

# BORON: MINERALOGY, PETROLOGY AND GEOCHEMISTRY

## TABLE OF CONTENTS, VOLUME 33

### Tables of General Interest

The following is a list of tables in which information of more general interest is summarized. Some of these are cross-referenced, and some will serve as a sort of "index" to the book.

Chapter 1, Table 1, pp. 8-29:

**Boron minerals: names, mineral groups, formulas, environments, localities.**

Chapter 5 Table 1, pp. 223-234:

**Formulae, end-member structures, and crystallographic properties of boron minerals**

Chapter 5 Table 2, pp. 235-251:

**Measured molar volumes of boron minerals**

Chapter 6. Table 2, pp. 2285-289:

**Major sources of boron in the world today**

Chapter 6. Table 3, pp. 290-298:

**Other significant occurrences of boron in the world**

Chapter 9. Table 5, pp. 400-401:

**Pressures and temperatures estimated for formation of dumortierite, grandidierite, and kornerupine**

Chapter 9. Table 6, pp. 402-403:

**Occurrences of grandidierite**

Chapter 9. Table 13, pp. 441-443:

**Occurrences of kornerupine *sensu stricto* (K) and prismatic (P)**

Chapter 9. Table 17, pp. 461-462:

**B<sub>2</sub>O<sub>3</sub> contents of rock-forming silicate minerals**

Chapter 9. Table 18, pp. 472-473:

**Selected bulk analyses of borosilicate-bearing rocks**

Chapter 10. Table 1, p. 506:

**List of IMA-approved and synthetic tourmaline species**

Chapter 11. Table 1, p. 561:

**Selected tourmaline-bearing tin +/- tungsten greisens, veins, skarns and replacements**

Chapter 11. Table 2, p. 569:

**Selected tourmaline-bearing breccia pipes and porphyry deposits**

Chapter 11. Table 3, p. 575:

**Selected tourmaline-bearing vein deposits in metamorphic rocks**

Chapter 11. Table 4, p. 581:

**Selected tourmaline-bearing stratabound deposits**

Chapter 11. Table 5, p. 592:

**Selected stratiform and/or stratabound tourmalinites**

Chapter 12. Table 6, p. 589:

**Inventory of B and selected elements in Earth reservoirs**

Chapter 14. Table 1, pp. 751-752:

**Boron and gadolinium concentrations in terrestrial rocks**

Chapter 14. Table 2, p. 758:

**Boron in sediments and sedimentary rocks**

**CONTENTS BY CHAPTER**

**MINERALOGY, PETROLOGY AND GEOCHEMISTRY  
OF BORON: AN INTRODUCTION**

Introduction .....	1
Chemistry and Mineralogy.....	1
Analytical Methods .....	3
Geological Applications.....	4
Thermodynamic and Experimental Data.....	4
Other Topics.....	5
Conclusion .....	5
Acknowledgments.....	6
References.....	30

**Chapter 2**

**F. C. Hawthorne, P. C. Burns & J. D. Grice**

**THE CRYSTAL CHEMISTRY OF BORON**

Introduction .....	41
Models of Chemical Bonding in Borates .....	41
Stereochemistry of B $\phi$ <sub>3</sub> and B $\phi$ <sub>4</sub> Polyhedra in Minerals .....	42
Variation in $\langle$ B- $\phi$ $\rangle$ distances .....	42
Variation in B- $\phi$ distances .....	43
General polyhedral distortions in borate minerals .....	44
Molecular-orbital Studies of Borate Polyhedra .....	45
Prediction of equilibrium geometries .....	46
B $\phi$ <sub>3</sub> and B $\phi$ <sub>4</sub> groups .....	46
Finite polynuclear clusters .....	48
Heteropolyhedral clusters.....	50
Calculated deformation-electron-density maps .....	50
Polyhedral stability and reaction energies .....	52
Interpretation of spectroscopic data .....	52
Orbital energies .....	52
X-ray spectra.....	53
NMR spectra .....	53
Vibrational spectra.....	54
Calculation of electronic dipole polarizabilities .....	54
Hierarchical Organization of Crystal Structures .....	54
Polymerization of B $\phi$ <sub>3</sub> and B $\phi$ <sub>4</sub> Polyhedra .....	55
Polyhedral Clusters and Fundamental Building Blocks in Borate Minerals.....	56
B-B graphs .....	56
Algebraic descriptor.....	56
Polyhedral linkage.....	56
Enumeration of Possible Clusters.....	59

