

CONTENTS

Preface	ix
1 INTRODUCTION TO INFORMATION	1
1.1 Information and Data Analysis	2
1.2 Information and Estimation	4
1.3 Information Theory and Choice of Models	6
1.4 Economics of Information	7
1.5 Information and Efficiency	9
1.6 Outline of the Book	11
2 APPLIED INFORMATION THEORY	13
2.1 Tools of Information Theory	13
A. Conditional entropy	15
B. Mutual information	15
C. Divergence measure	17
D. Multivariate distance	18
2.2 Maximum Entropy Principle	21
2.3 Information Theory Approach to Estimation	25
2.4 Mutual Information and Prediction	31
2.5 Use of Entropy in Economic Models	35
A. Production function models	35
B. Transition probability models	44
C. Structural change and economic growth	56
2.6 Applications to Stochastic Processes	63
3 INFORMATION THEORY IN ECONOMETRICS	71
3.1 Data and Information	71
3.2 Nonparametric Estimation and Entropy Theory	75
3.3 Entropy, Likelihood and Bayesian Estimation	79
3.4 Information Gain and Divergence	82
3.5 Applications in Production Frontier Estimation	94
3.6 Entropy-based Measure of Economic Inequality	102
4 APPLICATIONS IN CONTROL THEORY AND OPERATIONS RESEARCH	106
4.1 Dynamic Models and Information Theory	106
4.2 Entropy Minimizing Control	116
A. A model of LEQG	117
B. Risk sensitive DEA models	120
4.3 Entropy and Game Theory	130
4.4 Information Theory and Risk Analysis	135
A. Entropy in SLP models	137
B. Entropy in DEA models	144
4.5 Entropy in Models of Queuing and Transportation	146

TABLE OF CONTENTS (Continued)

4.6	Efficiency Measurement Under Inexact Information	150
	A. Imprecision in DEA models	151
	B. Fuzzy regression in DEA models	153
	C. Fuzzy models in games	157
5	ECONOMIC THEORIES OF INFORMATION	160
5.1	Information in Selection Models	160
	A. Selection samples	161
	B. Truncation models in market returns	163
5.2	Informational Basis of Rational Expectations	171
	A. Estimation of dynamic efficiency	180
	B. A model of asymmetric information	185
5.3	Information and Game Theory	188
5.4	Semiparametric Estimation of Efficiency	195
	A. Estimation of dynamic frontier	195
	B. Comparing efficiency distributions	207
5.5	Market Models of Search	218
5.6	Decisions Under Incomplete Information	222
	A. Quadratic decision model	223
	B. Risk-sensitive production frontier	225
6	ECONOMETRICS AND ENTROPY THEORY	230
6.1	Problems in Econometric Modelling	232
	A. Stochastic complexity analysis	234
	B. Model selection criteria	235
6.2	Trends in Entropy Theory	237
	A. Optimal search and entropy	241
	B. Duality in information theory	242
	REFERENCES	246
	INDEX	254
