ABSTRACT

Current Population Survey, 2020 Annual Social and Economic (ASEC) Supplement conducted by the Bureau of the Census for the Bureau of Labor Statistics. – Washington: U.S. Census Bureau [producer and distributor], 2020.

TYPE OF FILE

Microdata; unit of observation is individuals, families, and households.

UNIVERSE DESCRIPTION

The universe is the civilian noninstitutional population of the United States living in housing units and members of the Armed Forces living off post or living with their families on post, as long as at least one civilian adult lives in the same household. A probability sample is used in selecting housing units.

SUBJECT-MATTER DESCRIPTION

This Annual Social and Economic (ASEC) Supplement provides the usual monthly labor force data, but in addition, provides supplemental data on work experience, income, noncash benefits, and migration. Comprehensive work experience information is given on the employment status, occupation, and industry of persons 15 years old and over. Additional data for persons 15 years old and older are available concerning weeks worked and hours per week worked, reason not working full time, total income and income components. Data on employment and income refer to the preceding year, although demographic data refer to the time of the survey.

This file also contains data covering nine noncash income sources: food stamps, school lunch program, employer-provided group health insurance plan, employer-provided pension plan, personal health insurance, Medicaid, Medicare, or military health care, and energy assistance. Characteristics such as age, sex, race, household relationship, and Hispanic origin are shown for each person in the household enumerated.

GEOGRAPHIC COVERAGE

States, regions and divisions are identified in their entirety. Within confidentiality restrictions; indicators are provided for 260 selected core-based statistical areas (CBSA), 44 selected combined

statistical areas (CSA), 280 counties, and 40 central cities in multi-central city core-based statistical areas or combined statistical areas. Also within confidentiality restrictions, indicators are provided for metropolitan/nonmetropolitan, central city/balance metropolitan, and CBSA size.

TECHNICAL DESCRIPTION

File Structure: Hierarchical, Rectangular, Column-delimited

File Size:

Record Type	Record Number
Household (SAS/CSV)	91,500
Family (SAS/CSV)	69,959
Person (SAS/CSV)	157,959
ASCII (DAT)	319,418

REFERENCE MATERIAL

Current Population Survey, 2020 ASEC Technical Documentation. The documentation includes this abstract, pertinent information about the file, a glossary, code lists, and a data dictionary.

For information about the Current Population Survey and other Census Bureau data products, be sure to visit our online Question & Answer Center on the Census Bureau's home page at <http://www.census.gov/> where you can search our knowledge base and submit questions.

RELATED PRINTED REPORTS

Data from the ASEC Current Population Survey's file are published most frequently in the Current Population Reports P-20 and P-60 series. In addition, the following associated reports and tables have also been cleared for release: Income and Poverty, Health Insurance, Supplemental Poverty Measure, and Migration.

These reports can be accessed at <https://www.census.gov/library/publications.html>.

FILE AVAILABILITY

The files are available on the internet via several ways. The files may be accessed by going to the Data section of the main CPS website, located here - <https://www.census.gov/programs-surveys/cps/data.html>. Additionally, for custom tabulations and extracts of CPS microdata, our Data Tools Site contains two platforms to assist you in this process. Visit the following hyperlink to access the Data Tools Site. <https://www.census.gov/programs-surveys/cps/data/data-tools.html>.

CONFIDENTIALITY

The microdata files were approved for release by the Census Bureau's Disclosure Review Board (DRB).
CBDRB-FY20-365

The DRB supports the Data Stewardship Executive Policy Committee (DSEP) in its efforts to protect Title 13 respondent confidentiality by proposing protection policies and methodologies, and reviewing external products such as microdata and tabulation releases for potential disclosure. The DRB coordinates activities that inform decisions made to protect confidentiality through data collection, linking, and dissemination.

OVERVIEW

Current Population Survey

Introduction

The Current Population Survey (CPS) is the source of the official Government statistics on employment and unemployment. The CPS has been conducted monthly for over 50 years. Currently, we interview about 54,000 households monthly, scientifically selected on the basis of area of residence to represent the nation as a whole, individual states, and other specified areas. Each household is interviewed once a month for four consecutive months one year, and again for the corresponding time period a year later. This technique enables us to obtain month-to-month and year-to-year comparisons at a reasonable cost while minimizing the inconvenience to any one household.

Although the main purpose of the survey is to collect information on the employment situation, a very important secondary purpose is to collect information on the demographic status of the population, information such as age, sex, race, marital status, educational attainment, and family structure. From time to time additional questions are included on such important subjects as health, education, income, and previous work experience. The statistics resulting from these questions serve to update similar information collected once every 10 years through the decennial census, and are used by government policymakers and legislators as important indicators of our nation's economic situation and for planning and evaluating many government programs.

The CPS provides current estimates of the economic status and activities of the population of the United States. Because it is not possible to develop one or two overall figures (such as the number of unemployed) that would adequately describe the labor market, the CPS is designed to provide a large amount of detailed and supplementary data. Such data are made available to meet a wide variety of needs on the part of users of labor market information.

Thus, the CPS is the only source of monthly estimates of total employment (both farm and nonfarm); nonfarm self-employed persons, domestics, and unpaid workers in nonfarm family enterprises; wage and salary employees; and, finally, estimates of total unemployment.

It provides the only available distribution of workers by the number of hours worked (as distinguished from aggregate or average hours for an industry), permitting separate analyses of part-time workers, workers on overtime, etc. The survey is also the only comprehensive current source of information on the occupation of workers and the industries in which they work. Information is available from the survey not only for persons currently in the labor force but also for those who are outside the labor force. The characteristics of such persons, whether married women with or without young children, disabled persons, students, older retired workers, etc., can be determined. Information on their current desire for work, their past work experience, and their intentions for job seeking are also available.

The Annual Social and Economic (ASEC) Supplement contains the basic monthly demographic and labor force data described above, plus additional data on work experience, income, noncash benefits, health insurance coverage, and migration.

CPS Sample

The CPS sample is based on the civilian noninstitutional population of the United States. The sample is located in approximately 826 sample areas comprising 1,328 counties and independent cities with coverage in every State and in the District of Columbia.

In all, some 70,000 housing units or other living quarters are assigned for interview each month; about 50,000 of them containing approximately 100,000 persons 15 years old and over are interviewed. Also included are

demographic data for approximately 22,000 children 0-14 years old and 400 Armed Forces members living with civilians either on or off base within these households. The remainder of the assigned housing units are found to be vacant, converted to nonresidential use, contain persons with residence elsewhere, or are not interviewed because the residents are not found at home after repeated calls, are temporarily absent, or are unavailable for other reasons. Approximately 20,000 noninterview households are present each month. The resulting file size is approximately 142,000 records.

Whether living on or off post, male and female members of the armed forces are included in the ASEC as long as at least one civilian adult lives in the same household. The armed forces members, however, are not asked the monthly labor force questions. In addition, the ASEC is supplemented with a sample of Hispanic households identified the previous November. This results in the addition of about 6,000 households (4,500 interviewed). The inclusion of the additional sample of Hispanic households began in 1976.

In 2002, the ASEC incorporated a significant sample expansion. The sample was expanded primarily to improve state estimates of children's health insurance coverage. This sample expansion, known as the CHIP sample, has three components: 1) Asking the ASEC Supplement questions of one-quarter of the February and April CPS samples, that is, of the households not also included in the March sample; 2) Interviewing selected sample households from the preceding August through November CPS sample during the February-April period using the ASEC Supplement; and 3) Increasing the monthly CPS sample in states with high sampling errors for uninsured children. This sample increase results in the addition of about 19,000 households to the ASEC. Adding together the regular sample (70,000), plus the Hispanic sample (6,000), plus the CHIP sample (19,000), we arrive at the total sample size for the ASEC of about 95,000 households.

A more precise explanation regarding the CPS sample design is provided in Technical Paper 77, *The Current Population Survey: Design and Methodology*.

For a more detailed discussion about the basic labor force data gathered on a monthly basis in the CPS survey, see the Bureau of Labor Statistics Report No. 463 and the Current Population Report P-23, No. 62, issued jointly by the Bureau of Labor Statistics and the

Bureau of the Census in October, 1976, and entitled Concepts and Methods Used In Labor Statistics derived from the Current Population Survey.

Questionnaire

Questionnaire facsimiles of the 2020 ASEC Supplement are shown in Appendix D in this documentation.

Revisions to the ASEC Processing System

Starting in 2019

- Demographic edit changes
- Redesigned questions for income and health insurance coverage

File Structure

Historically, CPS ASEC data have always been provided only in a single ASCII file that included all three record types (household, family, and person). However, beginning in 2019, CSV and SAS files were also made available, with each being split into three separate files (one file for each of the three record types).

For the ASCII file, a description of the file structure follows below. It applies only to the ASCII file, not the CSV or SAS files.

There is a household record for each household or group quarters. The household record is followed by one of three possible structures:

- A. If the household contains related persons and is not a group quarters household:
 1. The family record appears next followed by person records for members of the family who are not also members of a related subfamily. The person records would be ordered: family householder, spouse of family householder, children in the family, and other relatives of the family householder.

2. The above records may be followed by one or more related subfamily records, each related subfamily record being followed immediately by person records for members of that related subfamily. The person records would be ordered: reference person of the related subfamily, spouse of subfamily reference person, and children of subfamily reference person.
3. The above records may be followed by one or more unrelated subfamily records, each unrelated subfamily record being followed immediately by person records for members of that unrelated subfamily. The person records would be ordered: unrelated subfamily reference person, spouse of subfamily reference person, and children of subfamily reference person.
4. The above records may be followed by one or more persons living with nonrelatives family records, each to be followed by the person record for the unrelated individual it represents. (See Figure 1, page 2-5.)

B. If the household contains a householder with no relatives and is not a group quarters household:

1. The family record for the nonfamily householder is followed immediately by the person record for that nonfamily householder.
2. These records may be followed by one or more unrelated subfamily records, each unrelated subfamily record being followed immediately by the person records for members of that unrelated subfamily.
3. These records may be followed by one or more family records for persons living with nonrelatives, each person living with nonrelatives family record being followed immediately by the person record for that person living with nonrelatives. (See Figure 2, page 2-6.)

C. If the household is Group Quarters:

1. The family record for persons living with nonrelatives is followed immediately by the person record for that person living with nonrelatives.
2. These records may be followed by one or more unrelated subfamily records, each unrelated subfamily record being followed immediately by the person records for members of that unrelated family.

Relationship of Current Population Survey Files to Publications

Each month, a significant amount of information about the labor force is published by the Bureau of Labor Statistics in the Employment and Earnings and Monthly Labor Review Reports.

As mentioned previously, the CPS also serves as a vehicle for supplemental inquiries on subjects other than employment which are periodically added to the questionnaire. From the basic and supplemental data, the Census Bureau issues four series of publications under the general title Current Population Reports:

- P-20 Population Characteristics
- P-23 Special Studies
- P-60 Consumer Income

Of particular interest to users of the ASEC microdata file would be those reports based on information collected in the ASEC. These reports include the following titles:

- P-60 Income and Poverty in the United States: (Year)
- P-60 Health Insurance Coverage in the United States: (Year)
- P-60 Supplemental Poverty Measure: (Year)

All Current Population Reports are available online at <https://www.census.gov/library/publications.html>

Geographic Limitations

One set of estimates that can be produced from CPS microdata files should be treated with caution. These are estimates for individual metropolitan areas. Although estimates for the larger areas such as New York, Los Angeles, and so forth, should be fairly accurate and valid for a multitude of uses, estimates for the smaller metropolitan areas (those with populations under 500,000) should be used with caution because of the relatively large sampling variability associated with these estimates. For these areas, estimates comparing percent distributions and ratios will provide data with less sampling variability than estimates of levels will.

It should be kept in mind that the sample design and methods of weighting CPS data are geared towards producing estimates for the entire nation. Consequently, data for states are not as reliable as national data, and the file will lose some of its utility in certain applications. For further discussion of such considerations, the user should consult *The Current Population Survey: Design and Methodology* (Technical Paper 77, U.S. Bureau of the Census).

The nature of the work done by each individual investigator using the microdata file will determine to what extent his/her requirements for precision will allow using some of the smaller geographic areas identified on the file.

Weights

For all CPS data files a single weight is prepared and used to compute the monthly labor force status estimates. The difference in content of the CPS ASEC Supplement requires the presentation of additional weights: a supplement household weight, a supplement family weight, and a supplement person weight. In this section we briefly describe the construction and use of these weights. Chapter 2-3 of Technical paper 77, *The Current Population Survey: Design and Methodology* provides documentation of the weighting procedures for the CPS both with and without supplement questions.

The final weight, which is the product of several adjustments, is used to produce population estimates for the various items covered in the regular monthly CPS. This weight is constructed from the basic weight for each person, which represents the probability of selection for the survey. The basic weight is adjusted for special sampling situations and failure to obtain interviews from eligible households (noninterview adjustment). A two-stage ratio estimation procedure adjusts the sample population to the known distribution of the entire population. This two-stage ratio estimation process produces factors which are applied to the basic weight (after the special weighting and noninterview adjustments are made) and results in the final weight associated with each record. In summary, the final weight is the product of: (1) the basic weight, (2) adjustments for special weighting, (3) noninterview adjustment, (4) first stage ratio adjustment factor, and (5) second stage ratio adjustment factor. This final weight should be used when producing estimates from the basic CPS data.

Differences in the questionnaire, sample and data uses for the CPS ASEC Supplement result in the need for additional adjustment procedures to produce the ASEC Supplement weight. The sample for the CPS ASEC Supplement is expanded to include members of the Armed Forces who are living in civilian housing or with the family on a military base, as well as additional Hispanic households which are not included in the monthly labor force estimates, and children who live in low-income families and lack health insurance.

The expanded sample and the need to have married and cohabitating couples receive the same weight has resulted in a weighting system which produces the supplement weight. The supplement weight should be used for producing estimates from ASEC Supplement data.

Finally, household and family weights are the weights assigned from the householder or reference person after all adjustments have been made and should be used when tabulating estimates of families-households.

MATCHING OF CPS ASEC FILES

Matching ASEC Files Across Years

There are two basic limitations in linking the CPS ASEC files across years. First, only fifty percent of the sample is included in two consecutive years. Second, the residents within the eligible housing units may have changed or appeared as noninterview records in one or both years. The result is a matched sample of considerably less than the upper limit of fifty percent. The basic procedures and variables used to link two or more March CPS files are outlined below.

Sample Selection

The first step in matching year t with year $t+1$ is to select from year- t those housing units with a "month in sample" value of 1 through 4, and from year $t+1$ those units with a "month in sample" value of 5 through 8.

This will identify the sample subset eligible for matching. Within this subset, housing units in year t , month 1 will match only with units in year $t+1$, month 5, etc.

Matching Housing Units

Using one or more variables, it is possible to uniquely identify each housing unit in each sample rotation. However, because of changes in CPS procedures, the available information for matching housing units is not always identical. Below are the variables available for matching March CPS files.

Year	Identifiers	
1986 – 1993	HHIDNUM	
1994 – 2001*	H-MIS	H-IDNUM
2002 – 2004	H-IDNUM	H-HHNUM
2005 – 2018	H-IDNUM1	H-IDNUM2
2019 – present	H_IDNUM	

*Matching between 1995 and 1996 is not possible because the March 1996 file is based entirely on the 1990 Census design sample.

Matching Person Records

If you wish to link not only the household information, but the person data as well, follow the procedure above, but add one or more variables to uniquely identify a person.

Year	Identifiers	
Before 1994	A_LINENO	Demographic Variables*
1994 – 2004	A_LINENO	

*Prior to 1994, additional checks are needed to match person records across time. The specific variables used to match residents will vary according to the needs of the project, but it is more efficient to arrange the matching in a hierarchical sequence. For example, matching on sex, race and line number should precede matching on age or household relationship. The data user should carefully work through the possible changes in household structure that might result in an inappropriate rejection of a household.

For 2005 forward, one variable may be used by itself instead of adding it to the household identifiers. PERIDNUM is the only identifier needed for linking persons in files from 2005 onward.

Matching ASEC Files to Non-ASEC Files

Sometimes, there's a need to link an ASEC (or "March supplement") file to a non-ASEC file. Follow the match-keys below to match households pertaining to the year the survey was conducted.

Matching Housing Units

For the ASEC file:

Year	Identifiers	
1994 – 2004	H_IDNUM	H_HHNUM
2005 – 2018	H_IDNUM1	H_IDNUM2
2019 – present	H_IDNUM*	

*Concatenate HRHHID and HRHHID2 on the non-ASEC file to match to H_IDNUM on the ASEC file.

For the Non-ASEC File:

Month & Year		
Jan, 1994 – April 2004*	HRHHID	HUHHNUM
May 2004 – present	HRHHID	HRHHID2

*For files ranging between April 1994 and June 1995, you must add the state code ('GESTCEN') to the list of identifiers to uniquely identify households. Due to the phase-in of the 1990 sample, a small number of households will share the same identifier unless adding this code.

Matching Person Records

If you desire to link not only the household information, but the person data as well, follow the procedure above, but add one or more variables to uniquely identify a person.

For non-March files, add PULINENO.

For March/ASEC files between 1994 and 2004, add A_LINENO. For 2005 forward, one variable may be used by itself instead of adding it to the household identifiers. PERIDNUM is the only identifier needed for linking persons in files from 2005 onward.

DIFFERENCES

Differences between the 2020 and 2019 ASEC Files

1. The data collection for the 2020 ASEC occurred during the coronavirus (COVID-19) pandemic. See Appendix G of this document, Section "Comparability of Data", Subsection "Impact of the Coronavirus Pandemic" for more information on the impact to the data.
2. Values for variable PEINUSYR are updated every year to reflect the most recent year of the survey. In odd years (2015, 2017, 2019, etc.), only the largest value changes. In even years, the largest value also changes, but a new value is also appended. Please refer to the current year data dictionary for the latest values.
3. PCHIP_SP2 has been removed from the file.
4. New variables were added on the topic of Offer and Take of Employer-Sponsored Insurance Variables: ESIOFFER, ESICOULD, ESITAKE1-ESITAKE8, ESIELIG1- ESIELIG6

The ESIOFFER variables are on the person file in the 2020 CPS ASEC and in a separate research extract in the 2019 CPS ASEC.

The ESIOFFER variables (ESIOFFER, ESICOULD, ESITAKE1-ESITAKE8, ESIELIG1- ESIELIG6) provide information on the offer and take-up of employer-sponsored health insurance coverage for individuals who are employed but, at the time of interview, either do not have employer-sponsored coverage or have employer-sponsored coverage but are not the policyholder (i.e. covered through a family member's employer-sponsored plan) . Specifically, the file indicates: 1) whether their employer offered coverage to any of its employees, 2) whether they were eligible for that coverage, if offered, 3) why they were ineligible, if offered and ineligible, and 4) why they chose to not take the coverage, if eligible.

The set of ESIOFFER variables contain the same information as the set of PEOFFER variables (PEOFFER, PECOULD, PETAKE1-PETAKE8, PEELIG1-PEELIG6) for a wider universe of people. The ESIOFFER variables include information for all employed individuals who do not currently receive employer-sponsored insurance or who do receive employer-sponsored coverage but are not the policyholder of the coverage plan, and documents if health insurance was offered through their employer. In contrast, the set of PEOFFER variables only includes offer and take-up information for employed individuals who are currently covered through employer-sponsored plans, but who are not the policyholder.

Some individuals may have different values for the set of PEOFFER variables and the set of ESIOFFER variables due to imputation of missing or incomplete data. For imputed values of ESIOFFER and downstream variables (those with allocation flags of hot deck, cold deck, logical imputation, or whole unit imputation) the values may differ for these variables due to a change in the donor pool used to impute values.

5. Records not in the poverty universe (POV_UNIV not equal to 1) now have values of -1 (not in universe) for the following variables: POVLL, PERLIS, FAMLIS, and FPOVCUT.
6. Every five years, in years that end in 0 or 5, the CPS includes five-year migration questions along with the one-year migration questions.
7. Both industry and occupation variables use new classification codes beginning in 2020. See Appendix A for industry codes and Appendix B for occupation codes.

Description of Method for Topcoding Income and Related Variables

The 2020 ASEC public use data file uses a method that swaps values between sample cases having incomes above a determined topcode value. This method of topcoding preserves the distribution of values above the topcode while maintaining adequate disclosure avoidance.

The technique used for swapping values is termed “rank proximity swapping”. Once the topcode has been established, some persons with value above the topcode cutoff are sorted by those values from lowest to highest (values equal to the specified topcode are included in the universe of those requiring topcoding). Next, the values above the topcode are systematically swapped between sample persons. The swapping occurs within a bounded interval. This bounded interval assures that the values swapped are in “proximity” to each other, yet providing a sufficiently large group of persons from which the swap partners are selected. The Rank Proximity Swapping tables below show the topcode cutoff amount for the various sources.

The use of swapping techniques is accompanied by the procedure to round the swapped amounts. All topcoded amounts included on the public use must be rounded to two significant digits (i.e. \$987,654=\$990,000; \$12,345=\$12,000; \$9,870=\$9,900; rounded values will never exceed the maximum value on the file, i.e. \$999,999=\$999,999).

Rank Proximity Swapping

Threshold Amounts for Earnings and Income Fields

Income Source	Swap Threshold ¹
ANN_VAL	\$60,000
CAP_VAL	\$85,000

PHIP_VAL2	\$15,600
PMED_VAL	\$10,000
POTC_VAL	\$2,000

¹ Values swapped are equal to, and above, this value.
DIFFERENCES

Masking of Income Affects Recode Variables

All combined income recodes on the data file are created *after swapping* (or masking) is performed. This means, for example, that one's total income amount may include a masked amount among the income sources in the calculation. Therefore, the total income amount may seem high when analyzing family poverty ratios. Be careful when analyzing poverty data where masked income amounts appear.

HOW TO USE THE DATA DICTIONARY

The data dictionary describes the contents and record layout of the public-use data file. It is split into three major sections, one for each record type (Household, Family, and Person). Within each section, variables are grouped by Topic and Subtopic.

Variables in the data dictionary are described by:

Descriptor	Description
<i>Variable</i>	Variable name. Variable names are unique throughout the entire data file.
<i>Length</i>	The length of a variable is given in number of characters.
<i>Position</i>	Starting position (location) of the variable on the ascii data file.
<i>Range</i>	Range of values the variable can hold.
<i>Description</i>	Brief description of the variable.
<i>Values</i>	Brief description of each value the variable can hold.
<i>Universe</i>	Description of the variable's universe.

For example, the variable HRECORD is the first variable found on the data dictionary, and appears like so:

Record Type: Household

<i>Variable</i>	<i>Length</i>	<i>Position</i>	<i>Range</i>
<i>Topic: Record Identifiers</i>			
<i>SubTopic: Record Type</i>			
HRECORD	1	1	(1:1)
Record Type. Used to identify records on ascii file.			
Values: 1 = HOUSEHOLD RECORD			
Universe: All Households			

Accordingly, HRECORD is described as follows:

Length=1 means that HRECORD takes up only one character on the data file.

Position=1 means that HRECORD can always be found in the first column of the data file for all household records.

Range=(1:1) means that the values for HRECORD can range from 1 to 1. In other words, HRECORD will always equal 1. This can also be verified by looking at the values description.

Values: 1=Household Record. HRECORD=1 identifies the current record as a household record. This is convenient when using the ASCII file since it contains all three record types (household, family, and person). SAS tables are already separated by record type, so HRECORD is not as critical to use in this case.

The universe for HRECORD is all households, which means every household will have HRECORD=1. This agrees with the fact that HRECORD=1 identifies a record as a housing record.

How to Distinguish ASEC Supplement Variables from the Basic CPS Monthly Variables

With a few exceptions, Basic CPS monthly variables have a prefix and/or a suffix as follows:

Record Type	Prefix/Suffix
Household	H_ or H1
Family	Family records do not contain any Basic CPS monthly variables.
Person	A_, AX, PE, PR, or PX

Supplement variables are either all one string or have a suffix. For example, HFIN_YN is a supplement variable on the household record.

ASEC 2020 Public Use Data Dictionary

Record Type: Household

Variable	Length	Position	Range	Variable	Length	Position	Range
Topic: Record Identifiers				Topic: Geography			
SubTopic: Record Type				SubTopic: Geography			
HRECORD	1	1	(1:1)	GEDIV	1	42	(0:9)
Record Type. Used to identify records on ascii file.				Recode - Census division of current residence

Variable	Length	Position	Range	Variable	Length	Position	Range
Topic: Record Identifiers							
SubTopic: Record Type							
FRECORD	1	1	(2:2)	FMLASIDX	2	19	(1:16)
Record Type. Used to identify records on ascii file. Values: 2 = FAMILY RECORD Universe: All Families				Index to person record of last member of family. All persons from FHEADIDX thru FMLASIDX are members of this family. (Primary family excludes subfamily members.) Values: 01-16 = Person sequence number (P_SEQ) for last family member Universe: All Families			
SubTopic: Match Keys							
FFPOS	2	2	(01:16)	FSPOUIDX	2	21	(0:16)
Unique family identifier. This field plus FH_SEQ results in a unique family number for the file. Values: 01-39 = index for family identifier Universe: All Families				Index to person record of family spouse Values: 00 = No spouse 01-16 = Person sequence number (P_SEQ) for spouse Universe: F_KIND = 1			
FH_SEQ	5	4	(00001:99999)	Topic: Weights			
Household sequence number. Matches H_SEQ for same household Values: 00001-99999 = household sequence number Universe: All Families				SubTopic: ASEC Supplement			
FILEDATE	6	9	()	FSUP_WGT	8	23	(00000000:999999999)
File creation date in MMDDYY format Values: Date Universe: All records				Householder or Reference Person weight Values: 2 implied decimals (example: 255212=2552.12) Universe: All Families			
SubTopic: Record Pointers				Topic: Demographics			
SubTopic: Family Characteristics							
FHEADIDX	2	15	(1:16)	FKIND	1	31	(1:3)
Index to person record of family head Values: 01-16 = Person sequence number (P_SEQ) for reference person Universe: All Families				Kind of family Values: 1=Married couple family 2=Male reference person 3=Female reference person Universe: All Families			
FLASTIDX	2	17	(1:16)	FKINDEX	1	32	(1:4)
Index to person record of last member of family. All persons from FHEADIDX thru FLASTIDX are members of this family. (Primary family includes related subfamily members.) Values: 01-16 = Person sequence number (P_SEQ) for last family member Universe: All Families				Kind of family (expanded) Values: 1=Opposite-sex married couple family 2=Same-sex married couple family 3=Male reference person 4=Female reference person Universe: All families			
				FOWNU18	1	33	(0:9)
				Number of own never married children under 18, for FHEADIDX. Primary family includes own children in related subfamily even if the child is the head of the subfamily. Values: 0 = None, not in universe 1 = 1 ... 9 = 9 or more Universe: All Families			

Record Type: Family

Variable	Length	Position	Range

SubTopic: Allocation Flags							
I_ANNVAL Allocation flag for ANN_VAL <i>Values:</i> Levels 1-3 indicate imputations use of income range responses and 4-8 indicate imputations without range responses. Within each group, lower numbers indicate more match variables (and better matches). Non-respondents to value questions can provide values in one of five range bins. For example, non-respondents can provide earnings from the longest job in these categories: 1) < 15,000, 2) 15,000-30,000, 3) 30,001-44,499, 4) 45,000-60,000, and 5) > 60,000. The range bins differ by income type to better match the range of incomes in that income. In levels 1-3, non-respondents are matched to respondents with values in the range bin they indicated. Full record imputation indicates that an individual did not provide sufficient income information and all income reciprocity and value variables were imputed. 0 = No allocation 1 = Level 1 statistical match (value with ranges) 2 = Level 2 statistical match (value with ranges) 3 = Level 3 statistical match (value with ranges) 4 = Level 101 statistical match (value without ranges, reciprocity '_yn') 5 = Level 102 statistical match (value without ranges, reciprocity '_yn') 6 = Level 103 statistical match (value without ranges, reciprocity '_yn') 7 = Level 104 statistical match (age, sex) 8 = Level 105 statistical match (all donors can match to all recipients) 9 = FL_665 ≠ 1 (full record impute) <i>Universe:</i> ANN_YN = 1	1	797	(0:9)	I_CHELSEWYN Allocation flag for CHELSEW_YN <i>Values:</i> See I_ANNVAL for allocation flag values. <i>Universe:</i> CHELSEW_YN > 0	1	802	(0:9)

Glossary

Subject Concepts

Age

Age classification is based on the age of the person at his/her last birthday. The adult universe (i.e., population of marriageable age) is comprised of persons 15 years old and over for the Annual Social and Economic (ASEC) Supplement data and for CPS labor force data.

