

**CORRELATION ENTRE LE WIRE BEAM SCANNER
WBS 25 ET LE FAISCEAU LIL**

PS/LP/CD/Note 89 – 35

Participants: C.Dutriat,M.Legras,L.Rinolfi,C.H.Sicard
CERN , Geneva , Switzerland

19 Décembre 1989

Participants: C.Dutriat , M.I.egras , L.Rinolfi , C.H.Sicard

Sujet: **CORRELATION ENTRE LE WIRE BEAM SCANNER WBS 25 ET LE FAISCEAU LIL**

1. *BUT DU MD:*

- Mesurer la différence de positionnement entre le WBS 25 , UMA 25 et le convertisseur.

2. *MOYENS UTILISES:*

- Déplacement du faisceau par les dipôles DQL 152 II dans le plan horizontal et DQL 153 V dans le plan vertical (fig.1).
- Avec différentes cibles (fig.2), on centre (ou on optimise) le faisceau en UMA 25 dans les deux plans , on relève WBS 25 , puis on centre le faisceau en WBS 25 et on relève UMA 25.

3. *RESULTATS:*

- Les résultats sont rassemblés dans le tableau (1)
- Courbe 1: Trou de 0.25mm.,faisceau centré en WBS 25.
- Courbe 2: Trou de 0.25mm.,faisceau centré en UMA 25.
- Courbes 2a – 2b: Valeurs des dipôles du linac V.
- Courbe 3: Trou de 5mm.,faisceau centré en UMA 25.
- Courbe 4: Trou de 2.5mm. centré par une cale 3.75mm.,faisceau centré en WBS 25. Le faisceau ne passe pas.
- Courbe 5: idem,faisceau optimisé en UMA 25. Le faisceau passe.
- Courbe 6: Trou de 5mm.,faisceau centré en UMA 25.
- Courbe 7: Essai à haute intensité (cycle e⁺). Pour obtenir une efficacité de production maximum de e⁺, on doit déplacer le faisceau de e⁻ sur la cible de + 1.8mm. selon UMA 25 et de + 3.6mm. selon WBS 25.
- Les différences de positions entre UMA 25 et WBS 25 sont de 1,8 millimètre dans les deux plans. Pour mémoire, les mesures de juin 1989 donnaient 1,9 millimètre dans les deux plans (fig.3).

4. *CONCLUSION:*

- En tenant compte des variations de $\pm 1\text{mm.}$ autour de ces valeurs , de l'erreur sur les UMA estimée à $\pm 0,5\text{mm.}$, de la position moyenne du WBS à $\pm 0,25\text{mm.}$, nous décidons d'introduire un décalage de la position du zéro de 1,8 millimètre dans les deux plans au niveau du programme de fonctionnement de WBS 25.
- L'enregistrement (8) de la console graphique montre le programme modifié. On peut noter la bonne corrélation entre les deux instruments.

C.Dutriat