A Structural Hierarchy for Borate Minerals .....	65
Structures Based on Isolated Polyhedra .....	65
Structures Based on Finite Clusters of Polyhedra .....	68
Structures Based on Infinite Chains of Polyhedra .....	77
Structures Based on Infinite Sheets of Polyhedra .....	80
Structures Based on Infinite Frameworks of Polyhedra .....	88
Mixed Oxyanion Borates.....	90
Sulphate-borates.....	93
Phosphate-borates.....	93
Arsenate-borate .....	94
Carbonate-borates .....	95
Beryllate borates.....	96
Silicate-borates.....	97
The Occurrence of FBBs in Borate Minerals .....	106
Some General Observations on Borate Mineral Structures .....	108
Acknowledgments.....	109
References.....	110

### Chapter 3

G. Werding & W. Schreyer

## EXPERIMENTAL STUDIES ON BOROSILICATES AND SELECTED BORATES

Introduction .....	117
Experimental Techniques .....	118
Experiments in Boron-bearing Systems.....	119
The system $B_2O_3-SiO_2-H_2O$ .....	120
The system $Na_2O-B_2O_3-SiO_2-H_2O$ .....	120
The system $CaO-B_2O_3-SiO_2-H_2O$ .....	122
The system $MgO-B_2O_3-SiO_2-H_2O$ .....	123
The system $Al_2O_3-B_2O_3-H_2O$ .....	125
The system $Al_2O_3-B_2O_3-SiO_2-H_2O$ .....	127
"Boron-mullites" .....	128
Dumortierite.....	128
Alkali-free Al-tourmaline .....	131
The system $MgO-Al_2O_3-B_2O_3-H_2O$ .....	132
Sihalite .....	133
Al analogue of magnesiohulsite(?) .....	134
"Pseudosihalite".....	134
The system $MgO-Al_2O_3-B_2O_3-SiO_2-H_2O$ .....	138
Grandierite .....	139
Werdingite.....	140
Kornerupine and prismaticine (kornerupine s. l.) .....	143
Magnesiodumortierite.....	147
Alkali-free dravite.....	148
Complex tourmalines.....	149
Dravite .....	150
Uvite .....	152
Elbaite.....	153
Highly aluminous tourmalines, olenite.....	153
Tourmalines with iron and other transition elements .....	154
Serendibite .....	154
Axinite.....	155
Boron micas.....	155
Ludwigite-vonsenite .....	156

Boron in framework silicates .....	157
Concluding Remarks .....	158
Acknowledgments .....	159
References .....	159

## Chapter 4

A. Navrotsky

### THERMOCHEMISTRY OF BOROSILICATE MELTS AND GLASSES— FROM PYREX TO PEGMATITES

Introduction .....	165
Binary and Pseudobinary Borate Systems .....	168
Alkali and alkaline earth borates .....	168
The B <sub>2</sub> O <sub>3</sub> -SiO <sub>2</sub> system .....	171
Charge-coupled substitutions .....	172
The NaBSi <sub>3</sub> O <sub>8</sub> -NaAlSi <sub>3</sub> O <sub>8</sub> join .....	173
Multicomponent Systems with Boron as a Major Element .....	174
Na <sub>2</sub> O-B <sub>2</sub> O <sub>3</sub> -SiO <sub>2</sub> .....	174
Borosilicate glass for commercial use and for radioactive waste containment .....	175
Boron in Magmas .....	176
Unanswered Questions, Missing Data, and Future Directions .....	177
References .....	178