Annuities

(See Income.)

Armed Forces

Armed Forces members enumerated in off-base housing or on base with their families are included on the CPS ASEC file, as long as at least one civilian adult lives in the same household. In addition to demographic and family data, supplemental data on income and work experience for Armed Forces members are included.

Base Weight

The constant weight assigned to the sample (inverse of the sampling fraction) which is adjusted to produce the final weight.

Civilian Labor Force

(See Labor Force.)

Class of Worker

This refers to the broad classification of the person's employer. On the ASEC file, these broad classifications for current jobs are private, government, self-employed, without pay, and never worked. Private and government workers are considered "wage and salary workers;" this classification scheme includes self-employed, incorporated persons in with "private" workers. For the longest job held last year, this class of worker scheme includes private; government by level/Federal, State, and local; self-employed incorporated, self-employed unincorporated or farm; and without pay. The wage and salary category for longest job held includes private, government (all levels), and self-employed incorporated.

Dividends

(See Income)

Duration of Unemployment

Duration of unemployment represents the length of time (through the current survey week) during which persons

classified as unemployed are continuously looking for

work. For persons on layoff, duration of unemployment represents the number of full weeks since the termination of their most recent employment. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the present period of seeking work. Average duration is an arithmetic mean computed from a distribution by single weeks of unemployment.

Earners, Number of

The file includes all persons 15 years old and over in the household with \$1 or more in wages and salaries, or \$1 or more of a loss in net income from farm or nonfarm self-employment during the preceding year.

Earnings Weight

Each person record in month-in- sample 4 and 8 contains an earnings weight for current earnings.

Education

(See Level of School Completed.)

Employed

(See Labor Force.)

Energy Assistance Program

The Low-Income Home Energy Assistance Program provides financial assistance to qualified households to help them pay heating costs. The program is funded by the Federal government and administered by the States under broad guidelines. In some States a household may automatically be eligible for this program if the household receives (1) Aid to Families with Dependent Children, (2) Food Stamps, (3) Supplemental Security Income (SSI), and (4) certain Veterans' benefits.

The energy assistance questions were asked for the first time in 1982. In 2011, the question was revised to include assistance for cooling as well as heating expenses, and the reference period was expanded from: (a) receipts since October 1 of the previous year; to (b) receipts for the entire previous calendar year.

Family

A family is a group of two persons or more (one of whom is the householder) residing together and related

by birth, marriage, or adoption. All such persons (including related subfamily members) are considered as members of one family. Beginning with the 1980 CPS, unrelated subfamilies (referred to in the past as secondary families) are no longer included in the count of families, nor are the members of unrelated subfamilies included in the count of family members.

Family Household

A family household is a household maintained by a family (as defined above), and may include among the household members any unrelated persons (unrelated subfamily members and/or unrelated individuals) who may be residing there. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives (See definition of Family).

Family Weight

The weight on the family record is the March supplement weight of the householder or reference person. This weight on the primary family record should be used to tabulate the number of families.

Farm Self-Employment Net Income

The term is defined as net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, as a renter, or as a sharecropper. Gross receipts include the value of all products sold, government crop loans, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc.

Operation expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farm hands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not State and Federal income taxes), etc. The value of fuel, food, or other farm products used for household living is not included as part of net income. Inventory changes are considered in determining net income only when they are accounted for in replies based on income tax returns or other official records which reflect inventory changes.

Final Weight

Used in tabulating monthly labor force items. This weight should be used when producing estimates from the basic CPS data. It should not be used to tabulate ASEC supplement data.

Food Stamps

The Food Stamp Act of 1977 was enacted for the purpose of increasing the food purchasing power of eligible households through the use of coupons to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers the Food Stamp Program through State and local welfare offices. The Food Stamp Program is the major national income support program which provides benefits to all low- income and low-resource households regardless of household characteristics (e.g., sex, age, disability, etc.). The questions on participation in the Food Stamp Program in the ASEC supplement were designed to identify households in which one or more of the current members received food stamps during the previous calendar year. Once a food stamp household was identified, a question was asked to determine the number of current household members covered by food stamps during the previous calendar year. Questions were also asked about the number of months food stamps were received during the previous calendar year and the total face value of all food stamps received during that period.

Full-Time Worker

Persons on full-time schedules include persons working 35 hours or more, persons who worked 1-34 hours for noneconomic reasons (e.g., illness) and usually work full-time, and persons "with a job but not at work" who usually work full- time.

Group Health Insurance Coverage

Civilian persons 15 years old and over who worked in the previous calendar year and who participated in group health insurance plans provided by the employer or union were asked whether part or all of the health insurance premiums were paid for by the union or employer and the extent of persons covered.

Additional questions were asked to determine if sample persons were covered by any other type of health insurance plan. These items are intended to measure retirees covered by continuing employer provided coverage and persons who purchased coverage on their own.

Group Quarters

Group quarters are noninstitutional living arrangements for groups not living in conventional housing units or groups living in housing units containing nine or more persons unrelated to the person in charge.

Head versus Householder

Beginning with the March 1980 CPS, the Census Bureau discontinued the use of the terms "head of household" and "head of family." Instead, the terms "householder"

and "family householder" are used.

Highest Grade of School Attended

(See Level of School Completed.)

Hispanic Origin

Persons of Hispanic origin in this file are determined on the basis of a question asking if the person is Spanish, Hispanic, or Latino. If the response is "yes," a follow-up question determines a specific ethnic origin, asking to select their (the person's) origin from a "flash card" listing. The flash-card selections are Mexican, Mexican-American, Chicano, Puerto Rican, Cuban, Cuban American, or some other Spanish, Hispanic, or Latino group.

Hours of Work

Hours of work statistics relate to the actual number of hours worked during the survey week. For example, a person who normally works 40 hours a week but who is off on the Veterans Day holiday is reported as working 32 hours even though he is paid for the holiday.

For persons working in more than one job, the figures relate to the number of hours worked in all jobs during the week. However, all the hours are credited to the major job.

Household

A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. A group of rooms or a single room is regarded as a housing unit when it is occupied as separate living quarters; that is, when the occupants do not live with any other person in the structure, and when there is direct access from the outside or through a common hall. The count of households excludes persons living in group quarters, such as military barracks and institutions. Inmates of institutions (mental hospitals, rest homes, correctional institutions, etc.) are not included in the survey.

Household Weight

Household weight is the March Supplement weight of the householder. This weight should be used to tabulate estimates of households.

Householder

The householder refers to the person (or one of the persons) in whose name the housing unit is owned or rented (maintained) or, if there is no such person, any adult member, excluding roomers, boarders, or paid

employees. If the house is owned or rented jointly by a married couple, the householder may be either the husband or the wife. The person designated as the householder on the file is the "reference person" on the CPS-260 control card to whom the relationship of all other household members, if any, is recorded.

Householder with No Other Relatives in Household

A householder who has no relatives living in the household. This is the entry for a person living alone. Another example is the designated householder of an apartment shared by two or more unrelated individuals.

Householder with Other Relatives (Including Spouse) in Household

The person designated as householder if he/she has one or more relatives (including spouse) living in the household.

Income

For each person in the sample who is 15 years old and over, questions are asked on the amount of money income received in the preceding calendar year from each of the following sources: (1) money wages or salary; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) Social Security or railroad retirement; (5) Supplemental Security Income; (6) public assistance or welfare payments; (7) interest (on savings or bonds); (8) dividends, income from estates or trusts, or net rental income; (9) veterans' payment or unemployment and workmen's compensation; (10) private pensions or government employee pensions; (11) alimony or child support, regular contributions from persons not living in the household, and other periodic income.

Although income statistics refer to receipts during the preceding year, the characteristics of the person such as age, labor force status, etc., and the composition of households refer to the time of the survey. The income of the household does not include amounts received by persons who are members of the household during all or part of the income year if these persons no longer reside with the household at the time of enumeration. On the other hand, household income includes amounts reported by persons who did not reside with the household during the income year but who were members of the household at the time of enumeration.

Data on consumer income collected in the CPS by the Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, Social Security,

union dues, Medicare deductions, etc. Also, money income does not reflect the fact that some households receive part of their income in the form of non-money transfers such as food stamps, health benefits, subsidized housing, and energy assistance; that many farm households receive non-money income in the form of rent free housing and goods produced and consumed on the farm; or that non-money income is received by some nonfarm residents that often takes the form of the use of business transportation and facilities, or full or partial contributions for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to under report their income. From an analysis of independently derived income estimates, it has been determined that wages and salaries tend to be much better reported than such income types as public assistance, Social Security, and net income from interest, dividends, rents, etc.

Income Sources - Wages and Salary

Money wages or salary is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, etc. Earnings for self-employed incorporated businesses are considered wage and salary.

Income Sources - Nonfarm Self-Employment

Net income from nonfarm self-employment is net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. In general, inventory changes are considered in determining net income since replies based on income tax returns or other official records do reflect inventory changes. However, when values of inventory changes are not reported, net income figures exclusive of inventory changes are accepted. The value of saleable merchandise consumed by the proprietors of retail stores is not included as part of net income.

Income Sources - Farm Self-Employment

Net income from farm self-employment is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, as a renter, or as a sharecropper. Gross receipts include the value of all products sold,

government crop loans, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc.

Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farm hands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not State and Federal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income. In general, inventory changes are considered in determining net income only when they are accounted for in replies based on income tax returns or other official records which reflect inventory changes; otherwise, inventory changes are not taken into account.

Income Sources - Social Security

Social Security includes Social Security pensions and survivors' benefits, and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance and railroad retirement insurance checks from the U.S. Government. "Medicare" reimbursements are not included.

Income Sources - Supplemental Security Income

Supplemental Security Income includes payments made by Federal, State, and local welfare agencies to low income persons who are (1) aged (65 years old and over), (2) blind, or (3) disabled.

Income Sources - Public Assistance

Public assistance or welfare payments include public assistance payments such as Aid to Families with Dependent Children and general assistance.

Income Sources - Interest and Dividends

Interest, dividends, income from estates or trusts, net rental income or royalties include dividends from stockholdings or membership in associations, interest on savings or bonds, periodic receipts from estates or trust funds, net income from rental of a house, store, or other property to others, receipts from boarders or lodgers, and net royalties.

Income Sources - Unemployment Compensation

Worker's Compensation, and Veterans' Payments. Unemployment compensation, veterans' payments, or worker's compensation includes: (1) unemployment compensation received from government unemployment insurance agencies or private companies during periods of unemployment and any strike benefits received from union funds; (2) money paid periodically by the Veterans Administration to disabled members of the

Armed Forces or to survivors of deceased veterans, subsistence allowances paid to veterans for education and on-the-job training, as well as so-called "refunds" paid to ex-servicemen as GI insurance premiums; and (3) worker's compensation received periodically from public or private insurance companies for injuries incurred at work. The cost of this insurance must have been paid by the employer and not by the person.

Income Sources - Private and Government Pensions and Annuities

Many employers and unions have established pension program their employees so that upon retirement the employee will receive regular income to replace his/her earnings. Many of these programs also provide income to the employees if he/she becomes severely disabled, or to his/her survivors if the employee dies. Other types of retirement income include annuities and paid up life insurance policies. Some people purchase annuities which yield a set amount over a certain number of years. Other people may convert their paid up life insurance policy into an annuity after they retire.

Income Sources - Alimony and Child Support

Alimony is money received periodically from a former spouse following a divorce or separation. Child support is money received from a parent for the support of their children following a divorce or legal separation. Money received from relatives, other than the parent, or friends is not considered as child support.

Receipts Not Counted As Income

Receipts from the following sources are not included as income: (1) money received from the sale of property, such as stocks, bonds, a house, or a car (unless the person is engaged in the business of selling such property, in which case the net proceeds is counted as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump-sum inheritances of insurance payments.

Industry, Occupation, and Class of Worker (I&O) - Current Job (Basic CPS data)

For the employed, current job is the job held in the reference week (the week before the survey). Persons with two or more jobs are classified in the job at which they worked the most hours during the reference week. The unemployed are classified according to their latest full-time job lasting two or more weeks or by the job (either full-time or part-time) from which they were on layoff. The I&O questions are also asked of persons not in the labor force who are in the fourth and eighth months in sample and who have worked in the last five years. The occupation/industry classification system for the 2000 Census was used to code CPS data beginning with the January 2003 file. See Table 1 below; the occupation classifications underwent revisions in 2011, to make them consistent with Census 2010.

I&O - Longest Job (supplement data)

Longest job applies to the job held longest during the preceding year for persons who worked that year, without regard to their current employment status.

Table 1 – I&O Details for Current Job (Basic CPS) and Longest Job (ASEC Supplement)

Subject		Current Job (Basic CPS data)	Longest Job Last Year (ASEC data)
		Variable Name	
Industry	4-digit code	PEIOIND	INDUSTRY
	2-digit recode (detailed groups)	A_DTIND	WEIND
	2-digit recode (major groups)	A_MJIND	WEMIND
Occupation	4-digit code	PEIOOCC	OCCUP
	2-digit recode (detailed groups)	A DTOCC	POCCU2
	2-digit recode (major groups)	A_MJOCC	WEMOCCG
Class of Worker	Class of Worker	A_CLSWKR	LJCW

Job Seekers

All unemployed persons who made specific efforts to find a job sometime during the 4-week period preceding the survey week.

Keeping House

Persons are classified as keeping house if they engage in own housework. This is one of the "not in labor force" classifications employment status recode (ESR) = 4.

LFSR (Labor Force Status Recode)

This classification is available for each civilian 15 years old and over according to his/her responses to the monthly (basic) labor force items.

Labor Force

Persons are classified as in the labor force if they are employed, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" includes all civilians classified as employed or unemployed. The file includes labor force data for civilians age 15 and over. However, the official definition of the civilian labor force is age 16 and over.

1. Labor Force – Employed

Employed persons comprise (1) all civilians who, during the survey week did any work at all as paid employees or in their own business or profession, or on their own farm, or who work 15 hours or more as unpaid workers on a farm or a business operated by a member of the family; and (2) all those who have jobs but who are not working because of illness, bad weather, vacation, or labor-management dispute, or because they are taking time off for personal reasons, whether or not they are seeking other jobs. These persons would have a Labor Force Status Recode (LFSR) of 1 or 2 respectively in character 145 of the person record which designates "at work" and "with a job, but not at work." Each employed person is counted only once. Those persons who held more than one job are counted in the job at which they worked the greatest number of hours during the survey week. If they worked an equal number of hours at more than one job, they are counted at the job they held the longest.

2. Labor Force – Unemployed

Unemployed persons are those civilians who, during the survey week, have no employment but are available for work, and (1) have engaged in any specific job seeking activity within the past 4 weeks such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) are waiting to be called back to a job from

which they had been laid off; or (3) are waiting to report to a new wage or salary job within 30 days. These persons would have an LFSR code of 3 or 4 in the person record. The unemployed includes job leavers, job losers, new job entrants, and job reentrants.

2a. Unemployed - Job Leavers

Persons who quit or otherwise terminate their employment voluntarily and immediately begin looking for work.

2b. Unemployed - Job Losers

Persons whose employment ends involuntarily, who immediately begin looking for work, and those persons who are already /on layoff.

2c. Unemployed - New Job Entrants

Persons who never worked at a full-time job lasting two weeks or longer.

2d. Unemployed - Job Reentrants

Persons who previously worked at a full-time job lasting two weeks or longer but are out of the labor force prior to beginning to look for work.

3. Labor Force - Not in Labor Force

Included in this group are all persons in the civilian noninstitutional population who are neither employed nor unemployed. Information is collected on their desire for and availability to take a job at the time of the CPS interview, job search activity in the prior year, and reason for not looking in the 4-week period prior to the survey week. This group includes discouraged workers, defined as persons not in the labor force who want and are available for a job and who have looked for work sometime in the past 12 months (or since the end of their last job if they held one within the past 12 months), but who are not currently looking because they believe there are no jobs available or there are none for which they would qualify. Such persons have an LFSR code of 7 in the person record.

Finally, it should be noted that the unemployment rate represents the number of persons unemployed as a percent of the civilian labor force 16 years old and over. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc. The job loser, job leaver, reentrant, and new entrant rates are each calculated as a percent of the civilian labor force 16 years old and over; the sum of the rates for the four groups thus equals the total unemployment rate.

Layoff

A person who is unemployed but expects to be called back to a specific job. If he/she expects to be called back within 30 days, it is considered a temporary layoff; otherwise, it is an indefinite layoff.

Level of School Completed/Degree Received

These data changed on the March 1992 file. A new question, "What is the highest level of school ... has completed or the highest degree ... has received? Replace the old "highest grade attended" and "year completed" questions. The new question provides more accurate data on the degree status of college students. Educational attainment applies only to progress in "regular" school. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system.

Looking for Work

A person who is trying to get work or trying to establish a business or profession.

March Supplement Weight

The March supplement weight is on all person records and is used to produce "supplement" estimates; that is, income, work experience, migration, and family characteristic estimates.

Marital Status

The marital status classification identifies four major categories: single (never married), married, widowed, and divorced. These terms refer to the marital status at the time of enumeration.

The category "married" is further divided into "married, civilian spouse present," "married, Armed Forces spouse present," "married, spouse absent," "married, Armed Forces spouse absent," and "separated." A person is classified as "married, spouse present" if the husband or wife is reported as a member of the household even though he or she may be temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as "separated" included those with legal separations, those living apart with intentions of obtaining a divorce, and other persons

permanently or temporarily estranged from their spouses because of marital discord.

For the purpose of this file, the group "other marital status" includes "widowed and divorced," "separated," and "other married, spouse absent."

Medicare

The Medicare Program is designed to provide medical care for the aged and disabled. The Basic Hospital Insurance Plan (Part A) is designed to provide basic protection against hospital costs and related post-hospital services. This plan also covers many persons under 65 years old who receive Social Security or railroad retirement benefits based on long-term disability. Part A is financed jointly by employers and employees through Social Security payroll deductions. Qualified persons 65 years old and over who are not otherwise eligible for Part A benefits may pay premiums directly to obtain this coverage. The Medical Insurance Plan (Part B) is a voluntary plan which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians' and surgeons' services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments by each enrollee, and subsidized by Federal general revenue funds.

The Medicare question on the ASEC supplement attempted to identify all persons 15 years old and over who were "covered" by Medicare at any time during the previous calendar year. The term "covered" means enrolled in the Medicare Program. In order to be counted, the person did not necessarily have to receive medical care paid for by Medicare.

Medicaid

The Medicaid Program is designed to provide medical assistance to needy families with dependent children, and to aged, blind, or permanently and totally disabled individuals whose incomes and resources are insufficient to meet the costs of necessary medical services. The program is administered by State agencies through grants from the Health Care Financing Administration of the Department of Health and Human Services. Funding for medical assistance payments consists of a combination of Federal, State, and in some cases, local funds.

Medicaid is a categorical program with complex eligibility rules which vary from State to State. There

are two basic groups of eligible individuals: the categorically eligible and the medically needy. The major categorically eligible groups are all Aid to Families with Dependent Children (AFDC) recipients and most Supplemental Security Income (SSI) recipients. Other categorically eligible groups are (1) those who meet basic State cash assistance eligibility rules/aged, blind, disabled, needy single parents with children, and, in some States, needy unemployed parents with children, but who are not currently receiving money payments; and (2) needy persons who meet categorical eligibility standards but are institutionalized for medical reasons (e.g., low-income elderly persons in nursing homes). However, such institutionalized persons are not included in the CPS universe and, therefore, are not reflected in these statistics.

In roughly one-half of the States, coverage is extended to the medically needy/persons meeting categorical age, sex, or disability criteria, whose money incomes and assets exceed eligibility levels for cash assistance but are not sufficient to meet the cost of medical care. In such States, qualifying income and asset levels are usually above those set for cash assistance. Families with large medical expenses relative to their incomes and assets may also meet medically needy eligibility standards in these States.

The Medicaid question on the ASEC supplement attempted to identify all persons who were "covered" by Medicaid at any time during the previous calendar year. The term "covered" means enrolled in the Medicaid program, i.e., had a Medicaid medical assistance card, or incurred medical bills which were paid for by Medicaid. In order to be counted, the person did not have to receive medical care paid for by Medicaid.

After data collection and creation of an initial microdata file, further refinements were made to assign Medicaid coverage to children. In this procedure all children under 21 years old in families were assumed to be covered by Medicaid if either the householder or spouse reported being covered by Medicaid (this procedure was required mainly because the Medicaid coverage question was asked only for persons 15 years old and over). All adult AFDC recipients and their children, and SSI recipients living in States which legally require Medicaid coverage of all SSI recipients, were also assigned coverage.

Mobility Status

The population of the United States, 1 year old and over, is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the ASEC supplement and the place of residence in March of the previous year. For ASEC years ending in 0 and 5, this information is also collected for 5-year mobility for person 5 years old and over.

Migration status (one-year) is derived from answers to questions about residence one year before the survey date and the geographic location of the respondent's current residence. One-year migration data are collected annually. Similarly, five-year migration status is based on residence five years ago compared to current residence. The first of three inquiries is: "Were/Was ___ living in this house one year ago?" If the answer was "No," the enumerator asked, "Where did ___ live one year ago?" In classification, three main categories distinguish nonmovers, movers within the United States, and movers from abroad.

Nonmovers are all persons who are living in the same house at the end of the period as at the beginning of the period. Movers within the United States are all persons who are living in a different house in the United States at the end of the period than at the beginning of the period. Movers from abroad include all persons whose place of residence is outside the United States at the beginning of the period, that is, in an outlying area under the jurisdiction of the United States or in a foreign country.

Month-In-Sample

The term is defined as the number of times a unit is interviewed. Each unit is interviewed eight times during the life of the sample.

Never Worked

A person who has never held a full-time civilian job lasting two consecutive weeks or more.

Nonfamily Householder

A nonfamily householder (formerly called a primary individual) is a person maintaining a household while living alone or with nonrelatives only.

Nonfarm Self-employment Net Income

The term is defined as net money income (gross receipts minus expenses) from an individual's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. In

general, inventory changes are considered in determining net income; replies based on income tax returns or other official records do reflect inventory changes; however, when values of inventory changes are not reported, net income figures exclusive of inventory changes are accepted. The value of saleable merchandise consumed by the proprietors of retail stores is not included as part of net income.

Nonworker

A person who did not do any work in the calendar year preceding the survey.

Nonrelative of Householder with No Own Relatives in Household

A nonrelative of the householder who has no relative(s) of his own in the household. This category includes such nonrelatives as a ward, a lodger, a servant, or a hired hand, who has no relatives of his own living with him in the household.

Nonrelative of Householder with Own Relatives (Including Spouse) in Household

Any household member who is not related to the householder but has relatives of his own in the household; for example, a lodger, his spouse, and their son.

Other Relative of Householder

Any relative of the householder other than his spouse, child (including natural, adopted, or step child), sibling, or parent; for example, grandson, daughter-in-law, etc.

Own Child

A child related by birth, marriage, or adoption to the family householder.

Part-Time, Economic Reasons

The item includes slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. (See also Full-Time Worker.)

Part-Time Other Reasons

The item includes labor dispute, bad weather, own illness, vacation, demands of home housework, school, no desire for full-time work, and full-time worker only during peak season.

Part-Time Work

Persons who work between 1 and 34 hours are designated as working "part-time" in the current job held

during the reference week. For the March supplement, a person is classified as having worked part-time during the preceding calendar year if he worked less than 35 hours per week in a majority of the weeks in which he worked during the year. Conversely, he is classified as having worked full-time if he worked 35 hours or more per week during a majority of the weeks in which he worked.

Part-Year Work

Part-year work is classified as less than 50 weeks' work.

Pension Plan

The pension plan question on the ASEC supplement attempted to identify if pension plan coverage was available through an employer or union and if the employee was included. This information was collected for civilian persons 15 years old and over who worked during the previous calendar year.

Population Coverage

Population coverage includes the civilian population of the United States plus approximately one million members of the Armed Forces in the United States living off post or with their families on post in households with least one civilian adult but excludes all other members of the Armed Forces. This file excludes inmates of institutions. The labor force and work experience data are not collected for Armed Forces members.

Poverty

In this file, families and unrelated individuals are classified as being above or below the poverty level using a poverty index adopted by a Federal Interagency Committee in 1969 and slightly modified in 1981.

The modified index provides a range of income cutoffs or "poverty thresholds" adjusted to take into account family size, number of children, and age of the family householder or unrelated individual; prior to 1981, adjustments were also made on the basis of farm-nonfarm residence and sex of the householder.

The impact of these revisions on the poverty estimates is minimal at the national level. The poverty cutoffs are updated every year to reflect changes in the Consumer Price Index. The average poverty threshold for a family of four was \$12,091 in 1985. For a detailed explanation of the poverty definition, see Current Population Reports, Series P-60, No. 238, Income, Poverty, and Health Insurance Coverage in the United States: 2009.

Public Assistance

(See Income.)

Public or Other Subsidized Housing

Participation in public housing is determined by two factors: program eligibility and the availability of housing. Income standards for initial and continuing occupancy vary by local housing authority, although the limits are constrained by Federal guidelines. Rental charges, which, in turn, define net benefits, are set by a Federal statute not to exceed 30 percent of net monthly money income. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

There are some programs through which housing assistance is provided to low-income families and individuals living in public or privately owned dwellings. Two of the more common types of programs in which Federal, State, and local funds are used to subsidize private sector housing are rent supplement and interest reduction plans. Under a rent supplement plan the difference between the "fair market" rent and the rent charged to the tenant is paid to the owner by a government agency. Under an interest reduction program, the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low income tenants in the form of lower rent charges.

There were two questions dealing with public and low cost housing on the ASEC supplement questionnaire. The first question identifies residence in a housing unit owned by a public agency. The second question identifies beneficiaries who were not living in public housing projects, but who were paying lower rent due to a government subsidy. These questions differ from other questions covering noncash benefits in that they establish current reciprocity status in March of the current year rather than reciprocity status during the previous year.

Race

Beginning in January 2003, revisions to race categories took effect. Respondents were allowed to report more than one race, making selections from a "flash-card". The six race groups are: White, Black or African American, American Indian or Alaskan Native, Asian, Native Hawaiian or Other Pacific Islander, and Other race. The last category includes any other race except the five mentioned. Because of these changes, data on race are not directly comparable to previous files. Use caution when interpreting changes in the racial composition of the U.S. over time.

Reentrants

Persons who previously worked at a full-time job lasting two weeks or longer but who are out of the labor force prior to beginning to look for work.

Related Children

Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption. For each type of family unit identified in the CPS, the count of own children under 18 years old is limited to single (never married) children; however, "own children under 25" and "own children of any age," include all children regardless of marital status. The totals include never-married children living away from home in college dormitories.

Related Subfamily

A related subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including, the householder or spouse. The most common example of a related subfamily is a young married couple sharing the home of the husband's or wife's parents. The number of related subfamilies is not included in the number of families.

