

Table of Contents

	Introductionix
	Acknowledgmentsxi
Chapter 1	The Aging of Human Populations: The Significance of an Epidemiologic Perspective	1
	Introduction	1
	Human Aging as a Global Process	5
	Epidemiologic Transitions and Changes in Life Expectancy	9
	New Stages	12
	Epidemiologic Transitions and the Compression of Morbidity	13
	Development of a Longitudinal Research Base	17
	Critique of Basic Assumptions	20
	Additional Determinants	21
	The Epidemiologic Transition Theory: Some Suggested Modifications	22
	Toward an Epidemiology of Aging	24
	The Epidemiology of Aging: The Core Questions ..	32
	Conclusion	34
Chapter 2	Aging, Health, and the Environment: An Ecological Model	39
	Introduction	39
	The Ecological Model—An Overview	40
	The Ecological Model—Key Components	47
	Epidemiology of Aging—An Ecological Model	58
	Conclusion	77

Chapter 3	Survival, Mortality, and Cause of Death	85
	Introduction	85
	Vital Status and Cause of Death	86
	Studies of Survival	90
	Demographic Patterns	92
	Socioeconomic Status	101
	Physical Environment	104
	Social Capital	106
	Living Arrangements, Social Networks, and Social Support	107
	Health Behaviors	109
	Sense of Control, Coherence, and Self-Efficacy . . .	111
	Disease and Comorbidities	112
	Falls and Injuries	113
	Physical Functioning	114
	Cognitive Functioning	114
	Depression	115
	Physiological Factors	115
	Conclusion	116
Chapter 4	Physical Functioning and Activities of Everyday Life	125
	Active Life Expectancy	125
	Measures of Physical Functioning and Activities of Everyday Life	130
	The Disablement Process	137
	Measurement of Functional Limitations and Disability	139
	Demographic Patterns	148
	Socioeconomic Status	151
	Physical Environment	151
	Social Capital	152
	Living Arrangements, Social Networks, and Social Support	152
	Health Behaviors	153
	Sense of Control, Coherence, and Self-Efficacy . . .	155
	Disease and Comorbidities	155
	Falls and Injuries	159
	Cognitive Functioning	160

	Depression	160
	Physiologic Factors	160
	Conclusion	162
Chapter 5	Cognitive Functioning	171
	Definition and Measurement	173
	Demographic Patterns	177
	Socioeconomic Status	179
	Physical Environment	182
	Social Capital	182
	Living Arrangements, Social Networks, and Social Support	182
	Health Behaviors	183
	Sense of Control, Coherence, and Self-Efficacy	186
	Disease and Comorbidities	186
	Falls and Injuries	188
	Physical Functioning	188
	Depression	189
	Physiological Factors	189
	Conclusion	192
Chapter 6	Depression	199
	Definition and Measurement	199
	Demographic Patterns	205
	Socioeconomic Status	208
	The Physical Environment	209
	Social Capital	209
	Living Arrangements, Social Networks, and Social Support	210
	Health Behaviors	213
	Sense of Control, Coherence, and Self-Efficacy	215
	Disease and Comorbidities	216
	Falls and Injuries	220
	Physical Functioning	221
	Cognitive Functioning	221
	Physiological Factors	222
	Conclusion	223
Chapter 7	Falls, Injuries, and Automobile Crashes	229
	Definition and Measurement of Falls and Fall-Related Disorders	230

Demographic Patterns232

Socioeconomic Status234

Physical Environment234

Social Capital237

Living Arrangements, Social Networks, and
 Social Support237

Health Behaviors238

Sense of Control, Coherence, and Self-Efficacy ...241

Disease and Comorbidities241

Physical Functioning242

Cognitive Functioning243

Depression243

Physiological Factors243

Definition and Measurement of Automobile-
 and Pedestrian-Related Injuries244

Demographic Patterns245

Socioeconomic Status248

Physical Environment249

Social Capital250

Living Arrangements, Social Networks, and
 Social Support250

Health Behaviors251

Sense of Control, Coherence, and Self-Efficacy ...252

Disease and Comorbidities253

Physical Functioning253

Cognitive Functioning254

Depression254

Physiological Factors255

Conclusion255

Chapter 8 Disease and Comorbidities265

 Aging and the Complexity of Disease267

 Age at Onset in Populations: Revisiting the
 Double-Jeopardy Hypothesis270

 Age at Onset in Populations: Recuperation
 and Recurrence271

 Aging and Disease: Four Exemplars272

 Comorbidities and Multimorbidities293

 Conclusion295

Chapter 9	General Health, Frailty, and Successful Aging . . .	303
	Definition and Measurement of General Health . . .	303
	Definition and Measurement of Frailty	307
	Definition and Measurement of Successful Aging . .	312
	Conclusion	321
Chapter 10	Conducting Epidemiologic Studies in	
	Older Populations	327
	Identification of Older Populations	328
	Recruitment of Older Populations	334
	Proxy Interviews	338
	Research Design and Interview	340
	Assessments of the Environment	343
	Interviewer Qualifications	344
	Secondary Sources of Epidemiologic Data	344
	The Effects of Age and Aging on Analytic	
	Strategies	346
	Conclusion	349
Chapter 11	Healthy Aging and Its Implications for	
	Public Health	353
	Public Health Interventions and the	
	Ecological Model	354
	Translation of Research into Practice:	
	General Issues	357
	Representative Public Health Interventions	368
	Conclusion	375
Chapter 12	New Directions for Research and Policy	381
	The Epidemiology of Aging: A Review	382
	New Directions for Research and Policy	388
	Conclusion	399
	Index	403