## Chapter 5

L. M. Anovitz & B. S. Hemingway

### THERMODYNAMICS OF BORON MINERALS: SUMMARY OF STRUCTURAL, VOLUMETRIC AND THERMOCHEMICAL DATA

Introduction .....	181
Formulas and Structures of Boron-bearing Phases .....	182
Ammonioborite .....	182
Bakerite .....	183
Charlesite .....	183
Diomignite .....	183
Ginorite/strontioginorite .....	183
Harkerite .....	183
Hellandite .....	183
Holtite .....	183
Hulsite/magnesiophulsite .....	183
Kornrupine .....	184
Manandonite-2H <sub>2</sub> .....	184
Melanocerite-(Ce) .....	184
Nagashimalite .....	184
Peprosiite-(Ce) .....	185
Rhodizite .....	185
Sakhaite .....	185
Sturmanite .....	185
Sussexite .....	185
Tadzhikite .....	185
Taramellite/titantaramellite .....	185
Tienshanite .....	186
Tinzenite .....	187

Tourmaline .....	187
Weringite .....	187
Wiserite .....	187
Volumetric Properties .....	188
Standard state volume .....	188
Thermal expansion and compressibility .....	188
Enthalpy and Gibbs Energy .....	193
Experimentally derived values .....	193
Estimating enthalpy and Gibbs energy of formation .....	193
The system Ca-Mg-B-Si-O-H-Cl-S .....	194
The system K-Na-B-Si-O-H-F-N .....	195
Other chemical systems .....	198
Heat-capacity and Entropy .....	198
Experimentally derived values .....	198
Estimating heat-capacity and entropy .....	198
Conclusions .....	202
Acknowledgments .....	203
References .....	203

## Chapter 6

G. I. Smith & M. D. Medrano

### CONTINENTAL BORATE DEPOSITS OF CENOZOIC AGE

Introduction .....	263
Mineralogy of Borate Deposits .....	264
Diagenetic Reactions between Borate-mineral Assemblages .....	265
Thermal diagenesis .....	266
Reaction diagenesis .....	268
Mechanics of diagenesis .....	269
Chemical Activity Diagrams .....	269
Types of Borate Deposits in Sedimentary Rocks of Cenozoic Age .....	272
Neogene magnesium borate deposits .....	273
Neogene calcium borate deposits .....	273
Neogene sodium-calcium borate deposits .....	274
Neogene sodium borate deposits .....	274
Quaternary sodium-calcium borate deposits .....	275
Quaternary sodium borate deposits .....	276
Quaternary borate-brine deposits .....	276
Origin of Borate Deposits .....	277
Summary .....	279
Acknowledgments .....	280
References .....	280

## Chapter 7

D. London, G. B. Morgan VI & M. B. Wolf

### BORON IN GRANITIC ROCKS AND THEIR CONTACT AUREOLES

Introduction .....	299
Why boron is important .....	299
Getting Boron into Magmas .....	300
Tectonic settings and source lithologies of boron-rich magmas .....	300
Boron in sediments .....	301
Boron in regional metamorphic rocks .....	302
Sources of boron for granitic magmas: The importance of tourmaline .....	303
Stability of tourmaline at subsolidus conditions .....	303
Reaction of tourmaline at the onset of anatexis .....	304

Boron in Magmas.....	305
Melt fractionation and boron concentration.....	305
Tourmaline solubility in granitic melts.....	306
The buffer capacity of reactions between tourmaline, biotite and cordierite.....	307
Petrology of Boron in Peraluminous Silicic Magmas .....	310
Tourmaline in the borders of granites and pegmatites .....	310
Occurrence and composition.....	310
Significance.....	313
Disseminated tourmaline in granites and pegmatites.....	314
Occurrence and composition.....	314
Significance.....	314
Tourmaline in miarolitic cavities.....	314
Occurrence and composition.....	314
Significance.....	317
Breccias and veins within granite or pegmatite.....	318
Occurrence and composition.....	318
Significance.....	318
Petrology of Boron in Peralkaline Magmas .....	319
Metasomatic Reactions with Wallrocks.....	320
Occurrence and composition.....	320
General characteristics .....	320
Around pegmatites.....	321
Around granitic plutons.....	321
Wallrock metasomatism as a record of boron in magma.....	322
Boron and Ore Deposits.....	323
Boron Partitioning and Isotope Geochemistry in Granite Systems .....	323
Concluding Remarks.....	324
Acknowledgments.....	324
References.....	325

