W

Prerequisite: Admission to the Multiple Subject Teacher Preparation Program.

Curriculum, instruction, and assessment concepts regarding teaching mathematics for understanding to culturally diverse students in grades K-8, with emphasis on using manipulatives to promote elementary students' development of mathematical knowledge and reasoning. 4 seminars.

EDUC 436. Learning to Teach K-8 Science with Diverse Populations. 4 units

Term Typically Offered: F, W

Prerequisite: Admission to the Multiple Subject Teacher Preparation Program.

Curriculum, instruction, and assessment concepts regarding teaching science for understanding to culturally diverse students in grades K-8, with emphasis on teaching via inquiry to promote the development of scientific knowledge and reasoning. 3 seminars, 1 activity.

EDUC 438. Multiple Subject Clinical Practice I. 2-4 units

Term Typically Offered: F, W

CR/NC

Prerequisite: Admission to the Multiple Subject Teacher Preparation (MSTEP) Program.

Clinical experiences involving observation; limited lesson planning, instruction, assessment and reflection; growth as a professional educator and participation in school-related activities in K-8 public school classrooms. Participation in public schools requires mandated fingerprint clearance. Total credit limited to 4 units. Credit/No Credit grading only.

EDUC 439. Multiple Subject Clinical Practice Seminar I. 3 units

Term Typically Offered: F, W

CR/NC

Prerequisite: Admission to the Multiple Subject Teacher Preparation (MSTEP) Program.

Discussion of contemporary educational issues and classroom practice; reflection on beginning clinical experiences in elementary education and their connection with educational theory and research. Credit/No Credit grading only. 3 seminars.

EDUC 440. Educating Individuals with Exceptional Needs. 4 units

Term Typically Offered: F, W, SP

Prerequisite: EDUC 429, EDUC 431, EDUC 435, EDUC 436, EDUC 438 and EDUC 439.

Characteristics, incidence, and etiology of individuals with exceptional needs. Problems, assessment, and approaches toward accommodating students with exceptional needs in the regular classroom. 3 seminars, 1 activity.

EDUC 442. Elementary Field Experience in General and/or Special Education. 1-4 units

Term Typically Offered: F

CR/NC

Prerequisite: Acceptance into the Preliminary Special Education Credential Program or the Multiple Subject Teacher Preparation (MSTEP) Program.

Public school classroom experiences in general education and/or special education classrooms at the elementary level. Teaching individuals and small groups. Total credit limited to 4 units. Credit/No Credit grading only.

EDUC 447. Secondary Field Experience in General and/or Special Education. 1-4 units

Term Typically Offered: W

CR/NC

Prerequisite: Acceptance into the Preliminary Special Education Credential Program or the Single Subject Credential Program.

Public school classroom experiences in general education classrooms and/or special education classrooms at the secondary level. Teaching individuals and small groups. Total credit limited to 4 units. Credit/No Credit grading only.

EDUC 449. Special Education Student Teaching. 8 units

Term Typically Offered: SP

CR/NC

Prerequisite: Acceptance into Level I Special Education Credential Program, and completion of all program requirements. Concurrent: EDUC 451.

Participation in public schools as a student teacher in activities representing different roles of special education teachers. Assumption of a teacher's responsibility for individual and small groups. Minimum 4 days per week. Credit/No Credit grading only.

EDUC 450. Teaching Performance Assessment Seminar. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Tasks, timelines, evaluation rubrics, and academic writing in relation to the Teaching Performance Assessments that are required for teacher credentialing in California. Total credit limited to 2 units. Credit/No Credit grading. 1 seminar.

EDUC 451. Special Education Student Teaching Seminar. 4 units

Term Typically Offered: SU

CR/NC

Prerequisite: Acceptance into Level I Special Education Credential Program; completion of program requirements for the Level I Special Education Program. Concurrent: EDUC 449.

Educational issues and research, development and assessment of teaching portfolio, completion of materials for a job search, and beginning the first year as a special educator. 3 seminars, 1 activity.

EDUC 454. Multiple Subject Clinical Practice II. 6 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Admission to the Multiple Subject Teacher Preparation (MSTEP) Program.

Clinical experiences involving planning, instruction, assessment and reflection; growth as a professional and related activities in K-8 public school classrooms. Participation in public schools requires mandated fingerprint clearance. Credit/No Credit grading only.

EDUC 455. Multiple Subject Clinical Practice Seminar II. 3 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Acceptance into STEP II or STEP B of the Multiple Subject Teacher Preparation Program. Concurrent: EDUC 454.

Discussion of contemporary educational issues, state education policies and expectations for effective classroom practice; reflection on clinical experiences in elementary education and their connection with educational theory research. Participation in public schools requires mandated fingerprint clearance. Credit/No Credit grading. 3 seminars.

EDUC 456. Multiple Subject Clinical Practice III. 12 units

Term Typically Offered: F, SP

CR/NC

Prerequisite: EDUC 454 and EDUC 455. Concurrent: EDUC 457.

Advanced clinical experiences involving planning, instruction, assessment and reflection; growth as a professional and related activities in K-8 public school classrooms. Credit/No Credit grading only.

EDUC 457. Multiple Subject Clinical Practice Seminar III. 3 units

Term Typically Offered: F, SP

CR/NC

Prerequisite: EDUC 454 and EDUC 455. Concurrent: EDUC 456.

Discussion of contemporary educational issues, national education policies and expectations for effective classroom practice; reflection on advanced clinical experiences in elementary education and their connection with educational theory and research. Credit/No Credit grading. Course may be offered in classroom-based or online format. 3 seminars.

EDUC 460. Clinical Practice I. 4 units

Term Typically Offered: F

CR/NC

Prerequisite: Admission to the Single Subject Credential Program.

Clinical experiences involving observation; limited planning, instruction, assessment and reflection; growth as a professional, and participation in other school-related activities in secondary public classrooms. Credit/No Credit grading only.

EDUC 469. Clinical Practice II. 8 units

Term Typically Offered: W
CR/NC

Prerequisite: Completion of courses and requirements to begin student teaching and approval of campus screening committee for credential candidates.

Part-time assignment in a classroom (Single Subject only). Includes teaching activities under the direction of a selected cooperating teacher in consultation with a university supervisor. Assignment consists of an entire morning in the classroom (or the equivalent) for one quarter. Credit/No Credit grading only.

EDUC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

EDUC 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

EDUC 479. Clinical Practice III. 12 units

Term Typically Offered: SP
CR/NC

Prerequisite: Completion of all courses and requirements prerequisite to full-time student teaching and approval by campus screening committee for credential candidates.

Full-time assignment in a classroom (Single Subject only). Includes teaching activities under the direction of a selected cooperating teacher in consultation with a university supervisor. Assignment consists of an entire teaching day in the school for one quarter. Credit/No Credit grading only.

EDUC 500. Individual Study. 1-4 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of department head, graduate major advisor, and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Total credit limited to 8 units.

EDUC 502. Advancing Pedagogical Practices with Technology. 4 units

Term Typically Offered: SU
Prerequisite: Graduate standing.

Examination of technology-supported instruction with special focus on the use of technology to enable constructivist learning experiences for K-12 students. A survey of advanced technologies including Web-based tools, apps, digital story telling, and media production. Course offered online only. 3 seminars, 1 activity.

EDUC 510. Education Finance and Resource Allocation. 4 units

Term Typically Offered: SP
Prerequisite: Graduate standing and consent of instructor.

Financing public schools in America: historical and current sources and types of funding. District level and site level funding and budgeting including priorities and purchasing procedures. Financial implications of personnel contracts and obligations. 3 seminars, 1 activity.

EDUC 511. Educational Law and Governance. 4 units

Term Typically Offered: SP
Prerequisite: Graduate standing and consent of instructor.

Legal aspects of school administration including unions, collective bargaining, and contract administration. Governing roles of federal, state, and local agencies including boards and district administrators. 3 seminars, 1 activity.

EDUC 512. Education Organization and Management. 4 units

Term Typically Offered: F
Sustainability Related
Prerequisite: Graduate standing and consent of instructor.

Principles of organization, management, sustainability, and regenerative practices, leadership and their relationship to educational effectiveness and productivity. Activity experience in the application of management theory in schools. This course meets the requirements of the Cal Poly Sustainability Learning Objectives (SLO). 3 seminars, 1 activity.

EDUC 513. Education Planning and Decision Making. 4 units

Term Typically Offered: F
Prerequisite: Graduate standing and consent of instructor.

Concepts of planning and decision making in educational administration that utilize a wide range of data gathering and analysis procedures. 3 seminars, 1 activity.

EDUC 515. Educational Program Management and Evaluation. 4 units

Term Typically Offered: W
Prerequisite: Graduate standing and consent of instructor.

Supervision, management, and evaluation of educational curriculum and educational programs. Current trends in program management including mapping, monitoring, alignment. 3 seminars, 1 activity.

EDUC 516. Educational Personnel Supervision and Evaluation. 4 units

Term Typically Offered: W
Prerequisite: Graduate standing and consent of instructor.

Principles and processes for the supervision and evaluation of certificated and classified staff including legal, research, and professional considerations. 3 seminars, 1 activity.

EDUC 517. Managing Action Research Communities. 2 units

Term Typically Offered: SP
Prerequisite: Admission to School of Education's Educational Leadership and Administration Master's program.

Examination of issues that affect educational leaders implementing and managing large-scale collaborative action research projects. Application of interventions based on action research findings. 2 seminars.

EDUC 518. Administrative Services Fieldwork. 3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Admittance to the Administrative Services Credential program and consent of instructor.

Supervised fieldwork in school administration for supervision at the elementary and secondary level. Assignments must encompass three of the four academic quarters and must involve some multicultural experience. Total credit limited to 18 units, only 9 of which may be applied toward master's degree. Credit/No Credit grading only.

EDUC 519. Professional e-Portfolios for Educational Leaders. 1 unit

Term Typically Offered: SP

CR/NC

Prerequisite: Enrollment in the Educational Leadership and Administration Program (ELAP).

Demonstration of exemplars of professional practice keyed to standards for the California Preliminary Administrative Services Credential. Class meets two (2) times per quarter. Faculty meet individually with students as to address portfolio development on a case-by-case basis. Credit/No Credit grading only. 1 activity.

EDUC 521. Literacy Across the Curriculum. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Supporting students' literacy development across school subjects -- English language arts, mathematics, science, social studies -- through an integrated instructional approach focusing on critical literacy as meaning-making, accommodating diverse students including English language learners and students with special needs. 4 seminars.

EDUC 522. Advanced Classroom Pedagogy. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing.

Principles of authentic pedagogy and development of a classroom learning community. Examination of the role of classroom culture and advanced instructional strategies to foster conceptual development and disciplinary ways of knowing in diverse classrooms. Course may be offered in classroom-based or online format. 4 seminars.

EDUC 523. Integrative Approaches to Curriculum. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing.

Perspectives, principles and practices for designing curriculum to foster authentic instruction using integrative approaches. Emphasis on designing for the development of multiple literacies. Course may be offered in classroom-based or online format. 4 seminars.

EDUC 528. Advanced Classroom Pedagogy in English Language Arts. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

The relationship between theory, research and practice in English Language Arts. Emphasis is on reading processes and principles and advanced teaching practices for the English Language Arts with attention to working with diverse students including English language learners and students with special needs. 4 seminars.

EDUC 531. Social Justice in Education: In & Out of the Classroom. 4 units

Term Typically Offered: SP

Prerequisite: Admission to a School of Education Master's program.

Examines social justice education approaches inside and outside the classroom. Prepares graduate students to develop an action-oriented project that includes strategies for advocating for marginalized students. Course may be offered in classroom-based or online format. 4 seminars.

EDUC 532. Advanced Field Experiences in Education. 2-6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Admission to a School of Education Master's program.

Advanced field experience and practical application of master's degree emphasis for general and special education teachers, school administrators and school support personnel. Total credit limited to 12 units for specialist credentials. Total credit limited to 6 units for the master's degree. Credit/No Credit grading only.

EDUC 535. Advanced Classroom Pedagogy in Mathematics Education. 4 units

Term Typically Offered: W

Prerequisite: Admission to a School of Education Master's program.

Standards-based principles and advanced pedagogical practices for mathematics instruction in diverse classroom settings. 4 seminars.

EDUC 542. Administration of Special Programs and Services. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing and consent of instructor.

Principles and practices of organizing and administering special education, reading, counseling, and other support programs. Assessment and placement procedures, middle management's role, overview of specially funded programs, historical precedents and future trends. 3 seminars, 1 activity.

EDUC 544. Advanced Collaboration and Consultation for Teachers of Students with Special Needs. 5 units

Term Typically Offered: TBD

Prerequisite: Admission into the Level I Special Education Credential Program and master's degree program in education.

Advanced studies and skills in educational consultation. Emphasis on the collaborative and consultative role of the special educator with a wide range of individuals from diverse cultural backgrounds including school personnel, parents, outside agencies, and paraprofessionals. 3 seminars, 2 activities.

EDUC 546. Reading and Language Arts Instruction in Special Education. 5 units

Term Typically Offered: F

Prerequisite: Admission into the Level I Special Education Credential Program and master's degree program in education.

Overview of principles of reading instruction, elements of the language arts program including literature-based reading, content area reading, and the role of phonics, emergent literacy, and diagnosis of reading problems for special education teachers. 3 seminars, 2 activities.

EDUC 550. Assessment Strategies for Special Education. 5 units

Term Typically Offered: W

Prerequisite: Admission to MS in Special Education.

Using norm referenced, criterion referenced, and curriculum based testing for assessing academic, behavioral, and physical status of individuals with exceptional needs, including English language learners, for referral purposes. Instructional and evaluation decisions regarding exceptional students in school settings. 3 seminars, 2 activities.

EDUC 552. Support and Transition Strategies in Special Education. 5 units

Term Typically Offered: SP

Prerequisite: Admission to MS in Special Education.

Basic guidance techniques for teachers working with exceptional individuals and their families. Career selection, preparation, and counseling. Transition from school to work, and community resource utilization. 3 seminars, 2 activities.

EDUC 554. Behavior Disorders and Positive Behavior Support Strategies. 5 units

Term Typically Offered: SP

Prerequisite: Admission to MS in Special Education.

Assessment of students whose behavior impedes either their own learning or the learning of other students. Strategies for facilitating proactive educational, environmental and social-emotional techniques for supporting students with challenging behavior. 3 seminars, 2 activities.

EDUC 555. Introduction to the Counseling Profession. 4 units

Term Typically Offered: F

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Overview of the counseling profession, history, philosophy, theory and ethics. Required activity. 3 seminars, 1 activity.

EDUC 556. Multicultural Counseling. 4 units

Term Typically Offered: W

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Initiation of critical analysis of personal beliefs and attitudes regarding counseling in a diverse society. Focus on a variety of approaches to explore the beliefs and attitudes of the student in counseling settings, and examination of strategies considered effective in working with diverse populations. 3 seminars, 1 activity.

EDUC 557. Career Counseling. 4 units

Term Typically Offered: SP

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Focus on the study and application of career development theories in career counseling. Utilizing appraisal instruments, community referral resources, occupational information, computerized retrieval systems, and personal and social data and required activities. 3 seminars, 1 activity.

EDUC 560. Counseling Theories. 4 units

Term Typically Offered: W

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Theories and practice of counseling with special emphasis on the counseling process. Emphasis of conditions of counseling, counseling techniques, counseling diverse populations and the counselor as a professional helper. 3 seminars, 1 activity.

EDUC 561. Group Counseling. 4 units

Term Typically Offered: F

Prerequisite: EDUC 555, EDUC 560 or consent of instructor.

Theory and practice of group counseling, client selection, group structure, process and termination, and application of theories to specific developmental groups. Communication and facilitation skills emphasized with relevant ethics and law. 3 seminars, 1 activity.

EDUC 562. Student Development - Higher Education. 4 units

Term Typically Offered: F

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Exploration of the roles and competencies of the student development specialist in higher education. Review of relevant developmental theory with emphasis on practical implementation. Explore current issues and trends in higher education, and organizational framework. 4 seminars.

EDUC 564. Legal and Ethical Issues in Counseling. 4 units

Term Typically Offered: W

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Consideration of legal, ethical, cultural and related professional issues as they affect the practice of counseling. 3 seminars, 1 activity.

EDUC 565. Counseling Measurement and Assessment. 4 units

Term Typically Offered: SP

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Assessment in the form of tests, scales, measures, and other instruments with college and community college students, young adults, and postsecondary program evaluation. An understanding of culturally appropriate tests and measures, collaboration with stakeholders in the review and interpretation of assessments, test scores, and measures. 3 seminars, 1 activity.

EDUC 566. Leadership and Consultation in Counseling. 4 units

Term Typically Offered: SP

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Development of skills in planning, organizing, coordinating, and delivering programs that generate systemic change through establishing collaboration among stakeholders. Emphasis on social action and its role in the counseling profession. 3 seminars, 1 activity.

EDUC 568. Individual Counseling Techniques. 4 units

Term Typically Offered: SP

Prerequisite: Admission to MS in Higher Education, Counseling and Student Affairs.

Theory and practice of individual counseling, process and termination, and application of theories to specific developmental issues working with college and community college students and young adults. Communication and facilitation skills emphasized, working with diverse populations and following legal and ethical guidelines. 3 seminars, 1 activity.

EDUC 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

EDUC 573. Field Experience in Higher Education Counseling and Student Affairs. 1-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Admission to the MS Degree in Higher Education Counseling and Student Affairs.

Practical application of higher education counseling and student affairs coursework in colleges and community settings. Seminars with university staff included. Total credit limited to 24 units. Credit/No Credit grading only. Maximum of 12 units may be applied toward MS in Higher Education, Counseling and Student Affairs.

EDUC 586. Introduction to Inquiry in Education. 4 units

Term Typically Offered: F

Prerequisite: Admission to a School of Education Master's program.

Explanation of social construction of knowledge, and the philosophical basis of quantitative and qualitative research. Introduction to professional literature search techniques and to professional organizations as a basis for educational inquiry. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based or online format. 3 seminars, 1 activity.

EDUC 587. Educational Foundations and Current Issues. 4 units

Term Typically Offered: F, SU

Prerequisite: Admission to a School of Education Master's Program.

Historical, organizational, legal and philosophical characteristics of education in the United States. Emphasis on the analysis of contemporary issues focusing on these characteristics. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based or online format. 4 seminars.

EDUC 588. Education, Culture, and Learning. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Admission to School of Education Master's Program.

Cultural characteristics of educational institutions and practice. Review of theory and research relating to the social and organizational context in which learning and teaching takes place. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based or online format. 4 seminars.

EDUC 589. Educational Research Methods. 4 units

Term Typically Offered: W, SP

Prerequisite: Admission to a School of Education Master's Program.

Educational research methodologies, application of inferential and descriptive statistics, critical analysis of research designs and data collection techniques. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based or online format. 3 seminars, 1 activity.

EDUC 590. Research Application in Education. 4 units

Term Typically Offered: W, SU

Prerequisite: EDUC 589.

Application of social science research techniques to problems in education and human services. Capstone experience for the School of Education master's inquiry course sequence. Completion of an inquiry project required. 2 seminars, 2 activities.

EDUC 598. Action Research Project in Education. 1-3 units

Term Typically Offered: SU

CR/NC

Prerequisite: EDUC 589.

Completion and presentation of the results of an action research project that addresses a meaningful question in the practice of education. Total credit limited to 6 units. Credit/No Credit grading only.

Electrical Engineering (EE)

undefined

EE Courses

EE 111. Introduction to Electrical Engineering. 1 unit

Term Typically Offered: F

Concurrent: EE 151.

A general overview of the field of electrical engineering. Preparation for successful completion of the Electrical Engineering (EE) program at Cal Poly. 1 lecture. Not required for students with transfer credit for EE 211 or EE 241.

EE 112. Electric Circuit Analysis I. 2 units

Term Typically Offered: TBD

Prerequisite: MATH 142 or equivalent. Recommended: EE 111/151.

Introduction to basic circuit analysis. Resistive circuits, voltage and current sources, network theorems. Course may be offered in classroom-based or online format. 2 lectures.

EE 113. Electric Circuit Analysis I. 3 units

Term Typically Offered: F, SP

Prerequisite: MATH 142. Concurrent: EE 143. Recommended: EE 111, EE 151; PHYS 133.

Basic circuit analysis and basic electronics manufacturing. Resistive circuits, voltage and current sources, op-amps, network theorems. Practical electronics manufacturing expanded through concepts such as CAD/CAM design, Design for Manufacture (DFM), documentation requirements, deposition and etching processes, prototyping, and production planning. PCB design and assembly. 3 lectures.

EE 115. Electrical and Electronic Circuits I. 3 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 141. Corequisite: CHEM 124 and PHYS 143.

Concurrent: EE 145.

DC analysis of two-terminal electrical devices and electrical circuits, including resistors, diodes, switches, relays, photo-cells, batteries and more. KCL, KVL. Multi-component networks and their two-terminal equivalents. Two-port devices for actuation and waveform manipulation. 3 lectures.

EE 133. Digital Design. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: An orientation course in student's major (EE 111 and EE 151; or CPE 100) and CPE/CSC 101.

Number systems, Boolean algebra, Boolean functions, and function minimization. Analysis and design of combinational and sequential digital logic circuits. Hardware Description Language (HDL) concepts and applications digital design and synthesis in FPGAs. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 133.

EE 143. Electronics Manufacturing and Circuit Analysis Laboratory. 1 unit

Term Typically Offered: F, SP

Prerequisite: MATH 142. Concurrent: EE 113. Recommended: EE 111, EE 151; PHYS 133.

Use of electrical and electronic test equipment. Introduction to engineering design flow (design, simulate, build, test). PCB design and manufacturing. 1 laboratory.

EE 145. Electrical and Electronic Circuits I Laboratory. 1 unit

Term Typically Offered: F, W, SP

Concurrent: EE 115.

Lab experiments for two-terminal electrical devices and electrical DC circuits, including resistors, diodes, switches, relays, photo-cells, batteries and more. KCL, KVL. Multi-component networks and their two-terminal equivalents. Two-port devices for actuation and waveform manipulation. 1 laboratory.

EE 151. Introduction to Electrical Engineering Laboratory. 1 unit

Term Typically Offered: F

Concurrent: EE 111.

A variety of hands-on experiments and demonstrations in electrical engineering, providing background and motivation for successful completion of the Electrical Engineering (EE) program at Cal Poly. Not open to students with credit for EE 241. 1 laboratory.

EE 200. Special Problems. 1-2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of department chair.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

EE 201. Electric Circuit Theory. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: MATH 244, PHYS 133.

Application of fundamental circuit laws and theorems to the analysis of DC, and steady-state single-phase and three-phase circuits. Not for electrical engineering majors. Course may be offered in classroom-based or online format. 3 lectures.

EE 211. Electric Circuit Analysis II. 3 units

Term Typically Offered: F, W, SP

Prerequisite: EE 112 or EE 113. Prerequisite or Concurrent: PHYS 133, MATH 244. Concurrent: EE 241.

Continuation of basic circuit analysis. Op-amp circuits. Energy storage elements, RC and RL circuits, and AC steady state analysis. 3 lectures.

EE 212. Electric Circuit Analysis III. 3 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 244, EE 211. Concurrent: EE 242.

AC power, 3-phase circuits. Mutual inductance, series and parallel resonance and two-port networks. Frequency response, including Bode plots. 3 lectures.

EE 215. Electrical and Electronic Circuits II. 3 units

Term Typically Offered: F, W, SP

Prerequisite: EE 115. Concurrent: EE 245.

Time and frequency domain analysis of linear circuits. Laplace transforms, s-Domain circuit analysis. Network functions, frequency response, Fourier series. Active filter design. 3 lectures.

EE 228. Continuous-Time Signals and Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BMED 355; or EE 212 and EE 242. Recommended: MATH 241.

Continuous-time systems analysis, with emphasis on linear time-invariant (LTI) systems. Classifications of continuous-time systems. Convolution and its application to LTI systems. The Laplace transform, Fourier transform, and Fourier series, and their application to the analysis of LTI systems. 4 lectures.

EE 233. Computer Design and Assembly Language Programming. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/EE 133.

Design and implementation of digital computer circuits via CAD tools for programmable logic devices (PLDs). Basic computer design with its datapath components and control unit. Introduction to assembly language programming of an off-the-shelf RISC-based microcontroller. Not open to students with credit in CPE/EE 229. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 233.

EE 241. Electric Circuit Analysis Laboratory II. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: EE 112 or EE 113; EE 151 for EE students. Prerequisite or concurrent: MATH 244; PHYS 133. Concurrent: EE 211.

Use of electrical and electronic test equipment. Experimental verification of circuit analysis concepts including Kirchhoff's Laws, Thevenin's Theorem, maximum power transfer and superposition. 1 laboratory.

EE 242. Electric Circuit Analysis Laboratory III. 1 unit

Term Typically Offered: F, W, SP
 Prerequisite: MATH 244, EE 241 or consent of department chair.
 Concurrent: EE 212.

Observation of transient and steady-state phenomena, phase-shift circuits, resonance. Use of phasor diagrams. 1 laboratory.

EE 245. Electrical and Electronic Circuits II Laboratory. 1 unit

Term Typically Offered: F, W, SP
 Concurrent: EE 215.

Lab projects dealing with dynamic circuits in the frequency-domain and the time domain. Frequency domain analysis of two-port circuits. Laplace transforms, s-Domain circuit analysis. Network functions, frequency response, Fourier series. Passive and active filter design. 1 laboratory.

EE 251. Electric Circuits Laboratory. 1 unit

Term Typically Offered: F,W,SP, SU
 Concurrent: EE 201.

Techniques of measurement of DC and steady-state AC circuit parameters. Equivalent circuits, nonlinear elements, resonance. 1 laboratory.

EE 255. Energy Conversion Electromagnetics. 3 units

Term Typically Offered: F,W,SP, SU
 Prerequisite: EE 212 and EE 242; or EE 201 and EE 251; or EE 215 and EE 245. Concurrent: EE 295.

Fundamentals of electromechanical energy conversion. Magnetic circuits and electromagnetic devices. Theory of operation and operating characteristics of transformers, and AC induction and synchronous machines. 3 lectures.

EE 261. Intro C Programming with a Hardware Emphasis. 1 unit

Term Typically Offered: F, W, SP
 Prerequisite: CPE/CSC 101. Recommended: EE 151.

Introduction to the C Programming Language with an emphasis on microprocessor implementation and applications. Not open to students with credit in CPE/CSC 357 or CPE/EE 329. 1 laboratory.

EE 262. Intro C++ Programming with a Hardware Emphasis. 1 unit

Term Typically Offered: W, SP
 Prerequisite: CPE/CSC 101. Recommended: EE 151.

Introduction to the C++ Objected Oriented Programming Language with an emphasis on Microprocessor Implementation and applications. 1 laboratory.

EE 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

EE 271. Selected Laboratory. 1-2 units

Term Typically Offered: SP
 Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 to 2 laboratories.

EE 295. Energy Conversion Electromagnetics Laboratory. 1 unit

Term Typically Offered: F,W,SP, SU
 Prerequisite: EE 212 and EE 242; or EE 201 and EE 251; or EE 215 and EE 245. Concurrent: EE 255.

Single-phase and three-phase transformers. Starting of rotating machines, evaluation of characteristics of rotating machines. 1 laboratory.

EE 302. Classical Control Systems. 3 units

Term Typically Offered: W, SP
 Prerequisite: EE 215 or EE 228. Concurrent: EE 342. Recommended: EE 368; or CPE 327 and CPE 367.

Introduction to feedback control systems. System modeling. Transfer functions. Graphical system representation. System time response, stability. Root Locus. Frequency response. Compensation. 3 lectures.

EE 306. Semiconductor Device Electronics. 3 units

Term Typically Offered: F, W
 Prerequisite: CHEM 124, EE 212 & EE 242, EE 143 or IME 156 or IME 458, PHYS 211. Concurrent: EE 346.

Internal operation, semiconductor physics, terminal characteristics, models and application of diodes (LEDs, solar cells, and photo-diodes) and transistors (field-effect and bipolar). 3 lectures.

EE 307. Digital Electronics and Integrated Circuits. 3 units

Term Typically Offered: W, SP
 Prerequisite: CPE/EE 133, EE 306 and EE 346. Corequisite: CPE/EE 233. Concurrent: EE 347.

Analysis, design, application and interfacing of integrated logic circuits, including NMOS, CMOS, TTL, ECL, and other logic families. 3 lectures.

EE 308. Analog Electronics and Integrated Circuits. 3 units

Term Typically Offered: F, SP
 Prerequisite: EE 302 & EE 342, EE 307 & EE 347. Concurrent: EE 348.

Analysis and design of integrated circuits for use in analog applications. Gain, frequency response, and feedback of linear small-signal amplifiers. 3 lectures.

EE 314. Introduction to Communication Systems. 3 units

Term Typically Offered: W, SP
 Prerequisite: EE 228 or CPE/EE 327. Corequisites: STAT 350; and EE 306 or EE 315.

Analog modulation, including: double-sideband modulation, amplitude modulation, single-sideband modulation, frequency modulation, phase modulation. Performances of such systems in the presence of white Gaussian noise. Implementations of transmitters and receivers. Course may be offered in classroom-based or online format. 3 lectures.

EE 315. Electrical and Electronic Circuits III. 4 units

Term Typically Offered: F, W, SP
 Prerequisites: CPE 133 and EE 215.

Digital electronics circuit design using MOSFETs. Design of one and two transistor amplifiers. Applications of transistor for interfacing analog signals to digital circuits. Review of circuits and electronics fundamentals. Designing interface circuits for small analog signals, noise reduction and protection. 3 lectures, 1 laboratory.

EE 321. Electronics. 3 units

Term Typically Offered: F,W,SPSU

Prerequisite: EE 201 or BRAE 216 for BRAE majors.

Semiconductor devices and circuits. Instrumentation amplifiers, power control rectifiers, feedback, pulse circuits, digital logic circuits. Not for Electrical Engineering majors. 3 lectures.

EE 322. Microcontrollers for Everyone. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Microcontroller history and computer systems overview. Introduction to basic electrical circuits and computer programming concepts. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

EE 327. Digital Signals and Systems. 3 units

Term Typically Offered: F, W

Prerequisite: EE 212 or EE 215; and MATH 244. Concurrent: CPE 367.

Signal and system description and analysis, with emphasis on discrete-time signals and linear time-invariant (LTI) systems. Sampling theorem. Frequency spectrum, Convolution and its application to LTI systems. The z transform, discrete-time Fourier transform, and discrete Fourier transform. Introduction to digital filters. 3 lectures. Crosslisted as CPE/EE 327.

EE 328. Discrete Time Signals and Systems. 3 units

Term Typically Offered: F, W

Prerequisite: BMED 355 or EE 228. Concurrent: CPE/EE 368.

Discrete-time systems and analysis, with emphasis on linear time-invariant (LTI) systems. Sampling theorem. Classification of discrete-time systems. Convolution and its application to LTI systems. The z transform, discrete-time Fourier transform, and discrete Fourier transform. Introduction to digital filters. Not open to students with credit in CPE 327. 3 lectures. Crosslisted as CPE/EE 328.

EE 329. Microcontroller-Based Systems Design. 4 units

Term Typically Offered: F, SP

Prerequisite: CPE/EE 233; EE 307 and EE 347.

Design, implementation and testing of microcontroller-based systems. Hardware and C software for embedded systems to sense and actuate external devices. I/O common embedded systems to interface I/O devices and protocols. Analysis of power consumption. Ethics. Not open to students with credit in CPE/EE 336. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 329.

EE 335. Electromagnetic Fields and Transmission. 4 units

Term Typically Offered: F, SP

Prerequisite: EE 201 and EE 251; or EE 212 and EE 242; or EE 215 and EE 245; and MATH 241. Concurrent: EE 375.

Maxwell's equations. Plane wave propagation in free space. Static electric and magnetic fields. Distributed-circuit concepts and transmission line parameters. Reflections and standing waves. The Smith chart and its applications. Transmission line measurements and impedance matching techniques. 4 lectures.

EE 336. Microprocessor System Design. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 233.

Introduction to microcontrollers and integrated microprocessor systems. Hardware/software trade-offs, system economics, and functional configurations. Interface design, real-time clocks, interrupts, A/D conversion, serial and parallel communications, watch-dog timers, low power operation, event-based inter-peripheral communication, and assembly and higher-level language programming techniques. Architecture and design of sampled data and low-power systems. Not open to students with credit in CPE/EE 329. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 336.

EE 342. Classical Control Systems Laboratory. 1 unit

Term Typically Offered: W, SP

Prerequisite: EE 215 or EE 228. Concurrent: EE 302. Recommended: EE 368; or CPE 327 and CPE 367.

Laboratory work pertaining to classical control systems, including servo control, transient and frequency responses, stability, and computer-aided analysis of control systems. 1 laboratory.

EE 346. Semiconductor Device Electronics Laboratory. 1 unit

Term Typically Offered: F, W

Prerequisite: CHEM 124, EE 212 & EE 242, EE 143 or IME 156 or IME 458, PHYS 211. Concurrent: EE 306. Recommended: ENGL 134.

Experimental determination of device characteristics and models. 1 laboratory.

EE 347. Digital Electronics and Integrated Circuits Laboratory. 1 unit

Term Typically Offered: W, SP

Prerequisite: CPE/EE 133, EE 306 and EE 346. Corequisite: CPE/EE 233. Concurrent: EE 307.

Computer simulation and experimental investigation of the characteristics, applications and interfacing of different logic families. 1 laboratory.

EE 348. Analog Electronics and Integrated Circuits Laboratory. 1 unit

Term Typically Offered: F, SP

Prerequisite: EE 302 & EE 342, EE 307 & EE 347. Concurrent: EE 308.

Design, simulation, construction and testing of solid state amplifiers and sub-circuits to meet stated specifications. 1 laboratory.

EE 361. Electronics Laboratory. 1 unit

Term Typically Offered: F,W,SPSU

Prerequisite: EE 251 or BRAE 216 for BRAE majors. Concurrent: EE 321.

Instrumentation amplifiers, feedback, rectifiers and power control, pulse and digital logic circuits. 1 laboratory.

EE 367. Digital Signals and Systems Laboratory. 1 unit

Term Typically Offered: F, W

Prerequisite: EE 242 or EE 245. Concurrent: CPE 327.

Laboratory work pertaining to discrete-time signals and linear systems; including frequency response and Fourier spectral analysis, signal sampling and aliasing, digital signal processing techniques, and digital filter design and implementation. 1 laboratory. Crosslisted as CPE/EE 367.

EE 368. Signals and Systems Laboratory. 1 unit

Term Typically Offered: F, W

Prerequisite: BMED 355 or EE 228. Concurrent: CPE/EE 328.

Laboratory work pertaining to linear systems, including Fourier analysis, time and frequency responses, and system transfer function. Not open to students with credit in CPE 367. 1 laboratory. Crosslisted as CPE/EE 368.

EE 375. Electromagnetic Fields and Transmission Laboratory. 1 unit

Term Typically Offered: F, SP

Concurrent: EE 335.

Transmission line and passive component measurements at microwave frequencies. Response to pulse excitation using time domain techniques and sinusoidal excitation using frequency domain techniques. Application of the Smith Chart and network analyzers in transmission line characterization and impedance matching techniques. 1 laboratory.

EE 400. Special Problems. 1-5 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 5 units.

EE 402. Electromagnetic Waves. 4 units

Term Typically Offered: F, W

Prerequisite: EE 335.

Maxwell's equations and plane wave propagation in materials. Reflection and transmission of normal and oblique incidence plane waves at planar boundaries between different media. Wave guides. Antennas. 4 lectures.

EE 403. Introduction to Photonics and Fiber Optics. 3 units

Term Typically Offered: F

Prerequisite: EE 306 and EE 346; or PHY 323. Concurrent: EE 443.

Introduction to modern fiber optics and photonics. Lens systems, photodiodes, LEDs, laser diodes, transmitter and receiver design, diffraction, interference, optical signal processing, propagation of light in optical fibers. 3 lectures.

EE 405. High Frequency Amplifier Design. 3 units

Term Typically Offered: F

Prerequisite: EE 308 & EE 348, EE 335. Concurrent: EE 445.

Design of modern electronic amplifiers and amplifier systems with advanced techniques. UHF and microwave small signal amplifier design utilizing microstrip transmission lines, S parameters of GaAs FET, and bipolar transistors. Low noise, broadband, and power amplifier designs. Oscillator designs. 3 lectures.

EE 406. Power Systems Analysis I. 4 units

Term Typically Offered: F

Prerequisite: EE 335, EE 255 & EE 295.

Introduction to electric power systems. Representation of power systems and its components including transmission lines, synchronous machines, transformers and loads. One line diagrams and per unit calculations. symmetrical faults. Load flow analysis. 4 lectures.

EE 407. Power Systems Analysis II. 4 units

Term Typically Offered: W

Prerequisite: EE 406.

Symmetrical components, unbalanced faults, power system stability, system protection, relays and relay systems, power system instrumentation and measurement techniques, economic operation. 4 lectures.

EE 409. Electronic Design. 3 units

Term Typically Offered: F, W

Prerequisite: EE 308 & EE 348; CPE/EE 328 & CPE/EE 368, or CPE 327 & CPE 367; CPE/EE 329 or CPE/EE 336 or CPE 316. Concurrent: EE 449.

Design of electronic systems and subsystems using analog and digital integrated circuits. Design principles and techniques. Analysis and design of feedback amplifiers; operational amplifier applications. Design of analog/digital and digital/analog converters. Power supply design. Emphasis on IC implementation. 3 lectures.

EE 410. Power Electronics I. 4 units

Term Typically Offered: F

Prerequisite: EE 308 and EE 348, or EE 321 and consent of instructor.

Introduction to power electronic converters and power semiconductor devices. Steady state analysis, performance study, and design of uncontrolled and controlled rectifiers, non-isolated and isolated DC-DC converters, AC voltage controllers, and single-phase inverters. Use of commercially available software. 3 lectures, 1 laboratory.

EE 411. Power Electronics II. 4 units

Term Typically Offered: W

Prerequisite: EE 410.

Switching trajectory, switching losses, and Safe Operating Area of solid-state switches. Analysis and design of snubber circuits. Synchronous rectification. Steady-state analysis and operation of resonant DC-DC converters. Power quality and harmonics. Operation of HVDC transmission lines, introduction to flexible AC transmission system (FACTS) controllers, multilevel and three-phase inverters. Use of commercially available software. 3 lectures, 1 laboratory.

EE 412. Advanced Analog Circuits. 3 units

Term Typically Offered: W

Prerequisite: EE 314, EE 409 & EE 449. Concurrent: EE 452.

Application of linear integrated circuits to data acquisition problems: transducer interfacing, linear and nonlinear preprocessing, phase-locked loops, and high performance quantization and recovery (A/D, D/A conversion). 3 lectures.

EE 413. Advanced Electronic Design. 4 units

Term Typically Offered: SP

Sustainability Related

Prerequisite: CSC 101, EE 409 and EE 449.

Advanced design of electronic circuits and subsystems, including sustainability and design as a process. Automated testing with GPIB instruments. Implementation of specific design projects, including team-based projects. 3 lectures, 1 laboratory.

EE 414. Robotic Systems Integration. 4 units

Term Typically Offered: W

Prerequisite: CPE/EE 329 or CPE/CSC 357 or ME 305.

Integration of sensors, actuators, chassis, and Linux-based computational platforms into functioning autonomous robotic systems. Embedded Linux system programming, inter-process software communication, basic sensor fusion techniques, Pulse Width Modulation (PWM) motor actuation, and web-based interfacing for remote system way-pointing and monitoring. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 414.

EE 415. Communication Systems Design. 3 units

Term Typically Offered: F

Prerequisite: CPE 327 or EE 328.

Design of modern wireline and wireless electronic communication and telemetry systems. Emphasis: practical implementation and comparative evaluation of various communication systems. 3 lectures.

EE 416. Digital Communication Systems. 3 units

Term Typically Offered: TBD

Prerequisite: EE 314; EE 328 or CPE 327.

Baseband (PCM, PAM, DM) signals and transmission. Bandpass (PSK, FSK, ASK) modulation and demodulation techniques. Digital communication signals in the presence of noise and detection of signals in Gaussian noise. Other topics such as: quantization, multiplexing and multiple access, spread spectrum techniques, coding, synchronization. 3 lectures.

EE 417. Alternating Current Machines. 4 units

Term Typically Offered: F

Prerequisite: EE 255 & EE 295.

Alternating current machines. Generalized, operational and dynamic analysis. Steady-state and transient operation of synchronous machines and linear induction machines. 3 lectures, 1 laboratory.

EE 418. Photonic Engineering. 3 units

Term Typically Offered: SP

Prerequisite: EE 335 or PHYS 323. Concurrent: EE 458.

Modern optical design with emphasis on the use of computers to design simple optical systems and to evaluate existing optical designs. Paraxial and exact ray tracing through thin and thick lenses, mirrors, and prisms. Radiometry and photometry. Electro-optic, acousto-optic, and magneto-optic modulators and their applications. Thermal detectors, semiconductor detectors, and charge coupled device (CCD) arrays. 3 lectures.

EE 419. Digital Signal Processing. 3 units

Term Typically Offered: W

Prerequisite: CSC 101 or CSC 231; EE 328 and EE 368, or CPE 327 and CPE 367. Concurrent: EE 459.

Review of Z-transform, convolution and discrete Fourier Transform. Digital filter design. Fast Fourier Transform. Theory and applications of digital signal processors. 3 lectures.

EE 420. Sustainable Electric Energy Conversion. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: CHEM 124; EE 255 and EE 295.

Electrical engineering aspects of photovoltaic and wind power generation and usage, and electrochemical energy conversion. Power control, processing, and quality for grid-connected and stand-alone systems. Distribution and storage of electric energy. Hydrogen and synthetic fuels. Distributed generation. 3 lectures, 1 laboratory.

EE 422. Polymer Electronics Laboratory. 1 unit

Term Typically Offered: F, W

Prerequisite: EE 347 or MATE 340 or CHEM 319 or PHYS 340.

Experimental procedures in polymer electronics. Investigation of the characteristics of a polymer electronic device. 1 laboratory. Crosslisted as EE/PHYS 422.

EE 423. Micro/Nano Fabrication. 3 units

Term Typically Offered: W

Prerequisite: BMED 212 or MATE 210.

Fabrication science and technology for creating micro and nano scale devices. Explore basic processes such as oxidation, diffusion, ion implantation, etching, chemical and physical vapor deposition, photolithography. Develop an understanding of the science of each process and how to select the right steps for fabricating electronic, photon and micro-electro-mechanical systems devices. 3 lectures. Crosslisted as BMED 434/EE 423/MATE 430.

EE 424. Introduction to Remote Sensing. 4 units

Term Typically Offered: W

Prerequisite: MATH 244; senior or graduate standing in engineering.

Radiation characteristics, sensor technology and platforms, satellite systems, system design tradeoffs, collection and transmission of radio-metric data, GPS, thermal remote sensing, active radar and microwave remote sensing, interpretation and exploitation of remotely sensed data for various applications. 3 lectures, 1 laboratory.

EE 425. Analog Filter Design. 3 units

Term Typically Offered: SP

Prerequisite: EE 409 & EE 449. Concurrent: EE 455.

Approximation Theory. All pole filters. Frequency transformations. Elements of passive synthesis. Time delay filters. Theory and design of active filter. Sensitivity analysis. 3 lectures.

EE 428. Computer Vision. 4 units

Term Typically Offered: W

Prerequisite: CPE 327 or CPE/CSC 357 or EE 328 or ME 305.

Introduction to the concepts of 2D and 3D computer vision: low-level image processing methods such as filtering and edge detection; feature extraction; segmentation and clustering; stereo vision; appearance-based and model-based algorithms. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 428.

EE 431. Computer-Aided Design of VLSI Devices. 4 units

Term Typically Offered: W

Prerequisite: EE 307 and EE 347. Recommended: EE 308 and EE 348, for students interested in analog design.

Design of VLSI circuits using state-of-the-art CAD software. Design issues and algorithms related to design using CAD. Full custom design through automated design and a major multi-week chip design project in lab. 3 lectures, 1 laboratory. Crosslisted as CPE 441/EE 431.

EE 432. Digital Control Systems. 3 units

Term Typically Offered: F

Prerequisite: EE 302 and EE 342; or CPE 327 and CPE 367. Concurrent: CPE/EE 472. Recommended: EE 328 and EE 368.

Theory and applications of digital computers in linear control systems. Analysis and design of microprocessor-based controls. Introduction of continuous and discrete transform methods for design of closed-loop dynamic systems. Applications in robotics, automotive, aircraft and industrial process control. 3 lectures. Crosslisted as CPE/EE 432.

EE 433. Introduction to Magnetic Design. 4 units

Term Typically Offered: TBD

Prerequisite: EE 255 and EE 295.

Design of magnetic components. Fundamentals of magnetics, magnetic cores, design of power transformer, three-phase transformer, dc inductor, ac inductors, dc-dc converter transformer design, actuators. Use of commercially available software. 3 lectures, 1 laboratory.

EE 434. Automotive Engineering for a Sustainable Future. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing in any engineering or physical science major.

Multidisciplinary investigation of automotive renewable fuels and electric/hybrid vehicles. Analyze and design related technologies and systems. Methods for complete-cycle energy and GHG analysis. Comparative emissions, efficiency, power output, and infrastructure requirements. Laboratory projects converting engines and vehicles to operate on alternative fuels or electric propulsion. 3 lectures, 1 laboratory. Crosslisted as BRAE/EE 434.

EE 435. Industrial Power Control and Automation. 1 unit

Term Typically Offered: SP

Prerequisite: EE 255, EE 295, EE 302, and EE 342.

Introduction to programmable automation controllers including custom developed functions, electrical hardware interfaces, communications networking to intelligent electronic devices, and machine operator interface terminals. Applications of industrial power control and automation systems including protection equipment, motor controllers, renewable energy, and sensors. 1 laboratory.

EE 439. Introduction to Real-Time Operating Systems. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 329 or CPE 316.

Theory, design and implementation of real-time operating system-based embedded systems. Scheduling algorithms, operating system resources, peripheral device interfacing and embedded system architecture. Resource management issues in a resource-limited (microcontroller-based) environment. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 439.

EE 440. Wireless Communications. 3 units

Term Typically Offered: W

Prerequisite: EE 335, EE 314. Concurrent: EE 480.

Wireless microwave system design and analysis. RF transmission lines, microwave networks, receiver design, modulation techniques, and mixer characterization and realizations. Noise and distortion, RF oscillators and frequency synthesizers, filter design. Radiating systems and electromagnetic wave propagation, microwave amplifier design. 3 lectures.

EE 442. Real Time Embedded Systems. 4 units

Term Typically Offered: F

Prerequisite: CPE/EE 329 or CPE/EE 336 or CPE 316.

Theory, design and implementation of modern embedded systems. Scheduling algorithms and operating system resources. System on Chip (SoC) design issues such as interfacing with custom hardware description language (HDL) peripherals, high-performance chip interconnect standards, energy use, area, and hardware versus software performance trade-offs. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 442.

EE 443. Introduction to Photonics and Fiber Optics Laboratory. 1 unit

Term Typically Offered: F

Prerequisite: EE 306 and EE 346; or PHYS 323. Concurrent: EE 403.

Experimental study of optical fibers, optical lens systems, fiber amplifiers, light sources, and optical detectors. Simulation of a simple fiber optical network using CAD tools. Design, build, and test of fiber optic and free-space optical communication systems. 1 laboratory.

EE 444. Power Systems Laboratory. 1 unit

Term Typically Offered: SP

Prerequisite: EE 406.

Protective relaying, coordination, and relay calibration. Power control using transformers, parallel operation of generators, and computer simulation of power systems. 1 laboratory.

EE 445. High Frequency Amplifier Design Laboratory. 1 unit

Term Typically Offered: F

Prerequisite: EE 308 & EE 348, EE 335. Corequisite: EE 405.

Experimental investigation employing advanced techniques. Design of high-frequency electronic amplifiers utilizing S-parameters of bipolar transistors, network analyzers, and computer simulation techniques. 1 laboratory.

EE 446. Design of Fault-Tolerant Digital Systems. 4 units

Term Typically Offered: F

Prerequisite: CPE/EE 329 or CPE/EE 336 or CPE 316. Recommended: STAT 350.

Hardware and software fault tolerance concepts: fault models, coding in computer systems, module and system level fault detection mechanisms, reconfiguration techniques for general purpose processors and ASICs, and software fault tolerance techniques such as recovery blocks, N-version programming, checkpointing, and recovery. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 446.

EE 447. Stringed Musical Instrument Acoustics, Mechanics, and Transducer Design. 4 units

Term Typically Offered: W

Prerequisite: EE/CPE 329 or EE/CPE 336 or CPE 316 or ME 305.

Acoustics, sound production, and transducer design in the context of stringed musical instruments. Introduces music theory, scales and temperament, sound radiation, structural dynamics of stringed instruments. Integrates engineering topics including frequency spectrum analysis, electromagnetics, properties of materials, digital and analog circuit design. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 447.

EE 449. Electronic Design Laboratory. 1 unit

Term Typically Offered: F, W

Prerequisite: EE 308 & EE 348; CPE/EE 328 & CPE/EE 368, or CPE 327 & CPE 367; CPE/EE 329 or CPE/EE 336 or CPE 316. Concurrent: EE 409.

Design of electronic systems and subsystems using integrated circuits. 1 laboratory.

EE 450. Solar Photovoltaic System Engineering. 4 units

Term Typically Offered: F

Prerequisite: one of the following: PHYS 104; PHYS 118; PHYS 121; or PHYS 141; and junior standing.

Engineering principles, design, and installation of solar photovoltaic power systems including grid-tie and off-grid systems. Photonic energy conversion, solar module engineering, solar power electronics, photovoltaic site planning, mechanical and structural considerations, permit processes, government incentives, and analysis of financial and investment issues. Field trips required. 3 lectures, 1 laboratory. Crosslisted as BRAE/EE/HNRS 450.

EE 452. Advanced Analog Circuits Laboratory. 1 unit

Term Typically Offered: W

Prerequisite: EE 314, EE 409 & EE 449. Concurrent: EE 412.

Advanced laboratory study of LC and VCO oscillators, phase detectors, phase-locked loop circuits, transducer interface circuits, noise sources and signal-to-noise determination, ADC and DAC for data conversion. Formal experiments and computer SPICE simulation. 1 laboratory.

EE 455. Analog Filter Design Laboratory. 1 unit

Term Typically Offered: SP

Prerequisite: EE 409 & EE 449. Concurrent: EE 425.

Advanced laboratory study of sensitivity and stability of active networks prescribed for realization of transfer functions by active network synthesis techniques. Formal experiments and individual project work. 1 laboratory.

EE 456. Digital Communication Systems Laboratory. 1 unit

Term Typically Offered: TBD

Prerequisite: EE 314; EE 328 & EE 368 or CPE 327 & CPE 367.

Methods of digital modulation and demodulation. Emphasis on spectral analysis, bandwidth requirements and other practical considerations of modulation and demodulation. 1 laboratory.

EE 458. Photonic Engineering Laboratory. 1 unit

Term Typically Offered: SP

Concurrent: EE 418.

Experimental investigation of the techniques used in processing optical signals. Formal experiments on electro-optic modulation, acousto-optic modulation. Construction of an RF spectrum analyzer. Analog processing of optical signals, and charge-coupled array devices. 1 laboratory.

EE 459. Digital Signal Processing Laboratory. 1 unit

Term Typically Offered: W

Prerequisite: CSC 101 or CSC 231; CPE 327 and CPE 367 or EE 328 and EE 368. Concurrent: EE 419.

Experiments in digital filter design and digital signal processing emphasizing various areas of application. Formal experiments and individual project work, including DSP algorithm and digital filter analysis, design and implementation using Matlab, and real-time implementations using C on an embedded DSP processor. 1 laboratory.

EE 460. Senior Project Preparation. 2 units

Term Typically Offered: F, W

Sustainability Related

Prerequisite: EE 314, EE 335. Corequisite: EE 409 & EE 449.

Introduction to teamwork and team-oriented project execution. Project planning, scheduling and analysis. Usage of tools for project management including Gantt and Pert Charts. Project development, cost and time estimation using top-down and bottom-up approaches. Ethics and ethical issues as they pertain to the conduct of engineering. Development of senior project proposal. 1 lecture, 1 laboratory.

EE 461. Senior Project I. 2 units

Term Typically Offered: W, SP

Prerequisite: EE 409, EE 449 and EE 460.

Investigation and design of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report.

EE 462. Senior Project II. 2 units

Term Typically Offered: F, SP

Prerequisite: EE 461.

Continuation and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report.

EE 463. Senior Project Design Laboratory I. 2 units

Term Typically Offered: W, SP

Prerequisite: EE 409, EE 449 and EE 460.

Investigation and design of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Not open to students with credit in EE 461. 2 laboratories.

EE 464. Senior Project Design Laboratory II. 2 units

Term Typically Offered: F, SP
Prerequisite: EE 463.

Continuation and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Not open to students with credit in EE 462. 2 laboratories.

EE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

EE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

EE 472. Digital Control Systems Laboratory. 1 unit

Term Typically Offered: F
Concurrent: CPE/EE 432.

Design and programming of microprocessor-based digital controls for electro-mechanical plants. Topics include digital control laws, translation of transfer functions into algorithms, assembly language programming, real-time software design, sample rate selection, finite word-length considerations. 1 laboratory. Crosslisted as CPE/EE 472.

EE 473. Microfabrication Laboratory. 1 unit

Term Typically Offered: W
Corequisite: BMED 434/EE 423/MATE 430.

Application of basic processes involved in microfabrication: cleanroom protocol, oxidation, diffusion, photolithography etching and sputtering. Explore process development through fabrication of electronic, photonic or microfluidic devices. Each student will be part of a team that will fabricate and test a device. 1 laboratory. Crosslisted as BMED 435/EE 473/MATE 435.

EE 475. Communication Networks and Systems Laboratory. 1 unit

Term Typically Offered: F
Prerequisite: CPE 327 and CPE 367; or CPE/EE 328 and CPE/EE 368.

Methods of wireline and wireless communication networks and systems. Emphasis on TCP/IP wired networks and modern mobile communication standards. 1 laboratory.

EE 480. Wireless Communications Laboratory. 1 unit

Term Typically Offered: W
Prerequisite: EE 335, EE 314. Concurrent: EE 440.

Wireless microwave system design and analysis. RF transmission lines, microwave networks, receiver design, modulation techniques, and mixer characterization and realizations. Noise and distortion, RF oscillators and frequency synthesizers, filter design. Radiating systems and electromagnetic wave propagation, microwave amplifier design. 1 laboratory.

EE 493. Cooperative Education Experience. 1-2 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: Sophomore standing.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 6 units. Credit/No Credit grading only.

EE 494. Cooperative Education Experience. 6-12 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

EE 495. Cooperative Education Experience. 6-12 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Two consecutive quarters of EE 494 immediately preceding EE 495; sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units.

EE 500. Individual Study. 1-3 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of department chair, graduate advisor, and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Total credit limit at discretion of graduate advisor, not to exceed 9 units.

EE 502. Microwave Component and System Engineering. 4 units

Term Typically Offered: W
Prerequisite: Graduate standing; or EE 306, EE 346, EE 335, and EE 375.

Passive and active microwave/millimeter wave system theory, design and project construction. Microwave components such as power splitters, filters, mixers, detectors, oscillators, modulators, and amplifiers are designed, fabricated and tested. Components are combined for system-level functionality projects. 3 lectures, 1 laboratory.

EE 504. Software Defined Radio. 4 units

Term Typically Offered: SP
Prerequisite: EE 314; and EE 328 or CPE 327; or graduate standing.

Introduction to software defined radios, including architectures of software defined radio receivers and transmitters, design principles and trade-offs, signal processing techniques, and applications of the technologies. 3 seminars, 1 laboratory.

EE 509. Computational Intelligence. 4 units

Term Typically Offered: SP

Prerequisite: Senior or graduate standing.

Theory, design, and applications of biologically inspired computational paradigms, including artificial neural networks, evolutionary computation, swarm intelligence, and hybrid intelligent systems. 4 seminars.

EE 511. Electric Machines Theory. 4 units

Term Typically Offered: W

Prerequisite: EE 255 or equivalent, and graduate standing or consent of instructor.

Advanced topics in electric machines theory. Introduction to Park's transformation. Analysis of electric machines using Kron's generalized concept. Vector control of induction machines. 4 seminars.

EE 513. Control Systems Theory. 4 units

Term Typically Offered: W

Prerequisite: EE 302 or equivalent, and graduate standing or consent of instructor.

State representation of dynamic systems. Mathematical models of physical devices, controllability and observability. Design of closed-loop systems. Optimal control theory. 4 seminars.

EE 514. Advanced Topics in Automatic Control. 4 units

Term Typically Offered: SP

Prerequisite: EE 513 or equivalent, EE 328 or similar course on discrete-time linear systems.

Summary course covering five selected graduate-level topics in automatic control theory and practice; implementation issues in digital control, nonlinear control theory and design, LQ and time optimal control, variable structure control, and fuzzy logic/model-free control. 4 seminars.

EE 515. Discrete Time Filters. 4 units

Term Typically Offered: F

Prerequisite: EE 314 or equivalent, and graduate standing or consent of instructor.

Advanced topics in filter design and implementation. Emphasis placed on current applications and on the processing of real signals. Topics may include signal analysis via spectral estimation, short time Fourier transforms, and spectrograms. Effects of coefficient quantization, and limits of practical filters. State space realization. Optimal and adaptive filters for signal prediction, system identification, and noise cancellation. Techniques implemented in programming assignments. 4 seminars.

EE 516. Pattern Recognition. 4 units

Term Typically Offered: SP

Prerequisite: STAT 312 or STAT 350.

Fundamental topics in statistical pattern recognition including Bayesian decision theory, Maximum-likelihood and Bayesian estimation, non-parametric density estimation, feature selection, dimension reduction, and clustering, with application to image pattern recognition. 3 seminars, 1 laboratory.

EE 518. Power System Protection. 4 units

Term Typically Offered: SP

Prerequisite: EE 406 and graduate standing.

Unsymmetrical faults. Protection fundamentals. Instrument transformers. Power system grounding. Generator protection, transformer protection, busbar protection, line and motor protection. 3 seminars, 1 laboratory.

EE 519. Advanced Analysis of Power Systems. 4 units

Term Typically Offered: TBD

Prerequisite: EE 406 or equivalent, and graduate standing or consent of instructor.

Advanced power system stability analysis, numerical methods in power system analysis. 4 seminars.

EE 520. Advanced Solar-Photovoltaic Systems Design. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: Graduate standing or consent of instructor.

Solar radiation and insolation variability. Solar cell theory. Photovoltaic module and array design. Interfacing PV generators with various kinds of loads. Power processing circuits and systems. Energy storage options. Stand-alone and grid-connected systems. Life Cycle Assessment and Recycling of Solar PV equipment. Economic, policy and sustainability issues. 4 seminars.

EE 521. Computer Systems. 4 units

Term Typically Offered: SP

Prerequisite: CPE 316 or CPE/EE 329; and CPE 315 or CPE 333; graduate standing or consent of instructor.

Organization of modern general purpose, high speed digital computer systems. Design of arithmetic units, control units, memories and memory subsystems. Cost, power and speed trade-offs in the design of such systems. 3 seminars, 1 laboratory. Crosslisted as CPE/EE 521.

EE 522. Advanced Real-Time Operating Systems Design. 4 units

Term Typically Offered: TBD

Prerequisite: CPE/EE 439.

Define and implement a microcontroller-based Real-Time Operating System (RTOS). Advanced real-time concepts, kernel structure, task and time management, various intertask communication constructs including semaphores, queues and mailboxes. Scheduler design, memory management and shared resource management in a resource-constrained microcontroller environment. 3 seminars, 1 laboratory. Crosslisted as CPE/EE 522.

EE 523. Digital Systems Design. 4 units

Term Typically Offered: F

Prerequisite: CPE 316 or CPE/EE 329; and graduate standing.

Full-custom design and analysis of digital circuits using full CMOS, pass-transistor and dynamic circuit topologies. Transistor sizing for minimizing power consumption, delay and other design criteria. 3 seminars, 1 laboratory. Crosslisted as CPE/EE 523.

EE 524. Solid State Electronics. 3 units

Term Typically Offered: TBD

Prerequisite: PHYS 412 or equivalent, and graduate standing or consent of instructor.

Physical theory of solid-state devices. Properties of metal-semiconductor junctions and p-n junctions. Derivation of properties of diodes, transistors, and four-layer devices from basic physical and mathematical considerations. 3 seminars.

EE 525. Stochastic Processes. 4 units

Term Typically Offered: F

Prerequisite: STAT 350 or equivalent, and graduate standing or consent of instructor.

Probability and stochastic processes used in random signal analysis. Response of linear systems to random inputs. Auto-correlation and power spectral densities. Applications in signal processing using the discrete Kalman filter. 4 seminars.

EE 526. Advanced Digital Communications. 4 units

Term Typically Offered: W

Prerequisite: EE 314, EE 416, and graduate standing.

Modern digital communication systems. M-ary signals. Vector space representation of signals. Optimum receiver principles. Common signal sets. Signal space dimensionality versus time-bandwidth product. 4 seminars.

EE 527. Advanced Topics in Power Electronics. 4 units

Term Typically Offered: SP

Prerequisite: EE 410 or equivalent, and graduate standing or consent of instructor.

Selected advanced topics in power electronics such as dc-dc converters, phase-controlled rectifiers, switched-mode inverters, ac and dc drives, HVDC transmission, or utility applications of power electronics. 4 seminars.

EE 528. Digital Image Processing. 4 units

Term Typically Offered: F

Prerequisite: CPE 327 or EE 328; and graduate standing or consent of instructor.

Processing and interpretation of images by computer. Emphasis on current applications with real images used in programming assignments. Topics include intensity transformation, histogram equalization, spatial filtering, frequency-domain filtering, image restoration, Wavelet and other image transforms, image compression, morphological operations, intro to object recognition. 3 lectures, 1 laboratory.

EE 529. Microwave Device Electronics. 4 units

Term Typically Offered: W

Prerequisite: EE 306, EE 315, or graduate standing.

Emphasis on device theory of operation, fabrication techniques and circuit principles of active microwave solid-state devices, their noise aspects and systems applications. 3 lectures, 1 laboratory.

EE 530. Fourier Optics. 4 units

Term Typically Offered: W

Prerequisite: EE 402 or equivalent, EE 314 or equivalent, and graduate standing or consent of instructor.

Approach to the design and analysis of optical systems using linear communication theory, including Fourier analysis. Analysis of two-dimensional signals and systems, foundations of scalar diffraction theory. Fresnel and Fraunhofer diffraction. Wave-optics analysis of coherent optical systems, frequency analysis of optical imaging systems, holo-graphy. 4 seminars.

EE 531. Advanced VLSI Design. 4 units

Term Typically Offered: SP

Prerequisite: CPE 441/EE 431.

Advanced Very Large Scale Integrated (VLSI) design using state-of-the-art software. Advanced topics in digital, analog and mixed signal circuit design to enable a quarter-long design project culminating in a tapeout-ready integrated circuit design. 3 lectures, 1 laboratory. Crosslisted as CPE 541/EE 531.

EE 532. VLSI Circuit Testing. 1 unit

Term Typically Offered: F

Prerequisite: EE 531/CPE 541.

Characterization, testing and documentation of custom-fabricated Very Large Scale Integrated (VLSI) circuits. Use of specialized test equipment. 1 laboratory. Crosslisted as CPE/EE 532.

EE 533. Antennas. 4 units

Term Typically Offered: SP

Prerequisite: EE 402 or equivalent.

Principles of antenna theory. Antenna parameters, radiation integrals. Duality and reciprocity theorems. Wire antennas. Antenna arrays. Traveling wave antennas. Broadband and frequency independent antennas. Aperture and reflector antennas. Microstrip antennas. Antenna design. 4 seminars.

EE 534. Advanced Photonic Systems. 4 units

Term Typically Offered: W

Prerequisite: EE 335 or graduate standing. Recommended: EE 403 and EE 443.

Design, implementation, and characterization of advanced photonic systems including optical sensors, holography, optical coherence tomography (OCT), and light detection and ranging (LIDAR) systems. 3 lectures, 1 laboratory.

EE 541. Advanced Microwave Laboratory. 2 units

Term Typically Offered: W

Prerequisite: EE 402 or equivalent and graduate standing.

Experimental measurement in waveguide and microstrip circuits employing the advanced Network Analyzer. Design of both passive and active microwave circuits using microstrip. Graphical and analytical design techniques as well as the use of computer-aided design codes. 2 laboratories.

EE 542. Advanced Real Time Embedded Systems. 4 units

Term Typically Offered: SP
Prerequisite: CPE/EE 442.

Advanced study and application of modern embedded systems. Memory bandwidth matching, clock-domain crossing, IP creation and verification, and student-led lectures on modern System on Chip (SoC) design topics. Building a prototype embedded system. 3 lectures, 1 laboratory. Crosslisted as CPE/EE 542.

EE 544. Solid-state Electronics and VLSI Laboratory. 1 unit

Term Typically Offered: TBD
Prerequisite: Graduate standing; EE 431 or EE 524 (EE 524 may be taken concurrently).

Experimental procedures in solid-state electronics and integrated circuits. Investigation and improvement of the characteristics of solid-state electronic devices and integrated circuits. 1 laboratory.

EE 563. Graduate Seminar. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Current developments in the fields of electrical and electronic engineering. Participation by students, faculty and guest lecturers. Open to graduate students with a background in electrical or electronic engineering. Credit/No Credit grading only. Total credit limited to 3 units. Course may be offered in classroom-based or online format. 1 seminar.

EE 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to graduate students and selected seniors with electrical and electronic engineering background. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 seminars.

EE 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

EE 594. Cooperative Education Experience. 6-12 units

Term Typically Offered: F,W,SP,SU
CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only. Total credit limited to 24 units.

EE 595. Cooperative Education Experience. 6-12 units

Term Typically Offered: F,W,SP,SU
CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. A fully-developed formal report and evaluation by work supervisor required. Total credit limited to 12 units.

EE 599. Design Project (Thesis). 1-9 units

Term Typically Offered: F, W, SP
Prerequisite: Graduate standing and consent of instructor.

Each individual or group will select, with faculty guidance and approval, a topic for independent research or investigation resulting in a thesis or project to be used to satisfy the requirement for the degree. An appropriate experimental or analytical thesis or project may be accepted.

Engineering (ENGR)

undefined

ENGR Courses

ENGR 101. Engineering Student Success. 1 unit

Term Typically Offered: TBD
CR/NC

Strategies for success as an engineering student, including development of intrinsic motivation, time management, self-advocacy, campus resources, and career preparation. Engineering design process, teamwork, and communication skills. Credit/No Credit grading only. 1 activity.

ENGR 110. Introduction to Engineering. 2 units

Term Typically Offered: F
Introduction to engineering and the computing disciplines with emphasis on the design process, professionalism, communication, teamwork, diversity and skills for academic success in engineering. 2 lectures.

ENGR 234. Introduction to Design Thinking. 4 units

Term Typically Offered: F
Prerequisite: Entrepreneurship minors only.

Introduction to the process of design thinking and human centered design, including design process, methodology, and implementation. Empathy, creativity, iterative prototyping, and contextual design of products and services. 4 lectures. Crosslisted as BUS/ENGR 234.

ENGR 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENGR 301. Engineering Professional Success. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: Consent of instructor. Recommended: ENGR 101.

Strategies for success as an engineering professional. Preparation for job searches, including networking and building a professional identity. Exploration of engineering within context of society and community. Intended for First Generation and new transfer students. Credit/ No Credit grading only. 1 activity.

ENGR 310. Introduction to Entrepreneurship. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better.

Role and impact of entrepreneurship and technology startups; characteristics and traits of entrepreneurs; opportunity identification and assessment; frameworks for building startups; the founding team; organizational and legal issues; business and value proposition models; acquiring resources; entrepreneurial risk; realizing and harvesting value. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as BUS/ENGR 310.

ENGR 322. The Learn By Doing Lab Teaching Practicum. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Early teaching experience in an informal science, technology, engineering, and mathematics (STEM) teaching and learning environment. Principles of inquiry-driven STEM education, lesson design, implementation and assessment. Intended for undergraduates exploring STEM teaching as a career. Total credit limited to 4 units. Credit/No Credit grading only. 1 seminar, 1 laboratory. Crosslisted as ENGR 322/SCM 302/HNRS 302.

ENGR 334. Needfinding in New Product Design. 4 units

Term Typically Offered: TBD

Prerequisite: BMED 212, ENGR 234, IME 144, or ME 234.

Identification and characterization of human needs for future products, systems, services, and environments. Observation and interview techniques based on ethnographic approaches and building design empathy. Emphasis on development of broad and flexible thinking skills for designers to address the needs of a changing society. Field trips required. 4 lectures.

ENGR 350. The Global Environment. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/ historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ENGR 400. Special Problems for Advanced Undergraduates. 2-4 units

Term Typically Offered: F,W,SPSU

Prerequisite: ME 212 or consent of department head.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 4 units.

ENGR 440. Engineering as a Profession. 3 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Preparation for the transition from academia to industry. Working knowledge of key topics such as leadership, organizational structure, intellectual property, business models, and product development cycles, along with an appreciation of impact of technology on society. 3 lectures.

ENGR 459. Interdisciplinary Senior Design Project I. 2 units

Term Typically Offered: F

Prerequisite: Senior standing.

First of three courses taken sequentially in a team based interdisciplinary senior design project. Development of sponsor's needs and generation of design solutions. Project management, cost analysis, intellectual property, test plans, impact analysis on society, and ethical considerations. Communication of results to project sponsor. 2 laboratories.

ENGR 460. Interdisciplinary Senior Design Project II. 2 units

Term Typically Offered: W

Prerequisite: ENGR 459.

Continuation of ENGR 459 and senior project. Activities focus on detail design, analysis and material procurement. 2 laboratories.

ENGR 461. Interdisciplinary Senior Design Project III. 2 units

Term Typically Offered: SP

Prerequisite: ENGR 460.

Continuation of ENGR 460 and completion of senior project. Design verified through prototyping and testing. 2 laboratories.

ENGR 462. Senior Project. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: ME 212, junior standing, and consent of instructor.

Selection and completion of project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results presented in a formal report. Minimum commitment of 150 hours.

ENGR 463. Interdisciplinary Entrepreneurial Senior Design Project I. 2 units

Term Typically Offered: F

Prerequisite: Senior standing.

First of three courses taken sequentially in a team based interdisciplinary senior design project with engineering and business students. Entrepreneurial process through design of a product or service, using customer development and agile engineering. 2 laboratories.

ENGR 464. Interdisciplinary Entrepreneurial Senior Design Project II. 2 units

Term Typically Offered: W

Prerequisite: ENGR 463.

Continuation of ENGR 463 and a team based interdisciplinary senior design project with engineering and business students. 2 laboratories.

ENGR 465. Interdisciplinary Entrepreneurial Senior Design Project III. 2 units

Term Typically Offered: SP

Prerequisite: ENGR 464.

Continuation of ENGR 464 and a team based interdisciplinary senior design project with engineering and business students. 2 laboratories.

ENGR 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENGR 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ENGR 493. Cooperative Education Experience. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 6 units.

ENGR 494. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 18 units.

ENGR 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

ENGR 500. Individual Study. 2-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of Program Director.

Advanced study planned and completed under the direction of faculty. Open to graduate students who have demonstrated the ability to do independent work. Total credit limited to 8 units.

ENGR 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENGR 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ENGR 581. Biochemical Engineering. 4 units

Term Typically Offered: TBD

Prerequisite: CHEM 312 and MCRO 221.

Types of microorganisms and microbially-mediated biochemical reactions for biotechnology applications. Stoichiometric and thermodynamic principles for microbial growth and metabolism. Material and energy balances for aerobic and anaerobic growth and bioreactor design. Kinetics of enzyme catalyzed reactions. Field trips required. 3 seminars, 1 laboratory. Crosslisted as ENGR/ENVE 581.

ENGR 593. Cooperative Education Experience. 2 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

ENGR 594. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

ENGR 595. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. A fully-developed formal report and evaluation by work supervisor required. Credit/No Credit grading only.

ENGR 596. Industry Sponsored Project Experience. 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing.

Designed for MS students who are performing a work-for-others research project that requires a Non-disclosure Agreement. Students who qualify will be required file a detailed, supervised report and undergo an examination on the work performed. Total credit limited to 9 units. 1 to 9 supervision.

ENGR 599. Design Project (Thesis). 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing.

Each individual or group will select, with faculty guidance and approval, a topic for independent research or investigation resulting in a thesis or project to be used to satisfy the degree requirement. An appropriate experimental or analytical thesis or project may be accepted.

English (ENGL)

undefined

ENGL Courses

ENGL 131. Writing and Rhetoric Stretch (Part I). 4 units

Term Typically Offered: F

CR/NC

Part one of a two-part stretch course sequence. Rhetorical principles of and strategies for producing effective academic writing. Writing as a recursive process that leads to greater organizational coherency, stylistic complexity, and rhetorical awareness. Credit/No Credit grading only. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 132. Writing and Rhetoric Stretch (Part II). 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area A2

2019-20 or earlier catalog: GE Area A1

Prerequisite: ENGL 131. Concurrent: ENGL 135.

Part two of a two-part stretch course sequence. Rhetorical principles and strategies for producing effective writing. Writing as a recursive process that leads to greater coherency, stylistic complexity, and rhetorical awareness. Not open to students with credit in ENGL 133 or ENGL 134. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

ENGL 133. Multilingual Writing and Rhetoric. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area A2

2019-20 or earlier catalog: GE Area A1

Prerequisite: GE Area A2 eligibility for Written Communication Placement upon admissions.

Rhetorical principles of and strategies for producing effective academic writing for multilingual audiences. Focus on genre awareness, responding to a range of rhetorical situations across multiple languages and cultures, and stylistic elements appropriate for bilingual and multilingual writers. Not open to students with credit in ENGL 134. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

ENGL 134. Writing and Rhetoric. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area A2

2019-20 or earlier catalog: GE Area A1

Prerequisite: GE Area A2 eligibility for Written Communication Placement upon admissions.

Rhetorical principles and strategies for producing effective writing. Writing as a recursive process that leads to greater coherency, stylistic complexity, and rhetorical awareness. Not open to students with credit in ENGL 133. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

ENGL 135. Writing and Rhetoric Tutorial. 1 unit

Term Typically Offered: F,W,SP,SU

CR/NC

Corequisite: ENGL 129, ENGL 130, ENGL 131, ENGL 132, ENGL 133, or ENGL 134.

Guided discussion and practice of writing strategies for students seeking support for first-year composition-related coursework. Weekly, individualized hour-long sessions with a peer writing consultant offering feedback based on the audience, purpose, and context of a writing task. Open to all students enrolled in ENGL 129, ENGL 131, ENGL 133, or ENGL 134; required of all students enrolled in ENGL 130 or ENGL 132. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

ENGL 145. Writing Arguments. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area A3

2019-20 or earlier catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog).

Examination of rhetorical principles and ethical rhetorical action. Application of these principles and practices to arguments across a range of genres and media. Evaluate credibility of evidence and sources. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 145. Fulfills GE Area A3 with a grade of C- or better.

ENGL 147. Writing Arguments about STEM. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog).

Critical analysis of arguments about STEM topics. Examination and application of logical and rhetorical principles. Evaluation of sources and evidence. Composing arguments across a range of genres and media. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A3 with a grade of C- or better. Crosslisted as ENGL/HNRS 147.

ENGL 150. Writing Tutorial. 1 unit

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs) and consent of instructor.

Guided discussion and practice of writing strategies for students seeking support for writing-related coursework and/or the GWR. Weekly, individualized and group sessions with a peer writing consultant offering feedback based on the audience, purpose, and context of a writing task. Credit/No Credit only. Total credit limited to 4 units. 1 activity.

ENGL 202. Introduction to Literary Studies. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); for English majors only.

Introduction to literary genres, concepts, and terms. Emphasis on explication and interpretation, and on writing about literature. 4 lectures.

ENGL 203. Sequence I: Fifth Century to Fifteenth Century. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area A with grades of C- or better. For English majors only.

Representative canonical and non-canonical readings in the literature of the period. Will include an Old English (Anglo-Saxon) text; an Anglo-Norman text; a work of the Alliterative Revival; Chaucer; de Pizan; Dante; and others, as chosen by the instructor. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 204. Sequence II: Sixteenth Century to Late Seventeenth Century. 4 units

Term Typically Offered: F, W

Prerequisite: ENGL 203; and English major.

Representative canonical and non-canonical readings in American and British literature of the period. Will include Bradstreet, Harriot, Lanyer, Native American creation stories and/or trickster tales, Shakespeare, Wroth, and others, as chosen by the instructor. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 205. Sequence III: Mid-Seventeenth to Late Eighteenth Century. 4 units

Term Typically Offered: W, SP

Prerequisite: ENGL 204; and English major.

Representative canonical and non-canonical readings in American and British literature of the period. Will include Behn, Equiano, Murray, Occom, Swift, Wheatley, and others, as chosen by the instructor. 4 lectures.

ENGL 220. Introduction to Writing Studies. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A with grades of C- or better.

How writing and rhetoric shape and are shaped by social and cultural activity. The relationship between literacies and discourses. Focus on the materiality of print, online, and digital writing. Considers both historical and contemporary perspectives. 4 lectures.

ENGL 221. Introduction to Technical and Professional Communication. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); completion of GE Area A3 with a grade of C- or better; and one course in GE Area B.

Introduction to the rhetorical, stylistic, and genre conventions used in technical and professional communication. Emphasis on the analysis, evaluation, and production of technical and professional documents. Required for Technical and Professional Communication Certificate Program. 4 lectures.

ENGL 230. British Literature: Beginnings to 1789. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Covers a thousand years of British literature, from the eighth to the eighteenth century and may include such readings as Beowulf, The Canterbury Tales, Utopia, Othello, The Blazing World, Paradise Lost, Oroonoko and The Interesting Narrative of the Life of Olaudah Equiano. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

ENGL 231. British Literature: 1789 to the Present. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Broadly surveys Romantic, Victorian, Modern, and Contemporary British literature in an historical-cultural context. Investigates works from several genres and a variety of national and cultural voices. May include such writers as Wordsworth, Wollstonecraft, Dickens, G. Eliot, Wilde, Woolf, Yeats, and Gordimer. 4 lectures. Crosslisted as ENGL 231/HNRS 232. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

ENGL 241. American Literature: Beginnings to 1865. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Survey of early U.S. American literature from pre-Columbian era to end of Civil War. A range of writers and genres, including Indigenous creation stories, early exploration documents, first contact narratives, colonial histories, sermons, poetry, essays, autobiographies, drama, and fiction. Not open to students with credit in ENGL 240. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

ENGL 242. American Literature: 1830 to the Present. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

A broad survey of later U.S. American literature from the rise of literary nationalism to the present. A wide range of writers and genres, including novels, short stories, poems, plays, essays, and autobiographies. Not open to students with credit in ENGL 240. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ENGL/HNRS 242. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

ENGL 251. Introduction to Classical Literature. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Examination of the ancient epics and classical literature of Mesopotamia, Greece, and Rome. May include such readings as The Epic of Gilgamesh, the Iliad, the Odyssey, Genesis, Sappho's Poetry, Antigone, the Symposium, the Aeneid, and Marcus Aurelius's Meditations. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 251. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

ENGL 252. Introduction to Medieval through Enlightenment Literature. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Examination of key works marking the transition from Mediterranean Classicism (c. 500 CE) to an emergent European tradition (c. 1800 CE). May include such readings as Confessions, Beowulf, Lais of Marie de France, Oroonoko, Life of Olaudah Equiano, and Faust. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

ENGL 253. Introduction to Romantic through Modernist Literature. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Examination of major works from the Age of Revolution, beginning with the Romantics at the end of the eighteenth century and concluding with the Modernists of the late-twentieth century. Considers the relationship between literary revolution, political revolution, and colonial-capitalist expansion. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

ENGL 255. Children's Literature in a Diverse Society. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better.

Culturally diverse children's literature with a focus on analysis and evaluation of literary elements and structures, critical perspectives, trends, and issues. A wide range of authors, genres and formats including folktales, fantasy, poetry, informational, historical and realistic fiction books. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ENGL/LS 255. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

ENGL 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENGL 272. Introductory Topics in Cinematic Expression. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Prerequisite: Completion of GE Area A with grades of C- or better.

Active viewing and critical analysis of cinema from the silent era to today as revealing and changing our cultural values. Study of narrative structures, cinematic techniques such as cinematography, editing, and sound, technological innovations, and contributions made by many different communities and individuals. The Class Schedule will list topic selected. 3 lectures, 1 laboratory. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

ENGL 290. Introduction to Linguistics. 4 units

Term Typically Offered: F, W

Prerequisite: Completion of GE Area A with grades of C- or better.

Introduction to the nature of language; concepts and methods of linguistic science. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 303. Sequence IV: Late Eighteenth to Mid-Nineteenth Century. 4 units

Term Typically Offered: F, SP

Prerequisite: ENGL 205; and English major.

Representative canonical and non-canonical readings in American and British literature of the period. Will include Austen, Hawthorne, Jacobs, Ridge (Yellow Bird), Wollstonecraft, Wordsworth, and others, as chosen by the instructor. 4 lectures.

ENGL 304. Sequence V: Mid-Nineteenth Century to Late Nineteenth Century. 4 units

Term Typically Offered: F, W

Prerequisite: ENGL 303; and English major.

Representative canonical and non-canonical readings in American and British literature of the period. Will include Chesnut, Chopin, G. Eliot, Hopkins, C. Rosetti, Whitman, and others, as chosen by the instructor. 4 lecture.

ENGL 305. Sequence VI: Late Nineteenth to Mid-Twentieth Century. 4 units

Term Typically Offered: F, SP

Prerequisite: ENGL 304; and English major.

Representative canonical and non-canonical readings in American, British, and global Anglophone literature of the period. Will include H.D., T. Eliot, Hurston, Joyce, McKay, Woolf, and others, as chosen by the instructor. 4 lecture.

ENGL 306. Sequence VII: Mid-Twentieth Century to Present. 4 units

Term Typically Offered: F, SP

Prerequisite: ENGL 305; and English major.

Representative canonical and non-canonical readings in American, British and global Anglophone literature of the period. Will include Boland, Diaz, Ginsberg, Rushdie, Silko, Z. Smith, and others, as chosen by the instructor. 4 lectures.

ENGL 310. Corporate Communication. 4 units

Term Typically Offered: F,W,SP,SU

GWR

Prerequisite: Completion of GE Area A with grades of C- or better.

Recommended: Junior standing.

Instruction and practice in forms of communication characteristic of business and industry. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GWR for students with junior standing (90 units).

ENGL 311. Advanced Rhetorical Inquiry and Composing. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Analysis of multi-genre and multi-modal pieces. Focus on rhetorical strategies implemented across disciplines, histories, cultures. Rhetoric, persuasion, and composing will be studied as an art form and a humanistic endeavor. Not open to students with credit in ENGL 302 or ENGL 312. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 312. Translingual Rhetorical Inquiry and Writing. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C. Recommended: ENGL 133.

Writing and analysis of multi-genre and multi-modal projects for bilingual and multilingual audiences. Focus on rhetorical strategies writers implement across disciplines, histories, cultures. Rhetoric studied as an art form. Field trip may be required. Not open to students with credit in ENGL 302 or ENGL 311. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 316. Writing Sustainability. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Place-based writing course investigating the social and humanistic impacts of environmental issues and sustainability. Writing in the major genres of social life cycle assessment and a final research paper. Instruction in designing effective data visualizations. Field trip may be required. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ENGL 317. Technical Editing. 4 units

Term Typically Offered: TBD

GWR

Prerequisite: Completion of GE Area A with grades of C- or better.

Recommended: Junior standing.

Instruction and practice in editing skills commonly used in workplace settings. Includes practical instruction in copyediting, sentence level editing, and substantive editing for accuracy and consistency. Editing documents, illustrations, web pages for consistency and use. Application of grammar and punctuation. 4 lectures. Fulfills GWR for students with junior standing (90 units).

ENGL 319. Information Design and Production. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better.

Recommended: Junior standing.

Mid-level presentation of the theory and practice involved with the production of technical documents. Focus on history, typography, information design principles, the effective integration of text and graphics, project management, and recent industry trends in software use. 4 lectures.

ENGL 330. British Literature: Beginnings to 1485. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The historical development of medieval English literature through selected canonical and non-canonical works of various genres. Medieval authorship and textual practice, the relationship between gender and writing, and the forging of a national poetic identity. Interdisciplinary support material (artwork and music) illustrating key themes. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 331. British Literature: 1485-1660. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The literary, historical, political, religious and scientific concerns of the Age of the Renaissance. May include such readings as More's *Utopia*, Spenser's *Faerie Queene*, Shakespeare's *Othello*, Donne's *Songs and Sonnets*, Milton's *Paradise Lost*. ENGL 332. British Literature: 1660-1798. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth exploration of the dominant themes and preoccupations of the Age of Enlightenment. Historical and cultural contexts of canonical and non-canonical literature emphasized to illustrate 18th century Britons' views of themselves and their changing world. May include such writers as Dryden, Behn, Defoe, Swift, Pope, and Johnson. 4 lectures. Crosslisted as ENGL/HNRS 332. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 333. British Literature: 1798-1832. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth exploration of the literature of the British Romantic period. Cultural, historical, and philosophic contexts will also be examined in both canonical and non-canonical works. May include such writers as Blake, Wordsworth, Keats, and Wollstonecraft. 4 lectures. Crosslisted as ENGL/HNRS 333. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 334. British Literature: 1832-1914. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth study of historical, philosophical, and literary reaction to the rise of the modern industrial state. Special focus on the literary response to the following: industry, democracy, class, art, and culture. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 335. British Literature: 1914-Present. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth exploration of the dominant concerns and achievements of British literature from Modernism through Postmodernism. Historical and cultural contexts of canonical and non-canonical literature explored to illustrate 20th century Britain's reactions to the breakdown of traditional beliefs, the World Wars, the legacy of colonialism, the changing politics and problems of a multicultural nation. May include such writers as Conrad, Joyce, Woolf, Yeats, Heaney, Ishiguro, Walcott. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 339. Introduction to Shakespeare. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Shakespeare's works as texts, productions and major historical, aesthetic and cultural touchstones. The author's intellectual and social influences on four centuries of theatre and his subsequent impact on literature and other arts. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 340. American Literature: Beginnings-1865. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The literature of the United States from its sources in the accounts of the early British and Spanish explorers to the works of the American Renaissance. The relationship between mainstream and marginalized voices in the American character. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 341. American Literature: 1865-1914. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Analysis of literary Realism and Naturalism in their cultural and historical contexts. May include such writers as Whitman, Dickinson, Twain, Chopin, James, Wharton, Dreiser, Norris, and Crane who are seen to accommodate the sense of danger, doubt, and disorder of the time. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 342. American Literature: 1914-1956. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The writers of the modern period and those of the early post-modern age, including writers marked by stylistic innovation and a willingness to challenge traditionally accepted standards. May include such writers as Hemingway, Fitzgerald, Stein, Hughes. 4 lectures. Crosslisted as ENGL/HNRS 342.  USCP

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Investigation of the primary concerns, themes, and historical, cultural, and sociopolitical contexts of literature produced by people of West Asian, East Asian, South Asian, and/or Southeast Asian descent in the United States. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); USCP; and GWR.

ENGL 349. Gender in Twentieth and Twenty-First Century Literature. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR
 USCP

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth study of issues related to male and female identity and the relations between men and women as depicted in 20th and 21st century fiction, poetry, non-fiction, and/or drama. How gender issues are created and viewed from different perspectives, such as social/economic class, ethnicity, and sexual orientation. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); USCP; and GWR.

ENGL 350. The Modern Novel. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Readings in the modern novel in its historical and cultural context. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 351. Modern Poetry. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Modern poetry, considered in its historical and cultural context. The rise of experimental styles designed to reflect the disorder of the twentieth century - fragmentation, alienation, dislocation, and the absence of connections. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 352. Modern Drama. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Reading and analysis of world drama of the last 150 years, thereby enhancing student awareness of modern culture, history, ethics, politics, and the human condition. Design work, multi-media forms, art, music, and cinema as components or informing elements of the works under consideration. 4 lectures. Crosslisted as ENGL/HNRS 352. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 354. The Bible as Literature and in Literature and the Arts. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The most important and representative books of the Bible. Exposure to works based on the Bible in literature, painting, sculpture, architecture, music, and film. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 361. Reading Instruction for the Teaching of Young Adult Literature. 5 units

Term Typically Offered: SP

Prerequisite: Junior standing; completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs). Recommended: EDUC 300.

Analysis and evaluation of young adult literature appropriate for classroom instruction in grades 6-12. Special attention paid to metacognitive strategies of making sense of text with an emphasis on pedagogical approaches. Twenty hours of fieldwork in secondary schools required. Participation in public schools requires mandated fingerprint clearance. 4 lectures, 1 activity.

ENGL 368. Theory and Practice of Peer-to-Peer Writing Instruction. 4 units

Term Typically Offered: F, W

Prerequisite: Junior standing; and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs) or consent of instructor.

Discussion and application of theories and practices central to writing center work, such as collaborative learning, the writing process, social dimensions of the peer/tutor relationship, and strategies for working with specific student populations including second-language writers and writers from across the disciplines. Recommended for those interested in becoming tutors in the Writing and Learning Center and/or new teaching assistants in English. ENGL 370. World Cinema. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Major works of international cinema with emphasis on critical interpretation, on the ways film communicates visually and aurally, and on the historical and cultural contexts in which films are created. 3 lectures, 1 laboratory. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 371. Film Styles and Genres. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Major films within particular cinematic genres or styles, with emphasis on critical interpretation, aesthetic appreciation, and the films' historical and cultural contexts. The Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures, 1 laboratory. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 372. Film Directors. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Films of one or more major film directors, with emphasis on critical interpretation, aesthetic appreciation, and the films' historical and cultural contexts. The Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures, 1 laboratory. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 373. Topics on Gender Representations in Film. 4 units

Term Typically Offered: W
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Focus on how films reinforce and challenge gender norms. Films will be studied through an intersectional lens. Attention given to technical elements of filmmaking, film criticism, and film history. The Class Schedule will list topic selected. 3 lectures, 1 laboratory. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 374. Disability and Diversity in American Film. 4 units

Term Typically Offered: F
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR
 USCP

Prerequisite: Junior standing; GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

An overview of cinematic representations of disability in film within the United States. Emphases on critical interpretation, history, aesthetics, and sociocultural contexts. Field trip may be required. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); GWR; and USCP.

ENGL 380. Literary Themes. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Literature selected according to a particular theme. Emphasis on critical interpretation, aesthetic appreciation, and historical and cultural contexts. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 380. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

ENGL 381. Diversity in Twentieth and Twenty-First Century American Literature. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR
 USCP

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Literature selected according to a particular theme, with a focus on issues of ethnicity and gender. Emphasis on critical interpretation, aesthetic appreciation, and historical and cultural contexts. The Schedule of Classes will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); USCP; and GWR.

ENGL 382. LGBT Literature and Media. 4 units

Term Typically Offered: W, SP
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR
 USCP

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Representations of lesbian, gay, bisexual, transgendered (LGBT) individuals and issues, late 19th century to the present. Topics include the closet, homophobia, coming out, AIDS, same-sex marriage, intersections of sexuality, race, class, gender identity. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); USCP; and GWR.

ENGL 386. Creative Nonfiction. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Writing creative nonfiction (the memoir, the nature essay, the personal narrative, cultural criticism, literary journalism) by adding composition skills of fictional and poetic techniques. A publication workshop. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ENGL 387. Fiction Writing. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

How to write and read fiction. Exploring and understanding the elements of fiction writing, employing models by established writers. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ENGL 388. Poetry Writing. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

How to write and read poetry. Exploring a variety of formal options, employing model poems by established writers and identifying and enhancing what is best in poetry written in class. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ENGL 390. The Linguistic Structure of Modern English. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area A with grades of C- or better.

Linguistic analysis of the English language, including phonology, morphology, syntax, and style and dialect variation. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 391. Topics in Applied Linguistics. 4 units

Term Typically Offered: F, SP

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better.

Topics in applied linguistics including sociolinguistics, first and second language acquisition, literacy, bilingualism, and dialectology. Applications to teaching the English language. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 395. History of the English Language. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A with grades of C- or better.

Linguistic approach to the history of the English language: evolution of phonology, morphology, lexicon, syntax, and semantics within the changing cultural context of the last 2000 years. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of the department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 6 units.

ENGL 408. Internship. 2-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Advanced study and part-time work experience; current innovation, practices, and problems in administration, supervision, and organization. Must be able to do independent work in career field. Weekly reports and evaluation by work supervisor required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

ENGL 411. New Media Arts I. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing; and completion of GE Area A with grades of C- or better.

Advanced-level presentation of new media theory, design and practice. Topics covered include, but are not limited to, interactivity theory, user-centered system design, cognitive psychology, media analysis, and basic web design theory. Total credit limited to 8 units. 4 lectures. Crosslisted as ENGL/HNRS 411.

ENGL 412. New Media Arts II. 4 units

Term Typically Offered: TBD

Prerequisite: ENGL 411.

Advanced level of work with the primary technologies and design/critique theories currently at use in the professional creation of new media works. Lectures and readings expand upon material presented in ENGL 411. 4 lectures. Crosslisted as ENGL/HNRS 412.

ENGL 421. Advanced Topics in Technical and Professional Communication. 4 units

Term Typically Offered: F

Prerequisite: Junior standing; ENGL 221; and ENGL 317 or ENGL 319.

Advanced inquiry into themes, genres, or applications of technical and professional communication. Required for Technical and Professional Communication Certificate Program. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

ENGL 424. Teaching English in Secondary Schools. 5 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A with grades of C- or better; Senior or graduate standing and admission to the teacher education program.

Research-based methods of teaching English in secondary schools, with emphasis on practical approaches to teaching grammar/mechanics and the writing process in a literature-based classroom. Attention to lesson and unit planning and integration of state standards and technology. 5 lectures.

ENGL 425. English Clinical Experience Seminar. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Acceptance into the Single Subject Credential Program in English. Concurrent: EDUC 469 or EDUC 479.

Principles and practices in effective teaching of English at the middle and high school level, learning theories, curriculum content and structure, classroom issues, and the teaching profession. Credit/No Credit grading only. Total credit limited to 4 units. 2 seminars.

ENGL 433. Race, Gender, and Sexuality in Early Modern English Drama. 4 units

Term Typically Offered: F

Prerequisite: Junior standing; and two of the following: ENGL 203, ENGL 204, ENGL 205, ENGL 303, ENGL 304, or ENGL 305. Recommended: ENGL 204.

Focus on representations of race, gender, and sexuality in early modern English drama, including texts by Cary, Jonson, Marlowe, Shakespeare, Sidney Herbert, and Wroth. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

ENGL 439. Topics in British Literature. 4 units

Term Typically Offered: F

Prerequisite: Junior standing and two of the following: ENGL 203, ENGL 204, ENGL 205, ENGL 303, ENGL 304, ENGL 305, ENGL 306. Recommended: English Major Sequence class in the relevant period.

Selected British writers, as individual writers or in groups. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

ENGL 449. Topics in American Literature. 4 units

Term Typically Offered: W, SP

Prerequisite: Junior standing and two of the following: ENGL 203, ENGL 204, ENGL 205, ENGL 303, ENGL 304, ENGL 305, ENGL 306. Recommended: English Major Sequence class in the relevant period.

Selected American writers, as individual writers or in groups. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

ENGL 459. Topics in Transatlantic and/or World Literature. 4 units

Term Typically Offered: F, SP

Prerequisite: Junior standing and two of the following: ENGL 203, ENGL 204, ENGL 205, ENGL 303, ENGL 304, ENGL 305, ENGL 306. Recommended: English Major Sequence class in the relevant period.

Selected world writers, as individual writers or in groups. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

ENGL 461. Senior Project. 4 units

Term Typically Offered: F, SP

Prerequisite: Senior standing; completion of the GWR; four of the following: ENGL 203, ENGL 204, ENGL 205, ENGL 303, ENGL 304, ENGL 305; and three of the following: ENGL 430, ENGL 431, ENGL 432, ENGL 439, ENGL 449, ENGL 459.

Capstone course which must be taken during the last two quarters of the student's undergraduate career.

ENGL 467. Topics in Rhetoric and Writing. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one upper-division course in GE Area C.

The study of rhetorical concepts and theories. Rhetorical analysis of various historical and contemporary texts -- including social, cultural and technological genres, compositions, and performances -- to understand how they communicate and persuade. Field trip may be required. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

ENGL 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENGL 487. Advanced Creative Writing: Fiction. 4 units

Term Typically Offered: F, W

Prerequisite: ENGL 387.

Instruction and practice in advanced writing, revising and evaluating of fiction. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 488. Advanced Creative Writing: Poetry. 4 units

Term Typically Offered: F, W

Prerequisite: ENGL 388.

Instruction and practice in advanced writing, revising and evaluating of poetry. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

ENGL 495. Topics in Applied Language Study. 4 units

Term Typically Offered: F

Prerequisite: ENGL 290 or ENGL 390.

Application of linguistics to human communications, human relations, and language policy and planning, or literature. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

ENGL 497. Theories of Language Learning and Teaching. 4 units

Term Typically Offered: F

Prerequisite: Two of the following: ENGL 290, ENGL 390, ENGL 391, ENGL 395, ENGL 495.

Theories of first and second language learning and acquisition in the context of teaching English to speakers of other languages. 4 lectures.

ENGL 498. Approaches to Teaching English to Speakers of Other Languages. 4 units

Term Typically Offered: W

Prerequisite: ENGL 497.

Approaches to teaching English to speakers of other languages. Attention to materials development and testing. 4 lectures.

ENGL 499. Practicum in Teaching English to Speakers of Other Languages. 2 units

Term Typically Offered: SP

CR/NC

Prerequisite: ENGL 498.

Practical experience in teaching English to speakers of other languages under the supervision of a cooperating classroom teacher. Teaching materials development and curriculum design. Credit/No Credit grading only. 1 seminar and supervised work.

ENGL 501. Introduction to English Studies. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing in English.

Purposes and methods of research in English studies, including literature, linguistics, rhetoric, and composition. Acquaintance with printed and on-line materials of research and practical experience in collecting material, weighing evidence, reaching conclusions, and writing scholarly articles. Discussion of areas of disciplinary specialization and ethics of scholarship. 4 seminars.

ENGL 502. Seminar in Critical Analysis. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing in English.

Basic approaches used by critics. Multiple points of view. Application to literary works. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 seminars.

ENGL 503. Graduate Introduction to Linguistics. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in English.

Introduction to linguistics for graduate students. Phonology, morphology lexicon, syntax, and variation within language; application of linguistics to real-world issues. 4 seminars.

ENGL 505. Composition Theory. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing in English.

Special problems in composition. Direct application of composition and rhetorical theory to composition instruction. 4 seminars.

ENGL 506. Pedagogical Approaches to Composition. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in English and ENGL 505, or consent of instructor. Concurrent: Teaching of ENGL 134.

Practical problems in the teaching of English composition. Application and study of practical approaches. Discussion of classroom organization and management. Discussion of research into the nature and resolution of student writing problems. Recommended for all new teaching assistants in English. 4 seminars.

ENGL 510. Seminar in Authors. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in English. Recommended: ENGL 501.

Intensive study of major British and American literary figures, singly, doubly or in small groups. Written and oral reports of individual investigation. The Class Schedule will list topic selected. Total credit limited to 16 units. 4 seminars.

ENGL 511. Seminar in American Literature. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing in English. Recommended: ENGL 501.

American periods. Written and oral reports of individual investigation. The Class Schedule will list topic selected. Total credit limited to 20 units. 4 seminars.

ENGL 512. Seminar in British Literature. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing in English. Recommended: ENGL 501.

British periods. Written and oral reports of individual investigation. The Class Schedule will list topic selected. Total credit limited to 20 units. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

ENGL 513. Seminar in Special Topics. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing in English. Recommended: ENGL 501.

Themes and ideas in language and literature not ordinarily covered in the routine graduate course offerings. Written and oral reports of individual investigation. The Class Schedule will list topic selected. Total credit limited to 16 units. 4 seminars.