School, Major Activity

A person who spent most of his time during the survey week attending any kind of public or private school, including trade or vocational schools in which students receive no compensation in money or kind.

School Lunches

The National School Lunch Program is designed to assist States in providing a school lunch for all children at moderate cost. The National School Lunch Act of 1946 was further amended in 1970 to provide free and reduced-price school lunches for children of needy families. The program is administered by the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) through State educational agencies or through regional USDA nutrition services for nonprofit private schools. The program is funded by a combination of Federal funds and matching State funds.

All students eating lunches prepared at participating schools pay less than the total cost of the lunches. Some students pay the "full established" price for lunch (which itself is subsidized) while others pay a "reduced" price for lunch, and still others receive a "free" lunch. Program regulations require students receiving free lunches to live in households with incomes below 125 percent of the

official poverty level. Those students receiving a reduced-price school lunch (10 to 20 cents per meal) live in households with incomes between 125 percent and 195 percent of the official poverty level. The data in this file, however, do not distinguish between reciprocity of free and reduced-price school lunches.

The questions on the ASEC supplement provide a very limited amount of data for the school lunch program. Questions concerning the school lunch program were designed to identify the number of members 5 to 18 years old in households who "usually" ate a hot lunch. This defined the universe of household members usually receiving this noncash benefit. This was followed by a question to identify the number of members receiving free or reduced price lunches.

Self-Employed

Self-employed persons are those who work for profit or fees in their own business, profession or trade, or operate a farm.

Secondary Individuals

A roomer, boarder, or resident employee with no relatives in the household, or a group quarters member who has no relatives living with him/her.

Stretches of Unemployment

A continuous stretch is one that is not interrupted by the person getting a job or leaving the labor market to go to school, to keep house, etc. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the period of seeking work.

Topcode

For confidentiality purposes, usual hourly earnings from the current job and earnings from the longest job are topcoded (i.e., cut off at a particular amount).

Refer to Appendix F for an explanation and topcode values of hourly earnings from the current job. Earnings from the longest job are collected during enumeration up to any amount; however, the amount is topcoded on the public use file. (See page 5-1 for more information.) From the supplement, total person's income is the sum of the amounts from the individual income types; total family income is the sum of the total person's income for each family member; total household income is the sum of the total income for each person in the household.

Total Money Income

The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.

Unable to Work

A person is classified as unable to work because of long-term physical or mental illness, lasting six months or longer.

Unemployed

(See Labor Force.)

Unemployment Compensation

(See Income.)

Unpaid Family Workers

Unpaid family workers are persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by birth or marriage.

Unrelated Individuals

Unrelated individuals are persons of any age (other than inmates of institutions) who are not living with any relatives. An unrelated individual may be (1) a nonfamily householder living alone or with nonrelatives only, (2) a roomer, boarder, or resident employee with no relatives in the household, or (3) a group quarters member who has no relatives living with him/her. Thus, a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to anyone else in the housing unit, a maid living as a member of her employer's household but with no relatives in the household, and a resident staff member in a hospital living apart from any relatives are all examples of unrelated individuals.

Unrelated Subfamily

An unrelated subfamily is a family that does not include among its members the householder and relatives of the householder. Members of unrelated subfamilies may include persons such as guests, roomers, boarders, or resident employees and their relatives living in a household. The number of unrelated subfamily members is included in the number of household members but is not included in the count of family members.

Persons living with relatives in group quarters were formerly considered as members of families. However, the number of such unrelated subfamilies is so small that persons in these unrelated subfamilies are included in the count of secondary individuals.

Veteran Status

If a person served at any time during the four most recent wartime periods, the codes for all periods of service are entered. A person can report up to 4 periods of service. The following codes are used:

- 0 Children under 15
- 1 September 2001 or later
- 2 August 1990 to August 2001
- 3 May 1975 to July 1990
- 4 Vietnam era (Aug 1964 to Apr 1975)
- 5 February 1955 to July 1964
- 6 Korean War (July 1950 to January 1955)
- 7 January 1947 to June 1950
- 8 World War II (Dec. 1941 to Dec. 1946)
- 9 November 1941 or earlier

Wage and Salary Workers

Wage and salary workers receive wages, salary, commission, tips, or pay in kind from a private employer or from a governmental unit. Also included are persons who are self-employed in an incorporated business. (See income.)

Weeks Worked in the Previous Year

Persons are classified according to the number of different weeks, during the preceding calendar year, in which they did any civilian work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Workers

(See Labor Force--Employed.)

Work Experience

Includes those persons who during the preceding calendar year did any work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

Year-Round Full-Time Worker

A year-round full-time worker is one who usually worked 35 hours or more per week for 50 weeks or more during the preceding calendar year.

Geographic Concepts

Geographic Division

An area composed of contiguous States, with Alaska and Hawaii also included in one of the divisions. (A State is one of the 51 major political units in the United States.) The nine geographic divisions have been largely unchanged for the presentation of summary statistics since the 1910 census.

Regions

There are four regions: Northeast, Midwest (formerly North Central)¹, West, and South. States and divisions within regions are presented in the tables below.

NORTHEAST REGION	
<i>New England Division</i>	<i>Middle Atlantic Division</i>
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWEST REGION	
<i>East North Central Division</i>	<i>West North Central Division</i>
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

MIDWEST REGION	
<i>Mountain Division</i>	<i>Pacific Division</i>
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
Utah	
Wyoming	
New Mexico	

¹ The Midwest Region was designated as the North Central Region until June 1964

SOUTH REGION		
<i>East South Central Division</i>	<i>West South Central Division</i>	<i>South Atlantic Division</i>
Alabama	Arkansas	Delaware
Kentucky	Louisiana	District of Columbia
Mississippi	Oklahoma	Florida
Tennessee	Texas	Georgia
		Maryland
		North Carolina
		South Carolina
		Virginia
		West Virginia

APPENDIX A

INDUSTRY CLASSIFICATION

Industry Classification Codes for Detailed Industry (4 digit) (Starting January 2020)

These categories are aggregated into 52 detailed groups and 14 major groups (see pages 10-12 of this appendix. The codes in the right hand column are the NAICS equivalent.

These codes correspond to items PEIO1ICD and PEIO2ICD of the Basic CPS record layout, in all months, **except the ASEC files**. In the ASEC, these codes correspond to PEIOIND of the Person record.

CENSUS CODE	DESCRIPTION	NAICS CODE
Agriculture, Forestry, Fishing, and Hunting		
0170	Crop production	111
0180	Animal production	112
0190	Forestry except logging	1131, 1132
0270	Logging	1133
0280	Fishing, hunting, and trapping	114
0290	Support activities for agriculture and forestry	115
Mining		
0370	Oil and gas extraction	211
0380	Coal mining	2121
0390	Metal ore mining	2122
0470	Nonmetallic mineral mining and quarrying and not specified type of mining	Part of 21
0490	Support activities for mining	213
Utilities		
0570	Electric power generation, transmission and distribution	Pt. 2211
0580	Natural gas distribution	Pt. 2212
0590	Electric and gas, and other combinations	Pts. 2211, 2212
0670	Water, steam, air-conditioning, and irrigation systems	22131, 22133
0680	Sewage treatment facilities	22132
0690	Not specified utilities	Part of 22

CODE	DESCRIPTION	INDUSTRY CODE
	Construction	
0770	** Construction (Includes the cleaning of buildings and dwellings is incidental during construction and immediately after construction)	23
	Manufacturing	
	Nondurable Goods manufacturing	
1070	Animal food, grain and oilseed milling	3111, 3112
1080	Sugar and confectionery products	3113
1090	Fruit and vegetable preserving and specialty food manufacturing	3114
1170	Dairy product manufacturing	3115
1180	Animal slaughtering and processing	3116
1190	Retail bakeries	311811
1270	Bakeries, except retail	3118 exc. 311811
1280	Seafood and other miscellaneous foods, n.e.c.	3117, 3119
1290	Not specified food industries	Part of 311
1370	Beverage manufacturing	3121
1390	Tobacco manufacturing	3122
1470	Fiber, yarn, and thread mills	3131
1480	Fabric mills, except knitting	3132 exc. 31324
1490	Textile and fabric finishing and coating mills	3133
1570	Carpet and rug mills	31411
1590	Textile product mills, except carpets and rugs	314 exc. 31411
1670	Knitting mills	31324, 3151
1691	Cut and sew apparel manufacturing, apparel accessories, and other apparel manf.	3152, 3159
1770	Footwear manufacturing	3162
1790	Leather tanning and products, except footwear manufacturing	3161, 3169
1870	Pulp, paper, and paperboard mills	3221
1880	Paperboard containers and boxes	32221
1890	Miscellaneous paper and pulp products	32222, 32223, 32229
1990	Printing and related support activities	3231
2070	Petroleum refining	32411
2090	Miscellaneous petroleum and coal products	32419
2170	Resin, synthetic rubber and fibers, and filaments manufacturing	3252
2180	Agricultural chemical manufacturing	3253
2190	Pharmaceutical and medicine manufacturing	3254
2270	Paint, coating, and adhesive manufacturing B46	3255
2280	Soap, cleaning compound, and cosmetics manufacturing	3256
2290	Industrial and miscellaneous chemicals	3251, 3259
2370	Plastics product manufacturing	3261
2380	Tire manufacturing	32621
2390	Rubber products, except tires, manufacturing	32622, 32629

CODE	DESCRIPTION	INDUSTRY CODE
Durable Goods Manufacturing		
2470	Pottery, ceramics, and related products manufacturing	32711
2480	Structural clay product manufacturing	32712
2490	Glass and glass product manufacturing	3272
2570	Cement, concrete, lime, and gypsum product manufacturing	3273, 3274
2590	Miscellaneous nonmetallic mineral product manufacturing	3279
2670	Iron and steel mills and steel product manufacturing	3311, 3312
2680	Aluminum production and processing	3313
2690	Nonferrous metal, except aluminum, production and processing	3314
2770	Foundries	3315
2780	Metal forgings and stampings	3321
2790	Cutlery and hand tool manufacturing	3322
2870	Structural metals, and tank and shipping container manufacturing	3323, 3324
2880	Machine shops; turned product; screw, nut and bolt manufacturing	3327
2890	Coating, engraving, heat treating and allied activities	3328
2970	Ordnance	332992 to 332995
2980	Miscellaneous fabricated metal products manufacturing	3325, 3326, 3329 exc. 332992, 332993, 332994, 332995
2990	Not specified metal industries	Part of 331 and 332
3070	Agricultural implement manufacturing	33311
3080	Construction, mining and oil field machinery manufacturing	33312, 33313
3095	Commercial and service industry machinery manufacturing	3333
3170	Metalworking machinery manufacturing	3335
3180	Engines, turbines, and power transmission equipment manufacturing	3336
3291	"Machinery manufacturing, n.e.c. or not specified"	3332, 3334, 3339, Part of 333

APPENDIX B

OCCUPATION CLASSIFICATION

(Beginning January 2020)

These categories are aggregated into 23 detailed groups and 11 major groups (see pages 14 and 15 of this appendix). The codes in the right hand column are the 2018 SOC equivalent.

These codes correspond to items PEIO1OCD and PEIO2OCD of the Basic CPS record layout in all months. In **ASEC**, these codes correspond to items PEIOOCC and OCCUP of the Person Record. These codes are also applicable for any other CPS supplements that collect occupation data.

1 BASIC CPS ITEMS

1.1 MOVER ITEMS

HH32b

Did (you/name of reference person) live at this address during the week of November 19, 2019?

- 1 Yes
- 2 No

HH32d

Did any of the following household members live here during the week of November 19, 2019?

- 1 Yes
- 2 No

1.2 FAMILY INCOME

S FAMINC

Which category represents the total combined income of all members of this FAMILY during the past 12 months?

This includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, social security payments and any other money income received by members of this family who are 15 years of age or older?

- | | | | |
|---|-------------------|----|--------------------|
| 1 | Less than \$5,000 | 9 | 30,000 to 34,999 |
| 2 | 5,000 to 7,499 | 10 | 35,000 to 39,999 |
| 3 | 7,500 to 9,999 | 11 | 40,000 to 49,999 |
| 4 | 10,000 to 12,499 | 12 | 50,000 to 59,999 |
| 5 | 12,500 to 14,999 | 13 | 60,000 to 74,999 |
| 6 | 15,000 to 19,999 | 14 | 75,000 to 99,999 |
| 7 | 20,000 to 24,999 | 15 | 100,000 to 149,000 |
| 8 | 25,000 to 29,999 | 16 | 150,000 to more |

1.3 INCDKR

Is the combined income of all members of this FAMILY during the past 12 months above or below \$75,000?

- 1 Above
- 2 Below

2 INTRODUCTION and WORK EXPERIENCE

Pr incom

?[F1] Importance of responding

- * Wording of introduction is optional.

The questions you just answered were about your job and economic status last week. The next set of questions ask about your job and economic status last year.

- 1 Enter 1 to Continue

Q29a

Did (name/you) work at a job or business at any time during 2019?

- 1 Yes
- 2 No

Q29b

Did (you/he/she) do any temporary, part-time, or seasonal work even for a few days during 2019?

- * Include any Military Reserves or National Guard work.

- 1 Yes
- 2 No

Q30

Even though (name/you) did not work in 2019, did (you/he/she) spend any time trying to find a job or on layoff?

- 1 Yes
- 2 No

Q31

How many different weeks (was/were) (name/you) looking for work or on layoff from a job?

* (01-52) Number of weeks

Q32

What was the main reason (you/he/she) did not work in 2019?

* Read categories if necessary

- 1 Ill, or disabled and unable to work
- 2 Retired
- 3 Taking care of home or family
- 4 Going to school
- 5 Could not find work
- 6 Doing something else

Q33

During 2019 in how many weeks did (name/you) work even for a few hours? Include paid vacation and sick leave as work.

- * (01-52) Number of weeks
 - * Enter 97 if respondent can only answer in months
-

Q33mon

* Enter number of months worked
(1-12)

Q33ver

Then (name/you) worked about (number) weeks. Is that correct?

- 1 Yes
- 2 No – back to Q33 and obtain estimate

Q35

Did (name/you) lose any full weeks of work in 2019 because (you/he/she) (were/was) on layoff from a job or lost a job?

* Number of weeks worked in 2019: (number)

- 1 Yes
- 2 No
- 7 Mistake made in number of weeks worked last year - Specify in Q35SP

Q35SP

* Specify mistake made in number of weeks worked last year

Q36

You said (name/you) worked about (number) (week/weeks). How many OF THE REMAINING (number) WEEKS (was/were) (you/he/she) looking for work or on layoff from a job?

* Enter 0 for none

Q37

Were the (number) weeks (name/you) (was/were) looking for work or on layoff all in one stretch?

- 1 Yes – one stretch
- 2 No – two stretches
- 3 No – 3 or more stretches

Q38

What was the main reason (name/you) (was/were) not working or looking for work in the remaining weeks of 2019?

* Read list only if respondent is having difficulty answering the question

- | | | | |
|---|-------------------------------------|---|-------------------------|
| 1 | Ill, or disabled and unable to work | 4 | Retired |
| 2 | Taking care of home or family | 5 | No work available |
| 3 | Going to school | 6 | Other (Specify - Q38sp) |

Q38sp

* Enter verbatim response

Q39

**For how many employers did (name/you) work in 2019?
If more than one at the same time, only count it as one employer.**

- 1 One
- 2 Two
- 3 Three or more

Q41

In the (one week/weeks) that (name/you) worked, how many hours did (you/he/she) (work that week?/usually work per week?)

* Enter number of hours

Q43

During 2019, were there one or more weeks in which (name/you) worked less than 35 hours?

Exclude time off with pay because of holidays, vacation, days off, or sickness.

- 1 Yes
- 2 No

Q44

In the weeks that (name/you) worked, how many weeks did (name/you) work less than 35 hours in 2019?

* Number of weeks worked in 2019: (number)
(Number of weeks was reported in item Q33)

(1-52)

Q45

What was the main reason (name/you) worked less than 35 hours per week?

* Read list only if respondent is having difficulty answering the question

- 1 Could not find a full time job
- 2 Wanted to work part time or only able to work part time
- 3 Slack work or material shortage
- 4 Other reason

Q46

What was (name's/your) longest job during 2019?

Was it:

- (IO1NAM:) (name of employer)
- (IO1IND:) (kind of business or industry)
- (IO1OCC:) (occupation)
- (IO1DT:) (duties)

* CLASS OF WORKER: (PRIVATE/ FEDERAL GOVERNMENT/ STATE GOVERNMENT/ LOCAL GOVERNMENT/WORKING WITHOUT PAY IN FAMILY BUS./ SELF EMPLOYED--INCORPORATED/ SELF EMPLOYED--UNINCORPORATED)

- 1 Same as listed
- 2 Different job

Q47a

For whom did (name/you) work (?/at) (blank/(your/his/her) (blank/longest job during 2019?))

* Name of Company, business, organization or other employer

(blank/ *IO1NAM:) (entry)

The current employer is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ * If longest job last year is military job, enter Armed Forces)

(blank/ * Enter N for no work done at all during 2019)

Q47b

What kind of business or industry is this?

For example: TV and radio manufacturing, retail shoe store, farm

(blank/ *IO1IND:) (entry)

The current business or industry type is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ * If longest job last year is military job, enter NA)

Q47b1

Is this business or organization mainly manufacturing, retail trade, wholesale trade, or something else?

(blank/ * IO1MFG:) (entry)

The current business or organization type is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ * If longest job last year is military job, enter 4)

- 1 Manufacturing
- 2 Retail trade
- 3 Wholesale trade
- 4 Something else

Q47c

What kind of work (was/were) (you/he/she) doing?

For example: Electrical Engineer, Stock Clerk, Typist

(blank/ * IO1OCC:) (entry)

The current occupation is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ * If longest job last year is military job, enter Armed Forces)

Q47d1

What were (your/his/her) most important activities or duties?

For example: Types, keeps account books, files, sells cars, operates printing press, finishes concrete.

(blank/ * IO1DT:) (entry)

The current job description is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ * If longest job last year is military job, enter NA)

Q47d2

What were (your/his/her) most important activities or duties?

For example: Types, keeps account books, files, sells cars, operates printing press, finishes concrete.

(blank/ *IO1DT:) (entry)

The current job description is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ *If longest job last year is military job, enter NA)

Q47E1

* Ask Only If Necessary

(Were/Was) (you/he/she) employed by government, by a PRIVATE company, a nonprofit organization, or (was/were) (you/he/she) self-employed or working in a family business?

- 1 Government
- 2 Private for profit company
- 3 Non profit organization including tax exempt and charitable organizations
- 4 Self employed
- 5 Working in family business

Q47E1a

Would that be the federal, state, or local government?

- 1 Federal
- 2 State
- 3 Local (county, city, township)

Q47E1b

Was this business incorporated?

- 1 Yes
- 2 No

Q47E1c

(Were/Was) (you/name) the owner of the business?

- 1 Yes
- 2 No

Q4788

Counting all locations where (this employer/(name/you)) (operates/operate), what is the total number of persons who work for ((name's/your) employer)/name/you)?

* Read categories if necessary

- 1 under 10
- 2 10-49
- 3 50-99
- 4 100-499
- 5 500-999
- 6 1,000+

3 EARNED INCOME

The Earnings and Income question series include range follow-up questions presented anytime a respondent doesn't know or refuses to provide an exact dollar amount for a source they (or someone in the household) indicates as having received. Follow-up questions allow respondents that do not feel comfortable giving exact dollar values to report an income range. There are three sets of categories used for the income range follow-up questions: high-range, mid-range, and low-range. The income range used in the follow-up range questions depends on the source of the income. See Attachment A to this items booklet for the three levels of income range follow up questions. See Attachment B for a table that displays the income source and the range level used for the follow-up questions.

Q48aa

How much did (name/you) earn from this employer before taxes and other deductions during 2019?

- * Enter dollar amount
- * Enter 0 for none

Q48aarn1 Ask only if the respondent "Doesn't know" or 'Refused' Q48aa

Could you tell me if (name/you) earned

- less than \$45,000**
- between \$45,000 and \$60,000**
- or over \$60,000**

for the TOTAL yearly amount from this employer before taxes and other

deductions during 2019?

- 1 Less than \$45,000
- 2 Between \$45,000 and \$60,000
- 3 Over \$60,000

Q48aarn2

Did (name/you) earn

**less than \$15,000
between \$15,000 and \$30,000
or over \$30,000**

from this employer during 2019?

- 1 Less than \$15,000
- 2 Between \$15,000 and \$30,000
- 3 Over \$30,000

Q48aap

* Read if necessary

Is this a weekly, every other week, twice a month, monthly, or yearly amount?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q48a1

For how many (weekly/every other week/twice a month/monthly) pay periods did (name/you) earn (fill from Q48aa) from this employer in 2019?

* (1-12/1-24/1-26/1-52)

Q48aC2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total annual earnings entered is (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q48aV

According to my calculations (name/you) earned (total) altogether from this employer in 2019 before deductions. Does that sound about right?

- 1 Yes
- 2 No

Q48a2

What is your best estimate of (name's/your) correct total amount of earnings from this employer during 2019 before deductions?

- * PREVIOUS ENTRIES: Q48aa: (amount)
Q48aap: (periodicity)
Q48a1: (number of pay periods)

* Enter dollar amount

Q48a3

Does this amount include all tips, bonuses, overtime pay, or commissions (name/you) may have received from this employer in 2019?

- 1 Yes
- 2 No

Q48aad

How much did (name/you) earn in tips, bonuses, overtime pay, or commissions from this employer in 2019?

* Enter dollar amount

Q48aadrn1 Ask only if the respondent “Doesn’t know” or “Refused” Q48aad

Could you tell me if (name/you) earned

- less than \$1,000**
- between \$1,000 and \$3,000**
- or over \$3,000**

in tips, bonuses, overtime pay, or commissions from this employer during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000

3 Over \$3,000

Q48aadrn2

Did (name/you) earn

**less than \$100
between \$100 and \$500
or over \$500**

in tips, bonuses, overtime pay, or commissions from this employer during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q48b

What were (name's/your) net earnings from this business/farm after expenses during 2019?

- * If response is "Broke Even" then enter 1
 - * If response is "none" or if respondent does not own a business or farm, then enter "0"
 - * If response is "Lost Money" press Enter
 - * Enter dollar amount
-

Q48b_char

- * Enter "L" for Lost Money
-

Q48BL

- * Enter amount of money lost in 2019
 - * Enter annual amount only
-

Q48brn1 Ask only if the respondent "Doesn't know" or "Refused" Q48b.

Could you please tell me if (name/you) earned

**less than \$45,000
between \$45,000 and \$60,000
or over \$60,000**

for the TOTAL yearly amount from this business/farm after expenses during 2019?

- 1 Less than \$45,000
- 2 Between \$45,000 and \$60,000
- 3 Over \$60,000

Q48brn2

Did (name/you) earn

**less than \$15,000
between \$15,000 and \$30,000
or over \$30,000**

from this business/farm after expenses during 2019?

- 1 Less than \$15,000
- 2 Between \$15,000 and \$30,000
- 3 Over \$30,000

Q48bp

Is this a weekly, every other week, twice a month, monthly, quarterly, or yearly amount?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 5 Quarterly
- 7 Yearly

Q48B1A

- * Do not read to the respondent.
- * The annual rate appears out of range. The total annual business loss entered is (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q48B1B

- * Do not read to the respondent.
- * The annual rate appears out of range. The total annual business income entered is (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q48b2

What is your best estimate of (name's/your) ANNUAL net earnings from this business/farm after expenses in 2019?

* PREVIOUS ENTRIES: Q48b : (amount)
Q48bp: (periodicity)

* Enter dollar amount

What were (name's/your) net earnings from this business/farm during the FIRST quarter of 2019?

- * If response is "Broke Even" then enter 1
 - * Enter "0" for None
 - * If response is "Lost Money" press enter
 - * Enter dollar amount
-

Q48b3_char

* Enter "L" for Lost Money

Q48B3L

* Enter amount of money lost in the first quarter of 2019.

Q48b4

What were (name's/your) net earnings from this business/farm during the SECOND

quarter of 2019?

- * If response is "Broke Even" then enter 1
 - * Enter "0" for None
 - * If response is "Lost Money" press enter
 - * Enter dollar amount
-

Q48b4 char

- * Enter "L" for Lost Money
-

Q48B4L

- * Enter amount of money lost in the second quarter of 2019.
-

Q48b5

What were (name's/your) net earnings from this business/farm during the THIRD quarter of 2019?

- * If response is "Broke Even" then enter 1
 - * Enter "0" for None
 - * If response is "Lost Money" press enter
 - * Enter dollar amount
-

Q48b5 char

- * Enter "L" for Lost Money
-

Q48B5L

- * Enter amount of money lost in the third quarter of 2019.
-

Q48b6

What were (name's/your) net earnings from this business/farm during the FOURTH quarter of 2019?

- * If response is "Broke Even" then enter 1
- * Enter "0" for None

- * If response is "Lost Money" press enter
 - * Enter dollar amount
-

Q48b6 char

- * Enter "L" for Lost Money
-

Q48B6L

- * Enter amount of money lost in the fourth quarter of 2019.
-

Q48b7

Does this amount include all tips, bonuses, overtime pay, or commissions (name/you) may have received from this business in 2019?

- 1 Yes
- 2 No

Q48bad

How much did (name/you) earn in tips, bonuses, overtime pay, or commissions in 2019?

- * Enter dollar amount
-

Q48badrn1 Ask only if the respondent "Doesn't know" or "Refused" Q48bad.

Could you tell me if (name/you) earned

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in tips, bonuses, overtime pay, or commissions from this business during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

Q48badrn2

Did (name/you) earn

**less than \$100
between \$100 and \$500
or over \$500**

in tips, bonuses, overtime pay, or commissions during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q49a

Did (name/you) earn money from any other work (you/he/she) did during 2019?

- 1 Yes
- 2 No

Q49b1d

How much did (name/you) earn from all other employers before taxes and other deductions during 2019?

- * Enter dollar amount
- * Enter "0" for None

Q49b1drn1 Ask only if the respondent "Doesn't know" or "Refused" Q48b1d.

Could you please tell me if (name/you) earned

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

from all other employers before taxes and other deductions during 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000

- 7 Some other program (specify)

Q59C8s

What was the name of the other program?

- * Specify other source of cash assistance
- * Enter "Cash" if the answer is "Don't Know"

4.10 FOOD STAMPS/SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) (Source)

Q87r

At any time during 2019, did (you/ anyone in this household) receive benefits from SNAP (the Supplemental Nutritional Assistance Program) or the Food Stamp program, or use a SNAP or food stamp benefit card?

* Do not include WIC benefits.

- 1 Yes
- 2 No

Q87ar

At any time during 2019, even for one month, did (you/ anyone in this household) receive any food assistance from (State Program name)?

- * Do not include WIC benefits.
- * Include SNAP (Supplemental Nutrition Assistance Program)

- 1 Yes
- 2 No

Q88

Which of the people now living here were covered by that food assistance during 2019?

- * List all household members covered by food assistance regardless of age
- * Enter all that apply, separate using the space bar or a comma.
- * Enter 96 for All
- * Enter 0 for None
- * Probe: Anyone else?

4.11 PENSIONS (Source)

Q62Ar

During 2019 did (you/ anyone in this household) receive any pension income from a previous employer or union, (other than Social Security/ other VA benefits/ other than Social Security or VA benefits)?

* **PLEASE DO NOT INCLUDE DISTRIBUTIONS OR WITHDRAWALS FROM IRAs, 401(k)s, OR SIMILAR ACCOUNTS!**

- 1 Yes
- 2 No

Q62b

- * Read only if necessary

Who received pension income?

