

CONTENTS :

List of Participants

<u>PART I</u> : SURVEY LECTURES	1
A.V.BALAKRISHNAN : White Noise Models In Non-Linear Filtering And Control	2
A.BENSOUSSAN : Optimal Impulsive Control Theory	17
J.M.BISMUT : An Introduction To Duality In Random Mechanics	42
R.F.CURTAIN : Linear Stochastic Ito Equations In Hilbert Spaces	61
M.H.A.DAVIS : Martingale Methods In Stochastic Control	85
T.E.DUNCAN : A Geometric Approach To Linear Control And Estimation	118
R.J.ELLIOTT : The Martingale Calculus And Applications	142
A.FRIEDMAN : Interaction Between Stochastic Differential Equations And Partial Differential Equations	156
H.KUSHNER : Approximation Of Solutions To Differential Equations With Random Inputs By Diffusion Processes	172
R.RISHEL : Optimal Conditions And Sufficient Statistics For Controlled Jump Processes	194
J.VAN SCHUPPEN : Stochastic Filtering Theory : A Discussion Of Concepts,Methods,And Results	209
J.ZABCZYK : Introduction To The Theory Of Optimal Stopping	227
<u>PART II</u> : RESEARCH REPORTS	251
A.AL-HUSSAINI and R.J.ELLIOTT : Weak Martingales Associated With A TwoParameter Jump Process	252
T.BASAR : Stochastic Stagewise Stackleberg Strategies For Linear Quadratic Systems	264
E.O.BERTSCH : Some Remarks Concerning Attainable Sets Of Stochastic Optimal Control	277

J.M.BISMUT : Potential Theory In Optimal Stopping And Alternating Processes	285
V.BORKAR and P.VARAIYA : Adapted Control Of Markov Chains	294
N.CHRISTOPEIT : Solution Of The Limited Risk Problem Without Rank Conditions	297
M.DEISTLER : The Parameterization Of Rational Transferfunction Linear Systems	303
G.DE MEY : A Stochastic Model For The Electrical Conduction In Non Homogenous Layers	311
B.DOSHI : Policy Improvement Algorithm For Continuous Time Markov Decision Processes With Switching Costs	320
T.E.DUNCAN : An Algebro-Geometric Approach To Estimation And Stochastic Control For Linear Pure Delay Time Systems	332
T.EISELE : A Non-Linear Martingale Problem	344
A.FERRONI,G.S.GOODMAN,and A.MORO : Pathwise Construction Of Random Variables And Function Space Integrals	362
T.GASSER and G.DUMMERMUTH : Non-Gaussianity And Non-Linearity In Electroencephalographic Time Series	373
B.GRIGELIONIS : Canonical Form And Local Characteristics Of Semimartingales	387
M.HAZEWINKEL : On Identification And The Geometry Of The Space Of Linear Systems	401
K.HELMES : A Numerical Comparison Of Non Linear With Linear Prediction For The Transformed Ornstein Uhlenbeck Process	416
U.HERKENRATH and R.THEODURESCU : On The Bandit Problem	423
J.JACOD : Existence And Uniqueness For Stochastic Differential Equations	435
A.KISTNER : On The Solution And The Moments Of Linear Systems With Randomly Disturbed Parameters	447
W.KLIEMANN : Some Exact Results On Stability And Growth Of Linear Parameter Excited Stochastic Systems	456
M.KOHLMANN and R.RISHEL : A Variational Inequality For A Partially Observed Stopping Time Problem	472

H.KOREZLIOGLU,G.MAZZIOTTO,and J.SZPIRGLAS : Equations Du Filtrage Non Linéaire Pour Des Processus A Deux Indices	481
A.J.KRENER : Minimum Covariance,Minimax And Minimum Energy Linear Estimators	490
H.KUNITA : Non Linear Filtering For The System With General Noise	496
E.PARDOUX : Filtering Of A Diffusion Process With Poisson Type Observation	510
D.PLACHKY : On Weak Closures Of Convex And Solid Sets Of Probability Measures	519
M.M.RAO : Non L^1 -Bounded Martingales	527
B.RUSTEM and K.VELUPILLAI : On The Definition And Detection Of Structural Change	539
G.SAWITZKI : Exact Filtering In Exponential Families: Discrete Time	554
A.SEGALL : Lower Estimation Error Bounds For Gauss-Poisson Processes	559
R.SENTIS : Sur L'Approximation D'Un Processus De Transport Par Une Diffusion	566
S.E.SHREVE : Resolution Of Measurability Problems In Discrete-Time Stochastic Control	580
R.TARRES : Optimal Non-Explosive Control Of A Non Constrained Diffusion And Behaviour When The Discount Vanishes	588
H.WALK : Sequential Estimation Of The Solution Of An Integral Equation In Filtering Theory	598
M.P.YERSHOV : Causal And Non-Anticipating Solutions Of Stochastic Equations	606
