

# Contents

Preface	xi
List of Further Results	xv
Plan	xvii
CHAPTER 0. Introduction: Basic Concepts and Problems of Amenability Theory	1
CHAPTER 1. Amenable Locally Compact Groups and Amenable Semigroups	25
CHAPTER 2. The Algebra of Invariant Means	51
CHAPTER 3. Free Groups and the Amenability of Lie Groups	95
CHAPTER 4. Følner Conditions	125
CHAPTER 5. Ergodic Theorems for Amenable Locally Compact Groups	195
CHAPTER 6. Locally Compact Groups of Polynomial Growth	217
CHAPTER 7. Sizes of Sets of Invariant Means	269
APPENDICES:	
A. Nilpotent, Solvable and Semidirect Product Groups	301
B. Lie Groups	305
C. Existence of Borel Cross-Sections	329
D. Mycielski's Theorem	331
E. On the Density of the Exponential Map	333
Some Abbreviations	337
Bibliography	339
Supplementary Bibliography ([S])	397
Sketched Solutions to Problems	413
Index of Terms	443
Index of Symbols	451
