Preface xi

Acknowledgements xiii

1 Carbonate sediments and limestones: constituents 1

Paul Wright

- 1.1 Introduction 1
- 1.2 Non-skeletal grains 1
 - 1.2.1 Coated grains 1
 - 1.2.2 Peloids 10
 - 1.2.3 Grain aggregates 11
 - 1.2.4 Clasts 12
- 1.3 Skeletal grains 13
- 1.4 Matrix 14
- 1.5 Granulometric and morphometric properties 17
- 1.6 Grain orientation and packing 18
- 1.7 Limestone classification 18
- 1.8 Data collection and processing 22
- 1.9 Porosity 25
 - 1.9.1 Porosity types 26

2 Geological background to carbonate sedimentation 28

Maurice Tucker

- 2.1 Introduction 28
- 2.2 Major controls on carbonate sedimentation 28
 - 2.2.1 Organic productivity and sedimentation rates 33
- 2.3 Carbonate facies and facies sequences 34
 - 2.3.1 Depositional processes and facies sequences in carbonate rocks 36
- 2.4 Carbonate platforms 38
- 2.5 Carbonate rimmed shelves 40
 - 2.5.1 Modern rimmed shelves 41
 - 2.5.2 Rimmed shelves and sea-level changes 42
 - 2.5.3 Rimmed shelf types 43
 - 2.5.4 Ancient carbonate rimmed shelves 44

- 2.6 Carbonate ramps 47
 - 2.6.1 Carbonate ramp facies 49
 - 2.6.2 Carbonate ramp types 50
 - 2.6.3 Ancient carbonate ramps 51
- 2.7 Epeiric carbonate platforms 53
- 2.8 Isolated carbonate platforms 55
 - 2.8.1 Modern isolated platforms 56
 - 2.8.2 Ancient isolated platforms 57
- 2.9 Drowned carbonate platforms 57
- 2.10 Carbonate cycles 58
 - 2.10.1 Shallowing-upward carbonate cycles 58
 - 2.10.2 Carbonate–evaporite and carbonate–clastic cycles 61
 - 2.10.3 Causes of carbonate cyclicity: orbital forcing or not? 62
- 2.11 Tectonic context of carbonate platforms 67

3 Modern carbonate environments 70

Maurice Tucker

- 3.1 Introduction 70
- 3.2 The Bahama Platform 70
 - 3.2.1 Subtidal carbonate sediments of the Bahamas 72
 - 3.2.2 Intertidal–supratidal carbonate sediments of the Bahamas 81
- 3.3 Recent carbonates of the Florida shelf 85
 - 3.3.1 Subtidal carbonate sediments of the Florida Shelf 85
 - 3.3.2 Intertidal and supratidal carbonates of the inner Florida Shelf 91
- 3.4 Carbonate sediments of the Trucial Coast 93
 - 3.4.1 Shoals, barriers and reefs of the inner ramp 93
 - 3.4.2 Lagoons 96
 - 3.4.3 Tidal flats 97
 - 3.4.4 Supratidal flats and sabkhas 99

4 Carbonate depositional systems I: marine shallow-water and lacustrine carbonates 101

- 4.1 Coastal and offshore environments 101
 - Maurice Tucker*
 - 4.1.1 Introduction 101
 - 4.1.2 Modern shoreline carbonate sand systems 101
 - 4.1.3 Environments and facies of shoreline sands 102
 - 4.1.4 Beach-barrier island–lagoonal sequences 114
 - 4.1.5 Beach ridge–strandplain sequences 116
 - 4.1.6 Ancient shoreline carbonates 116
- 4.2 Shelf-margin sand bodies 127
 - Maurice Tucker*
 - 4.2.1 Modern shelf-margin sands 127

- 4.2.2 Marine sand belt to sand flat: Joulter's Cay, Bahamas 129
- 4.2.3 Ancient shelf-margin grainstones 132
- 4.3 Peritidal carbonates 137
 - Paul Wright*
 - 4.3.1 Introduction 137
 - 4.3.2 Peritidal environments 137
 - 4.3.3 Sedimentary processes and products 138
 - 4.3.4 Controls on the deposition of peritidal carbonates 149
 - 4.3.5 Tidal channel model 160
 - 4.3.6 Multiple sequences 162
 - 4.3.7 Future research 164
- 4.4 Lacustrine carbonates 164
 - Paul Wright*
 - 4.4.1 Introduction 164
 - 4.4.2 General settings 164
 - 4.4.3 Hydrology 165
 - 4.4.4 Environments 166
 - 4.4.5 Sedimentary and biological processes 167
 - 4.4.6 Sedimentary features 174
 - 4.4.7 Facies models 177
 - 4.4.8 Future developments 190
- 4.5 Reefs 190
 - Paul Wright*
 - 4.5.1 Introduction – classification 190
 - 4.5.2 Reef dynamics 192
 - 4.5.3 Reef petrography 198
 - 4.5.4 Major controls on reef morphology 203
 - 4.5.5 Reef facies: skeletal reef complexes 207
 - 4.5.6 Reef facies: patch reefs 214
 - 4.5.7 Biofacies 216
 - 4.5.8 Reef mounds 221

5 Carbonate depositional systems II: deeper-water facies of pelagic and resedimented limestones 228

Maurice Tucker

- 5.1 Introduction to pelagic carbonates 228
- 5.2 Pelagic oozes and organisms 228
- 5.3 Controls on pelagic carbonate sedimentation 229
- 5.4 Pelagic carbonate sedimentation rates 232
- 5.5 Deposition of modern pelagic carbonate facies 232
- 5.6 Diagenesis of modern pelagic carbonates 236
- 5.7 Ancient pelagic carbonates 238
 - 5.7.1 Tethyan pelagic limestones 238
 - 5.7.2 Devonian Cephalopodenkalk and Griotte 244

