Introduction

On 9 July 1998 during the consultation on the second supplement to the Bund-Länder Commission for Educational Planning and Research Promotion (BLK) report on "Promotion of Women in Science", the leaders of the federal and federal states governments requested that in subsequent years the BLK also compile a systematic overview of the statistical data on the proportion of women in leadership positions. The BLK fulfilled this request.

The Joint Science Conference of the Federal and the Federal States (Länder) Governments (GWK), established on 1 January 2008, has now taken over responsibility for updating the data on women in higher education institutions and non-academic research establishments.

This is the 15th update of the data on women in higher education institutions and non-academic research establishments.¹ The dates for the surveys are as follows: 31 Dec. 2009 for the proportion of women at higher education institutions, 31 Dec. 2010 for women in academic appointments at higher education institutions, 31 Dec. 2010 for non-academic establishments, and 31 Dec. 2010 for academic projects.

The first part of this report contains a "weighted overview" of the following data:

- Women at higher education institutions: Overall numbers of first enrolments, final degrees, doctorates, habilitations, and professorships in MINT subjects (subject groups mathematics/natural sciences, engineering) and subject groups languages/humanities, human medicine/health sciences, and art/art history. Figures are also given grouped by pay grade, based on figures from the German Federal Statistical Office for 2009.
- Proportion of women in academic appointments (applications, calls to post, appointments) in 2010, based on a GWK survey of the federal states.
- Proportion of women in academic leadership positions in 2010, based on data from the German Rectors' Conference (HRK).
- Proportion of women on university councils and academic supervisory bodies in 2010, based on information supplied by the Center of Excellence Women and Science (CEWS).
- Proportion of women in non-academic research establishments (proportion of women employed on the scientific staff and proportion of women employed in leadership positions) in 2010, based on a GWK survey of the following research organisations: Fraunhofer Society (FhG), Helmholtz Association of German Research Centers (HGF), Max Planck Society (MPG), Leibniz Association (WGL).
- Total proportion of women in academic projects by salary group and in unsalaried project management teams, subdivided into ongoing projects and newly funded projects (2010)

The second part of this report is an appendix containing comprehensive statistics. The initial years starting with 1992 are summarised with values averaged over five-year blocks.

The data from the German Federal Statistical Office and that derived from the surveys of the federal states provide differentiation down to the subject group level. Further subdivision into individual study/teaching/research areas is not practicable due to the extent of the data.

This publication, "Equal Opportunities in Science and Research", is intended to provide a general overview of a data update.

The Joint Science Conference (GWK) committee adopted this report on 10 May 2011.

Part I

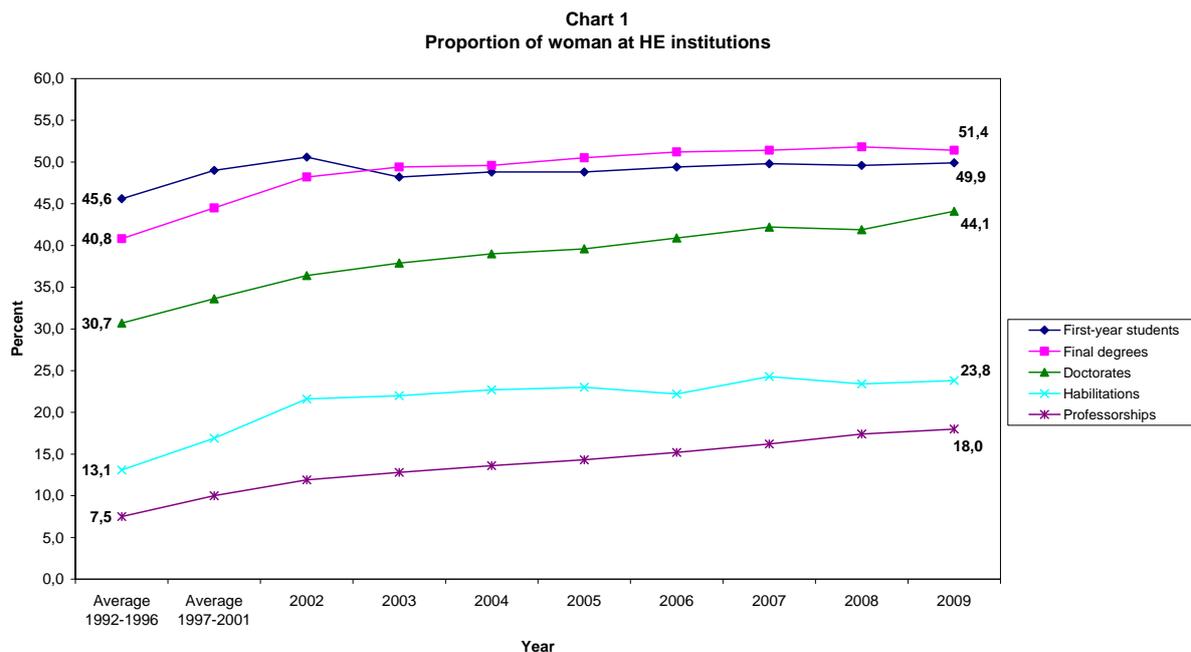

1 Basic Trends

Over the last two decades, the issue of "Equal Opportunities in Science and Research" has been systematically championed on an ongoing basis at both federal and state level by the BLK, with the GWK taking on this mantle in 2008. By persistently pursuing this issue, not only have improvements been seen in the understanding of the status of women and men in research, but it has also been possible in some areas to substantially increase the level of representation of women at various levels of academic qualification, with a particularly positive outcome in terms of the number of women appointed to leadership positions, both at higher education institutions and non-academic research establishments.

