

CONTENTS

1 Introduction to Major Geochemical Processes of Weathering	1
Rates of Chemical Weathering / 2	
Rates of Mineral Weathering / 3	
Rates of Rock Weathering / 4	
Processes of Hydrolysis / 7	
Hydrolysis Reactions of Silicate Minerals / 8	
<i>Dissolution of Feldspars / 9</i>	
<i>Dissolution of Magnesian and Calcic Silicates: Enstatite, Diopside, and Tremolite / 15</i>	
<i>Dissolution of Ferrous Silicates: Bronzite and Fayalite / 24</i>	
<i>Dissolution of Micas / 27</i>	
Processes of Hydrolysis Reactions of Crystals / 31	
<i>Exchange Reactions / 32</i>	
<i>Dissolution Reaction and pH / 33</i>	
<i>Stability of Exchange Sites / 34</i>	
<i>Accessibility of Exchange Sites / 36</i>	
<i>Role of Temperature on Dissolution Rates / 38</i>	
<i>CO₂ Kinetics and Weathering / 38</i>	
<i>Congruent and Incongruent Dissolutions / 40</i>	
Neoformation and Transformation / 43	
Kinetic Inhibitors of Dissolutions / 45	

Behavior of Ions in Solution / 46

Transport of Solutes / 48

**2 Supergene Alteration of Minerals and Rocks:
Preservation of Original Structures**

51

The Two Weathering Pathways of Parent Minerals / 52

Incongruent Dissolution: Pseudomorphosis of Weathering Products
after Parent Minerals / 53

Optically Invisible Modifications / 53

*Modifications Visible under the Petrographic Microscope and
SEM / 54*

Simple Dissolution of Parent Minerals: Absence of
Pseudomorphosis / 57

Conclusions on Earliest Transformations due to Weathering / 61

Preservation of Parent Rock Structures: Generation of Weathering
Plasmas / 63

Pseudomorphoses by Oxyhydroxide Septa: Crystalliplasmas / 64

Pseudomorphoses by Clay Minerals: Argilliplasmas and Complex
Plasmas / 70

Parent Mineral Phases Undergoing Independent Weathering / 70

*Parent Mineral Phases Undergoing Simultaneous Weathering and
Mutual Reactions / 75*

*Parent Mineral Phases Undergoing Simultaneous Weathering and
Whose Secondary Products Also Express an External Supply / 79*

Weathering Argilliplasmas and Their Complexity / 81

Conclusions / 85

Relative Positions of Parent Relicts and of Weathering Plasmas: Mineral
Parentages / 86

Morphology of Distributions / 86

Peripheral Distribution / 86

Patchy Distribution / 86

Nature of Contacts / 87

Relative Accumulation in Structure-Preserving Weathering / 90

3 Structural Transformations of Pedoturbation

97

Microstructural Transformations of Isovolumetric Alterites / 98

Evolution toward Petrographic Structures of Vertisolic Horizons / 98

Alterite of Migmatite (Horizon C) / 99

*Transition between Alterite (or Saprolite) and Pedoturbated
Horizons / 99*

<i>Pedoturbated Horizon of Vertisolic Type / 101</i>	
Evolution toward Ferralitic Petrographic Structures / 102	
<i>Migmatite Alterite / 102</i>	
<i>Ferralitic Pedoturbated Alterite / 102</i>	
Characteristics of Pedoturbation / 104	
Increasing Weathering Plasmation and Pedoturbation / 104	
Pedoturbation and Isovolum / 105	
Pedoturbation of Nonargillaceous Horizons / 106	
Plasmic Structures of Weathering and Pedoturbation / 106	
First-Order Ultrastructures: Sheets, Layers, Crystallites, Particles and Association of Particles / 108	
<i>Introduction / 108</i>	
<i>Layers and Crystallites / 108</i>	
<i>Argillaceous Particles / 109</i>	
<i>Association or Arrangement of Particles / 111</i>	
<i>First-Order Argillaceous Structures and Their Relationship with Water / 114</i>	
Second-Order Microstructures: Juxtaposed Crystallites, Domains, and Networks of Tactoids / 116	
<i>Introduction / 116</i>	
<i>Major Types of Microstructures Argillaceous Plasmas / 117</i>	
<i>Relationship between First-Order and Second-Order Plasmic Structures / 118</i>	
<i>Effects of Drying and Wetting on Microscopic Argillaceous Structures / 122</i>	
Third-Order Macroscopic Structures: S-Matrix and Peds / 126	
<i>Introduction / 126</i>	
<i>Macroscopic Structures of Argillaceous Plasmas / 127</i>	
<i>Relationship between Second-Order and Third-Order Plasmic Structures / 128</i>	
<i>Effects of Drying and Wetting on Macroscopic Argillaceous Materials / 129</i>	
Conclusions / 132	
4 Transfers and Accumulations	135
Characteristics of Loss of Material / 135	
Leached Horizons / 135	
<i>Differentiation of Microstructures of Leached Horizons / 136</i>	
<i>Survival of Microstructures of Leached Horizons / 139</i>	

