# Message from the Editor-in-Chief

*Chips* is a new journal with the aim to become a leading reference on all aspects of the IC domain. The journal is devoted to publishing rigorously peer-reviewed articles (such as original research, reviews, and communications) with the specific target to disseminate novelties in terms of research and knowledge as well as the most advanced state of the art on IC technologies, design, testing, and production. The journal offers the opportunity to actively spread new concepts and advancements in the IC domain and its increasing interrelated and multidisciplinary areas in a timely manner. More specifically, the journal will cover chip design, including CAD tools, chip production, and their wide spectrum of applications.

## **Editor-in-Chief**

Prof. Dr. Gaetano Palumbo

---

## **Aims**

*Chips* (ISSN 2674-0729) aims to provide an advanced forum for the science, technology and design of chips and their applications. *Chips* publishes full and original research articles, reviews, and communication. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced. Additionally, electronic files providing full details of the calculations and experimental procedures can be deposited as supplementary materials.

---

## Scope

Designs of Chips:

- Micro and nano-electronics
- Analog, digital, and mixed-signal domain
- Baseband, RF and microwave frequencies
- All levels of abstraction, from device or transistor level to system and architecture level
- Typical IC products such as microprocessors and microcontrollers, memories, ASICs, FPGAs, SOCs (system-on-chips) and NOCs (network-on-chips)

Chip production:

- Manufacturing (fabrication and packaging) of chips;
- Testing and evaluating of chips
- Materials for chips

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### Rapid Publication

First decisions in 16 days; acceptance to publication in 5.8 days (median values for MDPI journals in the first half of 2024)

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI membership program

MDPI is a member of