In the period considered between 1992 and 2009, the overall proportions of women at higher education institutions have changed as follows:

- First-year students – 45.6% to 49.9%,
- Final degrees – 40.8% to 51.4%,
- Doctorates – 30.7% to 44.1%,
- Habilitations – 13.1% to 23.8% and
- Professorships – 7.5% to 18.0%

(See Chart 1).

1 Basic Trends

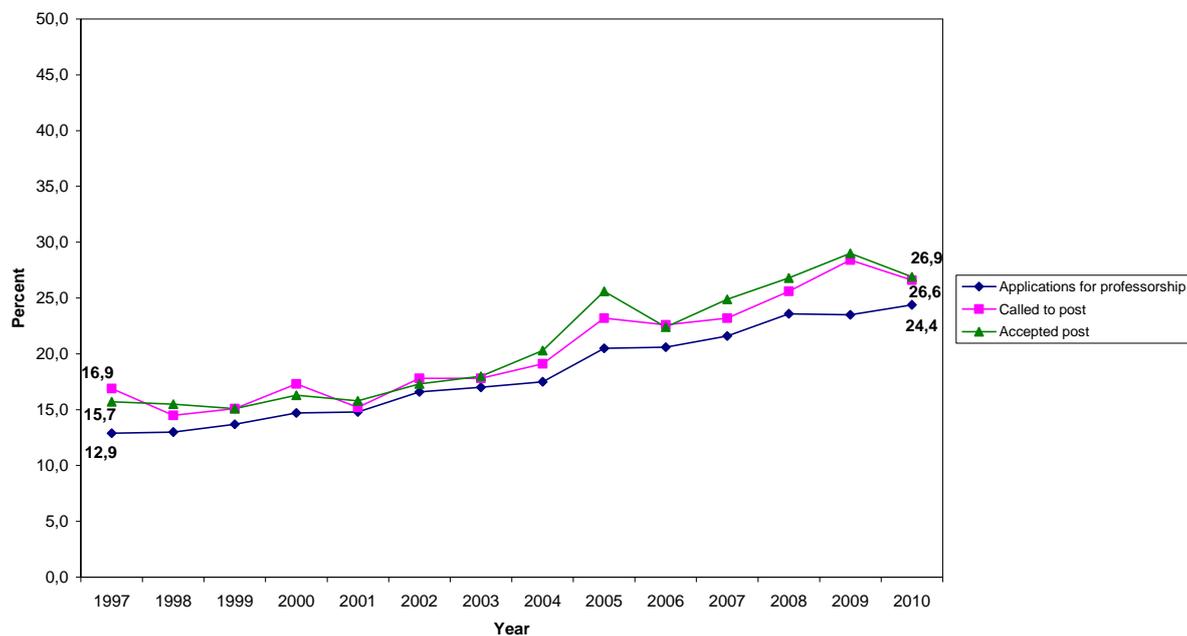

The proportion of women in leadership positions at non-academic establishments (FhG, HGF, MPG, WGL) increased from 2% to 11.3% between 1992 and 2010. However, this proportion is still far lower than that of women at higher education institutions.

Surveys have been carried out since 1997 into the proportion of women obtaining academic appointments. In the period under review, it can be seen that the proportion of women has increased as follows:

- Applications for professorships up from 12.9% to 24.4%,
- Calls to post up from 16.9% to 26.6%,
- Appointments up from 15.7% to 26.9%

(See Chart 2).

Chart 2
Proportion of women in academic appointments

In the period from 1996 (year of the first survey) to 2010, the proportion of academic leadership positions held by women doubled from 9.8% to 20.3%.

The currently collected data shows that the academic and economic potential that female academics represent has not yet been fully realised. Women are still significantly under-represented in high-level positions within the academic system. An increase in female representation in the upper echelons of the academic system depends on increasing the ratio of women at the lower qualification levels within a family-friendly corporate and academic culture, and therefore cannot be achieved as a single dramatic leap. As such, it is essential that special attention continues to be paid to supporting women in research and science, as explicitly stated in the Standards on Gender Equality² adopted by the DFG.

² DFG: Forschungsorientierte Gleichstellungsstandards; decision of the general meeting of 2 July 2008.

2 Weighted Overview of Current Data

2.1 INITIAL SITUATION

The political task of implementing suitable measures to bring about equal opportunities for women and men in all aspects of life is mandated by Article 3 of the German constitution.

A wide range of joint activities have been undertaken by the federal and state governments over the last two decades under the auspices of the Bund-Länder Commission for Educational Planning and Research Promotion (BLK), and since 2008 the Joint Science Conference (GWK), to promote and support the goal of achieving participation in education and science on equal terms for girls and young women. The results seen to date demonstrate a remarkable change in trends in favour of better equality at the various qualification levels in schools, higher education, and non-academic research establishments. The GWK considers equal opportunities and support for women in science and research to be a cross-disciplinary issue.

2.2 HE INSTITUTIONS

2.2.1 PARTICIPATION IN HIGHER EDUCATION

In 2009, a total of 449,435 school leavers of both sexes met the entrance requirements for higher education³ (cf. Table 1.1.3). Of these, 53.1% (238,748) were women. The total number of students entering higher education (first-year students) was 424,273. Female students made up 49.9% or 211,720 of this number. This means that, as in previous years, the proportion of the total number of first-year students remained below 50%. It should be noted that, while the proportion of female students starting courses in 2009 in engineering was 22.2% and in mathematics and natural sciences 40.9%, the number on languages and humanities courses was 74.4% (cf. Tables 1.4.3, 1.3.3, and 1.2.3).

