

ATLAS Distributed Computing Operation Shift Teams experience during the discovery year and beginning of the Long Shutdown 1

ATLAS Experiment: http://atlas.ch

- o Exciting Run I with discovery in July 2012, ended in February 2013
- o Long Shutdown 1 (LS1): 2013-2015
- o ATLAS Distributed Computing (ADC): over 120 computer centers

ADC Operation Shifts with 24 hour coverage

Run I (part): 2012 — February 2013

LS1 (part): rest of 2013

ADC Operations Shift | Processing on the Grid (data and MC). File transfers between all Tiers.

ADC Manager on Duty

Core services of ADC

ADC Comp@P1 | Tier-0 data processing and data export

- Jan Leg. Nar. Par. Nay. Inn. Jul. 8 no. 2 ear. Oct. 40x. Dec. Jan. Egr. Nay. 8 no. 13 no. 3 no. 3 no. 3 no. 3
- o GGUS tickets are shifter products
- o Plot shows reduction of GGUS

Better Tools!

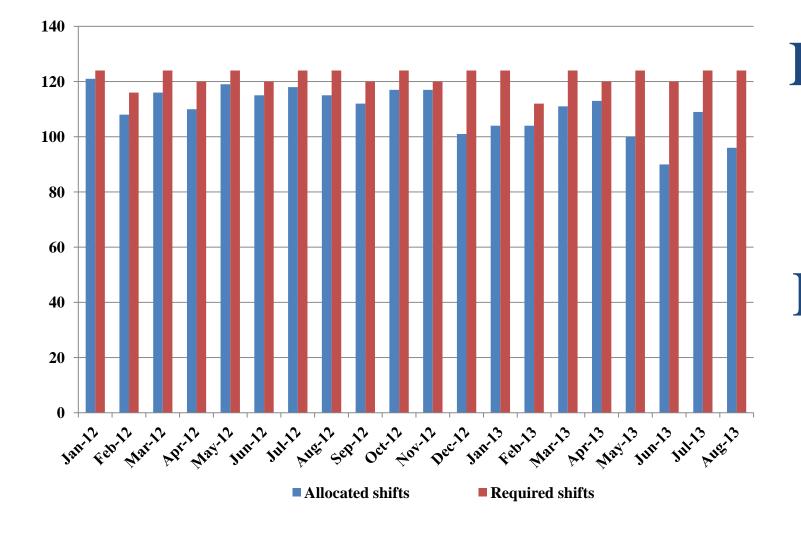

Monitoring

- o ATLAS Grid Information System (AGIS)
- Unified tools for monitoring different resources (SSB)
- o File transfer monitoring with friendly UI (DDM2)
- o Tasks monitoring
- Panda monitoring
- Bourricot tools

- Team tickets per month after Run I in part due to

Automatic actions

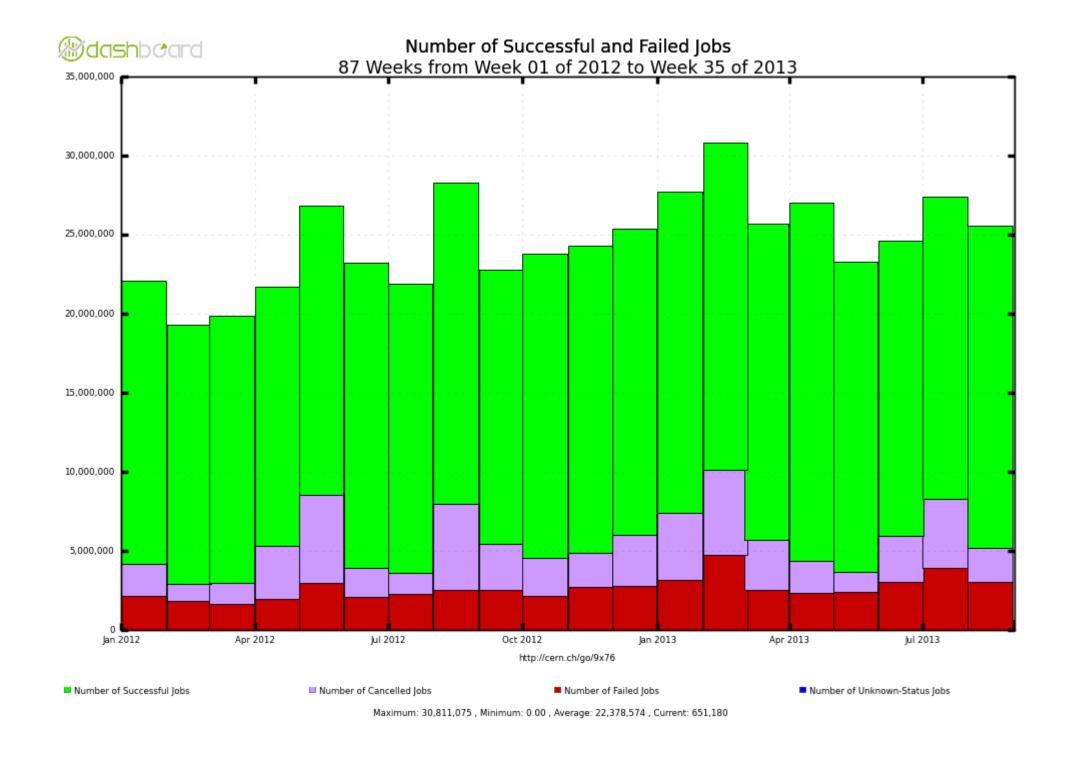

- Manipulation of resources caused by downtime
- o Job queue status change depending on results of test jobs
- Resource manipulation depending on results of SAM tests or lack of free space
- + Automatic site notifications

Good shift coverage =

Extra trainee motivation Fast training Revised instructions

Conclusion

ATLAS Distributed Computing Operation Shift teams meet new challenges and keep providing high quality service!