ENGL 515. Apprenticeship in Teaching Literature, Composition, or Linguistics at College Level. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing in English and 8 units of successful graduate work.

Supervised experience in planning, teaching, and evaluating a 100-, 200- or 300-level linguistics, composition, or literature class taught by English faculty member. Planning, selecting texts, conferring with students, discussing and constructing assignments, lecturing, leading small group discussions. Credit/No Credit grading only. Total credit limited to 8 units.

ENGL 518. Graduate Technical Communication. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Introduction to technical communication scholarship for graduate students. Addresses usability, visual theory, information design, technical editing, and writing for professional and public audiences. Analysis and critique of technical communication documents. 4 seminars.

ENGL 519. Seminar in Rhetoric and Writing. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in English; and ENGL 505.

Themes and ideas in rhetoric and composition not ordinarily covered in the routine graduate course offerings. Written and oral reports of individual investigation. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

ENGL 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

ENGL 590. Directed Study. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in English and the permission of the graduate advisor.

Supervised independent or group study of special problems in selected areas of language, composition, or literature. Total credit limited to 12 units.

ENGL 598. Graduate Project. 2 units

Term Typically Offered: F, SP

Prerequisite: Consent of graduate advisor; ENGL 501; ENGL 502; ENGL 503; and ENGL 505.

Development, revision, and conclusion of a portfolio of graduate writing in literary criticism, linguistics, rhetoric, and/or composition. Students engage in research and present their completed projects to the graduate advisor. To be taken in the final term of the graduate program. 2 seminars.

Environmental Design (EDES)

undefined

EDES Courses

EDES 101. Introduction to Architecture and Environmental Design. 2 units

Term Typically Offered: TBD

Familiarization with the professional fields of architecture, landscape architecture, structural engineering, construction, and city planning. Introduction to the college's programs as they relate to individual aptitudes. The design process. Visiting speakers. 2 lectures.

EDES 123. Principles of Environmental Design. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Sustainability Related

Recommended: ARCH 131 for Architecture major.

How design relates and impacts environmental and social justice, equity, identity, community, and well-being. Design thinking, process, and tools in describing and planning the built environment. Divergent and inclusive thinking, engaging multiple publics, and expert knowledge in planning and design. Course may be offered in classroom-based or online format. 2 lectures, 2 discussions. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

EDES 350. The Global Environment. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

EDES 406. Sustainable Environments. 4 units

Term Typically Offered: F

Sustainability Focused

Prerequisite: Fourth year or graduate standing.

Collaboration of interdisciplinary faculty and guest speakers/panelists. Introduction, illustration and analysis of concepts and principles for sustainability to be used in all aspects of environmental design. Integration and application of knowledge of human and natural systems with environmental, social and economic concerns, from a global-to-local perspective. 4 lectures.

EDES 408. Implementing Sustainable Principles. 4 units

Term Typically Offered: W, SP

Sustainability Focused

Prerequisite: EDES 406.

A primarily project-based course, intended to aid students who wish to collaborate with the purpose of implementing sustainability principles by developing tools, process or designs, for community-based projects and proposals at various scales of planning, architecture and design of the human environment to address social, environmental and economic issues. 4 lectures.

EDES 410. Advanced Implementation of Sustainable Principles. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: EDES 408.

Advanced continuation of community-based projects defined and initiated in EDES 408. Ongoing projects, individual and group, address variable scales of planning, architecture, and environmental design, with required completion at the end of the course. 2 seminars and supervised work.

Environmental Engineering (ENVE)

undefined

ENVE Courses

ENVE 111. Introduction to the Environmental Engineering Profession. 1 unit

Term Typically Offered: F

CR/NC

Introduction to the Environmental Engineering Program including course planning, opportunities for global and regional problems such as water quality, waste management, and sustainability. Credit/No Credit grading only. 1 activity.

ENVE 264. Environmental Fluid Mechanics. 4 units

Term Typically Offered: F

Prerequisite: MATH 241, PHYS 132, and ME 211.

Theory and application of fluid statics and fluid dynamics to environmental problems in air and water systems. Fluid properties, pressure within stationary and moving systems, fluid momentum, pipe and channel flow including Bernoulli's Equation and friction effects, flow measurement systems. 4 lectures.

ENVE 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENVE 304. Process Thermodynamics. 3 units

Term Typically Offered: W

Corequisite: CHEM 125 or CHEM 129; ENVE 331.

First and second laws of thermodynamics, properties of gases, liquids and mixtures, vapor-liquid equilibria, solubility and absorption, equilibrium in chemical reactions, thermodynamic applications in environmental engineering. 3 lectures.

ENVE 309. Noise and Vibration Control. 3 units

Term Typically Offered: W

Prerequisite: MATH 241 and PHYS 132.

Impact of noise and methods for noise reduction in industrial environments. Behavior of sound waves, selection of instrumentation, practical measurements, criteria for noise and vibration control. Laboratory and field measurements to investigate the basic principles of sound propagation and control. Assessment of noise produced by transportation and other engineering facilities. 2 lectures, 1 laboratory.

ENVE 323. Engineering for the Environment. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B1 and one course in GE Area B4 with grades of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Societal importance of air and water quality and land resources. Pollutant transport and treatment technologies, including the scientific basis for these technologies. Local examples of applied pollution control technologies to meet regulatory requirements. Field trip required. Not for engineering majors. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ENVE 324. Introduction to Air Pollution. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course each in GE Areas B1, B2, and B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Causes and effects of air pollution on the individual, the community and industry. Legal and economic aspects. For non-majors. Not open to students in engineering or computer science. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ENVE 325. Air Quality Engineering. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: CHEM 125 or CHEM 128.

Causes and effects of air pollution on individual, regional, and global scales including meteorology, pollutant chemistry, global and regional transport, health impacts, regulations, air pollution control technology, and global climate change. Engineering principles to understand, model, and predict air quality. 4 lectures.

ENVE 331. Fundamentals of Environmental Engineering. 4 units

Term Typically Offered: F, W, SP

Sustainability Related

Prerequisite: CHEM 125 or CHEM 128, MATH 242 or MATH 244 (or concurrent).

Description and quantification of water and air quality characteristics important for water and wastewater treatment and air pollution control. Fundamentals of kinetics, reactor configurations, toxicity and dose-response relationship. Regulations governing ambient pollutant levels and discharges. Introduction to the modeling of pollutant fate and transport. Overview of solid waste management and global environmental issues. Course may be offered in classroom-based or online format. 4 lectures.

ENVE 400. Special Problems. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

ENVE 405. Environmental Engineering Research. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor. Recommended: Prior or concurrent enrollment in ENVE 434 and ENVE 438.

Participation in environmental engineering research projects with emphasis on professional safety procedures for lab and field work and data quality assurance/quality control. Research projects focus on developing technologies or techniques that improve the sustainability of environmental engineering infrastructure. Total credit limited to 8 units; technical elective credit limited to 4 units. 1 laboratory.

ENVE 407. Environmental Engineering Design Competition. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: consent of instructor. Recommended: ENVE 331.

Design, build, test, and present a solution to an environmental problem posed by a student design competition. 1 laboratory. Total credit limited to 4 units.

ENVE 411. Air Pollution Control. 4 units

Term Typically Offered: F

Prerequisite: CE 251 or CSC 231; ENVE 304 or ME 302; ENVE 264 or ME 341; ENVE 325; and ENVE 331.

Theory, principles, and practices related to the control of particulate and gaseous emissions. Mechanical and chemical separations. Cost and design of control systems. 4 lectures.

ENVE 421. Mass Transfer Operations. 4 units

Term Typically Offered: SP

Prerequisite: ENVE 325, ENVE 331, ENVE 304 or ME 302, ENVE 264 or ME 341.

Theory of mass transfer principles applied to environmental problems. Diffusion and dispersion modeling of contaminant transport. Design principles of scrubbers, absorbers, and membrane systems for air and water pollution control. 4 lectures.

ENVE 426. Air Quality Measurements. 3 units

Term Typically Offered: SP

Prerequisite: ENVE 325, CHEM 212/312, ENVE 264 or ME 341, and STAT 312.

Planning and conducting air quality measurements in the atmosphere, indoors and at the source. Topics include quality control, calibration, and instrument operation for particulate matter, gas and meteorological measurements. 2 lectures, 1 laboratory.

ENVE 434. Water Chemistry and Water Quality Measurements. 4 units

Term Typically Offered: W

Prerequisite: CHEM 125 or CHEM 129, ENVE 330 or ENVE 331.

Aquatic environmental chemistry and water quality measurements. Equilibrium chemistry, carbonate systems, redox reactions, and electrochemistry. Laboratories include topics such as measurement of suspended solids, turbidity, alkalinity, BOD, and coliform detection. Quality analysis and control. 3 lectures, 1 laboratory.

ENVE 436. Introduction to Hazardous Waste Management. 4 units

Term Typically Offered: SP

Sustainability Related

Prerequisite: ENVE 325 and ENVE 331.

Overview of hazardous waste generation, federal and state regulations, storage, transport, treatment, and remediation. Principles of toxicology, unit operations and processes for the treatment, reduction, and remediation of wastes. Ultimate disposal including incineration, solidification, and bioremediation 4 lectures.

ENVE 438. Water and Wastewater Treatment Design. 3 units

Term Typically Offered: SP

Prerequisite: ENVE 331 and ME 341 or ENVE 264.

Theory and design of facilities for physical and chemical treatment of water and wastewater, biological treatment of wastewater, and treatment and disposal of sludge. 3 lectures.

ENVE 439. Sustainable Solid Waste Engineering. 4 units

Term Typically Offered: W

Prerequisite: ENVE 325 and ENVE 331; or graduate standing.

Design and analysis of recycling, composting, anaerobic digestion, gasification, and combustion systems for the recovery of resources and energy from solid wastes. Field trips required. 3 lectures, 1 laboratory.

ENVE 443. Bioremediation Engineering. 4 units

Term Typically Offered: SP

Prerequisite: ENVE 331.

State-of-the-art bioremediation technologies for soil, groundwater and contaminated air stream remediation and pollution prevention. Introduction to engineering design combining biogenetics, reactor configuration, and basic biological and engineering principles. Various in-situ and ex-situ technologies. Field trip may be required. 3 lectures, 1 laboratory.

ENVE 450. Industrial Pollution Prevention. 4 units

Term Typically Offered: F

Sustainability Focused

Prerequisite: ENVE 331.

Theory and case studies of innovative industrial waste minimization and resource conservation through principles of pollution prevention. Life-cycle assessment, pollution prevention, economic analysis, and sustainable designs. 3 lectures, 1 laboratory.

ENVE 455. Environmental Health and Safety. 4 units

Term Typically Offered: W

Prerequisite: ENVE 331.

Physical, chemical and biological hazards associated with industrial processes. Toxicology. Safety analysis and design. Causes and prevention of occupational and environmental hazards. Development and implementation of industrial hygiene programs. 4 lectures.

ENVE 466. Senior Project Design Laboratory I. 2 units

Term Typically Offered: W

Prerequisite: ENVE 438, CE 336 and senior standing. Corequisite: CE 465.

Capstone team project on a complex, integrated design problem typical of the environmental engineering profession. Formal reports and presentations are prepared. Non-technical issues addressed: ethics, teamwork, leadership, communication, and professional practice. 2 laboratories.

ENVE 467. Senior Project Design Laboratory II. 2 units

Term Typically Offered: SP

Prerequisite: ENVE 466.

Continuation of ENVE 466. Continuation of capstone project by individuals or teams with submission of final reports and presentations 2 laboratories.

ENVE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ENVE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ENVE 480. Environmental Engineering of Energy. 4 units

Term Typically Offered: F

Prerequisite: ENVE 304 or ME 302; ENVE 331. Recommended: ENVE 325.

Environmental impacts of conventional and renewable energy production and of emerging renewable energy development. Environmental engineering methods for mitigation of impacts of fossil fuel processing, including hydrofracking. Greenhouse gas inventory and management. Field trips required. 3 lectures, 1 laboratory.

ENVE 490. Environmental Nanotechnology. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: ENVE 331 or MATE 370; and CHEM 125. Recommended: ENVE 421.

Nanotechnology basics, unique properties of nanomaterials, synthesis and characterization of nanomaterials from an environmental life-cycle perspective, environmental remediation using nanomaterials, environmental fate, transport, and toxicity of nanomaterials, sustainable nanotechnology, nanotechnology ethics and regulations, and careers in nanotechnology. 3 lectures, 1 laboratory.

ENVE 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

ENVE 500. Individual Study. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of department chair.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Total credit limited to 4 units.

ENVE 525. Indoor Air Quality Engineering. 4 units

Term Typically Offered: TBD

Prerequisite: ENVE 264 or ME 341; senior or graduate standing.

Recommended: ENVE 325.

Pollutants sources and sinks indoors, transport processes, ventilation, and engineering controls. Human factors and engineering factors that influence the quality of the indoor environment. 4 lectures.

ENVE 535. Physico-Chemical Water and Wastewater Treatment. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

Physical and chemical processes used in potable water treatment and advanced wastewater treatment. Coagulation, flocculation, sedimentation, filtration, membrane separation, disinfection, and absorption. Wastewater recycling regulations. Integration of treatment processes. 4 lectures.

ENVE 536. Biological Wastewater Treatment Processes Engineering. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing or consent of instructor.

Fundamentals of biological wastewater treatment. Suspended and attached growth bioreactors. Activated sludge, biotower, and anaerobic process design. Biological nutrient removal. 4 lectures.

ENVE 537. Decentralized Wastewater Management. 4 units

Term Typically Offered: SP

Prerequisite: ENVE 438 or Graduate standing.

Design and management of decentralized wastewater treatment systems. Septic tanks, aerobic nutrient removal systems, ponds, constructed wetlands, and improved latrines; surface and subsurface effluent recycling or disposal; and septage management. 4 lectures.

ENVE 540. Advanced Membrane Technology and Applications. 4 units

Term Typically Offered: W

Prerequisite: ENVE 421 or graduate standing. Recommended: ENVE 438.

Membrane materials, structure, and fabrication. Membrane transport theory, performance factors, monitoring, and control. Mathematical modeling of membrane operations, design using WAVE, IMS and computational fluid dynamics. Desalination plant design, energy, and cost analyses. Membranes applications in water and energy. Field trip required. 3 lectures, 1 laboratory.

ENVE 542. Sustainable Environmental Engineering. 4 units

Term Typically Offered: W

Prerequisite: Graduate or senior standing or consent of instructor.

Critical analysis of environmental engineering practices such as solid waste management, recycling, and wastewater treatment from the viewpoint of energy efficiency, lifecycle cost, and sustainability. Both laboratory experiments and computer models to assess sustainability. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

ENVE 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1-4 seminars.

ENVE 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ENVE 581. Biochemical Engineering. 4 units

Term Typically Offered: TBD
Prerequisite: CHEM 312 and MCRO 221.

Types of microorganisms and microbially-mediated biochemical reactions for biotechnology applications. Stoichiometric and thermodynamic principles for microbial growth and metabolism. Material and energy balances for aerobic and anaerobic growth and bioreactor design. Kinetics of enzyme catalyzed reactions. Field trips required. 3 seminars, 1 laboratory. Crosslisted as ENGR/ENVE 581.

ENVE 599. Design Project (Thesis). 1-9 units

Term Typically Offered: F, W, SP
Prerequisite: Graduate standing.

Each individual or group will be assigned a project for solution under faculty supervision as a requirement for the master's degree, culminating in a written report/thesis.

Environmental Sciences (ESCI)

undefined

ESCI Courses

ESCI 500. Individual Study. 1-4 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Advanced independent study planned and completed under the direction of a member of the NRES department faculty. Open only to graduate students who have demonstrated ability to do independent work. Total credit limited to 16 units; with a maximum of 4 units per quarter. Formerly NR 500.

ESCI 501. Research Planning. 4 units

Term Typically Offered: F, W
Prerequisite: Senior standing.

Problem solving and research planning for agriculture, natural resources and related sciences. Preparation of study plans that identify problems, review appropriate literature, formulate objectives, develop methods and provide for presentation and interpretation of results. Oral reports. 4 lectures. Formerly SS 501.

ESCI 502. Research Methods and Data Analysis. 4 units

Term Typically Offered: W
Prerequisite: Graduate standing or consent of instructor; ESCI 501; and STAT 217.

Quantitative and qualitative survey of research methods for environmental science and management including research design, sampling, data collection, analysis, and interpretation. 3 lectures, 1 laboratory.

ESCI 539. Graduate Internship in Environmental Sciences and Management. 2-4 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: Graduate standing.

Independent internship experience conducted under faculty supervision focusing on a discipline area of environmental science/management. Total credit limited to 4 units. Credit/No Credit grading only. Minimum of 60-120 hours required.

ESCI 550. Advanced Environmental Science. 4 units

Term Typically Offered: F
Prerequisite: Graduate standing or consent of instructor. Recommended: An environmental science/management course.

Advanced study of earth system processes and environmental problems. Advanced application of systems thinking to study of energy, geologic systems, groundwater and surface water resources, soils, environmental pollution and degradation, atmospheric and ocean dynamics, and the global climate system. 3 lectures, 1 activity.

ESCI 581. Graduate Seminar in Environmental Sciences. 2 units

Term Typically Offered: SP
Prerequisite: Consent of instructor.

Student study and presentation of selected developments, trends and problems in environmental science, forest and natural resources, earth and soil sciences, and environmental management. Total credit limited to 4 units. 2 seminars. Formerly NR/SS 581.

ESCI 590. Advanced Environmental Management. 4 units

Term Typically Offered: W
Prerequisite: Graduate standing or consent of instructor; and ESCI 501.
Recommended: An environmental science/management course.

Scientific principles of environmental issues and environmental management practices focusing on sustainable development and systems thinking centered around the health of humans and ecosystems. Analysis of fundamental and emerging environmental factors that impact management practices. 3 lectures, 1 activity.

ESCI 596. Environmental Sciences and Management Project. 5 units

Term Typically Offered: SU
Prerequisite: Graduate standing or consent of instructor; ESCI 502; ESCI 550; ESCI 581; and ESCI 590.

Individual research or study toward a professional project that leads to an improved understanding of the physical environment, solution of an environmental problem, natural resources management, or an improved interaction between society and the natural environment. 5 lectures.

ESCI 599. Thesis. 1-9 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Consent of instructor.

Individual research in environmental science, environmental management under the general supervision of faculty, leading to a graduate thesis. Degree credit limited to 9 units. Formerly NR 599.

Ethnic Studies (ES)

undefined

ES Courses

ES 112. Race, Culture, and Politics in the United States. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: GE Area D1

2019-20 or earlier catalog: GE Area D1

USCP

Interdisciplinary study of race and ethnicity as created by historical processes and American institutions (social, political, economic, legal and cultural institutions). Attention to interlocking systems of race, class, gender and sexuality. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/HNRS 112. Fulfills GE D1 and USCP.

ES 114. Introduction to Ethnic Studies. 4 units

Term Typically Offered: W

USCP

Racial equality movements, including the history of Ethnic Studies (1960's & 70's), and the social practices, institutions, cultural representations/discourses, and public policies that construct and reinforce racism, racist ideology, and pseudo-scientific conceptions of race and intersections with gender and class. 4 lectures. Fulfills USCP.

ES 134. Writing & Rhetoric. 4 units

Term Typically Offered: F

2020-21 or later catalog: GE Area A2

2019-20 or earlier catalog: GE Area A1

Writing and rhetorical strategies and practices that produce sound academic writing; foregrounds a process-based, recursive approach to writing. 4 Lectures. Fulfills GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

ES 145. Reasoning, Argumentation, & Writing. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area A3

2019-20 or earlier catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog). Recommended: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for student on the 2019-20 or an earlier catalog).

Principles of reasoning and argumentation. Application of these principles to written and oral communication. Effective use of research methods and sources. 4 lectures. Fulfills GE Area A3 with a grade of C- or better.

ES 200. Special Problems. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Supervised investigation, including a written report, of a topic chosen with prior approval of instructor. Total credit limited to 4 units.

ES 215. Planning for and with Multiple Publics. 4 units

Term Typically Offered: SP

USCP

Prerequisite: Completion of GE Area D1. Recommended: ES 112.

How the social/spatial relationships among racial/ethnic and gender groups are expressed in terms of human settlement patterns, civic involvement and everyday negotiations. Ways in which segregation and marginalization are expressed in western and non-western contexts. 4 lectures. Crosslisted as CRP/ES 215. Fulfills USCP.

ES 252. Global Origins of Race in the U.S.. 4 units

Term Typically Offered: F, W, SP

GE Area F: Ethnic Studies

Explores global origins of race in the U.S. including forced slavery, removal, displacement, and migration of Native Americans, Latinas/os, African Americans, and Asian Americans. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/HNRS 252. Fulfills GE Area F.

ES 253. Introduction to American Indian Studies. 4 units

Term Typically Offered: F, W, SP

GE Area F: Ethnic Studies

Introduction to social, political, economic, legal, and cultural traditions of American Indians in the U.S. Special attention to the interlocking systems of race, class, gender, and sexuality. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area F.

ES 254. Introduction to African American Studies. 4 units

Term Typically Offered: F, W, SP

GE Area F: Ethnic Studies

Introduction to social, political, economic, legal, and cultural traditions of African Americans in the U.S. Special attention to the interlocking systems of race, class, gender, and sexuality. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area F.

ES 255. Introduction to Latino/a/x Studies. 4 units

Term Typically Offered: F, W, SP

GE Area F: Ethnic Studies

Introduction to social, political, economic, legal, and cultural traditions of Chicanas/os and Latinas/os in the U.S. Special attention to the interlocking systems of race, class, gender, and sexuality. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area F.

ES 256. Introduction to Asian American Studies. 4 units

Term Typically Offered: F, W, SP

GE Area F: Ethnic Studies

Introduction to social, political, economic, legal, and cultural traditions of Asian Americans in the U.S. Special attention to the interlocking systems of race, class, gender, and sexuality. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area F.

ES 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ES 300. Chicano/a Non-Fiction Literature. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Overview of contemporary Chicano/a non-fiction literature since 1848. Thematic concerns, literary criticism, literary techniques, historical and socio-cultural factors influencing non-fiction Chicano/a literary genres. Instructor reserves option to select non-fiction genres to be studied. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 301. Latina/o Literature of the United States. 4 units

Term Typically Offered: F, W
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Latina/o literature written by/for/about Latinas/os in the United States. Topics include literary representation of Latinos/as in the U.S. related to race/ethnicity, gender, sexuality, class, etc. Primary focus on Latina/o literary texts in the mid 20th to early 21st centuries. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 302. Chicana/o Literature. 4 units

Term Typically Offered: W, SP
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Chicana/o literature written by/for/about Chicanas/os in the United States. Topics include literary representation of Chicanos/as in the U.S. related to race/ethnicity, gender, sexuality, class, etc. Primary focus on Chicana/o literary texts in the mid 20th to early 21st centuries. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 303. Latina/o Poetry and Politics. 4 units

Term Typically Offered: SP
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Significant Latinx/a/o poetry and poetics from the 19th century to the present. Topics include genre, form, content, politics, and poetics of Latina/o writers of poetry; comparisons/contrasts of different Latina/o ethnic poets and their poetry in different historical periods. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 304. Race & American Literature. 4 units

Term Typically Offered: W, SP
 GE Area F: Ethnic Studies

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on 2019-20 or earlier catalogs).

Comparative approach to the Native American, African American, Asian American and Latina/o literary canons. 4 lectures. Fulfills GE Area F.

ES 308. Fire and Society. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Prehistorical and historical record of human use of and attitude toward fire. Mythology and religion of fire. Traditional, cultural and ethnic variations and their influence on modern U.S. institutions involved in managing fire. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ES/NR 308. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ES 310. Hip-Hop, Poetics and Politics. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

Dynamics of hip-hop culture, its historical development, political significance, and social influence. How hip-hop exemplifies cross-cultural hybridization within not only Black communities nationally and internationally, but also amongst indigenous, Latino/a, and Asian peoples in the U.S. and beyond. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 311. Beyoncé: Race, Feminism and Politics. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; completion of GE Area D1; and completion of one USCP course.

Employing an Ethnic Studies lens, Beyoncé body of work and image will serve as a lens through which to explore pop constructions and representations of race, gender, and sexuality as well as the use of those intersecting identities as political tools. 4 lectures.

ES 312. Race & Media Studies. 4 units

Term Typically Offered: W, SP

GE Area F: Ethnic Studies

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on 2019-20 or earlier catalogs).

Engagements with qualitative analysis, social, cultural, and political theories, and power relations related to the representations of Native Americans, African Americans, Asian Americans and Latinas/os in the contemporary mass media in the United States. 4 lectures. Fulfills GE Area F.

ES 320. African Americans in Popular Culture. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

Cultural studies analysis of the representations of, and counter-representations by, American racial/ethnic groups, with particular emphasis on African Americans. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 321. Native Americans in Popular Culture. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

Cultural studies analysis of the representations of, and counter-representations by racial/ethnic groups, with particular emphasis on Native Americans. The cultural images of Native peoples in the United States that have characterized relationships. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 322. Asian Americans in Popular Culture. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

Cultural studies analysis of the representations of, and counter-representations by, American racial/ethnic groups, with particular emphasis on Asian-Americans. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 323. Latina/os in Popular Culture. 4 units

Term Typically Offered: F, W, SU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

Cultural studies analysis of the representations (racializing images and discourses) of, and counter-representations by, American cultural/ethnic groups with particular emphasis on Mexican Americans/Latinos. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 324. Chicana/o Film. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Exploration of how Chicanas/os and their experiences are represented in major films by/for/about them in the United States. Topics include visual/popular culture and film theories, race and representation; film genre; key film concepts. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 325. African American Gender & Sexuality. 4 units

Term Typically Offered: TBD

USCP

Prerequisite: One lower-division course in GE Area D. Recommended: ES 112 or ES 212.

Issues around genders and sexualities that influence the social, political, economic and cultural development of Black America, and challenging anti-Black thought on Black sexual expression. Special attention given to racism, intersectionality, and myths about Black sexuality and gender conventions. 4 lectures. Fulfills USCP.

ES 326. Native American Architecture and Place. 4 units

Term Typically Offered: W
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The role of culture and setting in the construction of spatial, material and landscape concepts and artifacts, through the introduction of selected North American cultures, with focus from 1300 AD through contemporary time. 4 lectures. Crosslisted as ARCH/ES 326. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 330. The Chinese American Experience. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

History and current status of Chinese Americans, with emphasis on the international contexts, organizations and institutions of Chinese America, and on Chinese Americans' demographic compositions, spatial patterns, and cultural, socioeconomic, and political adaptation experiences. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 335. The Filipina/o American Experience. 4 units

Term Typically Offered: W
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D.

An interdisciplinary examination of the historical development of Filipina/o American identities and communities. The social, cultural and political institutions that have influenced Filipina/o immigration, participatory citizenship, activism and cultural practices. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 340. Cultural Production and Ethnicity. 4 units

Term Typically Offered: F, W, SU
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C. Recommended: Completion of an Ethnic Studies (ES) course.

Culture and ethnicity as key factors in the production, perception, and interpretation of art and the humanities. Critical analysis of cultural attitudes and knowledge in expressive arts and cultural production, and of the contexts of cultural production as reflective of ethnicity. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ES 345. Queer Ethnic Studies. 4 units

Term Typically Offered: F, W
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Theories, research and methods focused on the interlocking systems of sexuality, race, racialization, and ethnicity in local, national and comparative global/transnational contexts. Relationships between racialization and heteronormativity; queer of color critique; queer migration; decolonizing queer organizing, theory, and knowledge production. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/WGQS 345. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 345.

ES 350. Gender, Race, Culture, Science & Technology. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area B
 2019-20 or earlier catalog: GE Area B5, B6, or B7
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: STAT 130, 217, 218, 251, 301, 312, or 321.

Examines the complex relationships between gender, race, culture, science, and technology via intersectional quantitative and qualitative inquiry, centering the perspectives/contributions of historically marginalized people in the U.S. Explores, evaluates, and develops proposals to create more diverse, equitable, ethical, humane science/technology. Course may be offered in classroom-base, online, or hybrid format. 3 lectures, 1 activity. Crosslisted as ES 350/HNRS 353/WGQS 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog); and USCP. Formerly WGS 350.

ES 351. Gender, Race, Class, Nation in Global Engineering, Technology & International Development. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Cross-cultural exploration of the intersections of gender, race, class, nation in the global engineering workforce, small- and large-scale technological systems, and international development programs; special attention to 21st century challenges and efforts to create more socially responsible engineering and technology. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/WGQS 351. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly WGS 351.

ES 360. Ethnicity and the Land. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C. Recommended: Lower-division Ethnic Studies (ES) course and introductory natural resources course.

Comparative study of how race and culture shape landscapes, and how social hierarchies allocate the use of natural resources and the burdens of environmental pollution. 4 lectures. Crosslisted as ES/NR 360. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

ES 380. Critical Race Theory. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

History and evolution of the critical race theory movement. Defining issues of the field; in particular, the relationship between race, power and the law. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 381. The Social Construction of Whiteness. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: Lower-division Ethnic Studies (ES) course in GE Area D..

The investigation of the social construction of race in the United States through historicizing the category of 'whiteness.' Why 'white' was invented as a racial category and how white privilege has been sustained through social, political, economic and legal practices. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

ES 382. Racial Capitalism. 4 units

Term Typically Offered: W, SP

GE Area F: Ethnic Studies

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Advanced investigation of the theoretical and historical linkages between race, economic exploitation, and struggles for liberation. 4 lectures. Fulfills GE Area F.

ES 390. Research Methodology in Comparative Ethnic Studies. 4 units

Term Typically Offered: F

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; STAT 217; ES 112; and three courses from ES 241, ES 242, ES 243, ES 244.

Theory and practice of research methodology in comparative ethnic studies. Topics include the scientific method, qualitative and quantitative methodologies, and ethical practices. Research report prepared from start to finish, including database searching, collecting pilot data, and proper formatting of a research report. Issues of race in research practice and use foregrounded throughout. 3 lectures, 1 activity.

ES 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of department chair.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 4 units.

ES 406. Indigenous Peoples and International Law and Policy. 4 units

Term Typically Offered: TBD

Prerequisite: ES 253; and NR 141 or NR 142; and junior standing required.

Interdisciplinary examination of the evolution of international law effecting indigenous peoples in the U.S. and in the Americas. Development of international legal and sociological norms and their impact on human rights of indigenous peoples with particular attention to environmental issues. 4 lectures. Crosslisted as ES/NR 406.

ES 410. Advanced Topics in Comparative Ethnic Studies. 4 units

Term Typically Offered: TBD
Prerequisite: ES 390.

Selected topics and issues in comparative ethnic studies. The Class Schedule will list topic selected. Repeatable for a maximum of 8 units. 4 seminars.

ES 450. Fieldwork in Comparative Ethnic Studies. 4 units

Term Typically Offered: W
Prerequisite: ES 390.

Supervised project based on fieldwork in comparative ethnic studies. 4 seminars.

ES 461. Senior Project. 4 units

Term Typically Offered: SP
Prerequisite: ES 390 and departmental approval.

Completion of a project under faculty supervision. Results presented in a formal paper or project.

ES 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: At least one course in Ethnic Studies and consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1-4 lectures.

Fire Protection Engineering (FPE)

undefined

FPE Courses

FPE 500. Individual Study. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of graduate coordinator and supervising faculty member.

Advanced study planned and completed under the direction of a member of the program faculty. Open only to graduate students in the FPE program who have demonstrated ability to do independent work. FPE 500 must be taken as a 4-unit class when substituting for a required course in the FPE program.

FPE 501. Fundamental Thermal Sciences. 4 units

Term Typically Offered: F
Prerequisite: Graduate standing or consent of instructor.

Introduction to the thermal sciences, including thermodynamics, fluid dynamics and heat transfer, as they relate to fire protection engineering. Includes 1st and 2nd laws of thermodynamics, conservation relations, hydrostatics, internal and external flows, and heat transfer by conduction, convection and radiation. 4 lectures.

FPE 502. Fire Dynamics. 4 units

Term Typically Offered: W
Prerequisite: FPE 501 or consent of instructor.

First exposure to fire dynamics phenomena. Includes fundamental fire and combustion topics such as thermodynamics of combustion, fire chemistry, premixed and diffusion flames, ignition, burning of liquids and solids, heat release rates, flame spread and fire plumes. 4 lectures.

FPE 503. Flammability Assessment Methods. 4 units

Term Typically Offered: SP
Prerequisite: FPE 502.

Characterization of flammability properties of gaseous, liquid and solid materials. Fire test methods for evaluating flammability properties of materials and burning characteristics of products. Overview of regulatory requirements for restricting the flammability of products and materials used in buildings. 4 lectures.

FPE 504. Fire Modeling. 4 units

Term Typically Offered: SU
Prerequisite: FPE 502, FPE 503.

Fire modeling techniques for fire safety assessment. Application of various engineering correlations and computer-based fire models, including zone models and computational fluid dynamics models, to representative fire problems. 4 lectures.

FPE 521. Egress Analysis and Design. 4 units

Term Typically Offered: F
Prerequisite: Graduate standing or consent of instructor.

Regulatory requirements for egress systems in buildings, including occupancy classifications, occupant loads, means of egress components and exit capacities. Introduction to human behavior in fire and to methods for calculating people movement under emergency conditions, including computer-based evacuation models. 4 lectures.

FPE 522. Fire Detection, Alarm and Communication Systems. 4 units

Term Typically Offered: SP
Prerequisite: Graduate standing or consent of instructor.

Analysis of the operating characteristics of fire detection devices and alarm notification appliances. Introduction to modern fire alarm systems and components. Introduction to mass communication systems. Current installation and approval standards. 4 lectures.

FPE 523. Water-based Fire Suppression. 4 units

Term Typically Offered: W
Prerequisite: Graduate standing.

Analysis and design of water-based fire suppression systems, including water supply analysis and hydraulic calculations. Overview and design considerations for automatic sprinkler, water spray, water mist and foam suppression systems. Typical contemporary installations and current installation and approval standards. 4 lectures.

FPE 524. Structural Fire Protection. 4 units

Term Typically Offered: SU
Prerequisite: Graduate standing or consent of instructor.

Regulation and analysis procedures for structural components of wood, steel, concrete, composites. Structural capabilities, modifications under fire induced exposures. Calculation methods for predicting fire resistance of structural components. Definition of types of building construction. 4 lectures.

FPE 551. Fire Safety Regulation and Management. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

Use of model building and fire codes, administrative regulation, retrospective codes, performance-based codes, and risk-based regulation to manage fire safety. Identification and application of different fire risk management tools and techniques. 4 lectures.

FPE 552. Smoke Management and Special Hazards. 4 units

Term Typically Offered: W

Prerequisite: FPE 502 and FPE 504.

Analysis and design of smoke management systems. Assessment of smoke hazards. Identification of special hazards. Analysis and design of fire suppression systems used for fire control of special hazards, including gaseous and chemical agents and systems. 4 lectures.

FPE 554. Forensic Fire Analysis. 4 units

Term Typically Offered: SP

Prerequisite: Consent of graduate coordinator and instructor.

Recommended: FPE 504.

Introduction to the processes of fire investigation and reconstruction. Engineering analysis of structural and wildland fires. Identification of failure mechanisms in fire safety systems. Case studies of actual fire incidents to address and reinforce concepts related to different types of system and performance failures. 4 lectures.

FPE 555. Fire Protection Management in the Wildland-Urban Interface (WUI). 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor. Recommended: LA/NR 318 and NR 340.

Social, economic, political, and technological issues affecting fire management in urbanized landscapes where fire continues its ecological role. Fire risk analysis; needs assessment, legislative codes, standards and policies; liability issues; evacuation; incident response planning. 3 lectures, 1 laboratory.

FPE 593. Curricular Practical Training (CPT) for Fire Protection Engineering. 1-5 units

Term Typically Offered: SU

Prerequisite: Consent of Graduate Coordinator.

Curricular Practical Training (CPT) to gain work experience directly related to fire protection engineering. Intended for international students. CPT work authorization is required for all paid or non-paid, part- or full-time employment and internships. Total credit limited to 5 units.

FPE 596. Culminating Experience in Fire Protection Engineering. 1-5 units

Term Typically Offered: W, SP

Prerequisite: FPE 504, advanced graduate standing, completion of, or concurrent enrollment in, engineering courses in program, and consent of instructor.

Performance of comprehensive fire and life safety evaluations of buildings and other structures. Communication of the results and findings of such evaluations in written report and by oral presentation. Conducted under supervision of faculty.

FPE 599. Design Thesis. 1-9 units

Term Typically Offered: TBD

Prerequisite: Consent of graduate coordinator and graduate standing.

Each individual will be assigned a thesis project for solution under faculty supervision as a requirement for the master's degree, culminating in a written thesis.

Food Science and Nutrition (FSN)

undefined

FSN Courses

FSN 101. Orientation to the Nutrition Major. 1 unit

Term Typically Offered: F

CR/NC

Understanding the depth and breadth of the Nutrition program. Emphasis on academic and career planning. Students are required to complete this course within their first year in the major. Credit/No Credit grading only. 1 lecture.

FSN 102. Orientation to the Food Science Major. 1 unit

Term Typically Offered: F

CR/NC

Understanding the depth and breadth of the Food Science program. Emphasis on the Food Science major, the Food Science and Nutrition Department, related club and professional organization activities, and academic and career planning. Credit/No Credit grading only. 1 lecture.

FSN 121. Fundamentals of Food. 4 units

Term Typically Offered: F, W, SP

Theoretical aspects and practical applications of the principles of culinary science and food preparation. 3 lectures, 1 laboratory.

FSN 125. Introduction to Food Science. 4 units

Term Typically Offered: F

Basic principles of food science. Chemical, physical, and microbiological properties of foods. Ingredient properties, preservation, and processing. Overview of the commercial food processing industry at state and national levels. Field trip may be required. Not open to students with credit in FSN 230. 3 lectures, 1 laboratory.

FSN 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research studies, or surveys of selected problems. Total credit limited to 6 units, with a maximum of 4 units per quarter.

FSN 201. Enterprise Project. 1-4 units

Term Typically Offered: TBD

CR/NC

Prerequisite: FSN 125 or FSN 230 or FSN 121 and consent of instructor.

Post-harvest processing of a high quality food product. Project participation is voluntary and subject to approval by the department head and the Cal Poly Corporation. Total degree credit for FSN 201 and FSN 401 combined limited to 12 units. Credit/No Credit grading only.

FSN 202. Introduction to Human Nutrition. 4 units

Term Typically Offered: F, W, SP

Introduction to the science of human nutrition. Nutrient structure, metabolism, function and requirements. Application of nutrition science principles to promote optimal health. Course may be offered in classroom-based or online format. 4 lectures.

FSN 204. Food Processing Operations. 4 units

Term Typically Offered: W

Prerequisite: FSN 125 or FSN 230; MATH 141 or MATH 161; PHYS 121.

Explore unit operations (drying, heating, etc.) in food processing. Introduction to basic concepts of engineering (unit conversion, mass balance and heat transfer). Operate pilot scale processing equipment and evaluate the results of those operations. Students produce processed foods in a pilot plant. Field trip required. 3 lectures, 1 laboratory.

FSN 230. Elements of Food Processing. 4 units

Term Typically Offered: W

Principles of food processing operations covering thermal processing, freezing, dehydration, fermentation and raw material handling. Overview of food technology, food quality, spoilage, packaging and label requirements. For non-Food Science majors only. Field trip may be required. Not open for students with credit in FSN 125. 3 lectures, 1 laboratory.

FSN 244. Cereal and Bakery Science. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 125 or FSN 230.

Applied science of cereal-based products. Theory and practice underlying preparation of doughs, batters, fillings, and glazes. Chemistry of baking doughs and batters and storage of finished products. Marketing and product development of breads, cakes, cookies, and pastries. Comparative nutritional evaluation of flours, grains, and finished products. 3 lectures, 1 laboratory.

FSN 250. Food and Nutrition: Culture and Customs. 4 units

Term Typically Offered: F,W,SP, SU

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

USCP

Sustainability Related

Anthropological perspective of traditional and contemporary food customs and culture. Major emphasis on U.S. cultures including Native American, Hispanic American, African American, and Asian American. Opportunities to explore personal cultural food experiences. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs) and USCP.

FSN 275. Elements of Food Safety. 4 units

Term Typically Offered: F

Introduction to food safety from farm-to-fork. Topics include good agricultural practices, good manufacturing practices, food safety regulations, and an overview of Hazard Analysis Critical Control Point (HACCP). Emphasis on control of biological, chemical, and physical hazards to assure food safety. Not open to Food Science majors. 4 lectures.

FSN 281. Writing in Nutrition Science. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); completion of GE Area A3 with a grade of C- or better; and FSN 202.

Introduction to writing in nutrition science. Foundations in scientific writing processes, scientific reading, literature review, reference management. Emphasis on identifying and summarizing reliable sources, analyzing the audience, and revising for complexity and depth. 2 activities.

FSN 290. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

FSN 304. Advanced Culinary Principles and Practice. 4 units

Term Typically Offered: SP

Prerequisite: CHEM 127 and FSN 121.

Chemistry of starch, fat and proteins and its impact on texture, taste, flavor and appearance of food. Effects of microorganisms on changes of food during preparation and storage. 3 lectures, 1 laboratory.

FSN 305. Nutrition & Exercise for Health & Disease Prevention. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Introduction, integration, and application of nutrition and exercise sciences and recommendations for attaining health and preventing disease development, including obesity, diabetes, and cardiovascular disease. Development of personalized diet and exercise plan for health and disease prevention. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

FSN 310. Maternal and Child Nutrition. 4 units

Term Typically Offered: F, W, SP

Prerequisite: FSN 202 and junior standing.

Nutritional needs and related nutritional challenges of women and children, including fertility, pregnancy and lactation; physical, nutritional, social growth and development from infancy through adolescence. Current nutrition issues in maternal and child nutrition. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

FSN 311. Sensory Evaluation of Food. 4 units

Term Typically Offered: W

Prerequisite: FSN 125 or FSN 230; and STAT 314.

Sensory attributes of food, physiological basis of sensory evaluation, sensory panels, environment for sensory evaluation, sample preparation and presentation, types of score cards, statistical methods for data analysis and interpretation. Course may be offered in classroom-based or hybrid format. 3 lectures, 1 laboratory.

FSN 315. Nutrition in Aging. 4 units

Term Typically Offered: F, W, SP

Prerequisite: FSN 202 and sophomore standing.

Nutrition issues in the middle and later years. Changes in organ systems, nutrient needs, functional status, and food preferences as adults age. Nutrition and chronic disease. Nutritional assessment and screening. Nutrition-related health care and social services. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

FSN 319. The Science of Food for the Consumer. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Overview of the science and processes used to produce the foods consumed on a daily basis. Food science, biotechnology, food law, processing, preservation, ingredient functionality, package label information, and food safety information. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

FSN 321. Contemporary Issues in Food Choice and Preparation. 4 units

Term Typically Offered: F, W

Prerequisite: FSN 121, FSN 202 or FSN 210, sophomore standing.

Principles involved in the choice, purchase, and preparation of foods in a variety of settings and for various populations. Contemporary and ongoing issues associated with food and cooking in the context of nutrition and health. Planning and preparation of meals with emphasis on nutritional, aesthetic, economic and cultural aspects of food. 3 lectures, 1 laboratory.

FSN 323. Culinary Internship. 1 unit

Term Typically Offered: F

Prerequisite: FSN 121 and FSN 321.

Independent internship experience conducted under faculty supervision focusing on culinary science. This course is only open to students enrolled in the Culinology® concentration and satisfies the culinary internship requirement per the Research Chefs Association's Culinology® concentration. 1 laboratory.

FSN 328. Nutrient Metabolism I. 4 units

Term Typically Offered: TBD

Prerequisite: BIO 161; CHEM 313 or CHEM 371; FSN 210; and junior standing.

Metabolism of carbohydrates, fats and proteins as it applies to human nutrition. Integration and regulation of metabolic pathways. 4 lectures.

FSN 329. Nutrient Metabolism II. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 328.

Continuation of FSN 328. Biochemical, molecular, and physiological functions of vitamins and minerals and their interaction with other nutrients. 3 lectures, 1 laboratory.

FSN 330. Principles of Food Engineering. 4 units

Term Typically Offered: F

Prerequisite: FSN 204.

Fundamental engineering principles related to heat transfer in food processing unit operations. Engineering properties of foods, mass and energy balances, thermodynamics, and heat transfer in various unit operations (drying, mixing, refrigeration). Sustainability applied to unit operations will be introduced. Field trip required. 3 lectures, 1 laboratory.

FSN 331. Macronutrient Metabolism. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; BIO 161; FSN 202; and CHEM 313 or CHEM 371.

Metabolism of carbohydrates, fats, and proteins as it applies to human nutrition. Integration and regulation of metabolic pathways. Not open to students with credit in FSN 328. 4 lectures.

FSN 332. Micronutrient Metabolism. 4 units

Term Typically Offered: F, W, SP

Prerequisite: FSN 331.

Continuation of FSN 331. Biochemical, molecular, and physiological functions of vitamins and minerals and their interaction with other nutrients. Not open to students with credit in FSN 329. 4 lectures.

FSN 333. Nutrient Metabolism Lab. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: FSN 328 or FSN 331. Corequisite: FSN 332.

Application of biochemical, absorptiometry, calorimetry, and other methods to assess health indicators and nutritional status. 1 laboratory.

FSN 334. Food Packaging. 3 units

Term Typically Offered: SP

Prerequisite: FSN 204.

Function of food packaging in food processing and preservation. Packaging materials and forms. Regulations and testing of food packaging material. Oral presentation required. Field trip required. Course may be offered in classroom-based or online format. 3 lectures.

FSN 335. Food Quality Assurance. 4 units

Term Typically Offered: F

Prerequisite: Junior standing; FSN 125 or FSN 230; and STAT 218.

Recommended: STAT 314.

Microbiological and physical methods of analyses of foods used in food quality assurance and product development laboratories. Organization and management of quality assurance programs utilizing basic statistical control. Development of food production standards and interpretation of specifications. Packaging and container evaluation. 3 lectures, 1 laboratory.

FSN 340. Fermented Foods. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Processing, manufacturing, historical and bio-technical applications of fermentation technology for the production of food and beverages. Wines of the world, distilled beverages, beers, fermented dairy, vegetable and meat products important to the post-harvest economy of California. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

FSN 342. Brewing Science. 4 units

Term Typically Offered: TBD

Prerequisite: CHEM 313 and MCRO 221.

Scientific principles of malting and brewing. Chemistry, microbiology, and technology of the entire brewing process, from the raw ingredients (barley, malt, hops, water, yeast) to the production of beer and its quality assurance. 4 lectures.

FSN 343. Foodservice Operations I. 3 units

Term Typically Offered: F, W

Prerequisite: FSN 121 and junior standing.

Principles of equipment selection and foodservice facility, planning with emphasis on sanitation and safety. Field trip required. 2 lectures, 1 laboratory.

FSN 344. Foodservice Operations II. 4 units

Term Typically Offered: W, SP

Prerequisite: FSN 321 and FSN 343.

Continuation of FSN 343. Economic principles and problems involved in planning and preparing food using institutional equipment to meet specific product standards for large groups. Field trip may be required. 3 lectures, 1 laboratory.

FSN 346. Brewing Methods. 3 units

Term Typically Offered: TBD

Prerequisite: FSN 342.

Introduction to brewing practices and hands-on instruction on industry standard laboratory methods for the analysis of barley, malt, hops, water, yeast, and beer. Perform pilot brews and apply methodologies for the analysis of raw ingredients, process control, and final product. Field trip required. 1 lecture, 2 laboratories. Students must be 18 years of age or older.

FSN 354. Packaging Function in Food Processing. 3 units

Term Typically Offered: SP

Prerequisite: Junior standing.

Basic food spoilage and preservation mechanisms. The role of food packaging in food processing. Package and food compatibility. For non-Food Science majors. 3 lectures.

FSN 364. Food Chemistry. 4 units

Term Typically Offered: F

Prerequisite: FSN 125 or FSN 230, CHEM 313.

Study of molecular properties of major food components such as water, carbohydrates, lipids, proteins, vitamins, minerals, pigments, enzymes and other important molecules as well as chemical reactions of these compounds occurring as a result of processing and or storage. Laboratory focus on assessment of the role of food components in food systems and food products. 3 lectures, 1 laboratory.

FSN 368. Food Analysis. 4 units

Term Typically Offered: W

Prerequisite: FSN 364.

Principles of chemical and biochemical methods and techniques for measuring food protein, carbohydrates, lipids, water, vitamins, minerals and other components of foods using approved methods. 3 lectures, 1 laboratory.

FSN 370. Food Plant Sanitation and Prerequisite Programs. 4 units

Term Typically Offered: W

Prerequisite: FSN 204 and MCRO 221.

Principles and practice of food plant sanitation and prerequisite programs to ensure production of a safe and wholesome food supply. Topics include good manufacturing practices, sanitary design, cleaning and sanitizing compound selection, pest management, waste treatment, and allergen control programs. Field trips required. 4 lectures.

FSN 374. Food Laws and Regulations. 4 units

Term Typically Offered: F

Prerequisite: FSN 125 or FSN 230 or WVIT 102.

Federal, state, and local laws and regulations affecting the production, processing, packaging, marketing, and distribution of food. Emphasis on FDA, USDA and California codes. 4 lectures.

FSN 375. Food Safety. 4 units

Term Typically Offered: SP

Prerequisite: FSN 370.

Principles, practices, and regulations governing and ensuring the chemical, physical, and biological safety of the food supply. Topics include Hazard Analysis Critical Control Point (HACCP), risk assessment, import safety, food bioterrorism and defense, product recalls, and traceability. 3 lectures, 1 activity.

FSN 381. Critical Evaluation of Nutrition Research. 4 units

Term Typically Offered: F, W, SP

Prerequisite: FSN 281 and STAT 218. Corequisite: FSN 329 or FSN 332.

Nutrition research terminology and methods. Critical evaluation and interpretation of nutrition research with emphasis on human studies of diet-health relationships. Evidence based review. 4 seminars. Formerly FSN 420.

FSN 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 6 units, with a maximum of 4 units per quarter.

FSN 405. Advanced Sport Nutrition & Exercise Metabolism. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 328 or FSN 331.

Advanced topics in sports nutrition and interaction of exercise and nutrition, including classic and recent findings related to mechanisms of nutrient effects on exercise performance, metabolism, muscle physiology, body composition, and health. 4 lectures.

FSN 407. Food Ingredient Functionality. 3 units

Term Typically Offered: F, W

Corequisite: FSN 364.

Relationship between the structure of food ingredients and their functionality through the application of food chemistry and food processing principles. Functionality and application of various ingredients for the safe production of commercial food and beverage products. Course may be offered in classroom-based or hybrid format. 2 lectures, 1 laboratory.

FSN 408. Food Product Development. 4 units

Term Typically Offered: F, SP

Prerequisite: FSN 311; FSN 330; and senior standing. Recommended: FSN 407.

Functionality of water, carbohydrates, proteins, lipids, additives and other food ingredients used in the formulation, development, and processing of foods. Product development processes from idea generation to marketing to consumer guided technical prototype development will be completed. 3 lectures, 1 laboratory.

FSN 410. Nutritional Implications of Food Industry Practices. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 210; FSN 125 or FSN 230; and junior standing.

Methods for assessing nutritional quality of foods/diets. Nutrient databases for raw and processed foods. Effects of food industry practices (e.g., processing, fortification, new product development, biotechnology) on nutritional quality of foods/diets. Evolution of public policy. 4 seminars.

FSN 415. Nutrition Education and Communications. 4 units

Term Typically Offered: F, W

Prerequisite: Senior standing; and FSN 328 or FSN 331. Corequisite: FSN 329; or FSN 332 and FSN 333.

Application of appropriate behavior and learning theories in nutrition education and communications across diverse population groups. Effective use of techniques, materials, and computer-based technology to enhance communications. Includes community-based learning projects. 4 lectures.

FSN 416. Community Nutrition. 4 units

Term Typically Offered: W, SP

Prerequisite: FSN 310; FSN 315; FSN 328 or FSN 331; and senior standing. Corequisite: FSN 415.

Federal, state and local nutrition assessment activities and program services. Emphasis on public health, health promotion and disease prevention. Development of skills in assessing community nutrition problems and planning community interventions. 4 lectures.

FSN 417. Nutrition Counseling. 4 units

Term Typically Offered: W, SP

Prerequisite: Senior standing, PSY 201/202. Corequisite: FSN 415.

Communication, behavioral, and counseling theories as they relate to nutrition counseling. Emphasis on development of skills to promote healthy eating behaviors. Examination of eating disorders and obesity, including preventative and therapeutic interventions. 4 lectures.

FSN 426. Nutrition and Foodservice Systems Management. 4 units

Term Typically Offered: F, SP

Prerequisite: FSN 344.

Principles of successful organization and management with their application to the effective operation of clinical, community and foodservice systems. Administrative responsibilities of nutrition and foodservice directors. Management theories and practice. Labor relations. Discipline and performance appraisal. 4 lectures.

FSN 429. Clinical Nutrition I. 4 units

Term Typically Offered: TBD

Prerequisite: BIO 231 (ZOO 331 equivalent); BIO 232 (ZOO 332 equivalent); and senior standing. Corequisite: FSN 329.

Application of the nutrition care process to physiological disorders which may alter nutritional requirements or require dietary modifications. Anthropometric, biochemical, clinical, and dietary assessment. Diabetes mellitus, electrolytes, acid-base balance, hydration and enteral and parenteral nutrition. Anemias, pharmacology, cardiovascular disease and obesity. 3 lectures, 1 laboratory.

FSN 430. Clinical Nutrition II. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 429.

Continuation of FSN 429. Application of the nutrition care process to physiological and metabolic disorders which may alter nutritional requirements or require dietary modifications. GI disease, respiratory diseases, metabolic stress, burns, cancer, inborn errors of metabolism, cardiovascular disease, liver disease, and renal disease. 3 lectures, 1 laboratory.

FSN 431. Medical Nutrition Therapy I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 231. Corequisite: FSN 329; or FSN 332 and FSN 333.

An introduction to working in clinical nutrition. Topics include the Nutrition Care Process and the specialized practices of medical nutrition therapy documentation, nutrition assessment, and formulating a nutrition diagnosis. 1 lecture, 1 activity.

FSN 432. Medical Nutrition Therapy II. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 232; FSN 310; FSN 315; and FSN 431.

Application of the nutrition care process to physiological disorders which may alter nutritional requirements and require dietary modifications for: Diabetes Mellitus and parenteral nutrition, anemias, acid-base conditions, cardiovascular disease, obesity, and upper and lower GI diseases. Not open to students with credit in FSN 429 or FSN 430. 3 lectures, 1 laboratory.

FSN 433. Medical Nutrition Therapy III. 4 units

Term Typically Offered: F, W, SP

Prerequisite: FSN 432.

Continuation of Medical Nutrition Therapy series. Application of the nutrition care process to diseases and disorders including hepatobiliary, pancreatic, renal, and respiratory diseases, metabolic stress, trauma, burns, cancer, and metabolic disorders. Not open to students with credit in FSN 429 or FSN 430. 3 lectures, 1 laboratory.

FSN 440. Internship. 1-12 units

Term Typically Offered: TBD

Prerequisite: Junior standing and consent of instructor.

Career experience with private or public agencies. Total credit limited to 12 units. Maximum of 6 units may be applied toward degree requirements.

FSN 444. Food Engineering. 4 units

Term Typically Offered: W

Prerequisite: FSN 204 and FSN 330.

Engineering principles governing heat transfer, fluid flow, and introductory mass transfer and application of these principles to selected unit operations; theoretical aspects of the scientific and engineering principles of fluid flow and the transfer and change of materials and energy primarily by physical means during processing of food. 3 lectures, 1 laboratory.

FSN 457. Food Science Senior Project - Scientific and Technical Writing Course. 3 units

Term Typically Offered: W

Prerequisite: FSN 364; STAT 218 or STAT 314; and senior standing.

Directed culminating experience for Food Science students choosing the senior project scientific writing option. 3 lectures.

FSN 458. Food Science Senior Project - Research. 3 units

Term Typically Offered: F, W, SP

Prerequisite: FSN 364; STAT 218 or STAT 314; senior standing; and consent of instructor.

Directed culminating experience for Food Science students choosing the senior project research option. Required for Blended MS in Food Science.

FSN 459. Food Science Senior Project - Internship. 3 units

Term Typically Offered: F, SP, SU

Prerequisite: Two of the following: FSN 330, FSN 335, FSN 364, FSN 370, or FSN 375; and senior standing.

Directed culminating experience for Food Science students choosing the senior project internship option. Required for Culinology concentration. Students must complete a project as a component of their internship. Course may be offered in classroom-based or online format. Minimum 90 hours required.

FSN 461. Senior Project I. 3 units

Term Typically Offered: F, W, SP

Prerequisite: For FDSC majors: Senior standing; completion of GE Area A3 with a grade of C- or better; FSN 364; and STAT 218. For NUTR majors: Senior standing; completion of GE Area A3 with a grade of C- or better; and STAT 218. Corequisite for NUTR majors: FSN 329 or FSN 332 and 333; and FSN 381.

Selection of scientific research topic in major area. Development of literature review, research questions in Senior Project I. Research design, data collection, and analysis in Senior Project II. Project requires a formal report which must follow departmental guidelines. Minimum of 90 hours per quarter.

FSN 463. Professional Practice in Nutrition and Dietetics. 2 units

Term Typically Offered: F

CR/NC

Prerequisite: Senior standing. Recommended: FSN 329 or FSN 332.

Exploration of students' transition to professional practice, career opportunities, and factors to be considered in career decisions. Application of strategic planning, critical thinking, written and oral communication skills in preparation for nutrition and dietetics professions. 2 lectures.

FSN 469. Food Science Exit Exam. 0 unit

Term Typically Offered: F, SP

CR/NC

Concurrent: FSN 408.

Assessment of BS Food Science program through completion of a senior exit survey. Results will only be used to improve the curriculum. Course offered online only. Credit/No Credit grading only.

FSN 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

FSN 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

FSN 474. Advanced Food Processing. 4 units

Term Typically Offered: SP

Prerequisite: FSN 444 and senior standing.

Advanced topics in processing operations with emphasis on thermal processing. Non-traditional processing technology such as microwave, ionizing radiation, and high pressure. 3 lectures, 1 laboratory.

FSN 478. Senior Project Experiential Learning in Nutrition. 2 units

Term Typically Offered: TBD

Prerequisite: FSN 381; senior standing; and consent of instructor.

Directed individual or group experiential learning/research on advanced topics in nutrition. Content generated will be used for synthesizing students' senior project. 2 activities.

FSN 479. Senior Project Advanced Topics. 2 units

Term Typically Offered: TBD

Prerequisite: FSN 381; senior standing; and consent of instructor.

Directed group study of selected advanced topics for nutrition senior project. This course separates the report from learning advanced topics; FSN 481 is required in addition to FSN 479 for senior project credit. The Class Schedule will list topic selected. 2 lectures.

FSN 481. Advanced Nutrition Senior Project Scientific Writing. 1 unit

Term Typically Offered: TBD

Prerequisite: FSN 478 or FSN 479; and senior standing.

Directed culminating experience in writing across the curriculum. Senior project scientific writing for nutrition students.

FSN 485. Cooperative Education Experience in Food Science and Nutrition. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience with an approved Food Science or Nutrition firm engaged in production or related business, industry or governmental agency. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Total credit limited to 12 units. Degree credit limited to 6 units. Credit/No Credit grading only.

FSN 490. Food Safety Modernization Act: Human Food Safety. 2 units

Term Typically Offered: TBD

Prerequisite: FSN 375.

Food Safety Modernization Act training on the implementation of hazard analysis risk-based preventive controls for human food. 2 lectures.

FSN 491. Food Safety Modernization Act: Produce Safety. 2 units

Term Typically Offered: TBD

Prerequisite: FSN 375.

Produce safety, the Food Safety Modernization Act (FSMA) Produce Safety Rule, Good Agricultural Practices (GAPs), and co-management of natural resources and food safety. Field trip required. 2 lectures.

FSN 495. Cooperative Education Experience in Food Science and Nutrition. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full time work experience with an approved Food Science or Nutrition firm engaged in production or related business, industry or governmental agency. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Total credit limited to 12 units. Degree credit limited to 6 units. Credit/No Credit grading only.

FSN 500. Individual Study. 1-6 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing, consent of supervising faculty member and graduate advisor.

Advanced independent study planned and completed under the direction of a member of the department faculty. Total credit limited to 6 units.

FSN 505. Orientation to Graduate Studies. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: Graduate standing.

Orientation to graduate school and discussion on topics that will help students to be successful. Discussion of policy and ethical issues in the conduct of research, how to find appropriate resources, and understanding the process of presenting and publishing research. Intended for entering graduate students. Credit/No Credit grading only. 1 seminar.

FSN 508. Food Product Innovation. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 408.

Focus on product innovation strategies, project management, product life cycle, project development team management, product innovation metrics, process optimization and cost management. Plan and execute an industry-relevant specialized project. 3 lectures, 1 laboratory.

FSN 516. Population Health and Epidemiology. 3 units

Term Typically Offered: TBD

Prerequisite: FSN 416 and graduate standing.

Advanced concepts and issues in population health and epidemiology. Covers epidemiologic methods, study design, and conceptual frameworks from public health perspective. Analytical considerations related to population health will be presented. Emphasis on nutrition-related issues at national and global levels. 3 lectures.

FSN 528. Biochemical and Molecular Aspects of Human Macronutrient Metabolism. 4 units

Term Typically Offered: F

Prerequisite: FSN 328 or FSN 331; and graduate standing.

Advanced topics in the human metabolism of carbohydrates, lipids and proteins. Classic and recent findings related to mechanisms of nutrient-regulated gene expression. Metabolism related to specific diseases will also be covered. 4 lectures.

FSN 529. Metabolic and Molecular Aspects of Vitamins. 2 units

Term Typically Offered: TBD

Prerequisite: FSN 329, or FSN 332 and FSN 333; and graduate standing.

Advanced topics in the molecular roles and functions of vitamins. Classic and recent findings related to mechanisms of vitamin-regulated gene expression. Specific aspects of vitamin deficiencies and toxicities will also be covered. 2 lectures.

FSN 530. Metabolic and Molecular Aspects of Minerals. 2 units

Term Typically Offered: TBD

Prerequisite: FSN 329, or FSN 332 and FSN 333; and graduate standing.

Advanced topics in the molecular roles and functions of minerals. Classic and recent findings related to mechanisms of mineral-regulated gene expression. Specific aspects of mineral deficiencies and toxicities will also be covered. 2 lectures.

FSN 531. Lipid Metabolism and Nutrition. 3 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor. Recommended: FSN 331.

Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism, effects of gene expression, essential fatty acid requirements and functions. 3 lectures.

FSN 541. Dietetic Internship Seminar. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Acceptance into the Cal Poly, San Luis Obispo Dietetic Internship, a special session program in Extended Education.

A forum for dietetic interns to make presentations and share their experiences in their supervised practice. Guest presentations on current issues in nutrition therapy, foodservice management and community nutrition. Total credit limited to 6 units, with a maximum of 2 units per quarter. Credit/No Credit grading only. 2 seminars.

FSN 564. Chemistry of Food Systems. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 364 or graduate standing.

Integration of food chemistry concepts to develop an in-depth understanding on the role of structural and functional properties of components in food systems. Research topics for components in specific food systems. 4 lectures.

FSN 570. Selected Topics in Food Science and Nutrition. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

FSN 571. Selected Advanced Laboratory in Food Science and Nutrition. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

FSN 574. Food Process Failure Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 335 or graduate standing; FSN 444; and FSN 474.

Analysis of root causes and impacts of failure scenarios within the food industry. Corrective actions relative to safety, quality, and economics of the affected products will be assessed. 3 lectures, 1 activity.

FSN 575. Advanced Food Safety. 4 units

Term Typically Offered: TBD

Prerequisite: FSN 375 or graduate standing; and MCRO 421.

In-depth analysis of food safety issues including outbreaks, risk assessment, Food Safety Modernization Act (FSMA), product and process assessments. Special emphasis on the critical evaluation, development and execution of food safety research. 3 lectures, 1 laboratory.

FSN 581. Graduate Seminar in Food Science and Nutrition. 1-3 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Current findings and research problems in the field and their application to food science and nutrition. The Class Schedule will list topic selected. Total credit limited to 6 units with approval of advisor. 1 to 3 seminars.

FSN 582. Current Nutrition Research. 1 unit

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study and presentation of selected nutrition research topics for graduate and advanced undergraduate students. Students will select, read, critically analyze and present nutrition research within designated themes. Total credit limited to 3 units. 1 seminar.

FSN 599. Thesis. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Individual research in food science and nutrition under faculty supervision leading to a graduate thesis of suitable quality. Total credit limited to 9 units.

French (FR)

undefined

FR Courses

FR 101. Elementary French I. 4 units

Term Typically Offered: F

Beginning French. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Course may be offered in classroom-based or online format. 4 lectures.

FR 102. Elementary French II. 4 units

Term Typically Offered: W

Prerequisite: FR 101 or appropriate score on placement exam or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. To be taken in numerical sequence. Course may be offered in classroom-based or online format. 4 lectures.

FR 103. Elementary French III. 4 units

Term Typically Offered: SP

Prerequisite: FR 102 or appropriate score on placement exam or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. To be taken in numerical sequence. Course may be offered in classroom-based or online format. 4 lectures.

FR 201. Intermediate French I. 4 units

Term Typically Offered: F
 2019-20 or earlier catalog: GE Area C5
 Prerequisite: FR 103 or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in French within an intercultural context. To be taken in numerical sequence. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

FR 202. Intermediate French II. 4 units

Term Typically Offered: W
 2019-20 or earlier catalog: GE Area C5
 Prerequisite: FR 201 or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in French within an intercultural context. To be taken in numerical sequence. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

FR 203. Intermediate French III. 4 units

Term Typically Offered: SP
 2019-20 or earlier catalog: GE Area C5
 Prerequisite: FR 202 or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in French within an intercultural context. To be taken in numerical sequence. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

FR 230. French for Reading Knowledge. 4 units

Term Typically Offered: SP
 CR/NC
 For students aiming primarily to acquire a reading knowledge of French in the minimum amount of time. Covers essential grammar and vocabulary. Useful for students interested in translation, needing to conduct research based on French-language sources, or preparing for the French graduate-level reading knowledge exam. Course may be offered in classroom-based or online format. Credit/No Credit grading only. 4 lectures.

FR 233. Critical Reading in French Literature. 4 units

Term Typically Offered: F
 2020-21 or later catalog: GE Area C2
 2019-20 or earlier: GE Area C1 or C2
 Prerequisite: Completion of GE Area A with grades of C- or better; and FR 203 or consent of instructor.

Selected readings in French from Francophone authors that illustrate the French literary tradition from the Middle Ages to the present in both France and other French-speaking countries. May include film and other media. Conducted in French. 4 lectures. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

FR 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor.

Directed group study of selected topics. Open only to undergraduate students. Conducted in French. The Schedule of Classes will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

FR 301. Advanced French Composition and Grammar. 4 units

Term Typically Offered: SP
 Prerequisite: FR 203 or consent of instructor.

Written and oral development of structural grammar, syntax and complex components of French. Expansion of vocabulary and idiomatic expressions through text study. Written compositions. May include French/English translation. Conducted in French. 4 lectures.

FR 302. Advanced French Conversation and Grammar. 4 units

Term Typically Offered: SP
 Prerequisite: FR 203 or consent of instructor.

Oral and written development of structural grammar, syntax and complex components of French. Expansion of vocabulary and idiomatic expressions through topics focusing on culture. Individual and/or group presentations. Conducted in French. 4 lectures.

FR 305. Significant Works in French. 4 units

Term Typically Offered: W
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and FR 233 or consent of instructor.

Critical analysis and oral discussion of poetry, essays, novels, plays, films, and other media by selected French and Francophone authors. Conducted in French. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

FR 350. French Literature in English Translation. 4 units

Term Typically Offered: SP
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

Selected works to be read by students in English translation. Critical analysis, interpretation, and comparison of works by French and/or Francophone authors. Course may include film and other media. Discussion in English. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

FR 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. Conducted in French. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Geography (GEOG)

undefined

GEOG Courses

GEOG 150. Human Geography. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Sustainability Related

The interplay of cultures, places, and environments, with emphasis on diversity and globalization. Topics include characteristics and patterns of human population, migration, ethnicity, agriculture, geopolitics, language, religion, urbanization, industry, and international development. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

GEOG 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

GEOG 218. Applications in GIS. 4 units

Term Typically Offered: F, W

Introduction to Geographic Information System (GIS) computer software to explore environmental, natural resource, social and economic issues using spatial data. Principles of cartography and map interpretation.

Development of data base and software management competencies. 2 lectures, 2 laboratories. Replaces GEOG 318.

GEOG 250. Physical Geography. 4 units

Term Typically Offered: F, W

Sustainability Related

Addresses the origins and patterns of the earth's diverse assemblage of climates, landforms, biota and soils. A major focus on relationship between human cultures and these earthly environments. 4 lectures.

Crosslisted as ERSC/GEOG 250.

GEOG 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

GEOG 308. Global Geography. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1.

Examination of the major world regions such as Europe, the Middle East, Africa, Asia and Latin America. Focus on the origins and content of contemporary cultural landscapes and on their utility for understanding international differences, interactions, and current events. Particular attention to the relationship between humans and the environment. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

GEOG 325. Climate and Humanity. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: Junior standing.

Geographic perspective on the interrelationships between climate and human cultures. Effects of people on climate and the influence of climate and weather upon human activities and behavior. Focus on global human conditions which are responsible for the alteration of climate and in turn are vulnerable to climate change. 4 lectures. Crosslisted as ERSC/GEOG 325.

GEOG 328. Applications in Remote Sensing and GIS. 4 units

Term Typically Offered: W, SP

Prerequisite: GEOG 218 or NR 218.

Introduction to the use of satellite imagery to analyze natural and human features on the earth. Applications in geology, water, climate, vegetation, agriculture, and urban land use. Fundamentals of processing digital satellite images. Emphasis on bridging the earth and social sciences. 3 lectures, 1 laboratory.

GEOG 333. Human Impact on the Earth. 4 units

Term Typically Offered: TBD

Sustainability Focused

Prerequisite: Junior standing.

Global assessment of the impact of humans on the earth's vegetation, animals, soil, water and atmosphere. Emphasis on problems stemming from the interactions of human attitudes, technologies, and population with natural resources. 4 lectures. Crosslisted as ERSC/GEOG 333.

GEOG 340. Geography of California. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing.

Analysis of the land and people of California from a geographical perspective. Patterns of environment, history, settlement, water, agriculture, ethnicity, economy, politics, and urban growth. Current issues are examined in a national and global context. 4 lectures.

GEOG 350. The Global Environment. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

GEOG 370. Geography of Latin America. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Geographic analysis of the lands and peoples of Mexico, Central America, the Caribbean, and South America. Patterns of environment, culture, politics, economy, and development. Issues (local, regional, and global) shaping Latin America today, with emphasis on U.S.-Latin America relations. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

GEOG 380. Geography of the Caribbean. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Geographic analysis of the Caribbean including the Greater Antilles, Lesser Antilles, and the Caribbean coasts of Central and South America. Investigates patterns and relationships between the physical and cultural geographies from local, regional, and global perspectives. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

GEOG 384. Professional Preparation for Anthropologists/Geographers. 1 unit

Term Typically Offered: F, W

CR/NC

Prerequisite: Sophomore standing; ANT 201 or GEOG 150.

Preparation for professional advancement in the fields of anthropology and geography. Supervised career planning emphasizing resume development, selection of an internship or international experience, exploration of career options and graduate programs. Lectures from outside, practicing professionals. Credit/No Credit grading only. 1 seminar. Formerly GEOG 464.

GEOG 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

GEOG 408. Geography of International Development. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: GEOG 308.

Detailed analysis of international development from a geographical perspective. Survey of various theories of development and their cultural and ecological components at multiple geographic scales, including institutions and actors involved. Applicable skills for development research and practice, emphasizing sustainability. 4 lectures.

GEOG 414. Global and Regional Climatology. 4 units

Term Typically Offered: W, SP

Sustainability Related

Prerequisite: Junior standing.

The earth's pattern of climates and the physical processes that account for them. Focus on interrelationships between climate and the physical/biological and cultural environments. Special emphasis on modern climate changes and their consequences. 3 lectures, 1 laboratory. Crosslisted as ERSC/GEOG 414.

GEOG 415. Applied Meteorology and Climatology. 4 units

Term Typically Offered: W, SP

Prerequisite: ERSC/GEOG 250.

Physical processes in the atmosphere that determine regional weather, climate and climate variability. Surface and satellite systems for weather observation, and weather/climate modeling. Dynamics of weather systems, including thunderstorms and hurricanes. Emphases on weather/climate affecting agriculture and other human activities. 3 lectures, 1 activity. Crosslisted as ERSC/GEOG 415.

GEOG 435. Biodiversity and Biogeography Methods. 4 units

Term Typically Offered: TBD

Prerequisite: ERSC/GEOG 250.

Origins and spatial patterns of the earth's flora and fauna across gradients of climate, landforms, geology and time. Will focus on the history of biogeography and new applications of geospatial technology such as GIS and remote sensing. 3 lectures, 1 laboratory.

GEOG 441. Advanced Applications in Geospatial Technologies. 4 units

Term Typically Offered: SP

Prerequisite: GEOG 218 or LA/NR 218. Recommended: BRAE 345 or GEOG 328.

Advanced applications in Geographic Information Systems (GIS), Remote Sensing, and other geospatial technologies. Emphasizing research, methodologies, and career fields in geography, earth sciences, and the social sciences. The Class Schedule will list topic selected. Total credit limited to 12 units. 2 lectures, 2 laboratories.

GEOG 455. Anthropology-Geography Research Design and Methods. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area B2; and two upper-division ANT or GEOG courses.

Development of knowledge and skills needed to conduct original scientific anthropology-geography research and prepares students for senior projects. Various empirical methodologies highlighted, with a focus on quantitative design and measurement of human culture, biology, behavior, environment and ecology. Course may be offered in classroom-based, online, or hybrid. 3 lectures, 1 laboratory. Crosslisted as ANT/ GEOG 455.

GEOG 461. Senior Project I. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

GEOG 462. Senior Project II. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

GEOG 465. Internship. 3-8 units

Term Typically Offered: TBD

CR/NC

Prerequisite: GEOG 464, senior standing and/or consent of instructor.

Supervised training, research, and work in public and private organizations. Credit/No Credit grading only. Total credit limited to 18 units.

GEOG 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 lectures.

Geology (GEOL)

undefined

GEOL Courses

GEOL 102. Introduction to Geology. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Processes responsible for the Earth's minerals, rocks, structure, and surface features. Volcanism; mountain building; plate tectonics; weathering. Erosion and deposition by streams, glaciers, wind and waves. Geological resources, earth hazards, and interaction of humanity with global processes. 3 lectures, 1 discussion. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

GEOL 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

GEOL 201. Physical Geology. 3 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 119.

Processes responsible for the Earth's rocks, structural surface features, geologic hazards, and natural resources, with emphasis on interactions with human activities. 3 lectures.

GEOL 203. The Geologic Record: Fossils and the History of Life. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B5

A historical account of life on Earth interpreted from the fossil record. Paleoenvironmental controls on the rise and decline of lineages of organisms deduced from stratigraphy, and from the composition, character, and geochemistry of sedimentary rocks. Identification of fossils. 3 lectures, 1 discussion. Fulfills GE Area B1 (GE Area B5 for students on the 2019-20 or earlier catalogs).

GEOL 206. Geologic Excursions. 1 unit

Term Typically Offered: F, SP

CR/NC

Field trips to places of geologic interest. The Class Schedule will indicate destinations. Students must provide their own transportation, food, and camping equipment. May be repeated for a maximum of 3 units provided field trips are taken to different locations. Credit/No Credit grading only. 1 laboratory.

GEOL 241. Physical Geology Laboratory. 1 unit

Term Typically Offered: F, W, SP

Corequisite: GEOL 102 or GEOL 201.

Properties and identification of minerals and rocks. Topographic maps and landform analysis. Geologic maps and interpretation of rock structure. 1 laboratory.

GEOL 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

GEOL 301. Physical Models in the Geosciences. 4 units

Term Typically Offered: F

Prerequisite: MATH 142; PHYS 141; and GEOL 201.

Development and analysis of geodynamical models. Stress and strain, flexure, heat flow, faulting, and elastic waves in the solid earth. Additional topics may include fluid flow, flow of natural materials, geochronology, and equations of state in high pressure mineral physics. 4 lectures.

GEOL 303. Computation and Visualization in the Geosciences. 3 units

Term Typically Offered: W

Prerequisite: GEOL 301 and one of the following: STAT 217, STAT 218, STAT 301, STAT 312, or STAT 321.

Introduction to scientific programming and data visualization for solving problems in the geosciences. Import and export of data, plotting data and maps, time series analysis, statistical description of data, and numerical approximations of equations. 2 lectures, 1 laboratory.

GEOL 305. Seismology and Earth Structure. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); GEOL 303; or PHYS 132 and MATH 242 or MATH 244.

Elastic waves in layered media. Principle of the seismometer. Magnitude, seismic moment and energy calculations. Source mechanics. Major California faults and paleoseismology. Theory of plate tectonics. Seismic properties, structure, and composition of the Earth. Field trip required. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

GEOL 309. Igneous Petrology. 3 units

Term Typically Offered: W

Prerequisite: GEOL 102 or GEOL 201; and ERSC 223.

Processes associated with melt generation and igneous crystallization with special attention to relationships with tectonic setting. Field trip required. Not open to students with credit in GEOL 310. 2 lectures, 1 laboratory.

GEOL 311. Metamorphic Petrology. 3 units

Term Typically Offered: SP

Prerequisite: GEOL 309.

Textures and minerals associated with the metamorphism of igneous and sedimentary rocks. Principles of metamorphic reactions and thermobarometry. Special attention to metamorphic processes in the context of plate tectonics. Field trip required. Not open to students with credit in GEOL 310. 2 lectures, 1 laboratory.

GEOL 330. Principles of Stratigraphy. 4 units

Term Typically Offered: SP

Prerequisite: GEOL 102 or GEOL 201, and GEOL 241.

Description and analysis of stratified rock and sediment. Sedimentology, diagenesis, transgressive/regressive sequences, bedform interpretation, marine and terrestrial sediment and sedimentary-rock sequence interpretation, and sequence stratigraphy. Required field trips. 3 lectures, 1 laboratory.

GEOL 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigations, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

GEOL 404. Research Experience for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of department chair.

Individual investigations, research, studies, or surveys of selected problems. Credit/No Credit grading only. Total credit limited to 4 units, with a maximum of 2 units per quarter.

GEOL 415. Structural Geology. 4 units

Term Typically Offered: F

Prerequisite: GEOL 241 and ERSC 223.

Recognition, interpretation, and depiction of geological structures. Understanding rock deformation through the study of faults and folds. 3 lectures, 1 laboratory. Required weekend field trips.

GEOL 416. Field-Geology Methods. 4 units

Term Typically Offered: W

Prerequisite: GEOL 102 or GEOL 201; and GEOL 415.

Collecting and interpreting field-geologic data. Description of sedimentary rocks and construction of stratigraphic columns. Mapping geologic structures in the field. Surficial geologic stratigraphy and surficial geologic mapping. Understanding geologic processes through field study. Communicating results of field study. 1 lecture, 3 activities. Crosslisted as ERSC/GEOL 416. Formerly ERSC/GEOL 401.

GEOL 417. Geologic Mapping. 4 units

Term Typically Offered: SP

Prerequisite: ERSC/GEOL 401 or ERSC/GEOL 416.

Bedrock geologic mapping on topographic maps and aerial photos. Surficial geologic mapping on topographic maps and aerial photos. Correlating and defining surficial geologic map units on the basis of soil development. Understanding landscape evolution using soil development 4 activities. Crosslisted as ERSC/GEOL 417. Formerly ERSC/GEOL 402.

GEOL 420. Applied Geophysics. 3 units

Term Typically Offered: F

Prerequisite: GEOL 201 and PHYS 141.

Introduction to geophysical exploration of the shallow subsurface: seismic refraction, seismic reflection, electrical resistivity, magnetic and gravity methods. Application to determination of subsurface structure, groundwater and mineral resources. Field trip required. 2 lectures, 1 laboratory.

GEOL 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

GEOL 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

German (GER)

undefined

GER Courses

GER 101. Elementary German Language and Culture I. 4 units

Term Typically Offered: F

Elementary language acquisition and introductions to German literature, film, history, music and contemporary politics in an intercultural context. To be taken in numerical sequence. Course may be offered in classroom-based or online format. 4 lectures.

GER 102. Elementary German Language and Culture II. 4 units

Term Typically Offered: W

Prerequisite: GER 101 or appropriate score on placement exam or consent of instructor.

Elementary language acquisition and introductions to German literature, film, history, music and contemporary politics in an intercultural context. To be taken in numerical sequence. Course may be offered in classroom-based or online format. 4 lectures.

GER 103. Elementary German Language and Culture III. 4 units

Term Typically Offered: SP

Prerequisite: GER 102 or appropriate score on placement exam or consent of instructor.

Elementary language acquisition and introductions to German literature, film, history, music and contemporary politics in an intercultural context. To be taken in numerical sequence. Course may be offered in classroom-based or online format. 4 lectures.

GER 201. Intermediate German I. 4 units

Term Typically Offered: F

2019-20 or earlier catalog: GE Area C5

Prerequisite: GER 103 or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in German within an intercultural context. To be taken in numerical sequence. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

GER 202. Intermediate German II. 4 units

Term Typically Offered: W

2019-20 or earlier catalog: GE Area C5

Prerequisite: GER 201 or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in German within an intercultural context. To be taken in numerical sequence. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

GER 203. Intermediate German III. 4 units

Term Typically Offered: TBD

2019-20 or earlier catalog: GE Area C5

Prerequisite: GER 202 or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in German within an intercultural context. To be taken in numerical sequence. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

GER 233. Critical Readings in German Literature. 4 units

Term Typically Offered: SP

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better; and GER 202 or consent of instructor.

Selected readings from German-language authors encompassing the literary tradition from the Middle Ages to the present. May include film and other media. Conducted in German. 4 lectures. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

GER 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. Open only to undergraduate students. Conducted in German. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

GER 301. Advanced German Composition and Grammar. 4 units

Term Typically Offered: W

Prerequisite: GER 202 or consent of instructor.

Written and oral development of structural grammar, syntax and complex components of German. Vocabulary expansion and idiomatic construction. Written compositions. May include German/English translation. Conducted in German. 4 lectures.

GER 302. Advanced German Conversation and Grammar. 4 units

Term Typically Offered: W

Prerequisite: GER 202 or consent of instructor.

Oral and written development of structural grammar, syntax and complex components of German. Expansion of vocabulary and idiomatic expressions through topics focusing on culture. Individual and/or group presentations. Conducted in German. 4 lectures.

GER 305. Significant Works in German. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and GER 233 or consent of instructor.

Critical analysis and oral discussion of poetry, essays, novels, plays, films, and other media by selected German-language authors. Conducted in German. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

GER 350. German Literature in English Translation. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

Selected works to be read by students in English translation. Critical analysis, interpretation, and comparison of works by German-language authors. Course may include film and other media. Discussion in English. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

GER 470. Selected Advanced Topics. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. Conducted in German. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

Graduate Studies (GS)

undefined

GS Courses

GS 597. Continued Graduate Study. 1-15 units

Term Typically Offered:

CR/NC

Prerequisite: Must be in good standing in a graduate program at Cal Poly.

Activities other than regular coursework that are needed to complete the requirements for the degree. Analysis of data, thesis and project report writing, oral defense of the thesis/project, preparation for the comprehensive exam, and other activities related to the culminating experience for the student's program. Can be used to fulfill the continuous enrollment requirement for graduate students. Units earned in this course may not be used toward degree completion. Credit/No Credit grading only. Total credit limited to 15 units; repeatable in same term.

Graduate Studies-Accounting (GSA)

undefined

GSA Courses

GSA 501. Graduate Accounting Individual Research. 1-4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing in Accounting and formal petition with approval from the Associate Dean.

Advanced individual research in accounting topics planned and completed under the direction of a member of the college faculty. Designed to meet the needs of qualified students who wish to pursue investigations in accounting which cannot be followed effectively in regularly offered elective courses. A formal written proposal must be accepted by the Associate Dean of OCOB before work begins.

GSA 536. Taxation of Trusts, Estates, and Transfer Taxes. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Income taxation of trusts and estates as flow-through entities; transfer taxation of gifts and estates, including generation-skipping transfers. 4 lectures.

GSA 537. State and Local Taxation. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Multi-state income and franchise taxation; property taxes; sales and use taxes; and the constitutional authority for the imposition of state taxes. 4 lectures.

GSA 538. Current Developments in Taxation. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Current developments in income taxation of individuals, trusts and estates and business entities; transfer taxation of gifts and estates; and ethics and professional responsibility in taxation. 4 lectures.

GSA 539. Clinical Tax Education Internship. 9 units

Term Typically Offered: W

CR/NC

Prerequisite: OCOB graduate standing in Specialization in Tax, MS Accounting program.

Accounting internship that allows graduate level accounting students the opportunity to apply skills and competencies to an employment opportunity. Placement in a full-time supervised work experience at a public accounting firm or in an accounting or internal audit department of a private enterprise or government agency. Credit/No Credit grading only.

GSA 540. Taxation of Corporations and Partnerships. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Comparative study of the taxation of C corporations and flow-through tax entities, including S corporations, partnerships and limited liability companies. Not open to students with credit in BUS 417. 4 lectures.

GSA 541. Advanced Financial Reporting Issues I. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Comprehensive coverage of selected advanced financial accounting and reporting topics. Topics include accounting changes and errors, leases, pensions and other post-employment benefits, income taxes, and consolidated financial statements. Course may be offered in classroom-based or online format. 4 seminars.

GSA 543. Advanced Financial Reporting Issues II. 5 units

Term Typically Offered: TBD

Prerequisite: GSA 541 and OCOB graduate standing or approval from the Associate Dean.

Comprehensive coverage of selected advanced financial accounting and reporting topics. Topics include financial statement footnote and MD&A disclosures and coverage of SEC statutes, regulations and filing forms. Course may be offered in classroom-based or online format. 5 seminars.

GSA 544. Advanced Enterprise Wide Business Processes for Accounting. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Study of various transactions in order to understand the underlying business processes and information flows between various business units, in order for a transaction to occur and be properly reported, and the information determined that is critical for the information system to capture. Emphasis of role of information systems in controlling the authorization of transactions, access to information, access to assets, preparation of accounting records and reports. 4 seminars.

GSA 545. Applied Accounting Research and Communications. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Advanced use of authoritative accounting and auditing data bases and actual filings by public companies. Frequent writing and speaking exercises. Real world accounting and auditing issues facing public and private enterprises. In-depth coverage of federal and state regulation of securities transactions. Course may be offered in classroom-based or online format. 4 lectures.

GSA 546. Tax Research and Administrative Procedures. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Research techniques applicable to tax issues including the communication of research results. Administrative procedures necessary for tax compliance with the various tax jurisdictions with primary emphasis on IRS practices. 4 seminars.

GSA 548. Advanced Individual Taxation and Tax Planning. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Advanced concepts concerning the impact of taxes on individuals. Introduction to transfer taxes imposed on individuals. Financial, estate and compensation tax planning issues. 4 seminars.

GSA 549. Advanced Taxation of Flow-Through Entities. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Advanced and special topics related to the income tax treatment of partnerships, limited liability companies, trusts and S corporations and their owners and beneficiaries. Creation, operation, liquidation and sale of such organizations. 4 seminars.

GSA 550. Advanced Corporate Taxation. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Advanced and special topics related to the income tax treatment of regular corporations and their shareholders. Mergers and acquisitions, tax accounting methods and periods, cross-boundary topics, and current issues. 4 seminars.

GSA 551. International Taxation. 4 units

Term Typically Offered: SP

Corequisite: BUS 417, or BUS 414 and BUS 415, and OCOB graduate standing or approval from the Associate Dean.

Fundamental tax concepts of inbound and outbound investments of U.S. taxpayers, controlled foreign corporations, Subpart F, the foreign tax credit, transfer pricing and contracting country treaties. 4 lectures.

GSA 552. Fraud Auditing and Examination. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Occupational and financial statement fraud; particular emphasis on the breakdown of corporate governance and ethics systems and developing internal control systems to prevent and detect fraudulent activities. 4 lectures.

GSA 553. International Accounting. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

International accounting, auditing, and corporate governance standards including international financial reporting standards (IFRS). 4 lectures.

GSA 554. Advanced Spreadsheet Modeling for Accounting. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Advanced topics in electronic spreadsheets and their use in accounting and financial applications. Developing spreadsheet models for data analysis and decision making. Integrating automation tools and external data sources into spreadsheets. Course may be offered in classroom-based or online format. 4 lectures.

GSA 555. Database Modeling and Analysis for Accounting. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Fundamental concepts in database analysis, design, implementation, administration, and audit including issues such as requirements specification, REA modeling, ER modeling, normalization, SQL, transaction control, database security, and query optimization. May also include topics such as data warehouses, XBRL and ebXML. Course may be offered in classroom-based or online format. 4 lectures.

GSA 556. Financial Accounting and Valuation. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Comprehensive coverage of approaches to the measurement of fair values that are used in accounting situations such as mergers and acquisitions, recognition of stock based compensation, and determination of impairments in the carrying amounts of long-lived assets including intangible assets and goodwill. Role of financial reporting in the valuation of securities, credit analysis, and the determination of the cost of capital. Course may be offered in classroom-based or online format. 4 lectures.

GSA 570. Selected Advanced Topics for Accounting. 1-4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Graduate Studies-Business (GSB)

undefined

GSB Courses

GSB 500. Independent Study. 1-4 units

Term Typically Offered: F,W,SPSU

Prerequisite: OCOB graduate standing and formal petition with approval from the Associate Dean.

Advanced study planned and completed under the direction of the Director of Graduate Programs. Open only to graduate students who have demonstrated ability to do independent work. A formal written proposal must be accepted by the Associate Dean of OCOB Graduate Programs before work begins.

GSB 501. Individual Research. 1-4 units

Term Typically Offered: F,W,SPSU

Prerequisite: OCOB graduate standing and formal petition with approval from the Associate Dean.

Advanced individual research planned and completed under the direction of a member of the college faculty. Designed to meet the needs of qualified students who wish to pursue investigations which cannot be followed effectively in regularly offered elective courses. A formal written proposal must be accepted by the Associate Dean of OCOB Graduate Programs before work begins.

GSB 503. Collaborative Industry Project. 1-8 units

Term Typically Offered: F,W,SPSU

Prerequisite: OCOB graduate standing and formal petition with approval from the Associate Dean.

Collaborative business project with a client organization that allows graduate level students the opportunity to apply knowledge, skills and competencies to address a business problem. Small teams work in collaboration with a client organization and a faculty advisor. A formal written proposal must be accepted by the Associate Dean of OCOB Graduate Programs before work begins. The project may last up to one year. Course may be offered in classroom-based or online format.

GSB 510. Data Visualization and Communication in Business. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Principles of data visualization and storytelling. Data visualization tools for different types of data in the context of business analytics. Communication of results for business actionable insights. Software use includes Excel, Tableau and R. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 511. Accounting for Managers. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Emphasis on development of the ability to read and interpret public and internal financial reports. Public reporting responsibilities of companies and management's responsibilities for developing and maintaining effective internal control systems. 4 lectures.

GSB 512. Quantitative Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Focus on a variety of statistical techniques that help to transform data into useful information that can be used to make informed business predictions and decisions. Course may be offered in classroom-based, online, or hybrid format. 4 seminars.

GSB 513. Organizational Behavior. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Application of behavioral, social and organizational science concepts to management. Individual, team and organizational levels of analysis, including such topics as expectations, perception, motivation, communications, creativity, leadership, cultural and ethical behavior, group dynamics, team effectiveness, work design, organization change and development. 4 seminars.

GSB 514. The Legal and Regulatory Environment of Business. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Legal and regulatory environment in which business operates. Consideration of historical, societal, and global perspectives reflecting political, social and/or economic beliefs and values. Strong emphasis on fundamental concepts of law and analytical tools to understand interaction between law, ethics and management decisions. 4 seminars.

GSB 516. Strategic Marketing Analytics. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Analysis of customer information, using a broad range of tools and techniques including predictive, statistical, and optimization models. Integration of data into reporting platforms. Application of findings to marketing decision-making. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 517. Strategic People Analytics. 4 units

Term Typically Offered: SP

Prerequisite: GSE 519; and OCOB graduate standing or approval from the Associate Dean.

Application of business analytics approaches and techniques to understanding and managing human resources. Emphasizes problems addressed using people analytics, including which methods are best and under what conditions, data quality and validity issues, and interpretation in the HR context. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 518. Essential Statistics for Business Analytics. 4 units

Term Typically Offered: SU

Prerequisite: OCOB graduate standing or approval from the instructor.

Statistics background needed for analysis of business data and econometrics. Topics include basics of probability theory, random variables, distribution functions, conditional distributions, independence, expectations, covariance, correlation, random samples, estimation, asymptotic theory, hypothesis testing, and confidence intervals. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 520. Data Management for Business Analytics. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Exploration of data management including relational databases, data warehouses, and NOSQL databases. Foundation for analyzing, designing, implementing and using information repositories in a business environment. Topics include the database development life cycle, data modeling, SQL programming, data quality and integration. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 521. Cloud Services & Applications for Business Analytics. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Recommended: GSB 520.

Apply cloud resources for business analytics. Identify business benefits of cloud computing, storage, networking, data management and security. Use web services to analyze big data including query, statistical analysis, machine learning and visualization. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 522. Advanced Management Information Systems. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Analysis of the challenges, successes, and failures managers face when planning for and implementing information system initiatives, particularly enterprise systems such as supply chain management, customer relationship management and enterprise resource planning systems. Focus on the strategic and operational impact of emerging information technologies in modern day business management. Design and development of knowledge worker applications including database and decision support systems. 4 lectures.

GSB 523. Managerial Economics. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Managerial economics, or microeconomics, focuses on private markets. Choices made by firms and consumers within topics that include demand, supply, efficiency, marketing structure, and government intervention. Development of an analytical framework for analyzing how these topics are important for managers. 4 lectures.

GSB 524. Marketing Management. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Introduction to marketing management. Concepts and principles necessary to plan, direct and control the product, promotion, distribution and pricing strategies of the firm. 4 lectures.

GSB 525. Project Management. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Focus on project management tools and processes required to establish priorities for and management of projects within normal and abnormal scope, money and time constraints. Planning, organizational and resource challenges common to a variety of project types. Product life cycle, normal operational, new product introduction and profit oriented product family projects reviewed in service and production environments. 4 lectures.

GSB 529. Effective Communication Skills for Managers. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Enhancement of business writing and oral presentation skills, organized around two areas: 1) preparing written business documents and reports, and 2) professional oral presentation skills. Preparation of a variety of business reports and documents. Multiple business presentations. 4 lectures.

GSB 530. Data Analytics and Mining for Business. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Exploration of the concepts, tools and techniques of data mining in the business context, using case study and problem-solving approaches. Topics include multidimensional data modeling, predictive analytics, pattern discovery, forecasting, text mining, and data visualization. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 531. Managerial Finance. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Theories, practices and tools of corporate financial decision making. Topics include valuation of fixed income securities and stocks, capital budgeting, capital structure, dividends, and an overview of financial markets and institutions. Introduction to valuation of derivative securities, market efficiency, and agency costs. 4 seminars.

GSB 533. Aggregate Economics Analysis and Policy. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Development of the theoretical and empirical framework of the macroeconomy in which businesses must operate. Topics include GDP, inflation, unemployment, interest rates and monetary and fiscal policies. The dynamics of the macroeconomic environment over time. 4 lectures.

GSB 534. Lean Operations Management. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Introduction to the operations function and its interaction with other areas in an organization. Emphasis on applying lean six sigma thinking to achieve competitive advantage in cost, quality, time, and flexibility in manufacturing and service operations. 4 lectures. Course may be offered in classroom-based or online format.

GSB 536. Data Ethics for Business Analytics. 2 units

Term Typically Offered: SP

Prerequisite: GSB 520; and OCOB graduate standing or approval from the Associate Dean.

Examination of ethical risks raised by data analysis, including data collection, ownership and usage. Philosophical examination of topics raised by data analysis, including consent, privacy, transparency, bias and potential harms from data collection and use. Course may be offered in classroom-based, online, or hybrid format. 2 lectures.

GSB 539. Graduate Internship in Business. 2-8 units

Term Typically Offered: W

CR/NC

Prerequisite: OCOB graduate standing and formal petition with approval from the Associate Dean.

Correlation of experience and academic knowledge. Placement in a supervised business or public organization. A formal written proposal must be accepted by the Associate Dean of OCOB Graduate Programs before work begins. Credit/No Credit grading only.

GSB 544. Computing and Machine Learning for Business Analytics. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Use of computers for advanced data analysis in business analytics. Topics include computer programming using statistical software, data gathering and cleaning, and machine learning. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 545. Advanced Machine Learning for Business Analytics. 4 units

Term Typically Offered: SP

Prerequisite: GSB 544; and OCOB graduate standing or approval from the Associate Dean.

Use of computers for advanced machine learning in business analytics. Topics include boosting, ensemble learning, Bayesian methods, and various types of neural networks. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 550. Bayesian Econometrics. 4 units

Term Typically Offered: TBD

Prerequisite: GSE 520.

Introduction to Bayesian econometrics with a focus on business decision making. Making appropriate use of prior information; computation of posterior densities; Bayesian forecasting and policy evaluation; model selection and diagnostic tools; alternative loss functions tailored to specific business applications. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 551. Prescriptive Analytics. 4 units

Term Typically Offered: SP

Prerequisite: GSE 519 or GSE 520.

Monte Carlo simulation. Decision making under uncertainty. Linear and non-linear programming. Dynamic models of growth and arrivals. Model risk. Applications to finance, operations, strategic planning, and marketing. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 555. Negotiation. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Theory and practice of negotiation in a variety of professional and managerial contexts (e.g., business acquisitions, compensation, business disputes, transfer pricing, inter- and intra-organizational) and in one-on-one, group, and team-based arrangements. Includes impact of culture, ethics, dispute resolution, coalitions and use of creativity to develop integrative solutions. 4 seminars.

GSB 556. Entrepreneurship and New Venture Management. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Exploration of entrepreneurship with emphasis on the formation and management of new business ventures. Analysis of typical operating problems of these firms and application of appropriate techniques for their solution. 4 seminars.

GSB 562. Seminar in General Management and Strategy. 4 units

Term Typically Offered: SP

Corequisite: OCOB graduate standing and GSB 511, GSB 513, GSB 523, GSB 531, GSB 533 and either GSB 512 or IME 503; and either GSB 524 or GSB 573; and either GSB 534 or IME 580, or approval from the Associate Dean.

Application of interdisciplinary skills to business and corporate strategy formulation and implementation. Analysis of interdependence between external environments and internal systems. Focus on responsibilities, tasks, and skills of general managers. Case studies, group problem solving. Integrating course of MBA core curriculum. Course satisfies comprehensive examination requirement. 4 seminars.

GSB 563. International Business Tour. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Business tour exposure to different management systems and their operating environments. Pre-trip and on-the-road meetings, readings, case studies and discussions. Tours of firms, government offices, ministries, etc; interviews of managers and government officials. Conducted in English. Passport required. The Class Schedule will list topic selected. Total credit limited to 8 units. 2 seminars, 2 activities.

GSB 564. Entrepreneurial Finance. 4 units

Term Typically Offered: TBD

Prerequisite: GSB 531; and OCOB graduate standing or approval from the Associate Dean.

The process of financing new and fast-growing firms. Preparation of pro forma financial statements for a new venture. Readings on the venture capital process, from seed capital through the initial public offering (IPO). Valuation of firms seeking venture capital, and those planning their IPO. Valuing convertible securities. Real options valuation. 4 lectures.

GSB 569. Managing Technology in the International Legal Environment. 4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Practical legal decisions required to conduct business for or with high technology companies. Methods to protect high technology developments in international markets, including copyrights, patents, trade secrets, trademarks and contracts. 4 seminars.

