

# Miriam STRICKER

Miriam is from Germany. She finished her Bachelor in Physics two days before the Summer Student Programme at the University of Heidelberg – Germany.

During her summer at CERN, Miriam has been working in the Solid State Detectors Lab (PH-DT-DD). Her project has focused on building a TSC-Setup (Thermally Stimulated Current) for the SSD-Lab, which will be used to determine radiation damage in silicon detectors.

After her internship at CERN Miriam will do a Master's Degree in Physics.