Succession and Hierarchy of Microstructures Typical of Loss and Accumulation of Material / 147

Characteristics of Accumulation of Material / 148

Accumulations Developed in S-Matrix: Glaebulization / 149

Weakly Differentiated Glaebular Accumulations: Initial Concentrations / 149

Moderately Differentiated Glaebular Accumulations: Nodules / 150

Strongly Differentiated Glaebular Accumulations: Well-defined Nodules and Individualization of Cortex / 154

The Different Stages of Glaebular Microstructure / 158

Processes of Glaebulization / 160

Continuous Glaebular Structures: Duricrusts / 162

Evolutionary Mineralogical Sequences in Glaebular Accumulation / 167

Accumulations of Material in Micropore and Macropore Systems: Coatings / 170

The Different Types of Cutanic Accumulation / 170

Subcutanic Features: Neocutans and Quasicutans / 175

Transformations Affecting Cutans / 176

Historical and Geochemical Differentiations of Accumulation / 187

 Structures Resulting from Successive Accumulations / 187

 Structures Resulting from Simultaneous Accumulations / 188

 Pseudobrecciated and Pseudoconglomeratic Structures of Accumulation / 191

Lateritic Profiles on Phosphatic Rocks of Lam Lam / 191

Other Examples of Pseudobrecciated or Pseudoconglomeratic Structures / 198

Degradation of Accumulation Structures / 199

 Pisolitic Structures: Reorganization or Degradation? / 199

Banded Structures of Reorganization / 199

Banded Structures of Aggradation / 200

Degradation by Geochemical Fragmentation / 200

Banded Structures of Degradation / 204

Conclusions: Evolution of Microstructural Features of Accumulation and Transfer / 205

 Inherited Microstructures / 205

 Accumulation Microstructures / 206

 Transformation Microstructures / 206

 Leaching Microstructures / 206

 Microstructures Are Progressive / 206

5 Differentiation and Evolution of Pedologic Mantles of Tropical and Subtropical Zones	207
Pedologic Mantles of Tropical Humid Landscapes / 208	
Distribution of Major Horizons / 208	
Horizons with Polyhedric Structure and with Microaggregates of Tropical Humid Pedologic Mantles / 209	
<i>Data from the Pedologic Analysis / 210</i>	
<i>Results of the Analytical and Experimental Approach / 212</i>	
Sequences with Lateral Differentiation Resulting from a Change in Drainage Conditions / 215	
Derived Sequences Resulting from a Change in Climatic Conditions / 223	
Pedologic Mantles of Tropical Landscapes with Alternating Dry and Rainy Seasons / 228	
Pedologic Mantles of Tropical Landscapes with Predominant Extended Dry Season / 231	
Garango I / 231	
Garango II / 234	
<i>Upslope Domain / 234</i>	
<i>Middle Domain / 236</i>	
<i>Downslope Domain / 236</i>	
Comparison between Garango I and II Sequences / 238	
General Conclusion / 240	
Pedologic Mantles of Subarid Tropical Landscapes / 240	
Pedologic Mantle in Temperate Climate / 245	
Middle Domain / 246	
Upslope Domain (Plateau) / 246	
Downslope Domain / 246	
Conclusions / 248	
Original Horizons and Their Dynamic Evolution / 249	
Horizons with Limited Transformation / 252	
Horizons with Advanced Transformation / 253	
Original Sequences with Vertical Differentiation / 254	
Horizons with Lateral Transformation / 254	
Leaching Transformations / 256	
Accumulating Transformations / 257	
Lateral Eluvial–Illuvial Transformations: Derived Sequences with Lateral Differentiations / 257	

6 Conclusions	259
The Pedologic Cover: A Biogeochemical System / 259	
The Pedologic Cover: Reflection of the Present and the Past / 260	
Monophased Pedologic Covers of the Present / 260	
Polyphased Pedologic Covers of the Past / 260	
The Pedologic Cover: An Interference of Several Histories / 262	
Weathering Rates and Young Pedologic Covers / 262	
Weathering Rates and Old Pedologic Covers / 263	
The Past Pedologic History Seen in the Light of Global Evolution / 264	
Past Climates and Continental Areas / 264	
Time Variation of the CO ₂ Factor / 265	
Sinking of Oxidation Front / 265	
The Temperature Factor / 267	
Interaction between Controlling Factors of Weathering / 267	
Weathering and Structural Discontinuities / 267	
Weathering and Isostasy / 268	
Water Flushing and Reactivity of Rocks to Weathering / 268	
Endless Feedbacks and Evolutive Weathering / 269