GSB 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Directed group study of selected topics for advanced students. Total credit limited to 8 units. The Class Schedule will list topic selected. 1 to 4 seminars.

GSB 575. Career Readiness in Data Analytics. 1 unit

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Career development and preparation with specific focus on the impact of organizational structures on the professions of business analytics and data science. Personal marketing in a dynamic technological environment. Course may be offered in classroom-based or online format. 1 lecture.

GSB 583. Management of Human Resources. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

An overview of the major functional and support activities in the personnel/human resource field, including strategic human resource planning, job analysis, recruitment, selection, performance appraisal, compensation, employee rights, and employee safety and health. 4 seminars.

GSB 590. Energy and Environmental Finance. 4 units

Term Typically Offered: SP

Prerequisites: GSB 511, GSB 523, and GSB 531; or OCOB graduate standing or approval from the Associate Dean.

Overview of theory and practical tools to improve financing and investment decisions as they relate to the energy industry and markets, and achieve environmental objectives including valuation models, real options, energy derivatives, project finance, impact investing, and managing climate and technological risks. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSB 595. Managing Change. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

The knowledge and the elementary skills/competencies needed to intervene in an organization in order to improve its effectiveness. Design and use of action to improve organizational effectiveness. 4 seminars.

GSB 597. Seminar in Selected Economic Problems. 4 units

Term Typically Offered: TBD

Prerequisite: GSB 523 and OCOB graduate standing or approval from the Associate Dean.

Selected economic problems analyzed at an advanced level in a particular field, such as international trade, public finance, urban, industrial organization or transportation. 4 seminars.

Graduate Studies-Economics (GSE)

undefined

GSE Courses

GSE 500. Independent Study. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Advanced study planned and completed under the direction of a departmental faculty member. Open only to graduate students demonstrating ability to do independent work. Enrollment by petition.

GSE 510. Essential Mathematics for Economic Analysis. 4 units

Term Typically Offered: SU

Prerequisite: Graduate standing. Recommended: MATH 206, MATH 244, or MATH 408.

Review and discussion of the basic math tools needed for graduate work in economics, including set theory, linear algebra, properties of functions, static and dynamic optimization. 4 lectures.

GSE 511. Microeconomic Analysis. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing. Concurrent: GSE 510.

Preferences and choice, preferences over commodities, consumer demand theory, producer theory, choice under uncertainty, simultaneous and sequential move games, incomplete information games, mechanism and incentive design. 4 lectures.

GSE 512. Dynamic Stochastic Modeling. 4 units

Term Typically Offered: W

Prerequisite: GSE 511 and graduate standing.

Finite Markov chains, linear state space models, dynamic programming, rational expectations equilibrium, Markov perfect equilibrium, Stackelberg plans, general equilibrium under certainty and uncertainty, Arrow securities, consumption-based asset pricing, incomplete markets. 4 lectures.

GSE 518. Essential Statistics for Econometrics. 4 units

Term Typically Offered: SU

Prerequisite: Graduate standing. Recommended: MATH 206 or MATH 244 or GSE 510.

Statistical concepts for use in theoretical and applied econometric applications including random variables, independence, expectations, probability, distributions, covariance and correlation, large sample theory, and properties of estimators. 4 lectures.

GSE 519. Econometrics and Data Analysis. 4 units

Term Typically Offered: F

Prerequisite: GSB 518 or GSE 518. Corequisite: GSB 544 or GSE 524.

Identification and estimation of linear and nonlinear regression models for analyzing business data. Topics include multiple linear regression; model selection; robust standard errors; instrumental variables; maximum likelihood estimation; logit/probit, ordered logit/probit, and other microeconomic models. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

GSE 520. Advanced Econometrics I. 4 units

Term Typically Offered: F

Prerequisite: GSE 518 and graduate standing. Recommended: ECON 339.

The linear regression model. Confidence and prediction intervals. Hypothesis testing. The generalized regression model and heteroscedasticity. Identification and causal inference: randomization, regression, instrumental variables, regression discontinuity, differences in differences. 4 lectures.

GSE 522. Advanced Econometrics II. 4 units

Term Typically Offered: W

Prerequisite: GSE 520 and graduate standing.

Maximum likelihood estimation. Binary, multinomial, and ordered discrete response models. Truncated, censored regression. Structural equation modeling. Factor models, filtering and Bayes rule. Random utility and mixed logit models. Demand estimation. 4 lectures.

GSE 524. Computing and Machine Learning for Economics. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Use of computers for advanced data analysis in economics and analytics. Topics include computer programming using statistical software, data gathering and cleaning, and machine learning. 4 lectures.

GSE 526. Microeconometrics. 4 units

Term Typically Offered: W

Prerequisite: GSE 520 and graduate standing. Recommended: GSE 524.

Potential outcomes framework and causal treatment effects. Unconfoundedness designs, including matching and propensity score methods. Selection on unobservable designs. Quantile regressions. The econometrics of randomized experiments. 4 lectures.

GSE 532. Environmental and Natural Resource Economics. 4 units

Term Typically Offered: TBD

Sustainability Focused

Prerequisite: GSE 511 and graduate standing.

Economic analysis of pollution, congestion, public good provision, and natural resource conservation. Static and dynamic efficiency, economic growth and sustainability, pollution taxes, marketable permits, and the design of market-based regulations. 4 lectures.

GSE 534. International Economics. 4 units

Term Typically Offered: TBD

Prerequisite: GSE 511 and graduate standing.

Analysis of the international movement of goods, services, capital and payments. The role of exchange rates, tariffs, quotas, and transport costs. Relationship between international trade and economic growth. 4 lectures.

GSE 536. Public Economics. 4 units

Term Typically Offered: TBD

Prerequisite: GSE 511 and graduate standing.

Economic analysis of the rationale for public expenditure and taxation. Externalities, pollution and public policy, income redistribution and public welfare, public goods, collective choice and political institutions, public budgeting techniques and cost-benefit analysis, taxation and tax policy, state-local finance and fiscal federalism. 4 lectures.

GSE 538. Industrial Economics. 4 units

Term Typically Offered: SP

Prerequisite: GSE 511 and graduate standing.

Economic theories of industrial organization with specific reference to such topics as cartels, market concentration and performance, vertical integration, franchise contracts, ownership and control of firms, multipart and discriminatory pricing, and tie-in sales. Economic aspects of antitrust law and government regulation of industry. 4 lectures.

GSE 542. Advanced Labor Economics. 4 units

Term Typically Offered: SP

Prerequisite: GSE 522 and graduate standing, or consent of instructor.

Recommended: GSE 526.

Research methods in labor economics and application of modern empirical techniques to the analysis of labor markets. Topics include labor supply and demand, discrimination, migration, and human capital accumulation. 4 lectures.

GSE 544. Evidence-Based Decision Analysis. 4 units

Term Typically Offered: SP

Prerequisite: GSE 520 and graduate standing. Recommended: GSE 524 and GSE 526.

Representing uncertainty using discrete and continuous conditional probabilities. Monte Carlo simulation of independent and correlated random variables. Optimization of decision variables. Randomization in program evaluation. Model mis-specification. Visualization and representation of the results of a decision analysis. Case studies. 4 lectures.

GSE 546. Incentives and Market Design. 4 units

Term Typically Offered: SP

Prerequisite: GSE 511 and graduate standing.

Ascending, first-price, second-price, and double auctions. Revenue equivalence, multi-unit auctions, the Vickrey-Clarke-Groves mechanism, and matching markets. The deferred acceptance algorithm, the immediate acceptance algorithm, and the many-to-one matching model. 4 lectures.

GSE 552. Machine Learning for Prediction and Causal Inference. 4 units

Term Typically Offered: SP

Prerequisite: GSE 526 and graduate standing.

Regularization, model selection, and supervised and unsupervised learning. Post model selection inference for causal effects. Double/debiased machine learning, causal trees, casual forests, and synthetic controls. 4 lectures.

GSE 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

GSE 580. Seminar in Economics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Advanced topics in economics chosen according to the common interests and needs of the students enrolled. The Class Schedule will list topic selected. 1 to 4 seminars. Total credit limited to 5 units.

GSE 599. Thesis. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of thesis committee.

Individual research under the general supervision of the faculty, leading to a graduate thesis of suitable quality. Minimum of 8 units required for degree.

Graduate Studies-Packaging (GSP)

undefined

GSP Courses

GSP 530. Packaging Value Chain. 2 units

Term Typically Offered: W, SU

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Packaging value chain from raw material supplier to retailers in the context of meeting current needs within the packaging arena. Global exploration of value chain strategies to increase innovation, sustainability, cost savings, quality, organizational agility, and responsiveness. Course may be offered in classroom-based or online format. 2 lectures.

GSP 532. Packaging Materials. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean of OCOB. Corequisite: GSP 530.

Fundamental and physical properties of packaging materials. Processing of materials. Design and fabrication of packaging materials for efficient, economically viable and environmental sustainable product-package systems for global supply chain solutions. Course may be offered in classroom-based or online format. 4 lectures.

GSP 533. Advanced Packaging Laws and Regulations. 3 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Overview of packaging laws and regulations. Content ranges from FDA, USDA, FTC, and EPA concepts, to labeling and structural issues such as bio-terror, product security and environmental packaging to materials issues, litigation, international concepts and intellectual property issues. Course may be offered in classroom-based or online format. 3 lectures.

GSP 535. Packaging Value in Logistics and Supply Chain Management. 3 units

Term Typically Offered: SU

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Integrated view of procurement, operations and logistics management. Management of the flow of products from raw material sourcing and acquisition through delivery to the final user. Capturing and understanding the value across these flows and how to increase it. Course may be offered in classroom-based or online format. 3 lectures.

GSP 536. Packaging Design. 4 units

Term Typically Offered: F

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Overview of structural and graphic design concepts for package design with focus on creating value throughout the entire packaging value chain. Topics include design thinking, innovation, design processes, two-dimensional and three-dimensional design elements, positioning, value creation, and distribution packaging considerations. Course may be offered in classroom-based or online format. 4 lectures.

GSP 537. Distribution Packaging for Business Managers. 4 units

Term Typically Offered: SU

Prerequisite: OCOB graduate standing or approval from the Associate Dean of OCOB.

Physical properties of distribution packaging and equipment used in prototyping and testing of product-packaging systems for global supply chains. Application of packaging knowledge to solve distribution packaging problems in modern business, with a view towards costs and environmental sustainability. Course may be offered in classroom-based or online format. 4 lectures. Formerly ITP 537.

GSP 538. Quality Evaluation of Packaged Products. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Overview of the role of quality of packaged product and techniques used for testing and evaluating quality of consumer products as related to material quality assessment, product-package interaction and human-package interaction. Course may be offered in classroom-based or online format. 4 Lectures.

GSP 539. Marketing and Sales for Packaged Products. 4 units

Term Typically Offered: W

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Packaging as a means to increase sales of product. Package design, structure, materials and production costs. Exploration of color, imagery, sustainability, and recent trends. Course is offered online only. 4 lectures.

GSP 540. Quantitative Analysis for Packaging. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Analytical and quantitative techniques. Summary measures, smoothing, interpolation curve fitting, root-finding, extrema. Numerical differentiation, integration. Boundary value problems. Numerical simulation. Course may be offered in classroom-based or online format. 4 lectures.

GSP 541. Corporate Finance for Packaging. 4 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean. Corequisite: GSP 530.

Decisions with financial implications for firms' owners and stakeholders in the context of packaging. Choice of best packaging alternative from the financial standpoint. Course offered online only. 4 Lectures.

GSP 591. Applied Industry Project I. 5 units

Term Typically Offered: SP

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Initiation, completion and presentation of an individual project, involving research, allowing an opportunity to apply knowledge, skills, and competencies to address a significant issue in the field of packaging value chain, preferably in connection with the student's employment. Formerly ITP 591.

GRC Courses**GRC 101. Introduction to Graphic Communication. 3 units**

Term Typically Offered: F

Graphic communication history, theory, processes, applications, and practices. New technologies that affect day-to-day communication including traditional and digital printing and publishing, and non-print imaging including Internet applications. Overview of design technology, web and digital media, printing and imaging management, graphics for packaging, industry segments. 3 lectures.

GRC 102. Orientation to Graphic Communication. 2 units

Term Typically Offered: W, SP

Corequisite: GRC 101; Graphic Communication Majors and Minors only.

Orientation to Graphic Communication. Introduction to GRC curricula and applicable GRC resources that include advising, student success, and culture. Overview of laboratory fundamentals, laboratory safety, and acceptable practices for the operation and use of equipment. 2 lectures. Replaced GRC 172.

GRC 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor; Graphic Communication majors only.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

GRC 201. Digital Publishing Systems. 3 units

Term Typically Offered: F, W

Prerequisite: Graphic Communication majors or Liberal Arts and Engineering majors with concentration in Publishing Technology.

Introduction to web, e-publishing, and print publishing systems including hardware, software, design considerations, and file formats. Overview of print output technologies, networking, web design, and digital publishing standards. 2 lectures, 1 laboratory.

GRC 203. Digital File Preparation and Workflow. 4 units

Term Typically Offered: W, SP

Prerequisite: GRC 101; GRC 201, and Graphic Communication major.

Terminology and techniques used in the creation of digital files and workflow systems for print and web. Workflow options including automation, proofing, and output systems will be discussed in addition to digital file delivery and transfer. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

GRC 204. Introduction to Contemporary Print Management and Manufacturing. 4 units

Term Typically Offered: W, SU

Prerequisite: GRC 101; Graphic Communication majors only.

Survey of management fundamentals and components relevant to graphic communication manufacturing, production, operations, and quality. Introduction to management theory and contemporary management trends and practices in the graphic communication industry. Course may be offered in classroom-based or online format. 4 lectures.

Graphic Communication (GRC)

GRC 211. Materials for Graphic Communication Applications. 4 units

Term Typically Offered: F, W

Prerequisite: Graphic Communication or Liberal Arts and Engineering majors or Graphic Communication minor.

Technical aspects of paper, other substrates, inks, toners, and other printable materials used in the printing and packaging industries. Manufacture, application and interaction of these materials in relation to particular processes and end use requirements. Hands-on testing of materials in relation to quality, properties, and performance. 3 lectures, 1 laboratory.

GRC 212. Materials for Graphic Communication Applications: Theory. 3 units

Term Typically Offered: F, W

Prerequisite: Graphic Communication minors only.

Technical aspects of paper, other substrates, inks, toners and other printable materials used in the printing and packaging industries. Manufacture, application, and interaction of these materials in relation to particular processes and end use requirements. Credit not allowed for GRC majors. 3 lectures.

GRC 220. Introduction to Applied Social Media in Graphic Communication. 2 units

Term Typically Offered: F, W, SP

Prerequisite: GRC 101; major or minor in GRC.

Practical application of social media tools used in the Graphic Communication industry. Students prepare social media marketing campaigns that require research, design, writing, and elementary analytics. Total credit limited to 6 units. 2 lectures.

GRC 224. Binding and Finishing Processes. 1 unit

Term Typically Offered: F

Prerequisite: GRC 211; Graphic Communication majors and minors only.

Imposition techniques, cutting, and folding. Stitch, case and perfect binding techniques and applications. Operational and aesthetic uses of die cutting, scoring, creasing, foil stamping and embossing techniques. 1 laboratory. Replaces GRC 324.

GRC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor; Graphic Communication majors only.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

GRC 301. Digital Photography and Motion Graphics. 4 units

Term Typically Offered: F, SP

Prerequisite: GRC 203 for Graphic Communication major, or GRC 377 for Graphic Communication minor.

Digital photography and motion graphics for digital printing, interactive media, and web. Topics covered include lighting, exposure, composition, retouching, digital image processing, and color correction. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

GRC 316. Flexographic Printing Technology. 3 units

Term Typically Offered: F, SP

Prerequisite: GRC 203; Graphic Communication majors only.

Flexographic printing technology for flexible packaging, label printing, folding and corrugated cartons. Optimization of file preparation, plate imaging, and equipment settings. Specification and management of automated workflows. Course offered in hybrid format with classroom-based and online learning. 2 lectures, 1 laboratory.

GRC 318. Digital Typography. 4 units

Term Typically Offered: F, W

Prerequisite: Junior standing; GRC 203 and GRC 301 for Graphic Communication major, or GRC 377 for Graphic Communication minor.

Application of typography using current software tools for print and digital publishing. In-depth study of communication principles and visual organization using current software for the creative publishing industries. 3 lectures, 1 laboratory.

GRC 320. Managing Quality in Graphic Communication. 4 units

Term Typically Offered: W, SP

Prerequisite: GRC 328 and STAT 217; Graphic Communication majors only.

Theory and practices of quality management in the graphic communication industry. Quantifying customer expectations, specifications, standard operating procedures, SPC tools, and employee empowerment. Principles of Lean Management, Six Sigma, ISO, and Malcolm Baldrige. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

GRC 322. Advanced Digital Typography. 3 units

Term Typically Offered: SP

Prerequisite: GRC 318; Graphic Communication majors only.

Advanced typographic principles relating to print and electronic media. Page layout and font management with consideration for electronic media. Applied problems focusing on typographic design, typographic application and file preparation, including web typography and eBook creation. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 1 laboratory.

GRC 328. Digital and Offset Printing Methods. 4 units

Term Typically Offered: F, W, SP

Prerequisite: GRC 211; and Graphic Communication major or Graphic Communication minor only.

Digital and offset reproduction methods including reproduction principles, markets, workflow, and quality control as they relate to the profession. Finishing and binding methods in digital and offset printing. 3 lectures, 1 laboratory.

GRC 329. Tangible Interactive Product Development. 3 units

Term Typically Offered: F, SP

Prerequisite: GRC 328.

Introduction to product development processes for tangible interactive products. Incorporate printed and hybrid flexible electronics for tangible interactive functional and novelty applications, sensory marketing, including smart and interactive packaging, point-of-purchase displays, publications, and marketing materials through strategic designing, prototyping, and fabrication. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 1 laboratory.

GRC 331. Color Management. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); and ART 182 or GRC 301.

The physics, psychology, measurement, analysis and management of color for physical and digital outputs, including printing, apps, websites, and AR/VR. Practical applications of color correction, color proofing, and production workflows that ensure the best possible color representation across different media. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

GRC 337. Consumer Packaging. 4 units

Term Typically Offered: W, SP

Prerequisite: GRC 301.

Strategies for package printing that integrate concepts from marketing/branding, design, and technology. Package manufacturing, function, quality, visual appeal, sustainability, and economics are addressed. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

GRC 338. Web Development and Content Management. 4 units

Term Typically Offered: F, W

Prerequisite: GRC 203 and GRC 301.

Web development production techniques including creating, repurposing, and managing assets for web publishing. Digital content management for desktop, tablet, and mobile devices. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

GRC 339. Web Design and Production. 4 units

Term Typically Offered: F

Prerequisite: GRC 338; Graphic Communication majors only.

Advanced design and production techniques for web development. Current software applications and technologies for user interface design, site structure and information architecture. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

GRC 340. Front-end Web Development. 3 units

Term Typically Offered: SU

Prerequisite: GRC 338.

Introduction to JavaScript for web development. Write scripts and mini apps to make websites more interactive and automate functions that enhance user experience within a website. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 1 laboratory.

GRC 347. Packaging Graphics Technology and Design. 3 units

Term Typically Offered: F

Prerequisite: GRC 318; GRC 337; Graphic Communication major or minor.

Advanced creative problem-solving strategies associated with the technologies used in designing graphics for packaging and output methods. Advanced techniques in graphic software including file hygiene, color management, and printing methods. Integrated packaging campaigns which include multiple substrates and digital shelf. Professional portfolio produced. Field trip may be required. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 1 laboratory.

GRC 357. Specialty Imaging and Graphics Technologies. 3 units

Term Typically Offered: W

Prerequisite: GRC 301; and Graphic Communication major or Graphic Communication minor only.

Specialty imaging, graphic technologies, and materials used in textile decorating, grand and wide format printing, structural graphics for marketing, industrial printing, 3D printing, security printing, embellishment. Course may be offered in classroom-based or hybrid format. 2 lectures, 1 laboratory.

GRC 361. Marketing and Sales Management for Print and Digital Media. 4 units

Term Typically Offered: F, SP

Prerequisite: GRC 101 and GRC 204; Graphic Communication majors only.

Identification and development of target markets for products and services in the graphic communication industry. Deployment of strategies in pricing, promotion and distribution management. Application of customer relationship management techniques for personal selling, forecasting and planning. 3 lectures, 1 laboratory.

GRC 372. Applied Graphic Communication Practices. 2 units

Term Typically Offered: F, W, SP

Prerequisite: GRC 102 or GRC 172 for Graphic Communication Major; or GRC 101 for Graphic Communication Minor.

Application of theories and practices to University Graphic Systems as they apply to commercial printing, publication printing, digital media and graphic communication industries. Major credit limited to 2 units; total credit limited to 12 units. 2 seminars.

GRC 376. Web and Print Publishing. 4 units

Term Typically Offered: W

Prerequisite: Graphic Communication minor or Media Arts, Society, and Technology minor.

Web and print publishing technology and its impact on society. The technologies of digital photography, typography, graphics, layout, and design for print and web publishing including decision-making considerations. The application of scientific and mathematical principles to web and print publishing technologies. Not open to Graphic Communication majors. 3 lectures, 1 laboratory.

GRC 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor; Graphic Communication majors only.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 6 units, with a maximum of 2 units per quarter.

GRC 402. Digital Printing and Emerging Technologies in Graphic Communication. 3 units

Term Typically Offered: W, SP

Prerequisite: Graphic Communication major; and GRC 318.

Study of the theory, technology, economics and application of digital printing processes and variable data publishing. Explores digital printing technology, databases, and database publishing techniques. Course may be offered in classroom-based, online, or hybrid format. 2 lectures, 1 laboratory.

GRC 404. Data Management, Estimating and Visualization in Graphic Communication. 4 units

Term Typically Offered: F, W

Prerequisite: Junior standing and GRC 328; Graphic Communication majors only.

Cost estimating of graphic communication products and data services. Study of data sources and entity relationship design. Exploration, uses, analysis and visualization of data used in digital advertising, marketing, graphic communications operations and finance. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Formerly GRC 403.

GRC 411. Strategic Trends and Profitability Issues in Print and Digital Media. 4 units

Term Typically Offered: W, SP

Prerequisite: GRC 403 or GRC 404; and senior standing; Graphic Communication majors only.

Graphic communication industry market trends and strategic positioning. Strategies for successfully positioning a business. Paradigms and business practices for graphic communication companies. Company analysis using case studies. Innovative management practices in the graphic communication industry. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

GRC 420. Graphic Communication in Integrated Marketing Communications. 4 units

Term Typically Offered: TBD

Prerequisite: GRC 361 for Graphic Communication major; or GRC 377.

Working with clients, participants will organize and demonstrate proficiency in the use of applicable Graphic Communication design, workflow and data-driven communication software and digital printing technologies using print and media software. GRC capstone for the Integrated Marketing Communications minor. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

GRC 421. Production Management for Print and Digital Media. 4 units

Term Typically Offered: F

Prerequisite: GRC 320; Graphic Communication majors only.

Application of management principles and production control methodologies for print and digitally-imaged products. Organization and financial analysis, decision-making, equipment and inventory planning, resource optimization, and the application of practiced and newly innovative contemporary world-class techniques for improving profitability in the graphic communication industry. 3 lectures, 1 activity.

GRC 422. Human Resource Management Issues for Print and Digital Media. 4 units

Term Typically Offered: W, SP

Prerequisite: GRC 403 or GRC 404; and senior standing; Graphic Communication majors only.

Human resource management integrated into the success of graphic communication companies. A comprehensive management approach is utilized emphasizing employee development, training, promotion, and motivation. Conflict management, facilitation skills, team building empowerment, leadership, ethical and legal issues in the graphic communication industry. 3 lectures, 1 laboratory.

GRC 429. Mobile User Experience. 3 units

Term Typically Offered: W

Prerequisite: GRC 338 and Graphic Communication major; or GRC 301 and Graphic Communication minor.

Current technologies and production tools used for mobile user interface and experience design, and prototyping. Industry standards, digital rights management, file formats, and publishing options for digital media applications. Legal, ethical, and business issues surrounding digital media. 2 lectures, 1 laboratory.

GRC 433. User Experience Methods for Digital Innovation. 3 units

Term Typically Offered: W

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area C; and Graphic Communication Major; or GRC 301 and Graphic Communication Minor.

Fundamental practices associated with user experience design including information architecture, scenario creation and usability testing as it relates to prototypes and interactive content. Structure and presentation of information will be analyzed to employ the principles garnered from the analysis and techniques learned. 2 lectures, 1 laboratory.

GRC 437. Advanced Consumer Packaging. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: GRC 337; Graphic Communication major. Recommended: GRC 361.

Business processes associated with designing, selling packaging for consumer brands. 2D/3D software, user experience design, sustainability, prototyping, marketing, profitability, sales for global consumer product goods industry. 3 lectures, 1 laboratory.

GRC 439. Book Design Technology. 4 units

Term Typically Offered: F

Prerequisite: Senior standing; GRC 322; and Graphic Communication major only.

Advanced creative problem-solving strategies associated with the technologies used in book design and production. Advanced techniques in page layout, design, typography, type specification and image manipulation as they relate to output technology. Content, format and distribution of print and electronic books. 3 lectures, 1 laboratory.

GRC 440. Magazine Design Technology. 4 units

Term Typically Offered: SP

Prerequisite: Senior standing; GRC 318; and Graphic Communication major only.

Concept development and design for magazines and publications. Technical considerations as they relate to output technology and digital publishing. Application of organizational structures such as grids, formatting and sequential design. Advanced techniques in typography and image manipulation. Distribution of content for print and digital formats. 3 lectures, 1 laboratory.

GRC 451. Management Topics in Graphic Communication. 3 units

Term Typically Offered: TBD

Prerequisite: GRC 203; Graphic Communication majors and minors only.

Current trends and practices in select graphic communication management topics. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 3 lectures.

GRC 452. Emerging Technologies in Graphic Communication. 3 units

Term Typically Offered: TBD

Prerequisite: GRC 203.

Current trends and practices in select graphic communication emerging digital topics. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 3 lectures.

GRC 453. Design Reproduction Topics in Graphic Communication. 3 units

Term Typically Offered: TBD

Prerequisite: GRC 203.

Current trends and practices in select graphic communication design reproduction topics. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 3 lectures.

GRC 461. Senior Project - Independent Study. 1-3 units

Term Typically Offered: TBD

Prerequisite: Senior standing; Graphic communication major; completion of GWR; and STAT 217 and consent of instructor.

Students will engage in collaborative projects in other disciplines without the constraint of a single quarter schedule. Formal presentation and report required. Minimum 90 hours of time. Total credit limited to 3 units.

GRC 462. Senior Project. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; Graphic communication major; completion of GWR; and STAT 217 and consent of instructor.

Selection and completion of a culminating project. Projects typical of problems that graduates must solve in their fields of employment. Project results presented in formal report and presentation. Course may be offered in classroom-based or online format. 1 lecture, 2 activities.

GRC 463. Senior Project - Applied Practices. 1-3 units

Term Typically Offered: TBD

Prerequisite: Senior standing; Graphic communication major; completion of GWR; and STAT 217 and consent of instructor.

Opportunities in individual or group-based projects in Graphic Communication competitions and/or sponsored projects. Formal presentation and report required. 30 hours per unit. Total credit limited to 3 units. 1-3 activities.

GRC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: GRC 101 and GRC 201 and Graphic Communication majors only.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 1 to 4 lectures.

GRC 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor; Graphic Communication majors only.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

GRC 485. Cooperative Education Experience. 6 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor; Graphic Communication majors only.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 12 units. Credit/No Credit grading only.

GRC 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor; Graphic Communication majors only.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 12 units. Credit/No Credit grading only.

GRC 500. Special Problems in Graphic Communication for Graduate Students. 2 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of instructor.

Investigation, research, studies of problems in the graphic communication industry. Repeated course over four quarters working with University Graphic Systems, the Graphic Communication Institute at Cal Poly, and with individual faculty. Total credit limited to 8 units.

GRC 501. Survey of Functional Printing. 2 units

Term Typically Offered: TBD

Prerequisite: Consent of Printed Electronics and Functional Imaging Graduate Coordinator.

Foundations for emerging functional printing fields including printed electronics, active packaging, and security printing. Emphasis on processes, materials, electrical characterization, sensing, barrier properties, and anti-counterfeiting. Focus on applications including lighting, displays, novel electronics, energy harvesting, energy storage, sensors, scavengers, and brand security. Course offered online only. 2 lectures.

GRC 502. Orientation to Functional Printing. 2 units

Term Typically Offered: TBD

Prerequisite: Consent of Printed Electronics and Functional Imaging Graduate Coordinator.

Orientation and laboratory exploration for printed electronics, active packaging, and security printing. Introduction to curricula, lab activities, research opportunities, and the use of equipment. Active participation in laboratory experiments related to processes and materials. 1 lecture, 1 laboratory.

GRC 510. Materials for Functional Printing. 4 units

Term Typically Offered: TBD

Corequisite: GRC 501.

Study of functional materials including substrates, coatings, and inks. Focus on barrier and heat-stable substrates as well as conductive, semi-conductive, dielectric, transparent conductors, forensic, sensor, and other functional inks and coatings. Emphasis on rheology, morphology, sintering and annealing. Course offered online only. 4 lectures.

GRC 512. Printing and Coating Technologies. 4 units

Term Typically Offered: TBD

Corequisite: GRC 501.

Study of functional printing and coating technologies, including screen printing, flexography, gravure, ink jet, offset, slot die, blade coating and conventional deposition techniques. Course offered online only. 4 lectures.

GRC 514. Optical and Electrical Patterning. 4 units

Term Typically Offered: TBD

Corequisite: GRC 501.

Imaging technologies and processes for security, electronic, and active packaging printing. Focus on creating and evaluating images for applications in product security and electrical fabrication. Course offered online only. 4 lectures.

GRC 520. Functional Printing Product and Business Development. 4 units

Term Typically Offered: TBD

Prerequisite: GRC 501.

Principles of business and product development for electronic and functional applications. Focus on intellectual property rights, capital funding, entrepreneurship, and management of a technology business. Course offered online only. 4 lectures.

GRC 530. Functional Printing Workflows. 4 units

Term Typically Offered: TBD

Prerequisite: GRC 502.

Evaluation of advanced imaging technologies for functional printing applications. Imaging characteristics for ink/substrate combinations, focusing on print process attributes. Compensation for print characteristics. Enabling automated workflow technologies to improve throughput and minimize errors. 2 lectures, 2 laboratories.

GRC 551. Current Trends in Printed Electronics. 4 units

Term Typically Offered: TBD

Corequisite: GRC 502.

Current trends and practices in select printed electronics topics. Open to graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures, 1 laboratory.

GRC 552. Current Trends in Active Packaging. 4 units

Term Typically Offered: TBD

Corequisite: GRC 502.

Current trends and practices in select active packaging topics. Open to graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures, 1 laboratory.

GRC 553. Current Trends in Security and Anti-Counterfeiting. 4 units

Term Typically Offered: TBD

Corequisite: GRC 502.

Current trends and practices in select security and anti-counterfeiting topics. Open to graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures, 1 laboratory.

GRC 560. Research Methods in Printed Electronics and Functional Imaging. 2 units

Term Typically Offered: TBD

Corequisite: GRC 530.

Methods for conducting qualitative and quantitative evaluations, testing, and experimentation as well as writing investigative, scholarly research papers and theses in functional printing. Topics include qualitative research, descriptive research, experimental design, statistical analysis, writing styles, and publishing options. 1 lecture, 1 activity.

GRC 595. Cooperative Education Experience. 4-12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 12 units. Credit/No Credit grading only.

GRC 596. Research Project in Printed Electronics and Functional Imaging. 3 units

Term Typically Offered: TBD

Prerequisite: GRC 560.

Comprehensive research project in printed electronics and functional imaging. Communication of the results and findings of scholarly work in written report and by oral presentation.

History (HIST)

undefined

HIST Courses

HIST 100. Introduction to the Study of History. 2 units

Term Typically Offered: F, W

Prerequisite: History major.

Introduction to the study of history, focusing on methods, topics, skills in the History major at Cal Poly, and internship and career opportunities. To be taken in the first year of study at Cal Poly. 2 seminars.

HIST 110. Western Civilization: Ancient to Renaissance. 4 units

Term Typically Offered: F, W

Beginnings of western civilization from the river valley societies of the Middle East, circa 3,000 BCE to the Renaissance in Western Europe to 1550 CE. Political, economic, social, intellectual, and artistic development of that period. 4 lectures.

HIST 111. Western Civilization: Reformation to the Present. 4 units

Term Typically Offered: W

Development of western civilization from 1550 CE to the present. Comparison of liberal modernization of the West with the conservative modernization in Central, East and Southeast Europe. Political, economic, social, intellectual, and artistic developments of that period. Particular attention to understanding dynamics that produce pluralistic mass societies such as Great Britain and France, and authoritarian mass societies such as Nazi Germany and the Soviet Union. 4 lectures.

HIST 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 4 units per quarter.

HIST 201. United States History to 1865. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: GE Area D1

2019-20 or earlier catalog: GE Area D1

USCP

Survey of the first half of U.S. history, including: contact and settlement, American Revolution, slavery, westward expansion, early California, Civil War, and California and U.S. Constitutions. Particular attention to how race, class, and gender shaped changing definitions of freedom and equality. Not open to students with credit in HIST 206. 4 lectures. Crosslisted as HIST 201/HNRS 203. Fulfills GE Area D1 and USCP.

HIST 202. United States History Since 1865. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: GE Area D1

2019-20 or earlier catalog: GE Area D1

USCP

Survey of the second half of U.S. history, including reconstruction, industrialization, the regulatory state, foreign affairs, and the remaking of citizenship rights and society. Particular attention to how race, class, and gender shaped changing definitions of freedom and equality. Not open to students with credit in HIST 206. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HIST/HNRS 202. Fulfills GE Area D1 and USCP.

HIST 206. United States Cultures. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: GE Area D1

2019-20 or earlier catalog: GE Area D1

USCP

The social, cultural, constitutional, and political history of African American, Asian American, Native American, Latinx and other underrepresented groups. Not open to students with credit in HIST 201 or HIST 202. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area D1 and USCP.

HIST 208. Survey of California History. 4 units

Term Typically Offered: W, SP

USCP

Survey of California history from the pre-Columbian period to the present. Native American culture, Spanish imperialism, the Mexican War, gold rush, immigration, dominance of the Southern Pacific Railroad, progressivism, growth of Los Angeles, and California's impact on national and world economy and politics. 4 lectures. Fulfills USCP.

HIST 210. World History to 1800. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Global history from the beginnings of organized agriculture to the Industrial Revolution. Focus on causation, using geography and cultural creation to highlight economic, political, social, and intellectual developments of the major civilizations of earth. Not open to students with credit in HIST 221 or HIST 222. Field trip may be required. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 213. Modern Political Economy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

The relationship between states and economies in the modern period. Modernization, industrialization, and colonialism. Modern systems of political economy, especially mercantilism, capitalism, communism, and social democracy. Modern theories of political economy, especially liberalism, Marxism, and Keynesianism. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HIST/HNRS 213. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 216. Comparative Social Movements. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

History of social movements worldwide from the late nineteenth century to the present. May include, but not limited to: socialism and other labor movements, feminism, white supremacy, pacifism, decolonization, Indigenous peoples, racial justice, LGBTQIA, environmentalism, fair trade, and independent living movement. 4 lectures. Crosslisted as HIST/HNRS 216. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 221. World History, Beginnings to 1000 CE. 4 units

Term Typically Offered: SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

History of world societies in comparative global perspective. Cross-cultural exchange, interaction, and conflict in the making of the world to 1000, concentrating on the rise of earliest human communities, growth of states, economic, political, and cultural transformations. Not open to students with credit in HIST 210. Field trip may be required. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 222. World History, 1000-1800. 4 units

Term Typically Offered: F, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

History of world societies in comparative global perspective. Cross-cultural exchange, interaction, and conflict in the making of the world to 1800, concentrating on the global interaction and integration, cultural and ecological exchange, economic, political, and cultural transformations. Not open to students with credit in HIST 210. Field trip may be required. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 223. World History, 1800 - Present. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Comparative history of Western and non-Western societies in global perspective. Examines the history of cross-cultural exchange, interaction, and conflict in the making of the modern world, concentrating on economic, political, and cultural transformations that facilitated and emerged from imperialism. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HIST/HNRS 223. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 225. The World at War. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Comparative history of the causes and consequences of global warfare for diverse societies and individuals from prehistory to the present. Relationships between global warfare and environment, technology, migration, economics, politics, religion, art, popular culture, law, ethnicity, class, and gender. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HIST 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

HIST 303. Research and Writing Seminar in History. 5 units

Term Typically Offered: F, W, SP

Prerequisite: HIST 100 or History minor; completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); and completion of GE Area A3 with a grade of C- or better.

Designed to develop student's ability to research and write an interpretive paper on a specific topic. Seminar participants practice the skills of library research, historical and historiographical analysis, and writing and revising. Paper in lieu of final examination. The Class Schedule will list topic selected. Course may be offered in classroom-based or online format. 4 lectures and research project.

HIST 304. Historiography. 4 units

Term Typically Offered: F, W, SP

Prerequisite: HIST 303; History major.

Theoretical approaches used to study the past, including scholarship on history and memory, the influence of interdisciplinary studies, the significance of race and gender as categories of analysis, and the place of history and the historian in contemporary society. Course may be offered in classroom-based or online format. 3 seminar meetings and research project.

HIST 306. The Witch-Hunts in Europe, 1400-1800. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

A history of the development of witchcraft ideas, persecutions, and skepticism in the western world from 1400 to 1800, focusing on the legal, economic, social, and intellectual currents that produced, fired, and eventually ended the phenomenon. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 307. European Thought 1800-2000. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Intellectual and cultural history of Europe from the nineteenth century to the present. Liberalism, radical thought, feminism, evolutionary theory, psycho-analysis, structuralism, existentialism, and postmodernism. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 308. The Trans-Atlantic Slave Trade. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

The African, Islam and Euro-American dimensions of the trans-Atlantic slave trade, with focus on its varying roots, organization and impact on cross-cultural and global levels. 4 lectures. Crosslisted as HIST/HNRS 308. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 309. Cultures of West Africa and the African Diaspora. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

The cultures of West African and the African Diaspora, with special attention to the intersection of Animist, Islamic and Western cultures, and the survival of African cultures in the Americas as manifested in the artistic, religious, literary, and other humanistic legacies of the African Diaspora. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 310. East Asian Culture and Civilization. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

The pre-modern and modern histories of China and Japan. Focus on the traditional era, the transition to modernity, cultural uniqueness within East Asian civilization, and western images of Asia. 4 lectures. Crosslisted as HIST 310/HNRS 312. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 311. Comparative World Environmental History & Sustainability Since 1492. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Focused

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Comparative history of landscape transformation, conservation policy, and environmental beliefs of North America, Latin America, Europe, China, and Africa from 1492 to the late 20th century. Historical comparison of biophysical, cultural, economic, and political change connected to issues of sustainability in world regions. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 313. Modern Middle East. 4 units

Term Typically Offered: F, W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Political, social, and economic development of the Middle East from the late Ottoman and Qajar Empires in the 19th century through the formation of nation-states in the 20th. Special attention to imperialism, nationalism, orientalism, modernity/modernization, state-building, revolution, and oil. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly HIST 314.

HIST 316. Modern East Asia. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Modern histories of China, Japan and Korea: great disruptions of modernity that have transformed these societies, common characteristics of modernity in East Asia, great differences between Chinese, Japanese and Korean histories, and the mutually constitutive nature of these East Asian histories. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 317. The Lure of the Sea. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

The history of the sea, people who travel across it, live alongside or in the midst of it, or simply seek it out. Topics include imperialism, maritime commerce, port cities, littoral societies, piracy, tourism, popular culture. 4 lectures. Crosslisted as HIST/HNRS 317. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 318. The City in the Modern World. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Comparative history of social, economic, political, and cultural changes in urban life during the nineteenth and twentieth centuries. Topics may include but are not limited to: commerce and labor; disease and death; conservation and preservation; gender and sexuality; race and ethnicity. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 319. Modern South and Southeast Asia. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Modern histories of South and Southeast Asia: traditional empires and cultures, spread of modern capitalism, Western and Japanese colonialism, decolonization and independence, ethnic and religious tensions, roles in contemporary economy and geopolitics. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 320. Colonial and Revolutionary America. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Settlement and evolution of British America, background to the imperial dispute, events leading to the Revolution, Articles of Confederation, Constitution, the national economy, roles of and impact on African-Americans, women, Native Americans and Loyalists. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 321. Civil War America. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

The experiences of nineteenth-century Americans. Focus on industrialization, antebellum reform, slavery, the Civil War battlefield and homefront, Reconstruction, and the creation of a New South. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 322. Modern America. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1.

American history since 1900. Focus on domestic and foreign policy interactions, struggle of disenfranchised groups for social and political equality, and changes in culture and identity. 4 lectures. Crosslisted as HIST 322/HNRS 323. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 326. United States Foreign Relations since 1898. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Topics include imperialism, the world wars, the Cold War, decolonization, and globalization. Particular attention to ideologies shaping U.S. policy; ethics and decision-making at multiple levels; and political, economic, social, and cultural consequences of U.S. activity for societies and individuals around the world. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 334. Modern Europe, 1789-1914. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D. Recommended: HIST 111.

Europe's 'long nineteenth century' reveals continuity and dramatic changes in politics, social structures and identities, forms of cultural expression, and scientific and technological knowledge. Topics include the French and Industrial revolutions; liberalism; nationalism; socialism; modernism; imperialism; and World War I. 4 lectures. Crosslisted as HIST/HNRS 334. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 335. Modern Europe, 1914-Present. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D. Recommended: HIST 111.

Examination of twentieth-century European history. Topics include: First World War, World Economic Crisis, communism, fascism, mass culture, shifting gender roles, Second World War, Cold War, Velvet Revolution, and the European Union. 4 lectures. Crosslisted as HIST/HNRS 335. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 336. Britain at War: The British, the Americans and the Struggle for Freedom, 1939-1945. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); completion of GE Area D1; and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Historical examination of Great Britain's challenge to its sovereignty and freedom by the regime of Nazi Germany from 1939-1945. An account of how Britain formed an alliance with the United States, and how that partnership forged a successful campaign that culminated in the survival of Britain and destruction of the Nazi regime. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 337. Colonial Latin America. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Survey of Latin American history in the colonial period from 1492 to the early nineteenth century. Special attention to the indigenous cultures, the Iberian civilization, and the evolving relationship between them. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 338. Modern Latin America. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Social, economic and political history of Latin America from the 19th century to the present. Historical development of economic structures and political and cultural institutions in the region, including Central America, the Hispanic Caribbean, and South America. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HIST 341. Modern Central America. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing.

Political, social, and economic development of Central American countries in the context of regional history and international politics during the nineteenth and twentieth Centuries. 3 lectures and research project.

HIST 350. The Scientific Revolution, c. 1500-1800. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: One or more courses in GE Area B.

History of the intellectual, social, and cultural changes in the early modern period known as the 'Scientific Revolution.' Main topics include the Copernican Revolution, mechanical philosophy, natural history, and the social and material practices of early modern science. 4 lectures. Crosslisted as HIST/HNRS 350. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

Term Typically Offered: W

Prerequisite: One upper-division course in GE Area D or HIST 303 (may be taken concurrently).

Historiographical and chronological survey since European contact. Emphasis on the frontier and borderlands concepts, Native America, the Hispanic Southwest, US expansion and conquest, industrial capitalism, inter-societal and transnational economies, immigration, public memory, and racial identity formation. 3 lectures and a research project.

HIST 434. American Women's History to 1870. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

Female ideology and experience from the colonial period through the American Civil War. Use of a variety of sources, including women's own writing, in order to understand the history of women as it both reflects and shapes American culture and society. 3 lectures and research project. Crosslisted as HIST/WGQS 434. Formerly WGS 434.

HIST 435. American Women's History from 1870. 4 units

Term Typically Offered: TBD

USCP

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

The female past in the modern period of U.S. history. Considers how transformations in gender roles are reflective of other significant changes in American culture and society. Emphasis on class, race, and ethnic variations in women's experience. 3 lectures and research project. Crosslisted as HIST/WGQS 435. Fulfills USCP. Formerly WGS 435.

HIST 437. Nazi Germany. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Background of German Romantic Nationalism; national unification and defeat in World War I; the failure of Weimar Democracy and political radicalization; the Nazi political, economic, and social revolution 1933-1939. 3 lectures and research project.

HIST 440. Topics and Issues in the History of the United States. 4 units

Term Typically Offered: SP

Prerequisite: HIST 303 or graduate standing.

Selected topics and issues in United States history. Descriptive subtitles assigned to each course. The Class Schedule will list topic selected. May be repeated to 8 units. 3 lectures and a research project.

HIST 441. Topics and Issues in European History. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Selected topics and issues in European history. Descriptive subtitles assigned to each course. The Class Schedule will list topic selected. May be repeated to 8 units. 3 lectures and research project.

HIST 442. Topics and Issues in Latin American History. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Selected topics and issues in Latin American history. Descriptive subtitles will be assigned to each course. The Class Schedule will list topic selected. May be repeated to 8 units. 3 lectures and research project.

HIST 443. Topics and Issues in Asian History. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

Selected topics and issues in Asian history. Descriptive subtitles will be assigned to each course. The Class Schedule will list topic selected. May be repeated to 8 units. 3 lectures and research project.

HIST 444. Topics and Issues in African History. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Selected topics and issues in African history. Descriptive subtitles will be assigned to each course. The Class Schedule will list topic selected. May be repeated to 8 units. 3 lectures and research project.

HIST 445. Topics and Issues in Comparative History. 4 units

Term Typically Offered: W, SP

Prerequisite: HIST 303 or graduate standing.

Selected topics and issues in comparative history. Descriptive subtitles will be assigned to each course. The Class Schedule will list topic selected. May be repeated to 8 units. 3 lectures and research project.

HIST 452. Renaissance and Reformation Europe. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Europe from 1348 to 1620 CE, with topics including the urban milieu, Renaissance philosophy and artistic expression, the new prince, the educational revolution, the Renaissance Church, Martin Luther, Jean Calvin, and the monumental economic, social, and political changes of the sixteenth century. 3 lectures and research project.

HIST 453. Religious Wars and Absolutism. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Europe from 1559 to 1715 CE, focusing on the Catholic-Protestant conflict, the rise of the Absolutist state (especially Louis XIV), the "Crisis of the Seventeenth Century," the Thirty Years War, the English Civil War and Cromwell, and the Newtonian Paradigm. 3 lectures and research project.

HIST 458. Gender and Sexuality in Modern Europe. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

Social, economic, political, and cultural effects of changing gender systems in modern Europe, particularly but not exclusively with regard to sex and sexuality. 3 lectures and research project. Crosslisted as HIST/WGQS 458. Formerly WGS 458.

HIST 459. Imperialism and Postcolonial Studies. 4 units

Term Typically Offered: SP

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

The history of imperialism and postcolonial studies and the influences of social, economic, and political impact of the empire system on indigenous people, cultures, economy, and politics. 3 lectures and research project.

HIST 460. Senior Project I. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: HIST 303; HIST 304; senior standing; and History major.

Completion of paper or creative project under faculty supervision. Must be historical in nature, investigate a question of significance, include an historiographical analysis, and make an argument based on primary and secondary sources. Take HIST 461 during a subsequent quarter.

HIST 461. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: HIST 303, HIST 304; HIST 460; senior standing; and History major.

Completion of paper or creative project begun in HIST 460 under faculty supervision.

HIST 467. History Internship. 4-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing, completion of HIST 303 with grade of B or better and consent of internship coordinator.

Supervised work experience using skills of the discipline of history in a public agency ranging from 12 to 36 hours per week. Interns work directly under the supervision of an employee of the agency and are subject to the professional responsibilities typical of the state. Total credit limited to 12 units. Credit/No Credit grading only.

HIST 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

HIST 475. Arabia and the Arab Gulf States. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or graduate standing.

History of Arabia from pre-Islamic times to the present. Political, cultural, social and economic history of Oman, the United Arab Emirates, Qatar, Bahrain, Kuwait, Saudi Arabia and Yemen. Emphasis on regional connectivity, imperialism and the origins of modern Gulf nation states, and historical roots to contemporary problems in the region. 4 lectures.

HIST 477. Topics and Issues in Public Engagements with History. 4 units

Term Typically Offered: F, W

Prerequisite: HIST 303 or graduate standing.

Intensive study of how contemporary historians engage the public. Focus on tools and methodologies. Special attention to forms of public engagement designed for diverse audiences. Organized around individual and group projects. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

HIST 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 12 units. Credit/No Credit grading only.

HIST 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 24 units. Credit/No Credit grading only.

HIST 500. Special Problems for Graduate Students. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in History.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units.

HIST 504. Graduate Study in History. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing in History.

Weekly reading and discussion course on practical methods and theoretical approaches to the study and writing of history. 4 seminars.

HIST 505. Graduate Seminar in United States History. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in History.

Intensive study of selected topics in United States history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 506. Graduate Seminar in European History. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in History.

Intensive study of selected topics in modern European history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 507. Graduate Seminar in East Asian History. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing in History.

Intensive study of selected topics in East Asian history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 508. Graduate Seminar in Latin American History. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in History.

Intensive study of selected topics in Latin American history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 509. Graduate Seminar in African History. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in History.

Intensive study of selected topics in African history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 510. Graduate Seminar in Comparative History. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing in History.

Intensive study of selective topics in comparative history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 511. Graduate Seminar in Middle Eastern History. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing in History.

Intensive study of selected topics in Middle Eastern history. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 seminars.

HIST 512. Supervised Reading for Comprehensive Exams. 2 units

Term Typically Offered: F, W, SP

Prerequisite: HIST 504 and 12 units of graduate study.

Directed supervision of reading for MA comprehensive exams. Regular consultation between advisor and student. Total credit limited to 4 units.

HIST 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

HIST 599. Thesis. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing in History.

Directed supervision of MA thesis. Regular consultation between advisor and student. Course to be taken three times over three separate quarters; total credit limited to 9 units.

Health (HLTH)

undefined

HLTH Courses

HLTH 101. Orientation to Public Health. 1 unit

Term Typically Offered: F, W

CR/NC

Prerequisite: Public Health majors only.

Orientation to the public health discipline. Advising, introduction to the faculty, department and campus resources to facilitate student success; extracurricular and research opportunities, careers and current topics in public health. Credit/No Credit grading only. Course may be offered in classroom-based or online format. 1 lecture.

HLTH 201. Introductory Undergraduate Research. 1-2 units

Term Typically Offered: F, W, SP

Introduction to individual research, studies, or surveys of selected problems. Intended for students in Kinesiology and in Public Health. Total major credit limited to 4 units. Total credit limited to 6 units. Crosslisted as HLTH/KINE 201.

HLTH 250. Healthy Living. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Personal health with emphasis on healthful behavioral practices including physical fitness, nutrition, psychosocial well-being, alcohol and other drugs, intentional and unintentional injury, reproductive health, infectious and non-infectious diseases. Not open to students with credit in HLTH/KINE 255. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

HLTH 255. Personal Health: A Multicultural Approach. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

USCP

Personal health with special emphasis on multicultural practices. Not open to students with credit in HLTH/KINE 250. Course may be offered in a classroom-based or online format. 4 lectures. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs); and USCP.

HLTH 260. Women's Health Issues. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

USCP

Introduction to major health issues that affect women disproportionately or differently from men. Topics include female sexual health and reproduction, exercise and eating behaviors, substance abuse, mental health and stress, and violence against women. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs); and USCP.

HLTH 265. Introduction to Community and Public Health. 3 units

Term Typically Offered: F, W, SP

Prerequisite: one of the following: HLTH/KINE 250, HLTH/KINE 255, or HLTH/KINE 260. Recommended: HLTH 101.

Introduction to community health and the core functions of public health. Social-ecological, behavioral, and policy influences on community and population health. Health promotion in community/public health settings. Course may be offered in classroom-based or online format. 3 lectures.

HLTH 280. Assessment Team for Health Promotion Activities. 1 unit

Term Typically Offered: TBD

CR/NC

Prerequisite: HLTH/KINE 250, HLTH/KINE 255, or HLTH/KINE 260.

Recommended: KINE 319 and STAT 218.

Introduction to multiple health and fitness assessment protocols through participation in community-based activities and/or as assistants on faculty-led research projects. Experiential and service learning. Total credit limited to 3 units. Credit/ No Credit grading only. 1 activity. Crosslisted as HLTH/KINE 280.

HLTH 281. Health Ambassadors. 1 unit

Term Typically Offered: TBD

CR/NC

Prerequisite: HLTH/KINE 250, HLTH/KINE 255, or HLTH/KINE 260.

Recommended: FSN 210 and HLTH/KINE 265.

Introduction to health education and promotion strategies through participation in community-based activities and/or as assistants on faculty-led projects. Experiential and service learning. Field trip required. Total credit limited to 3 units. Credit/No Credit grading only. 1 activity. Crosslisted as HLTH/KINE 281.

HLTH 297. Medical Terminology. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area B2.

Development of medical vocabulary used in health care occupations, through the study of root words, prefixes, suffixes, and case studies. Pronunciation, spelling, and use of medical terms and abbreviations related to diagnosis, clinical procedures, surgery, and anatomical and physiological systems. Course offered online only. 3 lectures.

HLTH 298. Introduction to Epidemiology. 4 units

Term Typically Offered: F, W

Prerequisite: HLTH/KINE 265; and STAT 217 or STAT 218. Recommended: MCRO 221 or MCRO 224.

Introduction to epidemiologic principles and methods for studying chronic and communicable diseases in the United States, including surveillance methods; epidemiologic study designs; and statistics used to describe occurrence of health-related conditions and associations of risk factors with health outcomes. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

HLTH 305. Drugs in Society. 4 units

Term Typically Offered: F, W

Prerequisite: BIO 231; and one of the following: HLTH/KINE 250, HLTH/KINE 255, HLTH/KINE 260, or HLTH/KINE 443. Recommended: BIO 232.

Social, biological, and psychological factors of the major drugs associated with therapeutic and recreational use and abuse in society. Topics include drug use as a social problem, theories and treatment of addiction, how drugs work, and the detrimental health effects of drug use. Includes both illegal and legal drugs. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

HLTH 310. Injury Prevention. 3 units

Term Typically Offered: W, SP

Prerequisite: BIO 231; BIO 232; and HLTH/KINE 265. Recommended: HLTH 298.

Injury prevention from a public health perspective. Examination of unintentional and intentional injuries in different populations. Theory and evidence-based approaches to injury prevention. Course may be offered in classroom-based or online format. 3 lectures.

HLTH 318. Applied Epidemiology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: HLTH/KINE 298; and PSY 201 or PSY 202. Recommended: STAT 313.

Application of epidemiologic principles and methods to the study of distribution and determinants of disease outcomes, identifying sources of systematic and random error, causal inference, presentation and interpretation of epidemiologic data. Course may be offered in classroom-based, online, or hybrid format. Replaced HLTH 299. 3 lectures, 1 laboratory.

HLTH 320. Media and Technology in Health Promotion. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A with grades of C- or better; KINE 180 or HLTH/KINE 265; and one of the following: HLTH/KINE 250, HLTH/KINE 255, or HLTH/KINE 260. Recommended: HLTH 299 or HLTH 318.

Applications of mass communication technologies in health promotion. Role of theoretical frameworks, ethics, challenges, development, implementation, and evaluation of technology-based health promotion programs. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

HLTH 334. Health Behavior Theory. 3 units

Term Typically Offered: F, W, SP

Prerequisite: HLTH/KINE 298. Recommended: HLTH 299; and PSY 201 or PSY 202.

Introduction to health behavior theories and models. Examination of effectiveness of theory-based interventions to facilitate behavior change to promote health and prevent disease. Course may be offered in classroom-based, online, or hybrid format. 3 lectures.

HLTH 337. Early Fieldwork Experience. 1-3 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Junior standing.

Practical work experience in related activities of kinesiology under qualified supervision. Total credit limited to 9 units. Credit/No Credit grading only. Minimum of 2 laboratory hours per week per unit. Crosslisted as HLTH/KINE 337. Formerly KINE 437.

HLTH 400. Special Problems for Advanced Undergraduates. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Individual investigation, research, studies, or surveys of selected problems. Total major credit limited to 4 units. Total credit limited to 6 units. Crosslisted as HLTH/KINE 400.

HLTH 402. Research Methods in Public Health Settings. 4 units

Term Typically Offered: F, W

Prerequisite: HLTH 299 or HLTH 318; HLTH 334; and STAT 313.

Quantitative and qualitative research approaches and methods in public health settings, with particular emphasis on social and behavioral sciences. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

HLTH 405. Stress, Health and Chronic Illness. 4 units

Term Typically Offered: F, SP

Prerequisite: BIO 231; BIO 232; HLTH 299 or KINE 304; and HLTH 334 or KINE 266.

Overview of stress physiology. Multifactorial causes and consequences of stress in chronic disease. Assessment of stress in health promotion settings. Evidence-based stress management practices and programs for disease prevention in public health settings. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

HLTH 410. Global Health. 4 units

Term Typically Offered: W, SP

Prerequisite: Junior standing; completion of GE Area D1; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs); and ANT 360, or HLTH 298 and HLTH 334.

Application of the social determinants of health to global health problems. Particular attention to disparities, national and international policies, health systems, and resource availability and utilization. Overview of the history of global health including the impact of colonization in the field - past, present, and future. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

HLTH 434. Health Promotion Program Planning. 4 units

Term Typically Offered: F, W

Prerequisite: HLTH/KINE 265; HLTH/KINE 298; and KINE 266 or HLTH 334.

Application of methods to facilitate behavior change to promote health and prevent morbidity and mortality. Concepts affecting health behavior, motivation, and decision making. Development of program planning skills in health education and promotion. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

HLTH 435. Health Promotion Program Implementation and Evaluation. 4 units

Term Typically Offered: W, SP

Prerequisite: HLTH/KINE 320; and HLTH/KINE 434.

Implementation and evaluation of health promotion programs in school, community, medical, public health, worksite, and college/university settings. Planning the intervention design, implementation and evaluation protocols including process, impact and outcome assessments. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

HLTH 440. Kinesiology/Public Health Practicum. 1 unit

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Supervised experience involving organizational and instructional responsibilities in activity, lecture and/or laboratory classes. Total credit limited to 3 units. Crosslisted as HLTH/KINE 440.

HLTH 443. Health Education for Teachers. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area B2; completion of GE Area E (GE Area D4 for students on the 2017-19 and earlier catalogs); and junior standing.

Health status, special concerns and national health objectives for school aged children; coordinated school health programs and Health Framework for CA public schools. Health literacy, nutrition, safety, alcohol, tobacco and other drugs, reproductive health, and chronic disease prevention. 4 lectures.

HLTH 450. Worksite and University Health Promotion Programs. 4 units

Term Typically Offered: SP

Prerequisite: one of the following: HLTH/KINE 250; HLTH/KINE 255; or HLTH/KINE 260; and KINE 266 or HLTH 334. Recommended: HLTH/KINE 320.

Planning, implementing, and evaluating comprehensive worksite/university health promotion (WHP) and campus wellbeing programs. Benefits of WHP for employers and employees. Educational, organizational, economic, and environmental supports for behaviors conducive to health. Course may be offered in classroom-based or online format. 4 lectures.

HLTH 453. Obesity Prevention and Treatment. 4 units

Term Typically Offered: F, W

Prerequisite: FSN 210 or KINE 451; and one of the following: HLTH/KINE 298, KINE 304, or FSN 310. Recommended: HLTH 405; and one of the following: KINE 266, HLTH 334, or FSN 415.

Overview of research on the causes and consequences of obesity. Evidence-based prevention and treatment interventions. Emphasis on skills for promoting weight control in multidisciplinary health promotion and public health settings. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

HLTH 460. Experiential Senior Project. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; completion of GE Area A with grades of C- or better; and HLTH 402 or KINE 319.

Applied and project-based culminating experience in planning, implementing, and evaluating a campus, community, or worksite health promotion program under faculty supervision. Minimum 30 hours.

HLTH 461. Senior Project Report. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; completion of GE Area A with grades of C- or better; and HLTH 402 or KINE 319.

A comprehensive synthesis of professional literature that integrates content from major courses resulting in a report. Topic must be approved by the instructor. Minimum 30 hours time commitment. 1 seminar.

HLTH 462. Research Senior Project. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; completion of GE Area A with grades of C- or better; and HLTH 402 or KINE 319.

Completion of an advanced research, or creative project. Results may be submitted for poster presentation or other public/ professional forum. Total credit limited to 4 units. 1 to 4 supervision.

HLTH 463. Public Health Internship. 1-3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Senior standing; completion of graduation writing requirement; minimum GPA of 3.0; KINE 434; and KINE 435.

Practical experience at an approved agency that provides public health promotion programs. Students participate in program administration under the direct supervision of an approved on-site coordinator as a capstone experience. Total credit limited to 3 units. Credit/No Credit grading only. 1 to 3 supervision.

Honors Contract (HNRC)

undefined

HNRC Courses

HNRC 199. Honors Contract. 0 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Student must be in good standing in the Honors Program, and have permission of the Director.

Students in the Honors Program are required to take at least eight courses for honors credit before graduation. Taking an Honors course may not be possible due to scheduling conflicts or unavailability of courses. In these cases and with the permission of the Director of the Honors Program, the student may enter into a "Contract" to engage in honors-level work in a class on an individual basis. Credit/No Credit grading only. Students can register for a maximum of 2 Honors Contracts; repeatable in same term.

HNRC 200. Honors Leadership Experience. 0 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Student must be in good standing in the Honors Program, and have permission of the Director.

The Honors Program encourages its students to develop leadership skills through serving on the Honors Board, chairing Honors Committees, or by participating in other approved leadership activities. To receive Honors credit for these activities, students must also participate in a number of formal leadership-training seminars/workshops, and contribute their insights to the Honors and greater Cal Poly communities. Credit/No Credit grading only. Total credit limited to two courses.

HNRC 399. Honors Contract. 0 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Student must be in good standing in the Honors Program, and have permission of the Director.

Students in the Honors Program are required to take at least eight courses for honors credit before graduation. Taking an Honors course may not be possible due to scheduling conflicts or unavailability of courses. In these cases and with the permission of the Director of the Honors Program, the student may enter into a "Contract" to engage in honors-level work in a class on an individual basis. Credit/No Credit grading only. Students can register for a maximum of 2 Honors Contracts; repeatable in same term.

HNRC 400. Honors Professional, Social and Global Experience. 0 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Student must be in good standing in the Honors Program, and have permission of the Director.

The Honors Program encourages its students to enhance their academic coursework by broadening their professional, social and global perspectives through professional internships/co-ops, participation in community projects and study abroad experience. To receive Honors credit, students must also reflect on these experiences and contribute their insights through presentations (oral and/or written) to the Honors and greater Cal Poly communities. Credit/No Credit grading only. Total credit limited to two courses, repeatable in the same term.

Honors (HNRS)

undefined

HNRS Courses

HNRS 100. Introduction to the Honors Community. 2 units

Term Typically Offered: TBD

CR/NC

Topics on sustainability, diversity, ethics, and transition to life at Cal Poly. Introduction to Honors Program opportunities. Mentoring and building community. Collaboration with local service organizations. For University Honors Program students only. Credit/No Credit grading only. 2 lectures.

HNRS 101. Public Speaking. 4 units

Term Typically Offered: F, SP

2020-21 or later catalog: GE Area A1

2019-20 or earlier catalog: GE Area A2

Introduction to the principles of oral communication and the tradition of public speaking in political and social life. Practical experience in the development, presentation, and critical analysis of speeches to inform and to persuade. Not open to students with credit in COMS 102. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as COMS/HNRS 101. Fulfills GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

HNRS 102. Principles of Oral Communication. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area A1

2019-20 or earlier catalog: GE Area A2

Introduction to the fundamentals and principles which underlie effective oral communication. Practical experience in various types of speaking situations: informative speaking, persuasive speaking, and panel discussion. Not open to students with credit in COMS 101. 4 lectures. Crosslisted as COMS/HNRS 102. Fulfills GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

HNRS 112. Race, Culture, and Politics in the United States. 4 units

Term Typically Offered: TBD

2020-21 or later: GE Area D1

2019-20 or earlier catalog: GE Area D1

USCP

Interdisciplinary study of race and ethnicity as created by historical processes and American institutions (social, political, economic, legal and cultural institutions). Attention to interlocking systems of race, class, gender and sexuality. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/HNRS 112. Fulfills GE D1 and USCP.

HNRS 132. General Physics II. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: PHYS 141; and MATH 142 or MATH 182.

Oscillations, waves in elastic media, sound waves. Temperature, heat and the first law of thermodynamics. Kinetic theory of matter, second law of thermodynamics. Geometrical and physical optics. 3 lectures, 1 laboratory. Crosslisted as HNRS 132/PHYS 142. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs). Formerly PHYS 132.

HNRS 134. General Physics I. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Prerequisite: MATH 141 with grade C- or better. Corequisite: MATH 142 or MATH 182. Recommended: High School Physics.

Fundamental principles of mechanics. Vectors, particle kinematics. Equilibrium of a rigid body. Work and energy, linear momentum, rotational kinematics and dynamics. Primarily for engineering and science students. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HNRS 134/PHYS 141. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

HNRS 141. Calculus I. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: Appropriate Math Placement Level; or MATH 117 and high school trigonometry; or MATH 118 and high school trigonometry; or MATH 119.

Limits, continuity, differentiation. Introduction to integration. 4 lectures. Crosslisted as HNRS/MATH 141. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

HNRS 142. Calculus II. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: MATH 141 with a grade of C- or better or consent of instructor.

Techniques of integration, applications to physics, transcendental functions. 4 lectures. Crosslisted as HNRS/MATH 142. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

HNRS 143. Calculus III. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: MATH 142 with a grade of C- or better or consent of instructor.

Infinite sequences and series, vector algebra, parametric curves. 4 lectures. Crosslisted as HNRS/MATH 143. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

HNRS 145. Writing Arguments. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area A3

2019-20 or earlier catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog).

Examination of rhetorical principles and ethical rhetorical action. Application of these principles and practices to arguments across a range of genres and media. Evaluate credibility of evidence and sources. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 145. Fulfills GE Area A3 with a grade of C- or better.

HNRS 147. Writing Arguments about STEM. 4 units

Term Typically Offered: SP

2020-21 or later catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for student on the 2019-20 or an earlier catalog).

Critical analysis of arguments about STEM topics. Examination and application of logical and rhetorical principles. Evaluation of sources and evidence. Composing arguments across a range of genres and media. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A3 with a grade of C- or better. Crosslisted as ENGL/HNRS 147.

HNRS 161. Creating Sustainable Communities I. 2 units

Term Typically Offered: F

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Sustainability Focused

Environmental, historical, and social dimensions of sustainability. Elements of sustainable communities in a local and global context. Resilience and systems thinking. Introduction to research skills. Developing community within Honors. Includes a service learning component. Upon completion of HNRS 161 and HNRS 162, a student will receive 4 units of GE credit for Area D2 (GE Area D3 for students on the 2019-20 or earlier catalogs). Field trip required. 1 lecture, 1 activity.

HNRS 162. Creating Sustainable Communities II. 2 units

Term Typically Offered: W
 2020-21 or later catalog: GE Area D2
 2019-20 or earlier: GE Area D2 or D3
 Sustainability Focused
 Prerequisite: HNRS 161.

Continuation of HNRS 161. Environmental, historical, and social dimensions of sustainability. Institutional views of sustainability. Environmental justice. Appropriate technology. Developing community within Honors. Includes a service learning component. Upon completion of HNRS 161 and HNRS 162, a student will receive 4 units of GE credit for Area D2 (GE Area D3 for students on the 2019-20 or earlier catalogs). Field trip required. 1 lecture, 1 activity.

HNRS 163. Creating Sustainable Communities III. 2 units

Term Typically Offered: TBD
 Sustainability Focused
 Prerequisite: HNRS 162.

Continuation of HNRS 161 and 162. Implementation and assessment of a year-long community service project, initiative, or campaign. Project management and interpersonal communication. Developing community within the Honors Program. For University Honors Program students only. 1 lecture, 1 activity.

HNRS 164. Sustainability and Communities. 4 units

Term Typically Offered: W, SP
 2020-21 or later catalog: GE Area D2
 2019-20 or earlier: GE Area D2 or D3
 Environmental, historical, and social dimensions of sustainability. Elements of sustainable communities in a local and global context. Resilience and systems thinking. Developing community at Cal Poly. Includes a service learning component. Not open to students with credit in HNRS 161 and HNRS 162. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HNRS 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP
 CR/NC
 Prerequisite: Consent of instructor and Honors Program.

Individual investigation, research, projects, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter. Credit/No Credit grading only.

HNRS 201. Survey of Economics. 4 units

Term Typically Offered: TBD
 2020-21 or later catalog: GE Area D2
 2019-20 or earlier: GE Area D2 or D3
 Basic principles of microeconomics and macroeconomics. Emphasis on applications to current local, national and global economic issues. Not open to student with credit in ECON 222. Course may be offered in classroom-based or hybrid format. 4 lectures. Crosslisted as ECON/HNRS 201. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HNRS 202. United States History Since 1865. 4 units

Term Typically Offered: TBD
 2020-21 or later: GE Area D1
 2019-20 or earlier catalog: GE Area D1
 USCP

Survey of the second half of U.S. history, including reconstruction, industrialization, the regulatory state, foreign affairs, and the remaking of citizenship rights and society. Particular attention to how race, class, and gender shaped changing definitions of freedom and equality. Not open to students with credit in HIST 206. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HIST/HNRS 202. Fulfills GE Area D1 and USCP.

HNRS 203. United States History to 1865. 4 units

Term Typically Offered: TBD
 2020-21 or later: GE Area D1
 2019-20 or earlier catalog: GE Area D1
 USCP

Survey of the first half of U.S. history, including: contact and settlement, American Revolution, slavery, westward expansion, early California, Civil War, and California and U.S. Constitutions. Particular attention to how race, class, and gender shaped changing definitions of freedom and equality. Not open to students with credit in HIST 206. 4 lectures. Crosslisted as HIST 201/HNRS 203. Fulfills GE Area D1 and USCP.

HNRS 204. Gender and Sexuality in US Society and Politics. 4 units

Term Typically Offered: TBD
 2020-21 or later: GE Area D1
 2019-20 or earlier catalog: GE Area D1
 USCP

Survey and exploration, via intersectional frameworks, of the ways that gender and sexuality have impacted, and been impacted by, US society and politics, from the formation of the US as a settler colonial nation-state into the present day. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS 204/WGS 201. Fulfills GE Area D1 and USCP.

HNRS 210. Gender and Sexuality in Visual and Popular Culture. 4 units

Term Typically Offered: F, SP
 2020-21 or later catalog: GE Area C1
 2019-20 or earlier catalog: GE Area C3

Survey and exploration of key developments in visual and popular culture, considered through the lenses of intersectional approaches to gender and sexuality, and examined across multiple mediums and practices including: visual art, film, television, performance, mass media and material culture. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS/WGQS 210. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs). Formerly WGS 210.

HNRS 211. Engineering Statics. 3 units

Term Typically Offered: TBD
 Prerequisite: MATH 241 (or concurrently), PHYS 131 or PHYS 141.

Analysis of forces on engineering structures in equilibrium. Properties of forces, moments, couples, and resultants. Equilibrium conditions, friction, centroids, area moments of inertia. Introduction to mathematical modeling and problem solving. Vector mathematics where appropriate. Course may be offered in classroom-based, online, or hybrid format. 3 lectures. Crosslisted as HNRS/ME 211.

HNRS 213. Modern Political Economy. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

The relationship between states and economies in the modern period. Modernization, industrialization, and colonialism. Modern systems of political economy, especially mercantilism, capitalism, communism, and social democracy. Modern theories of political economy, especially liberalism, Marxism, and Keynesianism. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HIST/HNRS 213. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HNRS 214. Engineering Dynamics. 3 units

Term Typically Offered: TBD

Prerequisite: MATH 241; ME 211 or ARCE 211.

Analysis of motions of particles and rigid bodies encountered in engineering. Velocity, acceleration, relative motion, work, energy, impulse, and momentum. Further development of mathematical modeling and problem solving. Vector mathematics where appropriate. Course offered in hybrid format with classroom-based and online learning. 3 lectures. Crosslisted as HNRS 214/ME 212.

HNRS 216. Comparative Social Movements. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

History of social movements worldwide from the late nineteenth century to the present. May include, but not limited to: socialism and other labor movements, feminism, white supremacy, pacifism, decolonization, Indigenous peoples, racial justice, LGBTQIA, environmentalism, fair trade, and independent living movement. 4 lectures. Crosslisted as HIST/HNRS 216. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HNRS 223. World History, 1800 - Present. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Comparative history of Western and non-Western societies in global perspective. Examines the history of cross-cultural exchange, interaction, and conflict in the making of the modern world, concentrating on economic, political, and cultural transformations that facilitated and emerged from imperialism. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HIST/HNRS 223. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

HNRS 230. Philosophical Classics: Knowledge and Reality. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Critical examination of primary philosophical works with focus on the nature of reality and the sources and limits of human knowledge. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS/PHIL 230. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

HNRS 231. Philosophical Classics: Ethics and Political Philosophy. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Critical examination of primary philosophical works, with focus on the identification and evaluation of the central ethical, social and political themes and arguments presented in them. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS/PHIL 231. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

HNRS 232. British Literature: 1789 to the Present. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Broadly surveys Romantic, Victorian, Modern, and Contemporary British literature in an historical-cultural context. Investigates works from several genres and a variety of national and cultural voices. May include such writers as Wordsworth, Wollstonecraft, Dickens, G. Eliot, Wilde, Woolf, Yeats, and Gordimer. 4 lectures. Crosslisted as ENGL 231/HNRS 232. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

HNRS 241. Calculus IV. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 143.

Partial derivatives, multiple integrals, introduction to vector analysis. 4 lectures. Crosslisted as HNRS/MATH 241.

HNRS 242. American Literature: 1830 to the Present. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

A broad survey of later U.S. American literature from the rise of literary nationalism to the present. A wide range of writers and genres, including novels, short stories, poems, plays, essays, and autobiographies. Not open to students with credit in ENGL 240. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ENGL/HNRS 242. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

HNRS 244. Linear Analysis I. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 143.

Separable and linear ordinary differential equations with selected applications; numerical and analytical solutions. Linear algebra: vectors in n-space, matrices, linear transformations, eigenvalues, eigenvectors, diagonalization; applications to the study of systems of linear differential equations. 4 lectures. Crosslisted as HNRS/MATH 244.

HNRS 251. Introduction to Classical Literature. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Examination of the ancient epics and classical literature of Mesopotamia, Greece, and Rome. May include such readings as The Epic of Gilgamesh, the Iliad, the Odyssey, Genesis, Sappho's Poetry, Antigone, the Symposium, the Aeneid, and Marcus Aurelius's Meditations. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 251. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

HNRS 252. Global Origins of Race in the U.S.. 4 units

Term Typically Offered: F, W, SP

GE Area F: Ethnic Studies

Explores global origins of race in the U.S. including forced slavery, removal, displacement, and migration of Native Americans, Latinas/os, African Americans, and Asian Americans. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/HNRS 252. Fulfills GE Area F.

HNRS 261. Leadership: Self Evaluation. 1 unit

Term Typically Offered: F, W, SP

Recommended: Sophomore standing.

Interpersonal leadership and communication skills with a focus on self evaluation. Personality assessment, preparation of a personal leadership development plan, and goal setting. Values and moral development. For University Honors Program students only. 1 activity.

HNRS 262. Leadership: Group Dynamics. 1 unit

Term Typically Offered: W

Prerequisite: HNRS 261.

Teamwork and team building skills with a focus on group dynamics. Understanding the effects of diversity on team dynamics and performance. Cross-cultural communication and leadership. Development of trust, feedback, and conflict resolution. For University Honors Program students only. 1 lecture.

HNRS 263. Leadership: Coaching and Mentoring. 1 unit

Term Typically Offered: SP

Prerequisite: HNRS 262.

Strategies for effective coaching and mentoring. Servant leadership, recognition of motivational sources in others, and positive psychology in leadership. Development of a leadership philosophy. For University Honors Program students only. 1 lecture.

HNRS 265. Research and Information Skills for Honors Students. 2 units

Term Typically Offered: W, SP

Prerequisite: HNRS 162.

Identifying information resources and research support services available through Kennedy Library. Methods, best-practices, and ethical standards related to planning, carrying out, summarizing, and publishing scholarly research. Written, oral, and visual presentation of research findings. For University Honors Program students only. 1 lecture, 1 activity.

HNRS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

HNRS 299. Honors Group Seminar. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Students in the Honors Program are required to take at least eight courses for honors credit before graduation. Taking an Honors course may not be possible due to scheduling conflicts or unavailability of courses. This course allows students to engage in honors-level work in a standard, non-honors course on a group basis. Credit/No Credit grading only. Total credit limited to 4 units; repeatable in same term. Must achieve a B or better in the related standard course. 1 seminar.

HNRS 302. The Learn By Doing Lab Teaching Practicum. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Early teaching experience in an informal science, technology, engineering, and mathematics (STEM) teaching and learning environment. Principles of inquiry-driven STEM education, lesson design, implementation and assessment. Intended for undergraduates exploring STEM teaching as a career. Total credit limited to 4 units. Credit/No Credit grading only. 1 seminar, 1 laboratory. Crosslisted as ENGR 322/SCM 302/HNRS 302.

HNRS 303. Economics of Poverty, Discrimination and Immigration. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and ECON 201 or ECON 222.

Economic analysis of the cause, extent and impact of poverty, discrimination and immigration and of the policies designed to address these socioeconomic issues. Emphasis on the experience of African-Americans, Latinos, and women in the United States. 4 lectures. Crosslisted as ECON/HNRS 303. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

HNRS 304. Values and Technology. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Humanistic investigation into the theoretical and practical applications of technology with specific reference to the social effects of technological change. Course may be offered in classroom-based or online format. For all majors. Non-technical. 4 lectures. Crosslisted as HNRS 304/ISLA 303. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

HNRS 308. The Trans-Atlantic Slave Trade. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

The African, Islam and Euro-American dimensions of the trans-Atlantic slave trade, with focus on its varying roots, organization and impact on cross-cultural and global levels. 4 lectures. Crosslisted as HIST/HNRS 308. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 310. Air and Space. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Technological developments of modern aircraft and spacecraft through physics of flight equations, mission analysis, propulsion, structures, materials, and control systems for civil and military aircraft/spacecraft. Synthesis of current and future aerospace technologies through emerging ethical considerations, and global impact. 4 lectures. Course may be offered in classroom-based or online format. Crosslisted as AERO/HNRS 310. Fulfills GE Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

HNRS 312. East Asian Culture and Civilization. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

The pre-modern and modern histories of China and Japan. Focus on the traditional era, the transition to modernity, cultural uniqueness within East Asian civilization, and western images of Asia. 4 lectures. Crosslisted as HIST 310/HNRS 312. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 317. The Lure of the Sea. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

The history of the sea, people who travel across it, live alongside or in the midst of it, or simply seek it out. Topics include imperialism, maritime commerce, port cities, littoral societies, piracy, tourism, popular culture. 4 lectures. Crosslisted as HIST/HNRS 317. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 320. Topics and Issues in Values, Media and Culture. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The interplay of values, media, and culture from an interdisciplinary perspective. Descriptive subtitles assigned to each course. The Class Schedule will list topic selected. 4 lectures. Total credit limited to 8 units with different subtopic; repeatable in same term. Crosslisted as HNRS/ISLA 320. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

HNRS 321. Undergraduate Research Methods and Practice. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and consent of instructor.

Research methods and tools for sciences and humanities, including formulating a research question, designing a study, using the scientific method to conduct and analyze surveys, and analyzing data. Emphasis on working in interdisciplinary research teams. Total credit limited to 8 units. 2 lectures, 2 activities. Crosslisted as HNRS/UNIV 321.

HNRS 323. Modern America. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1.

American history since 1900. Focus on domestic and foreign policy interactions, struggle of disenfranchised groups for social and political equality, and changes in culture and identity. 4 lectures. Crosslisted as HIST 322/HNRS 323. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 325. Ethics, Science and Technology. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Ethical decision-making as applied to issues such as the use of robots, the treatment of animals, sustainability, scientific fraud, feminist analysis of science and technology, as well as questions about whether technology is just a value-neutral tool or, rather, embodies certain values. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS 325/PHIL 323. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

HNRS 332. British Literature: 1660-1798. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth exploration of the dominant themes and preoccupations of the Age of Enlightenment. Historical and cultural contexts of canonical and non-canonical literature emphasized to illustrate 18th century Britons' views of themselves and their changing world. May include such writers as Dryden, Behn, Defoe, Swift, Pope, and Johnson. 4 lectures. Crosslisted as ENGL/HNRS 332. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 333. British Literature: 1798-1832. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth exploration of the literature of the British Romantic period. Cultural, historical, and philosophic contexts will also be examined in both canonical and non-canonical works. May include such writers as Blake, Wordsworth, Keats, and Wollstonecraft. 4 lectures. Crosslisted as ENGL/HNRS 333. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 334. Modern Europe, 1789-1914. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D. Recommended: HIST 111.

Europe's 'long nineteenth century' reveals continuity and dramatic changes in politics, social structures and identities, forms of cultural expression, and scientific and technological knowledge. Topics include the French and Industrial revolutions; liberalism; nationalism; socialism; modernism; imperialism; and World War I. 4 lectures. Crosslisted as HIST/HNRS 334. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 335. Modern Europe, 1914-Present. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D. Recommended: HIST 111.

Examination of twentieth-century European history. Topics include: First World War, World Economic Crisis, communism, fascism, mass culture, shifting gender roles, Second World War, Cold War, Velvet Revolution, and the European Union. 4 lectures. Crosslisted as HIST/HNRS 335. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 336. Social Ethics. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 USCP

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Examination of contemporary moral problems, solutions to these problems, and the arguments for these solutions, with emphasis on two or more of the following sample problem areas: abortion, suicide and euthanasia, capital punishment, family ethics, race relations, social justice, war, women's issues. 4 lectures. Crosslisted as PHIL 335/HNRS 336. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

HNRS 338. Critical Issues in American Politics. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1. Recommended: POLS 112 (GE Area D1).

Examination of significant social, legal, economic and political issues that face the country and how the basic institutions of government-national, state, local-are responding to them; assessment of policies to correct these problems. 4 lectures. Crosslisted as HNRS/POLS 338. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 340. Sexuality Studies. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Sexuality in a cultural and historical context. Changing definitions of human subjectivity. The cultural and social regimes that control and create sexuality (including the 'invention' of homo/heterosexuality and the social, legal and political systems that define sexual ab/normality). Contemporary issues of sexual orientation and topics of sexuality in relation to gender and race. Course may be offered in classroom-based, online, or hybrid format. 4 seminars. Crosslisted as WGQS/HNRS 340. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly WGS 340.

HNRS 341. American Literature: 1865-1914. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Analysis of literary Realism and Naturalism in their cultural and historical contexts. May include such writers as Whitman, Dickinson, Twain, Chopin, James, Wharton, Dreiser, Norris, and Crane who are seen to accommodate the sense of danger, doubt, and disorder of the time. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 342. American Literature: 1914-1956. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The writers of the modern period and those of the early post-modern age, including writers marked by stylistic innovation and a willingness to challenge traditionally accepted standards. May include such writers as Hemingway, Fitzgerald, Stein, Hughes. 4 lectures. Crosslisted as ENGL/HNRS 342. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 343. American Literature: 1956-Present. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth study of American fiction, poetry, and drama written since 1956. How contemporary literature examines enduring American themes and breaks new ground with the inclusion of diverse voices. 4 lectures. Crosslisted as ENGL/HNRS 343. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 345. Women Writers of the Twentieth and Twenty-First Centuries. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR
 USCP

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

In-depth exploration of works of 20th and 21st century women authors within their historical and cultural contexts. Analysis of canonical and non-canonical writing by women of differing classes, races, ethnicities, and sexual orientations. Literary techniques through which texts reflect or challenge such cultural constructs as gender, identity, sexuality, motherhood, etc. The emergence of a female literary tradition. May include such writers as Adichie, Aoki, Lorde, Mukherjee, Olds, Rich. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 345. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); USCP; and GWR.

HNRS 347. African American Literature. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR
 USCP

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The writings of African Americans from the end of the eighteenth century to the present. Individual works and literary trends among African Americans of various periods and contexts: intellectual, political, and cultural. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ENGL/HNRS 347. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); USCP; and GWR.

HNRS 350. The Scientific Revolution, c. 1500-1800. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or History major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: One or more courses in GE Area B.

History of the intellectual, social, and cultural changes in the early modern period known as the 'Scientific Revolution.' Main topics include the Copernican Revolution, mechanical philosophy, natural history, and the social and material practices of early modern science. 4 lectures. Crosslisted as HIST/HNRS 350. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 351. Speech and Debate Team. 2 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor. Recommended: Previous competitive debate experience. Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs); and completion of GE Area A3 with a grade of C- or better; and COMS 250.

Advanced participation in competitive intercollegiate speech activities. Intercollegiate tournament competition, judging speech competition and other communication-related public service on campus and in the community. Field trip may be required. Total credit limited to 8 units. Course offered in hybrid format with classroom-based and online learning. 2 laboratories. Crosslisted as COMS/HNRS 351.

HNRS 352. Modern Drama. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Reading and analysis of world drama of the last 150 years, thereby enhancing student awareness of modern culture, history, ethics, politics, and the human condition. Design work, multi-media forms, art, music, and cinema as components or informing elements of the works under consideration. 4 lectures. Crosslisted as ENGL/HNRS 352. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 353. Gender, Race, Culture, Science & Technology. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area B
 2019-20 or earlier catalog: GE Area B5, B6, or B7
 USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: STAT 130, 217, 218, 251, 301, 312, or 321.

Examines the complex relationships between gender, race, culture, science, and technology via intersectional quantitative and qualitative inquiry, centering the perspectives/contributions of historically marginalized people in the U.S. Explores, evaluates, and develops proposals to create more diverse, equitable, ethical, humane science/technology. Course may be offered in classroom-base, online, or hybrid format. 3 lectures, 1 activity. Crosslisted as ES 350/HNRS 353/WGQS 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog); and USCP. Formerly WGS 350.

HNRS 361. Honors Track - Research, International, and Community Service Experience. 1 unit

Term Typically Offered: F, W, SP
 Recommended: HNRS 265.

Completion of an approved Honors experience track in research, international study, or community service. Personal reflection on the experience. Peer evaluation. Presentation of the experience to the Honors and greater Cal Poly communities. Course may be offered in classroom-based or online format. For University Honors Program students only. 1 lecture.

HNRS 380. Literary Themes. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area C
 2019-20 or earlier catalog: GE Area C4
 GWR

Prerequisite: Junior standing or English major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Literature selected according to a particular theme. Emphasis on critical interpretation, aesthetic appreciation, and historical and cultural contexts. The Class Schedule will list topic selected. Total credit limited to 12 units. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ENGL/HNRS 380. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and GWR.

HNRS 391. Appropriate Technology for the World's People: Development. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

A broad overview of international development and appropriate design for sustainability. Besides traditional classroom work, students work in teams to address problems with technical solutions. Collaboration with mentors from the university, private sector, and nonprofits serves to provide diverse background and project mentorship. 4 lectures. Crosslisted as HNRS/PSC/UNIV 391. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

HNRS 392. Appropriate Technology for the World's People: Design. 4 units

Term Typically Offered: TBD
 2020-21 or later: Upper-Div GE Area B
 2019-20 or earlier catalog: GE Area B5, B6, or B7
 Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: UNIV 391 and completion of GE Area D2.

Addresses the needs of international impoverished communities with technological solutions, which are inexpensive, ecologically sustainable, and socially appropriate. Group study of target communities, and design and construction of an appropriate technology prototype. Not open to students with credit in PSC/UNIV/HNRS 492. 3 lectures, 1 laboratory. Crosslisted as HNRS/PSC/UNIV 392. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

HNRS 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP
 Prerequisite: Consent of Honors Program Director.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

HNRS 411. New Media Arts I. 4 units

Term Typically Offered: TBD
 Prerequisite: Junior standing; and completion of GE Area A with grades of C- or better.

Advanced-level presentation of new media theory, design and practice. Topics covered include, but are not limited to, interactivity theory, user-centered system design, cognitive psychology, media analysis, and basic web design theory. Total credit limited to 8 units. 4 lectures. Crosslisted as ENGL/HNRS 411.

HNRS 412. New Media Arts II. 4 units

Term Typically Offered: TBD
 Prerequisite: ENGL 411.

Advanced level of work with the primary technologies and design/critique theories currently at use in the professional creation of new media works. Lectures and readings expand upon material presented in ENGL 411. 4 lectures. Crosslisted as ENGL/HNRS 412.

HNRS 450. Solar Photovoltaic System Engineering. 4 units

Term Typically Offered: TBD
 Prerequisite: one of the following: PHYS 104; PHYS 118; PHYS 121; or PHYS 141; and junior standing.

Engineering principles, design, and installation of solar photovoltaic power systems including grid-tie and off-grid systems. Photonic energy conversion, solar module engineering, solar power electronics, photovoltaic site planning, mechanical and structural considerations, permit processes, government incentives, and analysis of financial and investment issues. Field trips required. 3 lectures, 1 laboratory. Crosslisted as BRAE/EE/HNRS 450.

HNRS 461. Honors Capstone Seminar. 1 unit

Term Typically Offered: F, W, SP
 CR/NC
 Corequisite: Major-specific senior project.

Forum for graduating seniors to share their Honors experiences. Presentation and defense of a capstone project or experience before a diverse group of subject experts and laypersons. Seminars on communication and career guidance. For University Honors Program students only. Credit/No Credit grading only. Course may be offered in classroom-based, online, or hybrid format. 1 seminar.

HNRS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

HNRS 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

HNRS 492. Appropriate Technology for the World's People: Design. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); or graduate standing. Recommended: UNIV 391 and two lower-division courses in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Addresses the needs of international impoverished communities with technological solutions, which are inexpensive, ecologically sustainable, and socially appropriate. Group study of target communities, and design and construction of an appropriate technology prototype. Seminar paper required. Not open to students with credit in PSC/UNIV/HNRS 392. 3 lectures, 1 laboratory. Crosslisted as PSC/UNIV 492.

HNRS 499. Honors Group Seminar. 1 unit

Term Typically Offered: TBD

CR/NC

Students in the Honors Program are required to take at least eight courses for honors credit before graduation. Taking an Honors course may not be possible due to scheduling conflicts or unavailability of courses. This course allows students to engage in honors-level work in a standard, non-honors course on a group basis. Credit/No Credit grading only. Total credit limited to 4 units, repeatable in same term. Must achieve a B or better in the related standard course. 1 seminar.

Industrial and Manufacturing Engineering (IME)

undefined

IME Courses**IME 101. Introduction to Industrial and Manufacturing Engineering. 1 unit**

Term Typically Offered: F

Introduction of major topics in industrial and manufacturing engineering such as data analysis, process improvement, operations research, product design, and supply chain management. Professional ethics, cheating and plagiarism. Resources for academic success. Career opportunities review. 1 laboratory.

IME 141. Manufacturing Processes: Net Shape. 1 unit

Term Typically Offered: F,W,SP,SU

Metal casting as a net shape process in manufacturing. Properties of molding materials and methods of casting. Introduction to rapid prototyping. Pattern and casting design principles. 1 laboratory.

IME 142. Manufacturing Processes: Materials Joining. 2 units

Term Typically Offered: F,W,SP,SU

Theory and application of metal cutting and welding processes. Includes shielded metal arc, flux cored arc, submerged arc, gas metal arc, gas tungsten arc, brazing, resistance, and oxy-acetylene processes. Bonding theory, joint design, codes and testing. Introduction to adhesive bonding. Open to all majors. 1 lecture, 1 laboratory.

IME 143. Manufacturing Processes: Material Removal. 2 units

Term Typically Offered: F, SP

Uses, capabilities, and theoretical and operational characteristics of lathe and milling machine tools, including conventional, automatic and numerical control. Cutting tool characteristics, machining parameters, quality control, and production methods. Design considerations for manufacturing. Introduction to robotics and automation. Open to all majors. 1 lecture, 1 laboratory.

IME 144. Introduction to Design and Manufacturing. 4 units

Term Typically Offered: F, W, SP

Supplemental review of visualization, sketching, and drafting fundamentals. Computer-aided solid modeling of parts and assemblies. Introduction to conventional machining processes on lathes and mills, computer numerical control, quality control, production methods, and design for manufacturing. Open to all majors. 2 lectures, 2 laboratories.

IME 145. Subtractive Manufacturing Processes for Mechanical Designs I. 1 unit

Term Typically Offered: W

Concurrent: ME 129.

Material removal manufacturing processes as related to mechanical design. Manual and computer-controlled (CNC) machining processes and equipment. Interpretation of engineering drawings, operation setup, process parameters, inspection of parts. Manufacturing of standard machine design features. Design for manufacturing and assembly (DFMA). Not open to students with credit in IME 143. 1 laboratory.

IME 146. Subtractive Manufacturing Processes for Mechanical Designs II. 1 unit

Term Typically Offered: SP

Prerequisite: IME 145. Concurrent: ME 130.

Material removal manufacturing processes for mechanical design. Fits and assignment of part tolerances. Machining and inspection of geometric dimensioning and tolerancing (GD&T). Teamwork for batch part production. Design for manufacturing and assembly (DFMA) concepts. Not open to students with credit in IME 143. 1 laboratory.

IME 156. Basic Electronics Manufacturing. 2 units

Term Typically Offered: F,W,SP,SU

Practical electronics manufacturing knowledge expanded through concepts such as CAD/CAM design, Design for Manufacture (DFM), documentation requirements, prototyping and production planning. Hands-on techniques learned for project planning, soldering, automation, hand tool usage and production methods. 1 lecture, 1 laboratory.

IME 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

IME 212. Introduction to Enterprise Analytics. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC 232.

Using Big Data for decision making in Industrial Engineering. Data-driven solution design. Data acquisition and database queries. Cleaning, understanding, preprocessing, describing, and visualizing data. Analysis for insight. Storytelling and ethical considerations. 2 lectures, 2 laboratories.

IME 223. Process Improvement Fundamentals. 4 units

Term Typically Offered: F, W, SP
Prerequisite: MATH 141. Recommended: IME 101.

Principles of work simplification and motion analysis. Recording of work flow and methods. Process improvement through work measurement and standards, time study, synthetic data, predetermined time systems and work sampling. Allowances and performance rating, productivity measures. Introduction to lean manufacturing principles. Client based project. 3 lectures, 1 laboratory.

IME 239. Industrial Costs and Controls. 3 units

Term Typically Offered: F, W, SP
Prerequisite: IME 223.

Estimation of manufacturing costs for production planning, cost analysis, and cost control. Planning, budgeting, and control processes. Costs, accounting data and analysis of variances for managerial control, inventory valuation, and decision making. Techniques of pricing, cost estimating and cost reduction, and activity-based costing. 3 lectures.

IME 240. Additional Engineering Laboratory. 1-2 units

Term Typically Offered: TBD
Total credit limited to 4 units, with a maximum of 2 units per quarter. 1 or 2 laboratories.

IME 244. Intermediate Design and Manufacturing. 2 units

Term Typically Offered: W
Prerequisite: IME 144. Corequisite: MATE 210 and MATE 215.
Recommended: IME 141 and IME 142.

Advanced computer-aided part design with geometric dimensioning and tolerancing, assemblies, and prototyping techniques for metal, polymer, and composite components. Communication of design information to manufacturing. Hands-on experience with non-traditional manufacturing processes. Not open to students with credit in IME 140. 1 lecture, 1 laboratory.

IME 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

IME 301. Operations Research I. 4 units

Term Typically Offered: F, W, SP
Prerequisite: MATH 244.

Systems modeling methodology, mathematical model formulations, linear programming, graphical and simplex methods. Sensitivity analysis. Integer and binary programming. Transportation, transshipment, assignment, and other network optimization models. Computer applications. 3 lectures, 1 activity.

IME 303. Project Organization and Management. 4 units

Term Typically Offered: F, W, SP
Prerequisite: Junior standing; IME 314 or IME 315.

Design and implementation of a major industrial/business systems project. Project planning considerations. Motivational and influence techniques used in project management. Scheduling techniques with risk assessment. Resource leveling and management under constraints. Reducing project duration. Monitoring progress with earned value analysis. Project audit and closure. Planning and implementation of a project. Application of project management software. 3 lectures, 1 laboratory.

IME 305. Operations Research II. 4 units

Term Typically Offered: F, W, SP
Prerequisite: IME 301; and STAT 312 or STAT 321.

Stochastic decision analysis. Utility models. Multi-criteria decision making models: Goal Programming and Analytic Hierarchy Process. Decision Biases. Markov processes and introduction to queuing models. Inventory models and analysis. Computer aided modeling and case studies. 3 lectures, 1 activity.

IME 312. Data Management and System Design. 4 units

Term Typically Offered: F, W, SP
Prerequisite: CSC 232.

Design and management of industrial databases and reporting systems. Relationships of financial accounting databases and production systems. Efficient data entry and reports, queries, macro function, and Internet based database applications. 3 lectures, 1 laboratory.

IME 314. Engineering Economics. 3 units

Term Typically Offered: F,W,SP,SPU
Prerequisite: MATH 241.

Economic analysis of engineering decisions. Determining rates of return on investments. Effects of inflation, depreciation and income taxes. Sensitivity, uncertainty, and risk analysis. Application of basic principles and tools of analysis using case studies. 3 lectures.

IME 315. Financial Decision Making for Engineers. 3 units

Term Typically Offered: F,W,SP,SPU
Prerequisite: MATH 142.

Develop business case for engineering projects. Investment evaluation using after-tax Net Present Value and Internal Rate of Return. Sensitivity analysis. Financial statements. Fully allocate costs. Use of spreadsheets. Application to personal finance. Critical examination of financial systems for decision making. Course may be offered in classroom-based or online format. 3 lectures.

IME 319. Human Factors Engineering. 3 units

Term Typically Offered: F, W, SP
Prerequisite: PSY 201 or PSY 202, and junior standing.

Analysis of factors influencing the efficiency of human work. Data on the physical and mental capacities of persons, the physical environment, work organization, and the problem of aging. Design of machines, operations, human computer interface and work environment to match human capacities and limitations, including the handicapped. Multidisciplinary team project. 3 lectures.

IME 320. Human Factors and Technology. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: STAT 217, STAT 218, or STAT 312.

Analysis of cognitive, sensory and physical limitations and capabilities of operators and users of technology, in working and living environments. Analysis of pertinent databases for a proactive approach to designing user-centered products, systems and work environment. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

IME 326. Engineering Test Design and Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: STAT 321 with a grade of C- or better.

Data gathering and statistical testing applied to industrial engineering and manufacturing fields. Experimental methods for product and process evaluation and comparisons; interpretation of engineering data. Engineering experimental design, linear and nonlinear regression, ANOVA, and multifactor ANOVA. Utilization of existing computer software. 4 lectures.

IME 327. Test Design and Analysis in Manufacturing Engineering. 4 units

Term Typically Offered: F, SP

Prerequisite: STAT 321 with a grade of C- or better or consent of instructor; or ME 236.

Sampling and descriptive statistics. Central limit theorem. Hypothesis testing for means and variances. Analysis of variance (ANOVA) and factorial design. Applications in engineering design, reliability manufacturing, and inspection. Design projects. 3 lectures, 1 laboratory.

IME 330. Fundamentals of Manufacturing Engineering. 4 units

Term Typically Offered: F, W

Prerequisite: IME 141 or ITP 341; IME 142; CE 204 or CE 208; MATE 210; MATE 215; IME 244 or ME 251 and IME 143 or IME 146.

Engineering analysis of manufacturing processes for casting, molding, forming, joining, and machining. Design for manufacturability and estimation of production costs. Process design strategies. Setup and operation of processing equipment; inspection methods. Field trip to manufacturing center. 3 lectures, 1 laboratory.