In 2009, a total of 307,435 students graduated from institutions of higher education⁴, 158,170 or 51.4% of whom were female.

³ School leavers gaining "Fachhochschulreife" (advanced vocational training at a technical college leading to technical university entrance qualification), "allgemeine Hochschulreife" (secondary school completion leading to university qualification from non-specialist school) or "Fachhochschulreife, fachgebundene Hochschulreife" (certificate of readiness for higher vocational school from a vocational school).

⁴ Final examinations at higher education institutions, excluding "doctorates", "arts degrees", and "alternative qualifications".

2 Weighted Overview of Current Data

A total 184,278 students earned final degrees at universities and equivalent institutions of higher education⁵, 104,019 or 56.4% of whom were female (*cf. Table 1.1.3*).

In the MINT subjects⁶, the proportion of females among graduating students was 31.4%, of whom 22.8% studied engineering and 40.0% mathematics/natural sciences (*cf. Tables 1.3.3, 1.4.3 and 1.6*). In the languages and humanities subject group, the proportion of women graduates was 76.9%. The proportion of women earning degrees in the subject groups engineering and languages/humanities was higher than the proportion of women who enrolled on the same courses (22.2% and 74.4% respectively, *cf. Tables 1.4.3 and 1.2.3*).

Comparing the number and distribution of final degrees in 2009 to the number of first-year students in previous years, it is clear that the ratio between the proportion of women completing degrees and the proportion of women enrolling on courses has remained almost unchanged in these qualification phases since 2003.

2.2.2 PROPORTION OF DOCTORATES AWARDED TO WOMEN

In 2009 in Germany, 25,084 people were awarded doctorates, 11,067 of whom were women. This corresponds to a proportion of 44.1%. Discounting some minor fluctuations, this represents a continuous increase in the number of women awarded doctorates. Following an increase in the overall number of doctorates by 2,814 in 2005 over the figure for 2004, the total fell slightly in 2006 and 2007, rose by 1,347 in 2008, and fell again slightly by 0.6 percentage points in 2009 (*cf. Table 2.1*). The number of women awarded doctorates rose slightly by 2.2 percentage points from 41.9% in 2008 to 44.1% in 2009.

Compared to the other subject groups, the proportion of women gaining doctorates in the engineering subject group in 2009 is the lowest at 17.1%. It is also worth noting that this proportion is substantially lower than the proportion of women earning final degrees (22.8%, *cf. Table 1.4.3*). In mathematics/natural sciences, the proportion of women being conferred doctorates has risen steadily since 1992, reaching 39.3% in 2009. Women are the recipients of over 50% of the doctorates awarded in veterinary medicine (78.4%), art/art history (62.0%), languages and humanities (54.1%), and human medicine/health sciences (54.9%) (*cf. Table 2.2*).

⁵ Final examinations at higher education institutions that have been granted the right to confer doctorates, excluding "Fachhochschule (university of applied sciences) degrees", "doctorates", "arts degrees", and "alternative qualifications".

⁶ MINT = mathematics, IT, natural sciences, technology. This corresponds to the subject groups mathematics, natural sciences, and engineering in the subject system of the German Federal Statistical Office.

For additional information on the situation for women studying natural sciences and technical subjects, the reader is also referred to the situation assessment in the 2002 BLK report "Frauen in den ingenieur- und naturwissenschaftlichen Studiengängen"⁷, which also includes conclusions and a description of actions required, the GWK report "Frauen in MINT-Fächern – Bilanzierung der Aktivitäten im hochschulischen Bereich", and the Special Evaluation by CEWS on career progression for students of selected natural science and mathematics subjects. The current figures presented here show that the measures provided jointly by the federal and state governments have had the intended effect and led to clearly identifiable improvements.

2.2.3 PROPORTION OF HABILITATIONS AWARDED TO WOMEN

In 2009 in Germany, a total 1,820 people were awarded the habilitation qualification, (2008: 1,800, 2007: 1,881, 2006: 1,993, 2005: 2,001), 433 of whom were women (2008: 422, 2007: 457, 2006: 442, 2005: 460). Despite the introduction of the junior professorship, the proportion gaining the habilitation qualification has remained almost the same, with slight fluctuations. Of the total number awarded the habilitation, women made up 23.8% (2008: 23.4%, 2007: 24.3%, 2006: 22.2%, 2005: 23.0%) (*cf. Table 3.1*).

Across the subject groups, the figures for female participation have a similar distribution to those for doctorates, albeit in lower numbers (the significance of the results is limited due to the small sample size).

- The individual percentages in 2009 were as follows: human medicine/health sciences 20.2% (165 of a total 816 habilitations), art/art history 64.0% (16 of a total 25 habilitations), languages/humanities 41.0% (143 of a total 349 habilitations) (*cf. Table 3.2*).
- The proportion of women gaining habilitations in the engineering subject group in 2009 was 15.2% (10 of a total 66 habilitations), which is 3.1% lower than the previous year (*cf. Table 3.2*).
- The proportion of women in the mathematics/natural sciences subject group in 2009 was 13.9%, or 47 of a total 337 habilitations, which represents a fall on the previous year of 0.6 percentage points (*cf. Table 3.2*).
- In the MINT subjects, the number of women awarded habilitations in 2009 amounted to 57 of a total 403, or 14.1% (*cf. Table 1.6*).