## Chapter 8

D. B. Dingwell, M. Pichavant & F. Holtz

### EXPERIMENTAL STUDIES OF BORON IN GRANITIC MELTS

Introduction.....	331
Structural Role of Boron in Melts .....	333
Boron oxide melt.....	333
Borate melts.....	333
Borosilicate and boroaluminosilicate melts.....	334
Hydrous granitic melts.....	337
Physical Properties of Boron-bearing Melts .....	338
Synthesis of boron-bearing haplogranitic melts .....	339
Density.....	339
B <sub>2</sub> O <sub>3</sub> liquid.....	339
Borate and borosilicate melts .....	339
Volume behavior of B <sub>2</sub> O <sub>3</sub> in granitic melts.....	340
Influence of water on the partial molar volume of B <sub>2</sub> O <sub>3</sub> .....	343
Effects of pressure-compressibility.....	344
Viscosity.....	345
B <sub>2</sub> O <sub>3</sub> melt.....	345
Borate melts.....	345
Borosilicate melts.....	346
Boron-bearing granitic melts .....	346
Boron diffusion.....	349
Isotopic versus elemental homogenization rates.....	352

Chemical Properties of Boron-bearing Melts .....	353
Dry boron-bearing systems.....	353
Hydrous boron-bearing systems.....	355
General representation of phase equilibria in silicate-H <sub>2</sub> O-B <sub>2</sub> O <sub>3</sub> ....	355
Effect of B <sub>2</sub> O <sub>3</sub> on granite phase relations: Solidus.....	360
Effect of B <sub>2</sub> O <sub>3</sub> on granite phase relations: Liquidus .....	363
Effect of B <sub>2</sub> O <sub>3</sub> on reciprocal melt/H <sub>2</sub> O miscibilities: H <sub>2</sub> O solubility .....	366
Effect of B <sub>2</sub> O <sub>3</sub> on reciprocal melt/H <sub>2</sub> O miscibilities: Silicate components in the magmatic fluid phase.....	368
Boron melt/fluid partitioning .....	370
B <sub>2</sub> O <sub>3</sub> in hydrothermal fluid phases: Effect on metasomatic processes.....	371
B <sub>2</sub> O <sub>3</sub> in hydrothermal fluid phases: Buffering the boron concentration of natural fluids.....	373
Boron incorporation in feldspars.....	374
Tourmaline stability in magmas: Dravite.....	376
Tourmaline stability in magmas: Quartz-tourmaline assemblages.....	376
Tourmaline stability in magmas: Schorl-dravite .....	377
Acknowledgments.....	379
References.....	379

## Chapter 9

E. S. Grew

### BOROSILICATES (EXCLUSIVE OF TOURMALINE) AND BORON IN ROCK-FORMING MINERALS IN METAMORPHIC ENVIRONMENTS

Introduction.....	387
Borosilicates with Stoichiometric Trigonal Boron.....	389
Dumortierite group .....	389
Description .....	389
Chemical composition.....	389
Occurrence .....	394
Grandidierite .....	398
Description .....	398
Chemical composition.....	398
Occurrence .....	399
Wiserite.....	407
Borosilicates with Non-stoichiometric Trigonal Boron.....	407
Harkerite and sakhaite.....	407
Distinction between harkerite and sakhaite .....	411
Crystallography and chemical composition .....	411
Occurrence .....	413
Occurrence—Skarns .....	413
Occurrence—Mn-rich rocks.....	414
Occurrence—Deep-seated rocks .....	415
Concluding statement .....	415
Werdingite.....	415
Description .....	415
Chemical composition.....	416
Occurrence .....	416
Borosilicates with Stoichiometric Tetrahedral Boron .....	418
Axinite group.....	418
Description .....	418