IME 331. Intermediate Metal Casting. 4 units

Term Typically Offered: W

Prerequisite: MATE 210; and IME 143, IME 144, or IME 146.

Recommended: IME 141.

Foundry process advantages. Mold and core design. Tooling and patterns. Materials properties and selection. Design for casting principles. Modeling gating systems, solidification and defect analysis. 3 lectures, 1 laboratory.

IME 335. Computer-Aided Manufacturing I. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 244; IME 244 or ME 251 and IME 143 or IME 146; and CSC 101, CSC 231, CSC 232 or CSC 234.

Use of the computer to communicate design information to manufacturing. Computer Numerical Control (CNC) programming. Use of CAD/CAM software. Overview of manufacturing systems in an automated environment, including cellular manufacturing and computer-aided process planning. 3 lectures, 1 laboratory.

IME 336. Computer-Aided Manufacturing II. 4 units

Term Typically Offered: W

Prerequisite: IME 335, ME 212, MATH 244, or consent of instructor.

Advanced Computer Numerical Control (CNC) programming and machine tool control. Machining center operation. Parametric representation of curves and surfaces. Computation of tool paths. Product and process design for CNC machining. CNC machine tool dynamics. Introduction to flexible manufacturing systems and robotics. Design and fabrication projects. 3 lectures, 1 laboratory.

IME 342. Manufacturing Systems Integration. 4 units

Term Typically Offered: W

Prerequisite: IME 223, MATH 241 and STAT 321.

Analysis and design tools for production planning and control of manufacturing systems, including mathematical modeling of operations and computer tools for simulation. Decision-making models for manufacturing systems. Overview of material requirements planning, inventory models and analysis, and facilities design. 3 lectures, 1 laboratory.

IME 356. Manufacturing Automation. 4 units

Term Typically Offered: F, W

Prerequisite: EE 321.

Computers in the factory automation environment. Basic control theory including feedback. Programming and use of programmable logic controllers (PLC), human-machine interface (HMI), and industrial control systems. Interfacing of electro-mechanical systems; analog and digital inputs, output; programmable controllers. Computer process control. 3 lectures, 1 laboratory.

IME 372. Applications of Enterprise Analytics. 4 units

Term Typically Offered: F, W, SP

Prerequisite: IME 212, IME 312, IME 326, MATH 244.

Applications of Big Data Analytics to solve enterprise problems with the emphasis on manufacturing organizations. Data clustering and classification algorithms. Applications of multiple, stepwise, and logistic regression methods. Over-fitting and regularization. Machine learning, neural networks, and Bayesian analysis. Healthcare analytics. 3 lectures, 1 laboratory.

IME 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limit to 4 units.

IME 401. Sales Engineering. 2 units

Term Typically Offered: F, SP

Prerequisite: Senior standing in engineering.

Concepts and principles of engineering in sales. Role of the professional engineer in the analysis, design, development, production, and final application of a product or system required by the buyer. 2 seminars.

IME 403. Software Product Management. 4 units

Term Typically Offered: W

Prerequisite: Senior standing; CSC/CPE 101, CSC 231, or CSC 232.

Product Manager role for software products. Software technologies and domain knowledge. Managing performance metrics, product features, and engineering requirements. Analysis of user data. Marketing, business planning, and product launch. Course may be offered in classroom-based or online format. 4 lectures.

IME 408. Systems Engineering. 3 units

Term Typically Offered: TBD

Prerequisite: CSC 232.

Systems, subsystems, static, dynamic, closed and open systems. Systems design requirements. Performance measures. Process control modeling and analysis, transform methods, linear systems analysis, digital, adaptive and steady state optimal control. Optimal search strategies. Manufacturing, maintenance, replacement and engineering applications. 3 lectures.

IME 409. Economic Decision Systems. 3 units

Term Typically Offered: TBD

Prerequisite: IME 239 and IME 314, or IME 315; and IME 305.

Economic evaluation of information for complex decisions. Analysis of risks and uncertainties. Bayes theory and models. Decision theory, sequential decisions, and value of information applied to financial evaluation and control. Major project justification procedures. 3 lectures.

IME 410. Production Planning and Control Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: IME 342 or IME 305.

Building blocks of manufacturing resource planning (MRP II). Demand forecasting, production planning, master scheduling development. BOM and inventory files. MRP computations and operational challenges. Capacity analysis and production control in push and pull systems. Enterprise Resource Planning (ERP). Principles of JIT and lean manufacturing. Not open to students with credit in IME 580. 3 lectures, 1 laboratory.

IME 415. Service Enterprises Engineering and Management. 4 units

Term Typically Offered: SP, SU

Prerequisite: IME 305 or IME 342.

Analysis, design, and control of service enterprises. Topics include workforce planning, customer queueing, service facility location, yield management, and call center management. Case studies from the entertainment, retailing, and financial sectors, among others. Course may be offered in classroom-based or online format. 4 lectures.

IME 416. Automation of Industrial Systems. 3 units

Term Typically Offered: SP

Prerequisite: IME 356, ME 305 or equivalent.

Automation in manufacturing and warehousing. Economic selection of automation systems. Projects in automation. 2 lectures, 1 laboratory.

IME 417. Supply Chain and Logistics Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: IME 342 or IME 410.

Overview of key logistics and supply chain management concepts. Models and solution methods for the design, control, operation, and management of supply chains. Techniques that are used to analyze supply chains. Team projects in partnership with industry sponsors. Course may be offered in classroom-based or online format. 4 lectures.

IME 418. Product-Process Design. 4 units

Term Typically Offered: F

Prerequisite: Senior standing in engineering or graduate standing.

Recommended: IME 450.

Innovative new product design and creative development process. Design for manufacturability. Study of constraints for prototyping, designing, testing, processing, quality, and customer satisfaction. Life-cycle analysis. Examination of relevant environmental and ethical issues. Design projects using real world problems. 3 lectures, 1 laboratory.

IME 420. Simulation. 4 units

Term Typically Offered: F, W, SP

Prerequisite: IME 305; IME 326 or IME 327; or graduate standing.

Queueing systems. Design and analysis of production and service systems using the simulation technique. System modeling. Random number and function generators, programming, and characteristics of simulation languages. Design projects using real world problems. 3 lectures, 1 laboratory.

IME 421. Engineering Management. 3 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202; junior standing. Recommended: IME 314 or IME 315.

Theory and principles for manufacturing, service, and non-profit organizations. Competitive advantage. Strategic planning and operations management for organizations and teams in a rapidly changing, diverse environment. Engineering management concepts, including effective ethical, sustainable, and inclusive leadership practices. Team-based projects and cases. 3 seminars.

IME 424. Industrial Engineering in Healthcare. 4 units

Term Typically Offered: SP

Prerequisite: IME 223.

Industrial engineering applications in healthcare industry. Background on healthcare reform. Simulation, operations research, supply chain, facility engineering, process improvement case studies. Emerging topics in industrial engineers in healthcare, change management, patient flow, Lean Six Sigma, nursing, patient safety, and decision-making. 4 lectures.

IME 428. Engineering Metrology. 4 units

Term Typically Offered: TBD

Prerequisite: IME 143, IME 144, or IME 146; and IME 326, IME 327, IME 503, or STAT 312.

Measurement of attributes and variables; standards, accuracy and precision; mechanical, electronic and optical/laser measurement systems. Contact and non-contact measurement; straightness, flatness and squareness; GDT (Geometric Dimensioning and Tolerancing); CMM (Coordinate Measurement Machines); surface roughness; metrology for electronic products. 3 lectures, 1 laboratory.

IME 429. Ergonomics Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: IME 319; and IME 326 or IME 327.

Investigation of various physiological, sensory, and cognitive capabilities and limitations of people in work and living environments through laboratory data collection, design of experiments and statistical analysis. 1 laboratory.

IME 430. Quality Engineering. 4 units

Term Typically Offered: F,W,SP,SPSU

Prerequisite: IME 326, IME 327, IME 503, STAT 302, or STAT 312.

Quality history and philosophies. Cost of quality. Quality control tools. Statistical control charts for variables and attributes. Process capability. Measurement system analysis. Acceptance sampling. Reliability and life testing methods. Quality improvement tools: Quality Function Deployment, Failure Modes and Effects Analysis, Six Sigma, quality standards and systems. Course may be offered in classroom-based or online format. 4 lectures.

IME 432. Additive Manufacturing. 4 units

Term Typically Offered: W, SP

Prerequisite: IME 144 or ME 251; and MATE 210. Recommended: IME 330.

Engineering principles, materials, equipment, design for manufacturing, process flow, post processing, and applications of additive manufacturing processes, including: photopolymerization, powder bed fusion, extrusion, direct energy deposition, printing, binder jetting, and sheet lamination. Process selection, environment considerations, safety, and cost analysis for manufacturing. 3 lectures, 1 laboratory.

IME 435. Reliability for Design and Testing. 3 units

Term Typically Offered: TBD

Prerequisite: IME 326, IME 327, IME 503 or STAT 312.

Reliability concepts and mathematical models, mechanical device reliability, electrical device reliability, systems reliability and maintainability, reliability data, assurance program elements. Not open to students with credit in IME 542. Course may be offered in classroom-based or online format. 3 lectures.

IME 441. Engineering Supervision I. 1 unit

Term Typically Offered: F,W,SP,SPSU

Prerequisite: Consent of instructor.

Theory and principles of supervision. Application of fundamental concepts and techniques of supervision provided by assignment in engineering laboratories. 1 laboratory each.

IME 442. Engineering Supervision II. 1 unit

Term Typically Offered: F,W,SP,SPSU

Prerequisite: Consent of instructor.

Theory and principles of supervision. Application of fundamental concepts and techniques of supervision provided by assignment in engineering laboratories. 1 laboratory each.

IME 443. Facilities Planning and Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: IME 144; IME 223; IME 314 or IME 315; and IME 305 or IME 342. Recommended: IME 319 and IME 420.

Design concepts and input requirements in planning and design of new or renovation of existing manufacturing systems. Product, process, and flow and activity analysis techniques. Flow lines and buffering techniques. Computer-aided layout design and evaluation. Design of handling systems. Math models of location problems. Multidisciplinary team project. 3 lectures, 1 laboratory.

IME 450. Manufacturing Process and Tool Engineering. 4 units

Term Typically Offered: SP

Prerequisite: MATH 244, IME 330. Recommended: IME 335.

Engineering design of fixtures and tools for manufacturing processes. Interpretation of engineering design specifications. Analysis of cost, quality, productivity, and safety in tool design. Mechanical analysis of tool design. Detailed process design for net shape production and component design for manufacture. Process and tool design projects. 3 lectures, 1 laboratory.

IME 451. Radio Frequency Identification and Sensing System Design. 4 units

Term Typically Offered: TBD

Prerequisite: EE 201 or IME 156 or ITP 150.

Radio frequency identification (RFID) and its role in asset and inventory management, facility access, payment transaction systems, and other applications. RFID and the Industrial Internet of Things (IIOT). Physics and types of RFID and other sensing devices. Economic analysis. Multidisciplinary project teams design RFID systems for real-world applications. 2 lectures, 2 laboratories.

IME 456. The Industrial Internet of Things. 4 units

Term Typically Offered: SP

Prerequisite: IME 156, EE 143, or EE 145; and IME 212, CSC 365, or DATA 301.

Project-based introduction to internet-enabled device technologies for industrial applications. Sensor setup; data collection, storage, and analysis for real-time control and decision-making; internet communications standards and protocols; ethics and security issues. Applications such as asset tracking, machine maintenance, smart buildings. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

IME 457. Advanced Electronic Manufacturing. 4 units

Term Typically Offered: TBD

Prerequisite: IME 156 or EE 143 or EE 201.

Design and fabrication of commercial electronic products; PCB layout design, bill of material analysis and component purchasing, production planning and scheduling, programming automated surface-mount assembly line, marketing of products. Multidisciplinary project teams exposed to real-world challenges of electronics manufacturers. 2 lectures, 2 laboratories.

IME 458. Microelectronics and Electronics Packaging. 4 units

Term Typically Offered: TBD

Prerequisite: EE 112 or EE 113 or EE 201. Recommended: MATE 210.

Materials, processes, and reliability of microelectronics and electronics packaging, surface mount assembly and printed circuit board fabrication. Organic substrates and ceramic substrates. Mechanical design, thermal, and electrical considerations in electronic packaging. Design for manufacturability. Overview of optoelectronics packaging and other emerging technologies in microelectronics and electronic packaging. Project on design and manufacture of an electronic device. 3 lectures, 1 laboratory. Crosslisted as CPE 488/IME 458/MATE 458.

IME 460. Introduction to Value Chain Analysis. 3 units

Term Typically Offered: SP

Prerequisite: IME 223 or ITP 303; and senior standing.

Introduction to value chain concepts and their application to the analysis and improvement of business operations. Application of lean principles to optimize the value chain. 3 lectures.

IME 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

IME 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

IME 481. Senior Design Project I. 2 units

Term Typically Offered: F, W

Prerequisite: IME 326 or IME 327; IME 314 or IME 315. Corequisite: IME 301 or IME 330; IME 342 or IME 420. Recommended: IME 303; IME 410 or IME 418; and IME 430; completion of all IME 300-level coursework.

Culminating design project typical of problems in professional practice. Individual or group projects involving system design, modeling, analysis and testing. Problem definition, planning, scheduling, literature review, conceptual and alternative designs. Develop business case for communication and formal reports documenting project methodology. Professional ethics. Field trip may be required. 1 lecture, 1 laboratory.

IME 482. Senior Design Project II. 2 units

Term Typically Offered: W, SP

Prerequisite: IME 481. Recommended: IME 417; IME 429, IME 443 or IME 450.

Continuation of IME 481. Involves research methodology: project design, analysis, implementation, and/or testing. Project results documented in thesis-like formal reports suitable for reference library and formal oral presentations. Professional ethics. Field trip may be required. 1 lecture, 1 laboratory.

IME 483. Senior Design Project III. 2 units

Term Typically Offered: F, SP

Prerequisite: IME 482.

Continuation and completion of project from IME 482. Focus on testing and experimentation of implemented design project. Evaluation of project sustainability and impacts of societal, organizational, economic, and environmental nature. Project results and recommendations summarized and presented in formal reports suitable for reference library and formal oral presentations. Field trip may be required. 1 lecture, 1 laboratory.

IME 495. Cooperative Education Experience. 4-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

IME 500. Individual Study. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to students who have demonstrated ability to do independent work.

IME 503. Applied Statistical Methods in Engineering. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Application of important statistical distributions in engineering and management. Coverage of sampling distributions and their roles in design of experiments. Applications of hypothesis testing, ANOVA, analysis of covariance, multiple and nonlinear regressions in industry and service systems. Introduction to nonparametric analysis. 3 lectures, 1 laboratory.

IME 507. Graduate Seminar. 2 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Seminars in industrial engineering, integrated technology management, and engineering management by researchers and practitioners from academia and industry. Preparation for conducting research. Presentation of student research projects. Overview of graduate education requirements. Ethics issues in research. 1 seminar, 1 laboratory.

IME 510. Systems Engineering I. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

Project management. Scheduling and budgeting. Queuing theory. Process control and life-cycle cost analysis. Contracts and negotiation. 4 lectures.

IME 511. Systems Engineering II. 4 units

Term Typically Offered: TBD

Prerequisite: IME 510, graduate standing or consent of instructor.

Risk management. Design strategies to meet system/mission requirements. Design for supportability, manufacturability, reliability, etc. Quality function development and quality control concepts. 4 lectures.

IME 520. Advanced Information Systems for Operations. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor. Recommended: IME 410.

Advanced information systems (IS) applications in manufacturing and service operations. Introduction of common IS applications, such as manufacturing execution systems; reporting systems; capacity planning systems; scheduling systems; and customer inquiry systems. Industry-specific analysis of IS requirements and availability. 4 seminars.

IME 527. Design of Experiments. 4 units

Term Typically Offered: W

Prerequisite: IME 326 or IME 327 or IME 503 or STAT 312.

Experimental design principles. Comparative experiments for population parameters. ANOVA and randomized block design. Factorial designs, the 2^k factorial designs, and factorial designs with blocks. Fractional factorial designs. Response surface methodology. Fitting regression models. Design projects using real world problems. Substantial use of statistical software. 3 lectures, 1 laboratory.

IME 535. Change Management for Engineering Leaders. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing.

Engineering change processes, configuration management, implementation in project management, cultural change, change models, and personal change. Processes used in reacting and managing changes. Learning through discussion and applications which might include conflict, emotion and differing opinions. 4 lectures.

IME 541. Advanced Operations Research. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing and consent of instructor.

Operations Research approach to model building. Linear programming and sensitivity analysis. Network flow models. Integer programming, large scale linear programming. Goal programming and multi-attribute decision making. Dynamic programming. Nonlinear programming and search methods. Applications in model building and computer solutions in planning, resource allocation, scheduling, and other industrial and service operations. 3 lectures, 1 laboratory.

IME 542. Applied Reliability Engineering. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing. Recommended: IME 326 or IME 327 or IME 503 or STAT 312.

Reliability terminology and bathtub curve. Failure distributions: Exponential, Lognormal, and Weibull. Probability plotting. Reliability of systems. Maintainability and availability. Reliability in design; Load-strength analysis; Failure modes and effects analysis; Fault tree analysis. Reliability testing; Reliability management. Not open to students with credit in IME 435. 3 lectures, 1 laboratory.

IME 543. Applied Human Factors. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing or consent of instructor. Recommended: IME 326 or IME 327 or IME 503.

Human factors/ergonomics analysis and evaluation of automation, mobile communication technology, and interface design for Internet websites. Usability analysis of current hardware/software products with an emphasis on a user-centric design approach. Team-based projects. 3 seminars, 1 laboratory.

IME 544. Advanced Topics in Engineering Economy. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing. Recommended: Undergraduate course in engineering economy.

Review of interest calculations and comparison of economic alternatives. Replacement analysis. Capital planning and budgeting. Mathematical programming and capital budgeting. Utility theory. Decision making under risk and uncertainty. Application of simulation in risk modeling. Benefit-cost analysis. Multi-attribute decision making. Analytic hierarchy process. 3 lectures, 1 activity.

IME 545. Advanced Topics in Simulation. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing. Recommended: IME 420.

Validation of simulation models. Statistical techniques for variance reduction. Experimental design and optimization. Comparison of attributes of simulation languages. Review of current manufacturing and service industry applications. Case studies. 3 lectures, 1 laboratory.

IME 546. Large-Scale Optimization. 4 units

Term Typically Offered: SP

Prerequisite: IME 301 or graduate standing. Recommended: DATA 301 or IME 212.

Large-scale network, assignment and scheduling problems. Data reduction and aggregation techniques. Distributed optimization. Constructive solution techniques. Model relaxations. Improvement heuristics. Multi-start and randomized algorithms. 3 lectures, 1 laboratory.

IME 549. Network Analysis and Optimization. 4 units

Term Typically Offered: W

Prerequisite: IME 212 or DATA 301; and IME 301 or IME 305; and graduate standing or consent of instructor.

Basic network concepts, topologies, and applications. Representation and visualization. Social networks, relationship types, and data collection. Analysis metrics including cohesion, centrality, subgroups, and equivalence. Survivable networks. Network manipulation and design. Cost-optimized network computation including trees and cycles. 3 lectures, 1 laboratory.

IME 556. Technological Project Management. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Projects in industrial organizations and enterprises. Emerging technologies and project management. Relationship to strategic plans and managing change in organizations. Formulating, selecting, structuring, and planning projects. Project organization and control. Overcoming barriers. Application of project management software. 3 seminars, 1 laboratory.

IME 565. Predictive Data Analytics for Engineers. 4 units

Term Typically Offered: F

Prerequisite: IME 372 or DATA 301 and graduate standing; or consent of instructor. Recommended: IME 326, MATH 206, or MATH 244; and STAT 302 or STAT 312.

Applications of predictive data analytics to enhance the performance of engineering systems, processes, and products. Data processing, analysis, and visualization. Supervised and unsupervised learning. Ensemble learning, random forests, support vector machines, neural networks, and clustering. Model biases and data ethics. 3 lectures, 1 laboratory.

IME 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Directed group study of selected topics for advanced students. Open to graduate students and selected seniors. Topic lists will be provided with class schedule outlines. 1 to 4 seminars.

IME 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

IME 577. Engineering Entrepreneurship. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

The special requirements of entrepreneurship in a high-tech environment. Guest lectures, focused seminar topics, a business plan project, and case studies provide the tools to evaluate and pursue technology-based business opportunities. 4 lectures.

IME 580. Manufacturing Systems. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing.

Modern approaches in production and inventory planning and control to support large-scale manufacturing systems, material requirements planning (MRP I), manufacturing resource planning (MRP II), and just-in-time (JIT) manufacturing systems. Enterprise resource planning (ERP) and integration with financials. Information requirements, operational issues, and policy matters. Not open if credit in IME 410. Course may be offered in classroom-based or online format. 4 seminars.

IME 596. Graduate Project/Internship. 1-5 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of instructor.

Integrative learning experience through internship and project. Focus on a significant industrial or research problem in an engineering field. Project involves student(s), faculty, and sponsoring representative(s) in a collaborative learning environment, and culminates in a comprehensive written report. Total credit limited to 5 units.

IME 599. Thesis. 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of instructor.

Systematic study of a significant problem under faculty supervision. Both a written thesis and an oral defense are required. Total credit limited to 9 units.

Industrial Technology and Packaging (ITP)

undefined

ITP Courses**ITP 100. Student Orientation, College Success and Career Readiness. 1 unit**

Term Typically Offered: F

Orientation to ITP major and concentrations. Development of a personalized graduation plan. Skills for academic success: goal setting, time management, study skills, registration strategies, overall adjustment to college life, including connection to a social peer network and Career Readiness. Field trip required. 1 activity.

ITP 125. Introduction to Supply Chain and Packaging Systems. 3 units

Term Typically Offered: F

Comprehensive overview of topics and opportunities in Industrial Technology and Packaging. Discusses fundamentals of product and package design, operations, supply chain management, innovation, and sustainability as related to curriculum. Includes practical application of tools to address real world challenges. 3 lectures.

ITP 150. Industrial Power Systems. 4 units

Term Typically Offered: SP

Corequisite: PHYS 123.

A survey of common industrial power systems. Labs include fundamentals of electrical/electronic circuits, fluid power, internal combustion engines and renewable energy sources. 3 lectures, 1 laboratory.

ITP 203. Personal Leadership - 7 Habits. 4 units

Term Typically Offered: W

Learn and practice the what, why, and how of personal leadership. Uses the 7 Habits of Highly Effective People framework to provide students with skills they will use repeatedly in their careers and life. Course offered online only. 4 lectures.

ITP 211. Industrial Safety and Quality Program Leadership. 4 units

Term Typically Offered: W

Prerequisite: ITP 150.

Effective program development and leadership to implement safety and quality process improvement. Application of industrial leadership, knowledge, skills and methods to develop and implement total safety and quality management programs. Class project includes the oral presentation. 3 lectures, 1 activity.

ITP 233. Product Modeling and Communication. 4 units

Term Typically Offered: F, W, SP

Fundamental theory and practice of digital modeling with emphasis on hands-on use of two dimensional and three dimensional modeling software commonly used in industry. Includes part/assembly modeling, geometric dimensioning/tolerancing and fundamental skills in communicating product design data in accordance with industry standards. 2 lectures, 2 activities.

ITP 234. Packaging Design Fundamentals. 4 units

Term Typically Offered: F, SP

A comprehensive overview of fundamental structural and graphic concepts for package design. Focus on design thinking, two-dimensional and three-dimensional form creation, design elements, visual perception, photo rendering, and rapid prototyping. 3 lectures, 1 laboratory.

ITP 260. Manufacturing Processes and Materials. 4 units

Term Typically Offered: W, SP

Prerequisite: CHEM 111 or CHEM 124 or CHEM 127.

Introduction to a wide variety of manufacturing processes and materials with emphasis on metallic products. Analysis of relationships among manufacturing processes, materials and product design. Provides experiential learning on safe and efficient operations of manufacturing equipment. 3 lectures, 1 laboratory.

ITP 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ITP 275. Industrial Facility Systems and Equipment. 4 units

Term Typically Offered: TBD

Prerequisite: ITP 150. Corequisite: ITP 211.

Develop an understanding of contemporary issues in modern industrial facilities. Emphasis on support systems and equipment such as heating and cooling; material handling; electrical, hydraulic, pneumatic power systems; and energy management. Includes facilities sustainability and lean practices. 3 lectures, 1 activity.

ITP 302. Developing and Presenting New Enterprise Strategies. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs); and BUS 346.

Taking new industrial enterprise concept to launch. Planning and management of product-based start-up including integration of: product development; manufacturability and costs; outsourcing; channel selection; supply chain; inventory and scheduling. Application to project case study. Emphasis on developing effective technical presentations. 2 lectures, 2 activities.

ITP 303. Lean Six Sigma Green Belt. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: STAT 217, STAT 218, STAT 251, or any 300 or 400 level statistics course.

Develop skills to function as lean six sigma leader. Discussion and problem sessions cover lean six sigma green belt body of knowledge: define, measure, analyze, improve, control. Team skills necessary to complete projects. Course may be offered in classroom-based or online format. 4 lectures.

ITP 326. Product Design and Development. 4 units

Term Typically Offered: F, SP

Prerequisite: ITP 233 or BUS 310.

Overview of user-centered design methods involving sketching and quick prototyping techniques for new product development. Topics include: design thinking, identification of user needs, concept generation/selection/testing, industrial design, visual perception, ergonomics, sustainable design, product architecture, and intellectual property. 3 lectures, 1 laboratory.

ITP 330. Packaging Fundamentals. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing or Industrial Technology and Packaging Major; completion of GE Area A with grades of C- or better; completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Overview of packaging functions, materials and development. Discuss value addition to product-package systems via various packaging materials, processes, design and protective packaging for global distribution. Illustrates the impact of packaging on environment. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ITP 341. Packaging Polymers and Processing. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Related

Prerequisite: Junior standing or Industrial Technology and Packaging Major; completion of GE Area A with grades of C- or better; CHEM course in GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs); and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Physical and chemical properties of plastic materials and processing techniques. Evaluation of current materials and technologies to reduce waste and to improve reuse and recycling. Applied laboratory using common industry processes emphasizes relationships among processing, structure, properties, and consumer response. Course may be offered in classroom-based, or hybrid format. 3 lectures, 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ITP 371. Supply Chain Management in Manufacturing and Services. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: A grade of C- or better, or consent of instructor, in: MATH 141 or MATH 221, and STAT 217 or STAT 218 or STAT 251 or any 300 or 400 level statistics course.

Introduction to supply chain management and performance metrics. Supply or value chains dealing with hard goods and services from design to daily management. Project management techniques and technology for making and implementing decisions. Course may be offered in classroom-based or online format. 4 lectures.

ITP 390. Industrial Automation. 4 units

Term Typically Offered: W, SP

Prerequisite: ITP 260.

Programming and setup of computer-controlled manufacturing/assembly machinery. Includes introduction to smart manufacturing and industrial internet of things. Familiarization with CNC machines, robots, 3D printing, programmable logic controllers and online data monitoring. 3 lectures, 1 laboratory.

ITP 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

ITP 403. Lean and Quality Systems Management. 4 units

Term Typically Offered: F, W

Prerequisite: ITP 303; Business majors must have formally declared their concentration to enroll.

Process improvement and quality assurance viewed from systems perspective including cost, time, and process. Lean thinking and tools studied as problem solving approach achieving continuous improvement through waste elimination and variability reduction. Projects improve processes in manufacturing, supply chain or service. 4 lectures.

ITP 404. Lean Six Sigma Green Belt Certification Project. 4 units

Term Typically Offered: SP

Prerequisite: ITP 303.

Tools and concepts required to complete a Lean Six Sigma Green Belt Certification project (LSSGB). Supervised independent completion of an LSSGB project for a client selected by the student. Written and verbal presentation of process and results.

ITP 406. Professional Technical Selling. 4 units

Term Typically Offered: F, SP

Prerequisite: BUS 346.

Technical competencies in complex business-to-business selling through project selling teams, providing extended product/service solutions to customer buying committees. Individual mock sales presentations (with written proposals) and team case study presentations. 4 lectures.

ITP 408. Fiber-Based Packaging. 4 units

Term Typically Offered: W, SP

Prerequisite: ITP 330.

Design of packaging systems using paper, paperboard, corrugated fiberboard, and other fiber-based materials. Physical and chemical properties, manufacturing, converting operations, commercial applications, and sustainability. Survey of tests and procedures for fiber-based packaging materials and packaging products following ASTM, TAPPI, and ISO standards. 3 lectures, 1 laboratory.

ITP 409. Packaging Machinery and Processes. 4 units

Term Typically Offered: F, SP

Prerequisite: ITP 330.

Integrated study of packaging machinery and processes from a practical and operational viewpoint. Understanding basic processes and interrelationship between packaging machinery and type of product, production layout and efficiency, material handling and distribution equipment, quality control and ancillary systems. 3 lectures, 1 activity.

ITP 410. Operations Planning and Control. 4 units

Term Typically Offered: F, W

Prerequisite: BUS 391; and ITP 303 or ITP 371.

Linking supply chain operations to deliver value to the end customer. Contrasting of advanced manufacturing concepts, such as pull systems, sales and operations planning, mixed model manufacturing, level production, and theory of constraints to traditional materials requirements planning systems. 3 lectures, 1 activity.

ITP 411. Packaging Sustainability. 4 units

Term Typically Offered: F, SP

Sustainability Focused

Prerequisite: ITP 330.

A comprehensive overview of cradle-to-cradle sustainability concerns that apply to the packaging life cycle, tools for measuring & reporting sustainability and communicating sustainability initiatives. 3 lectures, 1 laboratory.

ITP 412. Instrumental Analysis of Packaging Polymers. 4 units

Term Typically Offered: W

Prerequisite: ITP 341.

Overview of various analytical methods and tools used for the evaluation of polymers and other packaging materials including thermal characterization, spectroscopy, chromatography. Qualitative and quantitative analysis of the matter. Identification of polymeric materials and morphology. Mass transfer measurement. 3 lectures, 1 laboratory.

ITP 413. Packaging Quality Assessment. 4 units

Term Typically Offered: SP

Prerequisite: ITP 341 and ITP 408.

Overview of the role that packaging quality plays in consumer packaged goods. Techniques used for testing and evaluating the quality of consumer product packaging, including material quality assessment, product-package interaction and human-package interaction. 3 lectures, 1 laboratory.

ITP 414. Packaging Laws & Regulations. 4 units

Term Typically Offered: W

Prerequisite: ITP 408 and ITP 411.

Comprehensive overview of the U.S. laws and regulations applicable to packaging of different types of consumer products, and related government organizations. Awareness of legal and regulatory requirements related to packaging solutions. Course may be offered in classroom-based or online format. 4 lectures.

ITP 415. Supply Chain and Logistics. 4 units

Term Typically Offered: SP

Sustainability Related

Prerequisite: One of the following: ITP 303, ITP 326, ITP 330, or ITP 341; and ITP 371.

Key concepts, tools, and approaches for making effective supply chain and logistics decisions in support of business goals. Practical management issues and applications are the focus rather than theoretical, mathematical optimization. Business cases and simulations are used to illustrate and explore best practices. 4 lectures.

ITP 419. Cooperative Education/Internship. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Approval of area chair, junior standing, and a CPSLO cumulative GPA of at least 2.5 without being on academic probation.

Work experience in business, industry, government and other areas of student career interest. Periodic written progress reports, final report, and evaluation by work supervisor required. Total credit limited to 4 units.

ITP 428. Commercialization of New Technologies. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BUS 342, BUS 346, or ITP 326.

Concepts, frameworks, and experiences necessary to understand the business potential of technology innovations and determine if one or more sustainable market opportunities can be identified to exploit them. Hands-on exercises and real new inventions to illustrate concepts. 4 lectures.

ITP 430. Healthcare Packaging. 4 units

Term Typically Offered: W

Prerequisite: ITP 330.

Study of packaging systems for pharmaceuticals, nutraceuticals, and medical devices. Characteristics and properties of materials, forms, and sterilization methods. Design principles for products for healthcare. Laboratory exercises on packaging operations, materials, and evaluation methods. International and federal regulations and standards. Field trip may be required. 3 lectures, 1 laboratory.

ITP 461. Senior Project I. 2 units

Term Typically Offered: F, W

Prerequisite: Consent of instructor.

Selection and completion of a project under faculty supervision. Projects typical of problems graduates must solve in their field of employment. Project results presented in a formal report, and must be completed in two quarters. Minimum 120 hours total time.

ITP 462. Senior Project II. 2 units

Term Typically Offered: W, SP

Prerequisite: Consent of instructor.

Selection and completion of a project under faculty supervision. Projects typical of problems graduates must solve in their field of employment. Project results presented in a formal report, and must be completed in two quarters. Minimum 120 hours total time.

ITP 464. Applied Industrial Technology Senior Project Seminar. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing.

Selection and analysis of industrial and technological problems and opportunities in directed individual or group-based projects. Problems typical to those which graduates could encounter in their fields of employment. Formal report required. Minimum 120 hours of total time. 4 seminars.

ITP 467. Applied Business and Production Management. 4 units

Term Typically Offered: F, SP

Prerequisite: ITP 211, ITP 233, ITP 260, ITP 326, and BUS 346.

An integrative manufacturing business and production systems experience, including design, prototyping, processing, quality control, resource management, cost-control, marketing, sales, packaging, and technical documentation. Team projects reflect the real-world, dynamic environment of product development and production. 2 lectures, 2 laboratories.

ITP 468. Blockchain in Business. 4 units

Term Typically Offered: SP

Prerequisite: BUS 392 or CSC 101 or CSC 232 or ECON 395.

Blockchain technology in business, with application examples in management (including HR, marketing and accounting), operation systems (manufacturing, supply chain and other service systems), finance (including stock trading, real estate transactions and P2P payment systems) and entrepreneurship. 4 lectures. Crosslisted as BUS/ITP 468.

ITP 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study and seminars in selected topics in industrial technology. Open to undergraduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 lectures.

ITP 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ITP 475. Distribution Packaging Dynamics. 4 units

Term Typically Offered: F

Prerequisite: ITP 330.

Survey of tests and procedures for packaging materials and packaging products following ASTM and ISTA standards. The testing procedures include tests for shock, vibration, drop and impact as prescribed for shipment by truck, rail, sea, and air. Hands-on product/packaging testing for quality control. 3 lectures, 1 laboratory.

ITP 485. Packaging Development. 4 units

Term Typically Offered: SP

Prerequisite: ITP 341, ITP 408, and ITP 475.

Integrative approach to developing new packaging systems by balancing the needs of the different value chain stakeholders. Interplay of package design for end-users, marketing, manufacturing, distribution, and disposal. Class project focuses on cross-disciplinary collaboration, design thinking, discovery, and disruptive innovation. 3 lectures, 1 laboratory.

ITP 500. Individual Study. 1-6 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing and formal petition with approval from the Associate Dean.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Maximum of 6 units may be applied to degree requirements.

ITP 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Directed group study of selected topics for advanced students. Open to undergraduate students. The Class Schedule will list topic selected. Total credit limited to 16 units. 1 to 4 seminars.

ITP 571. Selected Advanced Topics Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Directed group laboratory study of selected topics for advanced students. The Schedule of Classes will list title selected. Total credit limited to 16 units. 1-4 laboratories.

ITP 599. Industrial and Technical Studies Thesis. 3 units

Term Typically Offered: TBD

Prerequisite: OCOB graduate standing or approval from the Associate Dean.

Completion of a thesis involving individual research that is significant to the field of industrial and technical systems. A formal written proposal must be accepted by the Associate Dean of OCOB Graduate Programs before work begins. Course satisfies culminating experience requirement through the completion of the comprehensive thesis. Total credit limited to 9 units.

Interdisciplinary Studies in Liberal Arts (ISLA)

undefined

ISLA Courses

ISLA 123. Introduction to Science, Technology & Society. 4 units

Term Typically Offered: F, W, SP

Introductory exploration of science, technology, and society relationships from interdisciplinary perspectives in the arts, communications, humanities, and social sciences. Topic areas include ethics and public policy; gender, race and culture; media arts and society; science and risk communication. Course may be offered in classroom-based or online format. 4 lectures.

ISLA 201. Introduction to Interdisciplinary Studies. 4 units

Term Typically Offered: F, W

Prerequisite: COMS 218, ES 112, HIST 206, HIST 216, ISLA 123, JOUR 219, RELS 201, WGQS 201, or WGQS 210.

Focus on methods, concepts and skills in the Interdisciplinary Studies major, and on career and graduate school opportunities. Refinement of individualized plan of study to reflect professional, educational, and personal goals. 4 lectures.

ISLA 240. Introduction to Media Arts and Technologies. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs). Recommended: TH 210.

The intimate connection between the desire for artistic expression and current technologies that can assist that expression. Examination of technologies for theater, sound, cinema, gaming, and embodied media. Guest speakers with expertise. 4 lectures.

ISLA 255. Introduction to Interdisciplinary Theory and Methods. 4 units

Term Typically Offered: F, W

Prerequisite: ISLA 201.

Introduces students to interdisciplinary research and how interdisciplinarity integrates with disciplinary methods and theories. Course content develops integrated foundational knowledge and perspective for conducting original interdisciplinary research in higher level courses. Preparation for ISLA 355, senior project, and senior portfolio. 4 lectures.

ISLA 303. Values and Technology. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Humanistic investigation into the theoretical and practical applications of technology with specific reference to the social effects of technological change. Course may be offered in classroom-based or online format. For all majors. Non-technical. 4 lectures. Crosslisted as HNRS 304/ISLA 303. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ISLA 305. Topics in Public Engagements with STEM. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Areas B1 and B2 with a grade of C- or better; and completion of one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs) with a grade of C- or better. Recommended: STAT 130, STAT 217, STAT 218 or STAT 313.

Exploration of contemporary issues in science, technology, engineering, and mathematics (STEM), with an emphasis on public engagements with STEM research and teaching cultures. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ISLA 316. London: From Roman Colony to World Capital. 4 units

Term Typically Offered: SU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; enrollment in London Study program; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Corequisite: ISLA 319.

Selective examination of the historical and cultural legacy of London within the development of Western civilization as well as its influence on the submission and eventual emergence of the non-Western world in the twentieth century. An analytical and interpretive study of how London shaped the social, economic, political and legal institutions of Western society. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

ISLA 319. London Activities. 2 units

Term Typically Offered: SU

CR/NC

Prerequisite: Enrollment in London Study program.

Analytical and interpretive survey of the principal center of the English speaking world. The development of London from Roman administrative capital to modern cultural, financial and political colossus. Credit/No Credit grading only. 2 activities.

ISLA 320. Topics and Issues in Values, Media and Culture. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

The interplay of values, media, and culture from an interdisciplinary perspective. Descriptive subtitles assigned to each course. The Class Schedule will list topic selected. 4 lectures. Total credit limited to 8 units with different subtopic; repeatable in same term. Crosslisted as HNRS/ISLA 320. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

ISLA 330. Cal Poly Land: Nature, Technology, and Society. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course from GE Area B1 (GE Area B4 for students on the 2019-20 or earlier catalogs); one course from GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Scientific investigation of the natural features of the Cal Poly landscape and their transformations by land management technology. Environmental, economic, social, and political effects of agriculture, resource extraction, construction technology. Educational, land-use, long term planning issues. 4 lectures. Crosslisted as AG/ISLA/SCM/UNIV 330. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ISLA 335. Feminist Studies of Popular Culture and Whiteness. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Feminist approaches to the analysis of representations of whiteness in contemporary media, and considerations of the U.S. cultural values these images illuminate. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ISLA/WGQS 335. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs). Formerly WGS 335.

ISLA 340. Media Arts and Technologies: Storytelling. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ISLA 240 or the completion of an ART or TH course in GE Area C3.

Creation of expressive technology-based pre-production works for standard television and film presentation to interactive technological environments. Pre-production script work, storyboarding, flow chart design, collaborative story creation, audience testing, and basic animatic construction. Visiting professionals work with students directly in collaborative workshops. 3 lectures, 1 activity.

ISLA 341. Media Arts and Technologies: Cinematic Process. 4 units

Term Typically Offered: W, SP

Prerequisite: ISLA 340.

Cinematic production including adapting a narrative for different presentation formats, storyboarding, lighting, sound recording, cinematography and editing. Production of short works designed as foundational pieces that can be built upon individually or in teams in independent study. Visiting professionals run collaborative production workshops. 2 lectures, 2 activities.

ISLA 350. The Global Environment. 4 units

Term Typically Offered: W, SP, SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ISLA 355. Interdisciplinary Research Methods. 4 units

Term Typically Offered: F

Prerequisite: ISLA 201. Recommended: STAT 130, STAT 217, STAT 218, or STAT 251.

Exploration of interdisciplinary research strategies, theory, and process, including contextualization, perspective taking, and integration. Development of knowledge and skills needed to conduct original interdisciplinary research. Preparation for senior project or senior portfolio. Course may be offered in classroom-based or online format. 4 lectures.

ISLA 393. Action-oriented Ethnography. 4 units

Term Typically Offered: F

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and one of the following: ANT 201, ANT 202, ANT 250, ISLA 123, any Ethnic Studies (ES) course, any Women's and Gender Studies (WGS) course.

Development of knowledge and skills needed to conduct original action-oriented ethnographic research. Grounded in the reflexive 'turn' in anthropology and critical race, science, technology and society, queer and feminist studies, students will engage questions of authority, representation, critical consciousness and justice. 4 lectures. Crosslisted as ANT/ISLA 393.

ISLA 395. Science Communication. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: Completion of GE Area A with grades of C- or better and completion of one GE Area B course.

Examination of science communication in a variety of contexts. Issues covered may include: scientific journal articles, boundary-work, information deficit models, public understanding/awareness of science, accommodated science, mediated science, popular science. 4 lectures. Crosslisted as COMS/ISLA 395.

ISLA 400. Independent Study Project. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior or senior standing and consent of instructor.

Independent study project focusing more than one discipline on a problem of study related to the liberal arts. May involve travel and/or independent research. Bibliography and study plan submitted in advance. Total credit limited to 8 units.

ISLA 411. Technology and Community Engagement. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and sophomore standing.

Onsite work with community and design team to develop and evaluate the use of innovative technologies as tools for community development and empowerment. Through guided discussion with instructor, guests, and community members, work through intercultural collaboration and design issues, conduct qualitative and quantitative research, and present works-in-progress. Field trip may be required. Total credit limited to 8 units. 4 lectures. Crosslisted as ISLA/LAES 411.

ISLA 440. Advanced Interdisciplinary Studies Seminar. 4 units

Term Typically Offered: W

Prerequisite: ISLA 201. Recommended: ISLA 355.

Advanced examination of selected interdisciplinary topic. Topics will be examined from perspective of multiple disciplines. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based or online format. 4 lectures.

ISLA 450. Summer Internship in London. 12 units

Term Typically Offered: SU

CR/NC

Prerequisite: Junior standing and consent of the Director of London Study.

Extensive work experience in London. Administration, orientation, and supervision of independent work by the service provider. Intensive two-week orientation, eight-week full-time work assignment. Evaluation by instructor, internship supervisor, and employer. Credit/No Credit grading only. 4 lectures, 8 units of independent study.

ISLA 456. Advanced Project-Based Learning in Science, Technology & Society. 4 units

Term Typically Offered: W, SP

Prerequisite: ISLA 123; completion of GE area A with grades of C- or better; completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs) or completion of GE Area B2; junior standing; and minor in one of the following: Ethics, Public Policy, Science and Technology; Gender, Race, Culture, Science, and Technology; Media Arts, Society and Technology; or Science and Risk Communication.

Develop, maintain and lead teams in a project investigating complex multi-disciplinary issues in science, technology and society. Integrate knowledge across the minors. 2 lectures, 2 activities.

ISLA 461. Senior Project. 4 units

Term Typically Offered: W, SP

Prerequisite: Senior standing; and ISLA 355.

Selection and completion of an interdisciplinary research or creative project that draws upon at least two disciplines. 4 seminars.

ISLA 465. Internship. 2-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: ISLA 201 and consent of instructor.

Supervised training, research, and work in public and private organizations. Evaluations by supervisor and written reports by student required. Major credit limited to 4 units; total credit limited to 12 units. Credit/No Credit grading only.

ISLA 470. Selected Advanced Topics. 2-4 units

Term Typically Offered: TBD

Prerequisite: Junior standing; and completion of GE Area A with grades of C- or better.

Focused interdisciplinary study of an issue impacting or impacted by the liberal arts, combining the insight and expertise of more than one of the liberal arts disciplines, especially as they interface with the sciences and technology and/or international studies in a study abroad setting. The Class Schedule will list topic selected. Total credit limited to 8 units; repeatable in same term. 2 to 4 lectures.

Italian (ITAL)

undefined

ITAL Courses

ITAL 101. Elementary Italian I. 4 units

Term Typically Offered: F

Beginning Italian. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Not open to students with credit in ITAL 141. 4 lectures.

ITAL 102. Elementary Italian II. 4 units

Term Typically Offered: W

Prerequisite: ITAL 101, ITAL 141, or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Not open to students with credit in ITAL 142. 4 lectures.

ITAL 103. Elementary Italian III. 4 units

Term Typically Offered: SP

Prerequisite: ITAL 102, ITAL 142, or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Not open to students with credit in ITAL 143. 4 lectures.

ITAL 141. Elementary Italian I Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: Acceptance into the Cal Poly Global Program.

Beginning Italian. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in ITAL 101. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

ITAL 142. Elementary Italian II Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: ITAL 101, ITAL 141, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in ITAL 102. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

ITAL 143. Elementary Italian III Study Abroad. 4 units

Term Typically Offered: SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: ITAL 102, ITAL 142, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to student with credit in ITAL 103. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

ITAL 201. Intermediate Italian I. 4 units

Term Typically Offered: F
2019-20 or earlier catalog: GE Area C5
Prerequisite: ITAL 103, ITAL 143, or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Italian within an intercultural context. Not open to students with credit in ITAL 241. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

ITAL 202. Intermediate Italian II. 4 units

Term Typically Offered: W
Prerequisite: ITAL 201, ITAL 241, or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Italian within an intercultural context. 4 lectures.

ITAL 241. Intermediate Italian I Study Abroad. 4 units

Term Typically Offered: SU
2020-21 or later catalog: GE Area C2
2019-20 or earlier: GE Area C1 or C2
2019-20 or earlier: GE Area C1 or C2
2019-20 or earlier catalog: GE Area C5
Prerequisite: ITAL 103, ITAL 143, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Italian. Language taught in its intercultural context at a Cal Poly Global Program study center. JOUR 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

JOUR 285. Introduction to Multimedia Journalism. 4 units

Term Typically Offered: F, W, SP

Prerequisite: JOUR 203.

Introduction to the social, editorial and technical issues surrounding the web as a form of communication. Fundamentals of gathering, writing and publishing content for the web that includes using photographs, sound, pictures and video to tell a story. 3 lectures, 1 laboratory.

JOUR 302. Mass Media Law. 4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: JOUR 203.

Legal basis for freedom of expression. Court decisions resolving conflicts between First Amendment and right to fair trial, privacy, reputation.

Source confidentiality, freedom of information, contempt, copyright.

Federal and state laws and regulations affecting mass media reporters, editors, publishers, news directors. Course may be offered in classroom based or online format. 4 lectures.

JOUR 303. Web Audio and Video. 4 units

Term Typically Offered: W, SP

Prerequisite: JOUR 203.

Concepts and technologies associated with bringing video, still images and audio online. Process of web-based audio and video creation, production and publication, from inception to publishing. 3 lectures, 1 laboratory.

JOUR 304. Public Affairs Reporting. 4 units

Term Typically Offered: F

Prerequisite: JOUR 203.

Experience leading to advanced skills in reporting and writing stories about contemporary issues, government and courts. Field and laboratory assignments in beat reporting, public meeting coverage, writing style, investigative techniques, and online journalism research. 3 lectures, 1 laboratory.

JOUR 312. Public Relations. 4 units

Term Typically Offered: F, W

Prerequisite: Sophomore standing.

Overview of the history, growth and ongoing development of public relations as an information management function in a multicultural environment. Public relations practices used in commercial and non-profit sectors, and firsthand application of public relations skills. 4 lectures.

JOUR 320. Cal Poly Radio Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: JOUR 220 and consent of instructor.

Field experience in radio station operations at KCPR-FM, the campus radio station. Emphasizes support functions such as recording announcements, planning and carrying out promotions, underwriting, events and other station management duties. Required of students also hosting live or prerecorded on-air programs. Total credit limited to 8 units. Open only to students on staff at KCPR-FM. 1 laboratory.

JOUR 331. Contemporary Advertising. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A3 with a grade of C- or better.

Principles of advertising, copy, layout, and production across media platforms, including online, mobile, social, print and broadcast. Economic, political, and social function of advertising in a free market society. Advertising ethics. Social responsibility of advertising in a multicultural environment. Emerging advertising technologies. Course may be offered in classroom-based or online format. 4 lectures.

JOUR 333. Broadcast News. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area A3 with a grade of C- or better.

Beginning broadcast news writing and reporting for radio and television. Emphasis on developing news judgment and producing radio newscasts. Introduction to television studio equipment and procedures. Lab experience includes writing and reporting live on-air for KCPR. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

JOUR 334. Editing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: JOUR 203.

Editing for print and online publication. Using the Associated Press style. Writing headlines, captions, summaries and other display text. Repurposing various media content for the web and other formats. Legal and ethical issues for the editor. 3 lectures, 1 laboratory.

JOUR 338. Podcasting. 4 units

Term Typically Offered: SP

Prerequisite: JOUR 285 or JOUR 303.

Acquire and apply the skills to write, produce, edit, distribute, market and monetize a podcast. Lab experience includes writing and producing a podcast pilot and episodes. 3 lectures, 1 laboratory.

JOUR 342. Public Relations Writing and Editing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: JOUR 312.

Theory, strategic planning and practice in writing persuasive public relations copy for diverse internal and external audiences. Emphasis on gathering information, preparing news releases, newsletters and other communications vehicles. Analysis of various media case studies. 4 lectures.

JOUR 345. Social Media for Strategic Communication. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Exploration of emerging technologies and media that influence strategic communication, including public relations and advertising practices. Knowledge, insight and analytical skills necessary to create, evaluate, and execute social media campaigns. 4 lectures.

JOUR 346. Broadcast Announcing and Production. 4 units

Term Typically Offered: F, W, SP

Prerequisite: JOUR 203. Recommended: JOUR 285.

Develop on-air skills in the performance of voice-overs, stand-ups, hosting and the production of televised public service announcements. Emphasis on the effective use of audio and non-linear video editing techniques as well as broadcast writing. 3 lectures, 1 laboratory.

JOUR 347. Public Relations Research. 4 units

Term Typically Offered: W, SP

Introduction to the role of research in the field of public relations. Overview of measurement tools and methodologies for gathering and analyzing data. Practical applications. 4 lectures. Prerequisite JOUR 312.

JOUR 348. Electronic News Gathering. 4 units

Term Typically Offered: TBD

Prerequisite: JOUR 203 and JOUR 333.

Instruction on electronic news gathering (ENG) that includes advanced news writing, field reporting and editing for broadcast. Emphasis on developing research techniques, interviewing skills, responsible and effective non-linear video editing, compelling use of natural sound and professional on-air delivery. 3 lectures, 1 laboratory.

JOUR 350. Data Journalism. 4 units

Term Typically Offered: W, SP

Prerequisite: JOUR 285; and one of the following: STAT 130, STAT 217, STAT 218, or STAT 251.

Introduction to the techniques of finding stories in data sets and presenting them visually via interactive online displays. Emphasis on adapting emerging tools for digital storytelling. 3 lectures, 1 laboratory.

JOUR 352. Advanced News Reporting Practicum. 4 units

Term Typically Offered: F, W, SP

Prerequisite: JOUR 334.

Reporting lab for the print and digital editions of Mustang News. Total credit limited to 8 units. 3 lectures, 1 laboratory.

JOUR 353. Advanced Broadcast Journalism Practicum. 4 units

Term Typically Offered: F, W, SP

Prerequisite: JOUR 303 or JOUR 333.

Students produce a live 30-minute CPTV newscast per week, or a one-hour KCPR segment that incorporates news, information, talk and entertainment. Emphasis on news producing, reporting and announcing skills. Total credit limited to 8 units. 3 lectures, 1 laboratory.

JOUR 378. Advanced Sportscasting. 4 units

Term Typically Offered: SP

Prerequisite: JOUR 285 and JOUR 303 or JOUR 346.

Develop advanced skills in sports reporting and writing for broadcast, web and social media. Play-by-play. Job search in sports journalism. Field trip may be required. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

JOUR 385. Media Innovation and Entrepreneurship. 4 units

Term Typically Offered: W, SP

Prerequisite: Sophomore standing. Recommended: BUS 310 or COMS/JOUR 218.

Innovation and entrepreneurship in journalism. Human-centered design. Business plan development. Designing content to reach and engage an audience. Identifying opportunities to create sustainable journalistic enterprises for real-world application in Cal Poly's student-run media organizations. 4 lectures.

JOUR 387. Sports Communication. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A with grades of C- or better.

Examination of the interrelationship between sports and community including participant, sports organization, sports media, and sports fan. Explores how these interrelationships reinforce social values, challenge social norms, and social identities relevant to sports and cultural values. 4 lectures. Crosslisted as COMS/JOUR 387.

JOUR 390. Visual Communication for the Mass Media. 4 units

Term Typically Offered: F,W,SP, SU

Prerequisite: JOUR 203.

Theory and application of visual communication in today's media. Visual communication's power to inform, educate and persuade. Production of visual media across digital, broadcast and print platforms. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

JOUR 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP, SU

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

JOUR 401. Global Communication. 4 units

Term Typically Offered: SP

Prerequisite: JOUR 203 and junior standing.

Global communications facilities and operations; world transmission of information; survey of world wire services and international print and electronic media. Analysis of press operations under varying government ideologies, including third world countries. 4 seminars.

JOUR 402. Journalism Ethics. 4 units

Term Typically Offered: F, W, SP
Prerequisite: JOUR 203.

Current issues revolving around the social responsibility of the mass media. Role of the public, government, and media in considerations of media accountability. Professional behavior in media organizations. 4 seminars.

JOUR 403. Multimedia Production for Public Relations and Advertising. 4 units

Term Typically Offered: F
Prerequisite: JOUR 303 or JOUR 346.

Development of fundamentals pertaining to the technical and aesthetic proficiencies used in video communication for public service, public relations, marketing and advertising. All aspects of pitching, planning, production, editing and post-production in addition to historical and regulatory aspects of communication policy and mandates. 3 lectures, 1 laboratory.

JOUR 407. Feature Writing. 4 units

Term Typically Offered: W
Prerequisite: JOUR 203.

Practice in researching, interviewing and the writing and marketing of both long and short form nonfiction articles for various media outlets. Analysis of similar work in current distribution. 4 lectures.

JOUR 410. Advanced Digital Journalism. 4 units

Term Typically Offered: TBD
Prerequisite: JOUR 285.

Apply the theories and applications of digital journalism to the development and publication of innovative digital content. 3 lectures, 1 laboratory.

JOUR 412. Public Relations and Crisis Management. 4 units

Term Typically Offered: SP
Prerequisite: Junior standing.

Apply contemporary public relations theory to turn crisis into opportunity. Analyze Homeland Security and FEMA best practices using public relations framework and strategy. Practical exercises in planning, implementing, and evaluating public relations messages in a variety of media platforms. 4 lectures.

JOUR 413. Public Relations Campaigns. 4 units

Term Typically Offered: W
Prerequisite: JOUR 312 and JOUR 342.

Development of skills needed to plan and conduct internal and external public relations campaigns for corporate and non-profit organizations. Includes goal setting, management of resources, budgeting, creation of campaign communications, and outcomes analysis. 4 lectures.

JOUR 415. Senior Project: Public Relations Practicum. 4 units

Term Typically Offered: F, W, SP
Prerequisite: Senior standing and JOUR 413.

Capstone experience that applies public relations principles and strategies in the context of the student-run agency, Central Coast PRspectives. Emphasis on proposing, creating, managing, and implementing public relations campaigns. 3 lectures, 1 laboratory.

JOUR 418. Copyright, Trademark, Patent and Commercial Speech in Digital Media. 4 units

Term Typically Offered: F
Prerequisite: Junior standing; and completion of GE Area A with a grade of C- or better.

Examination of intellectual property rights covered by copyright, trademark and, to a limited degree, patent law as well as commercial speech rights in a digital media age. Emphasis on intellectual property rights as they affect content creators and other publishers in a digital world. 4 lectures.

JOUR 444. Media Internship. 3 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: JOUR 352, JOUR 353, or JOUR 413; and internship coordinator approval.

Application of techniques on daily basis with media under supervision of department faculty. Credit/No Credit grading only.

JOUR 455. Media Management Laboratory. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Field experience in management of Cal Poly student media. Emphasizes planning, leadership, media integration, goal-setting and measurement. Required of students in elected leadership positions in KCPR-FM, Mustang News, Central Coast PRspectives and MNTV. Total credit limited to 8 units. Intended for students in leadership positions of student media. 1 laboratory.

JOUR 460. Senior Project. 4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor; Journalism majors only.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

JOUR 462. Senior Project: Media Practicum. 4 units

Term Typically Offered: F, W, SP
Prerequisite: Senior standing.

Capstone experience that applies principles and tools of print, broadcast and digital journalism to tell engaging stories across multiple platforms. Emphasis on integrating text, video, audio, graphics, search engine optimization and social networking to produce content for digital publication. 3 lectures, 1 laboratory.

JOUR 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor; junior standing.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

JOUR 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

Kinesiology (KINE)

undefined

KINE Courses

KINE 100. Physical Activity for Students with Disabilities. 1 unit

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor.

Basic instruction in the development of skill, knowledge of rules, background and analysis of techniques, and desirable attitudes toward physical fitness and participation in physical activities. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 108. Basketball. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 109. Bowling. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 110. Cycling. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes while engaging in cycling in outdoor settings. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 112. Intermediate Bowling. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: KINE 109.

Basic instruction and the development of skill, knowledge of rules, background and analysis of techniques, and desirable attitudes toward physical fitness and participation in physical activities. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses nor more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 121. Golf. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 122. Golf, Int.-Adv.. 1 unit

Term Typically Offered: F, SP

CR/NC

Prerequisite: KINE 121.

Basic instruction and the development of skill, knowledge of rules, background and analysis of techniques, and desirable attitudes toward physical fitness and participation in physical activities. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses nor more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 125. Jogging. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 129. Yoga/Pilates. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Practice of yoga/pilates to improve fitness, flexibility, core strength and endurance. Safe and effective training techniques are emphasized. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 131. Group Fitness Cardio/Strength. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Group fitness activities designed to improve all components of fitness. Concepts of aerobic endurance, muscular strength and agility are discussed to assist in the formulation of individual goals. Safe and effective training techniques are emphasized. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 132. Racquetball. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 134. Pickleball. 1 unit

Term Typically Offered: F, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Fundamental pickleball skills, knowledge, and strategy such that beginning to intermediate levels of play are attained. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 137. Self-Defense. 1 unit

Term Typically Offered: TBD
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 138. Karate. 1 unit

Term Typically Offered: TBD
CR/NC

Basic instruction and the development of skill, knowledge of rules, background and analysis of techniques, and desirable attitudes toward physical fitness and participation in physical activities. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses nor more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 3 units. Credit/No Credit grading only. 1 laboratory.

KINE 139. Soccer. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 140. Ultimate Disc. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Introduction to Ultimate Disc including fundamental skills, rules of the game and active participation. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 141. Flag Football. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Fundamental flag football skills, knowledge, and strategy such that beginning to intermediate levels of play are attained. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 143. Swimming for Non-Swimmers. 1 unit

Term Typically Offered: TBD
CR/NC

Introduction to aquatic environments for adults for the pursuit of swimming and other aquatic exercise. Developing positive attitudes, good swimming habits and safe practices in and around the water. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 144. Beginning Swimming. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Development of swimming strokes for adults to improve confidence and endurance as novice swimmers. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 145. Intermediate Swimming. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Continuation of stroke refinement for adult swimmers who have basic beginning level swimming skills. Practice of swimming strokes and swimming drills for the enhancement of confidence and improvement of swimming effectiveness and endurance. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 147. Advanced Swimming and Conditioning. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Lap swimming for advanced swimmers. Organized structured swim workouts with emphasis on increasing fitness. Participants should have ability to swim three of the four competitive strokes: freestyle, backstroke, breaststroke, butterfly. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 148. Tennis. 1 unit

Term Typically Offered: F, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 151. Volleyball. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 152. Beach Volleyball. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes while engaging in Beach Volleyball. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 154. Weight Training. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes in a weight room setting. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 176. Fitness Walking. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Basic instruction in skill development, knowledge, and desirable attitudes toward physical activity. Enrollment is open to all students. Total limited to 12 units of credit earned in basic instructional KINE courses (KINE 100-176) for non-majors. The following restrictions apply to KINE 100-176: 1) no more than two different activity courses or more than one section of an individual activity course may be taken for credit in any one quarter, 2) a student may not enroll simultaneously in the same quarter for a beginning, intermediate and/or advanced activity course, and 3) any level of an activity course can be repeated only once for credit. Total credit limited to 2 units. Credit/No Credit grading only. 1 activity.

KINE 180. Orientation to Kinesiology. 2 units

Term Typically Offered: F, W
CR/NC

Prerequisite: Kinesiology majors only.

Disciplinary and professional perspectives in Kinesiology and the Kinesiology program at Cal Poly. Credit/No Credit grading only. 2 lectures.

KINE 181. Responding to Emergencies: Comprehensive First Aid, CPR, AED. 2 units

Term Typically Offered: F, W, SP
CR/NC

An American Red Cross certification course designed to help participants recognize and respond appropriately to cardiac, breathing, and first aid emergencies. Skills and knowledge necessary in the treatment of life-threatening emergencies, other injuries, and sudden illnesses. Red Cross First Aid/CPR/AED certifications issued upon successful completion of certification requirements. Credit/No Credit grading only. 1 lecture, 1 activity.

KINE 201. Introductory Undergraduate Research. 1-2 units

Term Typically Offered: F, W, SP

Introduction to individual research, studies, or surveys of selected problems. Intended for students in Kinesiology and in Public Health. Total major credit limited to 4 units. Total credit limited to 6 units. Crosslisted as HLTH/KINE 201.

KINE 240. Introductory Principles of Exercise Science and Sport. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area B2; completion of GE Area B4 with a grade of C- or better in one course (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs). Recommended: MATH 119; and PHYS 121 or PHYS 141.

Introduction to scientific bases of exercise and sport including concepts associated with health-related components of fitness. 3 lectures, 1 laboratory.

KINE 266. Sport and Exercise Psychology. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area A with grades of C- or better. Recommended: PSY 201 or PSY 202.

An introduction to the field of sport and exercise psychology. Psychological theories and research related to topics such as motivation to participate in sport and exercise, exercise and psychological well-being, teamwork and leadership, aggression, anxiety, psychological response to athletic injuries and exercise addiction. Course may be offered in classroom-based or online format. 4 lectures.

KINE 278. Introduction to Perspectives in Physical Activity. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area A with grades of C- or better; and GE Area C2. Recommended: PHIL 230 or PHIL 231.

Current and historical trends in human movement from philosophical perspectives including Western and Eastern intellectual traditions; exploration of the effects of culture on the view of the human body and the understanding of the role of physical activity and sport in people's lives. 4 lectures.

KINE 280. Assessment Team for Health Promotion Activities. 1 unit

Term Typically Offered: TBD

CR/NC

Prerequisite: HLTH/KINE 250, HLTH/KINE 255, or HLTH/KINE 260.

Recommended: KINE 319 and STAT 218.

Introduction to multiple health and fitness assessment protocols through participation in community-based activities and/or as assistants on faculty-led research projects. Experiential and service learning. Total credit limited to 3 units. Credit/ No Credit grading only. 1 activity. Crosslisted as HLTH/KINE 280.

KINE 281. Health Ambassadors. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: HLTH/KINE 250, HLTH/KINE 255, or HLTH/KINE 260.

Recommended: FSN 210 and HLTH/KINE 265.

Introduction to health education and promotion strategies through participation in community-based activities and/or as assistants on faculty-led projects. Experiential and service learning. Field trip required. Total credit limited to 3 units. Credit/No Credit grading only. 1 activity. Crosslisted as HLTH/KINE 281.

KINE 290. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

KINE 301. Functional Anatomy. 3 units

Term Typically Offered: F, W, SP

Prerequisite: PHYS 121; and BIO 231 or BIO 409.

Functional organization of the human musculoskeletal system and articulations. Emphasis on the roles of muscles during activities of daily living, human performance settings, and the structure of freely movable joints. 3 lectures.

KINE 303. Physiology of Exercise. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BIO 231; and BIO 232 or BIO 361. Recommended: CHEM 128.

Application of human physiology to exercise situations. 3 lectures, 1 laboratory.

KINE 304. Pathophysiology and Exercise. 3 units

Term Typically Offered: F, W, SP

Prerequisite: KINE 303.

Selected human diseases, their etiology, pathophysiology, symptoms, diagnosis, effects on health and physical performance, and as affected by preventive or therapeutic exercise. 3 lectures.

KINE 307. Adapted Physical Activity. 4 units

Term Typically Offered: W, SP

Prerequisite: Sophomore standing; completion of GE Area B2; and completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

Major categories of disabling conditions with implications for the development of physical activity programs for specific disabilities. 3 lectures, 1 laboratory. Formerly KINE 407.

KINE 308. Motor Development. 3 units

Term Typically Offered: F, SP

Prerequisite: GE D4.

Motor development of individuals from birth to maturity. Emphasis on interrelationship between motor and cognitive characteristics and affective needs and interests. Course may be offered in classroom-based or online format. 3 lectures.

KINE 310. Concepts and Applications in Elementary Physical Education. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Movement as it relates to physical motor skill development, fitness, wellness, social development, cross-cultural understanding, and self-image. 2 lectures, 1 activity.

KINE 312. Motor Learning and Control. 4 units

Term Typically Offered: F, W

Prerequisite: STAT 217 or STAT 218.

Variables which control sensory-motor integration. Analysis of factors which affect the acquisition of motor skills as related to the learning process and the learning environment. 3 lectures, 1 activity. Formerly KINE 402.

KINE 319. Introduction to Research Methods in Kinesiology. 4 units

Term Typically Offered: F, W

Prerequisite: STAT 217 or STAT 218.

Principles of reading and conducting research including contemporary research perspectives in kinesiology. Basic and applied research. Quantitative, qualitative, and mixed methods. 3 lectures, 1 laboratory.

KINE 323. Sport and Gender. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); completion of GE Area D1; and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs) or in GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Intersections between sport and gender in American society. Identification and discussion of the historical, sociological and psychological issues that affect the sport experiences of males and females, especially as they relate to class, race/ethnicity, sexuality, and political movements. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

KINE 324. Sports, Media and American Popular Culture. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Issues of class, race/ethnicity, gender, various forms of deviance, and other aspects of social life. Exploration of sociological manifestations and implications of how the aforementioned social issues are embedded in mediated forms of sports. 3 lectures, 1 activity. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

KINE 330. Group Fitness Instruction. 2 units

Term Typically Offered: TBD

Prerequisite: KINE 301.

Overview of basic components of group fitness classes in school, corporate and commercial fitness settings. Development of instructional competencies in the primary components of a group fitness class. Instructional techniques, professionalism, leadership styles conducive to promoting exercise adherence. Application of basic theory related to human anatomy, biomechanics, exercise physiology, training principles and use of relevant ACSM guidelines. 2 activities.

KINE 337. Early Fieldwork Experience. 1-3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing.

Practical work experience in related activities of kinesiology under qualified supervision. Total credit limited to 9 units. Credit/No Credit grading only. Minimum of 2 laboratory hours per week per unit. Crosslisted as HLTH/KINE 337. Formerly KINE 437.

KINE 349. Exercise Testing and Prescription for Healthy Populations. 4 units

Term Typically Offered: F, W, SP

Prerequisite: KINE 303. Recommended: KINE 301.

Selected areas of health/fitness screening and evaluation. Application of components relevant to the development and administration of exercise programs for healthy persons regardless of sex, age, or functional capacity. 3 lectures, 1 laboratory. Formerly KINE 452.

KINE 366. Applied Sport Psychology. 3 units

Term Typically Offered: SP

Prerequisite: one of the following: PSY 201, PSY 202, or KINE 266.

Psychological considerations of the coach-athlete relationship and mental preparation of teams and individuals for competition and practice. Application of sport psychology principles to develop a psychological skills training program appropriate to enhance performance and well-being in sport or exercise contexts. Course offered in hybrid format with classroom-based and online learning. 3 lectures.

KINE 400. Special Problems for Advanced Undergraduates. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Individual investigation, research, studies, or surveys of selected problems. Total major credit limited to 4 units. Total credit limited to 6 units. Crosslisted as HLTH/KINE 400.

KINE 401. Managing Exercise, Health, and Sport Programs. 3 units

Term Typically Offered: F, SP

Prerequisite: One course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Planning, organizing and controlling programs in public, commercial, private and clinical exercise, health and sport program settings. Emphasis on legal, ethical and budgetary considerations. 3 lectures.

KINE 403. Biomechanics. 4 units

Term Typically Offered: F, W, SP

Prerequisite: KINE 301.

Fundamental biomechanical concepts and their application to human systems including examination of activities of daily living and performance settings. Examination of the effects of chronic and acute loading on the body. 3 lectures, 1 laboratory.

KINE 406. Neuroanatomy. 4 units

Term Typically Offered: SP

Prerequisite: BIO 231 and BIO 232; or ZOO 331 and ZOO 332, or BIO 361.

Structure and function of the human nervous system. Afferent and efferent pathways involved in perception and action. Behavioral aspects of motor control and related neurological dysfunction and pathologies. Designed for allied health professions students. 4 lectures.

KINE 408. Exercise and Health Gerontology. 3 units

Term Typically Offered: W, SP

Prerequisite: One of the following: KINE 250, KINE 255, or KINE 260; and KINE 304.

Special fitness, exercise, and health needs of elder adults. Theories of aging and age-related changes. Health and physical activity programs for elder adults. 3 lectures.

KINE 409. Interdisciplinary Study in Biomechanics. 4 units

Term Typically Offered: SP

Prerequisite: BMED 410 and CE 207 or CE 208; or KINE 403; or ME 326.

Examination of human motion biomechanics. Experimental and analytical methods in motion analysis based on rigid body dynamics. Protocols for protection of human subjects in research. Hypothesis-driven research in interdisciplinary teams, including written proposal development and written/oral communication of results to a scientific audience. 1 lecture, 3 activities. Crosslisted as BMED/KINE/ME 409.

KINE 412. Physical Activity and Public Health. 3 units

Term Typically Offered: SP

Prerequisite: CRP 214, HLTH 298, or KINE 319. Recommended: KINE 303.

Evaluation of scientific evidence supporting current physical activity guidelines for physical and mental well-being. Application of evidence-based strategies to promote physical activity at the individual, community, and policy levels. 3 lectures.

KINE 438. Adapted Physical Activity Fieldwork. 1-3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: KINE 307.

Practical experience in adapted physical activity programming. Students plan and conduct physical activity programs for people who are disabled. Total credit limited to 6 units. Credit/No Credit grading only.

KINE 440. Kinesiology/Public Health Practicum. 1 unit

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Supervised experience involving organizational and instructional responsibilities in activity, lecture and/or laboratory classes. Total credit limited to 3 units. Crosslisted as HLTH/KINE 440.

KINE 445. Electrocardiography. 4 units

Term Typically Offered: F, W

Prerequisite: KINE 303.

Basic principles of electrocardiography, including practical skills of the ECG technician. Recognition of normal ECG patterns and abnormal changes related to rhythm disturbances, conduction defects, myocardial ischemia/infarction, and exercise. 3 lectures, 1 laboratory.

KINE 446. Echocardiography. 4 units

Term Typically Offered: SP

Prerequisite: KINE 445.

Basic principles of echocardiography, including practical skills of the echocardiographer. Recognition of normal echocardiographic patterns and abnormalities, including those caused by pathology and exercise conditioning. 2 lectures, 2 laboratories.

KINE 449. Exercise Prescription for Diseased and Special Populations. 3 units

Term Typically Offered: W, SP

Prerequisite: KINE 304; KINE 349; and KINE 445. Recommended: KINE 459.

Use of medical history, physical examination, laboratory and exercise testing data for establishment of appropriate exercise programs for clinical and special populations. Course offered in hybrid format with classroom-based and online learning. 2 lectures, 1 laboratory.

KINE 451. Nutrition for Fitness and Sport. 4 units

Term Typically Offered: F, W, SP

Prerequisite: one of the following: KINE 250, KINE 255 or KINE 260; KINE 303; and KINE 319. Recommended: FSN 210 and CHEM 313.

Application of nutritional and metabolic facts to selected aspects of physical training, diet manipulation and modification in sport, nutritional supplementation and special dietary considerations for the young and old, male and female athletes. Course may be offered in classroom-based or online format. 4 lectures.

KINE 454. Exercise Metabolism. 4 units

Term Typically Offered: F, W

Prerequisite: KINE 303; KINE 319; and CHEM 216 or CHEM 312.

Recommended: CHEM 313.

Advanced understanding of metabolic and endocrine responses to exercise. How exercise impacts storage, delivery, and fuel use required for energy conversion. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

KINE 459. Personal and Group Fitness Instruction. 3 units

Term Typically Offered: F, W, SP

Prerequisite: KINE 301; KINE 303; KINE 312.

Instructional competencies in the primary components of a group fitness class and individually tailored personal fitness programs. Instructional techniques, professionalism, leadership styles conducive to promoting exercise adherence. Application of basic theory related to human anatomy, motor learning, exercise physiology, training principles and relevant ACSM guidelines. 1 lecture, 2 activities.

KINE 460. Experiential Senior Project. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: HLTH 402 or KINE 319; completion of GE Area A with grades of C- or better; and senior standing.

A comprehensive applied capstone experience that integrates content from Kinesiology courses under faculty supervision. Projects must be approved by the supervising faculty member. Minimum 30 hours. Credit/No Credit grading only.

KINE 461. Senior Project Report. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: HLTH 402 or KINE 319; and completion of GE Area A with grades of C- or better.

A comprehensive synthesis of professional literature that integrates content from kinesiology courses resulting in a report. Topic must be approved by the instructor. Course may be offered in classroom-based or online format. 1 seminar.

KINE 462. Research Honors Senior Project. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: HLTH 402 or KINE 319; completion of GE Area A with grades of C- or better; and consent of instructor.

Completion of an advanced research, or creative project. Intended for students taking a significant or leadership role in a professional area. Results may be submitted for poster presentation or other public/professional forum. Total credit limited to 4 units.

KINE 463. Exercise Science and Health Promotion Fieldwork. 1-3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior or senior standing and minimum GPA of 2.0.

Practical experience at an approved agency that provides exercise/fitness/health promotion programs. Students participate in program administration under the direct supervision of an approved on-site coordinator. Credit/No Credit grading only. Total credit limited to 3 units.

KINE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

KINE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

KINE 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 6 units; total credit limited to 12 units. Credit/No Credit grading only.

KINE 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 24 units. Credit/No Credit grading only.

KINE 500. Independent Study. 1-3 units

Term Typically Offered: F, W, SP

Prerequisite: KINE 517, graduate standing, and consent of instructor.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Only 6 units may be applied to degree requirements.

KINE 501. Evaluation of Literature and Current Trends in Kinesiology. 3 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Analysis and evaluation of published studies and current trends in kinesiology. 3 seminars.

KINE 503. Current Health Issues. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Current issues and trends in health, disease prevention, and the healthcare system. Socioeconomic, biologic, environmental, institutional and policy factors that influence health status, disparities in health, and positive health outcomes. 4 seminars.

KINE 504. Advanced Pathophysiology and Exercise. 3 units

Term Typically Offered: TBD

Prerequisite: graduate standing. Recommended: KINE 303 or equivalent.

Selected human diseases, their etiology, pathophysiology, symptoms, diagnosis, effects on health and physical performance, and as affected by preventive or therapeutic exercise. 3 lectures.

KINE 505. Introduction to Issues, Ethics and Policies in Teaching Kinesiology. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing.

Knowledge, skills, preparation and support for teaching Kinesiology activity and laboratory classes in the department. Prepares students to be supervisors and teachers in their current or future employment. Credit/No Credit grading only. 1 seminar, 1 activity.

KINE 510. Advanced Health Behavior Change Programs. 3 units

Term Typically Offered: TBD

Prerequisite: KINE 503 or KINE 504 and graduate standing.

Examination of contemporary research, theory and practice related to facilitating healthy behavior change. Analysis of health problems from biological, ecological, and psycho-social perspectives with emphasis on understanding the acquisition and maintenance of healthy behavior. 3 seminars.

KINE 511. Administration in Exercise and Health Settings. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Principles and techniques of administration in health, physical activity, and academic settings including budget, personnel supervision, risk management, leadership techniques, and facility management. 4 seminars.

KINE 517. Research Methods in Kinesiology. 4 units

Term Typically Offered: TBD

Prerequisite: KINE 501. Recommended: STAT 512 or STAT 513.

Quantitative, qualitative and mixed methods approaches to research in kinesiology. Selection of adequate problems for investigation; various sampling techniques and analyses; use of library facilities; manuscript requirements for the thesis. 4 seminars.

KINE 518. Research Prospectus and Proposal Writing. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: KINE 517.

Strategies for identifying academically valid research topics. Planning considerations for qualitative and quantitative research including grant writing, human subjects review, personnel, equipment, and timelines. Design and composition of effective research proposals. Credit/No Credit grading only. 2 seminars.

KINE 522. Advanced Biomechanics. 4 units

Term Typically Offered: TBD

Prerequisite: KINE 403.

Advanced biomechanical concepts applied to human movement, examination of research, and biomechanical analyses of movement activities. Performance, occupational, and clinical settings. Laboratory techniques including motion analysis, force platform, and electromyography. 3 seminars, 1 laboratory.

KINE 525. Advanced Motor Learning and Control. 3 units

Term Typically Offered: TBD
Prerequisite: KINE 402 or equivalent.

Analysis of control theories, research principles and motor learning variables involved in the acquisition of skilled movement with an emphasis on the behavioral level of learning. 3 seminars.

KINE 526. Advanced Sport and Exercise Psychology. 3 units

Term Typically Offered: TBD
Prerequisite: Graduate standing.

Theoretical and professional issues in the psychological foundations of sport and exercise. 3 seminars.

KINE 530. Advanced Physiology of Exercise. 4 units

Term Typically Offered: TBD
Prerequisite: KINE 303 and graduate standing.

Physiological determinants of physical work capacity and sports performance. 3 seminars, 1 laboratory.

KINE 536. Advanced Electrocardiography. 4 units

Term Typically Offered: TBD
Prerequisite: KINE 445.

Theory and application of electrocardiography and other techniques for cardiovascular assessment and treatment of cardiac disease and other abnormalities. 3 seminars, 1 laboratory.

KINE 537. Internship. 3-12 units

Term Typically Offered: TBD
CR/NC
Prerequisite: Graduate standing; consent of instructor.

Supervised work experience in an approved wellness/fitness clinical facility, school, or other faculty approved setting. Total credit limited to 12 units. Maximum of 6 units may be applied toward Master of Science in Kinesiology. Credit/No Credit grading only.

KINE 539. Effective Practice in Teaching and Coaching. 3 units

Term Typically Offered: TBD
Prerequisite: Graduate standing.

Observation and analysis of teaching physical education and coaching sports with special emphasis in pedagogical systems. 2 seminars, 1 laboratory.

KINE 570. Selected Advanced Topics. 4 units

Term Typically Offered: TBD
Prerequisite: Graduate standing.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

KINE 581. Graduate Seminar in Kinesiology. 1-3 units

Term Typically Offered: TBD
Prerequisite: Graduate standing.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 to 3 seminars.

KINE 585. Cooperative Education Experience. 6 units

Term Typically Offered: TBD
CR/NC
Prerequisite: Graduate standing.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 9 units. Credit/No Credit grading only.

KINE 599. Thesis or Project. 1-6 units

Term Typically Offered: TBD
Prerequisite: KINE 517, KINE 518 and consent of instructor.

Completion of a thesis or project pertinent to the field of kinesiology. Independent research under the guidance of the faculty.

Landscape Architecture (LA)

undefined

LA Courses

LA 101. Introduction to Landscape Architecture. 4 units

Term Typically Offered: F
Introduction to the profession of landscape architecture and orientation to the department curriculum and learning processes. 4 lectures.

LA 170. Principles of Design Communication. 4 units

Term Typically Offered: F, SP
Overview of design communications for landscape architects incorporating the principles, techniques, skills and tools used in design generation, exploration, review and implementation. 4 laboratories.

LA 171. Principles of Digital Communication. 4 units

Term Typically Offered: W
Introduction of digital media applications, software and techniques for landscape architects. Principles, techniques, skills and tools for using digital media in design projects. 4 lectures.

LA 202. Design Fundamentals I. 4 units

Term Typically Offered: F, SP
Corequisite: LA 170.

Introduction to the principles, methods and elements of two- and three-dimensional design in order to communicate intended concepts and meanings. Exploration of the basic design elements including composition, design process and the creation of spatial settings. 4 laboratories.

LA 203. Design Fundamentals II. 4 units

Term Typically Offered: F, W
Prerequisite: LA 202. Corequisite: LA 241 or LA 243.

Continuation of ideas introduced in LA 202 with the introduction of environmental and visual perception, including three-dimensional site design and landscape architectural design principles. Spatial design and sequencing of space with concern for human behavioral, environmental and natural site factors and generation of program, concept and design development. 4 laboratories.

LA 204. Design Fundamentals III. 4 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: LA 203, LA 241. Concurrent: LA 242.

Continuation of ideas introduced in LA 202 and LA 203 with the introduction of the principles of design theory, landscape ecology and technical applications. Problems of increasing complexity incorporate critical and creative problem solving, the relationship of aesthetics, response to human needs and design for sustainable environments. 4 laboratories.

LA 211. History of Landscape Architecture: Ancient Civilizations through Colonial America. 4 units

Term Typically Offered: W, SU

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Philosophies and ethics of important personalities and events of landscape architecture explored from recorded time through colonial America. Design theories support projects and individuals of their practice combined with influential events in industry, the arts and sciences, politics, and society. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

LA 212. History of Modern and Contemporary Landscape Architecture. 4 units

Term Typically Offered: F, SP, SU

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Philosophies and ethics of important personalities explored through the twentieth and twenty-first centuries of landscape architecture. Design theories supporting these individuals' projects and the nature of their practice combined with the influential events in industry, the arts and sciences, politics, and society. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

LA 218. Introduction to Geographic Information Systems (GIS). 3 units

Term Typically Offered: TBD

Learn the fundamental concepts and functions of Geographic Information Systems (GIS) using ArcGIS platform. Create, manage, analyze, and display geographically referenced data. Explore how GIS is applied to analyze environmental, social, and natural resource issues. 1 lecture, 2 laboratories. Crosslisted as LA/NR 218.

LA 220. Landscape Ecology: Concepts, Issues, and Interrelationships. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area B2

Sustainability Focused

Recommended: BIO 114, BOT 121, and LA 101.

Concepts, theories and techniques related to landscape analysis, ecology, planning and design with an emphasis on landscape assessment, sustainability, land health, environmental protection and restoration, and natural resource management. 4 lectures. Fulfills GE Area B2.

LA 221. California Plants and Plant Communities. 4 units

Term Typically Offered: SP

Prerequisite: BIO 114 or BOT 121.

Introduction to the horticultural characteristics and landscape design potential of California native plants, California plant communities and associated vernacular plants. Includes experience in field identification, basic planting design, installation techniques and maintenance requirements. Required field trips. 2 lectures, 2 laboratories.

LA 241. Site Engineering Techniques and Applications. 4 units

Term Typically Offered: W

Prerequisite: LA 243. Corequisite: LA 203 and MATH 118.

Introduction and application of the techniques, methods, principles and criteria for site engineering and landform design. Includes an introduction to soil science, survey methods, and experiences in the principles, procedures and application of site grading and drainage for landscape architecture. 4 laboratories.

LA 242. Implementation Strategies. 4 units

Term Typically Offered: SP

Prerequisite: LA 203, LA 241. Concurrent: LA 204.

Introduction and application of the methods, principles and criteria for landscape implementation. Encompasses fundamental design and technical decisions common to landscape architectural design and construction projects including the development of concept, design development and working drawings, and construction management process. 3 lectures, 1 activity.

LA 243. Materials and Techniques of Landscape Construction. 4 units

Term Typically Offered: F

Sustainability Focused

Corequisite: LA 202.

Introduction to the properties, uses and inherent qualities of the fundamental materials of landscape architectural concerns and associated construction techniques and processes. Materials and techniques explored as a source of design ideas, form and expression in landscape architecture. 3 lectures, 1 activity.

LA 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

LA 317. The World of Spatial Data and Geographic Information Technology. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Foundation for understanding the world through geographic information as well as the tools available to utilize spatial data. Experience with Geographic Information Systems (GIS) and related technology. Not open to students with credit in GEOG 218 or LA/NR 218. 3 lectures, 1 activity. Crosslisted as LA/NR 317. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

LA 320. Design Theory for Landscape Architects. 4 units

Term Typically Offered: F

Prerequisite: LA 211, LA 212, or consent of instructor.

Complements the material and knowledge presented in the history of landscape architecture, architecture and art courses. Design theory and associated concepts as they are related to landscape architecture. Literature research and analysis of completed design projects. The artists/designers, materials and overall expressions of work are related to the social and economic issues of the time as well as their associations with the other arts and sciences. 4 lectures.

LA 330. Cultural Landscapes: People, Places and Ethical Decisions. 4 units

Term Typically Offered: SP

Sustainability Related

Prerequisite: LA 212.

Investigation of the complexities and interrelatedness of culture, environment and ethical decisions. Interpretation of personal and cultural values and ethics in terms of decisions made and behaviors and actions expressed in the built landscape. 4 lectures.

LA 349. Advanced Planting Design. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 233; PLSC 234; and PLSC 381 or LA 221.

Advanced examination of the theories and applied principles of planting design. Emphasis on connections between art and science in the design of parks, gardens and other landscapes. Case studies and field trips. 2 lectures, 2 activities.

LA 350. Advanced Landscape Construction. 4 units

Term Typically Offered: SP

Prerequisite: LA 242.

Examination and application of advanced landscape construction techniques. Emphasis on design, development, construction, and testing of contemporary landscape technologies and practices. Field trip may be required. 2 lectures, 2 laboratories.

LA 370. Professional Practice. 4 units

Term Typically Offered: W

Prerequisite: LA 204.

Issues related to the practice of landscape architecture incorporating processes, procedures and outcomes of professional practice. Topics include professional ethics, business and legal aspects of the profession, relationships to the client and society, personal goal setting, resume and portfolio preparation. 4 lectures.

LA 371. Internship. 3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Third year standing in Landscape Architecture.

Involvement in a work setting related to landscape architecture. Thirty hours work experience per unit of credit. Credit/No Credit grading only.

LA 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

LA 401. Research Project. 2 units

Term Typically Offered: F, SP

Prerequisite: Completion of four design focus studios (16 units from LA 402 - LA 405).

Research methods in landscape architecture and proposal writing techniques. Students prepare proposal and strategy for fifth year study in area of concentration. 2 seminars.

LA 402. Design Theory and Exploration Focus Studio. 4 units

Term Typically Offered: F, W, SU

Prerequisite: Junior standing; LA 204; LA 211; and LA 212; or consent of instructor. Concurrent: Integrated Learning Course (ILC) of student's option.

Exploration and application of design theory, exploratory design process and form exploration to design and planning projects. Emphasis on incorporation of inquiry techniques based on the synthesis of interdisciplinary frameworks of art and design theory with historical and cultural issues. Total credit limited to 12 units. 4 laboratories.

LA 403. Natural Environments Design Focus Studio. 4 units

Term Typically Offered: W, SP

Sustainability Focused

Prerequisite: Junior standing; LA 204; LA 211; LA 212; LA 220; LA 402; and LA 405; or consent of instructor. Concurrent: Integrated Learning Course (ILC) of student's option.

Assessment, exploration and integration of landscape ecology, sustainability and environmental planning to design and planning projects. Emphasis on interpretation and application of environmental and ecological issues at a range of design scales. Total credit limited to 12 units. 4 laboratories.

LA 404. Cultural Environments Design Focus Studio. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; LA 204; LA 211; LA 212; LA 402; and LA 405. Concurrent: Integrated Learning Course (ILC) of student's option.

Assessment, exploration and interpretation of cultural values, issues and landscapes to design and planning projects. Emphasis on observation and inquiry of diverse cultural settings, differences in cultural values and personal ethics in the design process. Total credit limited to 12 units. 4 laboratories.

LA 405. Project Design and Implementation Focus Studio. 4 units

Term Typically Offered: F, W

Prerequisite: Junior standing; LA 204; LA 243; LA 242; and LA 241; or consent of instructor. Concurrent: Integrated Learning Course (ILC) of student's option.

Development, exploration and integration of project design and implementation strategies to design and planning projects. Emphasis on creative and exploratory problem solving, spatial design, project resolution, and graphic communication. Total credit limited to 12 units. 4 laboratories.

LA 406. Interdisciplinary Design Studio. 4 units

Term Typically Offered: W, SP

Prerequisite: Junior standing; LA 402; LA 403; LA 404; and LA 405; or consent of instructor. Concurrent: Integrated Learning Course (ILC) of student's option.

Design studio with focus on interdisciplinary modes of practice and collaborative approaches to design. Interdisciplinary design process may be explored through project program and collaboration with students in allied majors. Field trip required. Total credit limited to 12 units. 4 laboratories.

LA 431. CAD and Digital Media Communications (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; LA 170 and LA 204; or consent of instructor.

Integrated Learning Course (ILC) to assist integration and application of computer-aided drafting (CAD) skills in coursework, project planning and design studio courses. Focus on CAD skills and integration of digital media. Total credit limited to 12 units. 4 activities.

LA 432. Landscape Ecology Applications (ILC). 4 units

Term Typically Offered: F, W, SP

Sustainability Focused

Prerequisite: Junior standing. Co-requisite: LA 220. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of landscape ecology principles in project planning and design studio courses. Focus on understanding and developing a framework for ecological planning and design to anticipate consequences of planning and design decisions. Total credit limited to 12 units. 4 activities.

LA 433. Cultural Environments (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior Standing and LA 211. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of culture, environment and personal ethics in coursework, project planning and design studio courses. Focus on skills, distinctions and integration of analyzing the cultural landscape, understanding diverse cultural values and assessing personal ethics. Total credit limited to 12 units. 4 activities.

LA 434. Project Design and Implementation (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; LA 241; LA 242; and LA 243; or consent of instructor. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of project design principles and implementation strategies in project planning and design studio courses. Focus on skills, techniques and decisions of the design, documentation and construction processes. Total credit limited to 12 units. 4 activities.

LA 435. Professional Practice (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of professional practice principles and techniques in planning and design studio and internship courses. Focus on achieving a high level of professional quality, ethical concern, and legal responsibility in project work. Total credit limited to 12 units. 4 activities.

LA 436. Traditional and Digital Media Communications (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; LA 170; LA 202; LA 203; and LA 204; or consent of instructor. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of graphic communication and presentation skills in coursework, project planning and design studio courses. Focus on skills, distinctions and integration of traditional and digital media explorations. Total credit limited to 12 units. 4 activities.

LA 437. 3D Digital Design Communications (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; LA 170 and LA 204; or consent of instructor. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of 3D digital graphic communication and presentation skills in coursework, project planning and design studio courses. Focus on skills and integration of three-dimensional digital media explorations. Total credit limited to 12 units. 4 activities.

LA 438. GIS Application to Design Projects (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing. Corequisite: LA 220. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist integration and application of geographic information systems (GIS) and spatial information into focus design studio courses. Total credit limited to 12 units. 4 activities.

LA 439. Planting Design (ILC). 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; and AEPS 381 or LA 221. Concurrent: Design Focus Studio of student's option.

Integrated Learning Course (ILC) to assist the integration and application of plant selection, use and appropriateness in planning and design studio courses. Focus is on the skills, theories and principles of planting design. Total credit limited to 12 units. 4 activities.

LA 461. Senior Design Project Focus Studio. 4 units

Term Typically Offered: F, W, SP

Prerequisite: LA 401; and completion of Design Focus Sequence (20 units from LA 402-LA 406).

Comprehensive landscape architectural design and research project showing professional level competency in the integration of design theory, landscape architectural principles and project resolution. Emphasis on creative resolutions, organization and communication skills and technical abilities in program generation, design process, design and research. Total credit limited to 8 units. 4 laboratories.

LA 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

LA 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

LA 482. Evaluating Social and Behavioral Factors for Open Space Design. 4 units

Term Typically Offered: TBD

Prerequisite: Fourth-year or graduate standing.

User oriented approach to open space design. Interview and survey techniques, behavioral trace mapping and systematic observation, post occupancy evaluation and similar methods are used to generate user input and feedback in the design process. Understanding the behavioral implications of designed environments. 2 lectures, 2 activities.

LA 483. Special Studies in Landscape Architecture. 1-12 units

Term Typically Offered: TBD

Prerequisite: Fourth or fifth-year standing or graduate standing.

Special issues and problems through research, field trips, seminars and other forms of investigation and involvement. Course requirements are determined prior to each individual project through a contractual agreement between students and department. Departmental Off Campus Study Program guidelines apply. Total credit limited to 36 units. 1-12 activities.

LA 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Fourth or fifth-year standing or graduate standing, or consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 6 units; total credit limited to 18 units. Credit/No Credit grading only.

LA 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Fourth or fifth-year standing or graduate standing, and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 24 units. Credit/No Credit grading only.

LA 520. Design with Cultural Landscapes. 4 units

Term Typically Offered: W

Sustainability Related

Prerequisite: LA 330 and LA 404; or graduate standing.

Examination of the designed landscape as a representation of culture. Analysis of historic and contemporary sites. Investigation of the value and interpretation of both rural and urban landscapes, broadening an understanding of cultural landscapes. Field trip required. 2 lectures, 2 laboratories.

LA 521. Ecological Urban Design. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: LA 403, LA 432, or graduate standing.

Examination of cities as ecosystems, urban ecology theories, concepts, and techniques at the site scale. History and theory of ecological urban design, ecosystem services, and how they are implemented for resilience. Field trip required. 2 lectures, 2 laboratories.

LA 531. Information Graphics for Landscape and Urban Studies. 4 units

Term Typically Offered: W, SP

Prerequisite: CRP 512; or LA 436 and LA 437; or graduate standing.

Conversion of raw sets of data into compelling narrative presentations that are communicated visually and effectively to specific design and planning audiences. Development of strategies for interpreting, packaging and shaping data for data storytelling, data visualization and effective communication. 2 lectures, 2 laboratories.

LA 538. Advanced GIS Application to Projects. 4 units

Term Typically Offered: W

Prerequisite: CRP 457, CRP 512, LA 438, or graduate standing.

Integration and application of GIS skills to planning and design projects. Emphasis on the analytical thinking process, visualization of various GIS data, and site analysis development for projects. 2 lectures, 2 laboratories.

LA 585. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and part-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Total credit limited to 9 units. Credit/No Credit grading only.

LA 595. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Graduate standing and consent of instructor.

Advanced study analysis and full-time work experience in student's career field; current innovations, practices, and problems in administration, supervision, and organization of business, industry, and government. Must have demonstrated ability to do independent work and research in career field. Credit/No Credit grading only.

Liberal Arts and Engineering Studies (LAES)

undefined

LAES Courses

LAES 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

LAES 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

LAES 301. Project-Based Learning in Liberal Arts and Engineering Studies. 4 units

Term Typically Offered: F, SP

Prerequisite: MATH 241; PHYS 132; PHYS 133; and GE Area A with grades of C- or better.

Examination of how to define LAES as a new field of study; analysis of the creative process and team building in theory and in application. Researching, writing, revising and presenting a technical proposal suitable for submission to a national design competition seeking innovative solutions to complex technological/social problems. 2 seminars, 2 activities.

LAES 302. Advanced Project-Based Learning in Liberal Arts and Engineering Studies. 4 units

Term Typically Offered: F, SP

Prerequisite: LAES 301.

Teamwork and leadership in project-based learning. Students lead, build, and maintain project teams; guide the creative process; and use and evaluate the principles of project management in theory and practice. Development of a technical proposal suitable for submission to a national design competition seeking innovative solutions to complex technological/social problems. 2 seminars, 2 activities.

LAES 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

LAES 411. Technology and Community Engagement. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A with grades of C- or better; and sophomore standing.

Onsite work with community and design team to develop and evaluate the use of innovative technologies as tools for community development and empowerment. Through guided discussion with instructor, guests, and community members, work through intercultural collaboration and design issues, conduct qualitative and quantitative research, and present works-in-progress. Field trip may be required. Total credit limited to 8 units. 4 lectures. Crosslisted as ISLA/LAES 411.

LAES 430. Internship. 2-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Approval of area chair, junior standing, and a CPSLO cumulative GPA of at least 2.5 without being on academic probation.

Work experience in business, industry, government and other areas of student career interest. Periodic written progress reports, final report, and evaluation by work supervisor required. Credit/No Credit grading. Total credit limited to 12 units.

LAES 461. Senior Project in Liberal Arts and Engineering Studies. 4 units

Term Typically Offered: F, W, SP

Prerequisite: LAES 302; senior standing; and permission of instructor.

Under faculty supervision, the selection and completion of a senior project, demonstrating an interdisciplinary focus in LAES. With one-on-one format with the instructor, individual or small group work through many iterations of the senior project, with occasional showing of works in small student groups.

LAES 462. Capstone Senior Seminar in Liberal Arts and Engineering Studies. 4 units

Term Typically Offered: F, W, SP

Prerequisite: LAES 461.

The final refinement and completion of LAES senior projects and other projects. In a development workshop format, presentation of final versions of works-in-progress to combined faculty and professional review committees throughout the quarter.

LAES 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

LAES 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

LAES 485. Cooperative Education Experience. 6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 6 units; total credit limited to 18 units. Credit/No Credit grading only.

LAES 495. Cooperative Education Experience. 12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. Major credit limited to 6 units; total credit limited to 24 units.

Liberal Studies (LS)

undefined

LS Courses

LS 201. Orientation to Liberal Studies. 1 unit

Term Typically Offered: F

Career and academic planning, co-curricular, extra-curricular opportunities, and pathway into a K-8 teaching profession. Academic policies and procedures, goal settings, elements of career in education, and other topics relevant to student and professional success. Intended for new students in the Liberal Studies major. Not open to students with credit in LS 101. 1 activity.

LS 211. Visual Arts in the Elementary Classroom. 4 units

Term Typically Offered: F, W, SP

Theory, aesthetics, appreciation and applications of visual arts, through multiple two dimensional art strategies, as related to educational processes for the elementary classroom. Focus on elements, principles of design while fostering artistic perception. One Saturday field trip required. 3 lectures, 1 laboratory.

LS 214. Constitutional Issues in the History of U.S. and California Education. 4 units

Term Typically Offered: F, W, SP

Examination of U.S. and California constitutions, significant legislation, and court cases affecting public education from the colonial period to the present. Overview of contributions by individuals of historical, national, and international educational significance. Examination of landmark decisions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

LS 230. Field Experience in the Elementary Classroom I. 2 units

Term Typically Offered: F, W, SP

Current practices and issues in elementary education, including teacher compensation, cultural impact on schools, time and classroom management, English learners, and the affective aspect of teaching. In addition to class time, 24 hours of K-6 structured observation is required. 2 activities.

LS 250. Field Experience in the Elementary Classroom II. 2 units

Term Typically Offered: F, W, SP

Overview of current practices and issues in elementary education, including components of effective teaching, motivating students, diagnostic/prescriptive teaching, curriculum, and accountability. In addition to class time, 24 hours of structured observation and participation in K-6 public schools is required. 2 activities.

LS 255. Children's Literature in a Diverse Society. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Culturally diverse children's literature with a focus on analysis and evaluation of literary elements and structures, critical perspectives, trends, and issues. A wide range of authors, genres and formats including folktales, fantasy, poetry, informational, historical and realistic fiction books. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ENGL/LS 255. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

LS 290. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

LS 301. Liberal Studies Career Preparation. 1 unit

Term Typically Offered: F, SP

Prerequisite: Junior standing and LS 201.

