

## **Your Ideas**

**Social and natural scientists, here is your chance to provide your ideas and suggestions for the Global Sustainable Development Report!** Your inputs will be fully considered in determining key messages and findings of the Report. The aim is to collect a wide range of views from scientists, especially young scientists, representing scientific communities across the world.

There are one or more questions for each chapter of the Report (see Outline, <http://sustainabledevelopment.un.org/content/documents/1737outline.pdf>). You may rate ideas submitted by other scientists and/or add your own ideas. Please try to be specific and concise, as idea inputs are limited to 140 characters each. There is no limit to how many ideas you submit or how many votes you make for ideas.

Please feel free to also send background material, such as academic articles, briefs, and Web links, to [roehrl@un.org](mailto:roehrl@un.org). Thank you for your efforts!

More information on the Global SD Report: <http://sustainabledevelopment.un.org/globalsdreport>

Note: The information presented in the Wikisurveys are user generated and do not necessarily represent the views of the United Nations or its senior management, see disclaimer, <http://www.un.org/en/aboutun/terms/index.shtml>.

### **Chapter I: Introduction**

#### **Chapter II: Assessments for sustainable development**

***Which sustainable development issue should decision-makers consider for action?***

Please provide your inputs here: <http://www.allourideas.org/emergingissues>

***Which sustainable development assessment would you like to bring to the attention of decision-makers?***

Please provide your inputs here: <http://www.allourideas.org/assessments>

***Which message on sustainable development assessments do you prefer for Chapter II?***

Please provide your inputs here: <http://www.allourideas.org/chpt2messages>

#### **Chapter III: Review of progress**

***Which message on global sustainable development progress do you prefer for Chapter III?***

Please provide your inputs here: <http://www.allourideas.org/sustainabledevelopmentprogress>

#### **Chapter IV: Future pathways toward sustainable development**

***What do you think the world will be like in 2050?***

Please provide your inputs here: <http://www.allourideas.org/forecast2050>

***What kind of world would you like to see for yourself, your children and grandchildren in 2050?***

Please provide your inputs here: <http://www.allourideas.org/desiredfuture2050>

### **Chapter V: Making and measuring progress**

***What “means of implementation” are needed more for achieving global sustainable development?  
“Means of implementation” are, for example, finance, technology, trade, and capacity building.***

Please provide your inputs here: <http://www.allourideas.org/means>

***What policies or actions are needed more for achieving global sustainable development?***

Please provide your inputs here: <http://www.allourideas.org/policiesactions>

***What is a more suitable, overall measure of progress toward sustainable development?***

Please provide your inputs here: <http://www.allourideas.org/measuresofprogress>

### **Chapter VI: Special theme: The climate-land-energy-water-development nexus**

***Which message or idea should we include in the Climate-Land-Energy-Water-Development Nexus chapter?***

Please provide your inputs here: <http://www.allourideas.org/clews>

### **Chapter VII: Issues for consideration**

***Which overall finding or policy recommendation should we highlight in the Global Sustainable Development Report?***

***(This question will be opened for inputs as soon as we will have received a significant amount of inputs for chapters I to VI. Please check back later to make your contribution.)***
