CONTENTS

INTRODUCTION 1

1. WHAT IS ROUGHNESS? 3

1.A Scratches and Digs 3

1.B Polishing Marks and Microirregularities 5

1.C Machining Marks and Grating Grooves 5

1.D Dust Particles and Particulates 6

2. HOW DO WE SEE ROUGHNESS? 7

2.A Observing Light Scattered by the Surface 7

2.B Using a Differential Interference Contrast (Nomarski) Microscope 7

2.C Using Electron Microscopes 10

2.C.1 Transmission Electron Microscope (TEM), 10
2.C.2 Scanning Electron Microscope (SEM), 10
2.C.3 Scanning Transmission Electron Microscope (STEM), 11
2.C.4 Scanning Tunneling Microscope (STM), 11

3. HOW DO WE MEASURE ROUGHNESS? 13

3.A Surface-Profile Measurements 14

3.A.1 Noncontact Methods, 14
3.A.2 Contact Methods, 18

3.B Area Topography Measurements 22

3.C Determining Roughness from Scattering Measurements 24

3.C.1 Total Integrated Scattering (TIS), 24
3.C.2 Angle-Resolved Scattering (ARS), 27
3.C.3 Bidirectional Reflectance Distribution Function (BRDF), 30

3.D Comparison of Methods for Determining Roughness 31

4. SCATTERING THEORIES AND SURFACE STATISTICS **38**

4.A Root-Mean-Square and Average Roughness, and Root-Mean-Square Slope 38

4.A.1 Root-Mean-Square Roughness, 38
4.A.2 Average Roughness and Ten-Point Height, 39
4.A.3 Root-Mean-Square Slope, 39
4.A.4 Statistical Sampling of Surface Roughness, 41

4.B Height and Slope Distribution Functions, Skewness, and Kurtosis 42

4.B.1 Height Distribution Function, 42
4.B.2 Skewness and Kurtosis, 43
4.B.3 Slope Distribution Function, 44

4.C Autocovariance Function, Correlation Length, and Surface Spatial Wavelength 44

4.D Power-Spectral-Density Function 48

4.E Total Integrated Scattering 50

4.F Angle-Resolved Scattering 53

4.G Mie Scattering from Particulates 55

5. STATISTICS FOR SELECTED SURFACES **57**

6. SCATTERING IN THE ULTRAVIOLET AND X-RAY REGIONS **69**

7. SCATTERING IN THE INFRARED **73**

8. CLEANING AND INSPECTION OF SURFACES **75**

PLATES **81**

APPENDIX A. ENGLISH AND METRIC UNITS **89**

APPENDIX B. MEASUREMENT FACILITIES **90**