Overview of ethical, legal, and historical issues in education; major foundational philosophies in American public education. Career pathways in education, targeted advising, portfolio building and professional goals and opportunities. Not open to students with credit in LS 101. 1 activity.

LS 305. Project Based Learning in STEM Education. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Extended collaborative study of a question or problem in STEM using a Project Based Learning (PBL) environment; includes consideration of the educational framework and principles of PBL. Topics will have an engineering design component that will require application of mathematics, technology, and science. The Class Schedule will list topic selected. Total credit limited to 4 units. Credit/No Credit grading only. 2 activities.

LS 310. Storytelling: Modern Applications of Traditional Narrative. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Techniques for selection, preparation and presentation of traditional folktales and myths for an audience. Discussion of theatrical and storytelling techniques. Applications of storytelling in teaching and organizations; theory and history of folk literature and mythology. 4 lectures.

LS 350. Identity and Equity in American Schools. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D with a grade of C- or better or consent of instructor. Recommended: ES 112, HIST 206, HIST 207, SOCS 111, or WGS 201.

Interdisciplinary examination of school, family, and community relationships, at the school and classroom level. Role of teachers' and students' intersectional identities in school achievement, disciplinary, and life-course outcomes. The school-to-prison-to-deportation pipeline. Educational equity and related issues. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

LS 370. Performing Arts in the Elementary Classroom. 4 units

Term Typically Offered: F, W, SP

Prerequisite: LS 211 and GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs). Recommended: LS 310.

Current theory and practice of standards based performing arts with an emphasis on the use of music, theater, media arts and dance, as discrete disciplines with historical and cultural context in the classroom. Attendance at outside performances required. 4 lectures.

LS 380. Education Apprenticeship. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Junior standing and consent of instructor.

Structured application of subject matter content in schools and informal educational settings. Topics include: Arts, English, Science, Mathematics, History/Social Studies, Physical Education and Health, Interdisciplinary K-8 Education, and Animal-Assisted Education in Schools. The Class Schedule will list topic selected. Participation in public schools requires mandated fingerprint clearance. Total credit limited to 4 units. Credit/No Credit grading only. 2 activities.

LS 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor, junior standing.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

LS 411. Advanced History/Social Sciences Integration for the K-8 Classroom. 4 units

Term Typically Offered: TBD

Prerequisite: One course in GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); HIST 208; LS major; and senior standing.

Analysis and practice of history and social sciences knowledge and skills to facilitate K-8 learning through identifying major themes and questions. The use of inquiry, assessment, curriculum integration, and technology to connect discipline specific content to contemporary social issues. 3 seminars, 1 activity.

LS 412. Advanced Arts Integration for the K-8 Classroom. 4 units

Term Typically Offered: W, SP

Prerequisite: LS 211 and senior standing.

Analysis and practice of Arts knowledge and skills to facilitate K-8 learning through identifying major themes and questions. The use of inquiry, assessment, curriculum integration, and technology to connect discipline specific content to contemporary social issues. Field trips required. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

LS 413. Advanced Science/Engineering Integration for the K-8 Classroom. 4 units

Term Typically Offered: F

Prerequisite: PSC 103; BIO 211; LS 250; MATH 328; and junior standing.

Recommended: MATH 329.

Analysis and practice of science and engineering knowledge and skills to facilitate K-8 learning through identifying major themes and questions. Use of inquiry, assessment, curriculum integration, and technology to connect discipline specific content to contemporary social issues. 3 lectures, 1 activity.

LS 461. Senior Project Seminar. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing, completion of GWR or consent of instructor.

Examination of issues in education of state, national and international concern. Students prepare presentations and conduct individual research and analysis of selected problems. Substantial research paper required. 4 seminars.

LS 462. Senior Project Research. 2-4 units

Term Typically Offered: TBD

Prerequisite: Senior standing; completion of GWR; LS 410 or LS 411 or LS 412.

Application of content and theory to the educational experience of one specific subject matter area in the Liberal Studies program. Total credit limited to 4 units.

LS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Marine Science (MSCI)

undefined

MSCI Courses

MSCI 100. Orientation to Marine Sciences. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: Marine Sciences major.

Introduction to Marine Sciences faculty, the Biology Department and campus resources, research opportunities, possible careers, studying science, and current topics in marine sciences. Credit/No credit grading only. 1 lecture.

MSCI 111. Survey of Marine Biology. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area B2

2019-20 or earlier catalog: GE Area B2

Sustainability Focused

Marine organisms and their adaptations to the ocean. Focus on select marine ecosystems including coastal ecosystems. Interaction between humans and the sea. Topics include effects of ocean acidification and pollution, climate change, and loss of marine biodiversity. Not open for major credit in Biological Sciences, Marine Sciences, or Microbiology. 4 lectures. Fulfills GE Area B2.

MSCI 300. Marine Ecology. 4 units

Term Typically Offered: F, W

Prerequisite: BIO 160, BIO 162, and BIO 263. Recommended: STAT 218.

Introduction to the functional biology of marine plants and animals and the ecological processes that underlie their distribution and abundance in open oceans, coastal regions, and estuaries. Field trips required. 2 lectures, 2 laboratories. Formerly MSCI 328.

MSCI 301. Biological Oceanography. 3 units

Term Typically Offered: F

Prerequisite: BIO 160; BIO 161; BIO 263; CHEM 129; MSCI 300; PSC 201; and STAT 218.

Interdisciplinary study of marine organisms, how they interact with each other and their physical, chemical and geological environment. Emphasis on how these interactions impact abundance, diversity and temporal and spatial distributions. 3 lectures.

MSCI 324. Marine Mammals, Birds and Reptiles. 4 units

Term Typically Offered: W

Prerequisite: BIO 162; BIO 263; and STAT 218.

Introduction to the biology, ecology and evolution of mammals, reptiles and birds of the marine environment, with an emphasis on Central California species, diversity patterns, evolutionary relationships, adaptations to the ocean, and conservation issues. Field trips required. 2 lectures, 2 laboratories.

MSCI 330. Technologies for Ocean Discovery. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: Introductory statistics course.

Survey of ocean sensor systems and emerging technologies that provide new understanding of the ocean. Current issues in marine science. Social context, societal implications of discoveries in ocean sciences. Field trip required. Not open for major credit in Biological Sciences, Marine Sciences or Microbiology. Not open to students with credit in MSCI 403. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

MSCI 401. Marine Science Outreach. 1-2 units

Term Typically Offered: F, W, SP
CR/NC

Prerequisite: MSCI 300 or MSCI 301 or PSC 201; Junior standing and consent of instructor.

Volunteer or internship experience in a marine science business, industry, government agency or informal science center. Positions require communicating science to the public. Formal report and evaluation by work supervisor required. Major credit limited to 4 units. Total credit limited to 8 units. Credit/No credit grading only.

MSCI 403. Ocean Sampling Techniques. 4 units

Term Typically Offered: F
Prerequisite: CHEM 302; MSCI 301; PSC 201; and STAT 218.

Introduction to techniques in oceanography and marine sciences. Hands-on technical training in sampling, measuring, tagging and tracking of bathymetry and geography; waves, tides and currents; salinity, temperature and pressure; dissolved oxygen and pH; irradiance and light scattering; phytoplankton and zooplankton; and benthic fauna and marine macrofauna. 2 lectures, 2 laboratories. Formerly MSCI 303.

MSCI 410. Scientific Diving. 3 units

Term Typically Offered: SU
Prerequisite: BIO 263, open water diving certificate, and instructor consent. Recommended: MSCI 300 or MSCI 301.

Advanced training in scientific methods associated with practical training in scuba diving. Satisfies American Academy of Underwater Sciences standards. Combination of theory, techniques and scuba diving. Experience collecting data and handling scientific equipment underwater. AAUS certification will require additional assessments outside of class. Field trips and additional fee required. 1 lecture, 2 labs.

MSCI 428. Marine Conservation and Policy. 4 units

Term Typically Offered: W
Sustainability Focused
Prerequisite: BIO 160 and BIO 263; and BIO 327 or BIO 363 or BIO 401 or BOT 326 or MSCI 300; or Graduate standing in Biological Sciences. Recommended: PSC 201.

Examination of how science and policy are used to evaluate and implement marine conservation and resource management. Topics include endangered species, fisheries, climate change, marine protected areas, research and conservation topics and developing policy for management decision-making. Field trip required. 3 lectures, 1 laboratory.

MSCI 437. Marine Botany. 4 units

Term Typically Offered: W
Prerequisite: Junior standing and BIO 162.

Comprehensive examination of the ecology, life histories, functional morphology, physiology, and taxonomy of marine algae and marine plants. Laboratory emphasizes species endemic to the central coast of California. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

MSCI 438. Aquaculture. 4 units

Term Typically Offered: F
Prerequisite: BIO 160, BIO 162, and BIO 263.

Propagation and rearing of fishes, invertebrates and algae from marine, freshwater, and estuarine habitats. Current methodologies and general life histories. Global perspective including aquacultural development in developed and developing countries. 3 lectures, 1 laboratory.

MSCI 439. Fisheries Science and Resource Management. 4 units

Term Typically Offered: SP
Sustainability Focused
Prerequisite: BIO 162 and MSCI 300. Recommended: BIO 322.

Scientific investigation of marine and freshwater fisheries. Methodologies and quantitative strategies for study of finfish and invertebrates. Role of oceanographic or limnological processes on stock maintenance. Impact of human exploitation on maintenance of sustainable yields, including user-group conflict issues, and regional/global controversies. Lab/field protocols, basic fisheries statistical procedures, molecular methods, computer simulations. Field trip required. 3 lectures, 1 laboratory.

MSCI 440. Communicating Ocean Sciences to Informal Audiences. 3 units

Term Typically Offered: F
Prerequisite: Junior standing; BIO 322, BIO 336, MSCI 300, or PSC 201; completion of GE Area A with grades of C- or better; and GE Area B2 or BIO 211.

Simultaneous focus on developing a knowledge of ocean sciences and the advanced educational approaches for communicating that knowledge. Teaching skills developed through coursework, outreach events and design of collaborative projects at museums and aquariums. Primary objective is to learn how to present ocean-themed hands-on, inquiry-based science exhibits, in order to improve the scientific literacy of audiences of all ages. Field trip required. 1 lecture, 2 activities.

Materials Engineering (MATE)

undefined

MATE Courses

MATE 110. Introduction to Materials Engineering Design I. 1 unit

Term Typically Offered: F
Sustainability Related
Prerequisite: MATE majors only.

Laboratory work in teams to design, build and test a product. Material from math, science and engineering courses tied together. 1 laboratory.

MATE 120. Introduction to Materials Engineering Design II. 1 unit

Term Typically Offered: W
Sustainability Related
Prerequisite: MATE 110.

Second design laboratory, working in teams to design, build and test a complex system that benefits humanity. Focus on complete design process including project management, documentation in design, manufacturing techniques, and analysis of testing data. Issues of engineering ethics, technology and society, the environment and sustainability also studied. 1 laboratory.

MATE 130. Introduction to Materials Engineering Design III. 1 unit

Term Typically Offered: TBD
Sustainability Related
Prerequisite: MATE 120.

Third design laboratory in a sequence. Includes working in teams on project that benefits humanity. Issues of engineering ethics, technology and society, the environment and sustainability. 1 laboratory.

MATE 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

MATE 210. Materials Engineering. 3 units

Term Typically Offered: F,W,SP,SU
Prerequisite: CHEM 111 or CHEM 124 or CHEM 127. Recommended:
Concurrent enrollment in MATE 215.

Structure of matter. Physical and mechanical properties of materials including metals, polymers, ceramics, composites, and electronic materials. Equilibrium diagrams. Heat treatments, materials selection and corrosion phenomena. Course may be offered in classroom-based or online format. 3 lectures.

MATE 215. Materials Laboratory I. 1 unit

Term Typically Offered: F,W,SP,SU
Prerequisite or concurrent: MATE 210.

Focus on processing-structure-properties relationships of materials, including crystal structures, electronic properties of materials, materials selection, phase diagrams, corrosion, mechanical properties of polymers, cold work and annealing of alloys and heat treatments of steels. 1 laboratory.

MATE 222. Materials Selection Life Cycle. 4 units

Term Typically Offered: TBD
Sustainability Focused
Prerequisite: MATE 210.

Materials selection for sustainable product design. Use of material selection software and techniques to solve design problems with multiple objectives and constraints. Focus on Triple Bottom Line design including functionality, economic viability, and sustainability. Principles and tools for weighted property optimization, production cost modeling, and life cycle analysis introduced through project-based learning mode. 4 lectures.

MATE 225. Materials Laboratory II. 1 unit

Term Typically Offered: F
Prerequisite: MATE 215. Concurrent: MATE 232.

Process-structure relationships of materials. Introduction to materials characterization techniques including differential scanning calorimetry, x-ray diffraction, and metallography. Emphasis on materials engineering professional practices and written communication. 1 laboratory.

MATE 232. Materials, Ethics, and Society. 4 units

Term Typically Offered: F
Sustainability Focused
Prerequisite: MATE 210.

Materials Engineering principles through the context of historical and current events. Ethics and systems thinking are integrated in the study of the impacts of materials and technology on society during the Stone Age, Bronze Age, and Iron Ages, as well as today's world. Topics include crystallography, phase diagrams, microstructures, processing techniques, and nanotechnology. 4 lectures.

MATE 235. Materials Laboratory III. 1 unit

Term Typically Offered: W
Prerequisite: MATE 225.

Mechanical property testing by tensile tests and hardness tests. Emphasis of data interpretation and analysis with structure-property relationships of materials. Continued materials engineering professional practices. 1 laboratory.

MATE 245. Materials Engineering Analysis. 1 unit

Term Typically Offered: SP
Prerequisite: MATE 210 and MATE 235.

Introduction to quantitative and qualitative materials analysis methods and tools. Experimental design, data distributions, hypothesis testing, and regression fits. Sensor design and calibration. Qualitative and quantitative image analysis. Emphasis placed on real-world examples of materials engineering data. Not open to students with credit in MATE 130. 1 laboratory.

MATE 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MATE 280. Introduction to Materials Thermodynamics. 4 units

Term Typically Offered: W
Prerequisite: CHEM 125, PHYS 133, MATH 143, MATE 210 and MATE 215.

Thermodynamics concepts related to materials systems and processes: systems and surroundings, laws of thermodynamics, process flowsheets, mass and energy balances, ideal gasses, chemical reactions, steady state and transient processes. Not open to students with credit in MATE 380. 4 lectures.

MATE 300. Materials Selection for the Life Cycle. 4 units

Term Typically Offered: SP
GWR
Sustainability Related
Prerequisite: Junior standing and MATE 210.

Materials selection for sustainable product design. Use of material selection software and techniques to solve design optimization problems. Focus on Triple Bottom Line design including functionality, economic viability, and sustainability. Not open to students with credit in MATE 222. 4 lectures. Fulfills GWR.

MATE 310. Noncrystalline Material Systems. 4 units

Term Typically Offered: W
Prerequisite: MATE 210; MATE 340.

Design and synthesis of noncrystalline material systems. Synthesis, processing techniques, properties and fabrication methods of organic and inorganic polymeric materials. 3 lectures, 1 laboratory.

MATE 325. Transport Phenomena I. 1 unit

Term Typically Offered: F
Prerequisite: PHYS 132 and MATH 141.

Directed group laboratory study of energy transport. Focus on conduction and convection. 1 laboratory.

MATE 326. Transport Phenomena II. 1 unit

Term Typically Offered: W
Prerequisite: MATH 141 and ME 211.

Directed group laboratory study of fluid static and dynamic properties and behavior. Focus on non-compressible conditions. 1 laboratory.

MATE 327. Transport Phenomena III. 1 unit

Term Typically Offered: SP
Prerequisite: CHEM 124 and PHYS 133.

Introduction to radiative heat transfer and the material properties that control it. 1 laboratory.

MATE 340. Electronic Materials Systems. 4 units

Term Typically Offered: F
Prerequisite: MATE 210 and PHYS 133.

Design of electronic materials systems utilizing the basic concepts in electron theory of solids, electrical properties and conduction in materials, magnetic phenomena and optical properties in materials. 3 lectures, 1 laboratory.

MATE 350. Structural Materials Systems. 4 units

Term Typically Offered: W
Prerequisite: MATE 210. Corequisite: CE 204.

Design of structural materials systems. Topics include stress, strain, elasticity, anelasticity, plasticity, fracture and fatigue. 3 lectures, 1 laboratory.

MATE 359. Living in a Material World. 4 units

Term Typically Offered: F,W,SP,SU
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Sustainability Related

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: CHEM 124 or CHEM 127.

Evolution of materials (ceramics, metals, polymers, composites, semiconductors) in the context of history. Traces the link between historical and technological developments enabled by materials from the Stone Age to the Electronic Age. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

MATE 360. Metallurgical Materials Systems. 4 units

Term Typically Offered: SP
Prerequisite: MATE 235.

Physical metallurgy of engineering alloys including ferrous (steel) and nonferrous (aluminum, copper) systems. Connection to phase diagrams, microstructural development and phase transformations, physical and mechanical properties, precipitation hardening, cold work and annealing treated in detail. Laboratory focuses on microstructure development in steels and aluminum alloy casting. 3 lectures, 1 laboratory.

MATE 370. Kinetics of Materials and Process Design. 4 units

Term Typically Offered: F
Prerequisite: MATE 280 or MATE 380.

Design of processes for engineering materials. Topics include kinetics in materials: solid-state diffusion (steady-state and non-steady-state), nucleation and growth kinetics, solid state phase transformations. 3 lectures, 1 laboratory.

MATE 380. Thermodynamics and Physical Chemistry. 4 units

Term Typically Offered: SP
Prerequisite: CHEM 125, PHYS 133, MATH 143, MATE 210 and MATE 215; Materials Engineering students only.

Thermodynamics concepts related to materials engineering systems and processes: process flowsheets, mass and energy balances, Ellingham diagrams. Physical chemistry concepts related to materials engineering: ideal gases, systems and surroundings, first through third laws of thermodynamics, phase equilibria, chemical reactions. 4 lectures.

MATE 390. Textile and Fiber Engineering. 4 units

Term Typically Offered: W
Prerequisite: Junior standing; MATE 210 and MATE 310.

Structure, properties and engineering applications of fibers and textiles. Investigation of natural and synthetic fibers and use in technical applications. Methods of fiber formation. Chemical functionalization. High performance fibers, wearable electronics, composites, geotextiles, medical devices and apparel. 3 lectures, 1 laboratory.

MATE 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

MATE 401. Materials Characterization Techniques. 4 units

Term Typically Offered: F, W, SP
Prerequisite: MATE 210 and MATE 215.

Hands-on experience with materials characterization instruments, such as scanning electron microscopy (SEM), light optical microscopy, x-ray diffraction (XRD), and atomic force microscopy (AFM). Open-ended projects to develop expertise with trouble-shooting ability, and the process of materials characterization and analysis 2 lectures, 2 laboratories.

MATE 402. Materials Characterization Theory. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210. Recommended: MATE 401.

Fundamentals of materials characterization methods and thin-film microanalytical techniques, including optical techniques, electron microscopy, X-ray techniques, and ion beam techniques. Selection of surface analysis techniques. 4 lectures. Formerly MATE 510.

MATE 403. Computational Materials Analysis. 4 units

Term Typically Offered: SP

Prerequisite: CSC 231, ME 211, MATE 280.

Theory and practice of continuum-scale computational methods applied to engineering materials. Finite element modeling to predict mechanical, thermal, and damage behavior. Micro-structural development and heat treatments modeled using thermodynamic principles. Micro-scale materials modeling of plasticity and phase transformations. 4 lectures.

MATE 410. Nanoscale Engineering. 3 units

Term Typically Offered: F, W, SP

Prerequisite: CHEM 125, PHYS 133 and MATE 210.

Material properties (mechanics, electronics, heat transfer, photonics, fluid mechanics and biomechanics) at the nanometer scale. Evaluation of nano-scale systems designed from a bottoms-up approach with unique properties. Exploration of integration of biology, chemistry, physics and engineering. 3 lectures.

MATE 420. Biopolymers and Bionanocomposites. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 310 or CHEM 444 or CHEM 544.

Exploration of the synthesis, processing, properties, and performance of biologically derived polymers. Examination of nano-scale reinforcements and their use to enhance performance of biopolymers. Emphasis on reading and interpreting contemporary scientific literature. 4 lectures.

MATE 422. Ceramics and Glasses. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210.

Development, utilization, and control of properties in ceramic materials (inorganic-nonmetallic solids). Emphasis on application on processing to achieve structure and properties. Structure of crystalline ceramics and of glasses. Mechanical, thermal, optical, magnetic, and electrical properties. Application of ceramics in technology. Physical chemistry of ceramics. 4 lectures. Formerly MATE 522.

MATE 425. Corrosion Engineering. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CHEM 125 or CHEM 128, MATE 210, MATE 215.

Forms of corrosion. Influences of environmental variables on corrosion. Methods of corrosion control. 3 lectures, 1 laboratory.

MATE 430. Micro/Nano Fabrication. 3 units

Term Typically Offered: W

Prerequisite: BMED 212 or MATE 210.

Fabrication science and technology for creating micro and nano scale devices. Explore basic processes such as oxidation, diffusion, ion implantation, etching, chemical and physical vapor deposition, photolithography. Develop an understanding of the science of each process and how to select the right steps for fabricating electronic, photon and micro-electro-mechanical systems devices. 3 lectures. Crosslisted as BMED 434/EE 423/MATE 430.

MATE 435. Microfabrication Laboratory. 1 unit

Term Typically Offered: W

Corequisite: BMED 434/EE 423/MATE 430.

Application of basic processes involved in microfabrication: cleanroom protocol, oxidation, diffusion, photolithography etching and sputtering. Explore process development through fabrication of electronic, photonic or microfluidic devices. Each student will be part of a team that will fabricate and test a device. 1 laboratory. Crosslisted as BMED 435/EE 473/MATE 435.

MATE 440. Welding Metallurgy and Joining of Advanced Materials. 3 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210.

Principles, primary variables, and microstructural changes associated with the joining process. Physics of energy transfer. Heat and mass balances in joining, thermodynamic and kinetic justification of solidification and near interface microstructures. Heterogeneous interfaces, adhesion, wetting. Relation between process selection, interface design, microstructure, and properties, weldability. 3 lectures.

MATE 445. Joining of Advanced Materials Laboratory. 2 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210. Corequisite: MATE 440.

Laboratory to accompany MATE 440. Illustration of principles, primary variables, and microstructural changes associated with the joining process. Physics of energy transfer. Heat and mass balances in joining, thermodynamic and kinetic justification of solidification and near interface micro-structures. Heterogeneous interfaces, adhesion, wetting. Relation between process selection, interface design, microstructure, and properties, weldability. 2 laboratories.

MATE 446. Surface Chemistry of Materials. 3 units

Term Typically Offered: SP

Prerequisite: CHEM 125 or CHEM 128; CHEM 351, MATE 380, or ME 302.

Surface energy. Capillarity, solid and liquid interface, adsorption. Surface areas of solids. Contact angles and wetting. Friction, lubrication and adhesion. Relationship of surface to bulk properties of materials. Applications. 3 lectures. Crosslisted as CHEM/MATE 446.

MATE 450. Fracture and Failure Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210; MATE 215; and MATE 350.

Fracture processes and fracture mechanics of structural materials concentrating on engineering alloys. Topics include fracture of alloys, fracture mechanics (Griffith analysis, Linear Elastic Fracture Mechanics), and fatigue. Laboratory focuses on fracture surface analysis, failure analysis, and mechanical testing. 3 lectures, 1 laboratory.

MATE 456. Materials for Electrochemical Energy Storage. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210.

Exploration of electrochemical energy storage such as batteries, supercapacitors and hybrid systems. Fundamental principles with emphasis on electrochemistry of rechargeable batteries and supercapacitors. Advanced materials design, nanotechnology, testing techniques, safety issues and battery systems applications. 4 lectures.

MATE 458. Microelectronics and Electronics Packaging. 4 units

Term Typically Offered: F

Prerequisite: EE 112 or EE 113 or EE 201. Recommended: MATE 210.

Materials, processes, and reliability of microelectronics and electronics packaging, surface mount assembly and printed circuit board fabrication. Organic substrates and ceramic substrates. Mechanical design, thermal, and electrical considerations in electronic packaging. Design for manufacturability. Overview of optoelectronics packaging and other emerging technologies in microelectronics and electronic packaging. Project on design and manufacture of an electronic device. 3 lectures, 1 laboratory. Crosslisted as CPE 488/IME 458/MATE 458.

MATE 460. Materials Selection in Mechanical Design. 4 units

Term Typically Offered: TBD

Prerequisite: MATE 350.

Materials-based approach to mechanical design. Using mechanical and physical properties of materials (performance indices) to select structural materials for applications (Materials Selection Charts). Detailed background of material properties - information from materials and mechanics. Numerous case studies highlight the concepts covered. 4 lectures.

MATE 465. Ferrous Metallurgy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 360.

Physical metallurgy principles applied to iron-based systems for steel making and thermo-mechanical processing. Mechanical properties related to microstructure of steel materials and their manipulation through chemical and physical processing. Exploration of major categories of steel, applications, surface treatment and welding. 4 lectures.

MATE 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MATE 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

MATE 480. Composite Materials Systems. 4 units

Term Typically Offered: F

Prerequisite: MATE 350.

Properties, design and applications of composite material systems, concentrating on polymer-matrix, ceramic-fiber composites. Materials (matrices, fibers), mechanical behavior and properties, and manufacturing methods treated in detail. Laboratory practice concentrates on the mechanical testing of fiber-reinforced composite materials. 3 lectures, 1 laboratory. Formerly MATE 330.

MATE 482. Senior Project I. 1 unit

Term Typically Offered: F

Prerequisite: Senior standing; and Materials Engineering major.

Foundations of senior project design. Completion of the preliminary stages of selecting a senior project, designing experiments, evaluating realistic constraints, conducting initial experiments, and managing a project timeline. 1 laboratory.

MATE 483. Senior Project II. 2 units

Term Typically Offered: W

Prerequisite: MATE 482.

Continuation of senior project. Completion of a senior project experimental component under the guidance of a faculty supervisor. Research methodology, experimental design, experimental work and data analysis. 2 laboratories.

MATE 484. Senior Project III. 2 units

Term Typically Offered: SP

Prerequisite: MATE 483.

Continuation of MATE 483. Completion of a senior project data analysis and communication under the guidance of a faculty supervisor. Mathematical modeling and technical communication. 2 laboratories.

MATE 485. Materials and the Environment. 4 units

Term Typically Offered: F, W, SP

Sustainability Focused

Prerequisite: MATE 210.

Materials impacts on air, water, land, and human health. Introduction to climate change. Life cycle assessment for quantifying environmental impact. Green materials. Overview of renewable energy technologies. Non-technical aspects of environmental technologies. Field trip required. 4 lectures.

MATE 490. Solidification and Densification. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATE 210.

Thermodynamics, kinetics and morphologies of solid-liquid interfaces. Heat flow in castings, crystal growth. Solidification mechanics, solute redistribution. Production, characterization and testing of metal powders. Compacting of powder. Sintering with/without liquid phase. Hot pressing, properties of sinterings as a function of processing conditions. Application of theory to the production of useful materials. 4 lectures. Formerly MATE 590.

MATE 495. Cooperative Education Experience. 12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

MATE 500. Individual Study. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of department head, graduate advisor, or supervising faculty member.

Advanced study planned and completed under the direction of a member of department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Total credit limited to 12 units.

MATE 530. Biomaterials. 4 units

Term Typically Offered: W

Prerequisite: BIO 161, or BIO 213 and BMED/BRAE 213; MATE 210 and graduate standing or consent of instructor.

Structure-function relationships for materials in contact with biological systems. Interactions of materials implanted in the body. Histological and hematological considerations including foreign body responses, inflammation, carcinogenicity, thrombosis, hemolysis, immunogenic and toxic properties. Microbial interaction with material surfaces, degradation. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as BMED/MATE 530.

MATE 550. Micro Systems. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing.

Fundamentals of intelligent systems employing sensors, actuators and intelligent controls. Impact on material properties as devices shrink in the micrometer realm. Applications toward exploring nanotechnology. 4 lectures.

MATE 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MATE 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Senior or graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

MATE 599. Design Project (Thesis). 2-5 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing.

Each individual or group will be assigned a project for solution under faculty supervision as a requirement for the master's degree, culminating in a written report/thesis.

Mathematics (MATH)

undefined

MATH Courses

MATH 92. Beginning Algebra Review. 3 units

Term Typically Offered: TBD

CR/NC

Review of basic algebra skills at the beginning algebra level intended primarily to prepare students for MATH 96. Course open only to students who have taken the ELM examination and are not qualified for MATH 96. Not for baccalaureate credit. Credit/No Credit grading only. 3 lectures.

MATH 94. Beginning Algebra Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 92.

Facilitated study and discussion of the theory, problems, and applications of beginning algebra. Not for baccalaureate credit. Credit/No Credit grading only. 1 laboratory.

MATH 95. Stretch Precalculus Algebra I Workshop. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: Appropriate Math Placement Level. Concurrent: MATH 115.

Review of basic algebra skills intended primarily to prepare students for the precalculus content in MATH 115. Not for baccalaureate credit. Credit/No Credit grading only. 1 activity.

MATH 96. Intermediate Algebra. 3 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Appropriate score on the ELM examination, or credit in MATH 92.

Review of basic algebra skills at the intermediate algebra level intended primarily to prepare students for MATH 116. Not for baccalaureate credit. Credit/No Credit grading only. 3 lectures.

MATH 98. Intermediate Algebra Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 96.

Facilitated study and discussion of the theory, problems, and applications of intermediate algebra. Not for baccalaureate credit. Credit/No Credit grading only. 1 laboratory.

MATH 112. Nature of Modern Math. 4 units

Term Typically Offered: W, SP
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 95 or appropriate Math Placement Level.

Topics from contemporary mathematics, their development, applications, and role in society. Some typical topics to be chosen by the instructor: graph theory, critical path analysis, statistical inference, coding, game theory, and symmetry. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE Area.

MATH 115. Stretch Precalculus Algebra I. 3 units

Term Typically Offered: F
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: Appropriate Math Placement Level. Concurrent: MATH 95.

First course in precalculus college algebra without trigonometry, with built-in review of basic algebra skills necessary to be successful in precalculus. Factoring, exponents, and radicals. Real and complex numbers. Modeling with equations and inequalities. Linear, quadratic, and polynomial functions and their graphs. MATH 115 or MATH 116, and MATH 117 are equivalent to MATH 118, but are taught at a slower pace. Upon completion of MATH 115 or MATH 116, and MATH 117, a student will receive 4 units of GE credit for Area B4. A grade of C- or better is required in one course in GE Area B4 to fulfill General Education requirements. Not open to students with credit in MATH 116, MATH 118, MATH 141, MATH 161, or MATH 221. 3 lectures.

MATH 116. Precalculus Algebra I. 3 units

Term Typically Offered: TBD
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 96 or appropriate Math Placement Level.

First course in precalculus college algebra without trigonometry. Factoring, exponents, and radicals. Real and complex numbers. Modeling with equations and inequalities. Linear, quadratic, and polynomial functions and their graphs. MATH 115 or MATH 116, and MATH 117 are equivalent to MATH 118, but are taught at a slower pace. Upon completion of MATH 115 or MATH 116, and MATH 117, a student will receive 4 units of GE credit for Area B4. A grade of C- or better is required in one course in GE Area B4 to fulfill General Education requirements. Not open to students with credit in MATH 115, MATH 118, MATH 141, MATH 161, or MATH 221. Credit will be granted in only one of the following courses: MATH 115, MATH 116, or MATH 118. 3 lectures.

MATH 117. Precalculus Algebra II. 3 units

Term Typically Offered: W
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 115 with a grade of C- or better; or MATH 116 with a grade of C- or better; or consent of instructor.

Second course in precalculus college algebra without trigonometry. Rational, exponential, and logarithmic functions. Matrices, determinants, and systems of linear equations. MATH 115 or MATH 116, and MATH 117 are equivalent to MATH 118, but are taught at a slower pace. Upon completion of MATH 115 or MATH 116, and MATH 117, a student will receive 4 units of GE credit for Area B4. A grade of C- or better is required in one course in GE Area B4 to fulfill General Education requirements. Not open to students with credit in MATH 118. 3 lectures.

MATH 118. Precalculus Algebra. 4 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: Appropriate Math Level Placement.

Precalculus algebra without trigonometry. Factoring, exponents, and radicals. Real and complex numbers. Modeling with equations and inequalities. Rational, exponential, and logarithmic functions. Matrices, determinants, and systems of linear equations. MATH 118 is equivalent to MATH 115 or MATH 116, and MATH 117. Not open to students with credit in MATH 117, MATH 141, MATH 161, or MATH 221. Credit will be granted in only one of the following courses: MATH 115, MATH 116, or MATH 118. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 119. Precalculus Trigonometry. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: Appropriate Math Placement Level.

Rectangular and polar coordinates. Trigonometric functions, fundamental identities. Inverse trigonometric functions and relations. Complex numbers, conic sections, and analytic geometry. Not open to students with credit in MATH 141, MATH 161, or MATH 221. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 126. Pre-Calculus Algebra Workshop I. 1 unit

Term Typically Offered: TBD
 CR/NC
 Concurrent: Enrollment in the associated section of MATH 116.

Facilitated study and discussion of the theory, problems, and applications of precalculus algebra. Credit/No Credit grading only. 1 laboratory.

MATH 127. Pre-Calculus Algebra Workshop II. 1 unit

Term Typically Offered: TBD
 CR/NC
 Concurrent: Enrollment in the associated section of MATH 117.

Facilitated study and discussion of the theory, problems, and applications of pre-calculus algebra. Credit/No Credit grading only. 1 laboratory.

MATH 128. Pre-Calculus Algebra Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 118.

Facilitated study and discussion of the theory, problems, and applications of pre-calculus algebra. Credit/No Credit grading only. 1 laboratory.

MATH 129. Precalculus Trigonometry Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Corequisite: Concurrent enrollment in the associated section of MATH 119.

Facilitated study and discussion of the theory, problems, and applications of pre-calculus trigonometry. Credit/No Credit grading only. 1 laboratory.

MATH 141. Calculus I. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: Appropriate Math Placement Level; or MATH 117 and high school trigonometry; or MATH 118 and high school trigonometry; or MATH 119.

Limits, continuity, differentiation. Introduction to integration. 4 lectures. Crosslisted as HNRS/MATH 141. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 142. Calculus II. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: MATH 141 with a grade of C- or better or consent of instructor.

Techniques of integration, applications to physics, transcendental functions. 4 lectures. Crosslisted as HNRS/MATH 142. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 143. Calculus III. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: MATH 142 with a grade of C- or better or consent of instructor.

Infinite sequences and series, vector algebra, parametric curves. 4 lectures. Crosslisted as HNRS/MATH 143. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 151. Calculus Workshop I. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 141.

Facilitated study and discussion of the theory, problems, and applications of calculus. Credit/No Credit grading only. 1 laboratory.

MATH 152. Calculus Workshop II. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 142.

Facilitated study and discussion of the theory, problems, and applications of calculus. Credit/No Credit grading only. 1 laboratory.

MATH 153. Calculus Workshop III. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 143.

Facilitated study and discussion of the theory, problems, and applications of calculus. Credit/No Credit grading only. 1 laboratory.

MATH 161. Calculus for the Life Sciences I. 4 units

Term Typically Offered: W, SP, SU

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: Appropriate Math Placement Level; or MATH 117; or MATH 118.

Differential calculus with applications in the biological sciences. Review of exponential, logarithmic, and trigonometric functions. Limits, continuity, differentiation. Examples, exercises, and applications to emphasize problems in the biological sciences. Not open to students with credit in MATH 141. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 162. Calculus for the Life Sciences II. 4 units

Term Typically Offered: F, SP, SU

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: MATH 161.

Integral calculus with applications in the biological sciences. Techniques of integration. Matrices, partial derivatives, and introduction to differential equations and mathematical modeling. Examples, exercises, and applications to emphasize problems in the biological sciences. Not open to students with credit in MATH 142. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 171. Calculus for the Life Sciences Workshop I. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 161.

Facilitated study and discussion of the theory, problems, and applications of calculus for the life sciences. Credit/No Credit grading only. 1 laboratory.

MATH 172. Calculus for the Life Sciences Workshop II. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 162.

Facilitated study and discussion of the theory, problems, and applications of calculus for the life sciences. Credit/No Credit grading only. 1 laboratory.

MATH 182. Calculus for Architecture and Construction Management. 4 units

Term Typically Offered: W, SP
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 141.

Integral calculus with applications to architecture and construction management. The algebra of vectors. Polar, cylindrical, and spherical coordinate systems. Not open to students with credit in MATH 142. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 192. Calculus for Architecture and Construction Management Workshop. 1 unit

Term Typically Offered: TBD
 CR/NC
 Concurrent: Enrollment in the associated section of MATH 182.

Facilitated study and discussion of the theory, problems, and applications of calculus to architecture and construction management. Credit/No Credit grading only. 1 laboratory.

MATH 202. Orientation to Mathematics Major. 1 unit

Term Typically Offered: F, SP
 CR/NC
 Prerequisite: MATH 143.

Career opportunities in the field of mathematics, preparing a field of study, and a survey of departmental facilities and procedures related to research, study and graduation. Credit/No Credit grading only. 1 lecture.

MATH 206. Linear Algebra I. 4 units

Term Typically Offered: F,W,SP, SU
 Prerequisite: MATH 143.

Systems of linear equations. Matrix algebra, including inverses and determinants. Vectors, vector spaces, bases and linear transformations in real coordinate space of n dimensions. Eigenvalues, eigenvectors and diagonalization. Applications of linear algebra. Introduction to inner products and orthogonality. 4 lectures.

MATH 221. Calculus for Business and Economics. 4 units

Term Typically Offered: W, SP
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: Appropriate Math Placement Level; or MATH 117; or MATH 118.

Limits, continuity, differentiation. Exponential and logarithmic functions. Introduction to integration. Examples, exercises and applications to emphasize problems in business and economics. Not open to students with credit in MATH 141. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 227. Mathematics for Elementary Teaching I. 4 units

Term Typically Offered: F, W
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 95 or appropriate Math Placement Level.

Introduction to problem solving, set theory, number systems, arithmetic operations, models, and number theory. This class is designed for Liberal Studies majors. Other students will be admitted by consent of instructor. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

MATH 231. Calculus for Business and Economics Workshop. 1 unit

Term Typically Offered: TBD
 CR/NC
 Concurrent: Enrollment in the associated section of MATH 221.

Facilitated study and discussion of the theory, problems, and applications of business calculus. Credit/No Credit grading only. 1 laboratory.

MATH 241. Calculus IV. 4 units

Term Typically Offered: F,W,SP, SU
 Prerequisite: MATH 143.

Partial derivatives, multiple integrals, introduction to vector analysis. 4 lectures. Crosslisted as HNRS/MATH 241.

MATH 242. Differential Equations I. 4 units

Term Typically Offered: W, SP
 Prerequisite: MATH 206 and MATH 241.

Ordinary differential equations: first-order linear equations, separable equations, exact equations, second-order linear equations, nonhomogeneous equations, systems of first-order linear equations, systems of nonlinear equations, modeling and applications. Not open to students with credit in MATH 244. 4 lectures.

MATH 244. Linear Analysis I. 4 units

Term Typically Offered: F,W,SP, SU
 Prerequisite: MATH 143.

Separable and linear ordinary differential equations with selected applications; numerical and analytical solutions. Linear algebra: vectors in n -space, matrices, linear transformations, eigenvalues, eigenvectors, diagonalization; applications to the study of systems of linear differential equations. 4 lectures. Crosslisted as HNRS/MATH 244.

MATH 248. Methods of Proof in Mathematics. 4 units

Term Typically Offered: F,W,SP, SU
 Prerequisite: MATH 143.

Methods of proof (direct, contradiction, conditional, contraposition); valid and invalid arguments. Examples from set theory. Quantified statements and their negations. Functions, indexed sets, set functions. Proofs in number theory, algebra, geometry and analysis. Proof by induction. Equivalence and well-defined operations and functions. The axiomatic method. 4 lectures.

MATH 251. Calculus Workshop IV. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 241.

Facilitated study and discussion of the theory, problems, and applications of calculus. Credit/No Credit grading only. 1 laboratory.

MATH 254. Linear Analysis Workshop I. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 244.

Facilitated study and discussion of the theory, problems, and applications of linear analysis. Credit/No Credit grading only. 1 laboratory.

MATH 258. Methods of Proof in Mathematics Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 248.

Facilitated study and discussion of the methods and techniques of proof in mathematics. Credit/No Credit grading only. 1 laboratory.

MATH 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MATH 300. Technology in Mathematics Education. 4 units

Term Typically Offered: F

Prerequisite: MATH 248.

Examination of existing hardware and software designed for educational uses. Discussion of mathematical topics appropriate for computer enhancement. Special methods and techniques for educational uses of computers. Emphasis on activity learning and applications. Computer as a classroom management device. 4 lectures.

MATH 304. Vector Analysis. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing or Mathematics major; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); MATH 206 or MATH 244; and Math 241.

Differential and integral calculus of vector-valued functions. Green's Theorem, Stokes' Theorem, and the Divergence Theorem. Applications and generalizations. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

MATH 306. Linear Algebra II. 4 units

Term Typically Offered: F, W, SP

Prerequisite: MATH 206 or MATH 244; MATH 241; and a C- or better in MATH 248, or consent of instructor.

Rigorous development of real and complex vector spaces, including infinite dimensional spaces. Subspaces, bases, products and direct sums. Examples and properties of linear transformations. Similarity, eigenvalues, eigenvectors and diagonalization. Characteristic and minimal polynomials, Cayley-Hamilton Theorem. 4 lectures.

MATH 316. Introduction to Linear Algebra Workshop II. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 306.

Facilitated study and discussion of the methods and techniques of proof in linear algebra. Credit/No Credit grading only. 1 laboratory.

MATH 328. Mathematics for Elementary Teaching II. 4 units

Term Typically Offered: W, SP

Prerequisite: MATH 227 with a grade of C- or better or consent of instructor.

Introduction to rational and real numbers, probability and counting techniques, statistics, and proportional reasoning. Computer applications. 4 lectures.

MATH 329. Mathematics for Elementary Teaching III. 4 units

Term Typically Offered: F, SP

Prerequisite: MATH 328.

Introduction to concepts of Euclidean geometry, including shape, visualization and attributes of measurement, with an emphasis on problem solving and critical thinking. Computer applications. 4 lectures.

MATH 330. Algebraic Thinking with Technology. 4 units

Term Typically Offered: F, W

Prerequisite: MATH 329.

Algebraic concepts for elementary teachers. Mathematical patterns, equations and inequalities, linear and quadratic functions, exponential and logarithmic functions, systems of equations, roots of polynomials, factoring of polynomials, and right-triangle trigonometry. Computer applications. 4 lectures.

MATH 334. Combinatorial Math. 4 units

Term Typically Offered: F, W

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing or Mathematics major; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: CSC 248, MATH 206, or MATH 248.

Methods of enumerative combinatorics: sum, product, and division rules, bijective and recursive techniques, inclusion and exclusion, and generating functions. Advanced topics to be selected from the theory of partitions, finite difference calculus, Polya theory, designs, and codes. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

MATH 335. Graph Theory. 4 units

Term Typically Offered: F

Prerequisite: MATH 248 or junior standing.

Introduction to graph theory and its applications: isomorphism, paths and searching, connectedness, trees, tournaments, planarity, graph colorings, matching theory, network flow, adjacency and incidence matrices. Further topics to be selected from the theory of finite state machines, Ramsey theory, extremal theory, and graphical enumeration. 4 lectures.

MATH 341. Theory of Numbers. 4 units

Term Typically Offered: SP

Prerequisite: MATH 248 with a grade of C- or better or consent of instructor.

Properties of numbers. Euclid's Algorithm, greatest common divisors, diophantine equations, prime numbers, congruences, number theoretic functions, the quadratic reciprocity laws, primitive roots and indices. 4 lectures.

MATH 344. Linear Analysis II. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing or one of the following majors: BMED, MATH, or ME; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); MATH 206 and MATH 242, or MATH 241 and MATH 244.

Linear methods applied to the solution of differential equations. Laplace transforms. Series solutions to ordinary differential equations. Orthogonality in n -space, Gram-Schmidt orthogonalization and least squares methods. Orthogonal bases in function spaces, Sturm-Liouville theory. Fourier series and transforms. Special functions of applied mathematics. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

MATH 350. Mathematical Software. 4 units

Term Typically Offered: SP

Prerequisite: MATH 206 or MATH 244, and MATH 241, and an introductory college-level programming course, or consent of instructor.

Problem-solving using mathematical software. 4 lectures.

MATH 351. Typesetting with LaTeX. 1 unit

Term Typically Offered: W

CR/NC

Prerequisite: Junior standing.

Preparing documents, especially mathematical ones, using LaTeX and AMS-LaTeX. Credit/No Credit grading only. 1 lecture.

MATH 370. Putnam Exam Seminar. 2 units

Term Typically Offered: F

Prerequisite: Consent of instructor.

Directed group study of mathematical problem solving techniques. Open to undergraduate students only. Class members are expected to participate in the annual William Lowell Putnam Mathematical Competition. Course may be repeated up to eight units. 2 seminars.

MATH 371. Math Modeling Seminar. 2 units

Term Typically Offered: F

Prerequisite: Consent of instructor.

Directed group study of mathematical modeling techniques. Open to undergraduate students only. Class members are expected to participate in the annual Mathematical Competition in Modeling. Total credit limited to 8 units. 2 seminars.

MATH 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Junior standing and consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units.

MATH 404. Introduction to Differential Geometry. 4 units

Term Typically Offered: F

Prerequisite: MATH 304.

Theory of curves and surfaces in space. Topics such as Frenet formulas, curvature, geodesics, Cartan structural equations, Gauss-Bonnet Theorem. 4 lectures.

MATH 406. Linear Algebra III. 4 units

Term Typically Offered: SP

Prerequisite: MATH 306.

Rigorous development of real and complex inner product spaces. Orthogonal bases and direct sums of subspaces. Linear transformations on inner product spaces. Properties of self-adjoint and normal operators. Additional topics such as the Jordan Decomposition Theorem and the Spectral Theorem. 4 lectures.

MATH 410. Complex Analysis I. 4 units

Term Typically Offered: F

Prerequisite: MATH 242, or MATH 241 and MATH 244.

Geometry of the complex plane, analytic functions, the Cauchy-Riemann equations, and harmonic functions. Contour integrals, the Cauchy-Goursat theorem, and Cauchy integral formulas. Maximum modulus and mean value properties. Taylor and Laurent series, the calculus of residues, and applications to integration. 4 lectures.

MATH 411. Complex Analysis II. 4 units

Term Typically Offered: W

Prerequisite: MATH 408 or MATH 410.

Further applications of the calculus of residues, analytic continuation, Rouche's theorem, and the argument principle. Conformal maps, the Riemann mapping theorem, Mobius transformations and applications. Additional topics may include Riemann surfaces, special functions, Weierstrass and Hadamard factorization, and asymptotic methods. 4 lectures. Formerly MATH 409.

MATH 412. Introduction to Analysis I. 4 units

Term Typically Offered: F, W

Prerequisite: MATH 306.

Introduction to concepts and methods basic to real analysis. Topics such as the real number system, sequences, continuity, uniform continuity and differentiation. 4 lectures.

MATH 413. Introduction to Analysis II. 4 units

Term Typically Offered: W, SP

Prerequisite: MATH 412.

A continuation of Introduction to Analysis I covering such topics as integration, infinite series, uniform convergence and functions of several variables. 4 lectures.

MATH 414. Introduction to Analysis III. 4 units

Term Typically Offered: SP

Prerequisite: MATH 413.

Continuation of Introduction to Analysis II covering such topics as differentiation and integration of functions of several variables and other advanced topics. 4 lectures.

MATH 416. Differential Equations II. 4 units

Term Typically Offered: F, W

Prerequisite: MATH 206 and MATH 242, or MATH 241 and MATH 244.

Qualitative theory of ordinary differential equations: Existence and Uniqueness Theorem, phase portraits, limit sets, stability of fixed points and periodic orbits, energy functions, Poincare-Bendixson Theorem, Poincare maps, bifurcations, attractors, chaos. 4 lectures.

MATH 418. Partial Differential Equations. 4 units

Term Typically Offered: F, SP

Prerequisite: MATH 344. Recommended: MATH 304.

Mathematical formulation of physical laws. Separation of variables. Orthogonal functions and generalized Fourier series. Bessel functions, Legendre polynomials. Sturm-Liouville problem. Boundary value problems; nonhomogeneous techniques. Applications to heat flow, potential theory, vibrating strings and membranes. 4 lectures.

MATH 419. Introduction to the History of Mathematics. 4 units

Term Typically Offered: W

Prerequisite: MATH 248 with a grade of C- or better and at least one upper division course in mathematics, or consent of instructor.

Evolution of mathematics from earliest to modern times. Major trends in mathematical thought, the interplay of mathematical and technological innovations, and the contributions of great mathematicians. Appropriate for prospective and in-service teachers. 4 lectures.

MATH 422. Introduction to Analysis I Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 412.

Facilitated study and discussion of the methods and techniques of proof in introductory analysis. Credit/No Credit grading only. 1 laboratory.

MATH 423. Advanced Mathematics for Teaching. 4 units

Term Typically Offered: SP

Prerequisite: MATH 442 and MATH 481.

Introduction to mathematics education research and advanced exploration of the mathematics taught in California's public high schools and middle schools through problem analysis, concept analysis, and problem connections. 4 lectures.

MATH 424. Organizing and Teaching Mathematics. 4 units

Term Typically Offered: F

CR/NC

Prerequisite: Acceptance into the Mathematics Single Subject Credential Program.

Organization, selection, presentation, application and interpretation of subject matter in mathematics. Introduction to current issues in mathematics education. For students who will be teaching in secondary schools. Credit/No Credit grading only. 4 lectures.

MATH 425. Mathematics Student Teaching Seminar. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Acceptance into Step II of the Single Subject Credential Program in Mathematics. Concurrent: EDUC 469 or EDUC 479.

Principles and practice in effective teaching of mathematics at the middle and high school level, learning theories, curriculum content and structure, classroom issues, and the teaching profession. Credit/No Credit grading only. Total credit limited to 4 units. 2 seminars.

MATH 435. Discrete Mathematics with Applications I. 4 units

Term Typically Offered: F

Prerequisite: MATH 248 with a grade of C- or better and MATH 336, or consent of instructor.

Methods of discrete mathematics with applications. Generating functions and Lagrange inversion, partition theory, permutation statistics and q -analogues, posets and Moebius inversion. Additional topics including lattice paths and basic hypergeometric series. 4 lectures. Not open to students with credit in MATH 530.

MATH 436. Discrete Math with Applications II. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 435. Corequisite: MATH 482.

Methods of discrete mathematics with applications. Polya theory, codes, designs, matroids, the combinatorics of symmetric functions, and tableaux combinatorics. Additional topics including transversals and Latin squares, asymptotics, and discrete probability theory. 4 lectures. Not open to students with credit in MATH 531.

MATH 437. Game Theory. 4 units

Term Typically Offered: SP

Prerequisite: MATH 206 or MATH 244, and MATH 248 with a grade of C- or better, or consent of instructor.

Development of the mathematical concepts, techniques, and models used to investigate optimal strategies in competitive situations; games in extensive, normal, and characteristic form, Nash equilibrium points and Nash Bargaining Model. 4 lectures.

MATH 440. Topology I. 4 units

Term Typically Offered: W

Prerequisite: MATH 412. Corequisite: MATH 481.

Introduction to general topological spaces with emphasis on surfaces and manifolds. Open and closed sets, continuity, compactness, connectedness. Quotient spaces. 4 lectures. Not open to students with credit in MATH 540.

MATH 441. Topology II. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 440.

Introduction to general topological spaces with emphasis on surfaces and manifolds. Fundamental group. Triangulations of spaces, classification of surfaces. Other topics may include covering spaces, simplicial homology, homotopy theory and topics from differential topology. 4 lectures. Not open to students with credit in MATH 541.

MATH 442. Euclidean Geometry. 4 units

Term Typically Offered: W

Prerequisite: MATH 248 with a grade of C- or better or consent of instructor. Recommended: MATH 300 or familiarity with dynamic geometry software.

Foundations of Euclidean geometry, finite geometries, congruence, similarities, polygonal regions, circles and spheres. Constructions, mensuration, the parallel postulate. Appropriate for prospective and in-service mathematics teachers. 4 lectures.

MATH 443. Modern Geometries. 4 units

Term Typically Offered: SP

Prerequisite: MATH 442.

Non-Euclidean and projective geometries. Properties of parallels, biangles, Saccheri and Lambert quadrilaterals, angle-sum and area. Limiting curves: hyperbolic trigonometry, duality, perspectivity, quadrangles, fundamental theorems of projective geometry, conics. 4 lectures.

MATH 451. Numerical Analysis I. 4 units

Term Typically Offered: W

Prerequisite: MATH 206 and MATH 242, or MATH 241 and MATH 244, and an introductory college-level programming course.

Topics in interpolation and approximation methods, initial value problems, and boundary value problems of ordinary differential equations. 4 lectures.

MATH 452. Numerical Analysis II. 4 units

Term Typically Offered: SP

Prerequisite: MATH 451.

Numerical techniques for solving partial differential equations of the parabolic, hyperbolic and elliptic type. Further topics in approximation theory. 4 lectures.

MATH 453. Numerical Optimization. 4 units

Term Typically Offered: SP

Prerequisite: MATH 306 and MATH 451.

Algorithms for solving optimization problems that cannot be solved analytically. Descent algorithms including exact and practical line-searches, steepest descent method, and Newton and quasi-Newton methods for unconstrained minimization. Optimality conditions for constrained optimization, linear programming. Projection and Lagrangian methods, and interior point methods for constrained minimization. 4 lectures.

MATH 459. Senior Project Seminar. 4 units

Term Typically Offered: F, SP

Prerequisite: MATH 412 or MATH 481.

Written and oral analyses and presentations by students on topics from advanced mathematics and mathematical modeling. Not open to students with credit in MATH 460. 4 seminars.

MATH 460. Senior Project Applied Seminar. 4 units

Term Typically Offered: F

Prerequisite: CSC/CPE 101 or MATH 350; MATH 306; and MATH 344.

Written and oral analyses and presentations by students on topics in applied mathematics, including applications to sustainability. Construction of mathematical models for physical and biological problems, with analysis and interpretation of the solutions of these models using both analytical and numerical techniques. Not open to students with credit in MATH 459. 4 seminars.

MATH 461. Senior Project I. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Senior Standing.

Selection and development of a mathematics project under faculty supervision. Minimum 60 hours total time.

MATH 462. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: MATH 461.

Completion of a mathematics project under faculty supervision. Project results are presented in a formal report. Minimum 60 hours total time.

MATH 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Schedule of Classes will list title selected. Total credit limited to 8 units. 1 to 4 lectures.

MATH 474. Advanced Topics in Geometry and Topology. 1 unit

Term Typically Offered: TBD

Prerequisite: MATH 248 and consent of instructor. Recommended: MATH 404 and MATH 440.

Exploration of advanced topics and problems in geometry and topology through reading, writing and oral presentations. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 seminar.

MATH 475. Advanced Topics in Mathematics. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 306 and consent of instructor.

Exploration of advanced topics and problems in mathematics. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

MATH 476. Advanced Topics in Applied Mathematics. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 306 and consent of instructor.

Exploration of advanced topics and problems in applied mathematics. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

MATH 481. Abstract Algebra I. 4 units

Term Typically Offered: F, W

Prerequisite: MATH 306 or MATH 341.

Introduction to the study of groups. Topics include groups of permutations, cyclic groups, normal subgroups and quotient groups. Homomorphisms, Lagrange's Theorem, Cayley's Theorem, the Isomorphism Theorems and the Fundamental Theorem of Finite Abelian Groups. 4 lectures.

MATH 482. Abstract Algebra II. 4 units

Term Typically Offered: W, SP

Prerequisite: MATH 481.

Introduction to rings and fields. Reducible and irreducible polynomials, ideals, prime and maximal ideals, quotient rings, ring homomorphisms, the Isomorphism Theorems, integral domains, unique factorization domains, principal ideal domains, Euclidean domains, fields of fractions, field extensions and finite fields. 4 lectures.

MATH 483. Abstract Algebra III. 4 units

Term Typically Offered: SP

Prerequisite: MATH 482.

Algebraic field extensions, the tower law, ruler-and-compass constructions, the primitive element theorem, algebraic and transcendental numbers, algebraic closure, the fundamental theorem of algebra, finite fields, Galois extensions and the fundamental theorem of Galois theory. Not open to students with credit in MATH 560. 4 lectures.

MATH 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 12 units. Credit/No Credit grading only.

MATH 491. Abstract Algebra I Workshop. 1 unit

Term Typically Offered: TBD

CR/NC

Concurrent: Enrollment in the associated section of MATH 481.

Facilitated study and discussion of the methods and techniques of proof in abstract algebra. Credit/No Credit grading only. 1 laboratory.

MATH 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. No major credit allowed; total credit limited to 12 units. Credit/No Credit grading only.

MATH 500. Individual Study. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of department chair.

Individual research or advanced study planned and completed under the direction of a departmental faculty member. Open only to graduate students demonstrating ability to do independent work. Total credit limited to 12 units.

MATH 501. Analytic Methods in Applied Mathematics. 4 units

Term Typically Offered: F

Prerequisite: MATH 344 or AERO 300, and graduate standing.

Introduction to advanced methods of mathematics useful in the analysis of engineering problems. Selected topics in perturbation theory, optimization and Fourier analysis. Not open to students in math major or master's degree program in mathematics. 4 lectures.

MATH 502. Numerical Methods in Applied Mathematics. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing, or CSC/CPE 101 or CSC 231 or CSC 232; and one of the following: AERO 300 or EE 228 or MATH 344 or PHYS 321.

Introduction to advanced numerical analysis. Numerical techniques for solving ordinary and partial differential equations, error analysis, stability, methods for linear systems. 4 lectures.

MATH 505. Graduate Teaching Seminar. 1 unit

Term Typically Offered: F

CR/NC

Prerequisite: Graduate standing.

Principles and practice in effective teaching of college-level mathematics. Issues related to present and future teaching experiences, including time management, professionalism, student assessment, grading, classroom management, and qualities of good mathematics teachers. Reflection on individual teaching, and consideration of improvements in instruction. Credit/No Credit grading only. Total credit limited to 2 units. 1 seminar.

MATH 520. Applied Analysis I. 4 units

Term Typically Offered: W

Prerequisite: MATH 408; MATH 412; and graduate standing.

Recommended: MATH 418.

Advanced mathematical methods of applied mathematics, integrated with modeling of physical phenomena. Topics include dimensional analysis, applications of complex analysis, and advanced techniques for ordinary differential equations. Additional topics selected from dynamical systems, calculus of variations, or other applied subjects. 4 lectures.

MATH 521. Applied Analysis II. 4 units

Term Typically Offered: SP

Prerequisite: MATH 520.

Advanced mathematical methods of applied mathematics, integrated with modeling of physical phenomena. Topics include asymptotic expansions, advanced techniques for partial differential equations, and Fourier analysis. Additional topics selected from integral equations, discrete time systems, numerical analysis, or other applied subjects. 4 lectures.

MATH 530. Discrete Mathematics with Applications I. 4 units

Term Typically Offered: F

Prerequisite: MATH 248 with a grade of C- or better and MATH 336 and graduate standing, or consent of instructor.

Methods of discrete mathematics with applications. Generating functions and Lagrange inversion, partition theory, permutation statistics and q -analogues, posets and Möbius inversion. Additional topics including lattice paths and basic hypergeometric series. 4 lectures. Not open to students with credit in MATH 435.

MATH 531. Discrete Mathematics with Applications II. 4 units

Term Typically Offered: W

Prerequisite: MATH 435 or MATH 530. Corequisite: MATH 482 or graduate standing in Mathematics.

Methods of discrete mathematics with applications. Polya theory, codes, designs, matroids, the combinatorics of symmetric functions, and tableaux combinatorics. Additional topics including transversals and Latin squares, asymptotics, and discrete probability theory. 4 lectures. Not open to students with credit in MATH 436.

MATH 540. Topology I. 4 units

Term Typically Offered: W

Prerequisite: MATH 412 or graduate standing in Mathematics. Corequisite: MATH 481 or graduate standing in Mathematics.

Introduction to general topological spaces with emphasis on surfaces and manifolds. Open and closed sets, continuity, compactness, connectedness. Quotient spaces. 4 lectures. Not open to students with credit in MATH 440.

MATH 541. Topology II. 4 units

Term Typically Offered: SP

Prerequisite: MATH 440 or MATH 540.

Introduction to general topological spaces with emphasis on surfaces and manifolds. Fundamental group. Triangulations of spaces, classification of surfaces. Other topics may include covering spaces, simplicial homology, homotopy theory and topics from differential topology. 4 lectures. Not open to students with credit in MATH 441.

MATH 548. Transition to Graduate Mathematics. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing.

Interactive construction and analysis of mathematical proof and exposition at the graduate level. Topics drawn from standard advanced material in real analysis, linear algebra, and modern algebra. Major credit limited to 4 units; total limited to 8 units. 2 lectures, 2 seminars.

MATH 550. Real Analysis. 4 units

Term Typically Offered: F

Prerequisite: Satisfactory completion of the Graduate Written Examination in Analysis or consent of the Graduate Committee.

Introduction to Lebesgue measure and integration, convergence theorems, L_p spaces, Radon-Nikodym Theorem and Fubini's Theorem. 4 lectures.

MATH 560. Field Theory. 4 units

Term Typically Offered: SP

Prerequisite: MATH 482 or graduate standing.

Polynomial rings, field extensions, normal and separable extensions, automorphisms of fields, fundamental theorem of Galois theory, and further topics such as solvable groups, solution by radicals, insolubility of the quintic. Not open to students with credit in MATH 483. 4 lectures.

MATH 561. Graduate Algebra. 4 units

Term Typically Offered: F

Prerequisite: Completion of the Graduate Written Exam in Algebra or consent of the Graduate Committee.

An introduction to advanced topics from modern algebra, including group actions, the Sylow theorems, semi-direct products, and modules over a principal ideal domain. Other topics may include commutative algebra, homological algebra, cryptography applications, and topics from advanced linear algebra. 4 lectures.

MATH 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of instructor.

Directed group study of selected topics for graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MATH 580. Seminar. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of instructor.

Built around topics in advanced mathematics chosen according to the common interests and needs of the students enrolled. Each seminar will have a subtitle according to the nature of the content. Total credit limited to 12 units. 1-4 seminars.

MATH 599. Thesis. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of instructor.

Serious research endeavor devoted to the development, pedagogy or learning of mathematics. Total credit limited to 9 units.

Mechanical Engineering (ME)

undefined

ME Courses

ME 128. Introduction to Mechanical Engineering I. 1 unit

Term Typically Offered: F

Prerequisite: Mechanical Engineering student; first quarter of freshman year. Concurrent: ME 163.

Introduction to mechanical engineering and its application in professional practice. Includes design, analysis, testing and dissection of mechanical engineering systems, from simple machines to more complicated systems. Introduction to engineering graphic communication. Introduction to HVAC, Manufacturing and Mechatronics concentrations. Includes cornerstone service learning project. 1 laboratory.

ME 129. Introduction to Mechanical Engineering II. 1 unit

Term Typically Offered: W

Prerequisite: ME 128; Mechanical Engineering student; second quarter of freshman year. Concurrent: IME 145.

Communication of designs for manufacturing using basic definitions of points, lines and planes in space. Pictorials, orthographic projection, section views and auxiliary views. Techniques from geometry and spatial definitions integrated to provide information to both the design and manufacturing processes. 1 laboratory.

ME 130. Introduction to Mechanical Engineering III. 1 unit

Term Typically Offered: SP

Prerequisite: ME 129; Mechanical Engineering student; third quarter of freshman year. Corequisite: IME 146.

Use of computer-aided design to communicate parts and assemblies. Dimensioned drawings for part fabrication. Introduction to fits and tolerances. Layout drawings and functional assemblies. 1 laboratory.

ME 161. Introduction to Composite Materials Manufacturing. 2 units

Term Typically Offered: F, SP, SU

Reinforcing fibers and matrix materials both synthetic and natural. Composite material molding and forming processes including hand layup, autoclave, compression molding, filament winding, and vacuum infusion molding. Mold, mandrel or tooling design. Composite component post-processing and machining. 2 laboratories.

ME 163. Freshmen Orientation to Mechanical Engineering. 1 unit

Term Typically Offered: F

Concurrent: ME 128.

Introduction to career opportunities in Mechanical Engineering, exploration of the ethical responsibilities of being a student and professional engineer, and familiarization with the Mechanical Engineering curriculum including cooperative education and international exchange opportunities. Cornerstone service learning project. Field trip may be required. 1 activity.

ME 211. Engineering Statics. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: MATH 241 (or concurrently), PHYS 131 or PHYS 141.

Analysis of forces on engineering structures in equilibrium. Properties of forces, moments, couples, and resultants. Equilibrium conditions, friction, centroids, area moments of inertia. Introduction to mathematical modeling and problem solving. Vector mathematics where appropriate. Course may be offered in classroom-based, online, or hybrid format. 3 lectures. Crosslisted as HNRS/ME 211.

ME 212. Engineering Dynamics. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: MATH 241; ME 211 or ARCE 211.

Analysis of motions of particles and rigid bodies encountered in engineering. Velocity, acceleration, relative motion, work, energy, impulse, and momentum. Further development of mathematical modeling and problem solving. Vector mathematics where appropriate. Course offered in hybrid format with classroom-based and online learning. 3 lectures. Crosslisted as HNRS 214/ME 212.

ME 228. Engineering Design Communication. 2 units

Term Typically Offered: F, W, SP

Use of engineering communication principles to communicate details of project designs including: sketching, orthographic projection, section and auxiliary views, dimensioning, and tolerances. Hand and computer based methods explored. Introduction to design for manufacturability. 2 laboratories.

ME 229. Introduction to Mechanical Engineering for Transfers. 2 units

Term Typically Offered: TBD

Introduction to Mechanical Engineering and its application in professional practice. Includes design, analysis, testing and dissection of mechanical engineering systems. Investigation of personal and professional ethics. Familiarization with the ME curriculum including cooperative education and international exchange opportunities. 1 lecture, 1 laboratory.

ME 234. Philosophy of Design. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Sophomore standing.

General approach to the meaning of engineering design. Conceptual blocks, creativity, design process, design considerations and elements. Course may be offered in classroom-based or online format. 3 lectures.

ME 236. Measurement and Engineering Data Analysis. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Engineering majors. Recommended: CHEM 125, ENGL 149, and PHYS 132.

Introduction to principles and practice of measurement. Application of probability distributions, sampling, confidence intervals, uncertainty, and regression analysis to engineering experiments and design. Techniques for measuring common physical quantities such as temperature, pressure, and strain. Introduction to laboratory report writing and communication of technical data. 2 lectures, 1 laboratory.

ME 251. Introduction to Detailed Design with Solid Modeling. 2 units

Term Typically Offered: F, W, SP

Prerequisite: ME 130 or ME 228. Recommended: IME 143 or IME 146.

Part and system or assembly design with solid modeling using current software and hardware. Techniques of advanced communication including weld symbols, threaded fasteners, dimensioning and tolerancing. Creation of design layouts and part models with varied configurations and dynamic assembly models. Introduction to section mass and inertia properties. Emphasis of group work and peer review in the production of parts for assemblies. 1 lecture, 1 laboratory.

ME 263. Introduction to Mechanical Engineering for Transfer Students. 1 unit

Term Typically Offered: F, SP, SU

Introduction to mechanical engineering and its application in professional practice. Investigation of personal and professional ethics. Familiarization with the ME curriculum including cooperative education and international exchange opportunities. Course may be offered in classroom-based or online format. 1 lecture.

ME 264. Introduction to Mechanical Engineering for Transfers Lab. 1 unit

Term Typically Offered: F, SP

Introduction to Mechanical Engineering and its application in professional practice. Includes design, analysis, testing and dissection of mechanical engineering systems. 1 laboratory.

ME 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

ME 271. Selected Laboratory. 1-2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics. The Class Schedule will list topic selected. Total credit limited to 4 units. 1 to 2 laboratories.

ME 302. Thermodynamics I. 3 units

Term Typically Offered: F,W,SP,SSU

Prerequisite: ME 212 and PHYS 132.

Properties of working fluids and fundamental relations for processes involving the transfer of energy. First and second laws of thermodynamics, irreversibility and availability. 3 lectures.

ME 303. Thermodynamics II. 3 units

Term Typically Offered: F,W,SP,SSU

Prerequisite: ME 302.

Vapor and gas power cycles, refrigeration cycles, thermodynamic relations, psychrometrics, and chemical reactions. Course may be offered in classroom-based, online, or hybrid format. 3 lectures.

ME 305. Introduction to Mechatronics. 4 units

Term Typically Offered: F, SP

Prerequisite: EE 201 and EE 251.

Introduction to microcontrollers and assembly language programming. Emphasis on components and techniques for interfacing that are typical of embedded microcontroller applications (A/D conversion, D/A conversion, interrupts, timers, and pulse-width modulation). Laboratory exercises involve real-time interfacing of microcontrollers to external mechanical and/or electromechanical devices. 3 lectures, 1 laboratory.

ME 313. Engineering Principles in Everyday Life. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and MATH 118 or equivalent. Recommended: PHYS 121.

Discover engineering principles and concepts such as natural frequencies, entropy, Coriolis acceleration, and Faraday's Law that govern our everyday lives, many aspects of human body, and consumer products. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

ME 318. Mechanical Vibrations. 4 units

Term Typically Offered: F,W,SP,SSU

Prerequisite: ME 212, MATH 344. Recommended: EE 201.

Free and forced vibration response of single and multiple degree of freedom systems. Experimental studies of the dynamic behavior of structures and machines. Instrumentation methods utilized in field and laboratory. 3 lectures, 1 laboratory.

ME 322. Introduction to System Dynamics. 4 units

Term Typically Offered: F,W,SP,SSU

Prerequisites: CPE/CSC 101 or CSC 231 or CSC 234; EE 201; EE 251; ME 318; ME 341.

Unified approach for mathematical modeling and numerical analysis of dynamic physical systems that store energy in multiple domains. Emphasis on developing lumped-parameter linear models from primitive elements in a systematic manner. 3 lectures, 1 laboratory.

ME 326. Intermediate Dynamics. 4 units

Term Typically Offered: F,W,SP,SSU

Prerequisite: ME 212; CPE/CSC 101 or CSC 231 or CSC 234. Corequisite: MATH 244.

Continuation of ME 212. Additional analysis of planar motion of rigid bodies with particular attention to rotating reference frames. Kinematics of linkages, three dimensional dynamics, introduction to numerical methods and dynamic simulation of mechanisms. 3 lectures, 1 activity.

ME 328. Design for Strength and Stiffness. 4 units

Term Typically Offered: F, W, SP

Prerequisite: BMED 212 or ME 234; CE 207 or CE 208; MATE 210; and ME 212. Corequisite: CPE/CSC 101, CSC 231, or CSC 234; and ME 251.

Design of machine parts by stress and deflection. Effects of fluctuating stresses and stress concentration. Design of shafts and other machine parts. Modern industrial design practice using standard components and design layout drawings. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

ME 329. Mechanical Systems Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ME 328.

Design of mechanical equipment and systems using various machine elements and components such as threaded fasteners, power screws, springs, gears, bearings, clutches, prime movers, etc. Decision modeling based on technical and economic feasibility. 3 lectures, 1 laboratory.

ME 341. Fluid Mechanics I. 3 units

Term Typically Offered: F,W,SP,SSU

Prerequisite: MATH 242 or MATH 244; ME 212.

Fluid properties and fluid statics. Euler and Bernoulli equations. Conservation equations; dimensional analysis. Viscous pipe flow. Course may be offered in classroom-based or online format. 3 lectures.

ME 343. Heat Transfer. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CPE/CSC 101, CSC 231, or CSC 234; and ME 236, ME 302, and ME 341.

Basic principles of heat transfer by conduction, convection, and radiation. Laboratory experiments to characterize thermodynamic material properties, energy conversion processes, thermodynamic cycles, and performance of heat transfer equipment. 3 lectures, 1 laboratory. Replaces ME 350.

ME 347. Fluid Mechanics II. 4 units

Term Typically Offered: F, W, SP
Prerequisite: ME 236, ME 341, ME 302.

Conservation equations of fluid dynamics. Viscous flow, boundary layer concepts, lift and drag, compressible flow, turbomachinery. Laboratory measurement of turbomachine performance, velocity profiles, boundary layers on surfaces. 3 lectures, 1 laboratory.

ME 359. Fundamentals of HVAC Systems. 4 units

Term Typically Offered: W
Corequisite: ME 302.

Fundamentals of heating, ventilating and air-conditioning (HVAC) systems, human comfort and indoor air quality, primary and secondary systems and components. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 laboratory.

ME 361. Fundamentals of Fire Protection Engineering. 4 units

Term Typically Offered: SP
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Fundamental physical and design principles of fire protection engineering. Fire safety strategy, egress, human behavior, fire dynamics, smoke control, alarm and detection, suppression, structural behavior, failure analysis, and engineering ethics. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

ME 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units.

ME 401. Stress Analysis. 4 units

Term Typically Offered: SP
Prerequisite: CE 207 or CE 208; MATH 344; and ME 328.

Advanced strength of materials: behavior of disks, plates, and shells. Theory of elasticity. Energy methods. 3 lectures, 1 laboratory.

ME 402. Orthopedic Biomechanics. 4 units

Term Typically Offered: W
Prerequisite: ME 328.

Biomechanical analysis of the musculoskeletal system. Emphasis on the use of statics, dynamics, strength of materials, viscoelasticity, and poroelasticity to analyze the mechanical loads acting on human joints, the mechanical properties of tissues, and the design of artificial joints. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

ME 403. Access by Design: Introduction to Rehabilitation Engineering. 4 units

Term Typically Offered: TBD
Prerequisite: CE 204 or CE 208; and ME 212.

Project-based course focused on the design and analysis of systems to assist people with disabilities. Workplace assistance, mobility aids, educational accommodations, assistive technology and adaptive sports. Universal design, empathy in design, the Americans with Disabilities Act, and the social model of disability. 3 lectures, 1 laboratory.

ME 404. Applied Finite Element Analysis. 4 units

Term Typically Offered: F, W
Prerequisite: BMED 410, and CE 207 or CE 208; or CE 406; or ME 328.

Finite element based solutions to engineering problems with an emphasis on elastostatic problems in structural mechanics. The power and pitfalls associated with the finite element method highlighted through practical modeling assignments. Introduces the use of commercial finite element codes. 3 lectures, 1 laboratory. Crosslisted as BMED/CE/ME 404.

ME 405. Mechatronics. 4 units

Term Typically Offered: F, W
Prerequisite: EE 321, EE 361, ME 305, and ME 329 (ME329 may be taken concurrently); or CPE 316 or CPE/EE 329 or CPE/EE 336.

Microprocessor applications in machine control and product design. Applied electronics. Drive technology; transducers and electromechanical systems. Real-time programming. Mechatronic design methodology. 3 lectures, 1 laboratory.

ME 409. Interdisciplinary Study in Biomechanics. 4 units

Term Typically Offered: SP
Prerequisite: BMED 410 and CE 207 or CE 208; or KINE 403; or ME 326.

Examination of human motion biomechanics. Experimental and analytical methods in motion analysis based on rigid body dynamics. Protocols for protection of human subjects in research. Hypothesis-driven research in interdisciplinary teams, including written proposal development and written/oral communication of results to a scientific audience. 1 lecture, 3 activities. Crosslisted as BMED/KINE/ME 409.

ME 410. Experimental Methods in Mechanical Design I. 4 units

Term Typically Offered: TBD
Prerequisite: ME 328. Recommended: ME 318.

Bonded resistance strain gages for static and dynamic measurements; rosettes, bridge circuits, lead wire effects, special gages. Data acquisition systems, and measurement of displacement, velocity, and acceleration. Photoelastic methods including birefringent coatings. Applications in mechanical design and metrology. 3 lectures, 1 laboratory.

ME 412. Composite Materials Analysis and Design. 4 units

Term Typically Offered: W
Prerequisite: AERO 331 or ME 328.

Behavior of unidirectional fiber composites. Properties of short-fiber composites, and orthotropic lamina. Analysis of laminated composites. Strength and hygrothermal behavior of composite materials. Structural optimization. 3 lectures, 1 laboratory.

ME 415. Energy Conversion. 4 units

Term Typically Offered: SP
Sustainability Related
Prerequisite: ME 302.

Engineering aspects of energy sources, conversion and storage. Topics selected from fossil fuel systems, nuclear power, thermoelectric systems, thermionic converters, fuel cells, magnetohydrodynamic generators, and geothermal, tidal, wind and ocean temperature energy conversion systems. 4 lectures.

ME 416. Ground Vehicle Dynamics and Design. 4 units

Term Typically Offered: SP
Prerequisite: ME 318 and ME 329.

Design of ground vehicles for directional stability and control. Tire mechanics and their effects on vehicle performance. Simulation of vehicle dynamics using digital computer. Synthesis of steering mechanism and suspension system. 3 lectures, 1 laboratory.

ME 418. Implementation of Mechanical Controls. 4 units

Term Typically Offered: F, W, SP
Prerequisite: ME 322.

Analysis, design, and implementation of automated controllers for mechanical systems. Experimental measurement of dynamic properties and creation of system models. Analysis and simulation of the effect of control strategies on system dynamics. Design of closed-loop control systems, including control of dynamic properties and implementation using common embedded computing hardware. Not open to students with credit in ME 419 or ME 422. 3 lectures, 1 laboratory.

ME 419. Advanced Control Systems. 4 units

Term Typically Offered: W, SP
Prerequisite: ME 322, ME 236.

Modeling and control of physical systems. Design of mechanical, hydraulic and electrical feedback control systems using time response, transfer function, frequency response, state space and computer simulation. Address state feedback, observability and controllability of multi-input, multi-output systems. Not open to students with credit in ME 418 or ME 422. 3 lectures, 1 laboratory.

ME 422. Mechanical Control Systems. 4 units

Term Typically Offered: F
Prerequisite: ME 318.

Modeling and control of physical systems. Design of mechanical, hydraulic and electrical systems using time response, frequency response, state space, and computer simulation. Not open to students with credit in ME 418 or ME 419. 3 lectures, 1 laboratory.

ME 423. Robotics: Fundamentals and Applications. 4 units

Term Typically Offered: W
Prerequisite: ME 326. Corequisite: ME 418, ME 419, or ME 422.

Introduction to robots and their types. Homogeneous transformations. Kinematic equations and their solutions. Motion trajectories, statics, dynamics, and control of robots. Robot programming. Actuators, sensors and vision systems. 3 lectures, 1 laboratory.

ME 428. Senior Design Project I. 2 units

Term Typically Offered: F, W, SP
Prerequisite: ME 329. Corequisite: ME 318; ME 343 or ME 350; and IME 141, IME 142, IME 143, IME 146, ME 161, or ITP 341.

First of three courses taken sequentially in component and system design using real-world problems. Small teams study and apply techniques of the engineering design process including problem definition, concept generation, feasibility studies and decision making. Practice of professional skills including written and oral communication, teaming, project management, societal responsibility and ethics. 2 laboratories.

ME 429. Senior Design Project II. 2 units

Term Typically Offered: F, W, SP
Prerequisite: ME 428.

Continuation of a project begun in ME 428. Activities focused on detail design, analysis and material procurement. 2 laboratories.

ME 430. Senior Design Project III. 2 units

Term Typically Offered: F, W, SP
Prerequisite: ME 429.

Completion of a project begun in ME 428 and continued in ME 429. Design verified through prototyping and testing. 2 laboratories.

ME 434. Enhanced Oil Recovery. 4 units

Term Typically Offered: TBD
Prerequisite: ME 302; ME 347; and ME 343 or ME 350.

Primary, secondary, and tertiary (enhanced) oil recovery methods. Waterflooding, polymerflooding, gas injection, steam injection, in-situ combustion, chemical flooding, miscible flooding. Performance calculations and computer applications in EOR. 4 lectures.

ME 435. Drilling Engineering. 4 units

Term Typically Offered: TBD
Prerequisite: ME 329, ME 347.

Theory and practice of oilwell planning, drilling, well logging, and completion applied to the development of new oil and gas production, from onshore and offshore fields. 4 lectures.

ME 436. Petroleum Production Engineering. 4 units

Term Typically Offered: TBD
Prerequisite: ME 329, ME 347.

Design and operation of surface and subsurface equipment required in oil production. Processes and systems involved are rod pumping, gas lifting, acidizing, hydraulic fracturing, fluid gathering and storage, separation of oil, gas, water and sediment from produced fluid. Includes equipment used in enhanced oil recovery processes. 4 lectures.

ME 437. Nuclear Energy Power Generation. 4 units

Term Typically Offered: F
Prerequisite: Junior standing; PHYS 132 and PHYS 133.

Operation of a nuclear electric generation station; includes reactor water chemistry, material science, electric science, mechanical science, civil engineering for the nuclear power plant engineers and digital process control systems. Field trip may be required. 4 lectures.

ME 438. Nuclear Power Plant Design. 4 units

Term Typically Offered: W

Prerequisite: ME 302.

Principal elements of pressurized water reactor nuclear power systems; overview of reactor physics, thermodynamics, and heat transfer; includes basic reactor physics, reactor heat generation, reactor plant systems, support systems, and reactor safety. Field trip may be required. 4 lectures.

ME 439. Nuclear Power Plant Operations. 4 units

Term Typically Offered: TBD

Prerequisite: ME 437 or ME 438.

Overview of mass, momentum and energy conversion related to nuclear power plants; includes coupled neutronic/thermal models to study plant operation semi-quantitatively achieving an integrated plant understanding. Content includes: Neutron power kinetics, Coupled neutronic/thermal hydraulic modeling, Quantitative transient modeling, demonstration transients. Field trip may be required. 4 lectures.

ME 441. Single Track Vehicle Design. 4 units

Term Typically Offered: W

Prerequisite: ME 326 and ME 329; or consent of instructor.

Design of single track vehicles, including handling characteristics, ergonomics and human power, strength and stiffness considerations, braking and suspension. Laboratory focus on designing a single track vehicle, including fabrication of a handling prototype. 3 lectures, 1 laboratory.

ME 442. Design of Machinery. 4 units

Term Typically Offered: F

Prerequisite: ME 212.

Graphical synthesis and analysis of mechanisms and machines. Analytical fundamentals for study of displacements, velocities, accelerations, and static and dynamic forces necessary for design of planar linkages and gearing systems. Creative design projects using software simulation tools. 3 lectures, 1 laboratory.

ME 443. Turbomachinery. 4 units

Term Typically Offered: SP

Prerequisite: MATH 344; ME 303; ME 347; and ME 343 or ME 350.

Performance characteristics of various types for liquids and for gases. Criteria for proper selection of type and main dimensions. Cavitation criteria. Gas turbine cycles and performance. Two-dimensional cascades. Axial flow turbines and compressors. Centrifugal compressors and radial-inflow turbines. 4 lectures.

ME 444. Combustion Engine Design. 4 units

Term Typically Offered: TBD

Prerequisite: ME 303; ME 347; and ME 343 or ME 350.

Application of design parameters to the various engine cycles. Aspects of the combustion processes. Emission regulation effects on engine design. Static and dynamic loading. 3 lectures, 1 laboratory.

ME 448. Thermal System Design. 4 units

Term Typically Offered: F, W, SP

Prerequisites: ME 303, ME 343, and ME 347.

Design of thermal systems. Engineering economics, thermal component sizing, and simulation techniques applied to the design and performance analysis of thermal systems. Not open to students with credit in ME 420. 3 lectures, 1 laboratory.

ME 450. Solar Thermal Power Systems. 4 units

Term Typically Offered: F

Sustainability Related

Prerequisite: ME 343 or ME 350. Recommended: ME 415.

High and intermediate temperature systems for conversion of solar energy to mechanical power and heat. Thermal energy storage and total thermal energy system design. 3 lectures, 1 laboratory.

ME 451. Engineering, Design, and Social Justice. 4 units

Term Typically Offered: SP

Prerequisite: Senior standing. Recommended: ME 234 or equivalent engineering design course; and completion of USCP.

Explores topics at the intersection of engineering design theories and efforts for social justice and equity. Critiques dominant engineering mindsets, examines design practices, and articulates ways engineers can develop equity-mindedness in their problem-solving. 4 lectures.

ME 453. Trends and Opportunities in HVAC&R. 1 unit

Term Typically Offered: SP

Sustainability Focused

Prerequisite: ME 302 or ENVE 304.

Overview of the roles of the Heating, Ventilating, Air-Conditioning and Refrigeration (HVAC&R) industry. Presentation of state-of-the-art HVAC&R systems, components and design solutions. Includes guest speakers from HVAC&R industry. 1 activity.

ME 454. Benchmarking and Assessment of Building Energy Performance. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: ME 343 or ME 350. Recommended: ME 359.

An introduction and study of building energy assessment principles and protocols for existing commercial buildings. Course topics include techniques of energy measurement and verification, energy metric comparison and analysis, and energy auditing. Field trip required. 3 lectures, 1 laboratory.

ME 455. Introduction to Building Energy Modeling. 3 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: ME 343 or ME 350. Recommended: ME 359.

Introduction to principles and practices of building energy modeling. Case studies using state of the art energy modeling computer software to simulate the energy use of buildings. Methods to reduce energy consumption of buildings. 2 lectures, 1 laboratory.

ME 456. HVAC Air and Water Distribution System Design. 4 units

Term Typically Offered: F
Prerequisite: ME 302, ME 347.

Air and water distribution components and systems and the design of these systems with applications to the heating, ventilating and air-conditioning (HVAC) industry. Course offered in hybrid format with classroom-based and online learning. 3 lectures, 1 laboratory.

ME 457. Refrigeration Principles and Design. 4 units

Term Typically Offered: SP
Prerequisite: ME 341; ME 343 or ME 350.

Basic engineering principles of refrigeration processes including: vapor compression cycles, multipressure systems, absorption systems, steam jet cooling, air cycles, and low temperature refrigeration. 3 lectures, 1 laboratory.

ME 458. Building Heating and Cooling Loads. 4 units

Term Typically Offered: F
Prerequisite: ME 303; and ME 343 or ME 350.

Building heating and cooling load calculations, estimating energy consumption and operating costs for heating, ventilating and air-conditioning system design and selection. 3 lectures, 1 laboratory.

ME 459. HVAC Senior Design Project I. 3 units

Term Typically Offered: W
Prerequisite: ME 456.

First quarter of a two quarter sequence. Team project work in designing heating, ventilating and air-conditioning (HVAC) systems. New developments, policies and practices in the HVAC industry. Professional ethics relevant for practicing engineers. 1 lecture, 2 laboratories.

ME 460. HVAC Senior Design Project II. 2 units

Term Typically Offered: SP
Prerequisite: ME 459.

Continuation of work begun in ME 459. Team project designing heating, ventilating and air-conditioning (HVAC) systems. 2 laboratories.

ME 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 lectures.

ME 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

ME 488. Wind Energy Engineering. 4 units

Term Typically Offered: W
Sustainability Focused
Prerequisite: ME 329, ME 347, ME 302.

Engineering aspects of windpower systems including mechanical design, support structure design, aerodynamic analysis, wind field analysis, system concepts and analysis, and economics. 4 lectures.

ME 493. Cooperative Education Experience. 2 units

Term Typically Offered: F, W, SP
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 6 units.

ME 494. Cooperative Education Experience. 6 units

Term Typically Offered: F, W, SP
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 18 units.

ME 495. Cooperative Education Experience. 12 units

Term Typically Offered: F, W, SP
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. A more fully developed formal report and evaluation by work supervisor required. Credit/No Credit grading only. No major credit allowed; total credit limited to 24 units.

ME 500. Individual Study. 1-4 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of department head, graduate advisor and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Total credit limited to 8 units.

ME 501. Continuum Mechanics and Elasticity. 4 units

Term Typically Offered: F
Prerequisite: Graduate standing.

Introduction to continuum mechanics. Kinematics, stress, and balance laws. Constitutive theory for isotropic and anisotropic solids and viscous fluids. Applications including design of beams and pressure vessels, stress concentrations, fiber-reinforced composites, and non-homogeneous biological materials. Course offered in hybrid format with classroom-based and online learning. 4 lectures. Crosslisted as CE 511/ME 501.

ME 503. Inelastic Stress Analysis. 4 units

Term Typically Offered: W
Prerequisite: ME 501 or CE 511.

Perfectly plastic and work hardening materials; von Mises and Tresca yield, isotropic and kinematic hardening flow rules, boundary-value problems. Finite elasticity: kinematics, Cauchy- and Green-elasticity, invariance, constraints, Neo-Hookean and Mooney-Rivlin materials, experimental approaches, non-uniqueness, anisotropy, residual stress, thermoelasticity, boundary-value problems. Course offered in hybrid format with classroom-based and online learning. 4 lectures. Crosslisted as CE 513/ME 503.

ME 504. Finite Element Analysis. 4 units

Term Typically Offered: SP
Prerequisite: CE/ME 404 and CE 511/ME 501 or consent of instructor.

Finite element theory and application with a focus on computer implementation of the method. Strong, weak and variational formulations, physical and isoparametric spaces, error estimates, numerical integration, finite element algorithms, and programming architecture. 3 lectures, 1 laboratory. Crosslisted as CE/ME 504.

ME 506. System Dynamics. 4 units

Term Typically Offered: SP
Prerequisite: Graduate standing or consent of instructor.

Unified approach for mathematical modeling and analysis of dynamic physical systems which may store energy in multiple energy domains. Emphasis on developing lumped-parameter linear system models from a set of primitive elements in a systematic manner. 4 lectures.

ME 507. Mechanical Control System Design. 4 units

Term Typically Offered: F, SP
Prerequisite: Graduate standing or consent of instructor.

Application of principles of high-level design to mechanical control system implementation. Use of modified state transition logic in conjunction with object-oriented programming as design methodology. Real-time programming using above techniques for control of mechanical systems. 3 lectures, 1 laboratory.

ME 517. Advanced Vibrations. 4 units

Term Typically Offered: SP
Prerequisite: ME 318, graduate standing or consent of instructor.

Vibration of complex engineering systems. Inertia and stiffness matrices. Natural frequencies and normal modes. Approximate solutions and computer techniques. Response to transient and periodic inputs. 3 lectures, 1 laboratory.

ME 518. Machinery Vibration and Rotor Dynamics. 4 units

Term Typically Offered: W
Prerequisite: ME 318, graduate standing or consent of instructor.

Vibrations relating to rotating machinery. Modeling of structural rotordynamic phenomena induced by shaft flexibility, bearings, and seals. Laboratory measurement of rotor system dynamic response and interpretation of machinery diagnostic information. Research project on a related topic. 3 lectures, 1 laboratory.

ME 540. Viscous Flow. 4 units

Term Typically Offered: W
Prerequisite: ME 347, MATH 344 and graduate standing or consent of instructor.

Introduction to tensor calculus and indicial notation. Development of Reynolds' Transport Theory. Special forms of the governing equations of fluid motion. Internal flows and other classical solutions to the Navier-Stokes equations. 4 lectures.

ME 541. Advanced Thermodynamics. 4 units

Term Typically Offered: TBD
Prerequisite: ME 303 and ME 347; ME 343 or ME 350; and graduate standing.

Selected modern applications of thermodynamics which may include topics from: 1) equilibrium and kinetics as applied to combustion and air pollution, analysis and evaluation of techniques used to predict properties of gases and liquids, and 2) improvement of modern thermodynamic cycles by second law analysis. 4 lectures.

ME 542. Dynamics and Thermodynamics of Compressible Flow. 4 units

Term Typically Offered: F
Prerequisite: MATH 244; ME 303; ME 347; ME 343 or ME 350; and graduate standing.

Control volume analysis of fluid-thermo equations for one-dimensional, compressible flow involving area change, normal shocks, friction, and heat transfer. Two-dimensional supersonic flow including linearization, method of characteristics, and oblique shocks. One-dimensional constant area, unsteady flow, 4 lectures.

ME 552. Advanced Heat Transfer I. 4 units

Term Typically Offered: W
Prerequisite: MATH 344; ME 347; ME 343 or ME 350; and graduate standing.

Advanced principles of heat transfer. Classical solution techniques to problems in conduction and/or radiation. 4 lectures.

ME 553. Advanced Heat Transfer II. 4 units

Term Typically Offered: F
Prerequisite: MATH 344; ME 347; ME 343 or ME 350; and graduate standing.

Advanced principles of heat transfer. Classical solution techniques to problems in convection. 4 lectures.

ME 554. Computational Heat Transfer. 4 units

Term Typically Offered: SP
Prerequisite: ME 347; ME 343 or ME 350; and graduate standing.
Recommended: MATH 418.

Numerical solutions of classical, industrial, and experimental problems in conduction, convection, and radiation heat transfer. 3 lectures, 1 laboratory.

ME 563. Graduate Seminar. 1 unit

Term Typically Offered: F
Prerequisite: Graduate standing in mechanical engineering program.

Current developments in mechanical engineering. Participation by graduate students, faculty and guests. 1 seminar.

ME 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units; may be repeated in same term. 1 to 4 seminars.

ME 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units; may be repeated in same term. 1 to 4 laboratories.

ME 579. Fluid Power Control. 4 units

Term Typically Offered: TBD

Prerequisite: ME 418 or ME 419 or ME 422.

Design, analysis, and control of fluid power systems. Analysis of fluid power system components such as valves, actuators, pumps and motors. System response and stability. Dynamic modeling and computer simulation 3 lectures, 1 laboratory.

ME 599. Design Project (Thesis). 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing.

Each individual or group will be assigned a project for solution under faculty supervision as a requirement for the master's degree, culminating in a written report/thesis.

Microbiology (MCRO)

undefined

MCRO Courses

MCRO 100. Introduction to Microbiology Research. 2 units

Term Typically Offered: W

CR/NC

Group research experience in microbiology through participation in a faculty-student research project. Foundations of the scientific method including literature review, design of experiments, common laboratory techniques, data analysis, interpretation of results and scientific communication. Intended for freshmen and sophomores with no research experience. Priority to MCRO majors. Credit/No Credit grading only. 1 seminar, 1 laboratory.

MCRO 221. Microbiology. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Prerequisite: CHEM 110 or CHEM 124 or CHEM 127.

Microbial classification and identification, cell structure and function, metabolism, microbial systems and evolutionary processes, with applications to industry, agriculture, food production, environment, and health. Not open to students with credit in MCRO 224; not for credit for Biology and Microbiology majors. 3 lectures, 1 laboratory. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

MCRO 224. General Microbiology I. 5 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Prerequisite: BIO 161; and CHEM 125 or CHEM 128. Recommended: CHEM 129.

Fundamental concepts of prokaryotes, eukaryotic microorganisms and microbiological entities. Microbial taxonomy, classification, cellular structure and function, metabolism, growth dynamics and control. Introduction to microbial genetics and molecular techniques. Microbial interaction with human and society. Fundamental laboratory techniques in microbiology. 3 lectures, 2 laboratories. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs).

MCRO 225. General Microbiology II. 5 units

Term Typically Offered: SP

Prerequisite: MCRO 224.

Microbial diversity, systematics, ecology, and symbiotic relationships. Introduction to host-microorganism interactions including pathogenesis, epidemiology, and immunology. 3 lectures, 2 laboratories.

MCRO 301. Wine Microbiology. 4 units

Term Typically Offered: SP

Prerequisite: MCRO majors must have MCRO 224; WVIT majors must have MCRO 221 or MCRO 224; and WVIT 202; open to MCRO or WVIT majors only.

Wine yeasts, bacteria, and molds: morphology and methods of identification; successful alcoholic and malolactic fermentations; management and prevention of unwanted microbial growth; microorganisms and flavor development. 3 lectures, 1 laboratory. Crosslisted as MCRO/WVIT 301.

MCRO 320. Emerging Infectious Diseases. 3 units

Term Typically Offered: F,W,SP,SU

Prerequisite: BIO 161; and MCRO 221 or MCRO 224.

Recent outbreaks of human diseases, interrelationships between infectious disease agents, human biology, and the environment. Infectious agents and disease processes, virulence mechanisms, and host immune response. Clinical approaches and surveillance methods to detect, investigate, and monitor emerging pathogens. Factors involved in the accelerating emergence of diseases and bioterrorist agents. 3 lectures.

MCRO 342. Public Health Microbiology. 4 units

Term Typically Offered: W, SP

Prerequisite: MCRO 221 or MCRO 224.

Principles of disease prevention and control. Water-, food-, and air-borne microbial contaminations and epidemiology of ensuing diseases. 3 lectures, 1 laboratory.

MCRO 402. General Virology. 4 units

Term Typically Offered: W

Prerequisite: BIO 351 or CHEM 373, or graduate standing in Biological Sciences. Recommended: BIO 452.

Infective macromolecules (prions, viroids, and viruses) associated with microbes, plants, and animals. Epidemiology, immune responses, pathogenicity, carcinogenesis, diagnoses, vaccination, and therapy. 3 lectures, 1 laboratory.

MCRO 421. Food Microbiology. 4 units

Term Typically Offered: F, SP

Prerequisite: MCRO 221 or MCRO 224. Recommended: CHEM 212/312.

Physiological activities of microorganisms involved in the preparation, preservation, deterioration, and toxicity of foods and related products. Detection and prevention of spoilage microorganisms and foodborne pathogens. 3 lectures, 1 laboratory.

MCRO 423. Medical Microbiology. 5 units

Term Typically Offered: F

Prerequisite: Junior standing; MCRO 225; and CHEM 216, CHEM 312 or CHEM 316; and consent of instructor.

Microorganisms as agents of disease in humans. Epidemiology, host-parasite relationships, and chemotherapy. The compromised host and opportunistic disease. Laboratory safety. Procedures for laboratory diagnosis of human diseases. Rapid miniaturized methods of identification. 3 lectures, 2 laboratories.

MCRO 424. Microbial Physiology. 5 units

Term Typically Offered: W

Prerequisite: MCRO 225 and CHEM 313 or CHEM 371, or graduate standing in Biological Sciences.

Cellular structure and life processes of bacteria; chemical composition, growth, and metabolism. General biological and evolutionary considerations. 3 lectures, 2 laboratories.

MCRO 433. Microbial Biotechnology. 3 units

Term Typically Offered: F

Prerequisite: MCRO 221 or MCRO 224; and BIO 303 or BIO 351 or equivalent; and CHEM 216, CHEM 312 or CHEM 316 or equivalent, or graduate standing in Biological Sciences.

Principles and methods used for production of enzymes, pharmaceuticals, chemicals, and food additives using micro-organisms. Topics include screening and strain improvement, regulation of metabolite production, genetic engineering, heterologous gene expression systems, large-scale production, and intellectual property. 3 lectures.

MCRO 436. Microbial Ecology. 4 units

Term Typically Offered: SP

Prerequisite: BIO 160; BIO 161; BIO 263; and MCRO 221 or MCRO 224; or graduate standing in Biological Sciences.

Ecology and interactions of microorganisms in natural environments. Role of microorganisms in ecosystem function such as nutrient cycling, extreme environments, symbioses. Applications of microorganisms in the environment such as bioremediation, biocontrol, biofuels. Field trip may be required. 2 lectures, 2 activities.

Military Science Leadership (MSL)

undefined

MSL Courses

MSL 101. Foundation of Officership I. 1 unit

Term Typically Offered: F

Introduction to issues and competencies of the Army officer profession. Emphasis on stereotypes about the military, the role of the Army officer, customs and traditions within the military, and personal and physical development. 1 lecture.

MSL 102. Foundation of Officership II. 1 unit

Term Typically Offered: W

The role of leadership within a large organization. Emphasis on the definition of leadership, leadership framework, individual and organizational core values, and the moral responsibility of leadership. 1 lecture.

MSL 103. Basic Leadership. 1 unit

Term Typically Offered: SP

The foundation of basic leadership fundamentals such as problem solving, communications, briefings and effective writing, techniques for improving listening and speaking skills, and an introduction to counseling. 1 lecture.