Crystal structure and chemical composition.....	418
Occurrence .....	421
Danburite .....	424
Crystallography and chemical composition .....	425
Occurrence .....	426
Datolite.....	428
Crystallography and chemical composition .....	429
Occurrence .....	429
Bakerite.....	431
Taramellite group .....	431
Description .....	431
Crystal structure and chemical composition.....	432
Occurrence .....	434
Searlesite and reedmergnerite.....	435
Borosilicates with Non-stoichiometric Tetrahedral Boron.....	436
Kornerupine group: Kornerupine <i>sensu stricto</i> and prismatine.....	436
Description .....	436
Cell parameters.....	437
Chemical composition.....	437
Mineral associations.....	440
Physical conditions of formation.....	445
Interpretation of the assemblages and textures.....	446
Serendibite .....	448
Description .....	449
Chemical composition.....	449
Occurrence .....	450
Leucosphenite.....	452
Hyalotekite .....	454
Manandonite .....	455
Borosilicates with Non-stoichiometric Trigonal and Tetrahedral Boron .....	455
Borian vesuvianite.....	455
Borosilicates with Unknown Boron Coordination.....	457
Oyelite .....	457
Chemical composition.....	458
Occurrence .....	458
Charlesite, wawayandaite and vistepite.....	458
Boron as a Minor Constituent in Rock-forming Minerals.....	459
Tectosilicates .....	459
Layer silicates .....	463
Chain silicates .....	464
Olivine and humite-group minerals .....	464
Garnet.....	465
Melilite group .....	466
Aluminosilicates .....	466
Aenigmatite group and sapphirine.....	467
Miscellaneous minerals .....	468
Origin of the Borosilicates Exclusive of Tourmaline .....	469
Borosilicates in aluminous settings .....	470
"Quartzites" .....	470
Tourmalinites .....	471
Aluminous rocks.....	471
Anatexis .....	475
Pegmatites.....	475
Calcareous setting .....	476
Settings with mafic rocks and meta-pelagites .....	476
Settings enriched in Mn and Ba.....	477
Conclusion .....	478

Acknowledgments.....	478
Appendix.....	479
References.....	480

**Chapter 10**

**D. J. Henry & B. L. Dutrow**

**METAMORPHIC TOURMALINE  
AND ITS PETROLOGIC APPLICATIONS**

Introduction.....	503
Tourmaline Crystallography and Crystal Chemistry.....	503
Tourmaline species and solid solutions.....	507
Minor and trace elements.....	508
Potassium.....	511
Vanadium and nickel.....	511
Zinc.....	511
Analytical procedures.....	511
Electron microprobe analysis and normalization procedures.....	512
Polar Properties of Tourmaline and Its Petrologic Implications.....	514
Polar asymmetry in tourmaline.....	514
Compositional polarity.....	516
Petrologic implications of compositional polarity.....	516
Examples of compositional polarity.....	517
Possible causes for compositional polarity.....	521
Metamorphic Tourmaline Compositions.....	521
Element fractionation in tourmaline relative to coexisting minerals.....	522
Metapelitic rocks and metaquartzites.....	523
Diagenesis and low grade metamorphism.....	524
Medium grade metamorphism.....	525
High grade metamorphism.....	526
High pressure metamorphism.....	526
Calcareous metasediments.....	526
Metamorphosed tourmalinite metasediments.....	527
Metamorphosed granites and pegmatites.....	527
Metamorphosed mafic rocks.....	528
Blueschist facies.....	528
Eclogite facies.....	528
Meta-ultramafic and Cr-rich rocks.....	528
Metamorphosed ironstones.....	529
Meta-evaporite rocks.....	529
Hydrothermally altered rocks.....	530
Tourmaline as a Monitor and Reservoir of Boron.....	530
Boron contents in minerals and rocks.....	530
B in typical pelitic and psammitic sedimentary and metasedimentary minerals and rocks.....	531
B in calcareous sediments, metasediments and skarns.....	532
B in mafic and ultramafic igneous and metamorphic minerals and rocks.....	532
P-T-X stability of tourmaline.....	534
Low temperature and pressure conditions.....	534
High temperature stability.....	534
High pressure stability.....	535
Stability with respect to fluid compositions.....	536
Closed-system behavior and development of tourmaline.....	536