- * Enter all that apply, separate using the space bar or a comma.
- * Probe: Anyone Else?

Enter persons line number (1-16)

Q62Cr

What was the source of (your/ NAME's) pension income? Did (you/he/she) have a pension from a:

- * READ EACH CATEGORY.
- * Enter all that apply, separate using the space bar or a comma.

- 1 Company
- 2 Union
- 3 Federal Government
- 4 State Government
- 5 Local Government
- 6 U.S. Military
- 7 Some other source

Q62DR

What was the source of (name's/your) other pension income?

Enter all that apply
Probe as needed: Who received this source?
Probe: Any Other pension income?

- 1 U.S. Railroad Retirement pension
- 2 Other source (specify) or "don't know"

Q62Cs1

- * Specify other source of pension income
- * Enter "Other Pension" if the answer is "Don't Know"

4.12 ANNUITIES (Source)

Q96Ar

During 2019 did (you/ anyone in this household) receive any income from an annuity?

- 1 Yes
- 2 No

Q96Br

* Read only if necessary

Who received annuity income?

- * Enter all that apply, separate using the space bar or a comma.
- * Probe: Anyone Else?

4.13 RETIREMENT ACCOUNTS (Source)

Q97Ar

At any time during 2019 did (you/ anyone in this household) have any retirement accounts such as a 401(k), 403(b), IRA, or other account designed specifically for retirement savings?

- 1 Yes
- 2 No

Q97Br

* Read only if necessary

Who had such a retirement account?

- * Enter all that apply, separate using the space bar or a comma.
- * Probe: Anyone Else?

Q97Cr

What type of retirement account did (you/ NAME) have? Did (you/he/she) have...

* READ EACH CATEGORY

- * Enter all that apply, separate using the space bar or a comma.

1. 401(k)
2. 403(b)
3. Roth IRA
4. Regular IRA
5. KEOGH plan (“KEE-OH”)
6. SEP plan (Simplified Employee Pension)
7. another type of retirement account

Q97Dr

What was the source of (name's/your) retirement income?

- * Enter other source of retirement income
- * Enter “Other Retirement” if the answer is “Don’t Know”

Q98Ar(1-7)

Did (you/NAME) withdraw any money or receive a distribution from (your/his/her) [ACCOUNT TYPE_ FILL IN FROM Q97CR or Q97DR] in 2019 (, including any distributions (you/he/she) may have been required to take)?

- 1 Yes
- 2 No

***4.14 INCOME-EARNING ACCOUNTS OUTSIDE OF RETIREMENT
(Source)***

Q99ARa

Now I will ask about assets that may have paid interest or dividends in 2019 outside of the retirement accounts.

At anytime during 2019, did (you/anyone in this household):

Have money in an interest-earning checking account?

- 1 Yes
- 2 No

Q99Ba

- * Ask only if necessary

Which members of this household ages 15 and over had an interest-earning checking account?

- * Include each person in cases of joint accounts or ownership
- * Enter all that apply, separate using the space bar or a comma
- * Probe: Anyone else?

Q99ARb

At anytime during 2019, did (you/anyone in this household):

Have money in a savings account?

- 1 Yes
- 2 No

Q99Bb

- * Ask only if necessary

Which members of this household ages 15 and over had savings accounts?

- * Include each person in cases of joint accounts or ownership
- * Enter all that apply, separate using the space bar or a comma
- * Probe: Anyone else?

Q99ARc

At anytime during 2019, did (you/anyone in this household):

Have money in a money market fund?

- 1 Yes
- 2 No

Q99Bc

- * Ask only if necessary

Which members of this household ages 15 and over had a money market fund?

- * Include each person in cases of joint accounts or ownership
- * Enter all that apply, separate using the space bar or a comma
- * Probe: Anyone else?

Q99ARd

At anytime during 2019, did (you/anyone in this household):

Have money in CDs (certificates of deposit)?

- 1 Yes
- 2 No

Q99Bd

- * Ask only if necessary

Which members of this household ages 15 and over had CDs (certificates of deposit)?

- * Include each person in cases of joint accounts or ownership
- * Enter all that apply, separate using the space bar or a comma
- * Probe: Anyone else?

Q99ARe

At anytime during 2019, did (you/anyone in this household):

Have money in savings bonds?

- 1 Yes
- 2 No

Q99Be

- * Ask only if necessary

Which members of this household ages 15 and over had savings bonds?

- * Include each person in cases of joint accounts or ownership
- * Enter all that apply, separate using the space bar or a comma
- * Probe: Anyone else?

Q99ARf

At anytime during 2019, did (you/anyone in this household):

Have money in shares of stock in corporations or mutual funds?

- 1 Yes
- 2 No

Q99Bf

- * Ask only if necessary

Which members of this household ages 15 and over had shares of stock in corporations or mutual funds?

- * Include each person in cases of joint accounts or ownership
- * Enter all that apply, separate using the space bar or a comma
- * Probe: Anyone else?

Q99ARg

At anytime during 2019, did (you/anyone in this household):

Have money in any other savings or investments that pay interest or dividends?

- 1 Yes
- 2 No

Q99Bg

- * Ask only if necessary

Which members of this household ages 15 and over had any other savings or investments that paid interest or dividends?

Q72a

(Any other/Any) regular financial assistance from friends or relatives not living in this household?

* Do not include loans

- 1 Yes
- 2 No

Q72b

* Read only if necessary

Who received this assistance?

- * Enter all that apply, separate using the space bar or a comma.
- * Probe: Anyone Else?

4.19 OTHER MONEY INCOME (Source)

Q73A1R

During 2019 did (you/ anyone in this household) receive cash income not already covered such as income from:

foster child care, alimony, jury duty, armed forces reserves, severance pay, hobbies,

or any other source?

- 1 Yes
- 2 No

Q73A1b

* Ask only if necessary

Who received this income?

- * Enter all that apply, separate using the space bar or a comma.
- * Probe: Anyone Else?

Q73A1Rc1

What was the source of this income?

- * Asking about: (name/you – Current respondent)
- * Do not read answer list to respondent

- 1 Alaska Permanent Fund Dividend
- 2 Other sources or don't know – Specify

Q73A1Rc

- * Specify other source of income
- * Asking about: (name/you – Current respondent)

5 INCOME AMOUNTS

AMTINTRO

Now I will ask you about the amount of income you (and others in this household) received from various sources in 2019.

5.1 UNEMPLOYMENT AND WORKER'S COMPENSATION (Amounts)

Q51A1p

What is the easiest way for you to tell us (name's/your) State or Federal unemployment compensation; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly

- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q51A11

How much did (name/you) receive (weekly/every other week/ twice a month/monthly/) in State or Federal unemployment compensation during 2019?

Enter dollar amount

Q51A11r1

Could you please tell me if (name/you) received:

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in State or Federal unemployment compensation during 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q51A11r2

Did (name/you) receive:

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in State or Federal unemployment compensation during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q51A1C

Do not read to the respondent.

The annual rate appears out of range. The total State or Federal unemployment

compensation received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q51A12

How many (weekly/every other week/ twice a month/monthly) payments did (name/you) receive from State or Federal unemployment compensation during 2019?

(1-12/1-24/1-26/1-52)

Q51A13

According to my calculations (name/you) received (total) altogether from State or Federal unemployment compensation during 2019. Does that sound about right?

- 1 Yes
- 2 No

Q51A14

What is your best estimate of the correct total amount (name/you) received from State or Federal unemployment compensation during 2019?

PREVIOUS ENTRIES: Q51A11: (amount)
Q51A1p: (periodicity)
Q51A12: (number of pay periods)
Enter dollar amount

Q51A2p

What is the easiest way for you to tell us (name's/your) Supplemental Unemployment Benefits; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q51A21

How much did (name/you) receive (weekly/every other week/twice a month/monthly/) in Supplemental Unemployment Benefits during 2019?

Enter dollar amount

Q51A21r1

Could you please tell me if (name/you) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in Supplemental Unemployment Benefits during 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q51A21r2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in Supplemental Unemployment Benefits during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q51A2C

Do not read to the respondent.

The annual rate appears out of range. The total Supplemental Unemployment Benefits received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q51A22

How many (weekly/every other week/twice a month/ monthly) payments did (name/you) receive from Supplemental Unemployment Benefits during 2019?

(1-12/1-24/1-26/1-52)

Q51A23

According to my calculations (name/you Fill) received (total) altogether from Supplemental Unemployment Benefits during 2019. Does that sound about right?

- 1 Yes
- 2 No

Q51A24

What is your best estimate of the correct total amount (name/you) received from Supplemental Unemployment Benefits during 2019?

PREVIOUS ENTRIES: Q51A21: (amount)

Q51A2p: (periodicity)

Q51A22: (number of pay periods)

Enter dollar amount

Q51A3p

What is the easiest way for you to tell us (name's/your) Union Unemployment or Strike Benefits; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q51A31

How much did (name/you) receive (weekly/every other week/ twice a month/monthly/) in Union Unemployment or Strike Benefits during 2019?

Enter dollar amount

Q51A31r1

Could you please tell me if (name/you) received

less than \$10,000
between \$10,000 and \$20,000
or over \$20,000

in Union Unemployment or Strike Benefits during 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q51A31r2

Did (name/you) receive

less than \$1,000
between \$1,000 and \$5,000
or over \$5,000

in Union Unemployment or Strike Benefits during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

C251A3

Do not read to the respondent.

The annual rate appears out of range. The total Union Unemployment or Strike Benefits received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q51A32

How many (weekly/every other week/ twice a month/ monthly) payments did (name/you) receive from Union Unemployment or Strike Benefits during 2019?

(1-12/1-24/1-26/1-52)

Q51A33

According to my calculations (name/you) received (total) altogether from Union Unemployment or Strike Benefits during 2019. Does that sound about right?

- 1 Yes
- 2 No

Q51A34

What is your best estimate of the correct total amount (name/you) received from Union Unemployment or Strike Benefits during 2019?

PREVIOUS ENTRIES: Q51A31: (amount)
Q51A3p: (periodicity)
Q51A32: (number of pay periods)

Enter dollar amount

Q52cp

What is the easiest way for you to tell us (your/name's) Worker's Compensation: weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q52c1

How much did (name/you) receive (weekly/every other week/twice a month/monthly) in Worker's Compensation during 2019?

Enter dollar amount

Q52cr1

Could you please tell me if (name/you) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in Worker's Compensation during 2019?

- 1 Less than \$10,000

- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q52cr2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in Worker's Compensation during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q52cC2

Do not read to the respondent.

The annual rate appears out of range. The total worker's compensation received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q52c2

How many (weekly/every other week/twice a month/monthly) payments did (name/you) receive from Worker's Compensation during 2019?

(1-12/1-24/1-26/1-52)

Q52c3

Then (name/you) received (total) altogether from Worker's Compensation during 2019. Does that sound about right?

- 1 Yes
- 2 No

Q52c4

What is your best estimate of the correct total amount (name/you) received from Worker's Compensation during 2019?

PREVIOUS ENTRIES: Q52c1: (amount)
Q52cp: (periodicity)
Q52c2: (number of pay periods)

Enter dollar amount

5.2 SOCIAL SECURITY (Amounts)

Q56dp

What is the easiest way for you to tell us (name's/your) Social Security payment; monthly, quarterly, or yearly?

- 4 Monthly
- 5 Quarterly
- 7 Yearly

Q56d

How much did (name/you) receive (monthly/quarterly) in Social Security payments in 2019?

- ◆ Enter dollar amount
 - ◆ (If already included in amount reported for another household member, press Enter)
- _____

Q56d Char

Enter <A> for Already included

Q56drn1

Could you please tell me if (name/you) received

less than \$10,000
between \$10,000 and \$20,000
or over \$20,000

for the TOTAL amount (you/name) received in Social Security payments in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q56drn2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in Social Security payments in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q56d2

For how many (months/quarters) did (name/you) receive Social Security in 2019?

(1-4; 1-12)

Q56d3

Is this \$(amount from Q56d/amount from Q56d1) before or after any monthly Medicare deduction?

- 1 After Deduction
- 2 Before Deduction

Q56md

If Q56d3 = 1 then ask:

How much were (name's/your) monthly Medicare deductions?

If Q56d3 = 2 then ask:

How much were (name's/your) monthly payments for Medicare?

Include Medicare Advantage, Part B, and Part D premiums.

 Q56dp: (periodicity)
 Q56d2: (number of pay periods)

Enter dollar amount

5.3 SOCIAL SECURITY DISABILITY (Amounts)

Q562dp

What is the easiest way for you to tell us (name's/your) Social Security Disability payment; monthly, quarterly, or yearly?

- 4 Monthly
- 5 Quarterly
- 7 Yearly

Q562d

How much did (name/you) receive (monthly/quarterly) in Social Security Disability payments in 2019?

Enter dollar amount

(If already included in amount reported for another household member, press Enter)

Q562d Char

Enter <A> for Already included

Q562d2

For how many (months/quarters) did (name/you) receive Social Security Disability in 2019?

(1-4; 1-12)

Q562drn1

Could you tell me if (name/you) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in Social Security Disability payments in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q562drn2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in Social Security Disability payments in 2019?

- 4 Less than \$1,000
- 5 Between \$1,000 and \$5,000
- 6 Over \$5,000

Q562d3

Is this \$(amount from Q562d) before or after any monthly Medicare deductions?

- 1 After Deduction
- 2 Before Deduction

Q562md

If Q562d3 = 1 then ask:

How much were all of (name's/your) monthly Medicare deductions?

If Q562d3 = 2 then ask:

How much were (name's/your) monthly payments for Medicare?

Include Medicare Advantage, Part B, and part D premiums.

Q562dC2

Do not read to the respondent.

The annual rate appears out of range. The total Social Security received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

BACKPAY1

During 2019, did (name/you) receive an initial Social Security Disability payment that was larger than the usual payment that we haven't accounted for yet?

Sometimes the initial payment from Social Security Disability is larger than the usual monthly payments to make up for the delay in receiving the first payment.

- 1 Yes
- 2 No

BACKPAY2

How much was that initial disability payment?

Q562d5

According to my calculations (name/you) received \$(total) altogether from Social Security Disability in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q562d6

What is your best estimate of the correct amount (name/you) received in Social Security Disability during 2019?

PREVIOUS ENTRIES: Q562d: (amount)
 Q562dp: (periodicity)

Q562d2: (number of pay periods)
BACKPAY2: (amount)

Enter dollar amount

5.4 SOCIAL SECURITY FOR CHILDREN (Amounts)

Q56ip

What is the easiest way for you to tell us (name's/your) Social Security payment for children in this household; monthly, quarterly, or yearly?

- 4 Monthly
- 5 Quarterly
- 7 Yearly

Q56i

How much did (name/you) receive (monthly/quarterly) in Social Security payments for children in this household in 2019?

* Enter dollar amount

(If already included in amount reported for another household member, press Enter)

Q56i Char

* Enter A for Already included

Q56irn1

Could you please tell me if (name/you) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

for the TOTAL amount (name/you) received in Social Security payments for children in this household in 2019?

- 1 Less than \$10,000

- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q56irn2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in Social Security payments for children in this household in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000

Q58E33

According to my calculations (name/you) received (total) altogether from (your/his/her) (fill from third answer in Q58C or Q58Cs1) payments in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q58E34

What is your best estimate of the correct amount (name/you) received from (your/his/her) (fill from third answer in Q58C or Q58Cs1) payments during 2019?

*PREVIOUS ENTRIES: Q58E3: (amount)
Q58E3P: (periodicity)
Q58E32: (number of pay periods)

* Enter dollar amount

5.10 PUBLIC ASSISTANCE (Amounts)

Q59ep

What is the easiest way for you to tell us (name's/your) TOTAL CASH assistance payments from (fill from Q59C8r); Is it weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q59e

During 2019, how much TOTAL CASH assistance did (name/you) receive (per week/every other week/twice a month/monthly): (fill from Q59C8r)?

* Enter dollar amount

Q59ern1

Could you tell me if (name/you) received

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in TOTAL CASH assistance payments in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3000

Q59ern2

Did (name/you) receive

**less than \$100
between \$100 and \$500
or over \$500**

in TOTAL CASH assistance payments in 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q59e2

How many (weekly/every other week/ twice a month/ monthly) cash assistance payments did (name/you) receive in 2019?

* (1-12/1-24/1-26/1-52)

Q59eC2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total cash assistance received in 2019 was \$(amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q59e3

According to my calculations (name/you) received \$(total) altogether in cash assistance from a state or county program in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q59e4

What is your best estimate of the correct amount of cash assistance (name/you) received during 2019?

* PREVIOUS ENTRIES: Q59e: (amount)
Q59ep: (periodicity)
Q59e2: (number of pay periods)

* Enter dollar amount

Q59f

Was the cash assistance for adults AND children in the household, or JUST children?

- 1 Both adults AND children
- 2 Children only
- 3 Adults only

Q59g

(Who/Which children) in your household was the cash assistance for?

- * Probe: Anyone Else?
- * Enter all that apply, separate using the space bar or a comma.
- * Enter 0 if none listed
- * Enter 96 for all persons

5.11 FOOD STAMPS/SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) (Amounts)

Q90p

What is the easiest way for you to tell us the value of the food assistance: monthly or yearly?

- 1 Monthly
- 2 Yearly
- 3 Already included with TANF/AFDC payment

Q90

What is the (monthly) value of the food assistance received in 2019?

* Enter dollar amount

Q90rn1

Could you tell me if the value of food assistance received in 2019 was

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3000

Q90rn2

Was the value

**less than \$100
between \$100 and \$500
or over \$500**

in food assistance in 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q902

How many months was food assistance received in 2019?

* (1-12)

Q90C2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total food assistance payments received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q903

According to my calculations \$(total) was received altogether from food assistance in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q904

What is your best estimate of the correct amount of food assistance received during 2019?

* PREVIOUS ENTRIES: Q90: (amount)
Q90p: (periodicity)
Q902: (number of pay periods)

* Enter dollar amount

5.12 PENSIONS (Amounts)

Q62E1PR

What is the easiest way for you to tell us (name's/your) (first answer fill-in from Q62CR/Q62cS1); weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q62E1R

How much did (name/you) receive (weekly/every other week/ twice a month/ monthly) in (first answer fill-in from Q62CR/Q62cS1) in 2019?

* Enter dollar amount

Q62E1rn1

Could you tell me if (you/name) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in (first answer fill-in from Q62CR/Q62cS1) in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q62E1rn2

Did (you/name) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in (first answer fill-in from Q62CR/Q62cS1) in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q62E12R

How many (weekly/every other week/ twice a month/ monthly) payments did (name/you) receive in (first answer fill-in from Q62CR/Q62cS1) in 2019?

- * Pension/Retirement #1 (1-12; 1-52)
-

Q62E1CR

- * Do not read to the respondent.
- * The annual rate appears out of range. The total (fill from first answer in Q62CR/Q62cS1) payments received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q62E13R

According to my calculations (name/you) received (total) dollars altogether from (first answer fill-in from Q62CR/Q62cS1) in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q62E14R

What is your best estimate of the correct amount (name/you) received in (first answer fill-in from Q62CR/Q62cS1) during 2019?

- * PREVIOUS ENTRIES: Q62E1: (amount)
Q62E1P: (periodicity)
Q62E12: (number of pay periods)
 - * Enter dollar amount
-

Q62E2PR

What is the easiest way for you to tell us (name's/your) (second answer fill-in from Q62CR/Q62cS1); weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q62E2R

How much did (name/you) receive (weekly/every other week/ twice a month/ monthly) in (second answer fill-in from Q62CR/Q62cS1) in 2019?

* Enter dollar amount

Q62E2rn1

Could you please tell me if (name/you) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in (second answer fill-in from Q62CR/Q62cS1) payments in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q62E2rn2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in (second answer fill-in from Q62CR/Q62cS1) in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000

3 Over \$5,000

Q62E22R

How many (weekly/every other week/ twice a month/ monthly) payments did (name/you) receive in (second answer fill-in from Q62CR/Q62cS1) in 2019?

* Pension/Retirement #1 (1-12; 1-52)

Q62E2CR

- * Do not read to the respondent.
- * The annual rate appears out of range. The total (fill from second answer in Q62CR/Q62cS1) payments received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q62E23R

According to my calculations (name/you) received \$(total) dollars altogether from (second answer fill-in from Q62CR/Q62cS1) in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q62E24R

What is your best estimate of the correct amount (name/you) received in (second answer fill-in from Q62CR/Q62cS1) during 2019?

* PREVIOUS ENTRIES: Q62E1: (amount)
Q62E1P: (periodicity)
Q62E12: (number of pay periods)

* Enter dollar amount

5.13 ANNUITIES (Amounts)

ANNNEW1

What is the easiest way for you to tell us (name/your) annuity income; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly

- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

ANNNEW2

How much did (name/you) receive (weekly/every other week/twice a month/monthly) in annuities in 2019?

* Enter dollar amount

ANNNEWrn1

Could you tell me if (name/you) received

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in annuity payments in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

ANNNEWrn2

Did (name/you) receive

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in annuity payments in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

ANNNEW3

How many (weekly/every other week/ twice a month/monthly) payments did (name/you) receive in 2019?

* (1-12; 1-52)

ANNNEW4

According to my calculations (name/you) received \$(total) dollars altogether from annuities in 2019. Does that sound about right?

- 1 Yes
- 2 No

ANNNEW5

What is your best estimate of the correct amount (name/you) received in annuities in 2019?

* Enter dollar amount

***5.14 WITHDRAWALS/DISTRIBUTIONS FROM RETIREMENT PLAN
(Amounts)***

DISTNEW1

What is the easiest way for you to tell us the amount of money withdrawn or distributed from (name's/your) (1st account type fill-in from Q97CR or Q97DR) in 2019: monthly, quarterly, every 6 months, or yearly?

- 4 Monthly
- 5 Quarterly
- 6 Every 6 months
- 7 Yearly

DISTNEW2

How much was (name's/your) withdrawal or distribution (weekly/every other week/ twice a month/ monthly) from (1st account type fill-in from Q97CR or Q97DR) in 2019?

* Enter dollar amount

DISTNEW3

How many (monthly/quarterly) withdrawals did (name/you) make or distributions did (name/you) receive in 2019 from the (1st account type fill-in from Q97CR or Q97DR)?

♦ Valid entries are 1-12 if monthly; 1-4 if quarterly; 1-2 if every six months

DISTNEWrn1

Could you please tell me if (name's/your) withdrawal or distribution was

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

from (your/his/her) (1st account type fill-in from Q97CR or Q97DR) in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

DISTNEWrn2

Was (name's/your) withdrawal or distribution

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

from (your/his/her) (1st account type fill-in from Q97CR or Q97DR) in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

DISTNEW4

According to my calculations (name/you) withdrew or received a distribution of \$(total) altogether from the (1st account type fill-in from Q97CR or Q97DR) in 2019. Does that sound about right?

- 1 Yes
- 2 No

DISTNEW5

What is your best estimate of the correct amount (name/you) withdrew or the distribution received from the (1st account type fill-in from Q97CR or Q97DR) during 2019?

* Enter dollar amount

ROLLA

Did (you/name) re-invest or "roll over" any of the money into an IRA or some other kind of retirement plan?

- 1 Yes
- 2 No

ROLLAMTA

How much did (you/name) re-invest or "roll over" into an IRA or some other kind of retirement plan in 2019?

- * Enter dollar amount
- * Dollar amount should not exceed amount of withdrawals reported.
- * Amount of withdrawals reported: \$(amount)

ROLLB

(Do/Does) (you/name) plan to re-invest or roll over any of the money?

- 1 Yes
- 2 No

ROLLAMTB

How much (do/does) (you/name) plan to re-invest or "roll over" into an IRA or some other kind of retirement plan?

- * Enter dollar amount
- * Dollar amount should not exceed amount of withdrawals reported.
- * Amount of withdrawals reported: \$(amount)

DISTNEW6

What is the easiest way for you to tell us the amount of money withdrawn or distributed from (name's/your) (2nd account type fill-in from Q97CR or Q97DR) in 2019: monthly, quarterly, every 6 months, or yearly?

- 4 Monthly
- 5 Quarterly
- 6 Every 6 months
- 7 Yearly

DISTNEW7

How much was (name's/your) withdrawal or distribution (weekly/every other week/ twice a month/ monthly) from (your/his/her) (2nd account type fill-in from Q97CR or Q97DR) in 2019?

* Enter dollar amount

DISTNEW8

How many (monthly/quarterly) withdrawals did (name/you) make or distributions did (name/you) receive in 2019 from the (2nd account type fill-in from Q97CR or Q97DR)?

(1-12), (1-4), (1-2)

DISTNEWrn3

Could you please tell me if (name's/your) withdrawal or distribution was

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

from (your/his/her) (2nd account type fill-in from Q97CR or Q97DR) in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

DISTNEWrn4

Was (name's/your) withdrawal or distribution

less than \$1,000
between \$1,000 and \$5,000
or over \$5,000

from (your/his/her) (2nd account type fill-in from Q97CR or Q97DR) in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

DISTNEW9

According to my calculations (name/you) withdrew or received a distribution of \$(total) altogether from the (2nd account type fill-in from Q97CR or Q97DR) in 2019. Does that sound about right?

- 1 Yes
- 2 No

DISTNEW10

What is your best estimate of the correct amount (name/you) withdrew or the distribution received from the (2nd account type fill-in from Q97CR or Q97DR) during 2019?

* Enter dollar amount

ROLLC

Did (you/name) re-invest or "roll over" any of the money into an IRA or some other kind of retirement plan?

- 1 Yes
- 2 No

ROLLAMTC

How much did (you/name) re-invest or "roll over" into an IRA or some other kind of retirement plan in 2019?

- * Enter dollar amount
- * Dollar amount should not exceed amount of withdrawals reported.
- * Amount of withdrawals reported: \$(amount)

ROLLD

(Do/Does) (you/name) plan to re-invest or roll over any of the money?

- 1 Yes
- 2 No

ROLLAMTD

How much (do/does) (you/name) plan to re-invest or “roll over” into an IRA or some other kind of retirement plan?

- * Enter dollar amount
- * Dollar amount should not exceed amount of withdrawals reported.
- * Amount of withdrawals reported: \$(amount)

5.15 INTEREST/DIVIDENDS ON RETIREMENT ACCOUNTS (Amounts)

RETIRENEW1

Within the (1st account type fill-in from Q97CR/Q97DR) account, how much did (name/you) earn in interest or dividends during 2019? Please include small amounts reinvested or credited to the account.

- * Enter dollar amount

RETIRENEWrn1

Could you tell me if (name/you) earned

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in interest or dividends from (your/his/her) (1st account type fill-in from Q97CR/Q97DR) during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

RETIRENEWrn2

Did (name/you) earn

**less than \$100
between \$100 and \$500
or over \$500**

in interest or dividends from (your/his/her) (1st account type fill-in from Q97CR/Q97DR) during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

RETIRENEW2

The Census Bureau can estimate the amount earned in this account based on the size of the account. So can you tell me how much money was in (name's/your) (1st account type fill-in from Q97CR/Q97DR) account at the end of 2019?

* Enter dollar amount

RETIRENEW3

Within the (2nd account type fill-in from Q97CR/Q97DR) account, how much did (name/you) earn in interest or dividends during 2019? Please include small amounts reinvested or credited to the account.

* Enter dollar amount

RETIRENEWrn3

Could you tell me if (name/you) earned

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in interest or dividends from (your/his/her) (2nd account type fill-in from Q97CR/Q97DR) during 2019?

- 4 Less than \$1,000

- 5 Between \$1,000 and \$3,000
- 6 Over \$3,000

RETIRENEWrn4

Did (name/you) earn

**less than \$100
between \$100 and \$500
or over \$500**

in interest or dividends from (your/his/her) (2nd account type fill-in from Q97CR/Q97DR) during 2019?

