<b>Preface to the Second Edition</b> .....	vii
<b>Preface to the First Edition</b> .....	ix
<b>Acknowledgments</b> .....	xi
<b>Part 1—The stratigraphy and sedimentology of sedimentary basins</b>	
Introduction to Part 1 .....	1
<b>1 Introduction</b> .....	3
1.1 Scope and purpose of book .....	3
1.2 The modern revolution in stratigraphy .....	4
1.3 Time in stratigraphy .....	8
1.4 Types of project and data problems .....	10
References .....	19
<b>2 The stratigraphic-sedimentologic data base</b> .....	21
2.1 Introduction .....	21
2.2 Describing surface stratigraphic sections .....	21
2.3 Describing subsurface stratigraphic sections .....	67
2.4 Petrophysical logs .....	74
References .....	80
<b>3 Stratigraphic correlation</b> .....	83
3.1 Introduction .....	83
3.2 Types of stratigraphic unit .....	84
3.3 Stratigraphic procedures .....	85
3.4 Lithostratigraphy .....	88
3.5 Biostratigraphy .....	102
3.6 Unconformity-bounded units .....	119
3.7 Chronostratigraphy and geochronometry .....	120
References .....	142
<b>4 Facies analysis</b> .....	149
4.1 Introduction .....	149
4.2 The meaning of facies .....	149
4.3 Recognition and definition of facies types .....	151
4.4 Facies associations and models .....	159
4.5 Review of environmental criteria .....	172
4.6 Facies models in the 1990s .....	217

4.7	Conclusions and scale considerations .....	246
	References .....	248
<b>5</b>	<b>Basin mapping methods</b> .....	265
5.1	Introduction .....	265
5.2	Structure and isopach contouring .....	266
5.3	Lithofacies maps .....	267
5.4	Geophysical techniques .....	275
5.5	Clastic petrographic data .....	293
5.6	Computer mapping methods .....	300
5.7	Sampling density and map reliability .....	306
5.8	Stratigraphic cross sections .....	310
5.9	Paleocurrent analysis .....	315
5.10	Remote sensing .....	328
5.11	Paleogeographic synthesis .....	330
	References .....	334
<b>6</b>	<b>Depositional systems and sequence stratigraphy</b> .....	341
6.1	Introduction .....	341
6.2	Stratigraphic architecture .....	342
6.3	Nonmarine depositional systems .....	345
6.4	Coastal depositional systems .....	353
6.5	Clastic shelves and associated depositional systems .....	358
6.6	Carbonate and evaporite depositional systems .....	362
6.7	Clastic depositional systems of the continental slope, rise and basin plain .....	376
6.8	Sequence stratigraphy .....	387
6.9	Depositional systems and stratigraphic nomenclature .....	401
	References .....	404
<b>Part 2—Global controls of sedimentary basin development</b>		
	Introduction to Part 2 .....	411
<b>7</b>	<b>Basin subsidence and fill models</b> .....	414
7.1	Introduction .....	414
7.2	Components of a basin model .....	414
7.3	Extensional basins .....	416
7.4	Basins produced by supracrustal loading .....	428
7.5	Application of the modeling techniques to other types of basin .....	436
7.6	Thermal history as an aid in tectonic and stratigraphic analysis .....	437
	References .....	443
<b>8</b>	<b>Regional and global stratigraphic cycles</b> .....	446
8.1	The global perspective .....	446
8.2	First-order cycles .....	448
8.3	Second-order cycles .....	452
8.4	Third-order cycles .....	467
8.5	Fourth- and fifth-order cycles .....	482
8.6	Cyclic sedimentation in the Precambrian .....	491

8.7	Other causes of cyclicity .....	491
8.8	The sequence concept in basin exploration .....	492
8.9	Conclusions .....	493
	References .....	493
<b>9</b>	<b>Sedimentation and plate tectonics</b> .....	<b>499</b>
9.1	The basin-model concept .....	499
9.2	Basin classification .....	501
9.3	Basin models .....	505
9.4	Clastic petrofacies .....	601
9.5	Basin models in the Precambrian .....	606
	References .....	615
<b>10</b>	<b>Conclusions</b> .....	<b>634</b>
	<b>Subject Index</b> .....	<b>637</b>
	<b>Authors Index</b> .....	<b>651</b>