Open system behavior.....	537
Boron mobility in hydrothermal and metamorphic fluids.....	537
Tourmaline growth and external fluids.....	538
Detrital Tourmaline and Provenance.....	539
Geothermometry Involving Tourmaline.....	540
Intermineral element partitioning.....	540
Intramineral polar partitioning.....	542
Isotope thermometry.....	543
Hydrogen isotopes.....	543
Oxygen isotopes.....	543
Tourmaline as a Geochemical Probe.....	543
Boron isotopes.....	543
Oxygen and hydrogen isotopes.....	544
Rb-Sr isotopes.....	544
Silicon isotopes.....	545
Trace elements.....	545
Tourmaline major element chemistry as an exploration guide.....	545
Geochronology Involving Tourmaline.....	545
K-Ar and $^{40}\text{Ar}/^{39}\text{Ar}$ systematics.....	545
Rb-Sr geochronology.....	546
Sm-Nd geochronology.....	546
Fission track thermochronology.....	547
Tourmaline as a Kinematic Indicator.....	547
Acknowledgments.....	547
References.....	547
Appendix.....	557

## Chapter 11

J. F. Slack

### TOURMALINE ASSOCIATIONS WITH HYDROTHERMAL ORE DEPOSITS

Introduction.....	559
Granitoid-related Deposits.....	560
Tin $\pm$ tungsten greisens, veins, skarns, and replacements.....	560
Greisen and vein deposits.....	560
Skarn deposits.....	566
Replacement deposits.....	566
Copper $\pm$ gold breccia pipes and copper $\pm$ molybdenum porphyries.....	568
Gold-bearing veins.....	571
Copper-bearing veins and replacements.....	571
Uranium-bearing veins.....	572
Lead-zinc veins and replacements.....	572
Veins in Volcanic Rocks.....	572
Uranium-molybdenum-zinc deposits.....	572
Silver-gold-zinc deposits.....	573
Modern geothermal analogues.....	573
Veins in Metamorphic Rocks.....	574
Gold deposits.....	574
Copper-gold deposits.....	577
Lead-zinc deposits.....	578
Mercury deposits.....	579
Cobalt-copper deposits.....	579
Stratabound Deposits.....	580
Boron-bearing seafloor hydrothermal systems.....	580

Lead-zinc deposits.....	581
Copper-zinc deposits.....	585
Copper-zinc-cobalt-nickel deposits.....	586
Copper-cobalt deposits.....	586
Gold deposits.....	587
Tungsten deposits.....	589
Uranium deposits.....	590
Tourmalinites.....	590
Field relations.....	591
Mineralogy and petrography.....	593
Whole-rock chemistry.....	593
Origin.....	598
Historical review.....	598
Premetamorphic replacement.....	598
Syngenetic-exhalative processes.....	600
Submarine-hydrothermal leaching.....	601
Colloids and gels.....	602
Evaporitic processes.....	602
Contact metasomatism.....	603
Regional metasomatism.....	603
Metallogeny.....	604
Tourmaline Chemistry.....	605
Granitoid-related deposits.....	605
Veins in volcanic rocks.....	608
Veins in metamorphic rocks.....	609
Stratabound massive sulfides.....	610
Miscellaneous stratabound deposits.....	613
Exploration applications.....	615
Isotopic Compositions.....	616
Oxygen and hydrogen.....	616
Boron.....	618
Silicon.....	620
Strontium and neodymium.....	620
Summary.....	621
Future Research.....	621
Acknowledgments.....	622
References.....	623