- 4 Less than \$100
- 5 Between \$100 and \$500
- 6 Over \$500

***5.16 INTEREST/DIVIDENDS ON NON-RETIREMENT ACCOUNTS
(Amounts)***

NONRETIRENEW(1-7)1

How much did (you/name) receive in (interest/dividends) from [fill-in from Q99AR or Q99BR] during 2019, including even small amounts reinvested or credited to accounts?

- * If a joint account please split interest income in half for each person.
- * Enter dollar amount

NONRETIRENEW(1-7)rn1

Could you tell me if (you/name) received:

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in (interest/dividends) from [fill-in from Q99AR or Q99BR] during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

NONRETIRENEW(1-7)rn2

Did (you/name) receive:

**less than \$100
between \$100 and \$500
or over \$500**

in (interest/dividends) from [fill-in from Q99AR or Q99BR] during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

NONRETIRENEW(1-7)2

The Census Bureau can estimate the amount earned in this account based on the size of the account. How much money did (you/name) have in [fill-in from Q99AR or Q99BR] at the end of 2019?

* Enter dollar amount

Q63(c-i)p

* Read if necessary

Is this a weekly, every other week, twice a month, monthly, quarterly, every 6 months, or yearly amount?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 5 Quarterly
- 6 Every 6 months
- 7 Yearly

Q63(c-i)2

How many (weekly/ every other week/ twice a month/ monthly/ quarterly/ every 6 months) payments did (you/name) receive in interest/dividend income in 2019 from [fill-in from Q99AR or Q99BR]?

Q63(c-i)3

According to my calculations (you/name) received \$(total) from interest/dividend income from [fill-in from Q99AR or Q99BR] in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q63(c-i)4

What is your best estimate of the correct amount (you/NAME) received from interest payments during 2019?

* PREVIOUS ENTRIES: Q63(c-i): (amount)
Q63(c-i)p: (periodicity)
Q63(c-i)2: (number of pay periods)

* Enter dollar amount

CAPGDAMT

How much did (you/name) receive in capital gains in 2019?

* Enter dollar amount

CAPGDAMTrn1

Could you tell me if (name/you) received:

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

in capital gains during 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

CAPGDAMTrn2

Did (name/you) receive:

**less than \$1,000
between \$1,000 and \$5,000**

or over \$5,000

in capital gains distributions during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

5.17 PROPERTY INCOME (Amounts)

Q65c

How much did (name/you) receive in income from rent (, roomers or boarders, estates, trusts, or royalties/, roomers or boarders, or royalties/, estates or trusts fill from Q65A1-3) AFTER EXPENSES during 2019?

- ◆ Separate amounts for joint ownership
 - ◆ If response is "Broke Even" then enter 1.
 - ◆ Enter dollar amount
 - ◆ If already included in amount reported for another household member, press Enter
 - ◆ If response is "None" or "Lost Money" press <Enter> key
-

Q65c Char

- * Enter "A" for Already included
 - * Enter "L" for Lost Money
 - * Enter "X" for None
-

Q65cL

- * Enter amount of money lost in 2019.
-

Q65crn1

Could you please tell me if (name/you) received:

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

for the TOTAL amount (name/you) received in income from rent (roomers or boarders, estates, trusts, or royalties/, roomers or boarders, or royalties/, estates or

trusts fill from Q65A1-3) AFTER EXPENSES during 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q65crn2

Did (name/you) receive:

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in income from rent (roomers or boarders, estates, trusts, or royalties/, roomers or boarders, or royalties/, estates or trusts fill from Q65A1-3) AFTER EXPENSES during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q65cp

Is this a weekly, every other week, twice a month, monthly, quarterly, or yearly amount?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 5 Quarterly
- 7 Yearly

Q65c2

What is your best estimate of (name's/your) ANNUAL net income from rent (roomers or boarders, estates, trusts, or royalties/, roomers or boarders, or royalties/, estates or trusts) AFTER EXPENSES in 2019?

* PREVIOUS ENTRIES: Q65c: (amount)
Q65cp: (periodicity)

* Enter dollar amount

Q65cC2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total income received from rent (roomers or boarders, estates, trusts, or royalties) was (amount) in 2019. Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q65c2L

What is your best estimate of (name's/your) ANNUAL LOSS from rent (roomers or boarders, estates, trusts, or royalties/, roomers or boarders, or royalties/, estates or trusts fill from Q65A1-3) AFTER EXPENSES in 2019?

- * PREVIOUS ENTRIES: Q65cL: (amount)
Q65cp: (periodicity)

- * Enter dollar amount

5.18 EDUCATIONAL ASSISTANCE (Amounts)

Q69F88

How much did (name/you) receive in Pell Grants during 2019?

- * Enter annual amount only

Q69Frn1

Could you please tell me if (name/you) received:

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

for the TOTAL amount (name/you) received in Pell Grants during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

Q69Frn2

Did (name/you) receive:

**less than \$100
between \$100 and \$500
or over \$500**

in Pell Grants during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q66HP

What is the easiest way for you to tell us (name's/your) (other/blank) educational assistance during 2019; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q66H

(Aside from the Pell Grant assistance, how/How) much did (name/you) receive (weekly/every other week/ twice a month/ monthly/) in educational assistance during 2019?

* Enter dollar amount

Q66H2

How many (weekly/every other week/ twice a month/ monthly) payments did (name/you) receive in educational assistance in 2019?

* (1-12/1-24/1-26/1-52)

Q66Hrn1

Could you please tell me if (name/you) received:

**less than \$1,000
between \$1,000 and \$3,000**

or over \$3,000

for the TOTAL amount (name/you) received in educational assistance during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

Q66Hrn2

Did (name/you) receive:

**less than \$100
between \$100 and \$500
or over \$500**

in educational assistance during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q66HC2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total educational assistance received in 2019 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q66H3

According to my calculations (name/you) received \$(total) altogether from educational assistance in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q66H4

What is your best estimate of the correct amount (name/you) received from educational assistance during 2019?

- * Previous entries: Q66h: (amount)
Q66hp: (periodicity)
Q66h2: (number of pay periods)

* Enter dollar amount

5.19 CHILD SUPPORT (Amounts)

Q70cp

What is the easiest way for you to tell us (name's/your) child support payments; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q70c

How much did (name/you) receive (weekly/ every other week/ twice a month/ monthly) in child support payments in 2019?

* Enter dollar amount

Q70c2

How many (weekly/every other week/ twice a month/ monthly) child support payments did (name/you) receive in 2019?

* (1-12/1-24/1-26/1-52)

Q70c1rn1

Could you please tell me if (name/you) received:

**less than \$10,000
between \$10,000 and \$20,000
or over \$20,000**

for the TOTAL amount (name/you) received in child support payments in 2019?

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

Q70c1rn2

Did (name/you) receive:

**less than \$1,000
between \$1,000 and \$5,000
or over \$5,000**

in child support payments in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

Q70cC2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total child support payments received in 2019 was \$(amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q70c3

According to my calculations (name/you) received \$(total) altogether from child support payments in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q70c4

What is your best estimate of the correct amount (name/you) received from child support payments during 2019?

- * PREVIOUS ENTRIES: Q70c: (amount)
Q70cp: (periodicity)
Q70c2: (number of pay periods)

* Enter dollar amount

5.20 REGULAR FINANCIAL ASSISTANCE (Amounts)

Q72cp

What is the easiest way for you to tell us (name's/your) regular financial assistance; weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q72c

How much did (name/you) receive (weekly/every other week/twice a month/monthly) in regular financial assistance in 2019?

* Enter dollar amount

Q72c2

How many (weekly/every other week/twice a month/monthly) payments did (name/you) receive in regular financial assistance in 2019?

* (1-12/1-24/1-26/1-52)

Q72crn1

Could you please tell me if (name/you) received:

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in regular financial assistance in 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

Q72crn2

Did (name/you) receive

**less than \$100
between \$100 and \$500
or over \$500**

in regular financial assistance in 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

Q72c2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total regular financial assistance payments received in 2019 was \$(amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q72c3

According to my calculations (name/you) received \$(total) altogether from regular financial assistance in 2019. Does that sound about right?

- 1 Yes
- 2 No

Q72c4

What is your best estimate of the correct amount (name/you) received from regular financial assistance during 2019?

- *PREVIOUS ENTRIES: Q72c: (amount)
Q72cp: (periodicity)
Q72c2: (number of pay periods)
-

5.21 OTHER MONEY INCOME (Amounts)

Q731P

What is the easiest way for you to tell us (name's/your) income from (fill from Q73A1Rc);

weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly

- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

Q731

How much did (name/you) receive (weekly/every other week/twice a month/monthly) in income from (fill from Q73A1Rc) during 2019?

* Enter dollar amount

Q7312

How many (weekly/every other week/twice a month/monthly) payments did (name/you) receive in income from (fill from Q73A1Rc) during 2019?

* (1-12/1-24/1-26/1-52)

Q73rn1

Could you please tell me if (name/you) received:

**less than \$1,000
between \$1,000 and \$3,000
or over \$3,000**

in income from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc)?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

Q73rn2

Did (name/you) receive:

**less than \$100
between \$100 and \$500
or over \$500**

in income from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc)?

- 1 Less than \$100

- 2 Between \$100 and \$500
- 3 Over \$500

Q731C2

- * Do not read to the respondent.
- * The annual rate appears out of range. The total income from (fill from Q73A1Rc) in 2019 was \$(amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

Q7313

According to my calculations (name/you) received \$(total) altogether from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc) in 2019.

Does that sound about right?

- 1 Yes
- 2 No

Q7314

What is your best estimate of the correct amount (name/you) received in income from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc) in 2019?

- * PREVIOUS ENTRIES: Q731: (amount)
Q731P: (periodicity)
Q7312: (number of pay periods)

- * Enter dollar amount

5.22 CONTRIBUTIONS TO RETIREMENT ACCOUNTS (Amounts)

CONTRIB1

Earlier we recorded that (you/name) (have/has) a retirement account, such as a 401(k), 403(b), IRA, or other account designed specifically for retirement savings.

Did (you/he/she) contribute any money to (your/his/her) plan(s), for example, through payroll deductions?

(Do not include amounts reinvested or “rolled over” from other retirement accounts.)

- 1 Yes
- 2 No

CONTRIB2

How much did (you/he/she) contribute to (your/his/her) account(s) in 2019?

- * Total contributions to all accounts.

6 HEALTH INSURANCE

6.1 INTRODUCTION TO HEALTH INSURANCE SECTION

HINTRO

These next questions are about health coverage between January 1, 2019 and now.

- * Press 1 to Continue

- 1 Enter 1 to Continue

PINTRO

(First/Next) I'm going to ask about (name's/your) health coverage.

- * Press 1 to Continue

- 1 Enter 1 to Continue

FHINTRO

Next, I'm going to ask about (name's/your) health coverage.

- * Press 1 to Continue

6.2 CURRENT COVERAGE

MCARE1

?[F1]

Medicare is health insurance for people 65 years and older and people under 65 with disabilities. (Is/Are) (name/you) NOW covered by Medicare?

* Code Medicare Parts A, B, and C and Medicare Advantage as "Yes"

- 1 Yes
- 2 No

ANYCOV

(Does/Do) (name/you) NOW have any type of health plan or health coverage?

- 1 Yes
- 2 No

MEDI

?[F1]

(Are/Is/Was/Were) (name/you) covered by Medicaid, Medical Assistance, or (CHIP/or Medicare)?

- 1 Yes
- 2 No

OTHGOVT

(Is/Are) (name/you) NOW covered by a state or government assistance program that helps pay for healthcare, such as: State Medicaid, CHIP, Exchange/Portal, or other State Health program?

* Stop reading list if respondent says "YES"

- 1 Yes
- 2 No

VET

(Is/Are) (name/you) NOW covered by Veteran's Administration (VA) care?

- 1 Yes
- 2 No

VERIFY

I recorded that (name/you) (is/are) not currently covered by a health plan. Is that correct?

- 1 Yes, is NOT covered
- 2 No, is covered

6.3 TYPE OF COVERAGE

SRCEGEN

?[F1]

* ASK OR VERIFY

For the coverage (name/you) (has/have/had) NOW, (do/does/did) (he/she/you) get it through a job, the government or state, or some other way?

*** 1. JOB**

Former job/Retiree
 Union
 Spouse/parent's job
 Job with the government
 COBRA
 TRICARE/TRICARE For Life

2. GOVERNMENT OR STATE

Medical Assistance
 Medicaid
 Medicare (Parts A+B; Part C)
 Medicare Advantage
 State-provided health coverage
 VA Care/CHAMPVA/other
 military

3. OTHER WAY

Privately purchased
 Parent or spouse
 Medicare Supplements
 Exchange plan/Marketplace
 Group or association
 School

- * IF RESPONDENT CHOOSES MORE THAN ONE: Let's talk about one plan at a time. Which would you like to tell me about first?

[♦ If respondent is not covered, go back to VERIFY and select "Yes"]

- 1 Job (current or former)
- 2 Government or State
- 3 Some other way

SRCEDEPDIR

* ASK OR VERIFY

(Does/Do/Did) (name/you) get that coverage through a parent or spouse, (does/do/did) (he/she/you) buy it (himself/herself/yourself), or (does/did/do) (he/she/you) get it some other way?

*** 1. PARENT OR SPOUSE**

Parent
 Spouse

2. BUY IT DIRECTLY

Buy it
 Parent or spouse buys it

3. SOME OTHER WAY

Former employer
 Group or association

Medicare Supplement

Indian Health Service
School

- 1 Parent or spouse
- 2 Buy it
- 3 Some other way

SRCEOTH

* ASK OR VERIFY

(Does/Do/Did) (name/you) get it through a former employer, a union, a group or association, the Indian Health Service, a school, or some other way?

- 1 Former employer
- 2 Union
- 3 Group or association
- 4 Indian Health Service
- 5 School
- 6 Some other way

JOBCOV

(Is/Was) that coverage related to a JOB with the government or state?

* READ IF NECESSARY: Include coverage through FORMER employers and unions, and COBRA plans.

- 1 Yes
- 2 No

MILPLAN

* ASK OR VERIFY

(Is/Was) that plan related to military service in any way?

* Examples of military plans include:

- VA Care
- TRICARE
- TRICARE for Life
- CHAMPVA
- Other military care

- 1 Yes

2 No

GOVTYPE

?[F1]

* ASK OR VERIFY

(Is/Was) that coverage Medicaid, CHIP, Medicare, a plan through the military, or some other program?

* Code Medicare Parts A, B, and C and Medicare Advantage as "Medicare"

* IF RESPONDENT CHOOSES MORE THAN ONE: Let's talk about one plan at a time. Which would you like to tell me about first?

- 1 Medicaid or Medical Assistance
- 2 CHIP
- 3 Medicare
- 4 Military
- 5 Other

MILTYPE

* ASK OR VERIFY

(Is/Was) that plan through TRICARE, TRICARE for Life, CHAMPVA, VA Care, military health care, or something else?

- 1 TRICARE
- 2 TRICARE for Life
- 3 CHAMPVA
- 4 Veterans Administration (VA) care
- 5 Military health care
- 6 Other

POLHOLDER

* ASK OR VERIFY

Whose name (is/was) the policy in? (Who (is/was) the policyholder?)

- 1-16 Name on roster
- 17 Someone living outside the household

Enter persons line number (1-16), or 17 for person not in the household

SRCEPTSP

* ASK OR VERIFY

(Do/Did) they get that coverage through their job, (do/did) they buy it themselves, or (do/did) they get it some other way?

- 1 Job (current or former)
- 2 Buy it
- 3 Some other way

GOVPLAN

* ASK OR VERIFY

What do you call the program?

* IF RESPONDENT ANSWERS WITH INSURANCE COMPANY NAME: OK, so that would be the plan name. What do you call the program? Some examples of programs in (state) are [read full list below].

- 1 Medicaid
- 2 Medical Assistance
- 3 Indian Health Service (IHS)
- 4-12 State Medicaid Programs Names
- 13-15 State Exchange Programs Names
- 16 Plan through State Exchange Portal
- 17 Other government plan
- 18 Other (please specify)

MISCSPEC

Please Specify

Write in plan name

PORTAL

* ASK OR VERIFY

(Is/Was) that coverage through (State Exchange Portal Name), which may also be known as (State Exchange Program Name 1, Name 2, Name 3)?

- 1 Yes
- 2 No

EXCHTYPE

* ASK OR VERIFY

What do you call it – State Exchange Program (Portal, Name 1, Name 2, Name 3)?

1-4 State Exchange Programs Names

HIP Aid

(Does/Did) (your/policyholder name's/the policyholder's) employer or union pay for all, part, or none of the health insurance premium?

* Report here employer's contribution to employee's health insurance premiums, not the employee's medical bills.

- 1 All
- 2 Part
- 3 None

SHOP

Small businesses can offer health coverage to their employees through (State Exchange SHOP Portal Name). (Is/Was) the coverage at all related to (State Exchange SHOP Portal Name), (such as State SHOP Name 1, Name 2, Name 3)?

- 1 Yes
- 2 No

POLHOLDER2

* ASK OR VERIFY

Whose name (is/was) the policy in? (Who [is/was] the policyholder?)

- 1-16 Name on roster
- 17 Someone living outside the household

Enter persons line number (1-16), or 17 for person not in the household

PREMYN

Is there a monthly premium for this plan?

- * A monthly premium is a fixed amount of money people pay each month to have health coverage. It does not include copays or other expenses such as prescription costs.

- 1 Yes
- 2 No

PREMSUBS

Is the cost of the premium subsidized based on (your/family) income?

- * A monthly premium is a fixed amount of money people pay each month to have health coverage. It does not include copays or other expenses such as prescription costs.
- * Subsidized health coverage is insurance with a reduced premium. Low and middle income families are eligible to receive tax credits that allow them to pay lower premiums for insurance bought through healthcare exchanges or marketplaces.

- 1 Yes
- 2 No

- 5 Have a pre-existing condition
- 6 Haven't yet worked for this employer long enough to be covered
- 7 Contract or temporary employees not allowed in plan
- 8 Other/specify

WNTAKESPEC

Please specify other reason why not in the plan

WNELIG

Why not? Why can't (name/you) be in this plan if (he/she/you) wanted to?

* Choose all that apply

- 1 Don't work enough hours per week or weeks per year
- 2 Contract or temporary employees not allowed in plan
- 3 Haven't yet worked for this employer long enough to be covered
- 4 Have a pre-existing condition
- 5 Too expensive

6 Other/specify

WNEIGSPEC

Please specify other reason why not eligible.

6.8 HEALTH STATUS

HealthStatus Intro

An important factor in evaluating a person's or family's health insurance situation is their current health status and/or the current health status of other family members.

Enter 1 to Continue

HealthStatus

Would you say (name's/your) health in general is excellent, very good, good, fair, or poor?

- 1 Excellent
- 2 Very good
- 3 Good
- 4 Fair
- 5 Poor

6.9 MEDICAL EXPENDITURES

MedExp Intro

Next I would like to ask about out-of-pocket medical expenses during 2019.

* Press 1 to Continue

- 1 Enter 1 to continue

HIPREM

[Earlier I recorded that (your/name's) employer or union did not pay for (your/his/her) entire health insurance premium.] Last year, how much did (you/name) pay out-of-pocket for ALL health insurance premiums [covering

(yourself/himself/herself) or others in the household]? Include both comprehensive and supplemental plans (such as vision and dental insurance).

[What about (you/name)?]

[DO NOT include the \$(amount reported) per month from Medicare deductions from (Social Security/ Social Security Disability/ Social Security and Social Security Disability) payments mentioned earlier.]

* Enter dollar amount

MEDAMT

?[F1]

Last year, how much was paid out-of-pocket for (your/name's) OWN medical care, such as copays for doctor and dentist visits, diagnostic tests, prescription medicine, glasses and contacts, and medical supplies?

[What about (you/name)? Last year, how much was paid out-of-pocket for (your/name's) OWN medical care, such as copays for doctor and dentist visits, diagnostic tests, prescription medicine, glasses and contacts, and medical supplies?]

Include any amount paid out-of-pocket on (your/his/her) behalf by anyone in this household.

* Enter dollar amount

OTCMEDAMT

Last year, how much was paid out-of-pocket for (your/name's) non-prescription healthcare products such as vitamins, allergy and cold medicine, pain relievers, quit smoking aids, AND anything else not yet reported?

[What about (you/name)? Last year, how much was paid out-of-pocket for (your/name's) non-prescription healthcare products such as vitamins, allergy and cold medicine, pain relievers, quit smoking aids, AND anything else not yet reported?]

Include any amount paid out-of-pocket on (your/his/her) behalf by anyone in this household.

* Enter dollar amount

* If unsure of the amount, a best guess is acceptable.

7 EMPLOYER'S PENSION PLAN

Q74a

Other than Social Security did (the/any) employer or union that (name/you) worked for in 2019 have a pension or other type of retirement plan for any of its employees?

- 1 Yes
- 2 No

Q74b

(Were/Was) (name/you) included in that plan?

- 1 Yes
- 2 No

8 LOW INCOME ITEMS

8.1 SCHOOL LUNCHES

Q80

During 2019 which of the children ages 5 to 18 in this household usually ate a complete lunch offered at school?

- * Probe: Anyone else?
- * Enter all that apply, separate using the space bar or a comma.
- * Enter 96 for All
- * Enter 0 for None

Q83

During 2019 which of the children in this household received free or reduced priced lunches because they qualified for the Federal School Lunch Program?

- * Probe: Anyone else?
- * Enter all that apply, separate using the space bar or a comma.
- * Enter 96 for All
- * Enter 0 for None

8.2 PUBLIC HOUSING

Q85

Is this public housing, that is, is it owned by a local housing authority or other public agency?

- 1 Yes
- 2 No

Q86

Are you paying lower rent because the Federal, State, or local government is paying part of the cost?

- 1 Yes
- 2 No

SPHS8

Is this through Section 8 or through some other government program?

- 1 Section 8
- 2 Some other government program
- 3 Not sure

8.3 WOMEN, INFANTS, AND CHILDREN NUTRITION PROGRAM (WIC)

SWRWIC

At any time during 2019, (was/were) (you/ anyone in this household) on WIC, the Women, Infants, and Children Nutrition Program?

- 1 Yes
- 2 No

SWRW

Who received WIC for themselves or on behalf of a child?

- * Enter all that apply, separate using the space bar or a comma.
- * Probe: Anyone else?

8.4 ENERGY ASSISTANCE

Q93

The government has an energy assistance program which helps pay heating and cooling costs. This assistance can be received directly by the household or it can be paid directly to the electric company, gas company, or fuel dealer.

In 2019, (did you/did this household) receive assistance of this type from the federal, state, or local government?

- 1 Yes
- 2 No

Q93pr1

Do you remember receiving an additional or unexpected check that was sent during the year to help pay heating or cooling costs?

- 1 Yes
- 2 No

Q93pr2

Was it used to pay heating costs?

- 1 Yes
- 2 No

Q94

Altogether, how much energy assistance has been received in 2019?

* Enter annual amount only

Q94rn1

Could you tell me if you received:

less than \$1,000
between \$1,000 and \$3,000
or over \$3,000

in energy assistance during 2019?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3000

Q94rn2

Did you receive:

**less than \$100
between \$100 and \$500
or over \$500**

in energy assistance during 2019?

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

9 MIGRATION

9.1 5-YEAR MIGRATION

M5GSAM

(Were/Was) (reference person's name/you) living in this house (or apartment) five years ago?

- 1 Yes, this house (apt)
- 2 No, different house in U.S.
- 3 No, outside the U.S.

M5GPLC

Where did (reference person's name/you) live five years ago?

- * Name of city/town/post office
- * Current: (city)
- * Enter correct city/town/post office or press ENTER for SAME

M5GSTA

?[F1]

Where did (reference person's name/you) live five years ago?

- * Name of State
 - * Current: (state)
 - * Enter W for person living on a ship at sea
 - * Enter correct State or press ENTER for SAME
-

M5GZIP

Where did (reference person's name/you) live five years ago?

- * Zip Code
 - * Current: (zip)
 - * Enter correct Zip Code or press ENTER for SAME
-

M5GCLM

Did (reference person's name/you) live inside the city limits of (place name)?

- 1 Yes, inside city limits
- 2 No, outside city limits or post office name only

M5GCOU

What (county/parish) is (place name) in?

- * Enter "IND CITY" if an independent city, not a county
-

S M5GCN1

What country did (reference person's name/you) live in one year ago?

M5GALL

There are (number) other persons in this household ages 5 years or over. Did all of these persons live with you in (City, State) five year ago?

M5GM

Which of the other members of this household did NOT live with (reference person's name/you) five years ago?

- * PROBE: Anyone else?
- * Enter all that apply, separate using the space bar or a comma.

Enter persons line number (1-16)

N5TSAM

Did (name/you) live in this house (apartment) five years ago?

- 1 Yes , this house
- 2 No, different house in U.S.
- 3 No, outside the U.S.

N5TPLC

Where did (name/you) live five years ago?

- * Name of city/town/post office
 - * Current: (city) Enter correct city/town/post office or
 - * Press ENTER for SAME
-

N5TSTA

?[F1]

Where did (name/you) live five years ago?

- * Name of State
 - * Current: (state)
 - * Enter correct State or press ENTER for SAME
-

N5TZIP

Where did (name/you) live five years ago?

- * Zip Code Current: (zip)
- * Enter correct zip code or
- * Press ENTER for SAME

N5TCLM

Did (name/you) live inside the city limits of (place name)?

- 1 Yes, inside city limits
- 2 No, outside city limits or post office name only

N5TCOU

What (county/parish) is (place name) in?

♦ Enter "IND CITY" if an independent city, not a county

S N5TCN1

What country did (name/you) live in five years ago?

9.2 1-YEAR MIGRATION

MIGSAM

(Were/Was) (you/reference person's name) living in this house (or apartment) one year ago?

- 1 Yes, this house (apt)
- 2 No, different house in U.S.
- 3 No, outside the U.S.

MIGPLC

Where did (reference person's name/you) live one year ago?

- ♦ Name of city/town/post office
 - ♦ Current: (city)
 - ♦ Enter correct city/town/post office or press ENTER for SAME
-

MIGSTA

Where did (reference person's name/you) live one year ago?

- ♦ Name of State
- ♦ Current: (state)

- * Enter W for person living on a ship at sea
 - * Enter correct State or press ENTER for SAME
-

MIGZIP

Where did (reference person's name/you) live one year ago?

- * Zip Code
 - * Current: (zip)
 - * Enter correct Zip Code or press ENTER for SAME
-

MIGCLM

Did (reference person's name/you) live inside the city limits of (place name)?

- 1 Yes, inside city limits
- 2 No, outside city limits or post office name only

MIGCOU

What (county/parish) is (place name) in?

- * Enter "IND CITY" if an independent city, not a county
-

S MIGCN1

What country did (reference person's name/you) live in one year ago?

MI1RES

What was (your/name's) main reason for moving to this house (apartment)?

- * The answer categories are separated into the following groups:
FAMILY-RELATED REASONS* 1-3
EMPLOYMENT-RELATED REASONS 5-9
HOUSING-RELATED REASONS 10-15
OTHER REASONS 4, 16-20

*Family-related reasons only include family as defined by the Census Bureau. Family consists of people who are related by birth, marriage, or adoption.

- 1 change in marital status
- 2 to establish own household
- 3 other family reason (specify)

- 4 relationship with unmarried partner (boy/girlfriend, fiancé, etc.)
- 5 new job or job transfer
- 6 to look for work or lost job
- 7 to be closer to work/easier commute
- 8 retired
- 9 other job-related reason (specify)
- 10 wanted to own home, not rent
- 11 wanted newer/better/larger house or apartment
- 12 wanted better neighborhood/less crime
- 13 wanted cheaper housing
- 14 foreclosure/eviction
- 15 other housing reason (specify)
- 16 to attend or leave college
- 17 change of climate
- 18 health reasons
- 19 natural disaster (hurricane, tornado, etc.)
- 20 other reason (specify)

MI1s

What was the reason for moving?

