

Shahriyar JAFARZADE

Shahriyar is from Azerbaijan. He is a Postgraduate student on Theoretical High Energy Physics and Cosmology at the University of ICTP (Trieste, Italy).

This summer Shahriyar has been working in the CMS Experiment (PH-UCM) and his project has focused on the study of new variables for the search of the Higgs boson coupled to top quarks in the multi-lepton final state. Checking the signed IP.

After his internship at CERN Shahriyar is planning to research on theoretical high energy physics and cosmology but mostly related to the experimental part.