2 Weighted Overview of Current Data

2.2.4 PROPORTION OF FEMALE PROFESSORS (EXISTING POSITIONS)

Taking all pay grades into account, in 1992 a total of 2,246 of the 34,702 professorships at German higher education institutions were held by women, corresponding to 6.5% of the total. Since that time it has been possible to increase the figure steadily, such that by 2009 the number of professorships held by women was 7,162 of the total 39,731, which corresponds to 18.0% (*cf. Table 4.1.2.2*). During the period under review, the proportion of women holding professorships more than doubled, while the average total number of professorships remained unchanged and the total number of professorships held by men fell by around 1,337 in the same period.

The picture for C4/W3 grade professors (professor ordinarius) is similar, with the number of C4/W3 professorships rising slightly from a total of 12,067 in 1992 to 13,200 in 2009. The number of male professors fell slightly in the period studied (1992: 11,609; 2009: 11,405), whereas the number of female professors rose in the same period from 458 (3.8%) in 1992 to 1,795 (13.6%) in 2009 (*cf. Tables 4.1.2.2 and 4.1.3*).

In the field of languages and humanities, the overall number of professorships in 2009 was 5,749, the proportion of women being 31.6% (*cf. Table 4.1.5*). The number of female C4/W3 professors rose to 24.3%.

Human medicine/health sciences also saw a significant increase in not only the overall proportion of women holding professorships, particularly at C4/W3 level, but more significantly a rise in the absolute number of female professors, with women again gaining representation particularly among the C4/W3 professors (*cf. Charts 4.1.8 to 4.1.12 for other subject groups*).

There were only minor differences in the overall proportion of women holding professorships (C2 to C4 and W1 to W3) at the different types of higher education institutions in 2009. At universities and colleges of art the percentage was 18.1%, at universities of applied sciences (excluding public administration colleges) 17.8%, and at public administration colleges 21.0%. The proportion of professorships held by women across all types of higher education institution rose again in 2009 (*cf. Tables 4.1.2 and 4.2.6*).

Differentiating the figures according to pay grade once again revealed significant disparity: the higher the pay grade, the lower the proportion of women. Taking all types of higher education institution together, in 2009 the proportion of women was 37.0% for W1 (junior) professors, 20.7% for C2 (assistant) professors (total for tenured plus fixed term), 19.2% for C3/W2 (associate) professors, and 13.6% for C4/W3 (full) professors (*cf. Table 4.1.2*).

Within the individual pay grades, significant differences between the various types of higher education institutions were also clearly identifiable in 2009:

- At universities and art colleges in 2009, the proportion of women was 21.8% for C2 professors (total for tenured plus fixed term) with almost the same percentage for C3/W2 profes-

sors: 22.2%; and 13.6% for C4/W3 professors. In contrast, women held 37.0% of all W1 (junior) professorships.

- At universities of applied sciences (excluding public administration colleges), the proportion of women in 2009 was 20.1% for C2 professors (total for tenured plus fixed term), which is a common pay grade at universities of applied sciences, 16.8% for C3/W2 professors, and 11.2% for C4/W3 professors.
- At public administration colleges, the proportion of women in 2009 was 28.0% for C2 professors (total for tenured plus fixed term), which is also a common pay grade at public administration colleges, and 16.8% for C3/W2 professors.

Across all types of higher education institution, it can be seen that at all three pay grades the proportion of women again rose compared to the preceding year in practically all areas. This does not, however, correspond to a level of representation commensurate with either the proportion of women in the general population or in the student body.

2.2.5 PROPORTION OF WOMEN IN ACADEMIC APPOINTMENTS 2010 (ONGOING)

Starting in 1997, the BLK (and now the GWK) has conducted an annual survey of the federal states to gather information about applications, shortlisted candidates, successful candidates/calls to post, and appointments to professorships at higher education institutions.

The 2010 survey shows the following proportions of women compared to the previous year.

In 2010 in Germany, a total of 85,356 people applied for a professorship, 20,805 of whom were women. This is equivalent to an average of 24.4% of applications, with applications to each pay grade as follows: W1 (junior) professors 34.8%; W2 professors 24.4%; W3 professors 23.1% (*cf. Table 5.1.3*). Out of a total of 8,998 shortlisted candidates, 2,346 were women, which amounts to a proportion of 26.1%. 1,030 out of the total of 3,872 calls to post were awarded to women, corresponding to a proportion of 26.6%. Out of a total of 2,015 appointments, 543 went to women in the year under review, which equates to 26.9% (*cf. Table 5.1.1*). It is clear from this that women are certainly underrepresented in terms of number of applications, but that their success rate is higher than that of men. A similar trend was also observed in earlier years.

At the various types of higher education institutions, the picture is as follows (*cf. Table 5.1.2*):

- A total of 13,120 women applied for professorships in 2010 at universities and equivalent institutions of higher education (excluding art and music colleges), corresponding to female representation of 24.8%. Out of a total of 5,793 shortlisted candidates, 1,609 were women (27.8%); out of a total of 2,505 calls to post, 709 women were called (28.3%); out of a total of 1,126 appointments, 331 went to women (29.4%).

2 Weighted Overview of Current Data

- At universities of applied sciences, 5,239 women (20.0%) applied for a professorship in 2010; out of a total of 2,852 shortlisted candidates, 585 were women (20.5%); out of a total of 1,230 calls to post, 271 women were called (22.0%); out of a total of 804 appointments, 184 went to women (22.9%) in 2010.
- At art and music colleges, 2,446 women (38.4%) applied for a professorship in 2010; out of a total of 353 shortlisted candidates, 152 were women (43.1%); out of a total of 137 calls to post, 50 women were called (36.5%); out of a total of 85 appointments, 28 went to women (32.9%) in 2010.

