

Contents

1. Introduction 1
Turhan Canli

I. OVERVIEW AND A HISTORICAL PERSPECTIVE

2. Jeffrey Gray's Contributions to Theories of Anxiety,
Personality, and Psychopathology 7
Don C. Fowles

II. STUDIES OF EXTRAVERSION AND RELATED TRAITS

3. Biosocial Bases of Sensation Seeking 37
Marvin Zuckerman
4. Interpersonal Behavior and the Structure of Personality:
Neurobehavioral Foundation of Agentive Extraversion
and Affiliation 60
Richard A. Depue
5. Genomic Imaging of Extraversion 93
Turhan Canli
6. Neural Substrates for Emotional Traits?:
The Case of Extraversion 116
Brian Knutson and Jamil Bhanji
7. Mapping the Neural Correlates of Dimensions of Personality,
Emotion, and Motivation 133
*John D. Herrington, Nancy S. Koven, Gregory A. Miller,
and Wendy Heller*

III. AGE AND SEX AS DETERMINANTS OF INDIVIDUAL DIFFERENCES

- | | |
|---|-----|
| 8. The Affective Neuroscience of Aging and Its Implications for Cognition
<i>Marisa Knight and Mara Mather</i> | 159 |
| 9. Sex Differences in Neural Responses to Sexual Stimuli in Humans
<i>Stephan Hamann</i> | 184 |
| 10. Sex Differences in Brain Functional Magnetic Resonance Imaging Response to Stress
<i>Rajita Sinha</i> | 203 |

IV. GENETIC AND NEURAL ANALYSES OF ANXIETY-RELATED TRAITS

- | | |
|--|-----|
| 11. Neuroticism as a Genetic Marker for Mood and Anxiety
<i>Nathan A. Gillespie and Nicholas G. Martin</i> | 225 |
| 12. The Association of Personality with Anxious and Depressive Psychopathology
<i>Christel M. Middeldorp, Danielle C. Cath, Mireille van den Berg, A. Leo Beem, Richard van Dyck, and Dorret I. Boomsma</i> | 251 |
| 13. 5-HT _{1A} Receptor and Anxiety-Related Traits: Pharmacology, Genetics, and Imaging
<i>Klaus-Peter Lesch and Turhan Canli</i> | 273 |
| 14. Genetically Driven Variation in Serotonin Function: Impact on Amygdala Reactivity and Individual Differences in Fearful and Anxious Personality
<i>Ahmad R. Hariri</i> | 295 |

V. INDIVIDUAL DIFFERENCES IN CHILDREN

- | | |
|--|-----|
| 15. Etiology of Psychopathic Tendencies in Children: Distinguishing a Genetically Vulnerable Subgroup of Children with Antisocial Behavior
<i>Essi Viding and Robert Plomin</i> | 317 |
| 16. A Cognitive-Behavioral Genetic Approach to Emotional Development in Childhood and Adolescence
<i>Jennifer Y. F. Lau and Thalia C. Eley</i> | 335 |

17. Cognitive and Biological Functioning in Children at Risk
for Depression 353
Ian H. Gotlib, Jutta Joormann, Kelly L. Minor, and Rebecca E. Cooney

VI. PERSONALITY IN ANIMALS

18. Using Mouse Models to Unravel Aggressive Behavior 385
Silvana Chiavegatto
19. Searching for Genetic and Environmental Contributions
to Personality and Happiness in Chimpanzees 407
(*Pan troglodytes*)
Alexander Weiss and James E. King
20. How Can Animal Studies Contribute to Research
on the Biological Bases of Personality? 427
Pranjal H. Mehta and Samuel D. Gosling
- Index 449