## Chapter 12

W. P. Leeman & V. B. Sisson

### GEOCHEMISTRY OF BORON AND ITS IMPLICATIONS FOR CRUSTAL AND MANTLE PROCESSES

Introduction.....	645
Early studies—An historical perspective.....	647
Recent developments—A broadening of scope.....	650
General Inventory of Boron in the Major Reservoirs.....	650
Boron in fluids and the hydrosphere.....	651
The oceans.....	651
Ocean-floor hydrothermal fluids.....	653
Subaerial geothermal fluids.....	653
Fluid inclusions as relicts of deep crustal or magmatic fluids.....	655
Formation waters.....	656
Atmospheric boron.....	656
Anthropogenic contributions.....	656

Boron in crustal rocks and average continental crust .....	657
Sediments and sedimentary rocks.....	657
Diagenetic effects .....	659
Weathering .....	659
Evaporative borate deposits.....	660
Tourmalinites .....	660
Summary of inventories.....	660
Temporal evolution of the oceans and continental crust.....	661
Metamorphic rocks .....	662
Hydrothermal metamorphism .....	662
Contact metamorphism.....	662
Regional metamorphism .....	667
Granulites .....	670
Migmatites.....	672
Impact metamorphism.....	673
Distribution of B in metamorphic and igneous minerals.....	673
Igneous rocks .....	675
Ocean floor basalts and oceanic crust.....	675
Granitic rocks .....	677
Silicic volcanic rocks .....	680
Petrogenetic implications .....	681
Estimated inventories in major reservoirs .....	682
Implications of Boron Geochemistry for Subduction Processes.....	682
Boron systematics in arc lavas.....	682
Petrologic implications.....	687
Reflections on Global Geochemical Fluxes .....	688
Cosmochemistry of Boron.....	690
Meteorites .....	690
Lunar samples.....	690
Solar abundances and condensation temperatures.....	691
Acknowledgments.....	692
Appendix. Brief Overview of Modern Analytical Methods.....	692
Macro-analytical methods.....	692
Prompt-gamma neutron activation .....	692
Plasma emission spectroscopy .....	693
Isotope dilution mass spectrometry .....	693
Micro-analytical methods .....	693
Alpha-track mapping .....	693
Secondary ionization mass spectrometry (ion microprobe).....	693
Electron microprobe.....	694
Geochemical reference samples for boron analysis.....	695
References.....	695

## Chapter 13

M. R. Palmer & G. H. Swihart

### BORON ISOTOPE GEOCHEMISTRY: AN OVERVIEW

Introduction .....	709
Isotope Fractionation.....	710
Theoretical.....	710
Tourmaline-aqueous vapor .....	711
Geothermal processes.....	713
Carbonate-water .....	714
Borate-water .....	715
Mantle and Cosmochemistry .....	717
Cosmochemistry.....	717

Tekites .....	717
Mantle geochemistry .....	717
Interaction of Seawater with Oceanic Crust .....	719
Marine Sediments.....	721
Sediment geochemistry .....	721
Ancient sediments and paleoceanography.....	723
Sediment-hosted hydrothermal systems.....	723
Island Arcs and Subduction Zones.....	725
Continental Geothermal Systems .....	727
Evaporites.....	728
Tourmaline.....	733
General .....	733
Broken Hill (Australia).....	735
Barberton (South Africa).....	736
Evolution of the continental crust and seawater.....	738
Metamorphic Environments.....	738
Future Developments .....	739
Acknowledgments.....	740
References.....	740

## Chapter 14

D. M. Shaw

### SIMILARITIES AND CONTRASTS IN LUNAR AND TERRESTRIAL BORON GEOCHEMISTRY

Introduction.....	745
Boron in Lunar Rocks.....	745
Bulk concentrations .....	745
Boron and lithium sites in lunar rocks.....	747
Boron and Water in Terrestrial Rocks.....	750
Incompatibility and complications .....	750
Igneous rocks .....	754
Basaltic rocks .....	754
Mantle rocks.....	755
Differentiated igneous rocks.....	755
Magmatic volatiles.....	756
Sedimentary environments .....	758
Metamorphism.....	759
Mass transfer.....	759
Tourmaline breakdown .....	761
Boron within terrestrial rocks.....	762
Summary .....	763
Addendum.....	764
Acknowledgments.....	764
References.....	764