MSL 110. Exercises in Military Leadership. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Enrollment in any MSL course or consent of department head.

Hands-on instruction on the proper execution of small-unit military operations. Incorporation of the military decision-making process in the planning, execution and conducting of a wide variety of squad, platoon and company sized missions. Credit/No Credit grading only. 1 activity.

MSL 111. Orienteering. 2 units

Term Typically Offered: W, SP

Principles of orienteering, basic map reading and compass skills; course running techniques applied in field orienteering events. 1 lecture, 1 activity.

MSL 112. The Army Physical Fitness Program. 1 unit

Term Typically Offered: F, W, SP

The Army Physical Fitness Program and its proper execution. Physical training to the Army standard with the goal of successfully passing the Army Physical Fitness Test. 1 laboratory.

MSL 201. Foundations of Leadership I. 2 units

Term Typically Offered: F

The development of individual leadership traits and capabilities using the Army officer as a model. The Army's problem solving methods, written and oral communications, tactics and group leadership. 2 lectures.

MSL 202. Foundations of Leadership II. 2 units

Term Typically Offered: W

The development of individual leadership traits and capabilities using the Army officer as a model. The Army's problem solving methods, tactics and group leadership. 2 lectures.

MSL 203. Foundations of Leadership III. 2 units

Term Typically Offered: SP

The development of individual leadership traits and capabilities using the Army officer as a model. The Army's problem solving methods, land navigation techniques, tactics and group leadership. 2 lectures.

MSL 212. Leader's Training Course. 1-7 units

Term Typically Offered: F

One to seven units of credit may be granted depending upon successful completion of training. Five weeks of training, Fort Knox, Kentucky. Travel pay and salary provided through the Military Science Department. No obligation. LTC graduates eligible to enroll in ROTC Advanced Program.

MSL 229. Ranger Challenge. 2 units

Term Typically Offered: F

CR/NC

Selection and preparation of the Ranger Challenge Team which will represent Cal Poly in military tactical skills competition. Includes rope bridging, orienteering, weapons knowledge, hand grenade accuracy, 10K road march with equipment, first aid, marksmanship, physical fitness and tactics. Credit/No Credit grading only. 2 activities.

MSL 240. American Military History and the Evolution of Western Warfare. 4 units

Term Typically Offered: W, SP

Comprehensive analysis of American military history from the early Anglo-French period to the end of the 20th Century. Examination of the strategies, operations and tactics of military warfare, and exploration of how social, economic, and technological factors produced the distinct patterns of war that characterize the struggles of the past two hundred plus years. Open to all students. 4 lectures.

MSL 270. Selected Topics. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MSL 275. Facilitation and Teambuilding. 2 units

Term Typically Offered: TBD

Techniques and models used in leadership, facilitation, and teambuilding. Emphasis on leadership and facilitation styles and models, teambuilding and group dynamics, and working with various populations. Field trip required. 2 seminars. Crosslisted as MSL/RPTA 275.

MSL 301. Tactical Leadership I. 3 units

Term Typically Offered: F

Prerequisite: Completion of MSL 101, MSL 102, MSL 103, MSL 201, MSL 202, MSL 203, or completion of MSL 212, and consent of department head.

Introduction to the life of a professional Army officer. Instruction in the operational art of small-unit leadership, and the roles and responsibilities of an Army 2nd Lieutenant in preparation for attendance at the Leader Development and Assessment Course. 3 lectures.

MSL 302. Tactical Leadership II. 3 units

Term Typically Offered: W

Prerequisite: MSL 301, and consent of instructor.

Continuation of study of the life of a professional Army officer. Instruction in the operational art of small-unit leadership, and the roles and responsibilities of an Army 2nd Lieutenant in preparation for attendance at the Leader Development and Assessment Course. 3 lectures.

MSL 303. Applied Leadership. 3 units

Term Typically Offered: SP

Prerequisite: MSL 301, MSL 302, and consent of instructor.

Demonstration of proficiency in leading small units. Emphasis on clear and concise oral communications, land navigation, weapons skills, and timely decision-making. Completion of training for the Leader Development and Assessment Course and preparation for attendance at the course. 3 lectures.

MSL 310. Advanced Leadership of Military Exercises. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: MSL 110. Recommended: MSL 203 or MSL 212.

The planning, resourcing and execution of selected Army tactical missions in a field environment, and leading all students enrolled in MSL 110. Total credit limited to 3 units. 1 activity.

MSL 312. Leadership of the Army Physical Fitness Program. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: MSL 112. Recommended: MSL 203 or MSL 212.

The planning, resourcing and execution of the Army Physical Fitness Program, and leading all students enrolled in MSL 112. Total credit limited to 3 units. 1 laboratory.

MSL 314. Leadership Development and Assessment Course. 6 units

Term Typically Offered: F

CR/NC

Prerequisite: MSL 301, MSL 302, MSL 303, and consent of instructor.

Five week summer training program required to achieve an Army commission. Testing and training as functional Army officers and determination of potential for service. Travel pay, room and board, and salary provided by the U.S. Army. Held at Fort Lewis, Washington. Credit/No Credit grading only.

MSL 400. Special Problems for Advanced Undergraduates. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

MSL 401. Developmental Leadership I. 3 units

Term Typically Offered: F

Prerequisite: MSL 301, MSL 302, MSL 303 and consent of instructor.

In-depth study and analysis of the duties and responsibilities of an ethical Army officer. Emphasis on honing skills required at follow-on training. Administrative actions and self and subordinate developmental processes utilized by an Army 2nd Lieutenant. 3 lectures.

MSL 402. Developmental Leadership II. 3 units

Term Typically Offered: W

Prerequisite: MSL 401 and consent of instructor.

Continuation of MSL 401 with a focus on communications and personal development. Continuation of in-depth study and analysis of the duties and responsibilities of an ethical Army officer. Emphasis placed on honing skills required at follow-on training. Administrative actions and self and subordinate developmental processes utilized by an Army 2nd Lieutenant. 3 lectures.

MSL 403. Adaptive Leadership. 3 units

Term Typically Offered: SP

Prerequisite: MSL 401 and MSL 402.

Beginning of transition from student to commissioned officer. Emphasis on expectations of an Army 2nd Lieutenant. Cultural awareness, effective command climates, terrorism and force protection in the current operational environment, and individual officer skills. 3 lectures.

MSL 410. Administration and Evaluation of Exercises in Military Leadership. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: MSL 303 or MSL 310. Recommended: MSL 314.

The supervision and evaluation of the organization, planning, resourcing, and execution of selected Army tactical missions, and mentoring assigned students enrolled in MSL 310. Total credit limited to 3 units. 1 activity.

MSL 412. Administration and Evaluation of the Army Physical Fitness Program. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: MSL 303 or MSL 312. Recommended: MSL 314.

The supervision and evaluation of the organization, planning, resourcing, and execution of the Army Physical Fitness Program, and mentoring assigned students enrolled in MSL 312. Total credit limited to 3 units. 1 laboratory.

MSL 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Music (MU)

undefined

MU Courses

MU 101. Introduction to Music Theory. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Introduction to materials of music and their use by composers and performers in diverse cultural contexts. Notation of dynamics, pitch, rhythm, scales, key signatures, intervals, and chords. Analysis of musical syntax based on these elements. 3 lectures, 1 activity. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

MU 103. Music Theory I: Diatonic Materials. 4 units

Term Typically Offered: F, W

Prerequisite: MU 101 with a grade of C- or better, or consent of instructor.

Introduction to species counterpoint, structure of tonality, four-part writing of root position and inverted triads, dominant seventh chord, phrase structure, harmonic progressions, harmonization of a melody and nonharmonic tones. Composition project. 4 lectures.

MU 104. Musicianship I. 2 units

Term Typically Offered: F

Prerequisite: MU 101; Music majors may be concurrently enrolled in MU 101 and MU 104.

Introductory sightsinging in the major mode; rhythmic performance and dictation in simple and compound meters; identification and performance of melodic and harmonic intervals and triads; dictation of major diatonic melodies and chord progressions using the primary triads. 2 activities.

MU 105. Music Theory II: Chromatic Materials. 4 units

Term Typically Offered: W, SP

Prerequisite: MU 103 with a grade of C- or better, or consent of instructor.

Construction and resolution of diatonic seventh chords, secondary dominants, augmented sixth, and Neapolitan chords. Modal mixture and modulation to closely-related keys. Binary, ternary, and variation forms. Introduction to 18th-century counterpoint. Composition project. 4 lectures.

MU 106. Musicianship II. 2 units

Term Typically Offered: W

Prerequisite: MU 104 with a grade of C- or better, or consent of instructor. Corequisite: MU 103.

Sightsinging and dictation in major and minor modes; performance and dictation of one- and two-part rhythms in simple and compound meters; syncopation; identification of compound intervals, triad inversions, and cadence types; harmonic dictation using diatonic root-position triads and the dominant seventh. 2 activities.

MU 108. Musicianship III. 2 units

Term Typically Offered: SP

Prerequisite: MU 106 with a grade of C- or better, or consent of instructor.

One- and two-part sightsinging and melodic dictation; alto and tenor clefs; one- and two-part rhythmic performance and dictation including syncopation and triplets; harmonic dictation including diatonic triads in all inversions and dominant and supertonic seventh chords; identification of phrase structure. 2 activities.

MU 114. Introduction to Composing. 4 units

Term Typically Offered: TBD

Prerequisite: MU 101 or consent of instructor.

Fundamental concepts in music composition. Creative projects. Compositional techniques, development, and structure. Analysis of examples from the literature. 3 lectures, 1 activity.

MU 120. Music Appreciation. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Explores the elements of music with emphasis on Western tradition. Language of music, the role of music in society. Historical context and major composers from the Middle Ages to the present. 3 lectures, 1 activity. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

MU 121. Introduction to Non-Western Musics. 4 units

Term Typically Offered: W

Prerequisite: MU 104 or consent of instructor.

Survey of selected non-Western music cultures. Emphasis on listening and understanding the ensemble type, aesthetic principle, musical style, and performance practice of each. 3 lectures, 1 activity.

MU 150. Applied Music. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual instruction in performance with emphasis on repertoire, technical skills, style, and interpretation. Total credit limited to 6 units. The Class Schedule will list topic selected.

MU 151. Beginning Class Piano. 2 units

Term Typically Offered: F, W, SP

Beginning piano for student with no background in keyboard instruments. Includes fundamentals of notation, keyboard techniques, tone production, sightreading and facility. 1 lecture, 1 activity.

MU 152. Elementary Class Piano. 1 unit

Term Typically Offered: TBD

Prerequisite: MU 151 or consent of instructor; for non-music majors.

Continuation of MU 151. Piano for students with the ability to play a simple Bach or Mozart Minuet. Total credit limited to 3 units. 1 activity.

MU 154. Beginning Voice. 1 unit

Term Typically Offered: F, W, SP

Beginning study of vocal and performance technique for the untrained singer. Includes the beginning study of the vocal mechanism and the fundamentals of notation. 1 activity.

MU 155. Beginning Guitar. 1 unit

Term Typically Offered: F, W, SP

Fundamentals of guitar technique and performance. Elements of classical, pop, and folk styles. Basics of staff and chord notations. No previous experience necessary. 1 activity.

MU 161. Piano Skills I. 1 unit

Term Typically Offered: F

Prerequisite: Music major or consent of instructor.

Preparation for Piano Proficiency Examination. Study of piano repertoire, sightreading, transposition, harmonization of a melody, accompanying, improvisation of a melody, score-reading. 1 activity.

MU 162. Piano Skills II. 1 unit

Term Typically Offered: W

Prerequisite: MU 161 or consent of instructor.

Continuation of MU 161. Preparation for Piano Proficiency Examination. Study of piano repertoire, sightreading, transposition, harmonization of a melody, accompanying, improvisation of a melody, score-reading. 1 activity.

MU 163. Piano Skills III. 1 unit

Term Typically Offered: SP

Prerequisite: MU 162 or consent of instructor.

Continuation of MU 162. Preparation for Piano Proficiency Examination. Study of piano repertoire, sightreading, transposition, harmonization of a melody, accompanying, improvisation of a melody, score-reading. 1 activity.

MU 168. Piano Accompanying. 1 unit

Term Typically Offered: TBD

Corequisite: MU 253 or piano topic in any of the following courses: MU 150, MU 250, MU 350 or MU 450; or consent of instructor.

Preparation and performance of vocal and instrumental music written with piano accompaniment. Choral rehearsal accompanist techniques. Open to students who are proficient on piano at a collegiate level. Total credit limited to 6 units. 1 activity.

MU 170. University Jazz Band. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Rehearsal and public performance of jazz big band repertoire. Open to qualified students who sing or who play trumpet, trombone, saxophone, piano, guitar, vibes, bass, drums, or congas. Total credit limited to 6 units. 1 laboratory.

MU 171. Instrumental Ensembles. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Faculty-supervised small ensembles (e.g., string quartets, brass quintets), as permitted by departmental staffing. Performances take place in student recitals, large-ensemble concerts, and/or other university events. Open to students concurrently participating in large ensembles. Interested students should contact instrumental ensemble directors. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 activity.

MU 172. Wind Orchestra. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Study and public performance of music written for large wind band. Open to all qualified students who perform on woodwind, brass, and percussion instruments. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 laboratory.

MU 173. Wind Ensemble. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Study and public performance of music written for wind bands with limited doubling and flexible instrumentation. Open to all students who perform on woodwind, brass and percussion instruments on an advanced collegiate level. Total credit limited to 6 units. 1 laboratory.

MU 174. Symphony Orchestra. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor, based on audition.

Preparation and performance of orchestral music, including both standard repertoire and current works in various genres. Open to all qualified students who perform on string, woodwind, brass, and percussion instruments. Field trip required. Total credit limited to 6 units. 1 laboratory.

MU 176. Mustang Band. 1 unit

Term Typically Offered: F, W
Prerequisite: Consent of instructor.

Public performance of music and specially-designed shows written for marching band (woodwinds, brass, percussion, and flag team auxiliary). Limited to those students who have had marching experience with wind and percussion instruments, or flag, rifle or dance lines. Total credit limited to 6 units. 1 laboratory.

MU 177. Chamber Winds. 1 unit

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Study and public performance of chamber music written for woodwinds, brass, or percussion. Open to all instrumentalists who have high school or college level performance experience. Total credit limited to 6 units. 1 activity.

MU 178. Field Show Marching Skills. 1 unit

Term Typically Offered: F
Study and application of advanced field show marching techniques used in performance by the Cal Poly Mustang Band and other university bands. Limited to those students who have experience performing on a wind/percussion instrument, or in a marching band flag/dance team auxiliary. Total credit limited to 6 units. 1 activity.

MU 181. PolyPhonics. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Advanced study and public performance of music for mixed chorus. Total credit limited to 6 units. 1 laboratory.

MU 182. Cantabile. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Advanced study and public performance of music for soprano and alto chorus. A variety of styles of choral literature specifically intended for treble voices from various time periods is explored. Total credit limited to 6 units. 1 activity.

MU 183. Vocal Ensemble. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Open to qualified singers. Rehearsal and performance of specialized vocal music. Total credit limited to 6 units. 1 activity.

MU 185. University Singers. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Study and public performance of music for large mixed chorus. Total credit limited to 6 units. 1 laboratory.

MU 186. Chamber Choir. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Advanced study and public performance of music for small ensemble. This ensemble focuses on music of the Renaissance, Baroque and Modern Eras. A variety of styles of choral literature, specifically intended for a small performing ensemble, is explored. Total credit limited to 6 units. 1 laboratory.

MU 188. Arab Music Ensemble. 1 unit

Term Typically Offered: F, W, SP
Rehearsal and performance of instrumental and vocal repertoire drawn from art and popular music of wide-ranging Arabic-speaking societies and historically related cultures. Accompanying music theories, instrumental techniques, and performance practices, with presentation of seminal works in public concerts. Total credit limited to 6 units. 1 laboratory.

MU 189. Vocal Practicum. 1 unit

Term Typically Offered: F, W, SP
Prerequisite: MU 150, MU 250, MU 350 or MU 450, or consent of instructor.

Study and implementation of performing techniques used by vocalists in a recital or concert setting. Total credit limited to 6 units. 1 activity.

MU 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP
Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

MU 210. Musicianship IV. 1 unit

Term Typically Offered: F
Prerequisite: MU 108 with a grade of C- or better, or consent of instructor.
Corequisite: MU 105.

Continuation of MU 108. Sightsinging and melodic dictation using chromatic tones; rhythmic performance in changing meters; harmonic dictation including seventh chords, secondary dominants, and modulation to closely-related keys; seventh chord inversions; and aural identification of binary and ternary forms. 1 activity.

MU 211. Musicianship V. 1 unit

Term Typically Offered: W

Prerequisite: MU 210 with a grade of C- or better, or consent of instructor.

Continuation of MU 210. Sightsinging using chromatic tones; rhythmic performance and dictation in changing and asymmetric meters; harmonic dictation including Neapolitan triads, augmented sixth chords, modal mixture, and modulation to closely-related keys; aural identification of sonata, rondo, and variation forms. 1 activity.

MU 212. Musicianship VI. 1 unit

Term Typically Offered: SP

Prerequisite: MU 211 with a grade of C- or better, or consent of instructor.

Continuation of MU 211. Emphasis on previously acquired skills, plus sightsinging, melodic dictation, and harmonic dictation using modulation to foreign keys; performance and dictation of cross-rhythms and complex beat divisions; tempo modulation; aural identification of contrapuntal genres; and modulatory melodic dictation in two parts. 1 activity.

MU 221. Jazz Styles. 4 units

Term Typically Offered: W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

USCP

Survey of Jazz as a significant American art form from 1900 to the present; its historical background and development in the United States; key elements, leading performers, and significant compositions in each style. Emphasis on listening skills. 3 lectures, 1 activity. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs); and USCP.

MU 227. Popular Music of the USA. 4 units

Term Typically Offered: W

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

USCP

Study of popular music of the USA from the nineteenth century to contemporary times. Emphases include cultural identity, social diversity, musical aesthetics, artistic significance, ethnic relations, gender issues, religious expression, performance practice, technological development, modernization, commodification, and political empowerment. 3 lectures, 1 activity. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs); and USCP.

MU 228. Music of the 60's: War and Peace. 4 units

Term Typically Offered: TBD

Explores wide spectrum of rock, folk and pop styles of the 60s. Relates music to social turmoil and historical trends, including Vietnam War, Civil Rights Movement, American Indian Movement, Chicano Movement, Free Speech Movement. 3 lectures, 1 activity.

MU 250. Applied Music. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: 3 units of MU 150 and consent of instructor.

Individual instruction in performance with emphasis on repertoire, technical skills, style, and interpretation. Total credit limited to 6 units. Specific areas of study are listed in the Class Schedule.

MU 253. Advanced Class Piano. 1 unit

Term Typically Offered: TBD

Prerequisite: MU 153 or consent of instructor; for non-music majors.

Advanced level piano techniques with emphasis on style, interpretation, sightreading, basic performance practices and the solution to general musical problems. Total credit limited to 3 units. 1 activity.

MU 259. Beginning Jazz Improvisation. 2 units

Term Typically Offered: TBD

Prerequisite: Facility on a musical instrument or singing ability; MU 101 or consent of instructor.

Development of fundamentals of jazz improvisation including scales, arpeggios, patterns, swing feel, expressiveness, and motifs through in-class performance of written materials and improvisations with play-along recordings. Total credit limited to 6 units. 2 activities.

MU 261. Piano Skills IV. 1 unit

Term Typically Offered: F

Prerequisite: MU 163 or consent of instructor.

Continuation of MU 163. Preparation for Piano Proficiency Examination. Study of piano repertoire, sightreading, transposition, harmonization of a melody, accompanying, and improvisation of a melody, score-reading. 1 activity.

MU 262. Piano Skills V. 1 unit

Term Typically Offered: W

Prerequisite: MU 261 or consent of instructor.

Continuation of MU 261. Preparation for Piano Proficiency Examination. Study of piano repertoire, sightreading, transposition, harmonization of a melody, accompanying, improvisation of a melody, score-reading. 1 activity.

MU 263. Piano Skills VI. 1 unit

Term Typically Offered: SP

Prerequisite: MU 262 or consent of instructor.

Continuation of MU 262. Completion of this course with a C- or better represents fulfillment of the Piano Proficiency Examination. Study of piano repertoire, sightreading, transposition, harmonization of a melody, accompanying, improvisation of a melody, score-reading. 1 activity.

MU 265. Accelerated Piano Skills. 1 unit

Term Typically Offered: W

Prerequisite: Consent of instructor.

Preparation for Piano Proficiency Examination. For students with an extensive piano repertoire background but needing focused preparation in sightreading, transposition, harmonization of a melody, accompanying, and score reading. Total credit limited to 3 units. 1 activity.

MU 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

MU 301. Counterpoint. 4 units

Term Typically Offered: SP

Prerequisite: MU 105.

Counterpoint as a compositional technique. Modal, tonal, and post-tonal practices. Composition project. 4 lectures.

MU 303. Music Theory III: Advanced Chromaticism. 4 units

Term Typically Offered: F

Prerequisite: MU 105 with a grade of C- or better, or consent of instructor.

Compositional procedures employed by composers of the Classical and Romantic periods. Chromatic third-related harmony, linear chromaticism, and extended tertian chords. Chromatic and enharmonic modulation to distantly-related keys. Sonata and rondo forms. Composition project. 4 lectures.

MU 305. Music Theory IV: Contemporary Practices. 4 units

Term Typically Offered: SP

Prerequisite: MU 303 or permission of instructor.

Examination of 20th- and 21st-century compositional practices including impressionism, developments in rhythm, polytonality, non-serial atonality, serialism, timbre and form, neoclassicism, minimalism, and the new eclecticism. Analysis and creative projects. 4 lectures.

MU 311. Introduction to Recording, Synthesis, and Production. 4 units

Term Typically Offered: F

Prerequisite: MU 101, MU 120 or consent of instructor.

Fundamental tools of electroacoustic music. Concepts and application of music studio procedure, recording, synthesis, and MIDI. Studio projects. 3 lectures, 1 activity.

MU 312. Advanced Recording, Synthesis, and Production. 4 units

Term Typically Offered: W

Prerequisite: MU 311 or permission of instructor.

Exploring creative and interactive uses of recording and synthesis. Analysis and creative projects. 3 lectures, 1 activity.

MU 320. Music Research and Writing. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); and MU 105 with a grade of C- or better or consent of instructor.

Methodology for researching, analyzing, and writing about music. Exploration of investigative tools including library resources, periodicals, bibliographic tools, computerized search methods. Performance practice. 4 lectures.

MU 324. Music and Society. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Exploration into the role of music historically and culturally. Emphasis on deeper understanding and appreciation of the context of music through topics of special interest. The Class Schedule will list topic selected. Total credit limited to 12 units. 3 lectures, 1 activity. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

MU 325. America's Music. 4 units

Term Typically Offered: SP

USCP

Prerequisite: MU 105. Recommended: MU 120.

Explorations of the many styles of America's music through lectures, readings, sound recordings, musical scores, and performance. Includes "Native American," "folk," "popular," and "fine art" traditions. How American music reflects the different cultural heritages, social contexts, and philosophies of its creators. 4 lectures. Fulfills USCP.

MU 326. Cultural Concepts and Structures in Music. 4 units

Term Typically Offered: TBD

Prerequisite: MU 121 or consent of instructor.

Exploring the definition, concepts, and structures of music in terms of theory, performance practice, and compositional procedures of selected non-Western cultures. 3 lectures, 1 activity.

MU 328. Women in Music. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Survey of women's contributions as composers and performers of western art and popular music; historical overview of the experiences and perception of women as musicians. 3 lectures, 1 activity. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

MU 331. Music of the Middle Ages and Renaissance. 4 units

Term Typically Offered: W

Prerequisite: MU 320 with a grade of C- or higher or consent of instructor. Recommended: MU 120.

Musical literature, styles, composers, theory, genres and notation of the Middle Ages and Renaissance. Relationship to historical trends. 4 lectures.

MU 332. Music of the Baroque and Early Classic Eras. 4 units

Term Typically Offered: SP

Prerequisite: MU 320 with a grade of C- or higher or consent of instructor.

Recommended: MU 120.

Survey of the history of western art music from 1600 to 1780. 4 lectures.

MU 336. Jazz History and Theory. 4 units

Term Typically Offered: TBD

Prerequisite: MU 105.

Survey of Jazz theoretical techniques. Emphasis upon historical context and development of Jazz through study and analysis of scores and historical performances. 4 lectures.

MU 340. Conducting: Fundamentals. 2 units

Term Typically Offered: F

Prerequisite: MU 105 or consent of instructor.

Principles and techniques of conducting with experience in score reading. 2 activities.

MU 341. Conducting: Choral. 2 units

Term Typically Offered: W

Prerequisite: MU 340.

Continuation of MU 340. Emphasis on choral literature. Score reading, rehearsal techniques, and musical details associated with vocal music. 2 activities.

MU 342. Conducting: Instrumental. 2 units

Term Typically Offered: SP

Prerequisite: MU 340.

Continuation of MU 340. Emphasis on band and orchestra literature. Score reading, rehearsal techniques, and musical details associated with instrumental music. 2 activities.

MU 350. Applied Music. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual instruction in performance and composition. Total credit limited to 6 units. Specific areas of study are listed in the Class Schedule.

MU 351. Jazz and Popular Music Arranging. 2 units

Term Typically Offered: TBD

Prerequisite: MU 105.

Arranging for small and large jazz ensembles. Score and part preparation. 2 activities.

MU 352. Orchestration. 4 units

Term Typically Offered: TBD

Prerequisite: MU 105.

Ranges, transposition, technical capabilities, and scoring of vocal ensembles, band, and orchestra instruments. Creative project. 3 lectures, 1 activity.

MU 360. Music for Classroom Teachers. 4 units

Term Typically Offered: TBD

Prerequisite: MU 101.

Development of skills for fostering creative music experiences in the classroom. Exploration of various approaches to motivating children musically. Study of folk songs for singing, playing instruments, and learning about music as well as for their ethnic and cultural significance. 3 lectures, 1 activity.

MU 361. Instruments. 1 unit

Term Typically Offered: TBD

Prerequisite: Junior standing and consent of instructor.

Fundamentals of playing and teaching woodwind, brass, string, and percussion instruments. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 activity.

MU 368. Piano Accompanying. 1 unit

Term Typically Offered: TBD

Prerequisite: Junior standing and MU 168 or consent of instructor.

Preparation and performance of vocal and instrumental music written with piano accompaniment. Choral rehearsal accompanist techniques. Open to students who are proficient on piano at a collegiate level. Total credit limited to 6 units. 1 activity.

MU 370. University Jazz Band. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Rehearsal and public performance of jazz big band repertoire. Open to qualified students who sing or play trumpet, trombone, saxophone, piano, guitar, vibes, bass, drums, or congas. Total credit limited to 6 units. 1 laboratory.

MU 371. Instrumental Ensemble. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Faculty-supervised small ensembles (e.g., string quartets, brass quintets), as permitted by departmental staffing. Performances take place in student recitals, large-ensemble concerts, and/or other university events. Open to students concurrently participating in large ensembles. Interested students should contact instrumental ensemble directors. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 activity.

MU 372. Wind Orchestra. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Study and public performance of music written for large wind band. Open to all qualified students who perform on woodwind, brass and percussion instruments. The Class Schedule will list topic selected. Total credit limited to 6 units. 1 laboratory.

MU 373. Wind Ensemble. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Study and public performance of music written for wind band with limited doubling and flexible instrumentation. Open to all students who perform on woodwind, brass and percussion instruments on an advanced collegiate level. Total credit limited to 6 units. 1 laboratory.

MU 374. Symphony Orchestra. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor, based on audition.

Preparation and performance of orchestral music, including both standard repertoire and current works in various genres. Open to all qualified students who perform on string, woodwind, brass, and percussion instruments. Field trip required. Total credit limited to 6 units. 1 laboratory.

MU 376. Mustang Band. 1 unit

Term Typically Offered: F, W

Prerequisite: Junior standing and consent of instructor.

Public performance of music and specially-designed shows written for marching band (woodwinds, brass, percussion, and flag team auxiliary). Limited to those students who have had marching experience with wind and percussion instruments, or flag, rifle or dance lines. Total credit limited to 6 units. 1 laboratory.

MU 377. Chamber Winds. 1 unit

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Study and public performance of chamber music written for woodwinds, brass, or percussion. Open to all instrumentalists who have college level performance experience. Total credit limited to 6 units. 1 activity.

MU 378. Field Show Marching Skills. 1 unit

Term Typically Offered: F

Prerequisite: MU 178 or consent of instructor.

Study and application of advanced field show marching techniques used in performance by the Cal Poly Mustang Band and other university bands. Limited to those students who have experience performing on a wind/percussion instrument, or in a marching band flag/dance team auxiliary. Total credit limited to 6 units. 1 activity.

MU 381. PolyPhonics. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Advanced study and public performance of music for mixed chorus. Total credit limited to 6 units. 1 laboratory.

MU 382. Cantabile. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Advanced study and public performance of music for soprano and alto chorus. A variety of styles of choral literature specifically intended for treble voices from various time periods is explored. Total credit limited to 6 units. 1 activity.

MU 383. Vocal Ensemble. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Open to qualified singers. Rehearsal and performance of specialized vocal music. Total credit limited to 6 units. 1 activity.

MU 385. University Singers. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Study and public performance of music for large mixed chorus. Total credit limited to 6 units. 1 laboratory.

MU 386. Chamber Choir. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of instructor.

Advanced study and public performance of music for small ensemble. This ensemble focuses on music of the Renaissance, Baroque and Modern Eras. A variety of styles of choral literature, specifically intended for a small performing ensemble, is explored. Total credit limited to 6 units. 1 laboratory.

MU 388. Arab Music Ensemble. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: MU 188 or consent of instructor.

Rehearsal and performance of instrumental and vocal repertoire drawn from art and popular music of wide-ranging Arabic-speaking societies and historically related cultures. Accompanying music theories, instrumental techniques, and performance practices, with presentation of seminal works in public concerts. Total credit limited to 6 units. 1 laboratory.

MU 389. Vocal Practicum. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: MU 150, MU 250, MU 350 or MU 450, or consent of instructor.

Study and implementation of performing techniques used by vocalists in a recital or concert setting. Total credit limited to 6 units. 1 activity.

MU 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

MU 411. Sonic Interactions with Technology. 4 units

Term Typically Offered: SP

Prerequisite: MU 312.

Performative and compositional applications of synthesis and recording techniques. Creative projects. 3 lectures, 1 activity.

MU 412. Sculpting Experience with Sound. 4 units

Term Typically Offered: TBD

Prerequisite: MU 312.

Production of electroacoustic music in media. Program analysis, technical planning, composition, and product development. 3 lectures, 1 activity.

MU 431. Music of the Classic and Romantic Eras. 4 units

Term Typically Offered: F

Prerequisite: MU 303; and MU 320 with a grade of C- or higher or consent of instructor. Recommended: MU 120.

Survey of the history of western art music from 1780 to 1900. 4 lectures.

MU 432. Music of the Modern Era. 4 units

Term Typically Offered: W

Prerequisite: MU 303; and one of the following courses with a grade of C- or better: MU 331, MU 332, or MU 431, or consent of instructor.

Recommended: MU 305.

Composers, important works, and significant trends in the Western European and American classical tradition during the 20th and 21st Centuries. 4 lectures.

MU 450. Applied Music. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual instruction in performance and composition. Total credit limited to 6 units. Specific areas of study are listed in the Class Schedule.

MU 461. Senior Project. 3 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing and consent of department head.

Selection and completion of a project under faculty supervision. Minimum of 90 hours total time. Results presented in a recital, creative work, formal report, or a combination of all three.

MU 465. Choral Literature and Rehearsal Techniques. 4 units

Term Typically Offered: TBD

Prerequisite: MU 341, or consent of instructor.

Survey of choral literature especially suited for secondary schools. Philosophy and strategy for developing a school program. Musical as well as non-musical techniques for effective rehearsal. 3 lectures, 1 activity.

MU 466. Instrumental Literature and Rehearsal Techniques. 4 units

Term Typically Offered: TBD

Prerequisite: MU 101 or MU 103; and MU 172 or MU 173 or MU 174.

Survey of instrumental literature written for orchestras, bands, solo instrument, and chamber ensembles. Philosophy and strategy necessary for developing a professional, semi-professional, or school instrumental music program. Musical as well as non-musical techniques for effective rehearsal. 3 lectures, 1 activity.

MU 470. Music History: Selected Advanced Topics. 4 units

Term Typically Offered: TBD

Prerequisite: MU 331, MU 332, MU 431, MU 432, or consent of instructor.

Intensive study of selected topics in music history through the use of readings, recordings, scores, and class presentations. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 activity.

Natural Resources (NR)

undefined

NR Courses

NR 140. Careers in Natural Resources Management and Environmental Sciences. 1 unit

Term Typically Offered: F

Analysis and development of career goals in natural resources and environmental sciences. Acquainting students with potential career options and preparation of academic plans for the majors in the Natural Resources Management and Environmental Sciences Department. 1 activity.

NR 141. Introduction to Forest Ecosystem Management. 3 units

Term Typically Offered: F

Sustainability Focused

Fundamentals of forestry including basic silviculture, forest protection, measurement and policy. Integrated resource management of forest lands for water production, forage, recreation, wildlife, and timber. 3 lectures.

NR 142. Environmental Management. 3 units

Term Typically Offered: F, W

Sustainability Focused

Recommended: NR 140.

Environmental management as a process within functioning societies seeking a harmonious balance between human activities and intrinsic behavior of the natural environment. Major components of the natural environment and the political and social activities that impact that environment. 3 lectures.

NR 200. Special Problems for Undergraduates. 1-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Credit/No Credit grading only. Total credit limited to 12 units. Formerly ERSC/SS 200.

NR 203. Resource Law Enforcement. 3 units

Term Typically Offered: W

Law enforcement applied to natural resource conservation on public and private lands. Examination of state and federal laws related to fish and wildlife management. Problems associated with implementation of resource laws examined. 3 lectures. Crosslisted as NR/RPTA 203.

NR 204. Wildland Fire Control. 3 units

Term Typically Offered: SP

Fire control techniques used on various wildland fuels. Elementary fire physics, fuels, weather, fire behavior, tactics and fire suppression techniques, line construction, "mop-up", fire line safety, air operations and fire organization. Meets basic wildland fire fighter certification requirements for the USDA Forest Service. Partially meets California Department of Forestry Firefighter I requirements. 2 lectures, 1 laboratory.

NR 208. Dendrology. 4 units

Term Typically Offered: F, W, SP

Recommended: BOT 121.

Identification, classification, silvical characteristics, distribution, environmental requirements and economic importance of woody plants in shrub, woodland, and forest ecosystems of the United States. Emphasis on species located in the Pacific Coastal, Sierran, and Cascade ecosystems. 2 lectures, 2 laboratories.

NR 215. Land and Resource Measurements. 1 unit

Term Typically Offered: F, W, SP

Introduction to land and resource measurement technology and methods - field instruments, property description, map and photograph reconciliation, data accuracy and precision. Trigonometric functions as applied to natural resources applications. Field trips required. 1 laboratory.

NR 218. Introduction to Geographic Information Systems (GIS). 3 units

Term Typically Offered: F, W, SP

Learn the fundamental concepts and functions of Geographic Information Systems (GIS) using ArcGIS platform. Create, manage, analyze, and display geographically referenced data. Explore how GIS is applied to analyze environmental, social, and natural resource issues. 1 lecture, 2 laboratories. Crosslisted as LA/NR 218.

NR 247. Forest Surveying. 2 units

Term Typically Offered: TBD

Prerequisite: NR 215.

Use and care of tapes, staff compass, abney levels, total stations, and GPS receivers. Keeping field notes, measurements by tape. Closed and open traverse by compass and total stations. Turning angles and determining directions of lines. Map reading and public land description. GPS measurements. Weekend field trips required. 1 lecture, 1 laboratory. Crosslisted as BRAE/NR 247.

NR 260. Forest Operations. 4 units

Term Typically Offered: SP

Recommended: NR 141 and NR 215.

Relationships between forest ecosystem management, forest practices, harvesting methods, timber harvest planning, components of forest harvesting, harvesting effects; cost analysis of harvesting methods; safety management; value-added forest utilization; environmental protection; and road location. Overnight or weekend field trips required. 3 lectures, 1 laboratory.

NR 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

NR 290. Intercollegiate Forestry Activities. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Enrollment limited to those qualified to compete in intercollegiate forestry activities and consent of instructor.

Beginning through advanced skills in the event areas of college forestry activities. Instruction in use of specialized equipment and safety. Minimum of 4 hours of laboratory per week. Total credit limited to 18 units. Credit/No Credit grading only.

NR 304. Agroecology. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and STAT 217 or STAT 218.

Ecological concepts and principles applied to the design and management of agricultural systems. Discussion of research in agroecology and assessment of cropping system sustainability. Laboratory section emphasizes field assessment of ecological structures and functions, experimental design and data interpretation. 3 lectures. 1 laboratory. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

NR 305. Forest Ecology and Silvics. 4 units

Term Typically Offered: F, SP

Sustainability Focused

Prerequisite: Completion of GE Area B2; and completion of GE Area B3 (GE Area B4 for students on the 2019-20 or earlier catalogs).

Examination of major forest types and the processes that determine their development and productivity across the earth (silvics). Integration of ecosystem ecology, plant physiology, and soil science to develop understanding of forest response to disturbance. Field trip required. 3 lectures, 1 laboratory.

NR 306. Natural Resource Ecology and Habitat Management. 4 units

Term Typically Offered: F, W

Sustainability Related

Prerequisite: Completion of GE Area B2; and completion of GE Area B3 (GE Area B4 for students on the 2019-20 or earlier catalogs).

Resource ecology and management implications in the major ecosystems of North America. Importance of maintaining the natural dynamics of energy flow and nutrient cycles at the community and ecosystem level to sustain uses and values. Humanity's role as a principal factor of change of the resources in natural systems. 3 lectures, 1 laboratory.

NR 307. Fire Ecology. 3 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area B2; and completion of GE Area B3 (GE Area B4 for students on the 2019-20 or earlier catalogs).

Effects of wildland fires on shrub, woodland, and forest environments to include fuels, plants, soil, water, wildlife, and air. Emphasis on western U.S. forest and shrub ecosystems. 2 lectures, 1 laboratory.

NR 308. Fire and Society. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Prehistorical and historical record of human use of and attitude toward fire. Mythology and religion of fire. Traditional, cultural and ethnic variations and their influence on modern U.S. institutions involved in managing fire. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as ES/NR 308. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

NR 310. Global Climate Change. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Examination and assessment of the physical and biological mechanisms that maintain current global climate regimes and the broad natural resource, political, and social conflict associated with a changing climate system. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

NR 312. Technology of Wildland Fire Management. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Related

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Historic, current and future perspectives of wildland fire in California. Sustainability and ecosystem health. The use of models and technology to solve complex land management problems. Assumptions and limitations of fire behavior and suppression models. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

NR 314. Environmental Life-Cycle Analysis. 4 units

Term Typically Offered: SP

Prerequisite: BIO 263, NR 304, NR 305, or NR 306.

Estimation and assessment of environmental impacts of human activity and product development using life-cycle analysis methodology; organization and presentation of modeling results. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory.

NR 315. Forest Mensuration. 4 units

Term Typically Offered: W, SP

Prerequisite: BRAE 237 or BRAE 239; NR 215; and STAT 217 or STAT 218.

Recommended: MATH 161 or MATH 221.

Principles and methods of sampling and measurement for forest and natural resource quantities and qualities. Modeling and estimation for tree volumes, stand structure and composition, and related forest vegetation. Applications in sampling, statistical and inventory techniques. Field trip required. 2 lectures, 2 laboratories.

NR 317. The World of Spatial Data and Geographic Information Technology. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Foundation for understanding the world through geographic information as well as the tools available to utilize spatial data. Experience with Geographic Information Systems (GIS) and related technology. Not open to students with credit in GEOG 218 or LA/NR 218. 3 lectures, 1 activity. Crosslisted as LA/NR 317. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

NR 320. Watershed Processes and Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: NR/LA 218 and SS 120. Recommended: NR 304, NR 305, or NR 306.

Introduction, analysis, and measurement of watershed processes of precipitation, evapotranspiration, streamflow, stream channels, erosion, and riparian functions. Watershed management toward aquatic habitat and water quality goals. Weekend field trip required. 3 lectures, 1 laboratory.

NR 321. Water Resources Technology and Society. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Study of technologies for sustainable management of water resources. Focus on monitoring of drinking water supply and quality, groundwater wells, surface water storage and conveyance systems, industrial, and oil/gas water use and management, and stresses due to climate change. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

NR 323. Human Dimensions in Natural Resources Management. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1.

Social, economic, political and ecological conditions and institutions that influence decisions affecting the environment; examination of human-caused environmental impacts and how they in turn influence social institutions. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

NR 324. Social Dimensions of Sustainable Food and Fiber Systems. 4 units

Term Typically Offered: W
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Historical, political, socio-economic, and cultural dimensions of sustainable food and fiber systems. Overview of frameworks used for understanding agro-ecological sustainability with an emphasis on human elements. Exploration of core sustainability concepts, practices, and goals through case studies. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

NR 326. Natural Resources Economics and Valuation. 4 units

Term Typically Offered: F, W, SP
 Sustainability Focused

Prerequisite: MATH 161 or MATH 221 or equivalent. Recommended: GE Area D2 (ECON 201 recommended), AGB 212.

Theory of efficient use of renewable and nonrenewable natural resources, including methods for attaching value to marketable and non-market natural resources. Environmental economic theories and techniques to address allocation of water, timber, wildlife/fisheries, open space, and recreation. 4 lectures.

NR 328. Environmental Leadership and Community Engagement. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5
 Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); one lower-division course in GE Area D; and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Theories and practices of leadership and community engagement for a wide range of environmental issues. Development of personal leadership skills and methods for effectively working with non-profit organizations, governmental agencies, community groups, and the private sector to advance sustainability principles. 4 lectures. Crosslisted as NR/RPTA 328. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

NR 335. Conflict Management in Natural Resources. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: NR 141 or NR 142. Recommended: PSY 201 or PSY 202.

Application of behavioral science principles and techniques in the management of natural resource systems. Management of internal and external human resource issues and concerns in natural resources organizations is emphasized. 3 lectures, 1 laboratory.

NR 339. Internship in Forest and Natural Resources. 1-12 units

Term Typically Offered: F,W,SP,SU
 CR/NC
 Prerequisite: Consent of instructor.

Selected students will spend up to 12 weeks with an approved firm or agency engaged in forest or natural resources management. Applying and developing managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Credit/No Credit grading.

NR 340. Wildland Fire Management. 3 units

Term Typically Offered: F
 Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: NR 204.

Wildland fuels, fire weather, and fire danger ratings in chaparral, grassland, and forested areas. Advanced modeling of surface and crown fire behavior. Fire management strategies and implications, policies and objectives of fire management organizations. Saturday field trips may be required. 3 lectures.

NR 349. Water for a Sustainable Society. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later: Upper-Div GE Area D
 2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Historical, political, economic, socio-technical, and cultural dimensions of water sustainability. Overview of complex systems with an emphasis on individual choices and their impact on water sustainability. Exploration of core sustainability concepts; practices, barriers and goals related to water resources. Course offered online only. 4 lectures. Crosslisted BRAE/NR 349. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

NR 350. Urban Forestry. 3 units

Term Typically Offered: F
 Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: NR 208.

Establishment and management of municipal forests, wildland-urban interface, wildlife habitat, and pollution abatement. Management of forest areas requiring special attention because of heavy recreational use, fire hazard, watershed, and societal values. Full-day field trips may be required. 2 lectures, 1 laboratory.

NR 351. Introduction to Emergency Management in California. 3 units

Term Typically Offered: TBD
 Prerequisite: Completion of GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs) or GE Area D.

Emergency management emphasizing the Standardized Emergency Management System (SEMS) and Emergency Operations Center (EOC) operations. Earthquake hazard used as the case to explore potential wide geographic impacts, multiple secondary hazards, and multidisciplinary problem-solving methods in natural disasters faced by local governments and communities. 2 lectures, 1 activity. Crosslisted as CRP/NR 351.

NR 355. Drone Assisted Surveying. 4 units

Term Typically Offered: SP

Prerequisite: BRAE 237 or BRAE 239.

Integration of remote sensing, surveying, natural resource management, applied drone technology. Understanding laws, regulations, measurement concepts, and big data. Field applications using Unmanned Aerial Systems and Global Navigation Satellite Systems. Creation of maps and supporting documents for use in GIS. 2 lectures, 2 laboratories. Crosslisted as BRAE/NR 355.

NR 360. Ethnicity and the Land. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C. Recommended: Lower-division Ethnic Studies (ES) course and introductory natural resources course.

Comparative study of how race and culture shape landscapes, and how social hierarchies allocate the use of natural resources and the burdens of environmental pollution. 4 lectures. Crosslisted as ES/NR 360. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

NR 363. Undergraduate Seminar. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Introduction to professional practices, including preparation of professional materials and interview skills. Review of current published research and library researching techniques in environmental science and management. Development of presentation skills. Course may be offered in classroom-based or online format. 2 seminars.

NR 365. Silviculture and Fuels Management. 4 units

Term Typically Offered: F, SP

Sustainability Focused

Prerequisite: NR 208 and NR 315. Corequisite: NR 260; and NR 304, NR 305, or NR 306.

Applied forest ecology focusing on development of prescriptions for achieving diverse forest ecosystem management objectives. Topics include natural stand dynamics, silvicultural systems, hazardous fuels reduction, forest health assessments/diagnoses, emulating natural disturbances, and managing ecosystem services. Overnight and/or weekend field trips required. 2 lectures, 2 laboratories.

NR 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 12 units.

NR 401. Disaster Recovery. 3 units

Term Typically Offered: TBD

Prerequisite: CRP/NR 351.

Strategies and procedures for public sector management of recovery from disasters. Understanding the role of, and relationship between, federal, state and local agencies to provide assistance to individuals and communities in the post-disaster environment. Issues in the recovery process. 2 lectures, 1 activity. Crosslisted as CRP/NR 401.

NR 402. Forest Health. 4 units

Term Typically Offered: F, W

Prerequisite: BIO 162, BIO 222, BIO 227, or NR 208; and NR 304, 305, or NR 306; and junior standing.

Impact and losses to forested areas caused by physical and biotic agents (such as insects and diseases) other than fire; relation of direct and indirect control practices to forest management. Saturday field trips required. 3 lectures, 1 laboratory.

NR 404. Environmental Law. 4 units

Term Typically Offered: F, W, SP

Sustainability Related

Prerequisite: Junior standing.

Detailed examination of the law governing use and protection of natural resources with focus on the legal institutions entrusted with the public duty of protecting the environment. 4 lectures. Crosslisted as CRP/NR 404.

NR 406. Indigenous Peoples and International Law and Policy. 4 units

Term Typically Offered: SP

Prerequisite: ES 253; and NR 141 or NR 142; and junior standing required.

Interdisciplinary examination of the evolution of international law effecting indigenous peoples in the U.S. and in the Americas. Development of international legal and sociological norms and their impact on human rights of indigenous peoples with particular attention to environmental issues. 4 lectures. Crosslisted as ES/NR 406.

NR 408. Water Resource Law and Policy. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing.

Detailed examination of the various legal systems of water use, regulation and management in California and the United States. Discussion on the key concepts and principles of state, federal and interstate water quantity and quality control; focusing on issues and problems, why conflicts occur and how solutions evolve. 4 lectures. Crosslisted as CRP/NR 408.

NR 412. Senior Assessment Project. 3 units

Term Typically Offered: TBD

Prerequisite: NR 326 and completion of GE Area A3 with grades of C- or better.

Principles and practices of integrated sampling and inventory of natural resource values in terrestrial ecosystems, culminating in a student project report. 2 lectures, 1 laboratory.

NR 413. Agricultural Law. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: Junior standing.

Analysis of agricultural law and policy including the business of agriculture, agricultural legislation, and coverage of contemporary agricultural issues such as water, food safety, and labor. Examination of statutory, judicial, policy and administrative areas in agriculture. 4 lectures.

NR 414. Sustainable Forest Management. 4 units

Term Typically Offered: W

Prerequisite: NR 326, NR 365.

Biophysical, economic, social and political influences on optimal forest management for purposes of providing sustained yields of goods and services. Growth and yield modeling; forest investment analysis; sustainable forest production; harvest schedule modeling. Day field trip required. 3 lectures, 1 laboratory.

NR 416. Environmental Impact Analysis and Management. 4 units

Term Typically Offered: F, W, SP

Sustainability Related

Prerequisite: one of the following: BIO 263, NR 304, NR 305, NR 306, or SS 221.

National Environmental Policy and California Environmental Quality Acts as applied to environmental and natural resource management problems and projects. Intent, purpose and history of the laws; differences between laws identified. Request for proposals and preparation of environmental assessment documents covered. 3 lectures, 1 laboratory.

NR 418. Applied GIS. 3 units

Term Typically Offered: F, W, SP

Prerequisite: LA/NR 218 or GEOG 318.

Acquisition, organization and analysis of spatial data from diverse sources using Geographic Information System (GIS) software. GIS modeling applications and validation techniques used in development and preparation of client-driven projects. 1 lecture, 2 activities.

NR 420. Watershed Assessment and Protection. 4 units

Term Typically Offered: W

Prerequisite: NR 320; or graduate standing.

Analysis of streamflow, peak flows, and land management effects using established techniques and hydrologic models. Fluvial processes, sediment transport, and channel restoration techniques. Assessment and restoration of watersheds toward protection of aquatic and public resources. Field trip may be required. 3 lectures, 1 laboratory.

NR 421. Wetlands. 4 units

Term Typically Offered: TBD

Prerequisite: BOT 121 or BIO 162; CHEM 127; and SS 120 or SS 130.

Recommended: one of the following: BIO 327, BOT 313, BOT 326, MSC1 300, NR 304, NR 305, or NR 306.

The formation, characteristics, and functions of wetlands. Genesis of hydric soils. Plant adaptations to saturated soils. Wetlands as wildlife habitat. Policies and social issues associated with wetlands. The procedures of wetland delineations. 3 lectures, 1 laboratory. Crosslisted as BIO/NR/SS 421.

NR 422. Stream Measurements and Water Quality Monitoring. 1 unit

Term Typically Offered: SP

Sustainability Related

Prerequisite: Junior standing or consent of instructor.

Field measurement of streamflow, water quality, and water resources to support environmental evaluations of local water resources. Application of quality assurance procedures for monitoring water resources. Field trip required. Total credit limited to 2 units. 1 laboratory.

NR 425. Applied Resource Analysis and Assessment. 4 units

Term Typically Offered: F, W, SP

Sustainability Related

Prerequisite: NR 363 and NR 416.

Environmental impacts in responses to resource management, projects, programs and activities. Preparation, implementation, and coordination of environmental plans. Criteria for measurements, interpretation, and evaluation. Resource inventories, analysis, evaluation, synthesis, environmental assessment writing and preparation. 3 lectures, 1 laboratory.

NR 434. Wood Properties, Products and Sustainable Uses. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Principles of wood properties, green building practices, sustainable and efficient use of renewable wood resources including methods for using wood as an energy source. Field trips required. 3 lectures, 1 laboratory.

NR 435. Environmental Policy Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: NR 326. Recommended: NR 335.

Policy process approach to understanding the efforts to resolve natural resource problems in the public and private sector. Principles and techniques used to analyze the effects of environmental policies. Analysis of major federal and state environmental laws. 4 lectures.

NR 445. Systems Thinking in Environmental Management. 4 units

Term Typically Offered: TBD

Sustainability Focused

Prerequisite: One of the following: BIO 263, NR 304, NR 305, NR 306, or SS 321. Recommended: MATH 161.

Analysis of environmental challenges by incorporating systems thinking and system dynamics simulations with quantitative models; interpretation of modeling results and their social and political implications. 4 lectures.

NR 455. Wildland-Urban Fire Protection. 4 units

Term Typically Offered: W

Prerequisite: Junior standing. Recommended: NR 340.

Biophysical and socioeconomic issues affecting wildland fire management in urbanized landscapes. Fire risk assessment. Pre-fire prevention, mitigation, and preparedness, during-fire response, and post-fire recovery actions by public- and private-sector agencies and residents. 3 lectures, 1 laboratory.

NR 465. Senior Project - Ecosystem Management. 4 units

Term Typically Offered: W, SP

Sustainability Focused

Prerequisite: NR 326 and NR 416.

Capstone course integrating biophysical, economic and socio-political sciences. Principles, concepts and techniques designed to utilize resources while sustaining ecosystem health within acceptable limits of change. Ecosystem assessment, planning, management and monitoring project. Satisfies the senior project requirement. 3 lectures, 1 activity.

NR 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

NR 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Junior standing.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

NR 472. Leadership Practice. 1 unit

Term Typically Offered: F, W

Prerequisite: Junior standing.

Tasks associated with development of personal leadership skills. Study and practice in setting goals and objectives; developing, evaluating and implementing a project independently and as part of a team; decision making and problem-solving emphasized. Total credit limited to 4 units. 1 laboratory. Crosslisted as NR/RPTA 472.

NR 474. Forest Stewardship Practices. 8 units

Term Typically Offered: SU

Sustainability Focused

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); and junior standing. Concurrent: NR 475.

Sustainable forest management, ecosystem sampling and inventory methods, photo interpretation, hydrologic resources, road condition, project impact analysis, and best management practices related to forest stewardship. Guest lecturers from industry, agencies and universities share their perspectives on forest stewardship practices. Field trip required. 5 lectures. 3 activities.

NR 475. Senior Project - Forest Stewardship. 4 units

Term Typically Offered: SU

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); and junior standing. Concurrent: NR 474.

Sustainable forest practices and regulatory compliance issues related to Timber Harvest Plans (THP). Development of THP for specified project sites. Collection, assessment, interpretation of data culminating in production of a THP acceptable for interagency review. Satisfies senior project requirement. Field trip required. 3 lectures, 1 activity.

NR 476. Senior Project - Advanced Internship Experience in Environmental Science/Management. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and ERSC 363 or NR 306 or NR 326.

Independent internship experience conducted under faculty supervision focusing on a discipline area of environmental science/management. Completion of a project as a component of their internship. Satisfies the senior project requirement. Minimum 90 hours required. Crosslisted as ERSC/NR 476.

NR 477. Senior Project - Research Experience in Environmental Science. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and ERSC 363 or NR 306 or NR 326.

Guided research experience in a specific area of environmental science. Implementation of materials and methods. Collection, analysis and interpretation of data. Completion of formal written report. Satisfies senior project requirement. 1 lecture, 2 laboratories. Crosslisted as ERSC/NR 477.

NR 478. Senior Project - Current Topics in Environmental Science/Management. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; and ERSC 363 or NR 306 or NR 326.

Critical evaluation and formal presentation of current issues in environmental science/management. Evaluation of current topics, analysis of supporting evidence, and synthesis and presentation of resulting perspectives on different approaches to current challenges in environmental science/management. Satisfies the senior project requirement. 3 lectures. Crosslisted as ERSC/NR 478.

NR 479. Senior Project - Independent Study. 3 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; ERSC 363 or NR 306 or NR 326; and consent of instructor.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 90 hours total time. Crosslisted as ERSC/NR 479.

NR 532. Applications in Biometrics and Econometrics. 4 units

Term Typically Offered: TBD

Prerequisite: One course in undergraduate statistics, graduate standing, or consent of instructor.

Parametric and semi-parametric statistical methods in modeling biological and economic phenomena. Biometric modeling of stand growth and inventory. Econometric modeling of market and environmental values. 3 lectures, 1 laboratory.

NR 534. Environmental Modeling. 3 units

Term Typically Offered: TBD

Prerequisite: One course in statistics or graduate standing.

Methods and modeling approaches used in quantifying ecological and environmental processes and conditions, such as fire behavior, wildland hydrology, terrestrial and aquatic habitat condition, using GIS and other models. 2 lectures, 1 laboratory.

NR 539. Graduate Internship in Forest Resources. 1-9 units

Term Typically Offered: TBD

Prerequisite: Consent of internship instructor.

Application of theory to the solution of problems of forest resources or related businesses in the field. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units.

NR 570. Selected Topics in Forest Resources. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

NR 571. Selected Topics Forest Resources Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 laboratories.

NR 575. Applications in Advanced Watershed Hydrology. 2 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor. Recommended: NR 420.

Techniques and applications in watershed hydrology to real-world projects. Projects could include water quality or quantity assessments, water quality or channel morphology monitoring, and structural and non-structural enhancements for channel and upland watersheds, culminating in a final report and presentation. 2 laboratories.

Philosophy (PHIL)

undefined

PHIL Courses

PHIL 101. Introduction to Philosophy. 4 units

Term Typically Offered: F

Prerequisite: Philosophy majors only.

Foundational methods and central issues in contemporary philosophy including logic, epistemology, metaphysics and ethics. Advising and orientation to the Philosophy major for freshmen in their first quarter at Cal Poly. 4 lectures.

PHIL 126. Logic and Argumentative Writing. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area A3

2019-20 or earlier catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs).

Principles of argument analysis, evaluation and construction. Deductive and inductive reasoning, including analogical arguments, universal and statistical generalizations, and causal inferences. Principles of organizing and writing argumentative essays. Moral dimensions of rational discourse. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A3 with a grade of C- or better.

PHIL 230. Philosophical Classics: Knowledge and Reality. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Critical examination of primary philosophical works with focus on the nature of reality and the sources and limits of human knowledge. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS/PHIL 230. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

PHIL 231. Philosophical Classics: Ethics and Political Philosophy. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better.

Critical examination of primary philosophical works, with focus on the identification and evaluation of the central ethical, social and political themes and arguments presented in them. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS/PHIL 231. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

PHIL 241. Symbolic Logic. 4 units

Term Typically Offered: F, SP

Prerequisite: Completion of GE Area A3 with a grade of C- or better.

The nature of deductive logical systems. Methods of notation, translation and proof in sentential and predicate calculi including truth-trees and natural deduction systems. Introduction to meta-theory. 4 lectures.

PHIL 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

PHIL 300. Philosophical Writing and Research. 4 units

Term Typically Offered: F, SP

Prerequisite: PHIL 230 or PHIL 231; and Philosophy major.

Develop writing and research skills by composing a substantial research paper on a specific topic. Revisions based on instructor and peer feedback. Oral presentation of research project. The Class Schedule will list topic selected. 4 lectures.

PHIL 301. Philosophical Topics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Examination and analysis of philosophical areas, movements, texts, or figures. Topics may be of historical or contemporary importance. The Class Schedule will list topic selected. Total credit limited to 16 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 309. Early Greek Philosophy through Plato. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Beginnings of Western philosophy and science in Ancient Greece. The Presocratics, Socrates, and Plato. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 310. Aristotle and Hellenistic Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Development of Western philosophy and science in the Hellenistic and Roman periods. Aristotle, Epicureanism, Stoicism, Skepticism. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 312. Medieval Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Development of Western philosophy from Augustine to Ockham, including Anselm, Abelard, Roger Bacon, Bonaventure, Aquinas, and Duns Scotus. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 313. Early Modern Rationalism. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Development of Western philosophy from the late Renaissance through Leibniz, with special emphasis upon the epistemology and metaphysics of the Continental Rationalists. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 314. Early Modern Empiricism. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Development of Western philosophy from the Renaissance through Mill, with special emphasis on British Empiricism. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 315. Kant and 19th Century European Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Primary issues and concepts found in German philosophy from 1780 to 1900, with emphasis on Kant, Hegel, and Nietzsche. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 317. History of Analytic Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Major developments within 20th century British and American philosophy, with focus chiefly around Analytic philosophy. Other schools, such as Pragmatism, may be included, as may some philosophers outside of Britain and America whose work was influential in those countries. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 318. Phenomenology. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Methods and uses of phenomenological analysis through study of 20th century philosophers and contemporary applications. Topics include phenomenological method, perception, meaning, and the role of experience in philosophical inquiry. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 319. Existentialism. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Major existentialist philosophers of the 19th and 20th century such as Kierkegaard, Nietzsche, Heidegger, Sartre, de Beauvoir, Merleau-Ponty, and Marcel. Existentialist themes in historical or contemporary context. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 321. Philosophy of Science. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

The rational foundations of inquiry and explanation in the physical, biological and social sciences. Justification of scientific claims, the difference between science and pseudoscience, the relationship between science and other fields of investigation. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 322. Philosophy of Technology. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Analyses of the philosophical foundations and implications of technology. Technology and the human condition, technology and philosophical ethics, technology and political philosophy, technology and the metaphysics of human nature, and the relationship between science and technology. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 323. Ethics, Science and Technology. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Ethical decision-making as applied to issues such as the use of robots, the treatment of animals, sustainability, scientific fraud, feminist analysis of science and technology, as well as questions about whether technology is just a value-neutral tool or, rather, embodies certain values. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS 325/PHIL 323. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 327. Robot Ethics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Introduction, short history, and overview of robot (meta)ethics, with applied ethics issues to include programming, environment, military uses, sex, legal implications, risk, liability, diversity, sustainability, healthcare, education, religion, and the home. Finally, future issues of robot rights and personhood. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 328. Technologies and Ethics of Warfare. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Ethics of killing in warfare, including requirements of justice in declaring and waging war. Topics include terrorism, remotely piloted aircraft ('drones'), autonomous weapons ('killer robots'), cyber warfare, nuclear war, city bombing, and humanitarian intervention. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 331. Ethics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Analyses of various traditional and contemporary positions on the difference between right and wrong, if there is one. Theories of metaethics and normative ethics including the divine command theory, relativism, intuitionism, noncognitivism, virtue ethics, egoism, utilitarianism and duty-based ethics. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 332. History of Ethics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

The history of moral thought from Homer and the Pre-Socratics to the 20th century, and focus on theories of moral goodness and rightness of action. Related issues and areas of thought, e.g. metaphysics, theology, science, politics, psychology freedom/determinism to be considered, where they shed light on moral thought. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 333. Political Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Analyses of the philosophical foundations of political ideologies, including theories of political authority, legitimacy, obligation, and rights, and of the proper function of the state, and the relation of these theories to issues in meta-physics, theory of knowledge, and ethics. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 334. Philosophy of Law. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Normative and analytic questions about law. Nature of law and legal systems. Justification of law. Moral obligation to obey the law. Nature and justification of punishment. Guilt and legal responsibility. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 335. Social Ethics. 4 units

Term Typically Offered: F,W,SP, SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Examination of contemporary moral problems, solutions to these problems, and the arguments for these solutions, with emphasis on two or more of the following sample problem areas: abortion, suicide and euthanasia, capital punishment, family ethics, race relations, social justice, war, women's issues. 4 lectures. Crosslisted as PHIL 335/HNRS 336. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

PHIL 336. Feminist Ethics, Gender, Sexuality and Society. 4 units

Term Typically Offered: F,W,SP, SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Critical examination of the relations between gender, sexuality, ethnicity, society and ethics from feminist perspectives, with special attention paid to problems in contemporary applied ethics. Joint focus on theory and application. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as PHIL/WGQS 336. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 336.

PHIL 337. Business Ethics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Critical examination of ethical problems that arise in business. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 339. Biomedical Ethics. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Critical examination of problems in biomedical ethics, proposed solutions to these problems, and the arguments for such solutions. Emphasis on two or more of the following sample problem areas: concepts of health and disease, human experimentation, informed consent, behavior control, genetic intervention, new birth technologies, euthanasia and physician-assisted dying. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 340. Environmental Ethics. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Sustainability Focused

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and lower-division PHIL course in GE Area C.

Analyses of various positions on the moral status of nonhuman entities and problems such as the treatment of animals, wilderness preservation, population, pollution and global warming. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 341. Professional Ethics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Moral problems as they arise in professions such as law, medicine, engineering, research and education: deception, paternalism, confidentiality, discrimination and others. Consideration of various professional codes of ethics. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 342. Philosophy of Religion. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Inquiry into the rational and nonrational bases of religious claims. Arguments for and against the existence of God. Discussion of miracles, revelation, the definition of God, the problem of evil, the relation of faith and reason, the nature of religious experience, the verification of religious claims. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 343. Power, Alienation, and Political Life. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Analysis of social alienation, political resistance, and the interplay between power and individual life in 20th- and 21st-century Continental philosophy. Emphasis on issues such as structural injustice, cultural membership and exclusion, work, media, and the political impact of technology. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 350. Aesthetics. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Critical examination of philosophical views of art from both a historical and contemporary perspective. Treatment of theories from Plato and Aristotle through those of the twentieth century. Discussion of the problems raised by modern art. The relation between aesthetic values and metaphysics, epistemology, ethics and politics. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 351. Philosophy of Literature. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Analysis of philosophical issues related to literature such as interpretation, authorial intention, linguistic expression, ethical responsibilities of writers and readers, and use of literary styles by philosophers. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 361. Indian Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Philosophies developed in South Asia including the metaphysical, epistemological, and logical presuppositions of the six Hindu schools, the Buddhist and Jain schools, and select theistic traditions. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 362. Chinese and East Asian Philosophy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Philosophies developed in China, Japan and East Asia, including Buddhism, Confucian moral philosophy, Daoist metaphysics and social ecology. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 369. Postmodernism. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Primary issues and developments in European philosophy in the second half of the 20th century. Examination of the influence of postmodern philosophy in areas such as art, literature, architecture, culture studies, philosophy of language, and philosophy of religion. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

PHIL 385. Ethics Bowl. 3 units

Term Typically Offered: F, W

CR/NC

Prerequisite: One of the following: PHIL 231, PHIL 323, PHIL 327, PHIL 328, PHIL 331, PHIL 332, PHIL 333, PHIL 334, PHIL 335, PHIL 336, PHIL 337, PHIL 339, PHIL 340, PHIL 341, or PHIL 439; and completion of GE Area A with grades of C- or better.

Preparation for participation in Intercollegiate Ethics Bowl competitions. Preparation and discussion of current competition cases, development of research and presentation skills, and participation in competition. Field trips required. Total credit limited to 12 units. Credit/No Credit grading only. Course offered in hybrid format with classroom-based and online learning. 2 laboratories and competition time.

PHIL 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

PHIL 411. Metaphysics. 4 units

Term Typically Offered: W, SP

Prerequisite: Junior standing and completion of GE Area C2.

Traditional and current ideas and arguments about substance, the relation of universals to particulars, space and time, events, causation and necessity, the self and free will. 4 lectures.

PHIL 412. Epistemology. 4 units

Term Typically Offered: F, SP

Prerequisite: Junior standing and completion of GE Area C2.

Analysis of the concept of knowledge. Development of competing theories of epistemic justification and truth. Inquiry into relationship between knowledge, belief, justification and truth. Examination of skepticism. 4 lectures.

PHIL 421. Philosophy of Space, Time and Matter. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing and completion of GE Area C2.

Investigation of the philosophical foundations and interpretation of relativity theory and elementary quantum mechanics. Emphasis on philosophical issues relevant to contemporary philosophy of science such as scientific realism. Some discussion of very recent theories of space, time, and matter. 4 lectures.

PHIL 422. Philosophy of Mind. 4 units

Term Typically Offered: F

Prerequisite: Junior standing and completion of GE Area C2.

Classic and current work in the problems and issues of the nature and unity of the self, consciousness, mental representations, and action, and of the relation of philosophy of mind to psychology, linguistics and computer science. 4 lectures.

PHIL 423. Philosophy of Language. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing and completion of GE Area C2.

Traditional and contemporary philosophical issues that arise from the structure of language. Relevant concepts include: syntax, semantics, pragmatics, meaning, reference, truth, identity, thought, reality. Important distinctions: use/ mention, relations/properties of relations, sentences/statements/-propositions. 4 lectures.

PHIL 429. Special Topics in the History of Philosophy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and completion of GE Area C2.

Advanced discussion of selected topics in the history of philosophy. Examination and analysis of important philosophical movements (e.g., positivism, postmodernism) or alternatively, of particular philosophers or philosophical works of exceptional importance (e.g., David Hume; Kant's Critique of Pure Reason). The Class Schedule will list topic selected. Total credit limited to 16 units. 4 lectures.

PHIL 439. Selected Problems in Ethics and Political Philosophy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and completion of GE Area C2.

Advanced discussion of selected topics in ethics and political philosophy. Examination and analysis of significant ethical or political theories (e.g., utilitarianism, contractarianism) or alternatively, of particular philosophers or philosophical works of exceptional importance (e.g., John Stuart Mill; John Rawls' A Theory of Justice). The Class Schedule will list topic selected. Total credit limited to 16 units. 4 lectures.

PHIL 449. Selected Topics in Recent Philosophy. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing and completion of GE Area C2.

Advanced discussion of selected topics in recent philosophy. Examination and analysis of important recent movements in central philosophical areas (e.g., metaphysics, epistemology, philosophy of science, philosophy of language, philosophy of mind) or, alternatively, of particular philosophers or philosophical works of exceptional recent importance. The Class Schedule will list topic selected. Total credit limited to 16 units. 4 lectures.

PHIL 459. Senior Project Preparation. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Senior standing and consent of instructor; and Philosophy major only.

Group and individual discussion of senior project advisor selection and initial research for senior project. Library research training, completion of exit interview, and career advising for Philosophy majors nearing graduation. Credit/No Credit grading only. Course may be offered in classroom-based or online format. 1 activity.

PHIL 460. Senior Project I. 1 unit

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: PHIL 241, senior standing, and consent of instructor; Philosophy majors only. Concurrent: PHIL 459.

Selection, initial development, and formulation of a research plan for a project conducted under faculty supervision. Minimum of 30 hours per quarter. Credit/No Credit grading only.

PHIL 461. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: PHIL 460; Philosophy majors only.

Development and completion of a research project under faculty supervision. Results presented in a formal thesis. Minimum of 60 hours per quarter.

PHIL 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topics selected. Total credit limited to 8 units. 1 to 4 lectures.

Physical Education: Men (PEM)

undefined

PEM Courses

PEM 182. Baseball. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 183. Basketball. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 184. Cross Country. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 185. Football. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 189. Soccer. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 191. Swimming. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 192. Tennis. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 193. Track & Field. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 195. Golf. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

PEM 196. Wrestling. 2 units

Term Typically Offered: TBD

CR/NC

Enrollment limited to those academically qualified to compete in intercollegiate athletic programs. Consent of coach required. Total credit limited to 8 units. Courses are each 2 units and meet for a minimum of 10 hours per week. All competitive athletics courses are evaluated on a Credit/No Credit basis.

Physical Science (PSC)

undefined

PSC Courses

PSC 101. Matter and Energy. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Introduction to the basic principles of physical science, including observation, description, modeling, and the application of physical phenomena. Emphasis on interactions as described by energy, forces, and fields for mechanical, thermal, electric, and magnetic systems. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

PSC 102. Atoms and Molecules. 4 units

Term Typically Offered: W

Prerequisite: PHYS 121 or PHYS 131 or PHYS 141 or PSC 101.

Introduction to the basic principles of physical science (observation, description, modeling of physical phenomena) with an emphasis on interactions at the molecular level. Interactions and the behavior of gases, physical change, and chemical change (including chemical reactions, chemical bonding, and solutions). 3 lectures, 1 laboratory.

PSC 103. The Physical Environment: Earth. 4 units

Term Typically Offered: SP

Prerequisite: PSC 101 or PHYS 121 or PHYS 131 or PHYS 141.

Recommended: PSC 102.

Introduction to the basic principles of the earth sciences, and applications of these principles in modern society. Structure and formation of the Earth, earthquakes, weather, and oceanography. 3 lectures, 1 laboratory.

PSC 201. Physical Oceanography. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Sustainability Focused

Introduction to the motions of the ocean. Physical environment and sea floor features; seawater properties; atmosphere and ocean interactions; ocean currents and circulation; waves and tides; the El Niño cycle; coastal ocean processes; climate change and ocean stressors; ocean resources and marine life. 4 lectures. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

PSC 307. Nuclear Energy and Weapons in the Modern World. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Technology and basic science of fission/fusion weapons, uranium/plutonium, nuclear reactors, offensive/defensive missile systems, command/control, verification, weapon effects, nuclear testing. Historical context of Cold War and proliferation, recent events, global norms, arms control treaties. 3 lectures, 1 seminar. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

PSC 320. Energy, Society and the Environment. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Science and technology of current and future energy sources along with associated environmental problems and societal response. Energy production, consumption, efficient usage, fossil fuels, nuclear, solar, other renewables. Risks, benefits, planning, economics. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

PSC 391. Appropriate Technology for the World's People: Development. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

A broad overview of international development and appropriate design for sustainability. Besides traditional classroom work, students work in teams to address problems with technical solutions. Collaboration with mentors from the university, private sector, and nonprofits serves to provide diverse background and project mentorship. 4 lectures. Crosslisted as HNRS/PSC/UNIV 391. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

PSC 392. Appropriate Technology for the World's People: Design. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: UNIV 391 and completion of GE Area D2.

Addresses the needs of international impoverished communities with technological solutions, which are inexpensive, ecologically sustainable, and socially appropriate. Group study of target communities, and design and construction of an appropriate technology prototype. Not open to students with credit in PSC/UNIV/HNRS 492. 3 lectures, 1 laboratory. Crosslisted as HNRS/PSC/UNIV 392. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

PSC 424. Organizing and Teaching Science. 4 units

Term Typically Offered: F

Prerequisite: Admission to the Single Subject Credential Program.

Techniques, aims and objectives in the teaching of physical and life sciences at the secondary level. Selection and organization of teaching material, including strategies for English language learners (ELL) and special needs students. Evaluation of results. 3 lectures, 1 activity. Crosslisted as BIO/PSC 424.

PSC 425. Clinical Experience in Teaching Science Seminar. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Acceptance into the Single Subject Credential Program in Science. Concurrent: EDUC 469 or EDUC 479.

Principles and practices in effective teaching of science at the middle and high school level, learning theories, curriculum content and structure, classroom issues, and the teaching profession. Credit/No Credit grading only. Total credit limited to 4 units. 2 seminars. Crosslisted as BIO/PSC 425.

PSC 491. Appropriate Technology for the World's People: Development. 4 units

Term Typically Offered: F

Prerequisite: Consent of instructor, and senior or graduate standing.

Corequisite: GE Area D5.

A broad overview of international development and appropriate design for sustainability. Besides traditional classroom work, students work in teams to address problems with technical solutions. Collaboration with mentors from the university, private sector, and nonprofits serves to provide diverse background and mentorship. Seminar paper required. Not open to students with credit in PSC/UNIV/HNRS 391. 4 lectures. Crosslisted as PSC/UNIV 491.

PSC 492. Appropriate Technology for the World's People: Design. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); or graduate standing. Recommended: UNIV 391 and two lower-division courses in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Addresses the needs of international impoverished communities with techno-logical solutions, which are inexpensive, ecologically sustainable, and socially appropriate. Group study of target communities, and design and construction of an appropriate technology prototype. Seminar paper required. Not open to students with credit in PSC/UNIV/HNRS 392. 3 lectures, 1 laboratory. Crosslisted as PSC/UNIV 492.

Plant Sciences (PLSC)

undefined

PLSC Courses

PLSC 101. Orientation to Horticulture and Crop Science. 1 unit

Term Typically Offered: F

CR/NC

Discussion of horticulture, field crop, and plant protection careers. Examination of Department's curriculum, including its field, orchard and greenhouse operations. Introduction to student and professional organizations. Discussion of advising and academic resources. Required of all Horticulture and Crop Science students. Credit/No Credit grading only. 1 lecture. Formerly AEPS 101.

PLSC 110. People, Pests and Plagues. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B2

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B2

2019-20 or earlier catalog: GE Area B4

Introduction to the science of entomology, including insect identification, biology, ecology and evolution. Insects as beneficials, disease vectors and crop pests, and their interactions with humans, including roles in human culture and history. Not open for credit to Agricultural and Environmental Plant Sciences, Plant Sciences, or Wine and Viticulture majors (Viticulture concentration). 3 lectures, 1 activity. Fulfills GE Areas B2 and B3 (GE Areas B2 and B4 for students on the 2019-20 or earlier catalogs). Formerly AEPS 110.

PLSC 120. Principles of Horticulture and Crop Science. 4 units

Term Typically Offered: F, W

Introduction to horticulture and crop science. Basic plant processes, classification, anatomy, physiology, and biotechnology. Effect of environment on plants and how we control it. Introduction to plant growth including propagation, media, irrigation, nutrition, management, harvest, and post harvest handling. People's use of plants. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 120.

PLSC 123. Landscape Installation and Maintenance. 4 units

Term Typically Offered: F

Prerequisite: PLSC 120.

Planting and maintenance of trees, shrubs, ground covers, perennial plantings, color beds, specialty plantings, and small turf areas. Site selection, cultural requirements, scheduling of maintenance activities, pruning, landscape renovation and irrigation system repair. Equipment operation, maintenance, and safety. Speakers from industry. 3 lectures, 1 laboratory. Formerly AEPS 123.

PLSC 124. Plant Propagation. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 120 and BOT 121.

Plant propagation practices with emphasis on understanding why practices are used, how they work, and how they are applied in commercial horticulture. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 124.

PLSC 126. Landscape Construction. 3 units

Term Typically Offered: TBD

Prerequisite: PLSC 120.

Design, construction techniques, and materials used in landscape and horticulture construction. Material quantity estimating, sustainable building practices, construction material substitutions, tools and equipment associated with landscape and horticulture construction, and equipment safety. Field trip required. 2 lectures, 1 laboratory. Formerly AEPS 126.

PLSC 127. Horticulture and Landscape Design. 4 units

Term Typically Offered: W

Aesthetic aspects of environmental horticulture, introduction to computer aided design, presentation techniques and garden history. Field trip required. 2 lectures, 2 laboratories. Formerly AEPS 127.

PLSC 132. Pomology I. 4 units

Term Typically Offered: W

Prerequisite: PLSC 120.

Orchard design and development, cultural practices, physiological responses of trees to cultural practices, propagation and strategies to maximize orchard profitability and sustainability. Not open to students with credit in AEPS 250. 3 lectures, 1 laboratory. Formerly AEPS 132.

PLSC 133. Pomology II. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 132.

Analysis of production and management strategies for major fruit and nut crops in California. 3 lectures, 1 laboratory. Formerly AEPS 133.

PLSC 150. Forage Crops. 4 units

Term Typically Offered: F

Forages as a world resource in food and animal production, soil and water conservation and sustainable agricultural systems. Forage use systems: pasture and range, green chop, silage, hay and cubes. Identification and management of limiting factors of forage plant growth. Botany of legumes and grasses. Grass, legume and weed identification. Forage crop improvement. Forage composition and quality. Antiquality factors. 3 lectures, 1 laboratory. Formerly AEPS 150.

PLSC 175. Beekeeping. 3 units

Term Typically Offered: F, SP

Studies and exercises in the handling of European honey bees with special reference to pollination of commercial crops. Honey processing and marketing. Hive inspection and disease detection. 2 lectures, 1 laboratory. Formerly AEPS 175.

PLSC 190. California Vegetable Production. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 120.

History, botany, growth characteristics and climatic adaptation, pests, and harvesting methods for the most important vegetable crops grown in California. Use of transplants, plastic mulches and row covers in vegetable production. Current topics in agriculture important to the vegetable industry. Field trip to a major California vegetable production area required. Survey of vegetable production for Plant Sciences majors. 3 lectures, 1 laboratory. Formerly AEPS 190.

PLSC 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total graduation credit limited to 4 units, with a maximum of 4 units per quarter. Report required. Formerly AEPS 200.

PLSC 203. Organic Enterprise Project. 2 units

Term Typically Offered: F, W, SP

CR/NC

Beginning field experience in production and marketing of organic vegetable crops. May include cultural practices, harvesting, processing, sales and marketing activities. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 203.

PLSC 205. Orchard and Vegetable Enterprise Project. 2 units

Term Typically Offered: F, W, SP

CR/NC

Sustainability Related

Hands-on experience in the production and marketing of fruit and vegetable crops such as blueberries, stone fruits, pomegranates, apples, citrus, avocados, broccoli, cauliflower, sweet corn, tomatoes, peppers, squash and lettuce. Students will also receive hands-on training in crop management. Not open to students with credit in AEPS 202 or AEPS 204. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 205.

PLSC 212. Environmental Horticulture Enterprise Project I. 2 units

Term Typically Offered: F, W, SP

CR/NC

Beginning field experience in environmental horticulture. Selection and completion of a management/production project. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 212.

PLSC 215. Floral Design I. 3 units

Term Typically Offered: F, W

Fundamentals of theory, techniques and skills currently practiced in the floral industry. Intended as consumer education for non-majors as well as initial preparation for pre-professionals. Includes applied art principles, post-harvest care and handling practices, and proper use of florist tools and materials in developing basic designs. 1 lecture, 2 laboratories. Formerly AEPS 215.

PLSC 225. Floral Design II. 3 units

Term Typically Offered: SP

Prerequisite: PLSC 215.

Expanded exploration and application of design theory to commercial products and services in the retail floral industry. Appropriate utilization of current sales and business practices in a florist setting. Advanced techniques and skills for construction of designs for weddings, advanced arrangements, and designs for events. 1 lecture, 2 laboratories. Formerly AEPS 225.

PLSC 230. Environmental Horticulture. 4 units

Term Typically Offered: TBD

Technical information and recommendations for the residential horticulturist. Propagation, pruning, planting, media, fertilizers, pest and weed control, landscaping, maintenance, identification and care of ornamental plants. Being a wise horticultural consumer. Not open to Plant Sciences majors. 3 lectures, 1 laboratory. Formerly AEPS 230.

PLSC 232. Basic Viticulture. 4 units

Term Typically Offered: F, W, SU

Prerequisite: PLSC 120 or BOT 121; CHEM 127; and SS 120.

Fundamentals of grape growing, with emphasis on wine grapes. Fundamentals of vine anatomy and physiology, development and phenology, trellising systems, soils, climatic factors, vineyard establishment, grafting, irrigation, fertility, harvest practices, pruning, major pests, and major varieties and rootstocks. Not open to students with credit in WVIT 231. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as PLSC 232/WVIT 233. Formerly AEPS 232/WVIT 233.

PLSC 233. Plant Materials I. 4 units

Term Typically Offered: SP

Identification, habits of growth, cultural requirements, and use of ornamental plants in the landscape. 3 lectures, 1 laboratory. Formerly AEPS 233.

PLSC 234. Plant Materials II. 4 units

Term Typically Offered: F

Identification, habits of growth, cultural requirements, and use of ornamental plants in the landscape. 3 lectures, 1 laboratory. Formerly AEPS 234.

PLSC 240. Commercial Seed Production. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 120.

Production of field and vegetable seed. Seed technology, germination, quality control, seed enhancement, storage and handling of seed, and seed laws. Field trip to a seed conditioning/seed enhancement facility required. 3 lectures, 1 laboratory. Formerly AEPS 240.

PLSC 244. Precision Farming. 4 units

Term Typically Offered: W

Prerequisite: One of the following: PLSC 133, PLSC 190, PLSC 260, BRAE 237, or BRAE 239.

Precision agriculture applications. Integrating GIS, GPS, and remote sensing technologies with site-specific farming practices to optimize agricultural productivity. Field trip required. 3 lectures, 1 laboratory. Crosslisted as BRAE/PLSC 244.

PLSC 245. Horticultural Production Techniques. 4 units

Term Typically Offered: F

Sustainability Focused

Applied principles of plant growth in relation to the production horticulture industry. Emphasis on container media, fertilizing practices, irrigation, plant growth regulators, and miscellaneous growing structures. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 245.

PLSC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures. Formerly AEPS 270.

PLSC 304. Introduction to Plant Breeding. 4 units

Term Typically Offered: W, SP

Prerequisite: PLSC 120 and STAT 218. Recommended: one of the following: PLSC 132, PLSC 190, PLSC 230, PLSC 245, PLSC 250, or PLSC 232/WVIT 233.

Principles of qualitative and quantitative genetics useful in the development of new plant varieties. Procedures for the creation of genetic variability, testing procedures, and selection schemes for development of improved plant types. 4 lectures. Formerly AEPS 304.

PLSC 312. Environmental Horticulture Enterprise Project II. 2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor.

Field experience in environmental horticulture. Selection and completion of a management/production project under faculty supervision. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 312.

PLSC 313. Agricultural Entomology. 4 units

Term Typically Offered: F, SP

Prerequisite: PLSC 120 or BOT 121; and one of the following: CHEM 110 or CHEM 127.

The science of entomology as it relates to insects of importance in agriculture. Focus on the biology, ecology and identification of insects and mites important to California horticulture, field crops and landscapes. 3 lectures, 1 laboratory. Formerly AEPS 313.

PLSC 315. Principles of Organic Crop Production. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Origins, application, regulation and technology of organic crop production. Theoretical and practical issues surrounding organic crop production from a cross-disciplinary perspective. Topics include the history of the organic movement; current regulation and certification; and field management practices and technologies. Features industry guest lecturers. Field trip required. 3 lectures, 1 activity. Crosslisted as AG/PLSC 315. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog). Formerly AEPS/AG 315.

PLSC 321. Weed Biology and Management. 4 units

Term Typically Offered: F, SP

Prerequisite: PLSC 120 or BOT 121.

Weed ecology, biology, and implications for management. Identification of weedy and invasive plant species in annual agricultural, perennial semi-managed, range, aquatic, and forest ecosystems, to elucidate weaknesses and strengths in order to facilitate vegetation management. Organic, cultural, biological, mechanical, and chemical methods and their integrated pest management (IPM) uses. 3 lectures, 1 laboratory. Formerly AEPS 321.

PLSC 323. Plant Pathology. 4 units

Term Typically Offered: F, W, SP
Prerequisite: BIO 162 or BOT 121.

Comprehensive study of the causes and effects of diseases of plants. Designed to lead to an understanding of plant pathology, and modern methods to control plant disease. 2 lectures, 2 activities. Crosslisted as BOT/PLSC 323. Formerly AEPS/BOT 323.

PLSC 327. Vertebrate Pest Management. 4 units

Term Typically Offered: W
Prerequisite: Junior standing.

Vertebrate pests injurious to crops, livestock, forest products, wildlife, stored products and humans. Life habits, identification, control methods, and materials. Related laws and regulations. 3 lectures, 1 laboratory. Formerly AEPS 327.

PLSC 329. Plants, Biotechnology, and the Media. 4 units

Term Typically Offered: F, W
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one of the following courses: PLSC 120, BIO 111, BIO 114, BIO 161, or BOT 121.

Agriculture as applied biology and its impact on civilization. Application of technology to increase the efficiency of food production. Genetics and biotechnology; culminating in an assessment of genetically engineered foods, the myths, the controversy, the science. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog). Formerly AEPS 329.

PLSC 331. Advanced Viticulture - Fall. 4 units

Term Typically Offered: F, SU
Prerequisite: PLSC 232 or WVIT 233.

Advanced viticulture theory and practice, with an emphasis on fall season activities. Identification of rootstocks, wine and table grapes, species taxonomy and diversity, and breeding for grapevine improvement. Field trips may be required. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as PLSC/WVIT 331. Formerly AEPS/WVIT 331.

PLSC 332. Landscape Contracting. 4 units

Term Typically Offered: TBD
Prerequisite: PLSC 126 and PLSC 127.

Practices in supervising personnel and applying standard techniques in landscape construction. Cost finding and estimating for landscape trades. 3 lectures, 1 laboratory. Formerly AEPS 332.

PLSC 333. Greenhouse Vegetable Production. 2 units

Term Typically Offered: F
Prerequisite: PLSC 120; CHEM 127; and SS 221.

Development, practices, history, and future of crop production in greenhouses. Research applications, commercial applications, production problems, marketing, and economics. Special emphasis on growing transplants in greenhouses and use of nutrient solutions. Field trips to a commercial greenhouse operation and/or analysis lab required. 2 activities. Formerly AEPS 333.

PLSC 334. Greenhouse Vegetable Enterprise Project. 2 units

Term Typically Offered: W
CR/NC
Sustainability Related
Prerequisite: PLSC 333.

Hands-on experience in the production, management and marketing of a variety of hydroponically-grown, greenhouse vegetables. Credit/No Credit grading only. 1 lecture, 1 activity. Formerly AEPS 334.

PLSC 336. Advanced Viticulture - Winter. 4 units

Term Typically Offered: W
Prerequisite: PLSC 232 or WVIT 233; and PLSC/WVIT 331.

Advanced viticulture theory and practice with emphasis on winter season activities. Pruning to influence vine balance, productivity, training and trellising systems, vineyard establishment, cover cropping and weed management. Field trips required. 3 lectures, 1 laboratory. Crosslisted as PLSC 336/WVIT 332. Formerly AEPS 336/WVIT 332.

PLSC 337. Advanced Viticulture - Spring. 4 units

Term Typically Offered: SP
Prerequisite: PLSC 232 or WVIT 233; and PLSC/WVIT 331.

Advanced viticulture theory and practices with emphasis on spring activities. Vine source/sink relations, factors impacting yield and berry composition, the role environmental conditions on vine physiology, and canopy management. Field trips required. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as PLSC 337/WVIT 333. Formerly AEPS 337/WVIT 333.

PLSC 339. Internship in Horticulture and Crop Science. 1-12 units

Term Typically Offered: F,W,SP,SU
CR/NC
Prerequisite: Consent of instructor.

Selected Plant Sciences students will spend up to 12 weeks with an approved agricultural/horticultural firm off-campus engaged in plant production or related business. Time will be spent applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Degree credit limited to 6 units. Credit/No Credit grading only. Formerly AEPS 339.

PLSC 340. Principles of Greenhouse Environment. 4 units

Term Typically Offered: SP
Prerequisite: PLSC 245.

Analysis of problems and practices affecting the contemporary commercial horticulturist. Analysis and operation of greenhouses and related equipment stressing the effect of environment on plant growth. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 340.

PLSC 341. Cut Flower Production. 4 units

Term Typically Offered: F
Prerequisite: PLSC 120.

Production of cut flowers and other fresh florists' commodities in greenhouses and outdoors. Preparation and scheduling of such commodities for major markets. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 341.

PLSC 342. Potted Plant Production. 4 units

Term Typically Offered: W
Prerequisite: PLSC 245.

Production of major commercial flowering potted plants in greenhouses and outdoors. Preparation and scheduling of potted flowering greenhouse crops for major markets. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 342.

PLSC 343. Turfgrass Management. 4 units

Term Typically Offered: TBD
Prerequisite: PLSC 120 or BOT 121; and SS 120 or SS 121.

Turfgrass species and uses. Principles of turfgrass physiology and communities under different environments. Overview of procedures and equipment for propagation, mowing, irrigation, fertilization, aerification, and pest control. 3 lectures, 1 laboratory. Formerly AEPS 343.

PLSC 350. Abiotic Plant Problems. 4 units

Term Typically Offered: W, SP
Prerequisite: PLSC 120 or BOT 121.

Diagnosis of plant physiological disorders associated with environmental and nutritional stresses. Emphasis on the systematic inquiry process and contrasting abiotic and biotic stress. Lab includes application of various diagnostic instruments, analysis of test results, and treatment recommendations. 3 lectures, 1 laboratory. Formerly AEPS 350.

PLSC 351. Experimental Techniques and Analysis. 4 units

Term Typically Offered: W
Prerequisite: Junior standing and MATH 118 or equivalent, and STAT 218.

Principal experimental designs used in agriculture and methods of statistical analysis of data collected from each. Statistical software. Field practice in planning and layout of typical experiments. 3 lectures, 1 laboratory. Formerly AEPS 351.

PLSC 355. Citrus and Avocado Fruit Production. 4 units

Term Typically Offered: SP
Prerequisite: PLSC 120 or PLSC 250.

World citrus and avocado production and marketing. Orchard management techniques. Relationship of environment to species, cultivar, and rootstock selection. Field trip to a major California production area required. 3 lectures, 1 laboratory. Formerly AEPS 355.

PLSC 360. Nut Crops Production. 4 units

Term Typically Offered: TBD
Prerequisite: PLSC 132.

California nut crop production, focusing on almond, walnut and pistachio. Orchard establishment and management techniques. Environmental, physiological and biological factors affecting growth and production. 3 lectures, 1 laboratory. Formerly AEPS 360.

PLSC 381. Native Plants for California Landscapes. 4 units

Term Typically Offered: SP
Prerequisite: BIO 114 or BOT 121; and junior standing.

Survey of California flora with emphasis on landscape use and potential. Plant recognition, identification, propagation and culture. Utilization of native plants in landscape design and habitat restoration. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 381.

PLSC 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: FW,SPSU
Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total degree credit limited to 4 units, with a maximum of 4 units per quarter. Report required. Formerly AEPS 400.

PLSC 406. Advanced Weed Management. 4 units

Term Typically Offered: W
Prerequisite: PLSC 321.

Advanced coverage of sustainable weed and invasive plant management technologies. Concepts include environmental fates, plant metabolism, ecology and biology of weeds, and mechanisms of action of herbicides. Plant biotechnology as it relates to herbicide resistance in crops and weeds. 4 lectures. Formerly AEPS 406.

PLSC 410. Crop Physiology. 4 units

Term Typically Offered: SP
Prerequisite: PLSC 120 or BIO 263; BIO 162 or BOT 121.

Ecological and physiological factors associated with the production of crop plants. Physiological and biochemical processes that elucidate the mechanisms of whole plant performance and responses to the environment. 4 lectures. Formerly AEPS 410.

PLSC 414. Grape Pest Management. 4 units

Term Typically Offered: F
Prerequisite: PLSC 232 or WVIT 233; PLSC 313; BOT/PLSC 323.

Comprehensive survey of major grape pests including diseases, insects, weeds, vertebrates, and nematodes. Identification and biology of grape pests and natural enemies, monitoring, and integrated pest management (IPM) strategies, including cultural, biological, and chemical controls. Guest lectures. 3 lectures, 1 activity. Crosslisted as PLSC/WVIT 414. Formerly AEPS/WVIT 414.

PLSC 420. Organic Crop Production Systems. 4 units

Term Typically Offered: W
Sustainability Related
Prerequisite: PLSC 120 or BOT 121; SS 120; and junior standing.

Systems approach to crop management, soil fertility and plant nutrition, and crop and pest management including current regulations and modern technologies implemented in organic crop production. Intended for students with a background in the plant sciences. Field trip required. 3 lectures, 1 activity. Formerly AEPS 420.

PLSC 421. Postharvest Technology of Horticultural Crops. 4 units

Term Typically Offered: SP
Prerequisite: Junior standing.

Respiration, ethylene, ripening and senescence; modified atmosphere packaging, controlled atmosphere storage, packinghouses and transportation; survey of postharvest techniques to maximize commodity shelf-life. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 421.

PLSC 424. Nursery Crop Production. 4 units

Term Typically Offered: W

Prerequisite: PLSC 124.

Comprehensive and historical overview of the nursery industry. Types of wholesale nurseries and their products. Plant production systems, scheduling, and marketing. Emphasis on medium to large woody plants and deciduous field-grown ornamental trees and shrubs in the western U.S. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 424.

PLSC 425. Arboriculture. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 123, PLSC 233, and PLSC 234 or NR 208 for FFS majors.

Theory and practice for the care and management of ornamental trees. Selection, planting, establishment, maintenance of specimen trees. Professional use of ropes and safety equipment. Tree evaluation, scheduling cultural practices, bracing, cabling, specialty hand and power equipment operation, safety regulations. 2 lectures, 2 laboratories. Formerly AEPS 425.

PLSC 427. Disease and Pest Control Systems for Ornamental Plants. 4 units

Term Typically Offered: W

Prerequisite: PLSC 120, PLSC 313, PLSC 321, and BOT/PLSC 323.

Recognition, prevention and control of diseases, insect/mite pests and weeds that impact commercial ornamental plantings. Integrated pest management strategies presented including biological, cultural, and safe and proper pesticidal controls. Laboratory emphasizes monitoring, problem-solving and application of appropriate pest control measures. 2 lectures, 2 activities. Formerly AEPS 427.

PLSC 428. Advances in Plant Pathology. 4 units

Term Typically Offered: F

Prerequisite: BOT/PLSC 323 and STAT 218.

Discussions of disease development, effect of pathogens on plant function, breeding for disease resistance, plant defense mechanisms, epidemiology and disease management, diagnosis techniques, and career opportunities in the field of Plant Pathology. 3 lectures, 1 laboratory. Formerly AEPS 428.

PLSC 431. Insect Pest Management. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 313.

Principles of insect and mite pest management, including integrated pest management (IPM), applications of ecological theory to pest management, cultural, biological and chemical controls, pesticide resistance management, insect and mite monitoring, biotechnology applications, pesticide laws and regulations, pest control advisor and qualified applicator licensing and certification. Field trip required. 3 lectures, 1 laboratory. Formerly AEPS 431.

PLSC 432. Specialized Operations for Golf Courses and Athletic Fields. 4 units

Term Typically Offered: TBD

Prerequisite: PLSC 343.

Advanced maintenance and operation of golf course facilities and athletic field complexes. Specialized turf establishment and maintenance, environmental concerns, finance and personnel management, and professional development. Field trip required. Not open to students with credit in PLSC 430. 3 lectures, 1 laboratory. Formerly AEPS 432.

PLSC 437. Park and Public Space Management. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing.

Management and maintenance of private and public parks, arboreta, botanical gardens and recreational areas. Maintenance personnel management, safety and liability issues. Field trips required. 3 lectures, 1 laboratory. Formerly AEPS 437.

PLSC 441. Biological Control for Pest Management. 4 units

Term Typically Offered: F

Prerequisite: PLSC 313.

Control of arthropods, weeds and vertebrates to include history of biocontrol; biology of beneficial arthropods; methods of introduction, augmentation and conservation; and case studies. Identification of beneficial arthropods to appropriate taxonomic level. Technology, laws and regulations governing use of biocontrol agents. Field trips to insectaries, quarantine facilities and/or crop production areas. 3 lectures, 1 laboratory. Formerly AEPS 441.

PLSC 445. Cropping Systems. 4 units

Term Typically Offered: W

Prerequisite: PLSC 120; or BOT 121 and SS 120 or SS 121; or graduate standing.

Classification and description of agricultural systems of the world. Cropping systems as land management plans. Systems approaches to improvement of agricultural situations. Consideration of human factors and the agroecosystem in efforts to create a more sustainable agriculture. Field trip required. 3 lectures, 1 activity. Formerly AEPS 445.

PLSC 450. Current Issues in the Strawberry Industry. 2 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: PLSC 120. Corequisite: BOT 121.

Current issues in the California strawberry industry. Varied topics related to production techniques, pest management, labor, food safety, water quality, breeding, postharvest handling, automation, marketing, processing, and organics. Field trip required. Total credit limited to 4 units. 2 seminars. Formerly AEPS 450.

PLSC 461. Senior Project I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing; completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); and STAT 218.

Initial information research for project definition and development. Projects are typical of problems which graduates must solve in their fields of study or employment. Project results are presented in PLSC 462. Contract drawn up with approval of advisor. 2 lectures. Formerly AEPS 461.

PLSC 462. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Continuation of Senior Project development. Write-up of rough draft and formal draft of project. Completion of formal written report under advisor supervision. Minimum 60 hours. Formerly AEPS 462.

PLSC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures. Formerly AEPS 470.

PLSC 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories. Formerly AEPS 471.

PLSC 500. Individual Study in Horticulture and Crop Science. 1-6 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Advanced independent study planned and completed under the direction of a member of the Plant Sciences faculty. Total credit limited to 6 units. Formerly AEPS 500.

PLSC 539. Graduate Internship in Horticulture and Crop Science. 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Consent of instructor.

Application of theory to the solution of problems of agricultural production or related business in the fields of horticulture and crop science. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units. Formerly AEPS 539.

PLSC 570. Selected Topics in Horticulture and Crop Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars. Formerly AEPS 570.

PLSC 571. Selected Topics Laboratory in Horticulture and Crop Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 laboratories. Formerly AEPS 571.

PLSC 575. Applied Systematics for Agriculture. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing. Recommended: a course in basic entomology, plant pathology, and weed science.

The application of evolutionary, phylogenetic, taxonomic and biogeographic principles as they pertain to current agricultural issues in the US. Attention is given to invasive species and their impact on California's agricultural industry. The course focus is insects, but invasive plants and microorganisms are also addressed. 4 seminars. Formerly AEPS 575.