MIGALL

**There are (number) other persons in this household ages 1 year or over.
Did (all of these persons/this person) live with (reference person's name/you) (in this house/in City, State/outside the U.S.) one year ago?**

- 1 Yes, all lived with (reference person's name/you)
- 2 No, some or all did not live with (reference person's name/you)

MIGM

Which of the other members of this household did NOT live with (reference person's name/you) one year ago?

- * PROBE: Anyone else?
- * Enter all that apply, separate using the space bar or a comma.
- * Enter Line Number(s)

NXTSAM

Did (name/you) live in this house (apartment) one year ago?

- 1 Yes , this house
- 2 No, different house in U.S.
- 3 No, outside the U.S.

NXTPLC

Where did (name/you) live one year ago?

- * Name of city/town/post office
 - * Current: (city) Enter correct city/town/post office or
 - * Press ENTER for SAME
-

NXTSTA

Where did (name/you) live one year ago?

- * Name of State
 - * Current: (state)
 - * Enter correct State or press ENTER for SAME
-

NXTZIP

Where did (name/you) live one year ago?

- * Zip Code Current: (zip)
 - * Enter correct zip code or
 - * Press ENTER for SAME
-

NXTCLM

Did (name/you) live inside the city limits of (place name)?

- 1 Yes, inside city limits
- 2 No, outside city limits or post office name only

NXTCOU

What (county/parish) is (place name) in?

- *Enter "IND CITY" if an independent city, not a county
-

S NXTCN1

What country did (name/you) live in one year ago?

NX1RES

What was (name's/your) main reason for moving to this house (apartment)?

* The answer categories are separated into the following groups:

FAMILY-RELATED REASONS* 1-3

EMPLOYMENT-RELATED REASONS 5-9

HOUSING-RELATED REASONS 10-15

OTHER REASONS 4, 16-20

*Family-related reasons only include family as defined by the Census Bureau. Family are people who are related by birth, marriage, or adoption.

- 1 change in marital status
- 2 to establish own household
- 3 other family reason (specify)
- 4 relationship with unmarried partner (boy/girlfriend, fiancé, etc.)
- 5 new job or job transfer
- 6 to look for work or lost job
- 7 to be closer to work/easier commute
- 8 retired
- 9 other job-related reason (specify)
- 10 wanted to own home, not rent
- 11 wanted newer/better/larger house or apartment
- 12 wanted better neighborhood/less crime
- 13 wanted cheaper housing
- 14 foreclosure/eviction
- 15 other housing reason (specify)
- 16 to attend or leave college
- 17 change of climate
- 18 health reasons
- 19 natural disaster (hurricane, tornado, etc.)
- 20 other reason (specify)

NX10TH

What was the reason for moving?

SUNITS

* Ask if necessary

How many housing units are in your building?

- 1 Only one
- 2 Two
- 3 Three or four
- 4 Five to nine
- 5 Ten or more

10 SUPPLEMENTAL POVERTY MEASURE

10.1 PROPERTY VALUE/PRESENCE OF MORTGAGE

VALPROP

About how much do you think this (house and lot/apartment/mobile home) would sell for if it were for sale?

◆ Enter dollar amount

VALPROPR

Could you tell me if you think this (house and lot/apartment/mobile home) would sell for:

**less than \$100,000
between \$100,000 and \$250,000
between \$250,000 and \$500,000
or \$500,000 or more?**

- 1 Less than \$100,000
- 2 Between \$100,000 and \$250,000
- 3 Between \$250,000 and \$500,000
- 4 \$500,000 or more

MORTYN

Not counting home equity loans, do you or any other member of this household have a mortgage, deed of trust, contract to purchase, or similar debt on THIS property?

- 1 Yes
- 2 No

SMORTYN

Do you or any member of this household have a second mortgage or a home equity loan on THIS property?

- 1 Yes, home equity loan.
- 2 Yes, second mortgage.
- 3 Yes, second mortgage and home equity loan.
- 4 No

10.2 CHILD CARE

Q95

Now we want to ask about some of your expenses for children.

Did (you/ anyone in this household) PAY for the care of (your/their) (child/children) while (you/they) worked in 2019?

- * Include: All child care expenses including preschool and nursery school expenses, before and after school care, and summer care.
- * Do not include: cost of kindergarten or grade/elementary school.

- 1 Yes
- 2 No

Q95A

Which children needed care while their parents worked?

- ◆ Enter all that apply, separate using the space bar or a comma.
- ◆ Probe: Anyone else?
- ◆ Enter 96 for All persons
- ◆ Enter 0 if none

CCFREQ

What is the easiest way for you to tell us how much was paid for child care while (you/they) worked in 2019: weekly, every other week, twice a month, monthly, or yearly?

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

CCAMT

How much was paid (/weekly/every other week/twice a month/monthly) for child care?

- * Include child care payments made for all children in the household.
 - * For example, if there are two adults in the household with childcare expenses use the total paid by both adults. Do not try to separate the payments. Record one total for the entire household.
-

CCNUMPAY

How many (weekly/every other week/twice a month/monthly) payments did (you/they) make during 2019?

(1-52), (1-26), (1-24), (1-12)

CCTOT

Then (you/they) paid \$(amount) altogether in child care while (you/they) worked during 2019. Does that sound about right?

- 1 Yes
- 2 No

CCEST

What is your best estimate of the correct amount (you/they) paid for child care while (you/they) worked in 2019?

10.3 CHILD SUPPORT PAID

CSPCHILD

(Do you/Does anyone in this household) have any children who lived elsewhere with

their other parent or guardian at anytime during 2019?

- 1 Yes
- 2 No

CSPWHO

Who had children who lived elsewhere? Anyone else?

- * Enter line number
 - * Enter all that apply, separate using the space bar or a comma.
-

CSPREQ

In 2019, did (name/you) pay any child support for children living elsewhere with their other parent or guardian?

- 1 Yes
- 2 No

CSPAMT

How much child support did (name/you) pay in 2019?

- ◆ Enter dollar amount
- ◆ COUNT ALL FORMS OF CHILD SUPPORTS PAYMENTS, INCLUDING:
...PAYMENTS MADE DIRECTLY TO THE OTHER PARENT/GUARDIAN;
...PAYMENTS MADE THROUGH A COURT OR AGENCY; AND
...PAYMENTS WITHHELD FROM THIS PERSON'S PAYCHECK

Attachment A. Income Range Follow-up Questions

The three levels of income range follow-up questions are:

1) High-range income follow-up brackets:

- Less than \$45,000
- Between \$45,000 and \$60,000
- \$60,000 or more

If the respondent selects the lowest bracket (Less than \$45,000), then the following ranges will be presented to the respondent:

- Less than \$15,000
- Between \$15,000 and \$30,000
- \$30,000 or more

2) Mid-range income follow-up questions:

- Less than \$10,000
- Between \$10,000 and \$20,000
- \$20,000 or more

If the respondent selects the lowest bracket (Less than \$10,000), then the following ranges will be presented to the respondent:

- Less than \$1,000
- Between \$1,000 and \$5,000
- \$5,000 or more

3) Low-range income follow-up questions:

- Less than \$1,000
- Between \$1,000 and \$3,000
- \$3,000 or more

If the respondent selects the lowest bracket (Less than \$1,000), then the following ranges will be presented to the respondent:

- Less than \$100
- Between \$100 and \$500
- \$500 or more

Attachment B. Income Source and Follow-Up Question Range Level

The following table displays the income source and range level used in the follow-up range questions.

Source Screen	Income Source	Range Screen	Range Level
Q48AA	Earnings from Longest Job	PUQ48AARN1	High
Q48AAD	Longest Job: tips, bonuses, etc.	PUQ48AADRN1	Low

APPENDIX E

SPECIFIC METROPOLITAN IDENTIFIERS

(Beginning August 2015)

List 1: FIPS Metropolitan Area (CBSA) Codes

List 2: FIPS Consolidated Statistical Area (CSA) Codes

List 3: Individual Principal Cities

List 4: FIPS County Codes

Unless otherwise noted, all definitions for geographic areas on these lists reflect the February 28, 2013 OMB definitions.

Care should be taken when tallying smaller areas, such as smaller cities, counties and metropolitan areas during the time frame of May 2014-July 2015. This is because we will be phasing in a new set of geographic areas to coincide with the phase-in of a new sample based on the results of the 2010 Census. Some smaller areas will be phasing-out or phasing-in during this time frame and estimates for such areas will fluctuate wildly during this time period and not be as accurate as they will be prior to May 2014 or after July 2015.

LIST 1: FIPS Metropolitan Area (CBSA) Codes

Metropolitan Areas are defined using February 28, 2013 OMB definitions.

<u>FIPS Code</u>	<u>Metropolitan (CBSA) TITLE</u>
10180	Abilene, TX
10420	Akron, OH
10580	Albany-Schenectady-Troy, NY
10740	Albuquerque, NM
10900	Allentown-Bethlehem-Easton, PA-NJ
11100	Amarillo, TX
11460	Ann Arbor, MI
11540	Appleton, WI
11700	Asheville, NC
12020	Athens-Clarke County, GA
12060	Atlanta-Sandy Springs-Roswell, GA
12100	Atlantic City-Hammonton, NJ
12220	Auburn-Opelika, AL
12260	Augusta-Richmond County, GA-SC
12420	Austin-Round Rock, TX
12540	Bakersfield, CA
12580	Baltimore-Columbia-Towson, MD
12620	Bangor, ME
12700	Barnstable, MA
12940	Baton Rouge, LA
12980	Battle Creek, MI
13140	Beaumont-Port Arthur, TX
13460	Bend-Redmond, OR
13740	Billings, MT
13780	Binghamton, NY
13820	Birmingham-Hoover, AL
13980	Blacksburg—Christiansburg-Radford, VA

LIST 2: FIPS Consolidated Statistical Area (CSA) Codes

The following CSA's (Combined Statistical Areas) contain 2 or more Metropolitan Statistical Areas that are in the CPS sample and are individually identified on the public use files. Micropolitan Statistical Areas are not specifically identified in the CPS and are not used to identify CSA's nor are parts of such areas coded as belonging to CSA's. The component CBSA's identified on the CPS Public Use Files are listed for each CSA.

CSA Code	CBSA Code	CSA Title Component Parts (CBSA's)
104	10580 24020	Albany-Schenectady, NY Albany-Schenectady-Troy, NY Glen Falls, NY

List 3: Individual Principal Cities

Please Note: You must use the CBSA code in combination with the city code to uniquely identify principal cities. If a county name is provided, you must incorporate the county code into any algorithm used to tabulate a specific city's characteristics. The same applies to state codes for multi-state CBSA's.

CBSA Code	Title City	GTINDVPC
38060	Phoenix-Mesa-Scottsdale, AZ	
	Phoenix	1
	Mesa	2
	Scottsdale	3
	Tempe	4

Source of the Data and Accuracy of the Estimates for the 2020 Annual Social and Economic Supplement Microdata File

SOURCE OF THE DATA

The data in this microdata file and the estimates in the reports *Income and Poverty in the United States: 2019*, *Health Insurance Coverage in the United States: 2019*, and *The Supplemental Poverty Measure: 2019* come from the 2020¹ Annual Social and Economic Supplement (ASEC) of the Current Population Survey (CPS).² The U.S. Census Bureau conducts the CPS ASEC over a 3-month period in February, March, and April, with most of the data collection occurring in the month of March. The CPS ASEC uses two sets of questions, the basic CPS and a set of supplemental questions. The CPS, sponsored jointly by the Census Bureau and the U.S. Bureau of Labor Statistics, is the country's primary source of labor force statistics for the entire population. The Census Bureau and the U.S. Bureau of Labor Statistics also jointly sponsor the CPS ASEC.

Basic CPS. The monthly CPS collects primarily labor force data about the civilian noninstitutionalized population living in the United States. The institutionalized population, which is excluded from the universe, consists primarily of the population in correctional institutions and nursing homes (98 percent of the 4.0 million institutionalized people in the 2010 Census). Starting in August 2017, college and university dormitories were also excluded from the universe because most of the residents had usual residences elsewhere. Interviewers ask questions concerning labor force participation of each member 15 years old and older in sample households. Typically, the week containing the nineteenth of the month is the interview week. The week containing the twelfth is the reference week (i.e., the week about which the labor force questions are asked).

The CPS uses a multistage probability sample based on the results of the decennial census, with coverage in all 50 states and the District of Columbia. The sample is continually updated to account for new residential construction. When files from the most recent decennial census become available, the Census Bureau gradually introduces a new sample design for the CPS.

Every ten years, the CPS first-stage sample is redesigned³ reflecting changes based on the most recent decennial census. In the first stage of the sampling process, primary sampling units (PSUs)⁴ were selected for sample. In the 2000 design, the United States was divided

¹ For clarity and consistency throughout this report, the term "collection year" is the year the data is collected (in this case, 2020), and "data year" is the year about which the data are obtained (in this case, 2019). 2020 CPS ASEC asks questions of data year 2019, 2019 CPS ASEC asks questions of data year 2018, etc.

² Portions of the health insurance data in the report are based on the American Community Survey (ACS). Please refer to the ACS Source and Accuracy Statement in U.S. Census Bureau (2019c).

³ For detailed information on the 2010 sample redesign, please see Bureau of Labor Statistics (2014).

⁴ The PSUs correspond to substate areas (i.e., counties or groups of counties) that are geographically contiguous.

into 2,025 PSUs. These were then grouped into 824 strata and one PSU was selected for sample from each stratum. In the 2010 sample design, the United States was divided into 1,987 PSUs. These PSUs were then grouped into 852 strata. Within each stratum, a single PSU was chosen for the sample, with its probability of selection proportional to its population as of the most recent decennial census. In the case of strata consisting of only one PSU, the PSU was chosen with certainty.

In April 2014, the Census Bureau began phasing out the 2000 sample and replaced it with the 2010 sample, creating a mixed sampling frame. Two simultaneous changes occurred during this phase-in period. First, within the PSUs selected for both the 2000 and 2010 designs, sample households from the 2010 design gradually replaced sample households from the 2000 design. Second, new PSUs selected for only the 2010 design gradually replaced outgoing PSUs selected for only the 2000 design. By July 2015, the new 2010 sample design was completely implemented and the sample came entirely from the 2010 redesigned sample.

Approximately 70,300 sampled addresses were selected from the sampling frame for the basic CPS. Based on eligibility criteria, ten percent of these sampled addresses were sent directly to computer-assisted telephone interviewing (CATI). The remaining sampled addresses were assigned to interviewers for computer-assisted personal interviewing (CAPI).⁵ Of all addresses in sample, about 59,700 were determined to be eligible for interview. Interviewers obtained interviews at about 43,600 of the housing units at these addresses.⁶ Noninterviews occur when the occupants are not found at home after repeated calls or are unavailable for some other reason. Table 1 summarizes historical changes in the CPS design.

The 2020 Annual Social and Economic Supplement. In addition to the basic CPS questions, interviewers asked supplementary questions for the CPS ASEC. They asked these questions of the civilian noninstitutionalized population and also of military personnel who live in households with at least one other civilian adult. The additional questions covered the following topics:

- Household and family characteristics.
- Marital status.
- Geographic mobility.

⁵ For further information on CATI and CAPI and the eligibility criteria, please see U.S. Census Bureau (2019e).

⁶ Due to government restrictions/health and safety concerns stemming from the spread of COVID-19, March CPS interviewing was impacted. Interviewing began Sunday, March 15th. On Friday, March 20th, personal visits with respondents were halted nationwide, resulting in telephone contacts only. Additionally, both CATI contact centers were closed as of Friday, March 20th. All cases remaining in CATI for ASEC follow-up were closed out and sent in to headquarters. Therefore, no CATI follow-up occurred after March 20th. These procedural changes resulted in higher nonresponse for both the basic CPS and the ASEC Supplement. For additional information on the impacts of COVID-19 on the CPS ASEC, please see Subsection “Impact of the Coronavirus Pandemic” within Section “Comparability of Data”.

- Foreign-born population.
- Income from the previous calendar year.
- Work status/occupation.
- Health insurance coverage.
- Program participation.
- Educational attainment.

Including the basic CPS sample, approximately 91,500 addresses were in sample for the CPS ASEC. About 79,400 sampled addresses were determined to be eligible for interview, and about 60,400 interviews were conducted (see Table 1).

The additional sample for the CPS ASEC provides more reliable data than the basic CPS for Hispanic households, non-Hispanic minority households, and non-Hispanic White households with children 18 years or younger. These households were identified for sample from previous months and the following April. For more information about the households eligible for the CPS ASEC, please refer to U.S. Census Bureau (2019e).

Table 1. Description of the March Basic Current Population Survey and Annual Social and Economic Supplement Sample Cases

Time period	Number of sample PSUs ^A	<u>Basic CPS^B sampled addresses eligible</u>		<u>Total (CPS ASEC^C/ADS^D + basic CPS) sampled addresses eligible</u>

^A PSUs are primary sampling units.

^B CPS is the Current Population Survey.

^C CPS ASEC is the Annual Social and Economic Supplement of the Current Population Survey.

^D The CPS ASEC was referred to as the Annual Demographic Supplement (ADS) until 2002.

^E The 2014 CPS ASEC Redesign indicates the subsample of the basic CPS households which received the redesigned ASEC questionnaire incorporating new income and health insurance questions.

^F The 2014 CPS ASEC Traditional indicates the subsample of the basic CPS households which received the the same ASEC questionnaire that was used in the 2013 CPS ASEC.

^G The Census Bureau redesigned the CPS following the Census 2000. During phase-in of the new design, addresses from the new and old designs were in the sample.

^H The Census Bureau redesigned the CPS following the 1980 Decennial Census of Population and Housing.

^I The Census Bureau redesigned the CPS following the 1970 Decennial Census of Population and Housing.

Estimation Procedure. This survey's estimation procedure adjusts weighted sample results to agree with independently derived population controls of the civilian noninstitutionalized population of the United States, each state, and the District of

Columbia. These population controls⁷ are prepared monthly as part of the Census Bureau's Population Estimates Program.

The population controls for the nation are distributed by demographic characteristics in two ways:

- Age, sex, and race (White alone, Black alone, and all other groups combined).
- Age, sex, and Hispanic origin.

The population controls for the states are distributed by:

- Race (Black alone and all other race groups combined).
- Age (0-15, 16-44, and 45 and over).
- Sex.

The independent estimates by age, sex, race, and Hispanic origin, and for states by selected age groups and broad race categories, are developed using the basic demographic accounting formula whereby the population from the 2010 Census data is updated using data on the components of population change (births, deaths, and net international migration) with net internal migration as an additional component in the state population controls.

The net international migration component of the population controls includes:

- Net international migration of the foreign born;
- Net migration between the United States and Puerto Rico;
- Net migration of natives to and from the United States; and
- Net movement of the Armed Forces population to and from the United States.

Because the latest available information on these components lags behind the survey date, it is necessary to make short-term projections of these components to develop the estimate for the survey date.

The estimation procedure of the CPS ASEC includes a further adjustment to give married and unmarried partners the same weight.

ACCURACY OF THE ESTIMATES

A sample survey estimate has two types of error: sampling and nonsampling. The accuracy of an estimate depends on both types of error. The nature of the sampling error is known given the survey design; the full extent of the nonsampling error is unknown.

⁷ For additional information on population controls, including details on the demographic characteristics used and net international components, please see Chapters 1-3 and Appendix: History of the Current Population Survey of U.S. Census Bureau (2019e).

Sampling Error. Since the CPS estimates come from a sample, they may differ from figures from an enumeration of the entire population using the same questionnaires, instructions, and enumerators. For a given estimator, the difference between an estimate based on a sample and the estimate that would result if the sample were to include the entire population is known as sampling error. Standard errors, as calculated by methods described in “Standard Errors and Their Use,” are primarily measures of the magnitude of sampling error. However, the estimation of standard errors may include some nonsampling error.

Nonsampling Error. For a given estimator, the difference between the estimate that would result if the sample were to include the entire population and the true population value being estimated is known as nonsampling error. There are several sources of nonsampling error that may occur during the development or execution of the survey. It can occur because of circumstances created by the interviewer, the respondent, the survey instrument, or the way the data are collected and processed. Some nonsampling errors, and examples of each, include:

- Measurement error: The interviewer records the wrong answer, the respondent provides incorrect information, the respondent estimates the requested information, or an unclear survey question is misunderstood by the respondent.
- Coverage error: Some individuals who should have been included in the survey frame were missed.
- Nonresponse error: Responses are not collected from all those in the sample or the respondent is unwilling to provide information.
- Imputation error: Values are estimated imprecisely for missing data.
- Processing error: Forms may be lost, data may be incorrectly keyed, coded, or recoded, etc.

To minimize these errors, the Census Bureau applies quality control procedures during all stages of the production process including the design of the survey, the wording of questions, the review of the work of interviewers and coders, and the statistical review of reports.

Answers to questions about money income often depend on the memory or knowledge of one person in a household. Recall problems can cause underestimates of income in survey data because it is easy to forget minor or irregular sources of income. Respondents may also misunderstand what the Census Bureau considers money income or may simply be unwilling to answer these questions correctly because the questions are considered too personal. For more details, please see Appendix C of U.S. Census Bureau (1993).

Two types of nonsampling error that can be examined to a limited extent are nonresponse and undercoverage.

Nonresponse. The effect of nonresponse cannot be measured directly, but one indication of its potential effect is the nonresponse rate. For the cases eligible for the 2020 ASEC, the

basic CPS household-level unweighted nonresponse rate was 23.9 percent. The household-level unweighted nonresponse rate for the ASEC was an additional 19.7 percent. These two nonresponse rates lead to a combined supplement unweighted nonresponse rate of 38.9 percent.⁸

In accordance with Census Bureau and Office of Management and Budget Quality Standards, the Census Bureau will conduct an analysis to assess nonresponse bias in the 2020 CPS ASEC.

Responses are made up of complete interviews and sufficient partial interviews. A sufficient partial interview is an incomplete interview in which the household or person answered enough of the questionnaire for the supplement sponsor to consider the interview complete. The remaining supplement questions may have been edited or imputed to fill in missing values. Insufficient partial interviews are considered to be nonrespondents. Refer to the supplement overview attachment in the technical documentation for the specific questions deemed critical by the sponsor as necessary to answer in order to be considered a sufficient partial interview.

As a result of sufficient partial interviews being considered responses, individual items/questions have their own response and refusal rates. As part of the nonsampling error analysis, the item response rates, item refusal rates, and edits are reviewed. For the CPS ASEC, the unweighted item refusal rates range from 0.0 percent to 3.3 percent. The unweighted item allocation rates range from 23.3 percent to 74.1 percent.

Undercoverage. The concept of coverage with a survey sampling process is defined as the extent to which the total population that could be selected for sample “covers” the survey’s target population. Missed housing units and missed people within sample households create undercoverage in the CPS. Overall CPS undercoverage for March 2020 is estimated to be about ten percent. CPS coverage varies with age, sex, and race. Generally, coverage is higher for females than for males and higher for non-Blacks than for Blacks. This differential coverage is a general problem for most household-based surveys.

The CPS weighting procedure mitigates bias from undercoverage, but biases may still be present when people who are missed by the survey differ from those interviewed in ways other than age, race, sex, Hispanic origin, and state of residence. How this weighting procedure affects other variables in the survey is not precisely known. All of these considerations affect comparisons across different surveys or data sources.

A common measure of survey coverage is the coverage ratio, calculated as the estimated population before poststratification divided by the independent population control. Table 2 shows March 2020 CPS coverage ratios by age and sex for certain race and Hispanic groups. The CPS coverage ratios can exhibit some variability from month to month.

⁸ Because the ASEC is at the household level, the overall/combined ASEC response rate is a product of the basic CPS response rate and the ASEC response rate.

Table 2. Current Population Survey Coverage Ratios: March 2020

Age group	All people	Total		White alone		Black alone		Residual race ^A		Hispanic ^B	
		Male	Female	Male	Female	Male	Female	Male	Female	Male	Female

^A The Residual race group includes cases indicating a single race other than White or Black, and cases indicating two or more races.

^B Hispanics may be any race.

Note: For a more detailed discussion on the use of parameters for race and ethnicity, please see the “Generalized Variance Parameters” section.

Comparability of Data. Data obtained from the CPS and other sources are not entirely comparable. This is due to differences in interviewer training and experience and in differing survey processes. These differences are examples of nonsampling variability not reflected in the standard errors. Therefore, caution should be used when comparing results from different sources.

Data users should be aware that estimates in the reports, *Income and Poverty in the United States: 2019*, *Health Insurance Coverage in the United States: 2019*, and *The Supplemental Poverty Measure: 2019*, use the internal CPS ASEC file. The Census Bureau must keep survey responses confidential, so disclosure avoidance techniques are applied to files prior to public release. Therefore, some estimates using the microdata files may differ from the estimates provided in the reports.

Caution should be used when comparing estimates of the Hispanic population over time. No independent population control totals for people of Hispanic origin were used before 1985.

Caution should also be used when comparing CPS ASEC results from different years. Below, more detail is provided on several reasons for caution when comparing estimates across years.

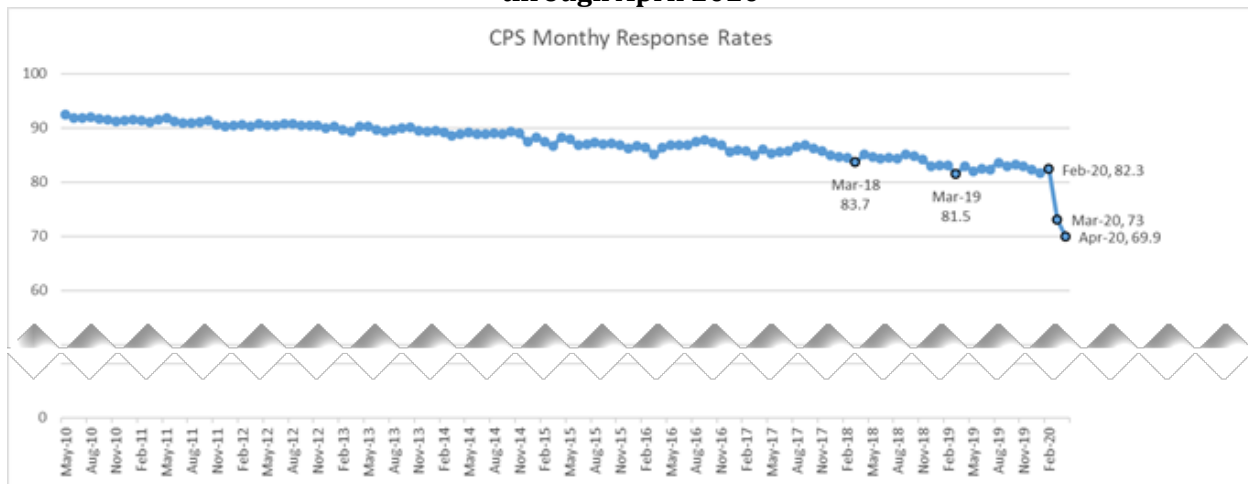

Impact of the Coronavirus Pandemic. Data users should exercise caution when comparing estimates for data year 2019 from the reports or from the microdata files to those from previous years due to the effects that the coronavirus (COVID-19) had on interviewing and response rates. Interviewing for the March CPS began on March 15th. In order to protect the health and safety of Census Bureau staff and respondents, the survey suspended in-person interviewing and closed the two CATI contact centers on March 20th. For the rest of March and through April, the Census Bureau continued to attempt all interviews by phone. For those whose first month in the survey was March or April, the Census Bureau used vendor-provided telephone numbers associated with the sample address.

