## SEAT PAD UPHOLSTERY

The chair with Monotone or Two Tone polypropylene shell, with an upholstered seat pad (permanently) secured to the chair.

# UPHOLSTERY GUIDE

## Full Upholstery

The Classic upholstered chair made from a clear upholstery bucket, with a single fabric cover pulled over the shell and smoothed over foam. The original and classic design is our most popular method of upholstery. Not all fabrics are suitable for upholstery method, so please check with our office before purchasing fabrics you are not familiar with. This method of upholstery is not suitable for Leather, Velvets and other fabrics without stretch, Coated fabrics, Vinyls and other fabrics with bonded backings.

## LUXE UPHOLSTERY

The fully upholstered chair with an additional upholstered seat pad. The seat pad is made up using a timber ply with foam applied, it is then upholstered as required and secured to the chair. The Seat pad has the benefit of extra comfort as well as the appearance of a luxury visitor chair. The additional seat pad allows the buyer the opportunity to mix different colours or different fabric types for a personalised finish. This method of upholstery is necessary for Leather, Velvets and other fabrics without stretch, coated fabrics, Vinyls and other fabrics with bonded backings.