2.2.6 PROPORTION OF ACADEMIC LEADERSHIP POSITIONS HELD BY WOMEN

The total proportion of academic leadership positions held by women in 2010 was 20.3%, twice as high as 10 years ago⁸. During the years 1996-2000, the average level was still below 10%.

Academic leadership positions held by women in 2010 were distributed thus:

- 40 rectors/presidents, corresponding to 11.1%
- 1 founding rector/founding commissioner, corresponding to 14.3%
- 164 prorectors/vice presidents, corresponding to 23.9%
- 74 chancellors, corresponding to 23.1% (*cf. Table 6.1*).

The absolute number of academic leadership positions held by women rose 3.9% compared with the previous year, from 268 to 279; the proportion of women in academic leadership positions has hardly changed, with a slight rise from 19.3% to 20.3%.

2.2.7 PROPORTION OF WOMEN ON UNIVERSITY COUNCILS AND ACADEMIC SUPERVISORY BODIES

Since the end of the 1990s, all of the federal states, with the exception of Bremen, have established university councils⁹ as a new management tool for higher education institutions. Brandenburg has the Landeshochschulrat (state university council), and two other federal states (North Rhine-Westphalia and Schleswig-Holstein) have cross-institutional bodies for the art colleges and universities.

The role of the university councils is "to foster community involvement in fundamental issues relating to science and the way academic institutions are run, through the work of dedicated experts. They promote dialogue with the wider community and underpin the new organisational and leadership structures in higher education."¹⁰ While the university councils at first

⁸ Figure based on an announcement by the HRK on 31 December 2010

⁹ The terminology used varies between the federal states. The term "curatorium" is also used, while the Baden-Württemberg higher education act makes provision for a supervisory council ("Aufsichtsrat"). In the following text the generic term "university council" is used to refer to all the above.

¹⁰ Klaus Landfried, speaking at the 2nd Berlin Dialog on Education hosted by the HRK and the Veranstaltungsforum of the Publishing Group Georg von Holtzbrinck, on the subject of "Hochschulräte als moderne Steuerungsinstrumente in den Hochschulen" ("University Councils as a Modern Management Instrument in Higher Education"), 21 September 1999, HRK press release (http://www.hrk.de/de/presse/95_942.php).

worked in a primarily advisory capacity, the expert functions they have developed over the intervening years now range from strategic management of higher education institutions, through approving all regulations, to serving as the body responsible for establishment and closing of faculties, departments, and institutes. In six states, namely Baden-Württemberg, Bavaria, Hamburg, Lower Saxony (in the case of foundation universities), North Rhine-Westphalia, and Thuringia, the university council selects the management bodies of the higher education institutions; in Hesse, Lower Saxony (for non-foundation universities), Saarland, and Saxony, the university council plays a contributory role in the selection process, mainly by creating a list of candidates. The overall responsibilities of the university councils in the individual states vary very widely.

Since 2003, the Center of Excellence Women and Science (CEWS) has conducted surveys to obtain gender-specific data on the membership of university councils. The surveys take the form of questionnaires mailed to the academic management teams of universities included on the HRK higher education list with a cut-off date of 31 December each year. The average response rate was 78.3% of academic institutions, qualifying this as a comprehensive survey. The response rate for state higher education institutions was over 90% and for private higher education institutions 48%.

The following higher education acts include regulations governing the proportion of women on university councils:

- The Landeshochschulrat for the state of Brandenburg requires that a minimum of one third of members are female.
- In Lower Saxony, university councils/foundation boards must have at least three women among the seven members.
- Saarland requires that at least two of seven members of a university council are female.
- University councils at universities in Schleswig-Holstein must include at least four women among the nine members.

The following studies also offer comparisons on the memberships of university councils:

Bogumil, Jörg/Rolf G. Heinze, et al. (2007): Hochschulräte als neues Steuerungsinstrument? Eine empirische Analyse der Mitglieder und Aufgabenbereiche. Final report of the short study, Hamburg, Germany (URL: http://www.boeckler.de/pdf_fof/S-2007-981-5-1).

Nienhüser, Werner/Anna Katharina Jacob (2008): *Changing of the Guards – Eine empirische Analyse der Sozialstruktur von Hochschulräten*. In: Hochschulmanagement (3), pp. 67-73, URL: http://www.uni-due.de/personal/Download/hsr/Hochschulrat_Zeitschrift_Hochschulmanagement_Nienhueser_Jacob.pdf.

2 Weighted Overview of Current Data

The study by Bogumil et al. shows the proportion of women as relatively low at 22%, i.e. a similar result to existing surveys. No gender-specific data is presented in the Nienhüser and Jacob study.

Since the first survey of gender-specific data for the university councils in 2003, the proportion of women on university councils or comparable bodies has risen from 20% to its current level of almost 25%. There are large variations between the various federal states however: the figures reported on the survey date of 31 December 2010 range from 13% to 42%, with two federal states achieving a proportion of over 40% women on their university councils (Bremen, Lower Saxony).

2.3 NON-ACADEMIC RESEARCH ESTABLISHMENTS

2.3.1 PROPORTION OF SCIENTIFIC POSTS HELD BY WOMEN

The overall proportion of women employed on the scientific staff at non-academic research establishments was 32.7% in 2010. The WGL and the MPG had an above-average proportion of women with 43.7% and 35.5% respectively, whereas the HGF and FhG came in below the average with 28.9% and 18.5% respectively (*cf. Tables 9.2.1-9.2.5*).