While the Census Bureau went to great lengths to complete interviews by telephone, the response rate for the CPS basic household survey in March 2020 was 73⁹ percent, about 10 percentage points lower than in preceding months and the same period in 2019. Further, as the Bureau of Labor Statistics (2020) stated in their Frequently Asked Questions accompanying the April 3rd release of The Employment Situation for March 2020, “Response rates for households normally more likely to be interviewed in person were particularly low. The response rate for households entering the sample for their first month was over 20 percentage points lower than in recent months, and the rate for those in the fifth month was over 10 percentage points lower.”

The effect of changes in collection methods continued to be felt into April. The response rate for households entering the sample for their first month of interviewing was especially low. The unweighted April response rate for these households, which would normally have been interviewed in person, was over 30 percentage points lower than the average for the 12 months ending in February. Because the April ASEC selects households only from those in their first or fifth contact, the lower response rate translates into fewer potential ASEC households.

⁹ This value differs from the response rate obtained using the values in the “Nonresponse” section because this value is specifically for March CPS whereas the values in the “Nonresponse” section are for the full CPS sample that was eligible for ASEC.

Figure 1: Unweighted Current Population Survey Monthly Response Rates for May 2010 through April 2020

Source: U.S. Census Bureau, Current Population Survey, internal data files, May 2010-April 2020.

The CPS ASEC response rate is complicated by the different months and samples that feed into the survey. Further, it includes an adjustment factor to account for those who responded to the basic survey but refused to answer the supplement. The Census Bureau estimates that the unweighted combined supplement response rate was 61.1 percent in 2020, down from 67.6 percent in 2019.

The change from conducting first interviews in person to making first contacts by telephone only is a contributing factor to the lower response rates. Further, it is likely that the characteristics of people for whom a telephone number was found may be systematically different from the people for whom the Census Bureau was unable to obtain a telephone number. While the Census Bureau creates weights designed to adjust for nonresponse and to control weighted counts to independent population estimates by age, sex, race, and Hispanic origin, the magnitude of the increase in (and differential nature of) nonresponse related to the pandemic likely reduced their effectiveness. Using administrative data, Census Bureau researchers have documented that there are more (and larger) differences between respondents and nonrespondents in 2020 than in the prior three years. Of particular interest for the estimates in the ASEC reports are the differences in median income and educational attainment, indicating that respondents in 2020 had relatively higher income and were more educated than nonrespondents.¹⁰

Change in Processing System. Data users should exercise caution when comparing estimates from the CPS ASEC for data years 2019 and 2018 to estimates from earlier years. An updated data processing system was implemented beginning with data year 2018 estimates. This system introduced demographic edit changes to account for same-sex couples, revised procedures for editing income and health insurance variables, and added several new income and health insurance variables. Changes to the editing procedures encompassed both changes to the resolution of logically inconsistent data and changes to the imputation methods. The

¹⁰ For additional information, please see Rothbaum & Bee (2020).
G-10

2019 and 2020 CPS ASEC estimates for data years 2018 and 2019 can be compared to the 2018 CPS ASEC Bridge Files¹¹, which contain data year 2017 estimates, and to the 2017 CPS ASEC Research Files¹², which contain estimates for data year 2016. The 2017 Research File and the 2018 Bridge File both use the new processing system and serve as a bridge between the legacy production files and the updated processing system. Data users should be aware that the estimates from the 2017 and 2018 CPS ASEC Files for data years 2016 and 2017 using the legacy processing system are not directly comparable to 2019 CPS ASEC and 2020 CPS ASEC estimates.

Change in Questionnaire. In 2014, the ASEC questionnaire was redesigned to incorporate new income and health insurance questions. Due to the differences in measurement, health insurance estimates for 2014-2017 CPS ASEC for data years 2013-2016 are not directly comparable to health insurance estimates for previous years.¹³ For income and poverty estimates, when survey changes had statistically significant impacts, comparisons should be made by adjusting historical published estimates to approximate the magnitude of those impacts.¹⁴

Change in Census-Based Controls. Data users should exercise caution when comparing estimates for 2019 from the microdata file or from the ASEC reports, *Income and Poverty in the United States: 2019* and *Health Insurance Coverage in the United States: 2019* (which reflect 2010 Census-based controls), with estimates from the microdata files or ASEC Reports for 2001 to 2010 (from March 2002 CPS to March 2011 CPS), which reflect 2000 Census-based controls, and to 1993 to 2000 (from March 1994 CPS to March 2001 CPS), which reflect 1990 Census-based controls. Ideally, the same population controls should be used when comparing any estimates. In reality, the use of the same population controls is not practical when comparing trend data over a period of 10 to 20 years. Thus, when it is necessary to combine or compare data based on different controls or different designs, data users should be aware that changes in weighting controls or weighting procedures could create small differences between estimates.

Microdata files from previous years reflect the latest available census-based controls. Although the most recent change in population controls had relatively little impact on summary measures such as averages, medians, and percentage distributions, it did have a significant impact on levels. For example, use of 2010 Census-based controls results in about a 0.2 percent increase from the 2000 Census-based controls in the civilian noninstitutionalized population and in the number of families and households. Thus, estimates of levels for data collected in 2012 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population.

¹¹ For additional information on the 2018 CPS ASEC Bridge Files, please see the Documentation and User Notes in US Census Bureau (2019b).

¹² For additional information on the 2017 CPS ASEC Research Files, please see the Documentation and User Notes in US Census Bureau (2019a).

¹³ For more information, see U.S. Census Bureau (2019f).

¹⁴ For more details on the adjustment for these comparisons, see U.S. Census Bureau (2019g).

These differences could be disproportionately greater for certain population subgroups than for the total population.

Users should also exercise caution because of changes caused by the phase-in of the 2010 Census files (see “Basic CPS”).¹⁵ During this time period, CPS data were collected from sample designs based on different censuses. Two features of the new CPS design have the potential of affecting estimates: (1) the temporary disruption of the rotation pattern from August 2014 through June 2015 for a comparatively small portion of the sample and (2) the change in sample areas. Most of the known effect on estimates during and after the sample redesign will be the result of changing from 2000 to 2010 geographic definitions.

Research has shown that the national-level estimates of the metropolitan and nonmetropolitan populations should not change appreciably because of the new sample design. However, users should still exercise caution when comparing metropolitan and nonmetropolitan estimates across years with a design change, especially at the state level.

A Nonsampling Error Warning. Since the full extent of the nonsampling error is unknown, one should be particularly careful when interpreting results based on small differences between estimates. The Census Bureau recommends that data users incorporate information about nonsampling errors into their analyses, as nonsampling error could impact the conclusions drawn from the results. Caution should also be used when interpreting results based on a relatively small number of cases. Summary measures (such as medians and percentage distributions) probably do not reveal useful information when computed on a subpopulation smaller than 75,000.

For additional information on nonsampling error, including the possible impact on CPS data, when known, refer to U.S. Census Bureau (2019e) and Brooks & Bailar (1978).

Estimation of Median Incomes. The Census Bureau has changed the methodology for computing median income over time. The Census Bureau has computed medians using either Pareto interpolation or linear interpolation. Currently, we are using linear interpolation to estimate all medians. Pareto interpolation assumes a decreasing density of population within an income interval, whereas linear interpolation assumes a constant density of population within an income interval.

The Census Bureau calculated estimates of median income and associated standard errors for 1979 through 1987 using Pareto interpolation if the estimate was larger than \$20,000 for people or \$40,000 for families and households. We calculated estimates of median income and associated standard errors for 1976, 1977, and 1978 using Pareto interpolation if the estimate was larger than \$12,000 for people or \$18,000 for families and households. All other estimates of median income and associated standard errors for 1976 through 2019 (2020 CPS ASEC), and almost all of the estimates of median income and associated standard errors for 1975 and earlier, were calculated using linear interpolation. Thus, use caution when comparing median incomes above \$12,000 for people or \$18,000

¹⁵ The phase-in process using the 2010 Census files began April 2014.

for families and households for different years. Median incomes below those levels are more comparable from year to year since they have always been calculated using linear interpolation. For an indication of the comparability of medians calculated using Pareto interpolation with medians calculated using linear interpolation, see U.S. Census Bureau (1978) and U.S. Census Bureau (1993).

Standard Errors and Their Use. A sample estimate and its standard error enable one to construct a confidence interval. A confidence interval is a range about a given estimate that has a specified probability of containing the average result of all possible samples. For example, if all possible samples were surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.

A particular confidence interval may or may not contain the average estimate derived from all possible samples, but one can say with the specified confidence that the interval includes the average estimate calculated from all possible samples.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common type of hypothesis is that the population parameters are different. An example of this would be comparing the percentage of men who were part-time workers to the percentage of women who were part-time workers.

Tests may be performed at various levels of significance. A significance level is the probability of concluding that the characteristics are different when, in fact, they are the same. For example, to conclude that two characteristics are different at the 0.10 level of significance, the absolute value of the estimated difference between characteristics must be greater than or equal to 1.645 times the standard error of the difference.

The Census Bureau uses 90-percent confidence intervals and 0.10 levels of significance to determine statistical validity. Consult standard statistical textbooks for alternative criteria.

The tables in *Income and Poverty in the United States: 2019*, *Health Insurance Coverage in the United States: 2019*, and *The Supplemental Poverty Measure: 2019* list estimates followed by a number labeled “Margin of Error (\pm).” This number can be added to and subtracted from the estimates to calculate upper and lower bounds of the 90-percent confidence interval. For example, *Health Insurance Coverage in the United States: 2019* shows the numbers for health insurance. For the statement, “8.0 percent of people were uninsured for the entire calendar year,” the 90-percent confidence interval for the estimate, 8.0 percent, is 8.0 (\pm 0.2) percent, or 7.8 percent to 8.2 percent.¹⁶

¹⁶ Note that the confidence interval here does not match the confidence interval given in Illustration 3 because the standard errors/margin of errors were calculated in two different ways. The margin of errors within the tables in the reports are calculated using direct estimates, whereas the standard errors within the illustrations later in this document are calculated using generalized variance estimates.

Estimating Standard Errors. The Census Bureau uses replication methods to estimate the standard errors of CPS and ASEC estimates. These methods primarily measure the magnitude of sampling error. However, they do measure some effects of nonsampling error as well. They do not measure systematic biases in the data associated with nonsampling error. Bias is the average over all possible samples of the differences between the sample estimates and the true value.

There are two ways to calculate standard errors for the 2020 CPS ASEC microdata file.

1. Direct estimates created from replicate weighting methods;
2. Generalized variance estimates created from generalized variance function (GVF) parameters a and b .

While replicate weighting methods provide the most accurate variance estimates, this approach requires more computing resources and more expertise on the part of the user. The GVF parameters provide a method of balancing accuracy with resource usage as well as a smoothing effect on standard error estimates. For more information on calculating direct estimates, refer to the “Replicate Weighting” section. For more information on GVF estimates, refer to the “Generalized Variance Parameters” section.

The Income and Poverty in the United States: 2019, Health Insurance Coverage in the United States: 2019, and The Supplemental Poverty Measure: 2019 reports use replicate weights to calculate the margins of error of the estimates seen in tables and throughout the reports. In 2009, the Census Bureau released replicate weights for the 2005 through 2009 CPS ASEC collection years and has released replicate weights for each year since with the release of the CPS ASEC public use data. Since the published GVF parameters generally underestimated standard errors, standard errors produced using direct estimates may be higher than in previous reports. For most CPS ASEC estimates, the increase in standard errors from GVF to direct estimates will not alter the findings. However, marginally significant differences using the GVF may not be significant using replicate weights.

The examples in this source and accuracy statement are for guidance calculating standard errors using the generalized variance parameters. The use of generalized variance parameters is the recommended method of calculating standard errors for data users who do not have the ability to calculate the standard errors using replicate weights.

Replicate Weighting. The Census Bureau is releasing public use replicate weight files for the 2020 CPS ASEC that can be matched to the microdata files.

Replicate estimates are created using each of the 160 weights independently to create 160 replicate estimates. For point estimates, multiply the replicate weights by the item of interest at the record level (either an indicator variable to determine the number of people with a characteristic or a variable that contains some value) and tally the weighted values to create the 160 replicate estimates. Use these replicate estimates in formula (1) below to

calculate the total variance for the item of interest. For example, say that the item of interest is the number of males. Tally the weights for all the records that indicated male to create the 160 replicate estimates of the number of males. Then use these estimates in the formula to calculate the total variance for the number of males.

Calculate variance estimates for the estimates using:

$$\text{var}(\hat{\theta}_0) = \frac{4}{160} \sum_{i=1}^{160} (\hat{\theta}_i - \hat{\theta}_0)^2 \quad (1)$$

where $\hat{\theta}_0$ is the estimate of the statistic of interest, such as a point estimate or proportion, using the weight for the full sample, and $\hat{\theta}_i$ are the replicate estimates of the same statistic using the replicate weights. The standard error is the square root of the variance.

For more information on using replicate weights and calculating direct estimates, see U.S. Census Bureau (2009).

Generalized Variance Parameters. While it is possible to estimate the standard error based on the survey data for each estimate in a report, there are a number of reasons why this is not done. A presentation of the individual standard errors would be of limited use, since one could not possibly predict all of the combinations of results that may be of interest to data users. Additionally, data users have access to CPS microdata files, and it is impossible to compute in advance the standard error for every estimate one might obtain from those data sets. Moreover, variance estimates are based on sample data and have variances of their own. Therefore, some methods of stabilizing these estimates of variance, for example, by generalizing or averaging over time, may be used to improve their reliability.

Experience has shown that certain groups of estimates have similar relationships between their variances and expected values. Modeling or generalizing may provide more stable variance estimates by taking advantage of these similarities. The GVF is a simple model that expresses the variance as a function of the expected value of the survey estimate. The parameters of the GVF are estimated using direct replicate variances. These GVF parameters provide a relatively easy method to obtain approximate standard errors for numerous characteristics.

In this source and accuracy statement:

- Tables 4 through 17 provide illustrations for calculating standard errors;
- Table 18 provides the GVF parameters for labor force estimates;
- Table 19 provides GVF parameters for characteristics from the 2020 CPS ASEC;
- Tables 20 and 21 provide correlation coefficients for comparing estimates from consecutive years;
- Table 22 provides correlation coefficients between race and subgroups; and
- Tables 23 and 24 provide factors and population controls to derive state and regional parameters.

The basic CPS questionnaire records the race and ethnicity of each respondent. With respect to race, a respondent can be White, Black, Asian, American Indian and Alaskan Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI), or combinations of two or more of the preceding. A respondent's ethnicity can be Hispanic or non-Hispanic, regardless of race.

The GVF parameters to use in computing standard errors are dependent upon the race/ethnicity group of interest. Table 3 summarizes the relationship between the race/ethnicity group of interest and the GVF parameters to use in standard error calculations.

Table 3. Estimation Groups of Interest and Generalized Variance Parameters

Race/ethnicity group of interest	Generalized variance parameters to use in standard error calculations
Total population	Total or White
White alone, White alone or in combination (AOIC), or White non-Hispanic population	Total or White
Black alone, Black AOIC, or Black non-Hispanic population	Black
Asian alone, Asian AOIC, or Asian non-Hispanic population	Asian, American Indian and Alaska Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI)
AIAN alone, AIAN AOIC, or AIAN non-Hispanic population	Asian, AIAN, NHOPI
NHOPI alone, NHOPI AOIC, or NHOPI non-Hispanic population	Asian, AIAN, NHOPI
Populations from other race groups	Asian, AIAN, NHOPI
Hispanic ^A population	Hispanic ^A
Two or more races ^B – employment/unemployment and educational attainment characteristics	Black
Two or more races ^B – all other characteristics	Asian, AIAN, NHOPI

Source: U.S. Census Bureau, Current Population Survey, internal data files.

^A Hispanics may be any race.

^B Two or more races refers to the group of cases self-classified as having two or more races.

Note: The AOIC population for a race group of interest includes people reporting only the race group of interest (alone) and people reporting multiple race categories including the race group of interest (in combination).

When calculating standard errors for an estimate of interest from cross-tabulations involving different characteristics, use the set of GVF parameters for the characteristic that will give the largest standard error. If the estimate of interest is strictly from basic CPS data, the GVF parameters will come from the CPS GVF table (Table 18). If the estimate is using ASEC data, the GVF parameters will come from the ASEC GVF table (Table 19).

Standard Errors of Estimated Numbers. The approximate standard error, s_x , of an estimated number from this microdata file can be obtained by using the formula:

$$s_x = \sqrt{ax^2 + bx} \tag{2}$$

Here x is the size of the estimate, and a and b are the parameters in Table 18 or 19 associated with the particular type of characteristic.

Illustration 1

Suppose there were 3,826,000 unemployed females (ages 16 and up) in the civilian labor force. Table 4 shows how to use the appropriate parameters from Table 18 and Formula (2) to estimate the standard error and confidence interval.

Table 4. Illustration of Standard Errors of Estimated Numbers

Number of unemployed females in the civilian labor force (x)	3,826,000
a-parameter (a)	-0.000028
b-parameter (b)	2,788
Standard error	101,000
90-percent confidence interval	3,660,000 to 3,992,000

Source: U.S. Census Bureau, Current Population Survey, March 2020.

The standard error is calculated as

$$s_x = \sqrt{-0.000028 \times 3,826,000^2 + 2,788 \times 3,826,000},$$

which, rounded to the nearest thousand, is 101,000. The 90-percent confidence interval is calculated as $3,826,000 \pm 1.645 \times 101,000$.

A conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

Illustration 2

Suppose there were 62,342,000 married-couple family households. Table 5 shows how to use the appropriate parameters from Table 19 and Formula (2) to estimate the standard error and confidence interval.

Table 5. Second Illustration of Standard Errors of Estimated Numbers

Number of married-couple family households (x)	62,342,000
a-parameter (a)	-0.000009
b-parameter (b)	3,238
Standard error	409,000
90-percent confidence interval	61,669,000 to 63,015,000

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_x = \sqrt{-0.000009 \times 62,342,000^2 + 3,238 \times 62,342,000}$$

which, rounded to the nearest thousand, is 409,000. The 90-percent confidence interval is calculated as $62,342,000 \pm 1.645 \times 409,000$.

A conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

Standard Errors of Estimated Percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends on both the size of the percentage and its base. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the parameter from Table 18 or 19 as indicated by the numerator.

The approximate standard error, $s_{y,p}$, of an estimated percentage can be obtained by using the formula:

$$s_{y,p} = \sqrt{\frac{b}{y} p(100 - p)} \quad (3)$$

Here y is the total number of people, families, households, or unrelated individuals in the base or denominator of the percentage, p is the percentage $100 \cdot x/y$ ($0 \leq p \leq 100$), and b is the parameter in Table 18 or 19 associated with the characteristic in the numerator of the percentage.

Illustration 3

The report, *Health Insurance Coverage in the United States: 2019*, shows that there were 26,111,000 out of 324,550,000 people, or 8.0 percent, who did not have health insurance. Table 6 shows how to use the appropriate parameters from Table 19 and Formula (3) to estimate the standard error and confidence interval.

Table 6. Illustration of Standard Errors of Estimated Percentages

Percentage of people without health insurance (p)	8.0
Base (y)	324,550,000
b-parameter (b)	3,022
Standard error	0.08
90-percent confidence interval	7.9 to 8.1

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_{y,p} = \sqrt{\frac{3,022}{324,550,000} \times 8.0 \times (100.0 - 8.0)} = 0.08$$

and the 90-percent confidence interval for the estimated percentage of people without health insurance is from 7.9 to 8.1 percent (i.e., $8.0 \pm 1.645 \times 0.08$).

Standard Errors of Estimated Differences. The standard error of the difference between two sample estimates is approximately equal to

$$s_{x_1-x_2} = \sqrt{s_{x_1}^2 + s_{x_2}^2 - 2rs_{x_1}s_{x_2}} \quad (4)$$

where s_{x_1} and s_{x_2} are the standard errors of the estimates, x_1 and x_2 . The estimates can be numbers, percentages, ratios, etc. Tables 20 and 21 contain the correlation coefficient, r , for CPS year-to-year comparisons for CPS poverty, income, and health insurance estimates of numbers and proportions. Table 22 contains the correlation coefficient r for making comparisons between race categories that are subsets of one another. For example, to compare the number of people in poverty who listed White as their only race to the number of people in poverty who are White alone or in combination with another race, a correlation coefficient is needed to account for the large overlap between the two groups. For making other comparisons (including race overlapping where one group is not a complete subset of the other), assume that r equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

Illustration 4

Suppose there were 25,886,000 men over age 24 who were never married and 10,626,000 men over age 24 who were divorced. The apparent difference is 15,260,000. Table 7 shows how to use Formulas (2) and (4) with $r = 0$ and the appropriate parameters from Table 19 to estimate the standard errors and confidence intervals.

Table 7. Illustration of Standard Errors of Estimated Differences

	Never married (x_1)	Divorced (x_2)	Difference
Number of males over age 24	25,886,000	10,626,000	15,260,000
a-parameter (a)	-0.000009	-0.000009	-
b-parameter (b)	2,808	2,808	-
Standard error	258,000	170,000	309,000
90-percent confidence interval	25,462,000 to 26,310,000	10,346,000 to 10,906,000	14,752,000 to 15,768,000

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

The standard error of the difference is calculated as

$$s_{x_1-x_2} = \sqrt{258,000^2 + 170,000^2}$$

which, rounded to the nearest thousand, is 309,000. The 90-percent confidence interval around the difference is calculated as 15,260,000 ± 1.645 × 309,000. Since this interval

does not include zero, we can conclude with 90-percent confidence that the number of never-married men over age 24 was higher than the number of divorced men over age 24.

Illustration 5

The report, *Income and Poverty in the United States: 2019*, shows that 11,869,000 out of 73,284,000 children, or 16.2 percent, were reported as in poverty in 2018, and that 10,466,000 out of 72,637,000, or 14.4 percent, were in poverty in 2019. The apparent difference is 1.8 percent. Table 8 shows how to use the appropriate parameters from Table 19 and Formulas (3) and (4) to estimate the standard error and confidence interval.

Table 8. Illustration of Standard Errors of Estimated Differences

	2018 (x_1)	2019 (x_2)	Difference
Percentage of children in poverty (p)	16.2	14.4	1.8
Base	73,284,000	72,637,000	-
b-parameter (b)	2,718 ^A	3,781	-
Correlation coefficient (r)	-	-	0.45
Standard error	0.22	0.25	0.25
90-percent confidence interval	15.8 to 16.6	14.0 to 14.8	1.4 to 2.2

Source: U.S. Census Bureau, Current Population Survey, 2019-2020 Annual Social and Economic Supplement.

^A This value comes from the Source and Accuracy Statement for the 2019 Annual Social and Economic Supplement, Appendix G, Table 19 in U.S. Census Bureau (2019d). For additional information, see the “Year-to-Year Factors” section.

The standard error of the difference is calculated as

$$s_{x_1-x_2} = \sqrt{0.22^2 + 0.25^2 - 2 \times 0.45 \times 0.22 \times 0.25} = 0.25$$

and the 90-percent confidence interval around the difference is calculated as $1.8 \pm 1.645 \times 0.25$. Since this interval does not include zero, we can conclude with 90-percent confidence that the percentage of children in poverty in 2019 is significantly less than the percentage of children in poverty in 2018.

Standard Errors of Estimated Ratios. Certain estimates may be calculated as the ratio of two numbers. Compute the standard error of a ratio, x/y , using

$$s_{x/y} = \frac{x}{y} \sqrt{\left(\frac{s_x}{x}\right)^2 + \left(\frac{s_y}{y}\right)^2 - 2r \frac{s_x s_y}{xy}} \tag{5}$$

The standard error of the numerator, s_x , and that of the denominator, s_y , may be calculated using formulas described earlier. In Formula (5), r represents the correlation between the numerator and the denominator of the estimate.

For one type of ratio, the denominator is a count of families or households and the numerator is a count of people in those families or households with a certain characteristic. If there is at least one person with the characteristic in every family or household, use 0.7 as an estimate of r . An example of this type is the average number of children per family with children.

For all other types of ratios, r is assumed to be zero. Examples are the average number of children per family and the family poverty rate. If r is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error of the ratio.

Note: For estimates expressed as the ratio of x per 100 y or x per 1,000 y , multiply Formula (5) by 100 or 1,000, respectively, to obtain the standard error.

Illustration 6

Suppose there were 11,328,000 males working part-time and 17,534,000 females working part-time. The ratio of males working part-time to females working part-time would be 0.646, or 64.6 percent. Table 9 shows how to use the appropriate parameters from Table 18 and Formulas (2) and (5) with $r = 0$ to estimate the standard errors and confidence intervals.

Table 9. Illustration of Standard Errors of Estimated Ratios

	Males (x)	Females (y)	Ratio
Number who work part-time	11,328,000	17,534,000	0.646
a-parameter (a)	-0.000031	-0.000028	-
b-parameter (b)	2,947	2,788	-
Standard error	171,000	201,000	0.012
90-percent confidence interval	11,047,000 to 11,609,000	17,203,000 to 17,865,000	0.626 to 0.666

Source: U.S. Census Bureau, Current Population Survey, March 2020.

The standard error is calculated as

$$s_{x/y} = \frac{11,328,000}{17,534,000} \sqrt{\left(\frac{171,000}{11,328,000}\right)^2 + \left(\frac{201,000}{17,534,000}\right)^2} = 0.012$$

and the 90-percent confidence interval is calculated as $0.646 \pm 1.645 \times 0.012$.

Illustration 7

The report, *Income and Poverty in the United States: 2019*, shows that the number of families below the poverty level, x , was 6,554,000 and the total number of families, y , was 83,698,000. The ratio of families below the poverty level to the total number of families would be 0.078 or 7.8 percent. Table 10 shows how to use the appropriate parameters from Table 19 and Formulas (2) and (5) with $r = 0$ to estimate the standard errors and confidence intervals.

Table 10. Second Illustration of Standard Errors of Estimated Ratios

	In poverty (x)	Total (y)	Ratio (in percent)
Number of families	6,554,000	83,698,000	7.8
a-parameter (a)	0.000103	-0.000009	-
b-parameter (b)	5,529	3,238	-
Standard error	202,000	456,000	0.24
90-percent confidence interval	6,222,000 to 6,886,000	82,948,000 to 84,448,000	7.4 to 8.2

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_{x/y} = \frac{6,554,000}{83,698,000} \sqrt{\left(\frac{202,000}{6,554,000}\right)^2 + \left(\frac{456,000}{83,698,000}\right)^2} = 0.0024 = 0.24\%$$

and the 90-percent confidence interval of the percentage is calculated as $7.8 \pm 1.645 \times 0.24$.

Standard Errors of Estimated Medians. The sampling variability of an estimated median depends on the form of the distribution and the size of the base. One can approximate the reliability of an estimated median by determining a confidence interval about it. (See “Standard Errors and Their Use” for a general discussion of confidence intervals.)

Estimate the 68-percent confidence limits of a median based on sample data using the following procedure:

1. Using Formula (3) and the base of the distribution, calculate the standard error of 50 percent.
2. Add to and subtract from 50 percent the standard error determined in step 1. These two numbers are the percentage limits corresponding to the 68-percent confidence interval about the estimated median.
3. Using the distribution of the characteristic, determine upper and lower limits of the 68-percent confidence interval by calculating values corresponding to the two points established in step 2.

Note: The percentage limits found in step 2 may or may not fall in the same characteristic distribution interval.

Use the following formula to calculate the upper and lower limits:

$$X_p = \frac{pN - N_1}{N_2 - N_1} (A_2 - A_1) + A_1 \tag{6}$$

where

X_p = estimated upper and lower bounds for the confidence interval ($0 \leq p \leq 1$). For purposes of calculating the confidence interval, p takes on the values determined in step 2. Note that X_p estimates the median when $p = 0.50$.

