

Elizabeth DRUEKE

My name is Elizabeth Drueke and I am from the United States. I am currently studying advanced mathematics and physics at Michigan State University. This summer I have been working with the CMS top group, although I work with the MSU ATLAS group during the rest of the year.

My project this summer has been an analysis of the top mass using an innovative new approach aimed at reducing uncertainties which are inherent in other top mass measurements. After this, I will be graduating with two bachelors degrees in May and I aim to go to graduate school to get a Ph.D. in experimental high energy physics next year. Eventually, I would like to be a professor.