Generally speaking, the proportion of women decreases as the level of qualification increases:

Women are represented as follows:

- 4,091 doctoral students, corresponding to 41.6%,
- 1,684 post-doctoral students, corresponding to 37.8%,
- 4,588 of employees at pay grades E12 and E13 on the German civil service pay scale (TVöD), corresponding to 34.8%,
- 2,065 of employees at pay grade E14 on the German civil service pay scale (TVöD), corresponding to 20.9%,
- 318 of employees at pay grade E15 on the German civil service pay scale (TVöD), corresponding to 11.7%.

The proportion of positions held by women above these levels varies considerably, with women holding 5.8% of E15 ÜTVöD or ATB, B2/B3 including S positions, 27.0% of W2 including S positions, 11.9% of C3/C2 including S positions, 8.6% of W3 including S positions, and 4.3% of C4 including S positions (*cf. Table 9.2.5, overall*).

The combined proportion of scientific and non-scientific staff who are women (from executive management down to student assistants) in 2010 was 32.9% (*cf. Table 9.2.5*). For the WGL, the proportion of women was 43.8%, which represents an increase of 1.7 percentage points compared with 2009; for the MPG, this figure was 35.5%, for the HGF 29.4%, and for the FhG 22.2% (*cf. Tables 9.2.1 – 9.2.4*).

2.3.2 PROPORTION OF WOMEN IN LEADERSHIP POSITIONS

In this report, it is assumed that employees holding positions in salary group E15 Ü or non-pay-scale employees above salary group E15, as well as salary categories C, W, and B or employees with equivalent contracts of employment, all hold leadership positions in either scientific or administrative parts of the organisation.

As per this definition, the proportion of female employees with leadership positions in scientific roles at non-academic research establishments has now risen from a total of 2.0% in 1992 to 11.3% in 2010 (2009=11.4%, 2008=9.9%, 2007=8.4%, 2006=7.9%, 2005=7.0%, 2004=6.6%).

The Max Planck Society (MPG) was again above the average, with 18.6% of leadership positions held by women in 2010. The Leibniz Association (WGL) and the Hermann von Helmholtz Association of German Research Centers (HGF) had lower than average proportions of women with 10.9% and 8.4% respectively, while the figure for the Fraunhofer Society (FhG) was particularly low, remaining at a mere 2.8% (*cf. Table 7.2*).

Among the non-scientific staff (administration, technical, other), the proportion was 18.7% in 2010.

The combined proportion of women employed in leadership positions in both scientific and non-scientific areas was 12.0% in 2010 (*cf. Table 9.2.5*).

2.4 ACADEMIC PROJECTS

2.4.1 TOTAL PROPORTION OF WOMEN IN ACADEMIC PROJECTS BY SALARY GROUP AND IN UNSALARIED PROJECT MANAGEMENT TEAMS, SUBDIVIDED INTO ONGOING PROJECTS AND NEWLY FUNDED PROJECTS

On 14 September 2010, the GWK committee decided that the Union will survey the proportion of women in academic projects by salary group and in unsalaried project management teams, subdivided into ongoing projects and newly funded projects, on 31 December every year. The proportion of women in ongoing academic projects was 48.0% (389 out of 811), and those in unsalaried project management teams 10.3% (15 out of 145). The overall proportion of women in newly funded academic projects is similar to that for ongoing projects – 46.2% (6 out of 13) – while for unsalaried project management, the proportion of women in newly funded academic projects is 25.0% (1 out of 4), which amounts to over double the proportion for ongoing projects. However, the small sample sizes should be borne in mind for the newly funded projects.

The data is shown for the first time in Table 10.1 in Part II, Appendix with Comprehensive Statistics.

1 Proportion of women in education and research **All higher education (HE) institutions (1992-2009)**

- 1.1 Proportion of women for all HE institutions
 - 1.1.1 Averages for years 1992-1996, 1997-2001, 2002-2006
 - 1.1.2 From 2002 to 2005
 - 1.1.3 From 2006 to 2009
 - 1.1.4 *Chart*: Proportion of women in education and research, 2009
- 1.2 Proportion of women in subject group languages and humanities
 - 1.2.1 Averages for years 1992-1996, 1997-2001, 2002-2006
 - 1.2.2 From 2002 to 2005
 - 1.2.3 From 2006 to 2009
- 1.3 Proportion of women in subject group mathematics and natural sciences
 - 1.3.1 Average for years 2002 to 2006
 - 1.3.2 From 2002 to 2005
 - 1.3.3 From 2006 to 2009
- 1.4 Proportion of women in subject group engineering
 - 1.4.1 Averages for years 1992-1996, 1997-2001, 2002-2006
 - 1.4.2 From 2002 to 2005
 - 1.4.3 From 2006 to 2009
- 1.5 Proportion of women in subject group human medicine/health sciences
 - 1.5.1 Averages for years 1992-1996, 1997-2001, 2002-2006
 - 1.5.2 From 2002 to 2005
 - 1.5.3 From 2006 to 2009
- 1.6 Proportion of women in the MINT subjects from 2007 to 2009

2. All doctorates and doctorates awarded to women

- 2.1 Grouped by federal state, 1992 to 2009
- 2.2 Grouped by subject group, 1992 to 2009

3. All habilitations and habilitations awarded to women

- 3.1 Grouped by federal state, 1992 to 2009
- 3.2 Grouped by subject group, 1992 to 2009

