

PREFACE	V
1. Introduction	1
2. Methods to Study Sedimentary Organic Matter	4
2.1 Overview	4
2.2 Microscopy	5
2.3 Rock-Eval pyrolysis	9
3. Deposition of Organic Matter-Rich Sediments	12
3.1 Overview	12
3.2 Transport of organic particles	15
3.3 Deep, marine, silled basins	20
3.4 Upwelling areas	22
3.5 Anoxic continental shelves	27
3.6 Progradational submarine fans	31
3.7 Evaporitic environments	34
3.8 Lakes	37
3.9 Fluviodeltaic coal-bearing strata	41
4. Depositional History of the Posidonia Shale	46
4.1 Overview	46
4.2 Lower Toarcian black shales in Europe	48
4.3 Physical stratigraphy and lithology	52
4.4 Geochemistry and petrology of lithologic units in northern Germany	56
4.5 Nature and origin of lamination	60
4.6 Geochemistry and petrology of Posidonia Shale in southern Germany	63
4.7 Sulphate reduction and primary sediment composition	67
4.8 Accumulation rates, primary productivity, and duration	74
4.9 Depositional history	78

5.	<b>Petroleum Generation</b>	81
5.1	Petroleum source rocks	81
5.2	Maturation and hydrocarbon generation	83
5.3	Optical maturity parameters	84
5.3.1	Identification of macerals at different stages of dispersion	85
5.3.2	Vitrinite reflectance	87
5.3.3	Reflectance of liptinite, zooclasts, and solid bitumen	91
5.3.4	Coloration of palynomorphs and conodonts	93
5.3.5	Spectral fluorescence of liptinites	93
5.4	Chemical maturity parameters	94
5.5	Quantification of petroleum generation	98
5.6	Calibration of temperature histories	103
5.6.1	Overview	103
5.6.2	Simulation of the thermal history of well F	107
5.6.3	Comparison of different vitrinite reflectance calculation methods	112
6.	<b>Microscopic and Sedimentologic Evidence for the Generation and Migration of Petroleum</b>	119
6.1	Evidence for petroleum generation and migration in source rocks	119
6.2	Effects of petroleum impregnation in reservoir rocks	131
7.	<b>Migration of Oil and Gas in Coals</b>	135
7.1	Overview	135
7.2	Physical conditions of migration	139
7.3	Potential migration mechanisms and avenues	143
7.4	Geochemical and microscopic effects of hydrocarbon migration	146
7.5	Mass balance approaches	157
7.6	Migration of gas	165
7.7	Conclusions	168
8.	<b>Weathering of Posidonia Shale in Northern Germany</b>	169
8.1	Overview	169
8.2	Mass and volume balance: Definition and assumptions	170
8.3	Mass and volume balance: Results and discussion	175
8.4	Organic matter characteristics	178
8.5	Rates of weathering processes	182

9.	Summary	186
9.1	Deposition of organic matter-rich sediments	186
9.2	Diagenesis of organic matter-rich sediments	187
9.3	Weathering of organic matter-rich sediments	189
	Appendix	190
