First quarter 2016 results

SCOPE OF CONSOLIDATION AND MAIN CURRENCIES

In compliance with IFRS 5, GVT qualifies as a discontinued operation from Q3 2014, hence its earnings are reported as “Earnings from discontinued operations”. This classification retrospectively applies to Statements of Earnings and Cash Flows. Vivendi deconsolidated GVT as from May 28, 2015.

Telecom Italia and Banijay Group are consolidated as equity affiliates from December 15, 2015 and February 23, 2016, respectively.

As a reminder, the accounting for Vivendi’s share of Telecom Italia earnings is delayed by one quarter.

Constant perimeter takes into account the following:

Impacts generated by Dailymotion and Radionomy are excluded for 1Q 2016. For memory, Dailymotion and Radionomy are consolidated from June 30, 2015 and from December 17, 2015, respectively.

HIGHLIGHTS

- Revenues down 2.8%*:
 - Pay-TV revenues decreased in mainland France due to a continuous decline in the committed subscriber base;
 - International operations benefited from continued strong portfolio growth in Africa;
 - FTA TV revenues were up 11.5% driven by increased audiences, mainly at D8, which reached 5%** in March;
 - Studiocanal revenues decreased by 14.5%* due to fewer theatrical and DVD releases compared to last year which benefited from the release of Shaun the Sheep, The Imitation Game and Paddington.
- Income from operations up €10m thanks to the International activities and Studiocanal and despite decreased profitability of Pay-TV in mainland France.

Canal+ - Update on Pay-TV operations in mainland France

Subscription base* evolution

Canal+ channels** in France - EBITA

Q1 EBITA benefited from lower film programming costs compared to last year (timing effect).

In addition, the EBITA decline is expected to increase in the coming quarters due to:

- Inflation of sport rights costs (c. € -65m);
- Timing effect on film programming costs (c. € -20m);
- Revenue decline caused by continued erosion of the subscriber base (c. € -20m);
- Increased marketing costs in H2 (c. € -20m);
- Higher COSIP rate than in Q1 (c. € -40m).

Excluding the potential impacts of both the beIN Sports agreement and the cost efficiency plan under way.

GLOSSARY

The non-GAAP measures defined below should be considered in addition to, and not as a substitute for, other GAAP measures of operating and financial performance and Vivendi considers this to be relevant indicators of the group's operating and financial performance. Moreover, it should be noted that other companies may have different definitions and calculations for these indicators from Vivendi thereby affecting comparability.

Adjusted earnings before interest and income taxes (EBITA): As defined by Vivendi, EBITA corresponds to EBIT (defined as the difference between income and charges that do not result from financial activities, equity affiliates, discontinued operations and tax) before the amortization of intangible assets acquired through business combinations and the impairment losses on goodwill and other intangibles acquired through business combinations, and other income and charges related to financial investing transactions and to transactions with shareowners (except if directly recognized in equity).

Income from operations: As defined by Vivendi, income from operations is calculated as EBITA before share-based compensation costs related to equity-settled plans, and special items due to their unusual nature or particular significance.

Adjusted net income (ANI) includes the following items: EBITA, income from equity affiliates, interest, income from investments, as well as taxes and non-controlling interests related to these items. It does not include the following items: the amortization of intangible assets acquired through business combinations, the impairment losses on goodwill and other intangible assets acquired through business combinations, other income and charges related to financial investing transactions and to transactions with shareowners (except if directly recognized in equity), other financial charges and income, earnings from discontinued operations, provisions for income taxes and adjustments attributable to non-controlling interests, as well as non-recurring tax items (notably the changes in deferred tax assets pursuant to the Vivendi SA's tax group and Consolidated Global Profit Tax Systems and reversal of tax liabilities relating to risks extinguished over the period).

Cash flow from operations (CFFO): Net cash provided by operating activities after capital expenditures net, dividends received from equity affiliates and unconsolidated companies and before income taxes paid.

Capital expenditures net (Capex, net): Cash used for capital expenditures, net of proceeds from sales of property, plant and equipment, and intangible assets.

Net Cash Position: Net Cash Position is calculated as the sum of cash and cash equivalents, cash management financials assets, as well as derivative financial instruments in assets and cash deposits backing borrowings, less long-term and short-term borrowings and other financial liabilities.

The percentages of change are compared to the same period of the previous accounting year, unless otherwise stated.