PLSC 581. Graduate Seminar in Crop/Fruit Production. 3 units

Term Typically Offered: W

Prerequisite: Graduate standing.

Group study of current problems, trends and research results pertaining to production or marketing of field, vegetable or fruit crops. 3 seminars. Formerly AEPS 581.

PLSC 596. Thesis in Crop Science. 1-9 units

Term Typically Offered: F,W,SP,SU

Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in Crop Science. Thesis will include problem identification, significance, methods, data analysis, and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Total credit limited to 9 units. Formerly AEPS 596.

PLSC 597. Thesis in Environmental Horticulture Science. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in environmental horticulture. Thesis will include problem identification, significance, methods, data analysis and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Total credit limited to 9 units. Formerly AEPS 597.

PLSC 598. Thesis in Fruit Science. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Systematic research of a significant problem in Fruit Science. Thesis will include problem identification, significance, methods, data analysis, and conclusion. Students must enroll every quarter in which facilities are used or advisement is received. Total credit limited to 9 units. Formerly AEPS 598.

PLSC 599. Thesis in Plant Protection Science. 1-9 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Systematic research of a topic in plant protection science, including weed science, entomology, plant pathology, nematology or vertebrate management. Thesis to describe the problem and its significance, methodology, results, data analysis, discussion and conclusion. Enrollment required every quarter in which facilities are used or advisement received. Total credit limited to 9 units. Formerly AEPS 599.

Physics (PHYS)

undefined

PHYS Courses

PHYS 100. Introduction to the Physics Major. 1 unit

Term Typically Offered: F

CR/NC

Introduction to the skills, tools, and habits-of-mind physicists use to approach and investigate physical phenomena. Exploration of possible careers for physics majors and issues of diversity and representation in physics. Includes community building activities. Designed for new physics majors. 1 activity. Credit/No credit grading only.

PHYS 104. Introductory Physics. 4 units

Term Typically Offered: F

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Prerequisite: Appropriate Math Placement Level; or MATH 115; or MATH 116; or MATH 118.

Elementary introduction to mechanics, gases, liquids and solids, heat, vibrations and waves, light, electricity and magnetism. Intended to provide non-science students with an understanding of basic physical concepts. Not open to students who have credit in a college physics course. 4 lectures. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

PHYS 111. Contemporary Physics for Nonscientists. 4 units

Term Typically Offered: F

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Qualitative exploration of the key concepts of quantum mechanics and Einstein's special and general theories of relativity. Particle-wave duality, Heisenberg's uncertainty principle, Schrodinger's cat, warped spacetime, black holes. 4 lectures. Not open to students with credit in PHYS 211. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

PHYS 121. College Physics I. 4 units

Term Typically Offered: F,W,SP,SPU

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Prerequisite: Appropriate Math Placement Level; or MATH 118 and high school trigonometry; or MATH 119.

Introductory course in mechanics emphasizing motion, force, and energy. Not open to students having a grade of C- or better in PHYS 141. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

PHYS 122. College Physics II. 4 units

Term Typically Offered: F,W,SP,SPU

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: PHYS 121 or PHYS 141.

Continuation of PHYS 121. Topics include properties of materials, fluids, waves and vibrations, sound, heat, light and optics. Not open for credit to students having a grade of C- or better in PHYS 132. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

PHYS 123. College Physics III. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PHYS 118, PHYS 121, PHYS 131, or PHYS 141.

Recommended: PHYS 122.

Continuation of PHYS 121 and 122. Electrostatics, electric current, magnetic fields and induction. Elements of modern physics. Not open for credit to students having a grade of C- or better in PHYS 133. 3 lectures, 1 laboratory.

PHYS 125. College Physics I Laboratory. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of the College of Science and Mathematics

Advising Center. Co-requisite: PHYS 121.

Laboratory experiments to complement introductory course in mechanics, emphasizing experiments on motion, force, and energy. Not open to students with a grade of C- or better in PHYS 131 or PHYS 141. 1 laboratory.

PHYS 141. General Physics I. 4 units

Term Typically Offered: F,W,SP,SPU

2020-21 or later catalog: GE Area B1

2019-20 or earlier catalog: GE Area B3

Prerequisite: MATH 141 with grade C- or better. Corequisite: MATH 142 or MATH 182. Recommended: High School Physics.

Fundamental principles of mechanics. Vectors, particle kinematics. Equilibrium of a rigid body. Work and energy, linear momentum, rotational kinematics and dynamics. Primarily for engineering and science students. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as HNRS 134/PHYS 141. Fulfills GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs).

PHYS 142. General Physics II. 4 units

Term Typically Offered: F,W,SP,SPU

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Prerequisite: PHYS 141; and MATH 142 or MATH 182.

Oscillations, waves in elastic media, sound waves. Temperature, heat and the first law of thermodynamics. Kinetic theory of matter, second law of thermodynamics. Geometrical and physical optics. 3 lectures, 1 laboratory. Crosslisted as HNRS 132/PHYS 142. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs). Formerly PHYS 132.

PHYS 143. General Physics III. 4 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later catalog: GE Area B1
 2020-21 or later catalog: GE Area B3
 2019-20 or earlier catalog: GE Area B3
 2019-20 or earlier catalog: GE Area B4
 Prerequisite: MATH 142 and PHYS 141. Recommended: MATH 241.

Charge and matter, electric field, electric potential, dielectrics, capacitance, current and resistance, electromotive force and circuits, magnetic fields, magnetic field of a moving charge, induced emf. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs). Formerly PHYS 133.

PHYS 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP
 Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

PHYS 202. Physics on the Computer. 4 units

Term Typically Offered: SP
 Prerequisite: PHYS 133; and MATH 241 or MATH 244.

Introduction to using computers for solving problems in physics: differential equations, matrix manipulations, simulations and numerical techniques, nonlinear dynamics. 4 lectures.

PHYS 206. Electronics and Instrumentation. 4 units

Term Typically Offered: W
 Prerequisite: PHYS 133 and MATH 143.

L-R-C circuits and electronic circuit elements emphasizing the applications of analog and digital electronics to instrumentation in modern physics. 3 lectures, 1 laboratory.

PHYS 211. Modern Physics I. 4 units

Term Typically Offered: F, W, SP
 Prerequisite: PHYS 132 and PHYS 133 and MATH 241. Recommended: MATH 242 or MATH 244.

Special relativity, fundamental principles of quantum mechanics, emphasizing the modern description of atomic phenomena. Wave-particle duality, Bohr theory, Schroedinger equation, elementary atomic structure. Course may be offered in classroom-based or online format. 4 lectures.

PHYS 212. Modern Physics II. 4 units

Term Typically Offered: SP
 Prerequisite: PHYS 211.

Applications of quantum physics to atoms, molecules, solid state systems, nuclei, and elementary particles including angular momentum and spin. Topics may include applications of statistical mechanics, principles of the laser, cooling and trapping of atoms, Bose-Einstein condensates, semiconductors, superconductors, heavy ion physics, and other topics of current interest. 4 lectures.

PHYS 220. Introduction to Physics Research. 1 unit

Term Typically Offered: F
 CR/NC
 Prerequisite: PHYS 132 or PHYS 133.

Introduction to the research programs of faculty in the department and opportunities for research. Survey of departmental facilities and procedures related to research. Overview of external research programs/ internships. Credit/No Credit grading. 1 lecture.

PHYS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

PHYS 301. Thermal Physics I. 4 units

Term Typically Offered: W
 Prerequisite: PHYS 211.

Thermodynamics and statistical mechanics. Entropy, temperature, ensembles, partition functions, chemical potential, free energy. Selected applications including paramagnetism, ideal gas, Fermi-Dirac and Bose-Einstein distributions. 4 lectures.

PHYS 305. Classical Mechanics I. 4 units

Term Typically Offered: F
 2020-21 or later: Upper-Div GE Area B
 Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); PHYS 141; MATH 241; and MATH 242 or MATH 244.

Laws of motion, kinematics and dynamics of a particle. Oscillations. Work and energy. Linear and angular momentum. Lagrange's and Hamilton's equations and the calculus of variations. Newton's Law of gravity, Kepler's laws of orbital motion, and central force problems. Use of numerical methods for solving problems. Not open to students with credit in PHYS 302. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

PHYS 306. Classical Mechanics II. 3 units

Term Typically Offered: W
 Prerequisite: PHYS 305.

Mechanics in non-inertial reference frames. Dynamics of a rigid bodies. Coupled oscillators and normal modes. Use of numerical methods for solving problems. 3 lectures. Formerly PHYS 303.

PHYS 310. Physics of Energy. 3 units

Term Typically Offered: SP
 Sustainability Focused
 Prerequisite: PHYS 132.

Physics and mathematics applied to broad energy topics. Efficient usage, transportation, solar energy, nuclear fission and fusion. Plasma, hydrogen economy, fuel cells, wind wave, tidal, and geothermal energy. Transmission, storage, fossils. National planning, and energy economics. 3 lectures.

PHYS 313. Introduction to Atmospheric Physics. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 132 or PHYS 122, and MATH 241. Recommended: MATH 304.

Properties of the atmosphere, atmospheric motions, solar and terrestrial radiation. Emphasis on conservation laws of momentum, energy and mass applied to understanding the Earth's atmospheric motions. 3 lectures.

PHYS 314. Ocean Dynamics. 3 units

Term Typically Offered: SP

Sustainability Focused

Prerequisite: PHYS 122 or PHYS 132; and MATH 241. Recommended: MATH 304 or PHYS 320.

Physics governing ocean circulation and transport processes. Physical environment, dynamics of fluid motion in the presence of rotation and stratification, balanced flows, heat budgets, ocean waves, mixing/transport, and applications to climate processes and the biological environment. 3 lectures.

PHYS 315. Lasers. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 211 and MATH 143.

Interaction of light with matter, theory of laser action, characteristics and modification of laser output, types of lasers. Laser applications. Topics may include interferometry, fiber optics, holography. 3 lectures.

PHYS 318. Special Theory of Relativity. 3 units

Term Typically Offered: W

Prerequisite: PHYS 211.

Fundamental experiments and basic postulates of special relativity. Simultaneity, length and time measurements. Lorentz transformations. Four-Vectors. Space-time diagrams. Relativistic mechanics and electromagnetism. 3 lectures.

PHYS 320. Methods of Theoretical Physics I. 4 units

Term Typically Offered: F

Prerequisite: PHYS 211; MATH 242 or MATH 244; and Physics major.

Introduction to the mathematical techniques of theoretical physics with applications from classical mechanics, optics, electromagnetism and quantum mechanics. Maxwell's equations and vector calculus. Waves, the wave equation and Fourier analysis. Green's functions. Physics applications of complex contour integration and series. Not open to students with credit in PHYS 322 or PHYS 424. 4 lectures.

PHYS 321. Methods of Theoretical Physics II. 4 units

Term Typically Offered: W

Prerequisite: PHYS 320; and Physics major.

Continuing study of the mathematical techniques of theoretical physics. Methods for solving differential equations in classical mechanics, electromagnetism and quantum mechanics. Problems involving the heat equation, the wave equation and the Schrodinger equation in one, two and three dimensions. 4 lectures.

PHYS 323. Optics. 4 units

Term Typically Offered: W

Prerequisite: MATH 241; PHYS 133; and one of the following: PHYS 320, PHYS 322, EE 228, EE 201, or ME 318.

Ray optics, lens systems, optical instruments, wave optics, and polarization of light. 3 lectures, 1 laboratory.

PHYS 330. Teaching Physics. 4 units

Term Typically Offered: SP

Prerequisite: one of the following: PHYS 122, PHYS 123, PHYS 132, PHYS 133, PSC 102, or PSC 103.

Inquiry approaches to teaching physics incorporating insights from physics education research and the use of computer technology. Emphasis on pedagogical approaches and assessment that engage learners in scientific discourse and the development of basic models of physics phenomena such as motion, forces, energy, and momentum through experimentation. 2 lectures, 2 activities.

PHYS 340. Quantum Physics Laboratory I. 2 units

Term Typically Offered: F

Prerequisite: PHYS 206; PHYS 212; and one of the following: PHYS 202, CSC 101, CSC 231, or CSC 234.

Experimental studies of the quantum properties of atoms and nuclei. Measurements of fundamental constants. Statistics and data analysis. 1 lecture, 1 laboratory.

PHYS 341. Quantum Physics Laboratory II. 2 units

Term Typically Offered: W

Prerequisite: PHYS 340.

Experimental studies of quantum properties of atoms and nuclei. Interactions of radiation, particles and fields. 2 laboratories.

PHYS 342. Quantum Physics Laboratory III. 1 unit

Term Typically Offered: SP

Prerequisite: PHYS 341.

Advanced experimental studies of quantum properties of atoms and nuclei. Interactions of radiation, particles and fields emphasizing spectroscopic techniques. 1 laboratory.

PHYS 345. Quantum Computing. 4 units

Term Typically Offered: SP

Prerequisites: MATH 206 or MATH 244; and CHEM 353 or PHYS 211.

Quantum mechanical wave functions. Principle of superposition and entanglement. States of one or more quantum bits. Quantum gates and circuits. Application of quantum gates on simulators and quantum computers. Quantum computer architectures. Quantum algorithms. Ethics of quantum computing. 3 lectures, 1 activity. Crosslisted as CPE/PHYS 345.

PHYS 357. Advanced Instrumentation in Experimental Physics. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 206.

Advanced analog and digital electronics, computer interfacing to experiments, robotics. 2 lectures, 1 laboratory.

PHYS 400. Special Problems for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigations, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

PHYS 401. Thermal Physics II. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 301.

Additional topics in thermodynamics and statistical physics, including chemical equilibrium, phase transitions, transport processes, and cryogenics. 3 lectures.

PHYS 403. Particle and Nuclear Physics. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 212 and PHYS 405.

Elementary particles and their interactions, fundamental forces, the Standard Model of particle physics. Symmetries and conservation laws including parity, charge conjugation, and time reversal invariance, as well as charge-parity violation. Dirac equation, quantum electrodynamics, and Feynman diagrams. Advanced nuclear physics. Topics may include decays, symmetries of the quark model, neutrinos, nucleosynthesis, and the quark-gluon plasma. 3 lectures.

PHYS 404. Research Experience for Advanced Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of department chair.

Individual investigations, research, studies, or surveys of selected problems. Credit/No Credit grading only. Total credit limited to 4 units, with a maximum of 2 units per quarter.

PHYS 405. Quantum Mechanics I. 4 units

Term Typically Offered: SP

Prerequisite: PHYS 212; PHYS 302 or PHYS 305; PHYS 320 or PHYS 322; MATH 241; and MATH 242 or MATH 244. Recommended: MATH 344 or PHYS 321.

Wave nature of matter and the basic postulates of quantum mechanics. The wave function, operators, and their interpretation. Schrodinger's equation and its solutions in one and more dimensions. The hydrogen atom and the periodic table. 4 lectures.

PHYS 406. Quantum Mechanics II. 3 units

Term Typically Offered: F

Prerequisite: PHYS 405.

Angular momentum operators and problems in three dimensions including the hydrogen atom. Elements of matrix mechanics and properties of spin state vectors. Time-independent and time-dependent perturbation theory. Topics may include variational principle, WKB approximation. 3 lectures.

PHYS 408. Electromagnetic Fields and Waves I. 4 units

Term Typically Offered: F

Prerequisite: PHYS 133; and MATH 304 or PHYS 320.

Electric and magnetic field theory using vector analysis. Electric fields, dielectric materials, magnetic fields, induced emf, magnetic materials, Maxwell's equations, wave equation. 4 lectures.

PHYS 409. Electromagnetic Fields and Waves II. 3 units

Term Typically Offered: W

Prerequisite: PHYS 408. Recommended: PHYS 320 or PHYS 322.

Wave equation, plane electromagnetic waves, guided waves. Dipole radiation, radiation from an accelerated charge. Special relativity. 3 lectures.

PHYS 410. Physics of Solid Earth. 3 units

Term Typically Offered: W

Prerequisite: PHYS 133; MATH 241; and MATH 242 or MATH 244.

Gravity and the figure of the Earth. Body wave seismology, structure and composition of the Earth, heat flow and heat sources, Earth tides, rotational dynamics, the geomagnetic field and its source, paleomagnetism. 3 lectures.

PHYS 418. Introduction to General Relativity. 3 units

Term Typically Offered: SP

Prerequisite: PHYS 211; and PHYS 302 or PHYS 305.

Introduction to Einstein's theory of gravity: general relativity. Geometric description of special relativity as flat spacetime. Extension to curved spacetimes and description of gravity. Topics include solar system tests of relativity, black holes, gravitational waves, and applications to astronomy and cosmology. 3 lectures.

PHYS 422. Polymer Electronics Laboratory. 1 unit

Term Typically Offered: SP

Prerequisite: EE 347 or MATE 340 or CHEM 319 or PHYS 340.

Experimental procedures in polymer electronics. Investigation of the characteristics of a polymer electronic device. 1 laboratory. Crosslisted as EE/PHYS 422.

PHYS 423. Advanced Optics. 4 units

Term Typically Offered: SP

Prerequisite: PHYS 323.

Advanced topics of modern optics. May include: fiber optics, Fourier optics, quantum optics, lasers, holography, non-linear optics. 3 lectures, 1 laboratory.

PHYS 425. Solid State Physics. 3 units

Term Typically Offered: F

Prerequisite: PHYS 211; and MATH 242 or MATH 244.

Physics of solids including the structural, mechanical, thermal, and electronic properties, energy band theory and the properties of metals and semiconductors. 3 lectures.

PHYS 426. Solid State Physics Laboratory. 1 unit

Term Typically Offered: SP

Prerequisite or concurrent: PHYS 412 or PHYS 425.

Selected experiments on X-ray diffraction, Hall effect, optical absorption, thermo-electric effect, photovoltaic cells, diode characteristics, and superconductivity. 1 laboratory.

PHYS 427. Advanced Topics in Solid State Physics. 3 units

Term Typically Offered: SP
Prerequisite: PHYS 412 or PHYS 425.

Semiconducting devices, including junction and field-effect transistors, LED's, and diode lasers. Magnetic properties of solids. Superconductivity, including discussion of high-temperature superconductors. Other topics of current interest in solid state physics. 3 lectures. Formerly PHYS 413.

PHYS 428. Nonlinear Dynamical Systems. 4 units

Term Typically Offered: SP
Prerequisite: PHYS 122, PHYS 132, or PHYS 142; and PHYS 123, PHYS 133, or PHYS 143; and MATH 241; and MATH 242 or MATH 244.
Recommended: Junior standing.

Analysis of linear and nonlinear dynamical systems with emphasis on geometrical methods and visualization techniques. Fixed points, phase plane analysis, bifurcations and limit cycles. Laboratory component includes data acquisition and analysis using computers, numerical simulations of dynamical systems, and analysis of discrete systems. 3 lectures, 1 laboratory.

PHYS 461. Senior Project I. 2 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Consent of instructor.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 60 hours total time.

PHYS 462. Senior Project II. 2 units

Term Typically Offered: F,W,SP,SU
Prerequisite: Consent of instructor.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 60 hours total time.

PHYS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

PHYS 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD
Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

PHYS 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Total credit limited to 12 units; major credit limited to 2 units. Credit/No Credit grading only.

PHYS 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD
CR/NC
Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Total credit limited to 12 units; major credit limited to 2 units. Credit/No Credit grading only.

Political Science (POLS)

undefined

POLS Courses

POLS 111. California Constitution and Government. 1 unit

Term Typically Offered: F, W, SP
Basic aspects of California state government. Satisfies GE D1 for students who have passed both AP US Government and US History exams, or transfer students who have received advice in writing from the Office of the Registrar to take POLS 111. Course may be offered in classroom-based or hybrid format. 1 lecture.

POLS 112. American and California Government. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: GE Area D1
2019-20 or earlier catalog: GE Area D1
Study of U.S. and California government institutions, politics, issues and political behavior. Constitutional, historical, social, economic, and cultural perspectives. Relationships to social, economic, and political inequality, and unequal treatment of historically marginalized groups and efforts to address unequal treatment. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area D1.

POLS 180. Political Inquiry. 4 units

Term Typically Offered: F, W, SP
Introduction to the scope, language, concepts and approaches employed in political science and the social sciences. Includes emphasis on basic methodological and research strategies for assessing political issues, and an overview of the subfields of political science. Course may be offered in classroom-based or online format. 4 lectures.

POLS 225. Introduction to International Relations. 4 units

Term Typically Offered: F, W
Introduction to the basic concepts, issues, and theories surrounding the study of international politics. Changes in the nature of conflict, power, and national interests in the post-Cold War era. Role of states, non-governmental actors, and international organizations in the global arena. Course may be offered in classroom-based or online format. 4 lectures.

POLS 229. Introduction to Comparative Politics. 4 units

Term Typically Offered: F, SP

Introduction to basic concepts, issues, methodology, and theories in comparative politics. Major issues/theories include electoral laws and party systems, parliamentary and presidential institutions, socialization, democratization, corporatism and pluralism, religious and cultural impacts on politics. Topics explored through politics of countries and regions throughout the world. Course may be offered in classroom-based or online format. 4 lectures.

POLS 230. Basic Concepts of Political Thought. 4 units

Term Typically Offered: F, SP

Introduction to political theory. Focuses on concepts like: authority, liberty, equality, law, justice, community, rights, citizenship, property, class conflict, and constitutionalism. Readings from major thinkers, such as Plato, Aristotle, Augustine, Aquinas, Machiavelli, Locke, Hobbes, Rousseau, Marx, Nietzsche, Rawls, and others. Course may be offered in classroom-based or online format. 4 lectures.

POLS 245. Judicial Process. 4 units

Term Typically Offered: F, W, SP

The nature of the legal system. Topics may include: private and public law, civil and criminal law, trial and appellate courts, criminal procedure, judges, attorneys, and juries. Course may be offered in classroom-based or online format. 4 lectures.

POLS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

POLS 285. Model United Nations. 4 units

Term Typically Offered: F

Prerequisite: One course in POLS or consent of instructor.

Introduction to the United Nations and major issues that confront it. Preparation for participation in collegiate Model United Nations conferences. Rules of procedure and debate, preparation of country position papers, and resolution writing. 4 lectures.

POLS 295. Foundations of Mock Trial. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area D1 and consent of instructor.

Introduction to evidence, trial procedure, objections, and witness examination. Preparation for intercollegiate mock trial competitions (held in winter and spring). Extensive hands-on experience in researching, preparing, and arguing a legal case. 4 lectures.

POLS 308. Political Violence and Conflict Resolution. 4 units

Term Typically Offered: SP

Prerequisite: POLS 225 or POLS 229.

Causes, methods, and consequences of non-state groups that use violent means to pursue revolutionary, separatist, or ideological goals both domestically and internationally. Dynamics of ethnic conflict, terrorist movements, paramilitary groups, insurgencies, and narco-trafficking. Processes of conflict resolution in divided societies through military responses, negotiated settlements, democracy, and peacekeeping missions. Course may be offered in classroom-based or online format. 4 lectures.

POLS 310. The Politics of Race, Class, Gender and Sexuality. 4 units

Term Typically Offered: W

USCP

Prerequisite: Completion of Area D1. Recommended: POLS 112.

The social construction of gender, race, ethnicity, class and sexuality as analytical concepts and social locations. Using a variety of sources - political essays, critical theory, and memoir - the course analyzes how gender, race, ethnicity, class, and sexuality are shaped by social, cultural, and political contexts. 4 lectures. Fulfills USCP.

POLS 315. The American Presidency. 4 units

Term Typically Offered: F

Prerequisite: Completion of Area D1. Recommended: POLS 112.

Nature and problems of contemporary presidential leadership emphasizing the impact of Congress, bureaucracy, public opinion, the courts, non-governmental factors, and the party system upon presidential power. 4 lectures.

POLS 316. Political Participation. 4 units

Term Typically Offered: F

Prerequisite: Completion of Area D1. Recommended: POLS 112.

Role of political participation as manifested through social, psychological, and institutional constraints. Analysis of consensus and conflict in present day political participation as reflected in electoral, protest, and related behavior. 4 lectures.

POLS 317. Campaigns and Elections. 4 units

Term Typically Offered: SP

Prerequisite: Completion of Area D1. Recommended: POLS 112.

Focus on contemporary political campaigns and elections in the U.S. Campaign management, message development and delivery. Impact of political ideology, mass media, technology, pressure groups on electoral outcomes. 4 lectures.

POLS 319. United States Congress. 4 units

Term Typically Offered: W

Prerequisite: Completion of Area D1. Recommended: POLS 112.

Congressional elections and their effects on congressional actions, including the organization, procedures and consequences of the legislative process in Congress. 4 lectures.

POLS 321. Comparative Political Culture. 4 units

Term Typically Offered: SP

Prerequisite: POLS 229.

Survey of major concepts and theories of political culture and relationships among culture, politics, and society. Cultural influences of Christianity, Confucianism, Islam, and contemporary democratic, civic culture. The role of political culture in the industrialization process and post-colonial and post-communist transitions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

POLS 324. International Relations Theory. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 225 or POLS 229.

Survey of theoretical approaches to the study of international political processes and issues, including foreign policies, global political issues, cooperation and conflict. Analyses of selected problems to elucidate differences between realist, liberal, socialist, constructivist, and other theories. 4 lectures.

POLS 325. Global Political Issues. 4 units

Term Typically Offered: F, W
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Concepts and theories in international relations and contemporary global issues. Application of principles of international relations to political issues and subjects which affect our lives. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

POLS 328. Politics of Developing Areas. 4 units

Term Typically Offered: W
Prerequisite: POLS 225 or POLS 229.

A detailed survey of the domestic politics of developing countries from a comparative perspective. Assessment of theories of development with appropriate examples taken from particular areas and countries. Repeatable to 8 units with different subtitles (e.g., 'Latin America,' 'East Asia,' 'Africa'). The Class Schedule will list topic selected. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

POLS 329. Ancient and Medieval Political Thought. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 230.

Political theory from ancient Greece, ancient Rome, and the Medieval period. Readings from major authors, such as Plato, Aristotle, Augustine, Aquinas, and others. 4 lectures.

POLS 330. Modern Political Thought. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 230.

Theories of political participation and the relationship between the individual and the state as developed in the works of influential thinkers such as Locke, Rousseau, Mill and Marx. 4 lectures.

POLS 331. Contemporary Political Thought. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 230.

Ideas of major contemporary political thinkers, such as Wolff, Singer, Rawls, Strauss, MacKinnon, Beauvoir, Dewey, Walzer and others in historical context, compared and contrasted. 4 lectures.

POLS 332. World Food Systems. 4 units

Term Typically Offered: SP
Sustainability Focused
Prerequisite: Junior standing.

Integrated, interdisciplinary study of the technologies of global food production, environmental and social issues related to the application of those technologies, and moral and ethical issues associated with global food production and distribution. Emphasis on the politics of change. Course may be offered in classroom-based or online format. 4 lectures.

POLS 334. Jurisprudence. 4 units

Term Typically Offered: TBD
Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Normative and analytical problems concerning law. Nature of law and legal systems including liberty and justice. Topics may include the connection between law and morality, feminist and critical race perspectives, crime and punishment, and economic analysis of the law. Course may be offered in classroom-based or online format. 4 lectures.

POLS 337. U.S. and China in the Contemporary World. 4 units

Term Typically Offered: TBD
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Investigation of China's political history with close attention to past and present U.S.-China relations. Topics include the conflict over Taiwan, territorial disputes in the South China Sea, and ongoing economic cooperation and competition, concerning trade and debt. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

POLS 338. Critical Issues in American Politics. 4 units

Term Typically Offered: W, SP
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1. Recommended: POLS 112 (GE Area D1).

Examination of significant social, legal, economic and political issues that face the country and how the basic institutions of government-national, state, local-are responding to them; assessment of policies to correct these problems. 4 lectures. Crosslisted as HNRS/POLS 338. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

POLS 339. Authoritarian and Democratic Rule. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

A comparative examination of governing institutions used throughout the world. Emphasis on the diversity of governmental designs found within both authoritarian and democratic regimes. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

POLS 340. American Judicial Politics. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Empirical aspects of the decision making of federal and state courts, with an emphasis on understanding how interactions between the courts and other political factors shape judicial behavior. 4 lectures.

POLS 341. American Constitutional Law. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

United States Supreme Court decisions in the areas of separation of powers, judicial review, commerce clause, federalism, due process. Course may be offered in classroom-based or online format. 4 lectures.

POLS 342. Constitutional Theory. 4 units

Term Typically Offered: W

Prerequisite: POLS 245. Recommended: POLS 112 or POLS 341.

Competing theories of constitutional interpretation. Emphasis on the conflict between judicial review and democracy, effects of political events on constitutional evolution, merits of different approaches to constructing constitutional meaning. 4 lectures.

POLS 343. Civil Rights in America. 4 units

Term Typically Offered: F, W, SP

USCP

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Case-based examination of discrimination based on race, ethnic, gender, and sexual orientation in the United States. Emphasis on the Supreme Court's interpretation of the Equal Protection Clause. Course may be offered in classroom-based or online format. 4 lectures. Fulfills USCP.

POLS 344. Civil Liberties. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Role of Supreme Court as interpreter of civil liberties. Topics may include freedom of expression and religion, search and seizure, due process of law. Course may be offered in classroom-based or online format. 4 lectures.

POLS 347. Politics and Popular Culture. 4 units

Term Typically Offered: TBD

Prerequisite: POLS 112.

Intersection of politics and mass media. How political actors use popular culture to establish issue agendas, convey political concepts, symbolism, rhetoric and values. 4 lectures.

POLS 348. Early American Political Thought. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); completion of GE Area D1; and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs). Recommended: POLS 112 (GE Area D1).

The central political ideas of America's leading thinkers from the arrival of the Mayflower to the Civil War. Selections may include readings of American political ideas from Winthrop, Paine, Publius, Hamilton, de Tocqueville, Douglass, Calhoun, Thoreau, and Lincoln, among others. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

POLS 349. Contemporary American Political Thought. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area D1. Recommended: POLS 112 (GE Area D1).

The central political ideas of America's leading thinkers from the Civil War to the present. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

POLS 351. Public Policy and Administration. 4 units

Term Typically Offered: F, W

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Systematic and critical approach to evaluating and designing public policies and the development of management functions in government. Attention given to intergovernmental relations and case studies in economic development, health, the environment, and other policy areas. Course may be offered in classroom-based or online format. 4 lectures.

POLS 359. Research Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: STAT 217.

Methodology and research design used in qualitative and quantitative analysis. Examination of multiple methods used to analyze political phenomena in the political science discipline. 4 lectures.

POLS 361. Data Analysis in Political Science. 4 units

Term Typically Offered: F, W, SP

Prerequisite: POLS 359.

Survey of data analysis in political science, up to and including multiple regression. Software instruction to facilitate understanding of quantitative approaches to political research. 4 lectures.

POLS 375. California Politics. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE D1. Recommended: POLS 112.

Political culture, processes, behavior, institutions, public policy and distribution of power in California state and substate governments. 4 lectures.

POLS 380. Religion and Politics in the Israeli-Palestinian Conflict. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area A with grades of C- or better.

Recommended: Completion of one class in POLS or RELS.

The root causes of the Israeli-Palestinian conflict and its current manifestation. Possibilities for solutions from the perspectives of religious studies and political science. 4 lectures. Crosslisted as POLS/RELS 380.

POLS 381. Peace and War. 4 units

Term Typically Offered: SP

Prerequisite: POLS 225 or POLS 229.

Dynamics of interstate peace and war. Topics include: military strategy, the military-industrial complex, arms races and disarmament, diplomacy, deterrence and pre-emption, collective security and alliance behavior, civil-military relations, post-conflict reconstruction, and the role of international law and organizations. 4 lectures.

POLS 382. Comparative Foreign Policy. 4 units

Term Typically Offered: TBD

Prerequisite: POLS 225 or POLS 229.

Systematic analysis of the international and domestic pressures leading different states to take particular foreign policy stances, with appropriate examples taken from different regions of the world. Discussion of contemporary foreign policy issues and responses. 4 lectures.

POLS 383. Politics of the European Union. 4 units

Term Typically Offered: TBD

Prerequisite: POLS 225 or POLS 229.

History and development of the European Union in the context of theories of regional integration. Overview of institutional and policymaking machinery of the EU. Current issues facing member states. Impact of EU on US interests and world politics more generally. 4 lectures.

POLS 384. Comparative Law. 4 units

Term Typically Offered: TBD

Prerequisite: POLS 225 or POLS 229.

Survey of cultural, historic, institutional, and social contexts of legal traditions. Emphasis on comparing western common and code law to Confucian, Islamic, indigenous and other nonwestern societies. Comparative topics may include prison reform, property rights, constitutional law, international law, rule of law, and the judicialization of politics. Course may be offered in classroom-based or online format. 4 lectures.

POLS 385. Advanced Model United Nations. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: POLS 285.

Preparation for participation in collegiate Model United Nations conferences. Rules of procedure and debate, preparation of country position papers, and resolution writing. Discussion of current issues of concern to the United Nations. Credit/No Credit grading only. Total credit limited to 6 units. 2 lectures.

POLS 386. Government Internship. 2-12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Consent of instructor. Recommended: Junior standing with a minimum 2.5 GPA.

Supervised work experience in a government or related public agency. Intern will function as an employee subject to all the duties and responsibilities of employees engaged in comparable work. 30 hours of work experience per unit of credit. Total credit limited to 12 units. Credit/No Credit grading.

POLS 387. Research Internship. 1-8 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: POLS 359 and POLS 361.

Faculty-supervised research experience on various topics related to politics and government. Student research assistantship with a faculty member engaging in a research project. Total credit limited to 8 units. Credit/No Credit grading only.

POLS 395. Advanced Mock Trial. 2 units

Term Typically Offered: W

CR/NC

Prerequisite: Consent of instructor.

Advanced preparation for participation in intercollegiate mock trial competitions. Emphasis on advanced topics and techniques related to evidence, trial procedure, objections, and witness examination. Extensive hands-on practice in arguing a legal case. Credit/No Credit grading only. Total credit limited to 4 units. 2 lectures.

POLS 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, study, or survey of selected problems. Total credit limited to 8 units.

POLS 417. Feminist Legal Theory. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Different approaches to US feminist legal theory and topics in gender and US law. Topics covered include employment, domestic violence, sexual harassment, reproductive justice, sex work, rape, and welfare reform. 4 seminars. Crosslisted as POLS/WGQS 417. Formerly WGS 417.

POLS 419. Social Movements and Political Protest. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Selected U.S. social movements, including abolitionism, feminism, civil rights, gay rights, the Christian right, and environmentalism. Political opportunities and constraints that impact collective political action, and effects of grassroots struggles for justice in U.S. politics and society. 4 lectures.

POLS 420. Contemporary U.S. Foreign Policy. 4 units

Term Typically Offered: W
Prerequisite: POLS 225 or POLS 229.

Historical influences and theoretical assumptions behind U.S. foreign policy. Examination of American power and influence, examining key concepts from public opinion, business interests, executive privilege, diplomacy, propaganda, trade, and military strategies. 4 lectures.

POLS 425. Comparative Political Corruption. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 112 and POLS 229.

Examination of the causes and effects of corruption in the United States and around the world, and the problems corruption causes in different societies. Particular attention will be placed on the role of political and social institutions. 4 seminars.

POLS 426. International Organizations and Law. 4 units

Term Typically Offered: W
Prerequisite: POLS 225 or POLS 229.

Analysis of contemporary international legal issues, such as arms control and nonproliferation, intellectual property rights and the World Trade Organization, and human rights and the United Nations. Case studies drawn from advancements in the biological sciences, such as those affecting public health. 4 lectures.

POLS 427. Politics of the Global Economy. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 225 and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Political conflicts surrounding the trading, financial, and security structures of the international economy. Motivations, resources, and responses of states, international organizations, multinational corporations and other nonstate actors as they address economic, political, environmental, and security issues within these structures. Desirability and inevitability of globalization. 3 lectures and a research paper.

POLS 428. Issues and Topics in Comparative Politics. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 229.

Selected topics and issues in the field of comparative politics. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

POLS 429. Issues and Topics in International Relations. 4 units

Term Typically Offered: W
Prerequisite: POLS 225.

Selected topics and issues in the field of international relations. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

POLS 430. Advanced Topics in Political Theory. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 230.

In-depth examination of a theme or thinker in political theory. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

POLS 431. Issues and Topics in American Politics. 4 units

Term Typically Offered: TBD
Prerequisite: POLS 112 and junior standing.

Selected topics and issues in the field of American politics. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

POLS 435. Political Communication. 4 units

Term Typically Offered: SP
Prerequisite: POLS 112 and Junior standing.

Introduction to political communication. Concepts, theories and methods from areas such as communication, media studies, journalism, political science, and public policy. How language and non-verbal communication used by the media, government, and other actors shapes public perception of and behavior in the social, political, and scientific world. 4 lectures.

POLS 440. California Student Bill Project. 2 units

Term Typically Offered: TBD
Prerequisite: POLS 112 and consent of instructor. Recommended: POLS 375.

Experiential, project-based course where students will draft a bill and work to move it through the California Legislature toward becoming law. Field trip may be required. Total credit limited to 6 units. 2 seminars.

POLS 445. Voting Rights and Representation. 4 units

Term Typically Offered: W
USCP
Prerequisite: POLS 112.

Philosophical, legal, and behavioral analysis of electoral representation; the 1965 Voting Rights Act; vote dilution; racial and partisan discrimination; voter identification and voter suppression. Similarities and differences across and within racial/ethnic/political groups in the US with regards to effective representation. 4 lectures. Fulfills USCP.

POLS 451. Technology and Public Policy. 4 units

Term Typically Offered: W
Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Exploration of the historical and contemporary political influences shaping modern science and technology policy. Addresses sources of technological innovation, such as public-private partnerships, military R & D, democratic governance, and competitiveness among industrialized nations. Case studies may include cybersecurity, geoenvironment, nanotechnology, and neurosciences. 4 seminars.

POLS 452. Technology and International Development. 4 units

Term Typically Offered: F
Prerequisite: One course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Examines potential for advanced technologies to support international development from political and social science perspective. Reviews historical efforts toward and socio-economic contexts of global development. Analyzes current applications of advanced technology for sustainable development, democracy-building, education, healthcare, and policy reform. 4 seminars.

POLS 455. Grant Writing. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing and POLS 112.

Provides instruction in writing grants, evaluating grant proposals, and in researching and cultivating funding sources while considering organizational mission and program development. 4 lectures.

POLS 457. U.S. Reproductive Politics. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Multi-disciplinary approach to the study of the law and politics of reproduction in the United States. Topics studied include histories of reproductive regulation, abortion law and politics, technology and fertility, and social policy and reproductive control. 4 seminars. Crosslisted as POLS/WGQS 457. Formerly WGS 457.

POLS 459. The Politics of Poverty. 4 units

Term Typically Offered: F

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Analysis of the politics and policies associated with the American welfare state, focusing on welfare and homelessness policies. Exploration of the causes of poverty and how social policy responds to poverty. 4 lectures.

POLS 461. Senior Project I. 2 units

Term Typically Offered: F, W, SP

Prerequisite: POLS 359, POLS 361, and senior standing.

Selection and completion of a project under faculty supervision. Project results presented in a formal paper.

POLS 462. Senior Project II. 2 units

Term Typically Offered: F, W, SP

Prerequisite: POLS 359, POLS 361, and senior standing.

Selection and completion of a project under faculty supervision. Project results presented in a formal paper.

POLS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: POLS 112 and junior standing.

Directed courses on timely issues and topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 lectures.

POLS 471. Urban Politics. 4 units

Term Typically Offered: W

Prerequisite: POLS 112.

Theoretical approaches, concepts, and politics associated with urban governments. Urban power structures, the relationship between urban society and politics, and inter-governmental relations. 3 lectures and a research paper.

POLS 500. Independent Study. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing with minimum of 12 units.

Individual research, studies, or surveys under the supervision of the faculty. Total credit limited to 4 units.

POLS 510. Research Design. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

Approaches to policy research, question development, hypothesis framing, literature reviews, sampling, measurement, and approaches to analysis. 4 lectures.

POLS 515. Public Policy. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing, or consent of instructor.

Theoretical and practical approaches to public policy making and contemporary policy issues such as markets; regulation; criminal justice; housing; environment; poverty; health care and education. 4 lectures.

POLS 518. Public Policy Analysis. 5 units

Term Typically Offered: W

Prerequisite: Graduate standing or consent of instructor.

Contextual, problem oriented analysis of the societal problems and possible solutions to them. Development and use of concepts and tools related to policy evaluation with particular emphasis on qualitative methods. 4 lectures, 1 activity.

POLS 540. Leadership and Management in Public Policy. 2 units

Term Typically Offered: SP

CR/NC

Prerequisite: Graduate standing or consent of instructor.

An exploration of the changing notion of leadership in public policy. Focus on understanding and developing leadership capacity within the complex inter-organizational structure in which the student works. Credit/No Credit grading only. 2 seminars.

POLS 550. Regulatory and Economic Policy. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Theories of regulatory and economic policy, including markets and market failures, politics of economic policy, and applications of government regulatory and economic policy, and skills and experience necessary to social and economic questions. 4 seminars.

POLS 560. Quantitative Methods. 5 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Social science methodology focusing on research design and quantitative methods used in policy and political research, such as multi-regression, non-linear techniques, diagnostics and time series. Advanced computer packages used to analyze challenging data sets. 4 lectures, 1 activity.

POLS 568. Topics and Issues in Public Policy. 4 units

Term Typically Offered: TBD

Prerequisite: POLS 515 or consent of instructor.

Selected advanced topics applicable to public policy problems. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 seminars and a research project.

POLS 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

POLS 586. Policy Internship. 4-8 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Completion of 12 units in the Master of Public Policy Program, and consent of instructor.

Supervised work experience in a government or related public agency. Intern will function as an employee engaged in comparable work. Credit/No Credit grading only. Total credit limited to 8 units.

POLS 590. Graduate Seminar. 4 units

Term Typically Offered: F, W

Prerequisite: POLS 560 or consent of instructor.

Seminar designed as a culminating component to the Master of Public Policy Program. Individual research under the supervision of the faculty within a small discussion environment, leading to a graduate project or paper that demonstrates practical mastery of the MPP curriculum. Total credit limited to 8 units. 4 seminars.

POLS 595. Directed Readings for MPP Comprehensive Exams. 2 units

Term Typically Offered: SP

CR/NC

Prerequisite: POLS 590.

Directed readings and preparation for Master of Public Policy (MPP) comprehensive exams. Regular consultation between advisor and student. Credit/No Credit grading only. 2 seminars.

Psychology (PSY)

undefined

PSY Courses

PSY 102. Orientation to the Psychology Major. 2 units

Term Typically Offered: F

Prerequisite: Psychology major.

Orientation to the psychology major and psychology as a career. Introduction to requirements of the major, available resources, strategies for academic success, and career options in psychology and related fields. Course may be offered in classroom-based or online format. 2 lectures.

PSY 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202 and consent of department head.

Individual investigation, research, study or survey of selected problems in consultation and with prior approval of instructor. Written report required. Total credit limited to 4 units.

PSY 201. General Psychology. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Introduction to the psychological study of human beings. Applications and research in areas such as psychobiology, perception, learning, motivation, consciousness, memory and cognition, personality, emotion, development, psychological assessment, social behavior, psychopathology and psychotherapy. A student may enroll for credit in either PSY 201 or PSY 202, but not both. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

PSY 202. General Psychology. 4 units

Term Typically Offered: F, W

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Introduction to the psychological study of human beings. Applications and research in areas such as psychobiology, perception, learning, motivation, consciousness, memory and cognition, personality, emotion, development, psychological assessment, social behavior, psychopathology and psychotherapy. A student may enroll for credit in either PSY 201 or PSY 202, but not both. 3 lectures, 1 discussion. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

PSY 251. Laboratory in Group Activities. 1-3 units

Term Typically Offered: TBD

CR/NC

Skills and techniques of solving problems in large and small groups. Conducting and reporting meetings. Analyses of leadership dynamics in campus organizations. Credit/No Credit grading only. Total credit limited to 6 units. 1-3 activities.

PSY 252. Social Psychology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

How attitudes, beliefs, and behavior are affected by the social situation. Gender roles, prejudice, aggression, altruism, attitudes and persuasion, liking and loving, and group behavior. Use of social psychology to understand diversity issues, reduce racism and sexism and international conflict, improve relationships, and communicate persuasively. 4 lectures.

PSY 254. Family Psychology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

Introduction to research and theory on family relationships and behavior across the lifespan. Contextual influences, diversity of family forms, and topics such as love, mate selection, marital quality, parenting, gender, household work, divorce, and remarriage. 4 lectures. Crosslisted as CD/PSY 254.

PSY 256. Developmental Psychology. 4 units

Term Typically Offered: F, W

Prerequisite: PSY 201 or PSY 202.

Introduction to the scientific study of development with emphasis on the lifespan, from infancy to old age. Basic research and concepts in understanding social, emotional, cognitive, contextual, and diversity influences on development. 4 lectures. Crosslisted as CD/PSY 256.

PSY 260. African American Psychology. 4 units

Term Typically Offered: TBD

USCP

Recommended: PSY 201 or PSY 202.

A historical overview of African American psychology, and a critical examination of the psychocultural forces (e.g., history of slavery, racism, oppression, education, familial factors) that have helped to shape the beliefs, attitudes, identities, behavior, and well-being of African Americans.

PSY 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

PSY 301. Psychology of Personal Development. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202.

Application of developmental psychology to self awareness. Includes communication skills, self modification skills and examination of life goals and values. 4 lectures.

PSY 302. Behavior in Organizations. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

Characteristics of functioning organizations and their effects on individuals. Psychological issues relevant to the maintenance of the organization. Motivation, leadership, group phenomena, communication, decision-making, attitudes, personnel selection and organizational change. 4 lectures.

PSY 304. Intergroup Dialogues. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D or GE Area E. Recommended: Completion of USCP requirement.

Weekly meetings of students from two distinct self-defined identity groups, with trained peer facilitators, in which readings, experiential activities, informed dialogue, and reflective writing are integrated as a means of encouraging self and group awareness and exploring ways to promote just community across difference. Supplemented by weekly lecture/discussions. 2 lectures, 2 discussions. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

PSY 305. Personality. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

Personality theories and research. Assessment, dynamics, and development of personality. Trait, behavioral, social learning, cognitive, humanistic, psychoanalytic and biological approaches. 4 lectures.

PSY 306. Adolescence. 4 units

Term Typically Offered: F, W, SP

Prerequisite: CD/PSY 256 or CD/EDUC 207.

Psychological analysis of the years from prepubescence to young adulthood. Current research on behavior and development during adolescence with emphasis on physical, affective, cognitive, sociocultural, historical, family, peer and school aspects of life during the post-child, pre-adult years. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as CD/PSY 306.

PSY 310. Psychology of Death. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202.

Psychological aspects of death, loss and grief, including scientific findings, person-culture transactions and expressions in the arts and humanities. Personal exploration and interdisciplinary application of psychology to issues such as death anxiety, dying processes, funerals, immortality beliefs, suicide, and grieving. 4 lectures.

PSY 311. Environmental Psychology. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Interrelationship between behavior and the built and natural environments. Evaluating and understanding environments, environmental stress, and the human aspects of environmental problems. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

PSY 318. Psychology of Aging. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or Psychology major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: PSY 201 or PSY 202.

Psychological and physiological aging in the context of the culture. Theories and research relating to the issues of stability and both positive and negative changes in perception, learning, memory, intelligence, personality, identity, motivation, sexuality, family relationships, career. Disorders, institutionalization, death and bereavement. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

PSY 320. Health Psychology. 4 units

Term Typically Offered: F, SP

Prerequisite: PSY 201 or PSY 202.

Scientific study of how mental, behavioral, and social processes affect physical health. Topics include health-risk behaviors and promotion of personal control over health improvement, social status and health disparities, stress and coping, and the patient-provider relationship. 4 lectures.

PSY 323. The Helping Relationship. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing, completion of one USCP course, Psychology and Child Development majors only, or consent of instructor.

Basic skills and approaches common to helping relationships with children, adults, and families. Examines theoretical, empirical, and practical applications of helping. Differentiation between professional, paraprofessional, and nonprofessional helping relationships. 2 lectures, 2 activities.

PSY 324. Psychology of Gender. 4 units

Term Typically Offered: W

Prerequisite: PSY 201 or PSY 202.

Investigation of psychological genders and sexualities beyond ideas associated with biological sex. Exploration of sex/gender/sexuality differences from a social psychological (e.g., socialization) perspective. Implications of gender roles (including masculinity, femininity, non-binary) and sexual identities for relationships and health. 4 lectures. Crosslisted as PSY/WGQS 324. Formerly WGS 324.

PSY 325. Introduction to Positive Psychology. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202.

Scientific study of the enhancement of strengths and optimal functioning in humans. Basic research, assessment and helping concepts in understanding optimal functioning within diverse populations. 4 lectures.

PSY 329. Research Methods in Psychology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202; and STAT 217.

Introduction to research methods used in psychology and other behavioral sciences. Topics include the logic and ethics of research; experimental, correlational, and survey methodology; library search strategies; basic statistical procedures; and the format of the research report. 4 lectures.

PSY 330. Behavioral Effects of Psychoactive Drugs. 4 units

Term Typically Offered: W, SP

Prerequisite: Completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Pharmacokinetic, pharmacodynamic and behavioral effects of psychoactive drugs. Social and psychological issues related to drug use and misuse. 4 lectures.

PSY 333. Quantitative Research Methods for the Behavioral Sciences. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 329; and STAT 217.

Thorough introduction to the quantitative aspects of empirical research. Using SPSS statistical software, students will learn how to choose, conduct, and interpret analyses of research data from different behavioral science disciplines. 3 lectures, 1 activity.

PSY 340. Biopsychology. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and PSY 201 or PSY 202.

Relationship between physiological and behavioral processes such as learning and memory, language, sleep, and abnormal behavior. Information processing, biochemistry, and structural organization at the cellular and nervous system levels. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

PSY 344. Behavioral Genetics. 4 units

Term Typically Offered: F, W

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); PSY 201 or PSY 202; STAT 217 or STAT 218; and one of the following: ASCI 112, BIO 111, BIO 123, BIO 161, or BIO 213.

Examine the relative influence of genetic and environmental factors on human behavior. Emphasis on the foundation and application of behavioral genetics to the field of psychology. Topics include heritability, gene-environment interplay, ethics, and emerging technologies. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

PSY 350. Teamwork. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

Group dynamics applied to teams. Topics include team development, basic team processes, conflict management, decision making, leadership, problem solving, and the impacts of diversity and culture on teams. Focus on effective use of teams in the workplace. Not open to students with credit for PSY 351. 4 lectures.

PSY 352. Conflict Resolution: Violent and Nonviolent. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing or Psychology major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: PSY 201 or PSY 202.

Psychological, situational, political, and cultural determinants of violence and nonviolence in interpersonal, intergroup, and international conflict.

Self-assessment of conflict resolution attitudes, competencies, and behaviors. Negotiation, mediation, and other approaches to conflict management. Educational and structural approaches to violence prevention. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

PSY 356. Behavioral Disorders in Childhood. 4 units

Term Typically Offered: F, SP

Prerequisite: PSY 201 or PSY 202; CD/PSY 256 or CD 305; and junior standing.

Applications of psychological principles to childhood behavioral disorders. Aggression, delinquency, stress reactions, motivational, perceptual-attentional deficiencies, psychoses, anxiety disorders, biological dysfunctions, and social, emotional and intellectual disabilities. Course may be offered in classroom-based or online format. 4 seminars. Crosslisted as CD/PSY 356. Formerly CD 456.

PSY 357. Cognition. 4 units

Term Typically Offered: W, SP

Prerequisite: PSY 201 or PSY 202.

Principles and theories of cognition including models of perception, attention, memory, concept formation, language, intelligence, problem-solving/decision making, and creativity. Discusses applications to areas such as artificial intelligence, education, and implications for understanding related fields in arts, sciences, and technology. 4 lectures. Formerly PSY 457.

PSY 360. Applied Social Psychology. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: PSY 252.

Applications of social psychology to education, business and industry, environmental problems, interpersonal and intergroup relations, health and welfare, mass communication, judicial systems, and politics. Analysis of social and organizational problems, methods of intervention, and program evaluation. 4 seminars.

PSY 370. Introduction to Clinical and Counseling Psychology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202 and at least one other PSY course.

Introduction to the fields of clinical and counseling psychology. History, education and training, theories, assessment, diagnosis, and treatment. Introduction to diverse settings, ethical principles, legal guidelines, credentialing and employment opportunities. 4 lectures.

PSY 372. Multicultural Psychology. 4 units

Term Typically Offered: F, W, SP

USCP

Prerequisite: PSY 201 or PSY 202; and sophomore standing.

The impact of culture, ethnicity, and race on human behavior within the framework of psychological theory and research. Emphasis on ethnic minority groups within the U.S. including: African Americans, Native Americans, Asian Americans/Pacific Islanders, and Latino/a Americans. Not open to students in MS Psychology program. 4 seminars.

PSY 375. Forensic Psychology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

Application and practice of psychology in both the civil and criminal justice systems. Examination of police and investigative psychology, correctional psychology, expert witness testimony, psychological evaluations for the courts, understanding aggression. 4 lectures.

PSY 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202.

Individual investigation, research, study or survey of selected problems in consultation and with prior approval of instructor. Written report required. Total credit limited to 4 units.

PSY 401. Special Problems: Experiential Learning. 2-4 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Psychology major or gerontology minor, junior standing, and consent of instructor.

Supervised experience in various community, governmental, educational, or research settings. Especially designed for individuals in applied settings requiring additional hours or a pre-fieldwork training experience. Applied psychological, developmental, or educational experiences determined by participating institution, supervising faculty member, and student. Cannot be substituted for PSY 448, PSY 449, PSY 453, or PSY 454. Credit/No Credit grading only. Total credit limited to 4 units.

PSY 405. Abnormal Psychology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202.

Normal and abnormal behavior in everyday life. Anxiety, somatoform, dissociative, mood, childhood, personality, psychotic, cognitive, eating, and substance use disorders and their treatment. 4 lectures.

PSY 410. History and Systems of Psychology. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 333.

Survey of the philosophical and scientific roots of modern psychology, pioneer laboratories, systems, and schools of psychology, the refining of experimental methods, and applications of psychology in testing and psychological services. Examination of contributions by women and minorities in psychology. 4 seminars.

PSY 417. Interpersonal Relationships in Childhood and Adolescence. 4 units

Term Typically Offered: SP

Prerequisite: CD 304, CD 305 or CD 306; or CD/PSY 256 and PSY 305.

Current theories and research on the development of interpersonal relationships in childhood and adolescence. Topics may include parent-child relationships, peer relationships in childhood, intimate relationships in adolescence. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Crosslisted as CD/PSY 417.

PSY 419. Self and Identity. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 256 or PSY 305 and senior standing.

Concepts, theories, and research related to the development of the self across the lifespan. Examination of the influence of temperament, culture, individuation, self-esteem, self-awareness, roles and identity on maturity. 4 seminars.

PSY 430. Sensation and Perception. 4 units

Term Typically Offered: W, SP

Prerequisite: PSY 340.

Principles of sensory systems, psychophysics, attention and the perception of color, shape, movement, space, and time. Survey of the development of perception through the lifespan. 4 lectures.

PSY 431. Assessing Children's Development and Environments. 4 units

Term Typically Offered: TBD

Prerequisite: CD 304 or CD 305 or PSY 419 or PSY 420 or PSY 421; and CD 329 or PSY 329.

Current developmental and environmental assessments used in care and educational settings and in prevention programs and research. Practice using, creating, and evaluating child assessments. 3 lectures, 1 activity. Crosslisted as CD/PSY 431.

PSY 432. Psychological Testing. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 333.

Theory and practice of psychological measurement and testing. Principles of test construction, administration, and interpretation. Survey of common testing domains such as intelligence, scholastic aptitude and achievement, and personality. 4 lectures.

PSY 440. Memory. 4 units

Term Typically Offered: F, W

Prerequisite: PSY 201, PSY 202 or PSY 340.

Modern principles and theories of memory from a psychological and biological perspective. Discussion of different types of memory (e.g., short-term, episodic, semantic, implicit), variables that affect memory (e.g., emotion, stress, sleep), and real-life applications (e.g., disorders, eyewitness testimony). Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

PSY 448. Research Internship I. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing; PSY 329; Psychology and Child Development majors only; and consent of instructor.

Faculty-supervised research experience on various topics in psychology. Student apprenticeship with a department faculty member to conduct research. Responsibilities include some or all of the following: collecting data, entering and/or analyzing data, electronic literature search, report writing. Credit/No Credit grading only.

PSY 449. Research Internship II. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: PSY 329, PSY 333, Psychology and Child Development majors only, junior standing, and consent of instructor.

Faculty-supervised research experience on various topics in psychology. Student apprenticeship with a department faculty member to conduct research. Responsibilities include some or all of the following: collecting data, entering and/or analyzing data, electronic literature search, report writing. Credit/No Credit grading only.

PSY 450. Family Intervention. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 254, or graduate standing.

Basic elements of marriage and family therapy and crisis intervention. Emphasis on concepts, goals, and techniques of various family therapy approaches and family crisis intervention. 4 lectures.

PSY 453. Supervised Fieldwork I. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: PSY 323, Psychology and Child Development majors only, junior standing, and consent of instructor.

Supervised fieldwork experience in various community, governmental, and educational settings. Applied psychological, developmental, or educational experiences determined by participating institution, supervising faculty member, and student. Credit/No Credit grading only.

PSY 454. Supervised Field Work II. 5 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: PSY 323, Psychology and Child Development majors only, junior standing, and consent of instructor.

Supervised fieldwork experience in various community, governmental, and educational settings. Applied psychological, developmental, or educational experiences determined by participating institution, supervising faculty member, and student. Credit/No Credit grading only.

PSY 458. Learning. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 333.

Theoretical and philosophical foundations of the experimental analysis of behavior. Principles of classical and operant conditioning including aversive control of behavior through punishment and avoidance learning and the theoretical basis for behavior therapy techniques and applications of learning principles in education and health settings. 4 lectures.

PSY 460. Child Abuse and Neglect. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 201 or PSY 202 and junior standing.

Issues in child maltreatment, including definitions and forms, causes, consequences, assessment, reporting, treatment, and prevention. Possible links among research, intervention, and public policy will be emphasized. 4 seminars. Crosslisted as CD/PSY 460.

PSY 461. Senior Project Seminar. 2 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; PSY 329; Psychology and Child Development majors only.

Discussion of occupational and graduate school opportunities and current issues in psychology for the purpose of defining professional objectives and individual projects for PSY 462. Preparation for Senior Project by developing an annotated bibliography that will inform the organization and direction of their project. Course may be offered in classroom-based, online, or hybrid format. 2 seminars.

PSY 462. Senior Project. 2 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 461; Psychology and Child Development majors only.

Design and completion of a faculty-supervised project in psychology. The project must be presented in a formal, written report. Minimum of 60 hours total time.

PSY 465. Cross-Cultural International Psychology. 4 units

Term Typically Offered: TBD

Prerequisite: PSY 201 or PSY 202 and junior standing.

Psychological, cultural, ecological and behavioral influences on human development in different cultural settings. Focuses on from one to three different cultures outside the U.S. in any given quarter. 4 seminars.

PSY 470. Selected Advanced Topics. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing and consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 seminars.

PSY 475. The Social Psychology of Prejudice. 4 units

Term Typically Offered: SP

USCP

Prerequisite: PSY 252 or PSY 254 or PSY 256.

Examination of social psychological frameworks for understanding the origins and consequences of prejudice and ways to improve relationships between people who come from different social groups (e.g., race, ethnicity, class, age, sexual orientation, gender). 4 lectures. Fulfills USCP.

PSY 480. Cognitive Neuroscience. 4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 340.

Recent empirical and theoretical discoveries pertaining to the neural basis of cognition, including methodologies, applications, and controversies. Focus on reading and discussing research articles in the areas of perception, memory, language, decision making, executive function, neuroimaging, and more. 4 seminars.

PSY 485. Cooperative Education Experience. 6 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 6 units; total credit limited to 12 units. Credit/No Credit grading only.

PSY 495. Cooperative Education Experience. 12 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 6 units; total credit limited to 12 units. Credit/No Credit grading only.

PSY 500. Individual Study. 1-6 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head, graduate major advisor and supervising faculty member.

Advanced study planned and completed under the direction of a member of the department faculty. Open only to graduate students who have demonstrated ability to do independent work. Enrollment by petition. Only 6 units may be applied to degree requirements.

PSY 504. Psychopharmacology. 4 units

Term Typically Offered: SP

Prerequisite: Graduate standing or consent of instructor.

Advanced course in brain-behavior relationships. Neuropathology of brain disorders including the neurochemical etiology and treatment of mental illness and chemical dependency. 4 seminars.

PSY 520. Marriage & Family Therapy: Professional Identity, Theory and Practice. 4 units

Term Typically Offered: F

Prerequisite: enrollment in the M.S. in Psychology program.

History, development, and systemic foundations of the field of Marriage and Family Therapy. Major models and theories of family therapy with focus on the sociocultural contexts of defining healthy and dysfunctional dynamics, treatment goals, and associated approaches. Current issues relating to professional identity and functioning in the field. 4 seminars.

PSY 535. Child and Adolescent Psychopathology. 4 units

Term Typically Offered: F

Prerequisite: enrollment in the M.S. in Psychology program.

Etiological, assessment, diagnostic, and treatment models of child and adolescent disorders. Diagnostic and Statistical Manual of Mental Disorders. Genetic, neurobiological, environmental, and sociocultural factors of childhood disorders within a developmental perspective. Current theory, research, and practice emphasized. 4 seminars.

PSY 555. Counseling & Communication. 4 units

Term Typically Offered: W

Prerequisite: PSY 560 and admission to MS Psychology program.

Overview of the counseling profession, history, philosophy, theory, and ethics. Emphasis on developing interviewing, assessment and communication skills. 3 seminars, 1 activity.

PSY 556. Multicultural Counseling and Psychology. 4 units

Term Typically Offered: SP

Prerequisite: PSY 555, PSY 560 and admission to MS Psychology program.

Psychological, cultural, and ecological analysis of the experiences and histories of various cultural groups within the United States. Development of personal self-awareness of multicultural issues and culturally relevant counseling skills. 4 seminars.

PSY 560. Individual Therapy: Theory and Application. 4 units

Term Typically Offered: F

Prerequisite: Admission to MS Psychology program.

Counseling theories and concepts applied to individuals. Develop skills in interviewing, assessment, intervention selection, termination and crisis intervention. Ethics and law included. 4 seminars.

PSY 564. Ethics and the Law: MF Therapy. 4 units

Term Typically Offered: SU

Prerequisite: PSY 520; PSY 560; and admission to MS Psychology program.

Ethical, legal and case management issues related to individual, child, family and group therapy. Client rights and professional orientation to ethical standards and state regulation of clinical practice. 4 seminars.

PSY 565. Diagnosis and Treatment: Psychopathology. 4 units

Term Typically Offered: W

Prerequisite: PSY 560 and admission to MS Psychology program.

Assessment of mental status. Diagnostic and statistical Manual of Mental Disorders, treatment planning, treatment case documentation and research applied to client psychopathology. 4 seminars.

PSY 566. Group Therapy: Theory and Application. 4 units

Term Typically Offered: SP

Prerequisite: PSY 560 and admission to MS Psychology program.

Group therapy theory, leadership and research applied to client assessment, screening, treatment selection, evaluation and termination. Ethics, law included. 4 seminars.

PSY 568. Advanced Psychotherapies. 4 units

Term Typically Offered: F

Prerequisite: PSY 555, PSY 560, PSY 565 and admission to MS Psychology program, or consent of instructor.

Theory and application of advanced approaches in psychotherapy, including, but not limited to: cognitive-behavioral therapies, psychodynamic therapies and humanistic/existential therapies. The Class Schedule will list therapy selected. Total credit limited to 12 units. 4 seminars.

PSY 569. Counseling Clinic Practicum. 3 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: PSY 520; PSY 555; PSY 560; PSY 565; and admission to MS Psychology program.

Applied experience and instruction in assessment, diagnosis, treatment planning and treatment of individuals, couples, families and children under direct supervision of faculty in program clinic. Total credit limited to 12 units. Credit/No Credit grading only.

PSY 570. Selected Advanced Topics. 4 units

Term Typically Offered: TBD

Prerequisite: Admission to MS Psychology program or consent of instructor.

Directed group study of selected topics for advanced students. Open to graduate students and selected seniors. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 seminars.

PSY 571. Advanced Family Therapy: Theory and Application. 4 units

Term Typically Offered: F

Prerequisite: PSY 520; PSY 555; and admission to MS Psychology program.

Theory and application of process, structural and systems approaches to family therapy. Assessment, diagnosis, treatment and follow-up of family therapy. Ethics and law related to family therapy. 4 seminars.

PSY 572. Child and Adolescent Therapy: Theory and Application. 4 units

Term Typically Offered: W

Prerequisite: PSY 535; PSY 555; PSY 560; and admission to MS Psychology program.

Assessment, diagnosis, treatment planning and therapeutic modalities appropriate for children and adolescents. Both theoretically based and empirically based treatment approaches presented. Instruction in the assessment and treatment of abuse and neglect of children with relevant ethics and law. 4 seminars.

PSY 574. Psychological Assessment. 4 units

Term Typically Offered: W

Prerequisite: Admission to MS Psychology program.

Administration, scoring and interpretation of psychological tests. Reliability and validity of psychological measures. Ethical and cultural issues in testing. 4 seminars.

PSY 575. Gender and Couple Therapy. 4 units

Term Typically Offered: SP

Prerequisite: PSY 520; PSY 560; and admission to MS Psychology program.

Antecedents to sex-role identity, gender aware therapy, couple therapy, treatment of spousal/partner abuse; human sexuality, behavior, and psychosexual dysfunction. 4 seminars.

PSY 576. Traineeship: Marital and Family Therapy. 4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: PSY 569, PSY 564 and consent of MS program committee.

Supervised experience in applied psychotherapeutic techniques, assessment, diagnosis and treatment of individual, marital, family and child relationship problems. Total credit limited to 16 units. Credit/No Credit grading only. Weekly seminar with on-site and university supervisors.

PSY 577. Community Mental Health: Issues and Practices. 4 units

Term Typically Offered: SP

Prerequisite: Admission to the MS Program in Psychology; PSY 535; PSY 555; PSY 556; and PSY 560.

An overview of community mental health as envisioned via California's Mental Health Services Act. Examination of the opportunities and challenges in delivering effective mental health services in publicly-funded settings. Exploration of concepts and practices, including the recovery model and innovative approaches. 4 seminars.

PSY 585. Research Methods for Counseling Psychology. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing or consent of instructor.

Research methods relevant to practitioners in counseling psychology and human services. Basic understanding of descriptive and inferential statistics as well as applications related to these topics. 4 seminars.

PSY 588. Assessment and Treatment of Substance Use Disorders. 4 units

Term Typically Offered: W

Prerequisite: Graduate standing; PSY 560; PSY 565; and PSY 574.

Etiological and biopsychosocial factors, as well as assessment, diagnosis, and evidence-based treatment of substance use disorders. Differential diagnosis, co-occurrence with other conditions, unique population concerns, including use across the lifespan, and local treatment options will be discussed. 4 seminars.

PSY 599. Thesis. 2-4 units

Term Typically Offered: F, W, SP

Prerequisite: PSY 585 and advancement to candidacy.

Completion of a thesis pertinent to the fields of psychology and human services. Total credit limited to 8 units.

Recreation, Parks and Tourism Administration (RPTA)

undefined

RPTA Courses**RPTA 101. Introduction to the Experience Industry. 4 units**

Term Typically Offered: F, SP

Prerequisite: RPTA majors only.

History, philosophy, theory, and organization of the experience industry. Exploration of the experience industry profession; emphasis upon functions, areas, facilities, clientele, and career opportunities. 4 lectures.

RPTA 110. Orientation and College Success in Experience Industry Management. 1 unit

Term Typically Offered: F, W

CR/NC

Prerequisite: Recreation, Parks and Tourism Administration majors only.

Orientation to Experience Industry Management and Recreation, Parks, and Tourism Administration fields. Development of two- to four-year plan toward graduation. Exploration of skills, learning strategies, and problem solving for college success. Career planning in experience industry management and introduction to professionalism. Credit/No Credit grading only. 1 activity.

RPTA 112. Introduction to Parks and Outdoor Recreation. 4 units

Term Typically Offered: F

Introduction to park and outdoor recreation systems. History, philosophy, policy, and principles of outdoor recreation, wilderness, park management, environmental education, outdoor education, visitor experiences, and natural resources recreation at the local, regional, national, and international levels. Field trips required. 3 lectures, 1 laboratory.

RPTA 114. Introduction to Hospitality and Travel. 4 units

Term Typically Offered: F, SP

History and development of the hospitality and travel industries. Exploration of different sectors of the hospitality and tourism industries, travel motivations, supply and demand for tourism products and services, trends and issues, and effects of tourism on individuals, cultures and the natural environment. Career opportunities in the hospitality and travel industries. Field trips required. 4 lectures.

RPTA 121. Theories and Frameworks of Experience Design. 4 units

Term Typically Offered: W, SP

Prerequisite: RPTA majors only.

Foundational knowledge, introductory frameworks, and entry level experience design theory. Human-centered design. Examine experience design in terms of the experience industry as well as broader concepts of experience. Creative tools and processes including design thinking, narrative storyboarding, and experience mapping. 4 lectures.

RPTA 160. Introduction to Sport Management. 4 units

Term Typically Offered: W

Introduction to the philosophy, organization, issues and career paths of sport management. Emphasis on ethical decision-making and career opportunities in youth, interscholastic, intercollegiate, professional, and international sport. 4 lectures.

RPTA 201. Sociocultural Dimensions of Work and Leisure. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

History and theoretical framework associated with the interplay between work and leisure in the United States; global perspective examining sociocultural differences and marginalization of groups; issues impacting work-life balance including technology, demography, geography, corporate culture, and career fields. Course may be offered in an online or hybrid format. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

RPTA 203. Resource Law Enforcement. 3 units

Term Typically Offered: TBD

Law enforcement applied to natural resource conservation on public and private lands. Examination of state and federal laws related to fish and wildlife management. Problems associated with implementation of resource laws examined. 3 lectures. Crosslisted as NR/RPTA 203.

RPTA 210. Experience Design. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Recreation, Parks, and Tourism Administration major; and sophomore standing.

Methods of experience design, program planning, theme creation, execution, and evaluation in experience industry settings. Interrelationship of built and natural resources with structured and co-created experiences. Emphasis on experience design, program planning, and scheduling. Course may be offered in classroom-based, online or hybrid format. 3 lectures, 1 activity.

RPTA 216. Resort and Lodging Operations. 4 units

Term Typically Offered: SP

Prerequisite: major in RPTA, or minor in Event Planning and Experience Management, and sophomore standing.

Exploration of the technical operations integral to resort and lodging: food, beverage and restaurant; housekeeping and engineering; sales and catering departments; staff management and state, national, and international classification systems. Field trips required. 3 lectures, 1 activity.

RPTA 221. Professionalism and Customer Experiences. 4 units

Term Typically Offered: TBD

Prerequisite: major in RPTA, or minor in Event Planning and Experience Management, and sophomore standing.

Service qualities and behaviors across the experience industry, including recreation, parks, tourism, sport, events, outdoor and community environments. Professionalism and ethics, developing customer relationships, delivering memorable and meaningful customer experiences, and creating service-focused organizations. Developing competencies to enhance customer and participant experiences. 4 lectures.

RPTA 255. Leadership and Diverse Groups. 4 units

Term Typically Offered: F, W, SP

2019-20 or later catalog: GE Area E

2017-19 or earlier catalog: GE Area D4

Development and application of leadership skills in recreation activity settings. Emphasis on leadership techniques for working with groups consisting of people from diverse populations, such as people with disabilities or special needs, diverse social and cultural groups, and diversity of ages. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity. Fulfills GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

RPTA 260. Community Relations and Sports-Based Youth Development. 4 units

Term Typically Offered: SP

Prerequisite: Sophomore standing.

Philosophy, foundations, policy and techniques underlying community relations and sports-based youth development in public, private and commercial settings. Methods of program planning, organization, implementation and evaluation with emphasis on program planning and mission development. 3 lectures, 1 activity.

RPTA 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

RPTA 275. Facilitation and Teambuilding. 2 units

Term Typically Offered: W

Techniques and models used in leadership, facilitation, and teambuilding. Emphasis on leadership and facilitation styles and models, teambuilding and group dynamics, and working with various populations. Field trip required. 2 seminars. Crosslisted as MSL/RPTA 275.

RPTA 302. Environmental and Wilderness Education. 4 units

Term Typically Offered: TBD

Sustainability Related

Prerequisite: RPTA 210 with C- or better or consent of instructor; and junior standing.

Education and teaching techniques that apply to learning experiences in an outdoor environment. Impact of natural resource usage that affects sociological, cultural, biological and physical resources. Educational strategies for presenting environmental learning to grades K-12 in selected environments. 3 lectures, 1 activity.

RPTA 313. Sustainability in the Experience Industry. 4 units

Term Typically Offered: F, SP

Sustainability Focused

Prerequisite: RPTA 210 with C- or better or consent of instructor; and junior standing.

Investigation of the experience industry from a sustainability perspective. Emphasis on facility design, industry practices, and services provisions in the Experience Industry Management field that sustain social, cultural, heritage, and natural environments while generating economic development. 3 lectures, 1 laboratory.

RPTA 314. Sustainable Travel and Tourism Planning. 4 units

Term Typically Offered: W

Sustainability Focused

Prerequisite: RPTA 114 and RPTA 210 with C- or better or consent of instructor; and junior standing.

The planning and development of tourism destinations, agencies, and services from a sustainable development perspective. Emphasis on the economic, social and environmental impacts of tourism. Examination of alternative forms of tourism. Emphasis on sustainable tourism. Travel research and planning models. Field trips required. 3 lectures, 1 laboratory.

RPTA 317. Hospitality, Convention and Meeting Management. 4 units

Term Typically Offered: F, SP

Prerequisite: RPTA major or Event Planning and Experience Management minor; and junior standing.

Role of conventions, meetings management, and events in the hospitality and travel industry. Factors involved in meeting planning for small and large groups to include committees, amenities, operations logistics, venue selection, technology, virtual meetings, registration, catering arrangements, sustainable operations and evaluation. Field trips required. Course may be offered in classroom-based or hybrid format. 3 lectures, 1 activity.

RPTA 318. Destination Marketing & Management. 4 units

Term Typically Offered: TBD

Prerequisite: RPTA major or Event Planning and Experience Management minor; and junior standing.

Examination of the development and critical roles that destination management and marketing organizations, destination management companies, and convention and visitors bureaus play in the tourism industry. Exploration of the major areas of destination management including service, roles and responsibilities, research, and product development. 4 lectures.

RPTA 320. Strategic Event Planning. 4 units

Term Typically Offered: F, W

Prerequisite: major in RPTA, or major in WVIT, or minor in Event Planning and Experience Management; and junior standing.

Strategy and successful practices in special event planning. Emphasis on conceptualization, strategy, analysis, and planning considerations of small to large-scale events. Exploration of event planning and experience management as a profession. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

RPTA 321. Visitor Services in Experience Industry Management. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: RPTA 210.

Management issues in meeting the needs of experience industry businesses and organizations. Topics to include customer satisfaction, service quality, visitor experiences, customer service skills and procedures, and creating a customer focused organization. The Schedule of Classes will list topic selected. Total credit limited to 12 units. 1-4 seminars.

RPTA 323. Sport Marketing and the Fan Experience. 4 units

Term Typically Offered: SP

Prerequisite: one of the following: RPTA major, Event Planning and Experience Management minor, or Exercise and Sport Studies minor; and junior standing.

Exploration of professional sports and intercollegiate athletics through the lens of sport marketing and the fan experience. Development of marketing strategies employed to increase attendance, enhance attendee experiences, and build fan loyalty. 4 lectures.

RPTA 325. Leadership in Outdoor Experiences. 4 units

Term Typically Offered: TBD

Prerequisite: RPTA 205, RPTA 255, or RPTA 257; and junior standing.

Theoretical principles and experience in leadership, judgment, and decision-making in outdoor and adventure settings. Field trip required. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 activity.

RPTA 328. Environmental Leadership and Community Engagement. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); one lower-division course in GE Area D; and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Theories and practices of leadership and community engagement for a wide range of environmental issues. Development of personal leadership skills and methods for effectively working with non-profit organizations, governmental agencies, community groups, and the private sector to advance sustainability principles. 4 lectures. Crosslisted as NR/RPTA 328. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

RPTA 330. Directed Field Experience. 4 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: RPTA 210 with C- or better; and consent of instructor.

Practical work experience in related phases of the experience industry in an organization under qualified supervision. Minimum of 12 hours per week. Total credit limited to 8 units. Credit/No Credit grading only.

RPTA 342. Risk Management for the Experience Industry. 4 units

Term Typically Offered: F, W

Prerequisite: RPTA 210 with C- or better or consent of instructor; and junior standing.

Legislative and legal aspects of public, private, commercial, and non-profit experience industry organizations. Emphasis on risk management, including liability, insurance, and negligence. Understanding of legal foundations and the legislative process. Field trip may be required. 3 lectures, 1 laboratory.

RPTA 350. Sport and Event Venue Management. 4 units

Term Typically Offered: TBD

Prerequisite: major in RPTA, or minor in Event Planning and Experience Management, and junior standing.

Management of sport and event venues: clientele considerations, facility and outdoor area site planning; day-to-day operations of common sport and event venues from sport stadiums to multi-use wineries to city streets (e.g., parades, marathons, etc.). Field trip required. 3 lectures, 1 activity.

RPTA 360. Assessment and Evaluation of Experience Industry Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: RPTA 210 with C- or better or consent of instructor; STAT 217 or STAT 218 or STAT 251 or STAT 252; and junior standing.

Evaluation of experience industry programs using a variety of research methodologies. Needs assessment, program evaluation, research design, and decision making based on data analysis. Course may be offered in classroom-based or hybrid format. 3 lectures, 1 laboratory.

RPTA 370. Experiential Marketing Strategies for Experience Industry Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: major in RPTA, or minor in Event Planning and Experience Management, and junior standing.

Core principles of experiential marketing within the realm of tourism, hospitality, and destination management; sport and recreation experience management, and event planning and experience management. Emphasis on strategies to actively engage consumers in experience industry settings. 4 lectures.

RPTA 393. Hospitality Sales and Service. 4 units

Term Typically Offered: TBD

Prerequisite: RPTA major, Event Planning and Experience Management minor, or Sales minor; junior standing; and RPTA 114.

Hospitality sales and service in the convention and event industry, with emphasis on customer organization characteristics, site selection, sales, and service provision. Hotel and venue sales, contract negotiation, sales management and catering/event service operations. 4 lectures.

RPTA 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: RPTA 210 with C- or better and consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

RPTA 405. Principles of Experience Industry Management. 4 units

Term Typically Offered: F, W

Prerequisite: RPTA 205, RPTA 255, or RPTA 257; RPTA 210; and senior standing.

The study, analysis, and practice of management processes as they are applied to experience industry management organizations: planning, organizing, leading, and controlling. Emphasis upon application of theories, practices and case studies in experience industry management settings. 4 lectures.

RPTA 412. Advanced Experience Industry Management Applications. 1-4 units

Term Typically Offered: W, SP

Prerequisite: RPTA 210.

Selected topics on aspects of experience industry management. Field trip may be required. The Class Schedule will list topic selected. Total credit limited to 12 units, repeatable in same term. 1 to 4 seminars.

RPTA 413. Tourism and Protected Area Management. 4 units

Term Typically Offered: TBD

Prerequisite: RPTA 210 and junior standing.

Practices of tourism and recreation resource management in protected areas. History and principles of protected areas. Social, cultural, economic, and environmental benefits of and risks to protected areas and communities. Environmental stewardship in tourism and recreation resource management worldwide. 3 lectures, 1 laboratory.

RPTA 416. Interpreting Experience Industry Data Analytics. 4 units

Term Typically Offered: F, SP

Prerequisite: RPTA 360.

Interpretation of data and metrics used in the experience industry. Exploration of methods to measure customer experiences and translate data into strategic decisions. Analytics software (CRM, PowerBI) will be used to visualize datasets. Techniques for interpreting datasets and building compelling presentations. 3 lectures, 1 laboratory.

RPTA 420. Strategic Event Implementation. 4 units

Term Typically Offered: W, SP

Prerequisite: RPTA 320 and junior standing.

Management strategies and practices for small to large-scale community festivals and events. Emphasis on strategy, sponsorship, marketing, staffing, production, and budgeting. 4 lectures.

RPTA 424. Financial Management in the Experience Industry. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 323 or BUS 215; RPTA 360 with C- or better or consent of instructor; and senior standing. Recommended: ENGL 310.

Financing experience industry products and services in public, private, commercial and voluntary settings. Emphasis on sources and methods of financing; operational/ financial cost analysis; forecasting, budgeting, pricing and fiscal master planning through use of computer technology. 4 lectures.

RPTA 450. Resource and Grant Development. 4 units

Term Typically Offered: W

Prerequisite: Junior, senior or graduate standing.

Explores principles of grant writing and resource development including: researching grant funding resources from both the private and public sector, preparing grant proposals, grant administration, partnerships, and sponsorships. 4 lectures.

RPTA 460. Senior Project in Experience Industry Management. 4 units

Term Typically Offered: F, W, SP

Prerequisite: ENGL 310 and completion of the Graduation Writing Requirement; RPTA 360 with a C- or better or consent of instructor; and senior standing.

Selection and completion of an individual senior project. Ability to collect data and/or synthesize and evaluate information and draw conclusions based on that process. Project results are presented in a formal oral and written report. Information synthesis and evaluation. Emphasis on critical thought and analysis of industry trends and issues. 3 lectures, 1 laboratory.

RPTA 461. Senior Project. 3 units

Term Typically Offered: TBD

Prerequisite: Senior standing and completion of RPTA 460 with C- or better or consent of instructor.

Completion, under faculty supervision, of an investigative project typical of problems which graduates must solve in their fields of employment. Required minimum of 90 hours. Analytical, formal report is required.

RPTA 463. Pre-Internship Seminar. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: RPTA majors only and junior standing. Recommended: Enrollment two quarters prior to RPTA 465.

Exploration of professionalism, internship opportunities and practices. Internship selection process and procedures introduced. Credit/No Credit grading only. 1 seminar.

RPTA 465. Internship. 12 units

Term Typically Offered: F,W,SP, SU

CR/NC

Prerequisite: Minimum GPA of 2.0; 1,000 verified hours of advisor-approved paid and/or volunteer experience subsequent to high school; completion of all university coursework other than Internship; or approval of Internship Coordinator.

400 hours of full-time concentration-specific practical work experience over a ten-week period in an approved organization. Comprehensive involvement in organization's programs and services. Credit/No Credit grading only.

RPTA 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to under-graduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

RPTA 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to graduate and undergraduate students. The Schedule of Classes will list title selected. Total credit limited to 8 units. 1-4 laboratories.

RPTA 472. Leadership Practice. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Tasks associated with development of personal leadership skills. Study and practice in setting goals and objectives; developing, evaluating and implementing a project independently and as part of a team; decision making and problem-solving emphasized. Total credit limited to 4 units. 1 laboratory. Crosslisted as NR/RPTA 472.

RPTA 500. Individual Study. 1-6 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of department head.

Advanced independent study planned and completed under the direction of a member of the department faculty. Total credit limited to 6 units.

RPTA 502. Current Issues in Recreation, Parks and Tourism. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Societal issues that influence the management and delivery of recreation, parks, and tourism services. Critical investigation of current research and trends. 4 seminars.

RPTA 527. Leisure Behavior and Theory. 4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Theories of recreation and leisure; conceptual and theoretical foundations of leisure; the role of leisure behavior in modern day society. The Class Schedule will list topic selected. Constructs that contribute to contemporary understanding of leisure behavior. Connection of theories to individual research. Total credit limited to 8 units. 4 lectures.

RPTA 539. Graduate Internship in Recreation, Parks and Tourism. 1-9 units

Term Typically Offered: TBD

Prerequisite: Consent of internship instructor.

Application of theory to the solution of problems of recreation, parks and tourism or related businesses in the field. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units.

RPTA 570. Selected Topics in Recreation, Parks and Tourism. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

RPTA 571. Selected Advanced Laboratory in Recreation, Parks and Tourism. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of instructor.

Directed group laboratory of selected topics for advanced students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 laboratories.

RPTA 581. Graduate Seminar in Recreation, Parks and Tourism. 1 unit

Term Typically Offered: TBD

Prerequisite: Graduate standing.

Group study of selected developments, trends and problems in the field of recreation, parks and tourism. Total credit limited to 4 units. 1 seminar.

RPTA 599. Thesis in Recreation, Parks and Tourism. 1-9 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of instructor.

Individual research in recreation, parks and tourism management under the general supervision of faculty, leading to a graduate thesis. Degree credit limited to 9 units. Students must enroll each quarter advisement is received.

Religious Studies (RELS)

undefined

RELS Courses

RELS 201. Religion, Dialogue, and Society. 4 units

Term Typically Offered: F, W, SP
2020-21 or later catalog: GE Area D2
2019-20 or earlier: GE Area D2 or D3

Examine how interactions between religious traditions shape society at various levels. Case studies drawn from eastern and western religious traditions during the ancient and modern periods. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

RELS 205. Jesus. 4 units

Term Typically Offered: F, W, SP
Exploration and analysis of the person of Jesus. Includes examination of our sources of knowledge about him, his self-understanding, and various interpretations of him in historical, comparative, and contemporary settings. 4 lectures.

RELS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

RELS 301. Religions of Asia. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Comparative study of the religions of Asia, particularly Hinduism, Buddhism, and the religions of China. Topics include historical continuities/discontinuities, worldviews, sacred texts, practices, responses to modernity, the place of women across the traditions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 302. Abrahamic Religions: Judaism, Christianity, and Islam. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

An introduction to the global religions of Judaism, Christianity, and Islam, with a focus on their shared origin in the Patriarch Abraham. Topics include for each religion: the origins, worldview, scripture, practices, and relationship to modernity. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 304. Judaism. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Origins, beliefs and practices of Judaism and central themes in the Hebrew Bible. The development of Judaism in the post-biblical and Talmudic period. Jewish philosophy, life, rituals and customs. The emergence of modern Judaism, Zionism and post-Holocaust philosophy. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 306. Hinduism. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Origins, beliefs and practices of Hinduism from the Veda and the Upanishads through the teachings of the Bhagavad Gita and the Puranas. Modern Hindu institutions, saints and sages, and social philosophy contrasted with the ancient. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 307. Buddhism. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Buddhist origins, viewpoints and practices will be seen in their development in India, Tibet, China, Japan, South Asia and America. The life of Buddha, Gautama, the rise of Theravada, Mahayana and Tantra. Encounters with Shinto and Confucianism. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 310. Christianity. 4 units

Term Typically Offered: F, W, SP
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

The development of the Christian religion from the story of Jesus, the New Testament, Church formation, the role of St. Paul, dissenting ideas, Protestant and Catholic views, and contemporary issues of conscience, such as the Social Gospel and liberation theologies. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 311. Islam. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

The development of Islamic civilization from the inspiration of the Qur'an and the Prophet Muhammad and the Sunni-Shi'i split to contemporary political and social issues. Emphasis of Sufi literature, art, architecture, and philosophies of Islam. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 344. Approaches to Religion and Spirituality. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs) or in GE Area E (or in GE Area D4 for students on the 2017-19 or earlier catalogs).

Examination of religion from an academic perspective by surveying the various historical approaches employed within the discipline of religious studies to collect, analyze, and interpret religious phenomena cross-culturally. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

RELS 370. Religion, Gender, and Society. 4 units

Term Typically Offered: F,W,SPSU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Critical examination of religious ideas and institutions in the United States. Focus on interlocking systems of sex, gender, race, class and religion; individual and group experiences at the intersection of religion, politics and culture. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as RELS/WGQS 370. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 370.

RELS 372. Spiritual Extremism: Asceticism, Mysticism, and Madness. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Shaping influence of ascetics, mystics and the insane on global religious traditions. Topics may include the relationship between spiritual extremists and society, cultural construction of holiness and insanity, and literary depictions of spiritual extremists. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 374. Religion and Violence. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Historical and contemporary case studies of how various religions have condoned, motivated and justified violence. The place of sacrifice, martyrdom, self-injury and forced conversion in religious doctrines. Representations of religious violence in the media. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 378. Religion and Contemporary Values. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Descriptive analysis of how diverse religious traditions construct moral decisions about a variety of contemporary issues including sexuality, ecology, and justice. Challenges for religious value systems in secular and pluralistic societies. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 380. Religion and Politics in the Israeli-Palestinian Conflict. 4 units

Term Typically Offered: W

Prerequisite: Completion of GE Area A with grades of C- or better.

Recommended: Completion of one class in POLS or RELS.

The root causes of the Israeli-Palestinian conflict and its current manifestation. Possibilities for solutions from the perspectives of religious studies and political science. 4 lectures. Crosslisted as POLS/RELS 380.

RELS 390. Topics in Religious Studies. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Examination and analysis of religious and spiritual themes and traditions. Topics may be of historical or contemporary importance. The Class Schedule will list topic selected. Total credit limited to 16 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

RELS 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair and instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 4 units.

RELS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. The Class Schedule will list topics selected. Total credit limited to 8 units. 1 to 4 lectures.

RELS 490. Advanced Topics in Religious Studies. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Area C2.

An in-depth examination and analysis of specific religious and spiritual themes, traditions, texts, and figures. Topics may be of historical or contemporary importance. The Class Schedule will list topic selected. Total credit limited to 16 units; repeatable in the same term. 4 lectures.

Science and Mathematics (SCM)

undefined

SCM Courses

SCM 101. Introduction to Health Profession Careers. 1 unit

Term Typically Offered: SP

CR/NC

Introduction to health profession careers. Professionals from within the health care industry provide an overview of their careers. Emphasis on creating a pre-health career plan, academic course selection, obtaining appropriate experiences, and elements of a strong professional application. Intended for students undecided about their health professions career choice. Credit/No Credit grading only. 1 activity.

SCM 150. Supplemental Workshops in Science. 1 unit

Term Typically Offered: F,W,SP,SU

CR/NC

Concurrent: Enrollment in the designated section of the associated course.

Facilitated study and discussion of the theory, concepts, and applications of content material from selected biology, chemistry, physics, and statistics courses. Credit/No Credit grading only. Total credit limited to 8 units. Maximum of 2 units for degree credit. 1 laboratory.

SCM 220. Seminar for Science and Math Tutors. 1 unit

Term Typically Offered: F, W, SP

CR/NC

Concepts of teaching and learning as it relates to roles as K-12 grade science and math tutors and/or classroom assistants. Intended for participants in science, engineering, and mathematics tutoring and teaching assistant programs like Teaching Assistants in Mathematics and Science (TeAMS) and Mentors in Out of School Time (MOST). Participation in public schools requires mandated fingerprint clearance. Credit/No Credit grading only. Total credit limited to 3 units. 1 activity.

SCM 230. Seminar for Learning Assistants. 2 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: BIO 160, BIO 161, CHEM 124, CHEM 127, MATH 141, PHYS 131, or PHYS 141.

Introduction to learning theory and teaching practices for mathematics and science learning assistants regarding conceptual development, questioning techniques, cooperative learning, nature of math and science, and argumentation in mathematics and science. Restricted to students admitted to the Learning Assistant program. Total credit limited to 6 units. Degree credit limited to 4 units. 2 seminars.

SCM 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

SCM 300. Early Field Experience. 4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing; for Math majors or Science and Engineering majors only.

Historical, philosophical, and social foundations of public science and mathematics education. Public school curriculum and professional education dispositions. Structured observation and participation in K-12 public schools with attention to instructional practices for diverse learners. Credit/No Credit grading only. 2 lectures, 2 activities.

SCM 301. Professional School Preparation for Health Profession Careers. 1 unit

Term Typically Offered: TBD

CR/NC

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; minimum of 3.0 CPSLO GPA; and consent of instructor.

Recommended: SCM 101 and completion of GWR.

Application strategies and preparation for health professions programs. Analysis of the application requirements and critique of personal application components. Credit/No Credit grading only. 1 activity.

SCM 302. The Learn By Doing Lab Teaching Practicum. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Early teaching experience in an informal science, technology, engineering, and mathematics (STEM) teaching and learning environment. Principles of inquiry-driven STEM education, lesson design, implementation and assessment. Intended for undergraduates exploring STEM teaching as a career. Total credit limited to 4 units. Credit/No Credit grading only. 1 seminar, 1 laboratory. Crosslisted as ENGR 322/SCM 302/HNRS 302.

SCM 330. Cal Poly Land: Nature, Technology, and Society. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course from GE Area B1 (GE Area B4 for students on the 2019-20 or earlier catalogs); one course from GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Scientific investigation of the natural features of the Cal Poly landscape and their transformations by land management technology. Environmental, economic, social, and political effects of agriculture, resource extraction, construction technology. Educational, land-use, long term planning issues. 4 lectures. Crosslisted as AG/ISLA/SCM/UNIV 330. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

SCM 350. The Global Environment. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/ historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

SCM 360. Selected Environmental Issues of California's Central Coast. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Examination of several inter-related environmental issues currently affecting California's Central Coast region. Focuses on the role of technology in creating/mitigating environmental problems. Field trips required. 3 lectures, 1 activity. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

SCM 363. Public Health Fieldwork. 2 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Junior standing; a minimum GPA of 3.0; must have been enrolled at Cal Poly for at least two quarters; and consent of instructor.

Structured observational experiences for pre-health students. Designed to promote awareness and understanding of public health or allied health careers. Students participate in practical experiences under the direct supervision of an approved on-site coordinator. Limited space availability. Application process for enrollment available from CSM Student Services. Total credit limited to 6 units. Credit/No Credit grading only.

SCM 368. Theory and Practice of STEM Tutoring. 4 units

Term Typically Offered: SP

Prerequisite: Completion of one course in GE Area B1 (GE Area B3 for students on the 2019-20 or earlier catalogs), GE Area B2, or GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Theories and practices central to Science, Technology, Engineering, and Mathematics (STEM) tutoring, such as collaborative learning, social dimensions of the peer/tutor relationship, and STEM literacy. Recommended for those interested in tutoring and/or careers in STEM education. Course may be offered in classroom-based, online, or hybrid format. 3 lectures, 1 activity.

SCM 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

SCM 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

Sociology (SOC)

undefined

SOC Courses

SOC 110. Comparative Societies. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Introduction to sociological theory and methods, emphasizing a comparative analysis of social institutions of contemporary societies in major world regions, including the family, politics, and the economy. Direct comparisons made between United States social institutions and those of other societies. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

SOC 111. Social Problems. 4 units

Term Typically Offered: W, SP

An introduction to sociology with an emphasis on problems inherent in selected social institutions. Instruction in social analysis, including theories of social problems, how those problems are studied, and a survey of possible solutions. 4 lectures.

SOC 200. Special Problems for Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

SOC 216. US Race and Ethnic Relations. 4 units

Term Typically Offered: F, W, SP

USCP

Recommended: SOC 110.

Exploration of U.S. ethnic minorities' experiences and related contemporary issues. Sources and manifestations of economic and social discrimination patterns and how they affect individual and group life chances. Replaces SOC 316. 4 lectures. Fulfills USCP.

SOC 218. International Political Economy. 4 units

Term Typically Offered: F, SP

2020-21 or later catalog: GE Area D2

2019-20 or earlier: GE Area D2 or D3

Sociological perspectives on the historical development of the world system and why global inequality exists and is perpetuated within and between countries. Critical comparison of the political economy of nations with an emphasis on the Global South. Course may be offered classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area D2 (GE Area D2 or GE Area D3 for students on the 2019-20 or earlier catalogs).

SOC 222. Classical Social Theory. 4 units

Term Typically Offered: F, W

Prerequisite: SOC 110.

Overview of classical sociological theory. How foundational sociologists developed and delimited the field of sociology. Practice in application of classical social theory in relation to different aspects of social life. Examination of basic assumptions and comparison of different perspectives. Replaces SOC 421. 4 lectures.

SOC 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

SOC 301. Social Work and Social Welfare Institutions. 4 units

Term Typically Offered: F

Prerequisite: SOC 110. Recommended: Junior standing.

Introduction to the field of social welfare. Development of social work and social welfare services; major issues in social service policy. Scope and diversity of specific programs in the social services. Analysis of current programs and the recipients of welfare services. Field trip may be required. 4 lectures.

SOC 302. Criminology. 4 units

Term Typically Offered: F, W

Prerequisite: SOC 110.

Sociological theory and research on crime, criminality, and victimization in the United States. Critical analysis of crime, including how we define, study, and try to reduce and stop crime in our communities. Classic and contemporary perspectives on punishment, deterrence, and restorative justice are covered. Course may be offered in classroom-based or online format. 4 lectures.

SOC 305. Social Movements. 4 units

Term Typically Offered: F, SP

Prerequisite: SOC 110.

Description and analysis of social movements in contemporary societies as they relate to major revolutionary changes historically and in the present. Analysis of variables producing social movements and political violence, including terrorism. Impact on society. 4 lectures.

SOC 306. Sociology of the Family. 4 units

Term Typically Offered: W

Prerequisite: SOC 110 or SOC 111. Recommended: Junior standing.

Family stages, relationships and strengths. Alternative and diverse forms of families. Courtship, marriage, parenting, launching children and aging. Horizontal stressors (trauma and divorce) vs. vertical stressors (racism and poverty). 4 lectures.

SOC 308. Sociology of the Environment. 4 units

Term Typically Offered: W, SP

Sustainability Focused

Prerequisite: SOC 110 or GEOG 150.

Complex interactions between society and environment. Cultural relationships with nature. Environmental movements, food security, population growth. Local and global inequities regarding consumption, toxins, sea level rise, and natural disasters. Emphasis on environmental justice: race, class, and gender. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

SOC 309. The World System and Its Problems. 4 units

Term Typically Offered: SP

Prerequisite: SOC 110. Recommended: Junior standing.

Analysis of the historical background, structure, and dynamics of the world system; examines such issues as the origins of Third World poverty, colonialism, the changes in the world's dominant economic powers, the fall of communism, the growing economic competition between Europe, North America, and Asia; and possible strategies for the economic development of the Third World. 4 lectures.

SOC 310. Self, Organizations and Society. 4 units

Term Typically Offered: W

Prerequisite: Junior standing.

Analysis of the interactions relating to the development of self. Examination of the reciprocal interactions between biology, personal environment, and society. 4 lectures.

SOC 311. Sociology of Genders and Sexualities. 4 units

Term Typically Offered: F,W,S,PSU

Prerequisite: Junior standing.

Analysis of social constructions of sex, genders, and sexualities. Explores how gender stereotypes are created and reproduced. Focus on media representations; intersections of gender, race, class, sexuality; and effects on individuals and structures of work, education, family, and abusive relationships. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as SOC/WGQS 311. Formerly WGS 311.

SOC 315. Global Race and Ethnic Relations. 4 units

Term Typically Offered: F,W,S,PSU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Diverse structures of unequal relationships among racial and ethnic groups in several countries including the United States. Theories about sources of economic and social discrimination and colonialism. Focus on the concept of ethnicity. Evaluation methods to restructure race and ethnic relations. International case histories. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

SOC 321. Migration. 4 units

Term Typically Offered: SU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Critical examination of migration, with emphasis on migration to and within the United States. Social and economic impacts on sending communities, receiving communities, and migrants themselves. Grounded in migration theory. Comparisons between current and historical migration trends and policies. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

SOC 323. Social Stratification. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Junior standing.

Social class and the distribution of income, wealth, status and power in society, with emphasis on contemporary United States; social mobility; race, gender, and ethnic inequalities; political power and the nature of welfare; the nature, causes and solutions to poverty. 4 lectures.

SOC 326. Sociology of the Life Cycle. 4 units

Term Typically Offered: F, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Change and continuity of the self through the life course. Impact of aging on the physical, emotional, intellectual and social aspects of well being, and how this knowledge can be applied to enhance the quality of life. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

SOC 327. Social Change. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D. Recommended: HIST 216 or SOC 305.

Compares and contrasts social change strategies over time and across diverse social problems, focusing mainly on the U.S., but not exclusively. Theoretical and critical examination of contemporary efforts to address restricted opportunities by groups who have been historically marginalized due to race/ethnicity, lower socioeconomic status, sexuality, or other social identities. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP.