- 5.7.3 The Chalk 245
- 5.7.4 Ordovician *Orthoceras* limestones 254
- 5.8 Pelagic facies models 255
- 5.9 Introduction to resedimented carbonates 256
- 5.10 Processes of carbonate resedimentation 257
 - 5.10.1 Turbidity currents and limestone turbidites 258
 - 5.10.2 Other sediment gravity flows 260
 - 5.10.3 Bottom currents and contourites 262
 - 5.10.4 Classification of deep-water facies 262
- 5.11 Modern resedimented carbonates: The Bahama slopes and basins 262
 - 5.11.1 Bahamian slope sedimentary facies 264
 - 5.11.2 Facies models from the Bahama slopes 269
 - 5.11.3 Other modern carbonate slopes 271
- 5.12 Facies models for resedimented carbonates: aprons and fans 271
- 5.13 Ancient resedimented carbonates 274
 - 5.13.1 Ancient apron carbonates 274
 - 5.13.2 Ancient carbonate submarine fan sequences 280
 - 5.13.3 Basin plain limestone turbidite sequences 282

6 Carbonate mineralogy and chemistry 284

Tony Dickson

- 6.1 Introduction 284
- 6.2 Crystal chemistry of common carbonates 284
 - 6.2.1 Calcite and dolomite structures 284
 - 6.2.2 Aragonite structure 285
 - 6.2.3 Solid solutions 285
 - 6.2.4 Phase relationships 289
 - 6.2.5 Magnesian calcites 289
 - 6.2.6 Biomineralization 292
- 6.3 Trace elements 293
 - 6.3.1 Closed system 295
 - 6.3.2 Open system 297
 - 6.3.3 k_c for alkaline earth elements Sr and Mg 299
 - 6.3.4 k_c for transition metals 301
 - 6.3.5 k_c for alkali metals 302
 - 6.3.6 k_c for anions 302
 - 6.3.7 Discussion 303
- 6.4 Isotopes 303
 - 6.4.1 Stable hydrogen and oxygen isotopes in water 303
 - 6.4.2 Carbon 306
 - 6.4.3 Carbonates 310
 - 6.4.4 Radiogenic isotopes: strontium 312

7 Diagenetic processes, products and environments 314

Maurice Tucker

- 7.1 Introduction 314
- 7.2 Diagenetic processes: a brief introduction 315
- 7.3 Diagenetic environments 316
- 7.4 Shallow-marine diagenesis 318
 - 7.4.1 The Recent 318
 - 7.4.2 Geochemistry of modern marine cements 324
 - 7.4.3 Modern marine cementation: discussion 325
 - 7.4.4 Marine diagenesis in the geological record 327
 - 7.4.5 Ancient marine aragonite cements 329
 - 7.4.6 Ancient marine calcite cements 330
 - 7.4.7 Marine dissolution 336
- 7.5 Meteoric diagenesis 336

Paul Wright

- 7.5.1 Introduction 336
- 7.5.2 Meteoric environments 337
- 7.5.3 Meteoric processes 338
- 7.5.4 Products of meteoric diagenesis 342
- 7.5.5 Summary 348
- 7.6 Diagenesis in the burial environment 348

Maurice Tucker

- 7.6.1 Introduction 348
- 7.6.2 Burial cementation 351
- 7.6.3 Compaction 357
- 7.6.4 Lime mud diagenesis and neomorphism 360
- 7.6.5 Burial dissolution 361
- 7.7 Diagenetic sequences and models 362

8 Dolomites and dolomitization models 365

Maurice Tucker

- 8.1 Introduction 365
- 8.2 The dolomitization reaction 366
- 8.3 Dolomite crystal structure, stoichiometry and ordering 370
- 8.4 Dolomite petrography 372
 - 8.4.1 Replacement dolomite 373
 - 8.4.2 Dolomite cements 378
 - 8.4.3 Baroque dolomite 378
- 8.5 Trace element geochemistry of dolomite 379
 - 8.5.1 Strontium in dolomite 379
 - 8.5.2 Sodium in dolomite 381
 - 8.5.3 Iron and manganese in dolomite 382
- 8.6 Stable isotope geochemistry of dolomite 382
- 8.7 Models of dolomitization, modern and ancient examples 386
 - 8.7.1 Evaporative dolomitization 386

- 8.7.2 Seepage–reflux dolomitization 390
- 8.7.3 Mixing-zone dolomitization 392
- 8.7.4 Burial dolomitization 395
- 8.7.5 Seawater dolomitization 396

9 The geological record of carbonate rocks 401

Maurice Tucker

- 9.1 Introduction 401
- 9.2 Carbonate facies through time 401
 - 9.2.1 Carbonate sands 401
 - 9.2.2 Reef complexes and patch reefs 403
 - 9.2.3 Peritidal facies and stromatolites 404
 - 9.2.4 Mud mounds 406
 - 9.2.5 Pelagic facies 407
- 9.3 Temporal variations in phanerozoic marine precipitates 408
- 9.4 Secular variations in biomineralization 410
- 9.5 Diagenesis through time 411
- 9.6 Secular variations in carbonate geochemistry 414
 - 9.6.1 Trace elements 414
 - 9.6.2 Stable isotopes 415
- 9.7 Precambrian dolomites: is there a problem? 419
