

Simple, Affordable Electric Fleets

Highland Electric Fleets removes the cost and complexity of electrification and guarantees you'll pay less for electric buses than you currently pay to own, operate, and maintain your diesel buses.

For a fixed annual fee, we provide the vehicles, upgrade your infrastructure, train your team, pay for electricity, manage your charging, reimburse for maintenance, and guarantee a successful electric fleet.

Why Work with Highland?

Simplicity

We plan, implement, and optimize your electric fleet so you can focus on what you do best.

Grant assistance

Our experts help you navigate the funding landscape to make your upgraded fleet affordable.

Performance guarantee

It's simple: Your buses will be charged & route-ready every school day – if not, we pay for the downtime.

“Making the switch to electric buses is good for kids, and it’s good for your community.”

Tim Shannon, Transportation Director, Twin Rivers School District, CA

1st use of electric school buses in a commercial vehicle-to-grid project in the United States

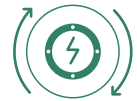

\$253 million raised for electrification projects

10 MWh returned to the electric grid in Massachusetts over the summers of 2021 and 2022

500+ electric school buses under contract across North America

99% bus and charger uptime
