

Governance

TOD Governance

Ongoing and regular interagency coordination will be necessary to successfully develop and implement the U²C System and TOD as envisioned by JTA.

JTA can learn from case studies as well as national best practices included in a 2018 Urban Land Institute report:

Downtown Executive Team

Identifies resources, builds budgets, and assigns project responsibilities

Downtown Jacksonville Community Stakeholder Group

Ensures implementation happens in a way that works best for the Jacksonville community and downtown residents

Public Engagement Group

Ensures grassroots public outreach and participation during the process