SOC 343. Contemporary Societies of the Developing World. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Sustainability Related

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs). Recommended: SOC 110.

Investigation of societies in developing countries, from broad regional trends to community-specific case studies. Gender, race, education, health, aging, families, inequality, and resilience. Readings and films emphasize voices from within the focal communities. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

SOC 354. Qualitative Research Methods. 4 units

Term Typically Offered: W, SP

Prerequisite: Two Sociology courses. Recommended: Junior standing.

Qualitative data collection for social research. The relationship among theory research and hypothesis testing. Data collection techniques: content analysis, face to face interviews, and ethnographic methods. 3 lectures, 1 activity.

SOC 355. Quantitative Research Methods. 4 units

Term Typically Offered: F, W

Prerequisite: STAT 217; and two Sociology courses. Recommended: Junior standing.

The basics of how to do quantitative social research. Includes topics on data collection techniques such as surveys, experiments, and the use of existing data. Also includes topics on univariate, bivariate, and multivariate analysis and the use of SPSS for data analysis. 3 lectures, 1 laboratory.

SOC 377. Sociology of Religion. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

Religion from a sociological perspective. Topics may include the nature of religious experience, the role of religion in politics, economics, and social change, and the role that social forces have in influencing religious beliefs and practices. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

SOC 395. Sociology of Complex Organizations. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing.

Bureaucracies and informal organizations from a sociological perspective. Organizational networks within and between organizations, relationship between organizations and their environment, and organizational socialization and career patterns, and gender and race or ethnic differences in organizational patterns. 4 lectures.

SOC 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of department head.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units, with a maximum of 4 units per quarter.

SOC 402. Gender, Crime, and Violence. 4 units

Term Typically Offered: F

Prerequisite: SOC 311 or WGQS 201.

Criminal behavior of individuals and groups, including intimate partner violence, sexual violence, gun violence, police violence, white-collar criminality, hate crimes, and state violence. Intersectional examination of theories of causation, sources of data, and policing, punishment, and rehabilitation practices. 4 lectures.

SOC 406. Juvenile Justice and Delinquency. 4 units

Term Typically Offered: W

Prerequisite: One course in sociology.

Sociological examination of juvenile delinquency as a social and legal concept, covering the nature, volume and social distribution of juvenile crime; the formal structure of juvenile justice; and how justice for juveniles is applied in practice. 4 lectures.

SOC 412. Contemporary Issues in Criminal Justice. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing.

A sociological perspective of contemporary crime and criminal justice issues, such as racial profiling, drug enforcement, and mass incarceration. Incorporates criminological theory to examine the nature, function, and causes of crime in society. Focuses on the control and treatment strategies of adult offenders. 4 lectures.

SOC 414. Theories of Social Work in Counseling Agencies. 4 units

Term Typically Offered: W

Prerequisite: SOC 110 or SOC 111. Recommended: Junior standing.

Introduction to social work counseling/casework. Bio-psychological-social/strengths perspective: theories, skills, values, clinical knowledge. Possible career paths/agency settings. Traditional and innovative therapy techniques. Field trip may be required. 4 seminars.

SOC 420. Practical Interviewing and Counseling Skills in Social Work. 4 units

Term Typically Offered: SP

Prerequisite: SOC 413 or SOC 414.

Practical skills for interviewing, assessing and counseling clients. Hands-on practice and role play. Techniques to establish rapport, evaluate mental status and develop appropriate goals. Required documentation standards in social work agencies. Useful skill sets for medical or research interviewing. 4 seminars.

SOC 423. Gender and Work. 4 units

Term Typically Offered: F

USCP

Sustainability Focused

Prerequisite: Junior standing; and completion of GE Area A with grades of C- or better.

Extent, causes, and intersectional nature of workplace gender inequality. Strategies aimed at creating more egalitarian organizations. Topics include job segregation, tokenism, sexual harassment, work/family balance, gendered jobs, inequality regimes, personnel policies, workplace democracy, and social/labor movement activism. 4 lectures. Crosslisted as SOC/WGQS 423. Fulfills USCP. Formerly WGS 423.

SOC 431. World Population Processes and Problems. 4 units

Term Typically Offered: W

Prerequisite: SOC 110 or ANT 201. Recommended: SOC 354; SOC 355; or ANT/GEOG 455.

Introduction to demography, emphasizing historical patterns and impacts of population change. Is population a problem? Topics include fertility, mortality, the demographic transition, food security, environmental degradation, population control, population aging, intergenerational transfers, and migration. 4 lectures.

SOC 435. Sociology of Health and Illness. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing; and one of the following: ANT 201, ES 112, ES/WGQS 350, HLTH 255, HLTH 260, ISLA 123, SOC 110, SOC 111, or WGQS 210.

Provides a sociological examination of health and illness. Includes an introduction to sociological theories related to health, illness, and medicine. Focuses on how race, class, and gender influence illness experiences, health care, and health social movements. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

SOC 440. Internship. 2-8 units

Term Typically Offered: TBD

CR/NC

Prerequisite: Consent of instructor. Recommended: Junior standing.

Supervised training, research, and work in public and private organizations. Credit/No Credit grading only. Total credit limited to 12 units.

SOC 444. Incarceration and Society: Perspectives on the Criminal Justice System. 4 units

Term Typically Offered: TBD

Prerequisite: Junior standing, SOC 402 or SOC 412, and consent of instructor.

Compares and contrasts perspectives on the criminal justice system in dialogue with inmates. Examination of the social construction of deviance and inequality in the life course that may lead to incarceration. 3 lectures, 1 activity.

SOC 461. Senior Project I. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

SOC 462. Senior Project II. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 120 hours total time.

SOC 464. Professional Development for Sociologists. 1 unit

Term Typically Offered: SP

CR/NC

Prerequisite: SOC 110 and Sophomore standing.

Preparation for professional advancement in the field of Sociology. Supervised career planning emphasizing resume development, selection of an internship or international experience, exploration of career options and graduate programs. Lectures from outside, practicing professionals. Course may be offered in classroom-based or online format. Credit/No Credit grading only. 1 lecture.

SOC 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

Soil Science (SS)

undefined

SS Courses

SS 120. Introductory Soil Science. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Sustainability Focused

Biological, chemical, physical and genetic properties of soils. Application of scientific principles to solving land use, water management, and soil conservation problems. Interpretation of soils data for making environmental decisions, applying management practices, and sustainable food production. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

SS 130. Soils in Environmental and Agricultural Systems. 4 units

Term Typically Offered: TBD

2020-21 or later catalog: GE Area B1

2020-21 or later catalog: GE Area B3

2019-20 or earlier catalog: GE Area B3

2019-20 or earlier catalog: GE Area B4

Sustainability Focused

Soils' ecological functions; soil and the water cycle; soil in production of food, fiber, and forest materials; techniques and reports of soil analyses with agricultural and environmental applications; soil quality; introductory overview of soils and civilizations. Not open to students with credit in SS 120. 3 lectures, 1 laboratory. Fulfills GE Areas B1 and B3 (GE Areas B3 and B4 for students on the 2019-20 or earlier catalogs).

SS 221. Soil Health and Plant Nutrition. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SS 120 or SS 121.

Plant nutrient requirements in the context of soil health. Composition, value, and use of fertilizer materials, conditioners and agricultural minerals for sustainable crop production and environmental quality. 3 lectures, 1 laboratory.

SS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 lectures. Crosslisted as ERSC/SS 270.

SS 321. Soil Morphology. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SS 120 or SS 121.

Identification of soil morphological and site properties. Correlation of soil physical and chemical properties with soil taxonomy and land use. Techniques of interpretations for agriculture, forest lands, wetlands, range lands and urban development. 3 lectures, 1 laboratory.

SS 322. Soil Plant Relationships. 4 units

Term Typically Offered: TBD

Prerequisite: one of the following: BOT 121, PLSC 120, or SS 120; and CHEM 124 or CHEM 127.

Investigation and evaluation of soil functions. Nutrient supplying ability, conditions and processes involved in the delivery of soil functions. Effects of cultural treatments on soil fertility. Diagnostic techniques and data interpretation in soil health. 3 lectures, 1 laboratory.

SS 339. Internship in Environmental Earth and Soil Sciences. 1-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Consent of internship instructor.

Selected students will spend up to 12 weeks with an approved firm or agency engaged in work and study related to their major. A detailed written proposal and written interim and final reports required. One unit of credit may be allowed for each full week of internship. Credit/No Credit grading. Crosslisted as ERSC/SS 339.

SS 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 12 units. Crosslisted as ERSC/SS 400.

SS 402. Soil, Compost, and Water Testing Enterprise. 3 units

Term Typically Offered: TBD

Prerequisite: CHEM 111, CHEM 125 or CHEM 128; SS 221; and junior standing.

Experience in soil, compost, and water testing. Sampling rationale and protocol. Analyses of compost feedstocks and finished compost; monitoring for consistency. Theory and practice in use of analytical instrumentation. Interpretation of results for soil, compost, and water management. Total credit limited to 6 units for SS or ERSC majors. Total credit limited to 3 units for Soil Science minor.

SS 421. Wetlands. 4 units

Term Typically Offered: TBD

Prerequisite: BOT 121 or BIO 162; CHEM 127; and SS 120 or SS 130.

Recommended: one of the following: BIO 327, BOT 313, BOT 326, MSC1 300, NR 304, NR 305, or NR 306.

The formation, characteristics, and functions of wetlands. Genesis of hydric soils. Plant adaptations to saturated soils. Wetlands as wildlife habitat. Policies and social issues associated with wetlands. The procedures of wetland delineations. 3 lectures, 1 laboratory. Crosslisted as BIO/NR/SS 421.

SS 422. Soil Ecology. 4 units

Term Typically Offered: W

Prerequisite: CHEM 212, CHEM 312, or CHEM 313; and SS 221; or graduate standing.

Biochemical activities, ecology and environmental implications of soil organisms. Effects on the formation, characteristics, and productivity of soils. Methods of studying soil organisms. 3 lectures, 1 laboratory.

SS 423. Environmental Soil and Water Chemistry. 5 units

Term Typically Offered: F

Prerequisite: CHEM 129; CHEM 212, CHEM 216, CHEM 312, or CHEM 316; ERSC 223; MATH 118, MATH 141, or MATH 161; or graduate standing.

Chemical processes governing weathering, soil mineral formation and stability, common solubility equilibria. Use of chemical principles to explain surface chemical properties of soils and environmental problems in water and soil chemical systems. Preparation of professional quality reports based on laboratory data and library research. 3 lectures, 1 laboratory, 1 activity.

SS 424. Environmental Soil Physics - Senior Project. 5 units

Term Typically Offered: W

Prerequisite: CHEM 125 or CHEM 128; MATH 141 or MATH 161; PHYS 121 or PHYS 141; SS 120; NR 363; or graduate standing.

Matter and energy in soils, with emphasis on properties and behavior of solids, water, air, and heat. Applications to agriculture, forestry, range management, engineering, and environmental sciences. Preparation of professional reports based on laboratory data and library research. Satisfies senior project requirement. 3 lectures, 1 laboratory, 1 activity. Formerly SS 432.

SS 431. Digital Soil Mapping. 4 units

Term Typically Offered: SP

Prerequisite: GEOG 318 or LA/NR 218; STAT 217 or STAT 218; or graduate standing. Recommended SS 321.

Development and production of digital soil surveys for interpretive purposes. Use of soil taxonomy, land classification systems, geographic information system (GIS) software, and geostatistics to evaluate land for best management practices. 2 lectures, 2 laboratories.

SS 440. Forest and Range Soils. 4 units

Term Typically Offered: SP

Prerequisite: SS 120 or SS 121; and SS 321.

Ecosystem approach to chemical, biological, physical and mechanical properties of forest and range soils. Site quality, nutrient cycling, erosion and mass movement, fire effects. Preparation of soil management reports similar to those required by various land management organizations. Overnight field trips. 3 lectures, 1 laboratory.

SS 444. Soil Judging. 2 units

Term Typically Offered: F, SP

Prerequisite: SS 321.

Morphological description of soils in the field. Taxonomic determination of classifications and interpretive properties from soil descriptions. Participation in collegiate soil judging contests. Total credit limited to 12 units. 1 lecture, 1 laboratory.

SS 463. Undergraduate Seminar. 2 units

Term Typically Offered: TBD

Prerequisite: SS 461.

Review of current research, experiments, and problems related to the student's major field of interest. Preparation and presentation of reports on problems or research activities. 2 seminars.

SS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule list topic selected. Total credit limited to 12 units. 1 to 4 lectures. Crosslisted as ERSC/SS 470.

SS 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories. Crosslisted as ERSC/SS 471.

SS 500. Individual Study in Soil Science. 1-6 units

Term Typically Offered: F,W,SPSU

Prerequisite: Consent of instructor.

Advanced independent study planned and completed under the direction of a member of the Earth and Soil Sciences faculty. Total credit limited to 6 units.

SS 522. Advanced Soil Fertility. 3 units

Term Typically Offered: W

Prerequisite: SS 221, graduate standing, or consent of instructor.

Current research frontiers in soil fertility. Evaluating soil testing philosophy, theories and interpretation. Optimizing soil conditions for maximizing crop production. Consequences of environmental pollution, trace elements and organic amendments. Use of biofertilizers, soil amendments, and enhanced efficiency fertilizers. Isotopes in soil fertility. 3 lectures.

SS 570. Selected Topics in Soil Science. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 12 units. 1 to 4 seminars.

SS 571. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

SS 582. GIS in Advanced Land Management. 3 units

Term Typically Offered: TBD

Prerequisite: Graduate standing, NR/LA 318, or consent of instructor.

Development of plans and practices for the management of crop, range, urban and wood land. 2 seminars, 1 laboratory.

SS 599. Thesis. 1-6 units

Term Typically Offered: F,W,SPSU

Prerequisite: Graduate standing and consent of instructor.

Individual research in soil science under faculty supervision, leading to a scholarly written presentation exhibiting originality, clarity, critical and independent thinking, proper analysis of data, appropriate organization and format, and accurate and thorough documentation. Six units required for the M.S. degree.

Spanish (SPAN)

undefined

SPAN Courses

SPAN 101. Elementary Spanish I. 4 units

Term Typically Offered: F, W, SP

Beginning Spanish. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Not open to students with credit in SPAN 104, SPAN 111, or SPAN 141. 4 lectures.

SPAN 102. Elementary Spanish II. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SPAN 101, SPAN 111, SPAN 141, or appropriate score on placement exam or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Not open to students with credit in SPAN 104 or SPAN 142. 4 lectures.

SPAN 103. Elementary Spanish III. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SPAN 102, SPAN 142, or appropriate score on placement exam or consent of instructor.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Not open to students with credit in SPAN 104 or SPAN 143. 4 lectures.

SPAN 104. Intensive Elementary Spanish. 12 units

Term Typically Offered: TBD

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context. Offered in summer only. Not open to students with credit in SPAN 102, SPAN 103, SPAN 142, and/or SPAN 143. 9 lectures, 3 activities.

SPAN 111. Elementary Hispanic Language and Culture. 4 units

Term Typically Offered: F, W

USCP

Beginning Spanish. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation with special focus on vocabulary and culture from American agribusiness and the Hispanic cultures of the United States and Latin America. Not open to students with credit in SPAN 101 or SPAN 141. 4 lectures. Fulfills USCP.

SPAN 141. Elementary Spanish I Study Abroad. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: Acceptance into the Cal Poly Global Program.

Beginning Spanish. Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in SPAN 101, 104, or SPAN 111. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

SPAN 142. Elementary Spanish II Study Abroad. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 101, SPAN 111, SPAN 141 or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in SPAN 102 or 104. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

SPAN 143. Elementary Spanish III Study Abroad. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 102, SPAN 142, or appropriate score on placement exam; and acceptance into the Cal Poly Global Program.

Class practice and assigned outside work in pronunciation, sentence structure, reading, writing, and conversation. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in SPAN 103 or 104. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

SPAN 201. Intermediate Spanish I. 4 units

Term Typically Offered: F, W, SP

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 103, SPAN 143, or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Spanish within an intercultural context. Not open to students with credit in SPAN 204 or SPAN 241. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

SPAN 202. Intermediate Spanish II. 4 units

Term Typically Offered: F, W, SP

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 201, SPAN 241, or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Spanish within an intercultural context. Not open to students with credit in SPAN 204 or SPAN 242. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

SPAN 203. Intermediate Spanish III. 4 units

Term Typically Offered: F, W, SP

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 202, SPAN 242, or appropriate score on placement exam or consent of instructor.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Spanish within an intercultural context. Not open to students with credit in SPAN 206 or SPAN 243. 4 lectures. Fulfills GE Electives - Area C (GE Area C5 for students on the 2019-20 or earlier catalogs).

SPAN 206. Spanish for Heritage Speakers. 4 units

Term Typically Offered: SP

USCP

Prerequisite: SPAN 202, SPAN 242, or appropriate score on placement exam or consent of instructor.

Focus on the grammatical, cultural and linguistic needs of students who grew up speaking Spanish in their homes/communities, but whose schooling has been primarily in English. Emphasis on reading and writing skills, vocabulary and spelling as well as on cultural understanding. Not open to students with credit in SPAN 203 or SPAN 243. 4 lectures. Fulfills USCP.

SPAN 207. Introduction to Spanish Linguistics. 4 units

Term Typically Offered: F

Prerequisite: SPAN 203, SPAN 206, SPAN 243, or consent of instructor.

Introduction to the scientific study of the Spanish language with an overview of theoretical and applied linguistics and special emphasis on Spanish phonetics and phonology. Conducted in Spanish. 4 lectures.

SPAN 233. Introduction to Hispanic Readings. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

Prerequisite: Completion of GE Area A with grades of C- or better; and SPAN 203, SPAN 206, SPAN 243, or consent of instructor.

Selected readings from Hispanic authors that show the Hispanic literary tradition from the Middle Ages to the present in Spain, Latin America, and of Latino/a writers in the United States. May include film and other media. Conducted in Spanish. 4 lectures. Fulfills GE Area C2 (GE Area C1 or GE Area C2 for students on the 2019-20 or earlier catalogs).

SPAN 241. Intermediate Spanish I Study Abroad. 4 units

Term Typically Offered: F,W,SP,SPSU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 103, SPAN 143, or appropriate score on placement exam; acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Spanish. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in SPAN 201. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

SPAN 242. Intermediate Spanish II Study Abroad. 4 units

Term Typically Offered: F,W,SP,SPSU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 201, SPAN 241, or appropriate score on placement exam; acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Spanish. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in SPAN 202. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

SPAN 243. Intermediate Spanish III Study Abroad. 4 units

Term Typically Offered: F,W,SP,SPSU

2020-21 or later catalog: GE Area C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier: GE Area C1 or C2

2019-20 or earlier catalog: GE Area C5

Prerequisite: SPAN 202, SPAN 242, or appropriate score on placement exam; acceptance into the Cal Poly Global Program.

Development of presentational, interpersonal, and interpretive intermediate-level language skills in Spanish. Language taught in its intercultural context at a Cal Poly Global Program study center. Not open to students with credit in SPAN 203 or SPAN 206. 3 lectures, 1 activity. Fulfills GE Area C2 (GE Area C1, C2, or C5 for students on the 2019-20 or earlier catalogs).

SPAN 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. Open only to undergraduate students. The Class Schedule will list topic selected. Conducted in Spanish. Total credit limited to 8 units. 1 to 4 lectures.

SPAN 301. Advanced Composition in Spanish. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SPAN 203, SPAN 206, SPAN 243, or consent of instructor.

Oral and written development of structural grammar, syntax, and complex components of Spanish. Vocabulary expansion and idiomatic construction. Written compositions. May include Spanish/English translation. Conducted in Spanish. 4 lectures.

SPAN 302. Advanced Conversation and Composition in Spanish. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SPAN 203, SPAN 206, SPAN 243, or consent of instructor.

Formal discussion of, and writing on selected cultural topics from the Spanish-speaking world. Focus on individual and group presentations and in-class writing and speaking assignments to enhance students' vocabulary and critical thinking skills in Spanish. Conducted in Spanish. 4 lectures.

SPAN 303. Introduction to English-Spanish Translation. 4 units

Term Typically Offered: F, W

Prerequisite: Completion of GE Area A with grades of C- or better; and SPAN 207 or SPAN 233 or SPAN 301 or SPAN 302 or consent of instructor.

Developing basic knowledge, skills, theories and techniques required for translation both from Spanish to English and from English to Spanish. Translating news articles, legal documents, commercial advertisements, formal letters, and literary works. Conducted in Spanish. 4 lectures.

SPAN 305. Significant Works in Spanish. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and SPAN 233 or consent of instructor.

Critical analysis and oral discussion of poetry, essays, novels, plays, films, and other media by selected Hispanic authors. Conducted in Spanish. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

SPAN 307. Spanish and Latin American Film. 4 units

Term Typically Offered: W, SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and SPAN 233 or consent of instructor.

Study, analysis, and critique of films from Spain and/or Latin America, organized around such topics as individual film directors or genres, national and international film traditions, migration, gender, ethnicity, and politics. Evaluation of works in their cultural contexts. The Class Schedule will list topic selected and language of instruction (English or Spanish). Total credit limited to 8 units. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

SPAN 340. Chicano/a Authors. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and SPAN 233 or consent of instructor.

Introduction to Chicano/a literary accomplishments to facilitate appreciation of Chicano/a literary aesthetics and increase understanding of Chicano/a cultural values and lifestyles. Conducted in Spanish. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

SPAN 350. Hispanic Literature in English Translation. 4 units

Term Typically Offered: W, SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

Selected works to be read by students in English translation. Critical analysis, interpretation, and comparison of works by Hispanic authors. Course may include film and other media. Discussion in English. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

SPAN 351. Chicano/Latino Writers in the United States. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Analysis and exploration of the major themes of Chicano/Latino literature in the United States today. Emphasis on Chicano/a, Puerto Rican, Cuban American and other U.S. Latino/a writers. All readings and discussions in English. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

SPAN 380. Spanish for the Professions. 4 units

Term Typically Offered: F, W, SP

Prerequisite: SPAN 203, SPAN 206, or appropriate score on placement exam or consent of instructor.

Development of professional language skills, cultural competency and critical perspectives in selected professional fields in order to communicate effectively in Spanish. Conducted in Spanish. The Class Schedule will list topic selected. Total credit limited to 8 units. Course may be offered in classroom-based or online format. 4 lectures.

SPAN 390. Introduction to Creative Writing in Spanish. 4 units

Term Typically Offered: SP

Prerequisite: SPAN 301 or consent of instructor.

Directed practice with writing narrative, poetry and/or drama writing in Spanish. An examination of plot, character and theme development. Crafting of creative literature for potential publication. Conducted in Spanish. 4 lectures.

SPAN 402. Advanced Topics in Spanish Linguistics. 4 units

Term Typically Offered: W

Prerequisite: SPAN 207.

Advanced study of Spanish linguistics. Topics include bilingualism and code-switching, sounds and pronunciation, word formation, grammatical structures, meaning and intention. Introduction to research methodologies in the social sciences to discuss issues of Spanish in the US, identity, race, and migration. Conducted in Spanish. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

SPAN 410. Advanced Literature in Spanish. 4 units

Term Typically Offered: F, W

Prerequisite: SPAN 233 or consent of instructor.

In-depth study of literature in Spanish. Specific genre, literary period, authorial group, region, or country. Chicano/Latino literature, Latin American literature, and Spanish literature. Course may include film and other media. Conducted in Spanish. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

SPAN 416. Don Quixote. 4 units

Term Typically Offered: W

Prerequisite: SPAN 233 or consent of instructor.

Intensive reading of Cervantes' novel, Don Quixote (Part 1, 1605 and Part 2, 1615) in the context of Cervantes' life and the history and social context of Spanish renaissance and baroque culture. Conducted in Spanish. 4 lectures.

SPAN 470. Selected Advanced Topics. 4 units

Term Typically Offered: W, SP

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. Conducted in Spanish. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures.

Special Education (SPED)

undefined

SPED Courses

SPED 420. Understanding Special Education. 4 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area D1; one course in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs); and completion of GE Area E (GE Area D4 for students on the 2017-19 or earlier catalogs).

Overview of the field of special education, including a historical perspective of special education, special education law, service delivery models, and characteristics of students with variable learning needs. 3 seminars, 1 activity.

SPED 545. Mathematics Methods for Students with Disabilities. 4 units

Term Typically Offered: W

Prerequisite: Admission to Master of Science in Special Education/ Education Specialist Credential Program.

Principles of mathematics instruction for students with disabilities. Implementation of field-based instruction, teaching, and assessing practices in mathematics for K-12 students with mild/moderate disabilities. 3 seminars, 1 activity.

SPED 547. Science and Social Studies Methods for Students with Disabilities. 4 units

Term Typically Offered: W

Prerequisite: Admission to the Integrated Master of Science in Special Education and Education Specialist Credential Program.

Principles of science and social studies instruction for students with disabilities. Implementation of field-based instruction, teaching, and assessing practices in science and social studies for K-12 students with mild/moderate disabilities. 3 seminars, 1 activity.

SPED 587. Instructional Methods for Learners with Autism. 4 units

Term Typically Offered: F

Prerequisite: Admission to the Integrated Master of Science in Special Education and Education Specialist Credential Program.

Focuses on the specific instructional approaches that are most effective for learners with autism. Meets the core competencies required for the Autism Authorization through the California Commission on Teacher Credentialing. 3 lectures, 1 activity.

SPED 588. Developing Compliant Individualized Education Plans. 4 units

Term Typically Offered: F

Prerequisite: Admission to Integrated Master of Science in Special Education and Education Specialist Credential Program.

The development and implementation of California compliant Individualized Education Plans (IEPs) for students with disabilities, including legal requirements, communication, and collaboration with all stakeholders, and IEP meeting facilitation and problem-solving. 3 lectures, 1 activity.

Statistics (STAT)

undefined

STAT Courses

STAT 130. Introduction to Statistical Reasoning. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area B4

2019-20 or earlier catalog: GE Area B1

Prerequisite: MATH 96; or MATH 115; or appropriate Math Placement Level.

Survey of statistical ideas and philosophy. Emphasis on concepts rather than in-depth coverage of statistical methods. Topics include sampling, experimentation, data exploration, chance phenomena, and methods of statistical inference. Not open to students with credit in any statistics course. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

STAT 150. Introduction to the Discipline of Statistics. 2 units

Term Typically Offered: F

Prerequisite: Statistics major.

Orientation to the statistics program, introduction to the discipline of statistics, including the development of the discipline, professional ethics, data visualization and the role of statistics in the scientific enterprise. Note: Course is intended for students in their first quarter at Cal Poly. 2 lectures.

STAT 200. Special Problems for Undergraduates. 1-2 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 2 units per quarter.

STAT 217. Introduction to Statistical Concepts and Methods. 4 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 96; or MATH 115; or appropriate Math Placement Level.

Sampling and experimentation, descriptive statistics, confidence intervals, two-sample hypothesis tests for means and proportions, Chi-square tests, linear and multiple regression, analysis of variance. Substantial use of statistical software. Not open to students with credit in STAT 218 or STAT 251. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

STAT 218. Applied Statistics for the Life Sciences. 4 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: MATH 96; or MATH 115; or appropriate Math Placement Level.

Data collection and experimental design, descriptive statistics, confidence intervals, parametric and non parametric one and two-sample hypothesis tests, analysis of variance, correlation, simple linear regression, chi-square tests. Applications of statistics to the life sciences. Substantial use of statistical software. Course may be offered in classroom-based, online, or hybrid format. Not open to students with credit in STAT 217 or STAT 251. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

STAT 251. Statistical Inference for Management I. 4 units

Term Typically Offered: F, W, SP
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: Appropriate Math Placement Level or MATH 118.

Descriptive statistics. Probability and counting rules. Random variables and probability distributions. Sampling distributions and point estimation. Confidence intervals and tests of hypotheses for a single mean and proportion. Course may be offered classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

STAT 252. Statistical Inference for Management II. 5 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later catalog: GE Area B4
 2019-20 or earlier catalog: GE Area B1
 Prerequisite: STAT 251 with a minimum grade of C- or consent of instructor.

Confidence intervals and tests of hypotheses for two means and two proportions. Introduction to ANOVA, regression, correlation, multiple regression, time series, and forecasting. Statistical quality control. Enumerative data analysis. Substantial use of statistical software. Course may be offered in classroom-based, online, or hybrid format. 5 lectures. Fulfills GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); a grade of C- or better is required in one course in this GE area.

STAT 270. Selected Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

STAT 301. Statistics I. 4 units

Term Typically Offered: F, W
 Corequisite: MATH 141.

Introduction to statistics for mathematically inclined students, focused on process of statistical investigations. Observational studies, controlled experiments, randomization, confounding, randomization tests, hypergeometric distribution, descriptive statistics, sampling, bias, binomial distribution, significance tests, confidence intervals, normal model, t-procedures, two-sample procedures. Substantial use of statistical software. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 302. Statistics II. 4 units

Term Typically Offered: W, SP
 Prerequisite: STAT 301 with a grade of C- or better; or consent of instructor.

Continued study of the process, concepts, and methods of statistical investigations. Association, chi-square procedures, one-way ANOVA, multiple comparisons, two-way ANOVA with interaction, simple linear regression, correlation, prediction, multiple regression. Substantial use of statistical software. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 305. Introduction to Probability and Simulation. 4 units

Term Typically Offered: F, W
 Prerequisite: one of the following: BUS 392, CPE/CSC 101, CSC 232, CPE/CSC 235, ECON 395, or STAT 331; and MATH 142.

Basic probability rules, counting methods, conditional probability. Discrete and continuous random variables, expected values, variance and covariance. Properties of linear combinations of random variables with applications to statistical estimators. Simulation analysis of random phenomena using a modern computer language. Not open to students with credit in STAT 321. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 312. Statistical Methods for Engineers. 4 units

Term Typically Offered: F,W,SP,SU
 2020-21 or later: Upper-Div GE Area B
 2019-20 or earlier catalog: GE Area B5, B6, or B7
 Prerequisite: Junior standing or one of the following majors: CPE, CSC, EE, GENE, IE, MATE, MFGE, or SE; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and MATH 142.

Descriptive and graphical methods. Discrete and continuous probability distributions. One and two sample confidence intervals and hypothesis testing. Single factor analysis of variance. Quality control. Introduction to regression and to experimental design. Substantial use of statistical software. Not open to students with credit in STAT 252 or STAT 302. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

STAT 313. Applied Experimental Design and Regression Models. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing or one of the following majors: ASCI, BIO, CRP, DSCI, EESS, ENVE, ENVM, HLTH, KINE, MCRO, MSCI, POLS, PSY or SOC; completion of GE Area A with grades of C- or better; MATH 118 with a grade of C- or better, or appropriate Math Placement Level; and one of the following courses: STAT 217, STAT 218 or STAT 312 with a minimum grade of C- or better.

Applications of statistics for students not majoring in statistics or mathematics. Analysis of variance including one-way classification, randomized blocks, and factorial designs; multiple regression, model diagnostics, and model comparison. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

STAT 314. Statistical Methods for Food Science. 4 units

Term Typically Offered: F, W

Prerequisite: STAT 218.

Statistical methods for sensory analysis and food product development. Discrimination testing: paired, duo-trio, triangle. Two-way ANOVA, 2^k, fractional factorial, response surface, mixture designs. Quality and process control. Not open to students with credit in STAT 323. 4 lectures.

STAT 321. Probability and Statistics for Engineers and Scientists. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing or one of the following majors: AERO, ARCE, CSC, EE, GENE, IE, MATE, MFGE or SE; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and MATH 142.

Tabular and graphical methods for data summary, numerical summary measures, probability concepts and properties, discrete and continuous probability distributions, expected values, statistics and their sampling distributions, point estimation, confidence intervals for a mean and proportion. Use of statistical software. Not open to students with credit in STAT 301. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

STAT 323. Design and Analysis of Experiments I. 4 units

Term Typically Offered: W, SP

Prerequisite: IME 326 or STAT 252 or STAT 302 or STAT 312 or STAT 313.

Principles, construction and analysis of experimental designs. Completely randomized, randomized complete block, Latin squares, Graeco Latin squares, factorial, and nested designs. Fixed and random effects, expected mean squares, multiple comparisons, and analysis of covariance. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 324. Applied Regression Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: IME 326 or STAT 252 or STAT 302 or STAT 312 or STAT 313.

Linear regression including indicator variables, influence diagnostics, assumption analysis, selection of 'best subset', nonstandard regression models, logistic regression, nonlinear regression models. Not open to students with credit in STAT 334. Not open to Statistics Majors. 4 lectures.

STAT 330. Statistical Computing with SAS. 4 units

Term Typically Offered: F, W

Prerequisite: IME 326 or STAT 252 or STAT 302 or STAT 312 or STAT 313.

Data acquisition, cleaning, and management using SAS; reading data into SAS from various sources, recoding variables, subsetting and merging data, exporting results in other formats. Graphical procedures, basic descriptive and inferential statistics. Introduction to SAS macros. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 331. Statistical Computing with R. 4 units

Term Typically Offered: F,W,SP, SU

Prerequisite: IME 326, STAT 252, STAT 302, STAT 312, or STAT 313; and BUS 392, CPE/CSC 101, CSC 231, CSC 232, CSC 234, or ECON 395.

Importing, managing, and cleaning data from a variety of sources. Use of regular expressions, exploratory data analysis, functional and object-oriented programming. Graphical, descriptive, and inferential statistical methods. Methods of simulation, randomization and resampling. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 334. Applied Linear Models. 4 units

Term Typically Offered: W, SP

Prerequisite: one of the following: STAT 252, STAT 302, STAT 312, STAT 313, or IME 326; and one of the following: MATH 206, or MATH 244.

Linear models in algebraic and matrix form, diagnostics, transformations, polynomial models, categorical predictors, model selection, correlated errors, logistic regression. Course may be offered in classroom-based, online, or hybrid format. Not open to students with credit in STAT 324. 4 lectures.

STAT 350. Probability and Random Processes for Engineers. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); MATH 241; and CPE 327 or EE 228.

Random events, random variables, and random processes, with emphasis on probabilistic treatment of signals and noise. Specific topics include: sample spaces, probability, distributions, independence, moments, covariance, time/ensemble averages, stationarity, common processes, correlation and spectral functions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

STAT 365. Statistical Communication. 2 units

Term Typically Offered: SP

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs); completion of GE Area A3 with a grade of C- or better; and one of the following: STAT 252, STAT 302, or STAT 313.

Written communication of statistical ideas and content. Analyze data using appropriate methods from previous statistics courses. Writing technical reports with appropriate graphs and tables. Strategies to discern relevant and necessary information to communicate data, ideas, and results to different audiences. Course may be offered in classroom-based, online, or hybrid format. 2 lectures.

STAT 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, studies or surveys of selected problems. Total credit limited to 5 units, with a maximum of 4 units per quarter.

STAT 405. Applied Probability Models. 4 units

Term Typically Offered: SP

Prerequisite: CPE/CSC 101 or CSC 232 or CPE/CSC 235; MATH 206 or MATH 244; and STAT 305 or STAT 350 or STAT 426.

Advanced probability models, their simulation and application. Poisson processes, Markov chains, random walks, and continuous-time Markov processes. Monte Carlo integration and simulation methods, including Markov chain Monte Carlo and Gibbs sampling. 4 lectures.

STAT 410. Statistics Education: Pedagogy, Content, Technology, and Assessment. 4 units

Term Typically Offered: W

Prerequisite: one of the following: STAT 130, STAT 217, STAT 218, STAT 251, STAT 301, STAT 312, STAT 321, STAT 511, STAT 512 or STAT 542.

Topics related to content, pedagogy, technology, and assessment for teaching statistics in grades 6-16 in accordance with current standards and research for teaching statistics including the Common Core State Standards for Mathematics. 4 lectures.

STAT 414. Multilevel and Mixed Modeling. 4 units

Term Typically Offered: F

Prerequisite: STAT 324 or STAT 334 or STAT 524.

Overview of multilevel and mixed models, including hierarchical data, intraclass correlation, fixed vs. random coefficients, variance components, comparisons to traditional analyses. Use of statistical software for implementation of methods. 4 lectures.

STAT 415. Bayesian Reasoning and Methods. 4 units

Term Typically Offered: W

Prerequisite: one of the following: IME 326, STAT 252, STAT 302, STAT 312, STAT 313, or STAT 513; and one of the following: STAT 305, STAT 321, STAT 350, or STAT 425. Recommended: STAT 331.

Bayes' theorem, prior and posterior distributions, likelihood functions, Markov Chain Monte Carlo methods, hierarchical modeling. Bayesian data analysis, comparison of Bayesian and classical (frequentist) approaches. 4 lectures.

STAT 416. Statistical Analysis of Time Series. 4 units

Term Typically Offered: F

Prerequisite: STAT 324 or STAT 334 or STAT 524.

Time series components, descriptive smoothing methods, regression models for time series data, forecasting via exponential smoothing, evaluation of forecasts, autocorrelation, ARIMA models and Box-Jenkins methods, combining forecasts, frequency domain analysis, filtering. 4 lectures.

STAT 417. Survival Analysis Methods. 4 units

Term Typically Offered: W

Prerequisite: IME 326 or STAT 252 or STAT 302 or STAT 312 or STAT 313; and MATH 142.

Parametric and nonparametric methods for analyzing survival data. Topics include Kaplan-Meier and Nelson-Aalen estimates, Cox regression models, accelerated failure time models. Use of statistical software to implement methods throughout course. 4 lectures.

STAT 418. Categorical Data Analysis. 4 units

Term Typically Offered: W

Prerequisite: STAT 324 or STAT 334 or STAT 524.

Discrete multivariate statistics, including analysis of cross-classified data, log-linear models for multidimensional contingency tables, goodness of fit statistics, measures of association, model selection, and hypothesis testing. 4 lectures.

STAT 419. Applied Multivariate Statistics. 4 units

Term Typically Offered: W, SP

Prerequisite: One of the following: IME 326, STAT 252, STAT 302, STAT 312, STAT 313, STAT 513, or STAT 542; and one of the following: MATH 206, MATH 244, or graduate standing.

Continuous multivariate statistics. Multivariate linear model, principal components and factor analysis, discriminant analysis, clustering, classification, and canonical correlation. Use of statistical software throughout the course. 4 lectures.

STAT 421. Survey Sampling and Methodology. 4 units

Term Typically Offered: F

Prerequisite: IME 326 or STAT 252 or STAT 302 or STAT 312 or STAT 313 or STAT 511 or STAT 512 or STAT 513.

Survey planning, execution, and analysis. Principles of survey research, including non-sampling and sampling error topics. Survey sample designs, including simple random, systematic, stratified, cluster, and multi-stage. Estimation procedures and sample size calculations. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 423. Design and Analysis of Experiments II. 4 units

Term Typically Offered: SP

Prerequisite: STAT 323 or STAT 523.

Continuation of STAT 323. 2k factorial designs, 3k factorial designs, balanced and partially balanced incomplete block designs, nested designs, split-plot designs, response surface methodology, confounding, repeated measures, and other design approaches. 4 lectures.

STAT 425. Probability Theory. 4 units

Term Typically Offered: F
 Prerequisite: MATH 241; MATH 248 or CSC 348; and STAT 305.
 Recommended: STAT 301.

Rigorous development of probability theory. Probability axioms, combinatorial methods, conditional and marginal probability, independence, random variables, univariate and multivariate probability distributions, conditional distributions, transformations, order statistics, expectation and variance. Use of statistical simulation throughout the course. 4 lectures.

STAT 426. Estimation and Sampling Theory. 4 units

Term Typically Offered: W
 Prerequisite: STAT 425. Recommended: STAT 302.

Continuation of STAT 425. Properties of statistics obtained from samples. Sample mean properties, convergence in probability, law of large numbers, and central limit theorem. Selected probability distributions. Theory of estimation. Sampling distribution of estimators. 4 lectures.

STAT 427. Mathematical Statistics. 4 units

Term Typically Offered: SP
 Prerequisite: STAT 426.

Continuation of STAT 426. The theory of hypothesis testing and its applications. Power and uniformly most powerful tests. Categorical data and nonparametric methods. Other selected topics. 4 lectures.

STAT 431. Advanced Statistical Computing with R. 4 units

Term Typically Offered: SP
 Prerequisite: STAT 331.

Advanced techniques for efficient use of computers to perform statistical computations and to analyze large amounts of data. Includes version control systems; tools supporting reproducibility; functional programming; randomization and bootstrapping; dynamic data visualizations; and R package development. 4 lectures.

STAT 434. Statistical Learning: Methods and Applications. 4 units

Term Typically Offered: SP
 Prerequisite: one of the following: STAT 324, STAT 334, or STAT 524.
 Recommended: STAT 331 or STAT 531.

Modern methods in predictive modeling and classification. Splines, smoothing splines, ridge regression, LASSO, regression and classification trees, generalized additive models, logistic regression, and linear discriminant analysis. Model assessment and selection using cross validation, bootstrapping, AIC, and BIC. 4 lectures.

STAT 440. SAS Certification Preparation. 2 units

Term Typically Offered: W
 Prerequisite: STAT 330.

Programming, data management, and data analysis in preparation for the Certified Base Programmer Exam offered by the SAS Institute. Topics include accessing data, creating data structures, managing data, generating reports, and handling errors. 2 lectures.

STAT 441. SAS Advanced Certification Preparation. 2 units

Term Typically Offered: SP
 Prerequisite: STAT 440.

Programming topics in preparation for the Certified Advanced Programmer Exam offered by the SAS Institute. Accessing data using PROC SQL, macro processing, applications for indexes, data look-up techniques including array processing, hash objects, and combining/merging. 2 lectures.

STAT 461. Senior Project I. 1 unit

Term Typically Offered: F, W, SP
 Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 90 hours total time.

STAT 462. Senior Project II. 2 units

Term Typically Offered: F, W, SP
 Prerequisite: Completion of GWR.

Selection and completion of a project under faculty supervision. Projects typical of problems which graduates must solve in their fields of employment. Project results are presented in a formal report. Minimum 90 hours total time.

STAT 465. Statistical Consulting. 4 units

Term Typically Offered: TBD
 Prerequisite: STAT 323; STAT 330; STAT 331; STAT 334; STAT 365; Statistics major; and senior standing.

Blending of the theoretical and practical aspects of statistical consulting. Development of tools necessary to conduct effective consulting sessions, present oral arguments and written reports, work collaboratively to solve problems, and utilize professional publications in statistics. Not open to students with credit in STAT 466. 4 lectures.

STAT 466. Senior Project - Statistical Consulting. 4 units

Term Typically Offered: SP
 Prerequisite: STAT 323; STAT 330; STAT 331; STAT 334; STAT 365; Statistics major; and senior standing.

Blending of the theoretical and practical aspects of statistical consulting. Development of tools necessary to conduct effective consulting sessions, present oral arguments and written reports. Work collaboratively to solve problems and utilize professional publications in statistics. Fulfills senior project requirement for Statistics major. Not open to students with credit in STAT 465. 2 lectures, 2 discussions.

STAT 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD
 Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

STAT 485. Cooperative Education Experience. 6 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Part-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 6 units; total credit limited to 12 units. Credit/No Credit grading only.

STAT 495. Cooperative Education Experience. 12 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Sophomore standing and consent of instructor.

Full-time work experience in business, industry, government, and other areas of student career interest. Positions are paid and usually require relocation and registration in course for two consecutive quarters. Formal report and evaluation by work supervisor required. Major credit limited to 12 units; total credit limited to 24 units. Credit/No Credit grading only.

STAT 500. Independent Study. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and consent of instructor.

Individual research or advanced study planned and completed under the direction of a departmental faculty member. Total degree credit limited to 4 units. Total credit limited to 12 units.

STAT 511. Statistical Methods. 4 units

Term Typically Offered: F

Prerequisite: Graduate standing and intermediate algebra or equivalent.

Statistical methods in research for graduate students not majoring in mathematical sciences. Probability distributions, confidence intervals, hypothesis testing, contingency tables, linear regression and correlation, multiple regression, analysis of variance. Substantial use of statistical software. 4 lectures.

STAT 513. Applied Experimental Design and Regression Models. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing and a grade of C- or better in one of the following: STAT 217, STAT 218, STAT 252, STAT 312, STAT 511, STAT 512, or STAT 542; or consent of instructor.

Applications of statistics for graduate students not majoring in mathematics. Analysis of variance including the one-way classification, randomized blocks, and factorial designs. Introduction to multiple regression and to analysis of covariance. Substantial use of statistical software. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Not open to students with credit in STAT 313.

STAT 523. Design and Analysis of Experiments I. 4 units

Term Typically Offered: W, SP

Prerequisite: one of the following: IME 326, STAT 252, STAT 302, STAT 312, STAT 313, STAT 513, or STAT 542; and graduate standing.

Principles, construction and analysis of experimental designs. Completely randomized, randomized complete block, Latin squares, Graeco-Latin squares, factorial, and nested designs. Fixed and random effects, expected mean squares, multiple comparisons, and analysis of covariance. Not open to students with credit in STAT 323. Course may be offered in classroom-based, online, or hybrid format. 4 lectures.

STAT 524. Applied Regression Analysis. 4 units

Term Typically Offered: F, W, SP

Prerequisite: one of the following: IME 326, STAT 252, STAT 302, STAT 312, STAT 313, STAT 513, or STAT 542; and graduate standing.

Linear regression including indicator variables, influence diagnostics, assumption analysis, selection of 'best subset', nonstandard regression models, logistic regression, nonlinear regression models. Not open to students with credit in STAT 324 or STAT 334. 4 lectures.

STAT 530. Statistical Computing with SAS. 4 units

Term Typically Offered: F, W

Prerequisite: STAT 511 or STAT 512 or STAT 513 or STAT 542.

Techniques available to the statistician for efficient use of computers to perform statistical computations and to analyze large amounts of data. Use of the SAS software system. Includes data preparation, report writing, basic statistical methods, and a research project. Course may be offered in classroom-based, online, or hybrid format. Not open to students with credit in STAT 330. 4 lectures.

STAT 531. Statistical Computing with R. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Graduate standing; STAT 513 or STAT 542; and one computer programming course; or consent of instructor.

Import, manage, and clean data. Use of regular expressions, exploratory data analysis, functional and object-oriented programming. Graphical, descriptive, and inferential statistical methods. Methods of simulation, randomization and resampling. Course may be offered in classroom-based, online, or hybrid format. Not open to students with credit in STAT 331. 4 lectures.

STAT 541. Advanced Statistical Computing with R. 4 units

Term Typically Offered: TBD

Prerequisite: STAT 331 or STAT 531; STAT 334; and STAT 426; and graduate standing; or consent of instructor.

Advanced techniques for efficient use of R software to perform statistical computations, analyze large amounts of data, and develop new software. Includes version control systems; code design, documentation, and unit testing; modern data and database software; dynamic data visualizations; special data types; efficient processing of big data; functional programming and recursion; and numerical integration and optimization. 4 lectures.

STAT 542. Statistical Methods for Engineers. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 142 and graduate standing.

Descriptive and graphical methods. Discrete and continuous probability distributions. One and two sample confidence intervals and hypothesis testing. Single factor analysis of variance. Quality control. Introduction to regression and to experimental design. Substantial use of statistical software. Course may be offered in classroom-based, online, or hybrid format. Not open to students with credit in STAT 312. 4 lectures.

STAT 543. Advanced Design and Analysis of Experiments. 4 units

Term Typically Offered: TBD

Prerequisites: STAT 323 or STAT 523; STAT 334; and graduate standing; or consent of instructor.

2^k and 3^k factorial and fractional factorial designs, balanced and partially balanced incomplete block designs, nested designs, split-plot designs, response surfaces, repeated measures, and other design approaches. Design matrices. Analysis and interpretation of fixed, random, and mixed effects models, analysis of covariance, and different parameterizations. 4 lectures.

STAT 545. Applied Stochastic Processes. 4 units

Term Typically Offered: TBD

Prerequisite: MATH 206 or MATH 244; and STAT 426; and graduate standing; or consent of instructor.

Properties, simulation, and application of stochastic processes. Discrete-time and continuous-time Markov chains, hidden Markov models, Poisson processes, Gaussian processes, continuous-state Markov processes. Markov chain Monte Carlo (MCMC) simulation methods and applications. Estimation methods for stochastic processes. 4 lectures.

STAT 550. Generalized Linear Models. 4 units

Term Typically Offered: TBD

Prerequisite: STAT 334 and STAT 427; and graduate standing; or consent of instructor.

Theory and application of linear and generalized linear models (GLMs). Logistic regression, nominal and ordinal responses, Poisson GLMs, correlated responses, random and mixed effects models, Bayesian GLMs, model selection and model checking. 4 lectures.

STAT 551. Statistical Learning with R. 4 units

Term Typically Offered: TBD

Prerequisite: STAT 305 or STAT 350; STAT 331 or STAT 531; STAT 334; and graduate standing; or consent of instructor.

Modern methods in predictive modeling. Supervised and unsupervised learning. Regression, classification, and clustering methods, including SVM, LASSO, splines, trees, and random forests. Model assessment and selection using cross validation, bootstrapping, and information criteria. Use of the R programming language. 4 lectures.

STAT 566. Graduate Consulting Practicum. 2 units

Term Typically Offered: TBD

Prerequisite: STAT 466 and graduate standing.

Practice in statistical consulting. Observing faculty-led consulting sessions. Organizing and leading consulting projects with faculty supervision. Discussion of statistical consulting cases in a seminar format. 2 seminars.

STAT 570. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing or consent of instructor.

Directed group study of selected topics for graduate students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

STAT 590. Graduate Seminar in Statistics. 1 unit

Term Typically Offered: TBD

Prerequisite: Graduate standing in Statistics.

Topics in advanced statistics selected by the faculty. Discussion of current research papers in statistics and implementation of methods. Total credit limited to 3 units. 1 seminar.

STAT 599. Thesis. 1-4 units

Term Typically Offered: TBD

Prerequisite: Graduate standing and consent of instructor.

Individual research under faculty supervision, leading to a graduate thesis. Total credit limited to 8 units.

Theatre (TH)

undefined

TH Courses

TH 201. First Year Theatre Experience. 4 units

Term Typically Offered: F

Development of methods and skills for Theatre Arts majors. Focus on the various roles involved in theatre-making through collaboration and experimentation. Introduction to the study and appreciation of Theatre; additional emphasis on practical and professional expectations, and career planning. Attendance at theatre performance(s) required. Not open to students with credit in TH 101. 4 lectures.

TH 210. Introduction to Theatre. 4 units

Term Typically Offered: F, W, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Overview of theatre principles and production practices, including terminology and conventions, methods, dramatic literature and performance, aesthetic appreciation, and technology. Emphasis on theatre as an integral cultural, social, and artistic entity. Attendance at theatre performance(s) required. Course may be offered in classroom-based, online, or hybrid format. Not open to students with credit in TH 201. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

TH 215. Verbatim Theatre. 4 units

Term Typically Offered: SP

Prerequisite: TH 220.

Focus on creation and performance of original devised work. Development of skills to research, collect, and produce content for use in performance. Emphasis on theatre to promote social change and awareness within a community about a particular topic or event. 3 lectures, 1 activity.

TH 220. Acting I. 4 units

Term Typically Offered: W

Prerequisite: TH 201 or TH 210.

Contemporary acting techniques focused on character building, objectives and tactics, with a focus on the development and implementation of various interactive methods of vocal work, images and actor resources. 3 lectures, 1 activity.

TH 225. Costume Construction I. 4 units

Term Typically Offered: F, W, SP

Basic costume construction techniques used in entertainment industry. Building of costumes and craft projects for mainstage theater productions. Students required to participate in rehearsals and productions as costume run crew. May not be taken concurrently with TH 230 or TH 330. 4 laboratories.

TH 227. Theatre History I. 4 units

Term Typically Offered: F, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Examine the traditions of theater, primarily Western, from its origins to the European Renaissance, within the context of wider cultural and political developments. Production methods, acting styles, playwriting theories and representative plays. Course may be offered in classroom-based or hybrid format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs).

TH 228. Theatre History II. 4 units

Term Typically Offered: F, W

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Highlights of European and North American theatrical history from the 18th to 21st century. Production methods, acting styles, playwriting theories and representative plays. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area C1 (GE Area C3 for students on the 2019-21 or earlier catalogs).

TH 230. Stagecraft I. 4 units

Term Typically Offered: F, W, SP

Basic stagecraft technique used in the entertainment industry. Construction and painting of scenery, building and gathering properties, hanging and focusing lighting instruments, and acting as running crew for department production each term. May not be taken concurrently with TH 225 or TH 325. 4 laboratories.

TH 235. Acting II. 4 units

Term Typically Offered: SP

Prerequisite: TH 220.

Examination and application of key styles of acting, with specific attention paid toward the comparison and development of performance techniques and/or theories via scene work. Enhancement of foundational skills related to character, given circumstances, tactics, and objectives. 3 lectures, 1 activity.

TH 240. Improvisational Theatre. 4 units

Term Typically Offered: TBD

Objectives and techniques of improvisational theatre. Participation in a series of exercises designed to develop skills in dramatic structure formatting, interactive problem solving, spontaneous scripting, dynamic communications, and applied performance styles. 2 lectures, 2 activities.

TH 245. Introduction to Stage Management. 4 units

Term Typically Offered: TBD

Basic stage managerial skills for organizing, preparing, and fulfilling theatrical productions from the inception through rehearsal and performance. 4 lectures.

TH 255. Technical Theatre Production. 4 units

Term Typically Offered: TBD

Prerequisite: TH 230.

Introduction to theatre production techniques and terminology, including tools and processes required to analyze, interpret, and construct scenery; concepts of lighting system and console programming; rigging practices. 3 lectures, 1 activity.

TH 256. Technology in Theatrical Design. 4 units

Term Typically Offered: TBD

Prerequisite: TH 230.

Introduction to various technologies and current software used in theatrical stage design, including graphics editors; computer-aided design; visualizers and mapping; projection creation. Mixed digital media preparation and presentation. Individual and group assignments. 3 lectures, 1 activity.

TH 260. Voice and Diction for the Stage. 4 units

Term Typically Offered: F

Prerequisite: TH 220.

Theory and practice in developing command of oral techniques for the stage including breath support, resonance and articulation. 4 lectures.

TH 265. Scenic Painting. 4 units

Term Typically Offered: W

Prerequisite: TH 230.

Introduction to scenic painting techniques used in theatre, including color mixing and media preparation, surface sizing and preparation, finishes, pattern or stencil work, and scaled transfer. Paint shop operations and functions. 3 lectures, 1 activity.

TH 270. Stage Make-Up. 4 units

Term Typically Offered: F

Introduction to the art of theatrical make-up design and application. Techniques for producing character, old age, fantasy and special effects make-up. Demonstration and discussion of various design and application styles. 3 lectures, 1 activity.

TH 275. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

TH 280. Body Awareness and Expression. 4 units

Term Typically Offered: TBD

Directed group study of movement techniques and exercises to facilitate expressive physical performance. Body effectiveness, alignment and conditioning practice integrated with creative exploration and movement analysis of effort, spatial awareness and detailed body usage. 4 lectures. Crosslisted as DANC/TH 280.

TH 285. Internship. 1-4 units

Term Typically Offered: F, W, SP
CR/NC

Prerequisite: TH 101; TH 210; and consent of instructor.

Part-time, supervised internship experience for Freshmen & Sophomore students in theatre or equivalent professionally related industry. Ability to work independently; strong verbal and written skills. Faculty approval of internship position required. Evaluations by supervisor and written reports by student required. 30 - 120 hours of work experience. Total credit limited to 4 units. Credit/ No credit grading only.

TH 290. Script Analysis. 4 units

Term Typically Offered: W
Prerequisite: TH 201 or TH 210.

Script analysis taught as an essential applied skill for actors, designers and directors. Students read a variety of plays and learn how to examine their structure, theme and context. 4 seminars.

TH 295. Foundations in Theatrical Design. 4 units

Term Typically Offered: SP
Prerequisite: TH 210 or TH 201.

Exploration of the fundamental principles and practices of designing for the stage. Emphasis placed upon the creative and collaborative process of theatre; development of the visual world of the play via language, color, drawing, analysis, and peer evaluation. 3 lectures, 1 activity.

TH 305. Topics in Diversity on the American Stage. 4 units

Term Typically Offered: W
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and TH 201, TH 227, or TH 228 for Theatre majors or completion of GE Area C1 for all other majors (GE Area C3 for students on the 2019-20 or earlier catalogs).

Critical analysis of traditionally underrepresented groups in the American theatre, as writers, practitioners, story subjects. Investigation of dramatic literature and performance trends related to special interest topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

TH 315. Physical Theatre. 4 units

Term Typically Offered: SP
Prerequisite: TH 220.

Development of physical expression for the purpose of creating content for the stage; exploration of modern theatrical movement modalities to develop physical impulse, spatial awareness, ensemble work, and storytelling. Course culminates with an original student devised performance. 3 lectures, 1 activity.

TH 325. Costume Construction II. 4 units

Term Typically Offered: F, W, SP
Prerequisite: TH 225.

Specialized and advanced costume construction techniques used in entertainment industry. Building of costumes and craft projects for mainstage theater productions. Students required to participate in rehearsals and productions as costume run crew. Total credit limited to 8 units. May not be taken concurrently with TH 230 or TH 330. 4 laboratories.

TH 330. Stagecraft II. 4 units

Term Typically Offered: F, W, SP
Prerequisite: TH 230.

Basic stagecraft technique used in the entertainment industry. Students construct and paint scenery, build and gather properties, hang and focus lighting instruments, and act as running crew for department production each term. Total credit limited to 8 units. May not be taken concurrently with TH 225 or TH 325. 4 laboratories.

TH 345. Mainstage Rehearsal and Performance. 4 units

Term Typically Offered: F, W, SP
Prerequisite: By audition only.

Preparation of a play for quarterly public presentation, including acting, stage management, publicity, or serving as a key member of the artistic team. Total credit limited to 12 units. Major credit limited to 4 units; repeated units are free electives. 4 laboratories.

TH 350. Seminar in Playwriting. 4 units

Term Typically Offered: W
Prerequisite: Completion of GE Area A with grades of C- or better; TH 201 or 210; and TH 290.

Examines dramatic structure, techniques of dialogue, and means of characterization in variety of plays. Relates dramatic writing to technical, design, directorial and acting demands. Compositions of monologues, scenes and one-act play; works read and critiqued in class. 4 seminars.

TH 355. Mainstage Production. 1-4 units

Term Typically Offered: F, W, SP
Prerequisite: TH 225 or TH 230; and consent of instructor.

Preparation of a play for quarterly public presentation. Assignments and projects may center around any technical area of theatre, including, but not limited to, the following: Designers, Assistant Designers, Technicians, Crews and Crew Heads. Total credit limited to 8 units. 1 to 4 laboratories.

TH 370. Costume History. 4 units

Term Typically Offered: TBD
Prerequisite: TH 201 or TH 210.

Dress worn in Western society from Ancient Egypt through AD 2000. Silhouette; how, when, and why particular garments were worn; emphasis on social, political, and economic context. 4 lectures.

TH 380. Theatre for Young Audiences. 4 units

Term Typically Offered: SP

Prerequisite: TH 201 or 210, or one upper-division Liberal Studies, Child Development or Psychology course.

Practice of educational drama as applied to multidisciplinary curricula. Collaborate on story-based improvisation in areas that include language arts, social studies, geography and science with additional focus on examining emotional development and creativity. 3 lectures, 1 activity.

TH 390. Global Theatre and Performance. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and TH 201, TH 210, TH 227, or TH 228 for Theatre majors or completion of GE Area C1 for all other majors (GE Area C3 for students on the 2019-20 or earlier catalogs). Recommended: TH 210 for all other majors.

Investigation of non-American theatre and dramatic performance; emphasis on plays, playwrights, and movements as portraits of philosophical/national make-up. Topical emphasis focuses on the definition and development of a cultural identity via the context of historical and contemporary theatre practices. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

TH 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department head.

Individual investigation, research, or project centering around theatre. Total credit limited to 8 units.

TH 425. Acting III. 4 units

Term Typically Offered: F

Prerequisite: Consent of Instructor.

Advanced performance methodology. Focus on actor training in the theatre; analysis and professional skills; development approaches to material for the stage and auditioning. Enhancement of techniques related to monologues, scene study, and auditions. The Class Schedule will list topic selected. Total credit limited to 8 units. 3 lectures, 1 activity.

TH 430. Scenic Design. 4 units

Term Typically Offered: F

Prerequisite: TH 290 and TH 295.

Scenic design process used in the entertainment industry, including collaboration, concept development, research, sketching, drafting, color rendering using a variety of media, 3D model building, and the presentation of design material. 3 lectures, 1 activity.

TH 432. Costume Design. 4 units

Term Typically Offered: W

Prerequisite: TH 290 and TH 295.

Costume design process used in the entertainment industry, including collaboration, concept development, research, sketching, color rendering using a variety of media, and the presentation of design material. 3 lectures, 1 activity.

TH 434. Lighting Design. 4 units

Term Typically Offered: F

Prerequisite: TH 290 and TH 295.

Lighting design process used in the entertainment industry, including collaboration, concept development, research, functional aspects of lighting equipment, CAD drafting, the development of production paperwork and presentation of design material. 3 lectures, 1 activity.

TH 450. Directing. 4 units

Term Typically Offered: SP

Prerequisite: TH 290 and consent of instructor.

Principles, philosophies, analytical methods, business practices, organizational techniques and interpersonal strategies of directing for the stage. Experiential work includes hands-on, in-class exercises, as well as intensive outside class rehearsals. Culmination in a public production of student-directed one-act plays. 3 lectures, 1 activity.

TH 461. Senior Project Seminar. 4 units

Term Typically Offered: F

Prerequisite: Senior standing and Theatre majors only.

Focus on post-graduate career planning options in theatre arts, including resume and portfolio building, preparation for professional work, graduate school and internships. A structure by which students design and submit their senior projects. 4 seminars.

TH 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: SP

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

TH 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for theatre students. The Class Schedule will list topics selected. Total credit limited to 12 units. 1-4 laboratories.

TH 480. Advanced Internship. 4 units

Term Typically Offered: F, W, SP

CR/NC

Prerequisite: Junior standing with a minimum 3.0 GPA and consent of instructor.

Part-time, supervised internship experience in the entertainment or equivalent professional industry. Ability to work independently; strong verbal and written skills. Faculty approval required. Evaluations by internship supervisor and written reports by student required. 120 hours of work experience. Total credit limited to 8 units. Credit/No Credit grading.

University Studies (UNIV)

undefined

UNIV Courses

UNIV 100. University Studies. 1 unit

Term Typically Offered: F
CR/NC

Course supports the successful student transition to Cal Poly. Establishes links between student needs and campus resources. Covers goal setting, degree planning, campus and academic policies, time management, college and campus culture, growth mindset and effective learning strategies. Not open to students with credit in EDUC/UNIV 125. Credit/No Credit grading only. 1 lecture.

UNIV 111. First Generation College Students Group Dialogue. 1 unit

Term Typically Offered: F, W, SP
CR/NC

Issues related to first generation college students' experiences. Students engage in dialogue and exploration of their experiences in the context of their intersecting identities. Students are encouraged to discover new strengths and potentials. Students also learn about resources. Credit/No Credit grading only. Course may be offered in classroom-based or online format. 1 activity.

UNIV 125. First Year Seminar. 2 units

Term Typically Offered: TBD
CR/NC

Issues associated with the successful transition from high school or community college to Cal Poly. Links fostered between student needs and campus resources. Coverage of academic policies and procedures, university study skills, goal setting, career planning, wellness and other topics relevant to student success. Not open to students with credit in UNIV 100. Credit/No Credit grading only. 1 lecture, 1 activity. Crosslisted as EDUC/UNIV 125.

UNIV 321. Undergraduate Research Methods and Practice. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and consent of instructor.

Research methods and tools for sciences and humanities, including formulating a research question, designing a study, using the scientific method to conduct and analyze surveys, and analyzing data. Emphasis on working in interdisciplinary research teams. Total credit limited to 8 units. 2 lectures, 2 activities. Crosslisted as HNRS/UNIV 321.

UNIV 330. Cal Poly Land: Nature, Technology, and Society. 4 units

Term Typically Offered: SP
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course from GE Area B1 (GE Area B4 for students on the 2019-20 or earlier catalogs); one course from GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Scientific investigation of the natural features of the Cal Poly landscape and their transformations by land management technology. Environmental, economic, social, and political effects of agriculture, resource extraction, construction technology. Educational, land-use, long term planning issues. 4 lectures. Crosslisted as AG/ISLA/SCM/UNIV 330. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

UNIV 350. The Global Environment. 4 units

Term Typically Offered: F, SU
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs).

Interdisciplinary investigation of how human activities impact the Earth's environment on a global scale. Examination of population, resource use, climate change, and biodiversity from scientific/technical and social/economic/historical/political perspectives. Use of remote sensing maps. Sustainable solutions. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as AG/EDES/ENGR/GEOG/ISLA/SCM/UNIV 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

UNIV 391. Appropriate Technology for the World's People: Development. 4 units

Term Typically Offered: F
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D.

A broad overview of international development and appropriate design for sustainability. Besides traditional classroom work, students work in teams to address problems with technical solutions. Collaboration with mentors from the university, private sector, and nonprofits serves to provide diverse background and project mentorship. 4 lectures. Crosslisted as HNRS/PSC/UNIV 391. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

UNIV 392. Appropriate Technology for the World's People: Design. 4 units

Term Typically Offered: SP
2020-21 or later: Upper-Div GE Area B
2019-20 or earlier catalog: GE Area B5, B6, or B7
Sustainability Focused

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: UNIV 391 and completion of GE Area D2.

Addresses the needs of international impoverished communities with technological solutions, which are inexpensive, ecologically sustainable, and socially appropriate. Group study of target communities, and design and construction of an appropriate technology prototype. Not open to students with credit in PSC/UNIV/HNRS 492. 3 lectures, 1 laboratory. Crosslisted as HNRS/PSC/UNIV 392. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

UNIV 401. Graduation Writing Requirement Portfolio. 0 unit

Term Typically Offered: F,W,SP,SU

CR/NC

GWR

Prerequisite: Junior standing and completion of GE Area A with grades of C- or better; or graduate standing.

Completion of the Graduation Writing Requirement (GWR) through submission and assessment of a writing portfolio. Course offered online only. Credit/No Credit grading only. Fulfills GWR.

UNIV 421. Summer Undergraduate Research Experience. 0 unit

Term Typically Offered: SU

CR/NC

Completion of Summer Undergraduate Research Experience. Students must be participating in a mentored summer undergraduate research experience at Cal Poly during the Summer term. Course offered online only. Credit/No Credit grading only.

UNIV 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

UNIV 491. Appropriate Technology for the World's People: Development. 4 units

Term Typically Offered: F

Prerequisite: Consent of instructor, and senior or graduate standing.

Corequisite: GE Area D5.

A broad overview of international development and appropriate design for sustainability. Besides traditional classroom work, students work in teams to address problems with technical solutions. Collaboration with mentors from the university, private sector, and nonprofits serves to provide diverse background and mentorship. Seminar paper required. Not open to students with credit in PSC/UNIV/HNRS 391. 4 lectures. Crosslisted as PSC/UNIV 491.

UNIV 492. Appropriate Technology for the World's People: Design. 4 units

Term Typically Offered: SP

Prerequisite: Junior standing and completion of GE Areas B1 through B4, with a grade of C- or better in one course in GE Area B4 (GE Area B1 for students on the 2019-20 or earlier catalogs); or graduate standing. Recommended: UNIV 391 and two lower-division courses in GE Area D2 (or in GE Area D3 for students on the 2019-20 or earlier catalogs).

Addresses the needs of international impoverished communities with technological solutions, which are inexpensive, ecologically sustainable, and socially appropriate. Group study of target communities, and design and construction of an appropriate technology prototype. Seminar paper required. Not open to students with credit in PSC/UNIV/HNRS 392. 3 lectures, 1 laboratory. Crosslisted as PSC/UNIV 492.

Wine and Viticulture (WVIT)

undefined

WVIT Courses

WVIT 101. Orientation to Wine and Viticulture. 1 unit

Term Typically Offered: TBD

CR/NC

Introduction to the wine and viticulture program. Emphasis on curriculum and career planning. Credit/No Credit grading only. 1 lecture.

WVIT 102. Global Wine and Viticulture. 4 units

Term Typically Offered: F, SP

Introduction to wine grape growing, winemaking, and wine business. Brief history and overview of major global wine regions, including growing conditions, grape varieties, winemaking styles, and wine business practices. 4 lectures.

WVIT 202. Fundamentals of Enology. 4 units

Term Typically Offered: F, SP

Prerequisite: CHEM 111 or CHEM 127.

Introduction to the science of winemaking: development of wine components in grapes, grape maturation, harvesting, pre-fermentation wine-making methods, alcoholic fermentation, malolactic fermentation, wine maturation and post fermentation practices, wine spoilage, maintenance of wine integrity. 4 lectures.

WVIT 233. Basic Viticulture. 4 units

Term Typically Offered: F, W

Prerequisite: PLSC 120 or BOT 121; CHEM 127; and SS 120.

Fundamentals of grape growing, with emphasis on wine grapes. Fundamentals of vine anatomy and physiology, development and phenology, trellising systems, soils, climatic factors, vineyard establishment, grafting, irrigation, fertility, harvest practices, pruning, major pests, and major varieties and rootstocks. Not open to students with credit in WVIT 231. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as PLSC 232/WVIT 233. Formerly AEPS 232/WVIT 233.

WVIT 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

WVIT 300. Survey of Grape Growing and Winemaking. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course from GE Area B1; one course from GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs).

Fundamentals of viticulture and enology. Overview of grapevine physiology, major varieties, soils, climatic factors, management practices and wine regions of the world. Exploration of wine fermentation, finishing, aging, bottling and wine chemistry. Compare red, white, sparkling and fortified wine production. Not open to students with credit in WVIT 202 or WVIT 233. 4 lectures. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog).

WVIT 301. Wine Microbiology. 4 units

Term Typically Offered: SP

Prerequisite: MCRO majors must have MCRO 224; WVIT majors must have MCRO 221 or MCRO 224; and WVIT 202; open to MCRO or WVIT majors only.

Wine yeasts, bacteria, and molds: morphology and methods of identification; successful alcoholic and malolactic fermentations; management and prevention of unwanted microbial growth; microorganisms and flavor development. 3 lectures, 1 laboratory. Crosslisted as MCRO/WVIT 301.

WVIT 302. Wine Fermentation Laboratory. 2 units

Term Typically Offered: SP

Prerequisite: WVIT 202; WVIT major; and at least 18 years in age.

Alcoholic and malolactic fermentation, maturation, stabilization and bottling of finished wines. Not open to students with credit in WVIT 404, WVIT 405 or WVIT 406. 1 lecture, 1 laboratory.

WVIT 331. Advanced Viticulture - Fall. 4 units

Term Typically Offered: F

Prerequisite: PLSC 232 or WVIT 233.

Advanced viticulture theory and practice, with an emphasis on fall season activities. Identification of rootstocks, wine and table grapes, species taxonomy and diversity, and breeding for grapevine improvement. Field trips may be required. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as PLSC/WVIT 331. Formerly AEPS/WVIT 331.

WVIT 332. Advanced Viticulture - Winter. 4 units

Term Typically Offered: W

Prerequisite: PLSC 232 or WVIT 233; and PLSC/WVIT 331.

Advanced viticulture theory and practice with emphasis on winter season activities. Pruning to influence vine balance, productivity, training and trellising systems, vineyard establishment, cover cropping and weed management. Field trips required. 3 lectures, 1 laboratory. Crosslisted as PLSC 336/WVIT 332. Formerly AEPS 336/WVIT 332.

WVIT 333. Advanced Viticulture - Spring. 4 units

Term Typically Offered: SP

Prerequisite: PLSC 232 or WVIT 233; and PLSC/WVIT 331.

Advanced viticulture theory and practices with emphasis on spring activities. Vine source/sink relations, factors impacting yield and berry composition, the role environmental conditions on vine physiology, and canopy management. Field trips required. Course may be offered in classroom-based or online format. 3 lectures, 1 laboratory. Crosslisted as PLSC 337/WVIT 333. Formerly AEPS 337/WVIT 333.

WVIT 339. Internship Wine and Viticulture. 1-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: WVIT 202; AEPS/WVIT 231 or WVIT 232 or WVIT 233; junior standing; and consent of internship instructor.

One or two quarters spent with an approved wine industry employer engaged in wine production or related agribusiness and viticulture activities. Applying and developing production and managerial skills and abilities. One unit of credit may be allowed for each full week of completed and reported internship. Total Major credit limited to 6 units. Total credit limited to 12 units. Credit/No Credit grading only.

WVIT 343. Branded Wine Marketing. 4 units

Term Typically Offered: F, W, SP

Prerequisite: AGB 212 or ECON 201 or ECON 221 or ECON 222.

Wine pricing as it relates to quality, packaging, and service. Distribution options with emphasis on the three tier system, promotional strategies, including public relations, mass media advertising, personal selling, and direct marketing. Domestic and international marketplaces. 4 lectures.

WVIT 344. Direct to Consumer Wine Sales. 4 units

Term Typically Offered: SP

Prerequisite: WVIT or RPTA major. Co-requisite: AGB 212 or ECON 201 or ECON 221 or ECON 222.

Factors driving direct-to-consumer initiatives in the US wine business: tasting rooms, wine clubs/mailling lists, eCommerce, telemarketing, and events. Using current research and case studies to explore features of a direct-to-consumer approach, while facilitating compliance. Topics include: experiential marketing, social media, brand differentiation. 4 lectures.

WVIT 345. Wine Marketing Research and Market Analysis. 4 units

Term Typically Offered: W

Prerequisite: STAT 217 or STAT 218; and WVIT 343.

Application of statistical theory to design research to examine the wine and grape markets. Research examining the evaluation of appropriate data collection methods, quantitative analyses, and interpretation of primary and secondary wine and grape industry data. 4 lectures. Formerly WVIT 444.

WVIT 346. Winery Digital Media Marketing and Data Analytics. 4 units

Term Typically Offered: SP

Prerequisite: AGB 260 and WVIT 343.

Development of digital marketing skills (audio and video) and techniques to produce content for wineries and evaluate results. Emphasis on regulatory restrictions in wine marketing, return on investment strategy, optimization and analytic metrics and customer acquisition costs. Course may be offered in classroom-based or online format. 4 lectures.

WVIT 365. Wine Analysis and Amelioration. 4 units

Term Typically Offered: SP

Prerequisite: WVIT 202 and CHEM 312; for WVIT majors only. Corequisite: CHEM 313.

Winery laboratory practices. Basic principles, techniques, and interpretation of common analyses for sugars, acidity, nitrogen, alcohol, volatile acidity, sulfur dioxide, phenols and color; wine and must amelioration, amendment effects, usage, calculations and procedures of addition. 3 lectures, 1 laboratory.

WVIT 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 6 units, with a maximum of 4 units per quarter.

WVIT 404. Winemaking I. 4 units

Term Typically Offered: F

Prerequisite: WVIT 202; WVIT 365; WVIT major; and at least 18 years in age.

Planning, managing and implementing harvest in the pilot winery; sanitation practices; monitoring grape maturity; handling juices and musts; alcoholic and malolactic fermentation, general cellar practices; sensory and laboratory analyses. 3 lectures, 1 laboratory.

WVIT 405. Winemaking II. 4 units

Term Typically Offered: W

Prerequisite: WVIT 404; WVIT major; and at least 18 years in age.

Planning, managing and implementing harvest in the pilot winery; sanitation practices; monitoring and maintaining wine integrity; planning for bottling; blending trials; general cellar practices; sensory and laboratory analyses. 3 lectures, 1 laboratory.

WVIT 406. Winemaking III. 4 units

Term Typically Offered: SP

Prerequisite: WVIT 405; WVIT major; and at least 18 years in age.

Planning, managing and implementing the preparation of wine for bottling; blending; fining; filtration; bottling; conducting general cellar practices; sensory and laboratory analyses. 3 lectures, 1 laboratory.

WVIT 414. Grape Pest Management. 4 units

Term Typically Offered: F

Prerequisite: PLSC 232 or WVIT 233; PLSC 313; BOT/PLSC 323.

Comprehensive survey of major grape pests including diseases, insects, weeds, vertebrates, and nematodes. Identification and biology of grape pests and natural enemies, monitoring, and integrated pest management (IPM) strategies, including cultural, biological, and chemical controls. Guest lectures. 3 lectures, 1 activity. Crosslisted as PLSC/WVIT 414. Formerly AEPS/WVIT 414.

WVIT 423. Wine Law and Compliance. 4 units

Term Typically Offered: W, SP

Prerequisite: WVIT 343.

Legal aspects of wine making/marketing. Emphasis of both Federal (Tax and Trade Bureau) and State business requirements as well as State and Federal regulations impacting winery and viticultural practices in California. 4 lectures.

WVIT 428. Winegrape Vineyard Management. 4 units

Term Typically Offered: SP

Prerequisite: AGB 214, SS 221 and WVIT 233. Recommended: WVIT 331, WVIT 332, and WVIT 333.

Winegrape vineyard management practices including: financial projections and budgeting, contracting and supervision of labor, trellis installation and repair, irrigation systems maintenance, fertilization and spray scheduling. Field trips required. 3 lectures, 1 laboratory.

WVIT 433. Wine Sales and E-Commerce. 4 units

Term Typically Offered: SP

Prerequisite: WVIT 343.

Professional selling in the wine industry. Selling wine through the seven avenues of wine distribution in the 3-tier system. Exploration of aspects of wine selling, from customer relation management to cultural and legal differences among states. How strategies for selling differ for various sized wineries. 4 lectures.

WVIT 442. Sensory Evaluation of Wine. 4 units

Term Typically Offered: F, W, SU

Prerequisite: WVIT 202; STAT 218; WVIT major; and at least 18 years in age.

Evaluation of wines using the techniques in sensory evaluation. Difference and rating tests; descriptive analysis and pairing of wine and food. 3 lectures, 1 laboratory.

WVIT 447. Logistics for the Global Wine Industry. 4 units

Term Typically Offered: SP

Prerequisite: WVIT 102; WVIT 343; and STAT 218.

Scope and elements of the international wine logistics system including supply and distribution channels, transportation, inventory, warehousing, packaging and order processing. 4 lectures.

WVIT 450. Wine Business Plan Development. 4 units

Term Typically Offered: W

Prerequisite: AGB 214 or BUS 214; and BUS 301 or WVIT 343.

The strategic planning process for wine businesses. Development of a complete business plan with careful adherence to the unique and complex regulations that apply to wine businesses. The business plan will include specification of the product, distribution, finance, and marketing. 4 lectures.

WVIT 460. Senior Project - Wine Business. 4 units

Term Typically Offered: F, SP

Prerequisite: Senior standing; WVIT Major; WVIT 343; and one of the following: WVIT 345 or WVIT 450.

Selection and analysis of wine and viticulture business problems and opportunities in directed group-based projects. Problems typical to those that graduates may encounter in marketing and management in the wine and viticulture industry. Formal report and presentation required. 4 lectures.

WVIT 463. Issues, Trends and Careers in the Wine Industry. 2 units

Term Typically Offered: W, SP

Prerequisite: Senior standing; WVIT majors only.

Current issues and trends in viticulture, enology and wine business. Career opportunities and planning for WVIT majors nearing graduation. 2 seminars.

WVIT 464. Senior Project - Enology and Viticulture. 4 units

Term Typically Offered: F, W, SP

Prerequisite: Senior standing; and STAT 218.

Completion of a research proposal and comprehensive literature review, including analysis of experimental results from published peer-reviewed articles in enology and/or viticulture. Written and oral presentations. 4 lectures.

WVIT 465. Senior Project - Research Experience in Enology or Viticulture. 2 units

Term Typically Offered: TBD

Prerequisite: Senior standing; STAT 218; and consent of instructor.

Involvement in the experimental design, execution, data analysis and reporting of research under the direct supervision of faculty. Completion of several critiques of current peer-reviewed journal articles in enology and/or viticulture. Total credit limited to 4 units.

WVIT 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

WVIT 471. Selected Advanced Laboratory. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group laboratory study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 laboratories.

WVIT 477. Advanced Wine Sensory Analysis. 4 units

Term Typically Offered: TBD

Prerequisite: WVIT 301; WVIT 442; and at least 18 years in age.

Advanced sensory evaluation of wines. Human physiology and wine chemistry in the interphase of wine sensory analysis. Wine varieties and styles, including selected appellations of Spain, France, Germany, Italy, Chile, Argentina, South Africa, Australia, New Zealand, Canada, and United States. 3 lectures, 1 laboratory.

Women's, Gender and Queer Studies (WGQS)

undefined

WGQS Courses

WGQS 145. Reasoning, Argumentation, and Writing on Gender and Sexuality. 4 units

Term Typically Offered: F, SP, SU

2020-21 or later catalog: GE Area A3

Prerequisite: Completion of GE Area A2 with a grade of C- or better (GE Area A1 for students on the 2019-20 or earlier catalogs). Recommended: Completion of GE Area A1 with a grade of C- or better (GE Area A2 for students on the 2019-20 or earlier catalogs).

Principles of reasoning in argumentation; examination of rhetorical principles and responsible rhetorical behavior; application of these principles to written and oral communication; and effective use of research methods and sources, all in relation to WGQS topics. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Area A3 with a grade of C- or better. Formerly WGS 145.

WGQS 201. Gender and Sexuality in US Society and Politics. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: GE Area D1

2019-20 or earlier catalog: GE Area D1

USCP

Survey and exploration, via intersectional frameworks, of the ways that gender and sexuality have impacted, and been impacted by, US society and politics, from the formation of the US as a settler colonial nation-state into the present day. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS 204/WGS 201. Fulfills GE Area D1 and USCP.

WGQS 210. Gender and Sexuality in Visual and Popular Culture. 4 units

Term Typically Offered: F, SP

2020-21 or later catalog: GE Area C1

2019-20 or earlier catalog: GE Area C3

Survey and exploration of key developments in visual and popular culture, considered through the lenses of intersectional approaches to gender and sexuality, and examined across multiple mediums and practices including: visual art, film, television, performance, mass media and material culture. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as HNRS/WGQS 210. Fulfills GE Area C1 (GE Area C3 for students on the 2019-20 or earlier catalogs). Formerly WGS 210.

WGQS 270. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Open to undergraduate students and consent of instructor.

Directed group study of selected topics. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures. Formerly WGS 270.

WGQS 301. Contemporary Issues in Women's and Gender Studies. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and two lower-division courses in GE Area D. Recommended: WGQS 201 (GE Area D1).

Exploration of contemporary issues in local, national, and comparative transnational contexts as addressed within the interdisciplinary field of Women's & Gender Studies, with an emphasis on the complex intersections of gender and sexuality with race, class, and other social factors. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 301.

WGQS 302. Contemporary Issues in Queer Studies. 4 units

Term Typically Offered: W
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Exploration of contemporary issues as addressed within the interdisciplinary field of Queer Studies, with an emphasis on the relationships between constructions, experiences and expressions of sexuality and interlocking systems of race, ethnicity, religion, class, nation, age, dis/ability and gender in local, national, and transnational contexts. The Class Schedule will list topic selected. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 302.

WGQS 305. Feminist Methodologies. 4 units

Term Typically Offered: TBD
Prerequisite: One course in Women's & Gender Studies; and junior standing.

Examination of feminist critiques of established methodologies in humanities, social sciences, and natural sciences disciplines and exploration and use of feminist methodologies developed both across disciplines and within Women's & Gender Studies. 4 seminars. Formerly WGS 305.

WGQS 311. Sociology of Genders and Sexualities. 4 units

Term Typically Offered: F,W,S,PSU
Prerequisite: Junior standing.

Analysis of social constructions of sex, genders, and sexualities. Explores how gender stereotypes are created and reproduced. Focus on media representations; intersections of gender, race, class, sexuality; and effects on individuals and structures of work, education, family, and abusive relationships. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as SOC/WGQS 311. Formerly WGS 311.

WGQS 320. Women, Gender and Sexuality in Global Perspective. 4 units

Term Typically Offered: TBD
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Examination of women's lives, genders and sexualities in relation to intersecting systems of class, race/ethnicity, religion and nation in comparative cross-cultural contexts. Includes study of global and transnational feminisms, reproductive rights, women's labor, women in development, women's politics. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly WGS 320.

WGQS 324. Psychology of Gender. 4 units

Term Typically Offered: W
Prerequisite: PSY 201 or PSY 202.

Investigation of psychological genders and sexualities beyond ideas associated with biological sex. Exploration of sex/gender/sexuality differences from a social psychological (e.g., socialization) perspective. Implications of gender roles (including masculinity, femininity, non-binary) and sexual identities for relationships and health. 4 lectures. Crosslisted as PSY/WGQS 324. Formerly WGS 324.

WGQS 325. Masculinity Studies. 4 units

Term Typically Offered: F, SP, SU
2020-21 or later: Upper-Div GE Area D
2019-20 or earlier catalog: GE Area D5
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Analysis of hegemonic and counter-hegemonic masculinities through a critical, interdisciplinary, and intersectional examination of the social construction of manhood in the U.S. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly WGS 325.

WGQS 335. Feminist Studies of Popular Culture and Whiteness. 4 units

Term Typically Offered: W
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area C.

Feminist approaches to the analysis of representations of whiteness in contemporary media, and considerations of the U.S. cultural values these images illuminate. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ISLA/WGQS 335. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs). Formerly WGS 335.

WGQS 336. Feminist Ethics, Gender, Sexuality and Society. 4 units

Term Typically Offered: F,W,S,PSU
2020-21 or later: Upper-Div GE Area C
2019-20 or earlier catalog: GE Area C4
USCP
Prerequisite: Junior standing or Philosophy major; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Critical examination of the relations between gender, sexuality, ethnicity, society and ethics from feminist perspectives, with special attention paid to problems in contemporary applied ethics. Joint focus on theory and application. Course may be offered in classroom-based or online format. 4 lectures. Crosslisted as PHIL/WGQS 336. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 336.

WGQS 340. Sexuality Studies. 4 units

Term Typically Offered: F, W, SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Sexuality in a cultural and historical context. Changing definitions of human subjectivity. The cultural and social regimes that control and create sexuality (including the 'invention' of homo/heterosexuality and the social, legal and political systems that define sexual ab/normality). Contemporary issues of sexual orientation and topics of sexuality in relation to gender and race. Course may be offered in classroom-based, online, or hybrid format. 4 seminars. Crosslisted as WGQS/HNRS 340. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly WGS 340.

WGQS 345. Queer Ethnic Studies. 4 units

Term Typically Offered: F

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Theories, research and methods focused on the interlocking systems of sexuality, race, racialization, and ethnicity in local, national and comparative global/transnational contexts. Relationships between racialization and heteronormativity; queer of color critique; queer migration; decolonizing queer organizing, theory, and knowledge production. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/WGQS 345. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 345.

WGQS 350. Gender, Race, Culture, Science & Technology. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area B

2019-20 or earlier catalog: GE Area B5, B6, or B7

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; completion of GE Area B2; and one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs). Recommended: STAT 130, 217, 218, 251, 301, 312, or 321.

Examines the complex relationships between gender, race, culture, science, and technology via intersectional quantitative and qualitative inquiry, centering the perspectives/contributions of historically marginalized people in the U.S. Explores, evaluates, and develops proposals to create more diverse, equitable, ethical, humane science/technology. Course may be offered in classroom-base, online, or hybrid format. 3 lectures, 1 activity. Crosslisted as ES 350/HNRS 353/WGQS 350. Fulfills GE Area Upper-Division B (GE Areas B5, B6, or B7 for students on the 2019-20 catalog); and USCP. Formerly WGS 350.

WGQS 351. Gender, Race, Class, Nation in Global Engineering, Technology & International Development. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Cross-cultural exploration of the intersections of gender, race, class, nation in the global engineering workforce, small- and large-scale technological systems, and international development programs; special attention to 21st century challenges and efforts to create more socially responsible engineering and technology. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ES/WGQS 351. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly WGS 351.

WGQS 370. Religion, Gender, and Society. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2.

Critical examination of religious ideas and institutions in the United States. Focus on interlocking systems of sex, gender, race, class and religion; individual and group experiences at the intersection of religion, politics and culture. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as RELS/WGQS 370. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP. Formerly WGS 370.

WGQS 375. Intersectional Feminist Art Histories. 4 units

Term Typically Offered: TBD

USCP

Prerequisite: Junior standing; and one of the following: ART 112, ART 212, ART 213, or WGQS 201.

Intersectional feminist exploration of the role of women, gender, and sexuality in the visual arts and art history. In-depth focus on intersectional feminisms as they impact the study of the visual arts and art history. Not open to students with credit in ART 316. Course may be offered in classroom-based, online, or hybrid format. 4 lectures. Crosslisted as ART/WGQS 375. Fulfills USCP. Formerly WGS 375.

WGQS 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F,W,SP,SU

Prerequisite: WGQS 201 or consent of Women's and Gender Studies Chair.

Individual investigation, research studies, or surveys of selected problems. Total credit limited to 4 units, with a maximum of 4 units per quarter. Formerly WGS 400.

WGQS 401. Seminar in Women's and Gender Studies. 4 units

Term Typically Offered: TBD

Prerequisite: One course in Women's & Gender Studies. Recommended: Junior standing.

Intensive study of a selected topic in Women's and Gender Studies (such as gender and work, gender and the law, sexuality and the arts). The Class Schedule will list topic selected. Field experience may be required as appropriate. May be repeated for up to 8 units. 3 seminars and a supervised research project. Formerly WGS 401.

WGQS 417. Feminist Legal Theory. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Different approaches to US feminist legal theory and topics in gender and US law. Topics covered include employment, domestic violence, sexual harassment, reproductive justice, sex work, rape, and welfare reform. 4 seminars. Crosslisted as POLS/WGQS 417. Formerly WGS 417.

WGQS 421. The History of Prostitution. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

Comparative history of prostitution from antiquity to present. Analysis of prostitution from social, cultural, political, gendered and economic perspectives. 4 lectures. Crosslisted as HIST/WGQS 421. Formerly WGS 421.

WGQS 423. Gender and Work. 4 units

Term Typically Offered: F

USCP

Sustainability Focused

Prerequisite: Junior standing; and completion of GE Area A with grades of C- or better.

Extent, causes, and intersectional nature of workplace gender inequality. Strategies aimed at creating more egalitarian organizations. Topics include job segregation, tokenism, sexual harassment, work/family balance, gendered jobs, inequality regimes, personnel policies, workplace democracy, and social/labor movement activism. 4 lectures. Crosslisted as SOC/WGQS 423. Fulfills USCP. Formerly WGS 423.

WGQS 434. American Women's History to 1870. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

Female ideology and experience from the colonial period through the American Civil War. Use of a variety of sources, including women's own writing, in order to understand the history of women as it both reflects and shapes American culture and society. 3 lectures and research project. Crosslisted as HIST/WGQS 434. Formerly WGS 434.

WGQS 435. American Women's History from 1870. 4 units

Term Typically Offered: TBD

USCP

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

The female past in the modern period of U.S. history. Considers how transformations in gender roles are reflective of other significant changes in American culture and society. Emphasis on class, race, and ethnic variations in women's experience. 3 lectures and research project. Crosslisted as HIST/WGQS 435. Fulfills USCP. Formerly WGS 435.

WGQS 450. Feminist Theory. 4 units

Term Typically Offered: W

USCP

Prerequisite: WGQS 201.

Advanced critical examination of the history and evolution of ideas in feminist theory. Focus on genders and sexualities in relation to race/ethnicity, religion, class, nation, age, dis/ability, with special attention to relationships between theory and praxis/application. 3 lectures, 1 activity. Fulfills USCP. Formerly WGS 450.

WGQS 455. Queer Theory. 4 units

Term Typically Offered: SP

Prerequisite: One course in Women's & Gender Studies; and junior standing.

Philosophical foundations, intellectual history, and current directions of queer theory, understood as the critical study of sexuality. Intersections among sexuality and other material and discursive systems, including race, ethnicity, class, dis/ability, and nationality. 4 seminars. Formerly WGS 455.

WGQS 457. U.S. Reproductive Politics. 4 units

Term Typically Offered: TBD

Prerequisite: Completion of GE Area D1. Recommended: POLS 112.

Multi-disciplinary approach to the study of the law and politics of reproduction in the United States. Topics studied include histories of reproductive regulation, abortion law and politics, technology and fertility, and social policy and reproductive control. 4 seminars. Crosslisted as POLS/WGQS 457. Formerly WGS 457.

WGQS 458. Gender and Sexuality in Modern Europe. 4 units

Term Typically Offered: TBD

Prerequisite: HIST 303 or one upper-division course in GE Area D or graduate standing.

Social, economic, political, and cultural effects of changing gender systems in modern Europe, particularly but not exclusively with regard to sex and sexuality. 3 lectures and research project. Crosslisted as HIST/WGQS 458. Formerly WGS 458.

WGQS 467. Women's and Gender Studies / Queer Studies Internship. 4 units

Term Typically Offered: F,W,SP,SU
CR/NC

Prerequisite: WGQS 201 and consent of WGS/QS Internship Director.

Supervised work experience in approved agency. Intern subject to of the duties/responsibilities of employees engaged in comparable work. Focus on genders, sexualities, independent utilization of WGS/QS concepts.

30 hours of internship experience per unit of credit. Minimum of 4 units (120 hours). Total credit limited to 8 units. Credit/No Credit grading only. Formerly WGS 467.

WGQS 470. Selected Advanced Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures. Formerly WGS 470.

World Languages and Cultures (WLC)

undefined

WLC Courses

WLC 200. Special Problems for Undergraduates. 1 unit

Term Typically Offered: F, W, SP

Prerequisite: Consent of instructor.

Individual investigation, research, studies, or surveys of selected problems at the lower-division level. Total credit limited to 8 units.

WLC 202. Intermediate World Language II. 4 units

Term Typically Offered: W

Prerequisite: WLC 201.

Development of presentational, interpersonal, and interpretive intermediate-level language skills within an intercultural context in a language other than English indicated by subtitle. To be taken in numerical sequence. 4 lectures.

WLC 270. Language Study Abroad. 4 units

Term Typically Offered: F, SU

Prerequisite: Consent of department chair.

Acquisition of language and cultural competencies while studying abroad. Total credit limited to 12 units, with a maximum of 12 units per quarter. 3 lectures, 1 activity.

WLC 290. Selected Topics. 1-4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics. Open to undergraduate students. The Class Schedule will list topic selected. Total credit limited to 8 units. 1 to 4 lectures.

WLC 307. World Cultures through Film. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

Survey and analysis of aesthetic, historical, political, and social themes in twentieth and twenty-first-century cultures as represented in world cinema. Historical, literary, and theoretical readings. The Class Schedule will list topic selected and language of instruction (English or another language). Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

WLC 310. Humanities in World Cultures. 4 units

Term Typically Offered: F,W,SP,SU

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Interdisciplinary examination of the humanities in a selected culture. Special focus on the arts, literature, philosophy and language in that culture. The Class Schedule will list topic selected. Total credit limited to 12 units with different subtopic. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

WLC 312. Humanities in Chicano/a Culture. 4 units

Term Typically Offered: SP

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

USCP

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one course in GE Area C.

Interdisciplinary examination of humanities in Chicano culture. Special focus on the arts, literature, social situations, and the monolingual and bilingual language aspects in Chicano culture. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs); and USCP.

WLC 315. Critical Issues in Latin American Studies. 4 units

Term Typically Offered: TBD

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

An interdisciplinary approach to selected topics and issues that address how social, economic, political, and cultural forces have shaped the challenges that face contemporary Latin America. Descriptive subtitles assigned to each course. Field trips required. The Class Schedule will list topic selected. Total credit limited to 12 units. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs). Formerly ISLA 315.

WLC 318. Culture of Spain: Activities. 2 units

Term Typically Offered: F, SU

CR/NC

Prerequisite: Limited to Valladolid, Spain Fall program. Corequisite: WLC 310.

Examination and experience of Spanish culture via participant observation in Spain. An introductory exploration of the development of Spanish architecture, art, literature, music, theatre and popular culture as experienced in Valladolid, Spain. Credit/No Credit grading only. 2 activities.

WLC 350. Literatures in World Cultures. 4 units

Term Typically Offered: W

2020-21 or later: Upper-Div GE Area C

2019-20 or earlier catalog: GE Area C4

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and completion of GE Area C2 (GE Area C1 for students on the 2019-20 or earlier catalogs).

Selected works to be read by students in English translation. Critical analysis, interpretation, and comparison of works by authors from diverse world regions taught in their cultural contexts. Course may include film and other media. Discussion in English. The Class Schedule will list topic selected. Course may be offered in classroom-based or online format. Total credit limited to 8 units. 4 lectures. Fulfills GE Upper-Division C (GE Area C4 for students on the 2019-20 or earlier catalogs).

WLC 360. Research Methods in World Languages and Cultures. 4 units

Term Typically Offered: W

Prerequisite: Junior standing; Modern Languages and Literatures major or Spanish major. Recommended: SPAN 233 and SPAN 301.

Methods and techniques of doing research. Critical thinking and library research in languages other than English. Introduction to different senior project formats: scholarly essays, lesson planning, translations, creative works, community-based projects. 4 lectures.

WLC 370. Language, Technology and Society. 4 units

Term Typically Offered: SU

2020-21 or later: Upper-Div GE Area D

2019-20 or earlier catalog: GE Area D5

Prerequisite: Junior standing; completion of GE Area A with grades of C- or better; one course in GE Area B4 with a grade of C- or better (GE Area B1 for students on the 2019-20 or earlier catalogs); and one lower-division course in GE Area D.

Focus on ways in which technology impacts language use. Characteristics of social media interactions (texting, Facebook) in different languages (e.g., Spanish, French, German, Chinese) are compared. Special attention given to linguistic diversity and the emergence of multilingual identities on digital platforms. Course may be offered in classroom-based or online format. 4 lectures. Fulfills GE Upper-Division D (GE Area D5 for students on the 2019-20 or earlier catalogs).

WLC 400. Special Problems for Advanced Undergraduates. 1-4 units

Term Typically Offered: F, W, SP

Prerequisite: Consent of department chair.

Individual investigation, research, studies, or surveys of selected problems. Total credit limited to 8 units.

WLC 424. Methods in Teaching Languages Other Than English. 4 units

Term Typically Offered: F

Prerequisite: Admission to the Single Subject Credential Program in World Languages.

The development of objectives, curriculum, material and assessment tools for teaching world languages to a diverse student body in secondary schools. Theoretical and hands-on practice based on the California Standards for the Teaching Profession and state curriculum frameworks. 4 lectures.

WLC 425. World Languages Clinical Experience Seminar. 2 units

Term Typically Offered: W, SP

CR/NC

Prerequisite: Admission to the Single Subject Credential Program in World Languages. Corequisite: Concurrent enrollment in EDUC 469 or EDUC 479.

Principles and practices in effective teaching of world languages at the middle and high school level, learning theories, curriculum content and structure, classroom issues, and the teaching profession. Total credit limited to 4 units. Credit/No Credit grading only. 2 seminars.

WLC 451. Latin American Studies Internship. 4-12 units

Term Typically Offered: F,W,SP,SU

CR/NC

Prerequisite: Junior standing.

Supervised work experience in a private, governmental, or non-governmental organization working in Latin America or on a critical issue related to Latin America. Student engagement in all duties and responsibilities of employees and interns engaged in comparable work. 30 hours of work experience per unit of credit. Total credit limited to 12 units. Credit/No Credit grading only.

WLC 460. Senior Project. 4 units

Term Typically Offered: F, W, SP

Prerequisite: WLC 360, advanced composition in primary and/or secondary language, senior standing and consent of instructor.

Selection and completion of a project under faculty mentorship. Projects represent individual, well-defined problems and potential solutions that reflect pertinent scholarly activity in the field of modern languages and literatures, with special emphasis in one of the languages/cultures taught in the department. Total credit limited to 4 units.

WLC 470. Selected Advanced Topics. 4 units

Term Typically Offered: TBD

Prerequisite: Consent of instructor.

Directed group study of selected topics for advanced students. Open to undergraduate and graduate students. The Class Schedule will list topic selected and language of instruction. Total credit limited to 8 units. 4 lectures.