4. All professorships and women holding professorships, grouped by type of HE institution

- 4.1 Grouped by type of HE institution and seniority
 - 4.1.1 All professorships, grouped by type of HE institution and seniority, averages 1992-1996, 1997-2001, 2002-2006
 - 4.1.2 All professorships, grouped by type of HE institution and seniority, 2002-2009
 - 4.1.3 All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
 - 4.1.4 *Chart*: Proportion of women holding C4/W3 professorships (1992 to 2009, all HE institutions)
 - 4.1.5 Languages/humanities: All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
 - 4.1.6 *Chart*: Languages/humanities, all professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
 - 4.1.7 Mathematics/natural sciences: All professorships and C4/W3 professorships, all types of HE institution, 2009
 - 4.1.8 *Chart*: Mathematics/natural sciences, all professorships and C4/W3 professorships, all types of HE institution, 2009
 - 4.1.9 Engineering: All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
 - 4.1.10 *Chart*: Engineering, all professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
 - 4.1.11 Human medicine/health sciences: All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
 - 4.1.12 *Chart*: Human medicine/health sciences, all professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.2 Grouped by federal state and type of HE institution
 - 4.2.1 From 1992 to 1994
 - 4.2.2 From 1995 to 1997
 - 4.2.3 From 1998 to 2000
 - 4.2.4 From 2001 to 2003
 - 4.2.5 From 2004 to 2006
 - 4.2.6 From 2007 to 2009
 - 4.2.7 *Chart*: Proportion of women holding professorships, grouped by federal state, all HE institutions, 2009

5. Female applications, shortlist places gained, calls to post, and appointments for professorships in higher education (1997-2010)

- 5.1 Grouped by type of HE institution and seniority
 - 5.1.1 Professorships held at all higher education institutions (overview 1997-2010)
 - 5.1.2 Professorships held, grouped by type of HE institution (overview 1997-2010)
 - 5.1.3 Professorships held, grouped by type of HE institution (overview 2010)
- 5.2 Grouped by seniority and subject group
 - 5.2.1 - Universities (excl. art and music colleges) in 2010
 - 5.2.2 - Universities of applied sciences in 2010
- 5.3 Grouped by type of HE institution/seniority and federal state
 - 5.3.1 Overview: Proportion of women at application, shortlist, and call to post stage, grouped by federal state, 2010
 - 5.3.2 - Universities (excl. art and music colleges) - In 2009, W3-W1 and overall, 2010
 - 5.3.3 - Art and music colleges - W3-W1 and overall, 2010
 - 5.3.4 - Universities of applied sciences - W3, W2, and overall, 2010

6. Proportion of academic leadership positions held by women

- 6.1 From 1996 to 2010
- 6.2 *Charts* showing proportion holding various positions
- 6.3 Proportion of women on university councils and academic supervisory bodies, grouped by federal state, 2003-2010
- 6.4 *Chart*: Proportion of women on university councils and academic supervisory bodies, grouped by federal state, 2010

7. All personnel and female personnel in leadership positions at non-academic research establishments (FhG, HGF, MPG, WGL) Grouped by seniority, 1992 to 2010

- 7.1 Averages for years 1992-1996, 1997-2001, 2002-2006
- 7.2 From 2002 to 2009
- 7.3 In 2010

8. Proportion of women on supervisory bodies of non-academic research establishments, 2010

- 8.1 Proportion of women on supervisory bodies at the FhG
- 8.2 Proportion of women on supervisory bodies at the HGF
- 8.3 Proportion of women on supervisory bodies at the MPG
- 8.4 Proportion of women on supervisory bodies at the WGL
- 8.5 Proportion of women on supervisory bodies, FhG, HGF, MPG, and WGL combined

9. Proportion of women employed on scientific staff of non-academic research establishments

9.1 Newly filled positions on scientific staff (2010)

- 9.1.1 Grouped by seniority/role and length of contract, FhG
- 9.1.2 Grouped by seniority/role and length of contract, HGF
- 9.1.3 Grouped by seniority/role and length of contract, MPG
- 9.1.4 Grouped by seniority/role and length of contract, WGL
- 9.1.5 Grouped by seniority/role and length of contract, FhG, HGF, MPG, and WGL combined

9.2 Ongoing: Proportion of women employed on scientific staff (2010)

- 9.2.1 Grouped by seniority/role, FhG
- 9.2.2 Grouped by seniority/role, HGF
- 9.2.3 Grouped by seniority/role, MPG
- 9.2.4 Grouped by seniority/role, WGL
- 9.2.5 Grouped by seniority/role, FhG, HGF, MPG, and WGL combined

9.3 Proportion of women employed on scientific staff, overall

- 9.3.1 *Chart*: Proportion of women employed on scientific staff, overall (2010)

10. Total proportion of women in academic projects by salary group and involved in unsalaried project management subdivided into ongoing projects and newly funded projects

- 10.1 Total proportion of women in academic projects by salary group and in unsalaried project management teams, subdivided into ongoing projects and newly funded projects

1 Proportion of women in education and research

All higher education (HE) institutions (1992-2009)

- 1.1 Proportion of women at all HE institutions
 - 1.1.1 Averages for years 1992-1996, 1997-2001, 2002-2006
 - 1.1.2 From 2002 to 2005
 - 1.1.3 From 2006 to 2009
 - 1.1.4 Chart: Proportion of women in education and research, 2009

- 1.2 Proportion of women in subject group languages and humanities
 - 1.2.1 Averages for years 1992-1996, 1997-2001, 2002-2006
 - 1.2.2 From 2002 to 2005
 - 1.2.3 From 2006 to 2009

- 1.3 Proportion of women in subject group mathematics and natural sciences
 - 1.3.1 Average for years 2002 to 2006
 - 1.3.2 From 2002 to 2005

The figures in the "Returning undergraduates" category relate to the winter semester, those for "First-year students" to the academic year (summer semester and following winter semester, e.g., 1992 = SS 1992 and WS 1992/93).