N = for distribution of numbers: the total number of units (people, households, etc.) for the characteristic in the distribution.

= for distribution of percentages: the value 100.

p = the values obtained in Step 2.

A_1, A_2 = the lower and upper bounds, respectively, of the interval containing X_p .

N_1, N_2 = for distribution of numbers: the estimated number of units (people, households, etc.) with values of the characteristic less than or equal to A_1 and A_2 , respectively.

= for distribution of percentages: the estimated percentage of units (people, households, etc.) having values of the characteristic less than or equal to A_1 and A_2 , respectively.

4. Divide the difference between the two points determined in step 3 by 2 to obtain the standard error of the median.

Note: Median incomes and their standard errors calculated as below may differ from those in published tables and reports showing income, since narrower income intervals were used in those calculations.

Illustration 8

The report, *Income and Poverty in the United States: 2019*, shows that there were 128,451,000 households, and their income was distributed as shown in Table 11.

Table 11. Distribution of Household Income for Illustration 8

Income level	Number of households	Cumulative number of households	Cumulative percent of households
Under \$5,000	3,821,000	3,821,000	2.97%
\$5,000 to \$9,999	2,833,000	6,654,000	5.18%
\$10,000 to \$14,999	5,003,000	11,657,000	9.08%
\$15,000 to \$24,999	10,287,000	21,944,000	17.08%
\$25,000 to \$34,999	10,828,000	32,772,000	25.51%
\$35,000 to \$49,999	14,980,000	47,752,000	37.18%
\$50,000 to \$74,999	21,057,000	68,809,000	53.57%
\$75,000 to \$99,999	15,923,000	84,732,000	65.96%
\$100,000 and over	43,719,000	128,451,000*	100.00%*

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

*There may be a difference due to rounding.

- Using Formula (3) with $b = 3,938$, the standard error of 50 percent on a base of 128,451,000 is about 0.28 percent.
- To obtain a 68-percent confidence interval on an estimated median, add to and subtract from 50 percent the standard error found in step 1. This yields percentage limits of 49.72 and 50.28.
- The lower and upper limits for the interval in which the percentage limits falls are \$50,000 and \$75,000, respectively.

Then the estimated numbers of households with an income less than or equal to \$50,000 and \$75,000 are 47,752,000 and 68,809,000, respectively.

Using Formula (6), the lower limit for the confidence interval of the median is found to be about

$$X_{0.4972} = \frac{0.4972 \times 128,451,000 - 47,752,000}{68,809,000 - 47,752,000} (75,000 - 50,000) + 50,000 = 69,131$$

Similarly, the upper limit is found to be about

$$X_{0.5028} = \frac{0.5028 \times 128,451,000 - 47,752,000}{68,809,000 - 47,752,000} (75,000 - 50,000) + 50,000 = 69,985$$

Thus, a 68-percent confidence interval for the median income for households is from \$69,131 to \$69,985.

- The standard error of the median is, therefore,

$$\frac{69,985 - 69,131}{2} = 427.0$$

Standard Errors of Averages for Grouped Data. The formula used to estimate the standard error of an average for grouped data is

$$s_{\bar{x}} = \sqrt{\frac{b}{y}(S^2)} \quad (7)$$

In this formula, y is the size of the base of the distribution and b is the parameter from Table 4 or 5. The variance, S^2 , is given by the following formula:

$$S^2 = \sum_{i=1}^c p_i \bar{x}_i^2 - \bar{x}^2 \quad (8)$$

where \bar{x} , the average of the distribution, is estimated by

$$\bar{x} = \sum_{i=1}^c p_i \bar{x}_i \quad (9)$$

where

c = the number of groups; i indicates a specific group, thus taking on values 1 through c .

p_i = estimated proportion of households, families, or people whose values for the characteristic being considered fall in group i .

\bar{x}_i = $(Z_{Li} + Z_{Ui})/2$ where Z_{Li} and Z_{Ui} are the lower and upper interval boundaries, respectively, for group i . \bar{x}_i is assumed to be the most representative value for the characteristic of households, families, or people in group i . If group c is open-ended, i.e., no upper interval boundary exists, use a group approximate average value of

$$\bar{x}_c = \frac{3}{2} Z_{L_c} \quad (10)$$

Illustration 9

The report, *Income and Poverty in the United States: 2019*, shows that there were 6,554,000 families in poverty. Table 12 shows the distribution of the income deficit (the difference between their family income and poverty threshold) for all families in poverty.

Table 12. Distribution of Income Deficit for Illustration 9

Income deficit	Number of families in poverty	Percentage of families in poverty (p_i)	Average income deficit (\bar{x}_i)
Under \$1000	468,000	7.1%	500
\$1000 to \$2,499	514,000	7.8%	1,750
\$2,500 to \$4,999	899,000	13.7%	3,750
\$5,000 to \$7,499	805,000	12.3%	6,250
\$7,500 to \$9,999	760,000	11.6%	8,750
\$10,000 to \$12,499	589,000	9.0%	11,250
\$12,500 to \$14,999	528,000	8.1%	13,750
\$15,000 and over	1,991,000	30.4%	22,500
Total	6,554,000*	100%*	

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

*There may be a difference due to rounding.

Using Formula (9),

$$\bar{x} = (0.071 \times 500) + (0.078 \times 1,750) + (0.137 \times 3,750) + (0.123 \times 6,250) + (0.116 \times 8,750) + (0.090 \times 11,250) + (0.081 \times 13,750) + (0.304 \times 22,500) = 11,436$$

and Formula (8),

$$S^2 = (0.071 \times 500^2) + (0.078 \times 1,750^2) + (0.137 \times 3,750^2) + (0.123 \times 6,250^2) + (0.116 \times 8,750^2) + (0.090 \times 11,250^2) + (0.081 \times 13,750^2) + (0.304 \times 22,500^2) - 11,436^2 = 65,692,000$$

Table 13 shows how to use the appropriate parameter from Table 19 and Formula (7) to estimate the standard error and confidence interval.

Table 13. Illustration of Standard Errors of Averages for Grouped Data

Average income deficit for families in poverty (\bar{x})	\$11,436
Variance (S^2)	65,692,000
Base (y)	6,554,000
b-parameter (b)	5,529
Standard error	\$235
90-percent confidence interval	\$11,049 to \$11,823

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_{\bar{x}} = \sqrt{\frac{5,529}{6,554,000} (65,692,000)} = 235$$

and the 90-percent confidence interval is calculated as $\$11,436 \pm 1.645 \times \235 .

Standard Errors of Estimated Per Capita Deficits. Certain average values in reports associated with the CPS ASEC data represent the per capita deficit for households of a certain class. The average per capita deficit is approximately equal to

$$x = \frac{hm}{p} \tag{11}$$

where

h = number of households in the class.

m = average deficit for households in the class.

p = number of people in households in the class.

x = average per capita deficit of people in households in the class.

To approximate standard errors for these averages, use the formula

$$s_x = \frac{hm}{p} \sqrt{\left(\frac{s_m}{m}\right)^2 + \left(\frac{s_p}{p}\right)^2 + \left(\frac{s_h}{h}\right)^2 - 2r \left(\frac{s_p}{p}\right) \left(\frac{s_h}{h}\right)} \tag{12}$$

In Formula (12), r represents the correlation between p and h .

For one type of average, the class represents households containing a fixed number of people. For example, h could be the number of 3-person households. In this case, there is an exact correlation between the number of people in households and the number of households. Therefore, $r = 1$ for such households. For other types of averages, the class represents households of other demographic types, for example, households in distinct regions, households in which the householder is of a certain age group, and owner-occupied and tenant-occupied households. In this and other cases in which the correlation between p and h is not perfect, use 0.7 as an estimate of r .

Illustration 10

The report, *Income and Poverty in the United States: 2019*, shows that there were 22,431,000 people living in families in poverty, and 6,554,000 families in poverty, with an average deficit income for families in poverty of \$11,436 with a standard error of \$235 (from Illustration 9). Table 14 shows how to use Formulas (2), (11), and (12) and the appropriate parameters from Table 19 and $r = 0.7$ to estimate the standard errors and confidence intervals.

Table 14. Illustration of Standard Errors of Estimated Medians

	Number (<i>h</i>)	Number of people (<i>p</i>)	Average income deficit (<i>m</i>)	Average per capita deficit (<i>x</i>)
Value for families in poverty	6,554,000	22,431,000	\$11,436	\$3,341
a-parameter (<i>a</i>)	0.000103	-0.000113	-	-
b-parameter (<i>b</i>)	5,529	3,838	-	-
Correlation (<i>r</i>)	-	-	-	0.7
Standard error	202,000	171,000	\$235	\$111
90-percent confidence interval	6,222,000 to 6,886,000	22,150,000 to 22,712,000	\$11,049 to \$11,823	\$3,158 to \$3,524

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

The estimate of the average per capita deficit is calculated as

$$x = \frac{6,554,000 \times 11,436}{22,431,000} = 3,341$$

and the standard error is calculated as

$$s_x = \frac{6,554,000 \times 11,436}{22,431,000} \sqrt{\left(\frac{235}{11,436}\right)^2 + \left(\frac{171,000}{22,431,000}\right)^2 + \left(\frac{202,000}{6,554,000}\right)^2 - 2 \times 0.7 \times \left(\frac{171,000}{22,431,000}\right) \times \left(\frac{202,000}{6,554,000}\right)}$$

$$= 111$$

The 90-percent confidence interval is calculated as \$3,341 ± 1.645 × \$111.

Accuracy of State Estimates. The redesign of the CPS following the 1980 census provided an opportunity to increase efficiency and accuracy of state data. All strata are now defined within state boundaries. The sample is allocated among the states to produce state and national estimates with the required accuracy while keeping total sample size to a minimum. Improved accuracy of state data was achieved with about the same sample size as in the 1970 design.

Since the CPS is designed to produce both state and national estimates, the proportion of the total population sampled and the sampling rates differ among the states. In general, the smaller the population of the state the larger the sampling proportion. For example, in Vermont, approximately 1 in every 250 households is sampled each month. In New York, the sample is about 1 in every 2,000 households. Nevertheless, the size of the sample in New York is four times larger than in Vermont because New York has a larger population.

Note: The Census Bureau recommends the use of 3-year averages to compare estimates across states and 2-year averages to evaluate changes in state income and poverty estimates over time. See “Standard Errors of Data for Combined Years.” Further, the *Income and Poverty in the United States* report no longer presents state estimates. Therefore, the Census Bureau recommends the American Community Survey (ACS) microdata file as the preferred source for income and poverty state

data in years 2006 (2005 estimates) to the present. A questionnaire redesign introduced with the 2014 CPS ASEC and an updated processing system introduced with the 2019 CPS ASEC each mark the start of new time series for health insurance estimates in the CPS ASEC, so data users should not create multiyear averages across these years.

Standard Errors of State Estimates. The standard error for a state may be obtained by determining new state-level a- and b-parameters and then using these adjusted parameters in the standard error formulas mentioned previously. To determine a new state-level b-parameter (b_{state}), multiply the b-parameter from Table 18 or 19 by the state factor from Table 23. To determine a new state-level a-parameter (a_{state}), use the following:

- (1) If the a-parameter from Table 18 or 19 is positive, multiply it by the state factor from Table 23.
- (2) If the a-parameter in Table 18 or 19 is negative, calculate the new state-level a-parameter as follows:

$$a_{state} = \frac{-b_{state}}{POP_{state}} \quad (13)$$

where POP_{state} is the state population found in Table 23.

Illustration 11

Suppose there were 14,201,000 people living in New York state who were born in the United States. Table 15 shows how to use Formulas (2) and (13) and the appropriate parameter, factor, and population from Tables 19 and 23 to estimate the standard error and confidence interval.

Table 15. Illustration of Standard Errors of State Estimates

Number of people in New York born in the U.S. (x)	14,201,000
b-parameter (b)	2,808
New York state factor	1.19
State population	19,173,378
State b-parameter (b_{state})	3,342
State a-parameter (a_{state})	-0.000174
Standard error	111,000
90-percent confidence interval	14,018,000 to 14,384,000

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

Obtain the state-level b-parameter by multiplying the b-parameter, 2,808 by the state factor, 1.19. This gives $b_{state} = 2,808 \times 1.19 = 3,342$. Obtain the needed state-level a-parameter by

$$a_{state} = \frac{-3,342}{19,173,378} = -0.000174$$

The standard error of the estimate of the number of people in New York state who were born in the United States can then be found by using Formula (2) and the new state-level a - and b - parameters, -0.000174 and 3,342, respectively. The standard error is given by

$$s_x = \sqrt{-0.000174 \times 14,201,000^2 + 3,342 \times 14,201,000}$$

which, rounded to the nearest thousand, is 111,000.

Standard Errors of Regional Estimates. To compute standard errors for regional estimates, follow the steps for computing standard errors for state estimates found in “Standard Errors for State Estimates” using the regional factors and populations found in Table 24.

Illustration 12

The report, *Income and Poverty in the United States: 2019*, shows that there were 14,845,000 of 124,032,005 people, or 12.0 percent, living in poverty in the South. Table 16 shows how to use Formulas (3) and (13) and the appropriate parameter, factor, and population from Tables 19 and 24 to estimate the standard error and confidence interval.

Table 16. Illustration of Standard Errors of Regional Estimates

Poverty rate in the South (p)	12.0
Base (y)	124,032,005
b-parameter (b)	3,838
South regional factor	1.13
Regional b-parameter (b_{region})	4,337
Standard error	0.19
90-percent confidence interval	11.7 to 12.3

Source: U.S. Census Bureau, Current Population Survey, 2020 Annual Social and Economic Supplement.

Obtain the region-level b-parameter by multiplying the b-parameter, 3,838, by the South regional factor, 1.13. This gives $b_{region} = 3,838 \times 1.13 = 4,337$

The standard error of the estimate of the poverty rate for people living in the South can then be found by using Formula (3) and the new region-level b-parameter, 4,337. The standard error is given by

$$s_{y,p} = \sqrt{\frac{4,337}{124,032,005} \times 12.0 \times (100 - 12.0)} = 0.19$$

and the 90-percent confidence interval of the poverty rate for people living in the South is calculated as $12.0 \pm 1.645 \times 0.19$.

Standard Errors of Groups of States. The standard error calculation for a group of states is similar to the standard error calculation for a single state. First, calculate a new state SOURCE & ACCURACY

group factor for the group of states. Then, determine new state group a- and b-parameters. Finally, use these adjusted parameters in the standard error formulas mentioned previously.

Use the following formula to determine a new state group factor:

$$\text{state group factor} = \frac{\sum_{i=1}^n \text{POP}_i \times \text{state factor}_i}{\sum_{i=1}^n \text{POP}_i} \quad (14)$$

where POP_i and state factor_i are the population and factor for state i from Table 23. To obtain a new state group b-parameter ($b_{\text{state group}}$), multiply the b-parameter from Table 18 or 19 by the state group factor obtained by Formula (14). To determine a new state group a-parameter ($a_{\text{state group}}$), use the following:

- (1) If the a-parameter from Table 18 or 19 is positive, multiply it by the state group factor determined by Formula (14).
- (2) If the a-parameter in Table 18 or 19 is negative, calculate the new state group a-parameter as follows:

$$a_{\text{state group}} = \frac{-b_{\text{state group}}}{\sum_{i=1}^n \text{POP}_i} \quad (15)$$

Illustration 13

Suppose the state group factor for the state group Illinois-Indiana-Michigan was required. The appropriate factor would be

$$\text{state group factor} = \frac{12,451,406 \times 1.17 + 6,657,419 \times 1.11 + 9,883,888 \times 1.11}{12,451,406 + 6,657,419 + 9,883,888} = 1.14$$

Standard Errors of Data for Combined Years. Sometimes estimates for multiple years are combined to improve precision. For example, suppose \bar{x} is an average derived from n

consecutive years' data, i.e., $\bar{x} = \sum_{i=1}^n \frac{x_i}{n}$, where the x_i are the estimates for the individual

years. Use the formulas described previously to estimate the standard error, s_{x_i} , of each year's estimate. Then the standard error of \bar{x} is

$$s_{\bar{x}} = \frac{s_x}{n} \quad (16)$$

where

$$s_x = \sqrt{\sum_{i=1}^n s_{x_i}^2 + 2r \sum_{i=1}^{n-1} s_{x_i} s_{x_{i+1}}} \quad (17)$$

and s_{x_i} are the standard errors of the estimates x_i . Tables 20 and 21 contain the correlation coefficients, r , for the correlation between consecutive years i and $i+1$. Correlation between nonconsecutive years is zero. The correlations were derived for income, poverty, and health insurance estimates, but they can be used for other types of estimates where the year-to-year correlation between identical households is high.

The Census Bureau recommends the use of 3-year average estimates for certain small population subgroups¹⁷ (see also “Accuracy of State Estimates.”) Two-year moving averages are recommended for these small population subgroups for comparisons across adjacent years.

Illustration 14

The report, *Income and Poverty in the United States: 2019*, provides the percentages of families in poverty. Suppose the 2017-2019¹⁸ 3-year average percentage of families with female householder, no husband present, in poverty was 24.4. Suppose the percentages and bases for 2017, 2018, and 2019 were 26.2, 24.9, and 22.2 percent and 15,305,000, 15,052,000, and 14,838,000 respectively. Table 17 shows how to use the appropriate parameters and correlation coefficients from Tables 19 and 21 and Formulas (3), (16), and (17) to estimate the standard error and confidence interval.

Table 17. Illustration of Standard Errors of Data for Combined Years

	2017	2018	2019	2017-2019 Average
Percentage of families with female householder, no husband present, in poverty (p)	26.2	24.9	22.2	24.4
Base (y)	15,305,000	15,052,000	14,838,000	-
b-parameter (b)	1,518 ^A	3,631 ^B	5,529	-
Correlation (r)	-	-	-	0.35
Standard error	0.44	0.67	0.80	0.46
90-percent confidence interval	25.5 to 26.9	23.8 to 26.0	20.9 to 23.5	23.6 to 25.2

Source: U.S. Census Bureau, Current Population Survey, 2018-2020 Annual Social and Economic Supplement.

^A This value comes from the Source and Accuracy Statement for the 2018 Annual Social and Economic Supplement, Appendix G, Table 19 in U.S. Census Bureau (2018). For additional information, see the “Year-to-Year Factors” section.

^B This value comes from the Source and Accuracy Statement for the 2019 Annual Social and Economic Supplement, Appendix G, Table 19 in U.S. Census Bureau (2019d). For additional information, see the “Year-to-Year Factors” section.

¹⁷ Estimates of characteristics of the American Indian and Alaska Native (AIAN) and Native Hawaiian and Other Pacific Islander (NHOPI) populations based on a single-year sample would be unreliable due to the small size of the sample that can be drawn from either population. Accordingly, such estimates are based on multiyear averages.

¹⁸ The estimates for data year 2017 come from the CPS ASEC 2018 Bridge Files, and the estimates for data year 2018 come from the 2019 CPS ASEC Files.

The standard error of the 3-year average is calculated as

$$s_{\bar{x}} = \frac{1.37}{3} = 0.46$$

where

$$s_x = \sqrt{0.44^2 + 0.67^2 + 0.80^2 + (2 \times 0.35 \times 0.44 \times 0.67) + (2 \times 0.35 \times 0.67 \times 0.80)} = 1.37$$

The 90-percent confidence interval for the 3-year average percentage of families with a female householder, no husband present, in poverty is $24.4 \pm 1.645 \times 0.46$.

Standard Errors of Quarterly or Yearly Averages. For information on calculating standard errors for labor force data from the CPS which involve quarterly or yearly averages, please see Bureau of Labor Statistics (2006).

Year-to-Year Factors. In past years, the Census Bureau published a table of year factors for the CPS ASEC Supplement in the Source and Accuracy Statement. User demand for these factors has diminished with the introduction of replicate weights. Data users producing estimates from prior years should consult the Source and Accuracy Statements covering the years of their analysis to estimate standard errors.

Technical Assistance. If you require assistance or additional information, please contact the Demographic Statistical Methods Division via e-mail at dsmd.source.and.accuracy@census.gov.

Source: U.S. Census Bureau, Internal Current Population Survey data files for the 2010 Design.

Notes: These parameters are to be applied to basic CPS monthly labor force estimates. The Total or White, Black, and Asian, AIAN, NHOPI parameters are to be used for both alone and in combination race group estimates. For same-sex households, multiply the a- and b-parameters by 1.3. For nonmetropolitan characteristics, multiply the a- and b-parameters by 1.5. If the characteristic of interest is total state population, not subtotaed by race or ethnicity, the a- and b-parameters are zero. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Hispanic, and Asian, AIAN, NHOPI parameters. For the groups self-classified as having two or more races, use the Asian, AIAN, NHOPI parameters for all employment characteristics.

Source: U.S. Census Bureau, Current Population Survey, Internal data from the 2020 Annual Social and Economic Supplement.

^A AIAN is American Indian and Alaska Native, and NHOPI is Native Hawaiian and Other Pacific Islander.

^B Hispanics may be any race.

Notes: These parameters are to be applied to the 2020 Annual Social and Economic Supplement data. The Total or White, Black, and Asian, AIAN, NHOPI parameters are to be used for both alone and in combination race group estimates. For same-sex households, multiply the a- and b-parameters by 1.3. For nonmetropolitan characteristics, multiply the a- and b-parameters by 1.5. If the characteristic of interest is total state population, not subtotaled by race or ethnicity, the a- and b-parameters are zero. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Asian, AIAN, NHOPI, and Hispanic parameters. For the group self-classified as having two or more races, use the Asian, AIAN, NHOPI parameters for all characteristics except employment, unemployment, and educational attainment, in which case use Black parameters. For a more detailed discussion on the use of parameters for race and ethnicity, please see the “Generalized Variance Parameters” section.

Table 20. Current Population Survey Year-to-Year Correlation Coefficients for Income and Health Insurance Characteristics: Data Years 1960 to 2019

Characteristics	1960-2000 (basic) or 2000 (expanded)-2019		1999 (basic)- 2000 (expanded)	
	People	Families	People	Families
Total	0.30	0.35	0.19	0.22
White	0.30	0.35	0.20	0.23
Black	0.30	0.35	0.15	0.18
Other	0.30	0.35	0.15	0.17
Hispanic ^A	0.45	0.55	0.36	0.28

Source: U.S. Census Bureau, Current Population Survey, Internal data files.

^A Hispanics may be any race.

Notes: Correlation coefficients are not available for income data before 1960. These correlation coefficients are for comparisons of consecutive years. For comparisons of nonconsecutive years, assume the correlation is zero. For households and unrelated individuals, use the correlation coefficient for families. For a more detailed discussion on the use of parameters for race and ethnicity, please see the “Generalized Variance Parameters” section.

^A Hispanics may be any race.

Notes: Correlation coefficients are not available for poverty data before 1970. These correlation coefficients are for comparisons of consecutive years. For comparisons of nonconsecutive years, assume the correlation is zero. For households and unrelated individuals, use the correlation coefficient for families. For a more detailed discussion on the use of parameters for race and ethnicity, please see the “Generalized Variance Parameters” section.

Table 22. Current Population Survey Correlation Coefficients Between Race and Subgroups: 2020 Annual Social and Economic Supplement

Race 1 (subgroup)	Race 2	<i>r</i>
White alone, not Hispanic	White alone	0.82
White alone, not Hispanic	White alone or in combination, not Hispanic	0.98
Black alone	Black alone or in combination	0.95
Asian alone	Asian alone or in combination	0.92

APPENDIX I

HISTORICAL FILE INFORMATION

Initial releases

A public use edition of the Current Population Survey, ASEC file, formerly known as the March file were originally available for 1976, 1978, and 1979. For 1980, 1984, and 1988 two files were available for each year. The first 1980 file contains estimates based on 1970 population counts and should be used for historical comparisons ending in 1980. The reweighted 1980 file contains estimates based on results of the 1980 census and should be used for comparisons between 1981 and 1984.

1980s

In 1984, the Bureau of the Census introduced a step into the second stage weighting procedure to control individual weights to independent estimates of the Hispanic population. Since this introduction caused a major disruption in the Hispanic estimates, two data files were created. The first file, without the Hispanic controls should be used for comparing estimates for years prior to 1984 and the second file should be used for comparison with 1985 and later files.

From March 1989 forward, March data are processed using the rewrite system. The rewrite system includes revised procedures to match supplement records to basic CPS records; revised weighting procedures; revised demographic and family edits; revised imputation procedures; and more income detail on the file.

For March 1988, there are two files: the regular Annual Demographic File and the Annual Demographic Rewrite File. The rewrite file has been prepared to allow historical comparison of data from the rewrite processing system implemented between 1988 and 1989. It is recommended that the rewrite file be used when comparing data collected from the March Annual Demographic Supplement from 1988 forward. Use the regular file, released in 1988, when comparing data from 1988 and prior years.

This is not to say, however, that comparisons cannot be made between years before and after 1988. When such analyses are done, for example between 1986 through 1989, data users must consider that similarities or differences between the data may be caused or effected by

the rewritten system. Thus, comparing estimates from the 1988 rewrite files and the 1988 regular file will reveal the extent of any differences caused by the processing system changes though not the specific change. The magnitude of the difference can then be applied to the estimates from 1986 and 1989 to reveal whether any real differences exist. There were several revisions made to the processing programs; therefore, it is difficult to determine which specific revision effected the differences or similarities in the data.

Some non-March data also are available from 1994 to present. For information about the Current Population Survey and Supplement Surveys, be sure to visit our online CPS home page at <https://www.census.gov/programs-surveys/cps.html> where you can search our knowledge base and submit questions.

2010s

In 2014, the Current Population Survey Annual Social and Economic Supplement (CPS ASEC) included redesigned questions for income and health insurance coverage, followed by changes being phased in beginning in 2015 to allow spouses and unmarried partners to specifically identify as opposite- or same-sex. While data from the updated collection methods were released on schedule, data processing changes to take advantage of the new content were available starting with the 2019 file.

In 2019, a redesigned processing system for the ASEC supplement was implemented. This new processing system had updates concerning three topics, same-sex/opposite-sex families, income & poverty, and health insurance.

First, the relationship to householder measure (PERRP) divides spouse and unmarried categories into opposite-sex and same-sex groups (i.e., opposite-sex spouse/husband/wife, same-sex spouse/husband/wife, opposite-sex unmarried partner, and same-sex unmarried partner). Second, the parent identification variables have changed from respondents identifying a mother and father in the household

(PELNMOM, PELNDAD) to identifying a parent and another parent (PEPAR1, PEPAR2). This allows easy reporting of children living with two mothers or two fathers.

For income and poverty, the updated processing system includes edits to take full advantage of the redesigned questionnaire. For example, several variables were added for defined-benefit pension income and defined-contribution withdrawals (such as from 401(k) plans) to replace the previous variables on retirement income. The imputation system was updated to make use of income ranges provided by some non-respondents as well as to increase the number of characteristics used in the imputation models.

The updated processing system includes a number of changes to CPS ASEC health insurance data that better integrate detailed

information from the 2014 questionnaire redesign. For example, the processing system introduces a new method of estimating coverage that builds from subannual estimates to determine whether a person was covered at any point in the previous calendar year. It also refines the methods by which missing and incomplete data are imputed and in which inconsistent information is handled. Finally, the file also includes additional information about types of coverage held at the time of survey and details about Marketplace coverage that were not previously available.

A more detailed explanation of these processing changes can be found in the blog “RESEARCH MATTERS: CPS ASEC Redesign and Processing Changes” at <https://www.census.gov/newsroom/blogs/research-matters/2019/09/cps-asec.html>.
