CM-P00073422

Genève, le 9 April 1968

To all members of the Physics III Committee,

During the last NPRC it became clear that possibilities for a stopped K^- beam in the East Hall will exist as from early next year. Therefore, I think it is necessary and useful to discuss the beam further and the scientific programme for the beam at our forthcoming meeting on April 24.

As Herz is absent from CERN at present, I thought it advisable to inform you in time that the stopped K^- beam will appear on the agenda.

Sincerely yours,

G. Ekspong.