1) School leavers gaining "Fachhochschulreife" (advanced vocational training at a technical college leading to technical university entrance qualification), "allgemeine Hochschulreife" (secondary school completion leading to university qualification from non-specialist school), or "Fachhochschulreife, fachgebundene Hochschulreife" (certificate of readiness for higher vocational school from a vocational school).

2) Final examinations at higher education institutions, excluding "doctorates", "arts degrees", and "alternative qualifications".

3) Final examinations at higher education institutions entitled to confer doctorates, excluding "university of applied sciences degrees", "doctorates", "arts degrees", and "alternative qualifications".

4) Rounding differences

The figures in the "Returning undergraduates" category relate to the winter semester, those for "First-year students" to the academic year (summer semester and following winter semester, e.g., 1992 = SS 1992 and WS 1992/93).

1) School leavers gaining "Fachhochschulreife" (advanced vocational training at a technical college leading to technical university entrance qualification), "allgemeine Hochschulreife" (secondary school completion leading to university qualification from non-specialist school), or "Fachhochschulreife, fachgebundene Hochschulreife" (certificate of readiness for higher vocational school from a vocational school).

2) Final examinations at higher education institutions, excluding "doctorates", "arts degrees", and "alternative qualifications".

3) Final examinations at higher education institutions entitled to confer doctorates, excluding "university of applied sciences degrees", "doctorates", "arts degrees", and "alternative qualifications".

4 All professorships and women holding professorships, grouped by type of HE institution

4.1 Grouped by type of HE institution and seniority

- 4.1.1 All professorships, grouped by type of HE institution and seniority, averages 1992-1996, 1997-2001, 2002-2006
- 4.1.2 All professorships, grouped by type of HE institution and seniority, 2002-2009
- 4.1.3 All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.1.4 Chart: Proportion of women holding C4/W3 professorships (1992 to 2009, all HE institutions)
- 4.1.5 Languages/humanities: All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.1.6 Chart: Languages/humanities, all professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.1.7 Mathematics/natural sciences: All professorships and C4/W3 professorships, all types of HE institution, 2009
- 4.1.8 Chart: Mathematics/natural sciences, all professorships and C4/W3 professorships, all types of HE institution, 2009
- 4.1.9 Engineering: All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.1.10 Chart: Engineering, all professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.1.11 Human medicine: All professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009
- 4.1.12 Chart: Human medicine, all professorships and C4/W3 professorships, all types of HE institution, 1992 to 2009

4.2 Grouped by federal state and type of HE institution

- 4.2.1 From 1992 to 1994
- 4.2.2 From 1995 to 1997
- 4.2.3 From 1998 to 2000
- 4.2.4 From 2001 to 2003
- 4.2.5 From 2004 to 2006
- 4.2.6 From 2007 to 2009
- 4.2.7 Chart: Proportion of women holding professorships, grouped by federal state, all HE institutions, 2009

Table 4.1.1

All professorships and women holding professorships, grouped by type of HE institution and seniority Averages for 1992-1996 and 1997-2001, and for 2002-2006 (full-time)

Chart 4.2.7: Proportion of women holding professorships, grouped by federal state, all HE institutions, 2009

Source: Statistisches Bundesamt

5 Female applications, shortlist places gained, calls to post, and appointments for professorships in higher education (1997-2010)

- 5.1 Grouped by type of HE institution and seniority
 - 5.1.1 Professorships held at all higher education institutions (overview 1997-2010)
 - 5.1.2 Professorships held, grouped by type of HE institution (overview 1997-2009)
 - 5.1.3 In 2010

- 5.2 Grouped by seniority and subject group
 - 5.2.1 - Universities (excl. art and music colleges) in 2010
 - 5.2.2 - Universities of applied sciences in 2010

- 5.3 Grouped by type of HE institution/seniority and federal state
 - 5.3.1 Overview: Proportion of women at application, shortlist, and call to post stage, grouped by federal state, 2010
 - 5.3.2 - Universities (excl. art and music colleges) -
In 2010, W3-W1 and overall
 - 5.3.3 - Art and music colleges -
W3-W1 and overall, 2010
 - 5.3.4 - Universities of applied sciences -
W3, W2, and overall, 2010

GWK-Veröffentlichungsliste

Stand: 18. August 2011

Bestellhinweis

Die Schriften aus der Reihe „GWK-Materialien“ können – sofern sie nicht vergriffen sind – bei der Gemeinsamen Wissenschaftskonferenz (GWK), Friedrich-Ebert-Allee 38, 53113 Bonn, angefordert werden.

Bei Bestellungen durch Privatpersonen wird um Überweisung von 3,- € pro Band zzgl. 2,- € (Versandkosten) an die Gemeinsame Wissenschaftskonferenz, Konto-Nr. 380 010 18 bei der Deutschen Bundesbank, Filiale Köln, (BLZ 370 000 00) mit dem Hinweis „GWK-Materialien“, gebeten.

Zahlungsdetails für Bestellungen aus dem Ausland: Deutsche Bundesbank, Filiale Köln, BIC: MARKDEF1370, IBAN: DE86370000000038001018.

Vertreter von Medien und öffentlichen Institutionen erhalten die Materialien unentgeltlich.

Download aus dem Internet

Die Hefte der Reihe „Materialien der GWK“ können aus dem Internet unter folgender Adresse abgerufen werden: <http://www.gwk-bonn.de>, Service, Publikationen/Dokumente.