## Chapter 15

J. J. McGee & L. M. Anovitz

### ELECTRON PROBE MICROANALYSIS OF GEOLOGIC MATERIALS FOR BORON

Introduction.....	771
Instrumental and Analytical Developments.....	771
Energy-dispersive spectrometry (EDS) .....	772

Wavelength-dispersive spectrometry (WDS).....	772
Layered synthetic microstructures (LSM).....	772
Analytical conditions.....	775
Accelerating voltage.....	775
Beam current.....	776
Counting times.....	776
Spectral properties.....	776
Standards.....	778
Matrix correction procedures.....	779
Sample preparation.....	781
EPMA Analysis of Minerals for Boron.....	781
Kornerupine.....	782
Vesuvianite.....	782
Tourmaline.....	782
Summary and Future Considerations.....	785
Acknowledgments.....	786
References.....	786

## Chapter 16

R. L. Hervig

### ANALYSES OF GEOLOGICAL MATERIALS FOR BORON BY SECONDARY ION MASS SPECTROMETRY

Introduction.....	789
Analytical Techniques.....	789
Instrumentation.....	789
General description of analysts conditions.....	789
Sample charging.....	790
Secondary ion characteristics.....	791
Quantification.....	792
Working curves.....	792
Matrix effects.....	792
Ion implantation.....	795
Limits on B analysis by SIMS.....	796
Detection level.....	796
Contamination.....	796
Applications.....	796
Microanalyses.....	796
Diffusion measurements.....	798
Isotope ratio measurements.....	798
Ion imaging.....	798
Future Work.....	799
Acknowledgments.....	800
References.....	800

## Chapter 17

J. D. Robertson & M. D. Dyar

### NUCLEAR METHODS FOR ANALYSIS OF BORON IN MINERALS

Introduction.....	805
Nuclear Methods compared to EMPA and SIMS.....	805
Particle-induced Nuclear Reaction Analysis.....	806
Prompt-gamma Neutron Activation Analysis.....	812

Fast Neutron Activation Analysis .....	815
Summary .....	818
Acknowledgments .....	818
References .....	819

## Chapter 18

L. A. J. Garvie & P. R. Buseck

### PARALLEL ELECTRON ENERGY-LOSS SPECTROSCOPY OF BORON IN MINERALS

Introduction .....	821
Experimental EELS .....	821
Relation to Other Analytical Methods .....	823
Interactions of Electrons with Matter .....	824
The EELS spectrum .....	824
EELS Spectra of Minerals containing Boron .....	826
Quantification .....	826
The coordination fingerprint .....	828
Determination of site occupancy .....	830
Beam damage .....	832
High-spatial-resolution EELS .....	833
Interpretation of the B K ELNES .....	833
Molecular Orbital (MO) approach .....	833
Multiple scattering .....	834
Band structure .....	836
Additional bonding information .....	836
Site symmetry and structure .....	837
Bond character .....	838
Summary .....	838
Acknowledgments .....	839
References .....	839

## Chapter 19

G. H. Swihart

### INSTRUMENTAL TECHNIQUES FOR BORON ISOTOPE ANALYSIS

Introduction .....	845
Mass Spectrometry of Boron .....	845
Magnetic sector mass spectrometry .....	845
Thermal ionization—positive ions .....	845
Thermal ionization—negative ions .....	849
Comparison of the thermal ionization mass spectrometric methods .....	851
Electron impact ionization .....	852
Primary beam sputtering .....	853
Glow discharge .....	853
Quadrupole mass spectrometry .....	853
Chemical ionization .....	853
Electron impact ionization .....	854
Inductively coupled plasma ionization .....	854
Other instrumental techniques .....	854
Sample Preparation Methods .....	855

Sample decomposition and dissolution.....	856
Fluxed fusion .....	856
Acid dissolution.....	856
Pyrohydrolysis .....	856
Boron separation methods .....	857
Methyl borate distillation.....	857
Ion exchange .....	857
Organic removal .....	858
General precautions .....	858
Isotope Standards for Boron.....	859
General Summary .....	859
Acknowledgments.....	859
References.....	860
