I Principles and practices of water harvesting	I
1.1 Introduction	1
1.2 Concept and definition of water harvesting	2
1.3 History	3
1.4 Components of water harvesting systems	6
1.5 Importance and benefits of water harvesting	7
1.6 Impact of global climate change and adaptation measures	8
2 Hydrological aspects of water harvesting	II
2.1 Introduction	11
2.2 The hydrological cycle	11
2.3 Small hydrological watershed model	13
2.4 Hydrological characteristics	13
2.4.1 Evapotranspiration	14
2.4.2 Precipitation	14
2.5 Frequency analysis and design rainfall	16
2.6 Rainfall-runoff relationship	18
2.6.1 Factors affecting runoff	18
2.6.1.1 Soil type	18
2.6.1.2 Rainfall characteristics	18
2.6.1.3 Land cover	18
2.6.1.4 Slope of the micro-catchment	19
2.6.1.5 Size and shape of the micro-catchment	19

2.6.2	Runoff models suitable for water harvesting	20
2.6.2.1	Runoff models for micro-catchment water harvesting	21
2.6.2.2	Runoff models for macro-catchment water harvesting	26
3	Methods and techniques in water harvesting	31
3.1	Introduction	31
3.2	Classifications of water harvesting methods	32
3.3	Micro-catchment water harvesting methods	33
3.3.1	Rooftop and courtyard systems	36
3.3.1.1	Suitable surfaces	36
3.3.1.2	Issues to be addressed	40
3.3.2	On-farm systems	41
3.3.2.1	Inter-row water harvesting	41
3.3.2.2	Negarim	43
3.3.2.3	Meskat	46
3.3.2.4	Contour bench terraces	46
3.3.2.5	Small pits	47
3.3.2.6	Contour bunds and ridges	48
3.3.2.7	Semicircular and trapezoidal bunds	51
3.3.2.8	Eyebrow terraces	53
3.3.2.9	Rectangular bunds	53
3.3.2.10	Vallerani-type micro-catchments	55
3.4	Macro-catchment water harvesting techniques	57
3.4.1	Introduction	57
3.4.2	Long-slope water harvesting	58
3.4.2.1	Hillside conduit systems	58
3.4.2.2	Limans	63
3.4.2.3	Large semicircular or trapezoidal bunds	64
3.4.2.4	Cultivated tanks/reservoirs and hafairs	64
3.4.3	Floodwater harvesting systems	65
3.4.3.1	<i>Wadi</i> -bed water harvesting systems	66
3.4.3.2	<i>Off-wadi</i> systems	69
3.5	Harvesting water for animal consumption	70
3.5.1	Traditional techniques	70
3.5.2	Modern techniques	71
3.6	Contamination concerns	71
4	Runoff inducement methods	73
4.1	Introduction	73
4.2	Methods of improving runoff	73

4.2.1	Creating shallow channels	74
4.2.2	Clearing the catchment	74
4.2.3	Smoothing the soil surface	74
4.2.4	Compacting the soil surface	75
4.2.5	Surface sealing	77
4.2.6	Impermeable coverings	78
4.3	Advantages and disadvantages of runoff-inducement methods	83
4.4	Further considerations	84
5	Identification of areas suitable for water harvesting	87
5.1	Introduction	87
5.2	Parameters for identifying suitable areas	87
5.2.1	Rainfall characteristics	87
5.2.2	Hydrology and water resources	89
5.2.3	Vegetation and land use	90
5.2.4	Topography, soil type and soil depth	90
5.2.5	Socioeconomics and infrastructure	92
5.3	Methods of data acquisition	93
5.3.1	Overview	93
5.3.2	Ground truthing	93
5.3.3	Aerial photography	94
5.3.4	Satellite and remote-sensing technology	94
5.4	Tools	98
5.4.1	Maps	98
5.4.1.1	Topographic maps	98
5.4.1.2	Thematic maps	98
5.4.2	Aerial photographs	98
5.4.3	Geographic information systems	98
5.5	Decision trees	103
6	Planning and design of water harvesting systems	105
6.1	Introduction	105
6.2	Soil–water–plant–climate relations	105
6.2.1	Soil	105
6.2.1.1	Texture and structure	106
6.2.1.2	Water-holding capacity and soil depth	106
6.2.1.3	Infiltration rate	108
6.2.2	Crop water requirements	108
6.2.2.1	Plant and drought	109
6.2.2.2	Estimating crop water needs	110
6.2.2.3	Field water budget	112

6.3	Rainfall	117
6.3.1	Inter-seasonal distribution of rainfall	117
6.3.2	Design rainfall	117
6.3.3	Need for storage	119
6.3.4	Basic design procedure	119
6.3.5	Selection of site and method	121
6.3.6	Selection of crops	123
6.3.7	Runoff estimation	124
6.3.8	Catchment: Cropping area ratio (CCR)	124
6.3.9	Design examples	125
6.3.10	Optimization of system design	126
6.3.11	Further considerations in area ratio selection	126
6.4	Design considerations for trees	128
6.4.1	Design for trees	128
6.4.2	Life-saving harvested water	129
6.5	Dimensioning, materials and estimation of quantities	129
6.5.1	Dimensioning and system layout	129
6.5.2	Bund earthwork	133
6.5.3	Earthwork balance	135
7	Storage of harvested water	137
7.1	Introduction	137
7.2	Soil profile	138
7.3	Above ground storage	140
7.4	Surface/ground storage	143
7.4.1	Small storage ponds	144
7.4.2	Small farm reservoirs	144
7.4.3	Tanks	145
7.4.4	Hafairs	148
7.4.5	Large reservoirs	149
7.5	Subsurface/underground storage	149
7.5.1	Cisterns	149
7.5.2	Lining water storage structures	155
7.5.3	Groundwater dams	156
7.5.3.1	Sand-storage dams	156
7.5.3.2	Percolation dams	157
7.5.3.3	Subsurface dams	158
7.6	Selection of storage system	160
8	Implementation, operation, and maintenance of water harvesting systems	163
8.1	Introduction	163
8.2	Implementing water harvesting systems	163

8.3	Considerations in implementation	167
8.3.1	Over-design and under-design issues	168
8.3.2	Appropriate technology	169
8.4	Operating water harvesting systems	170
8.5	Maintaining water harvesting systems	172
8.6	Monitoring and evaluation	173
8.7	Extension and training	177
9	Socioeconomic issues	183
9.1	Introduction	183
9.2	Social feasibility studies	183
9.3	Land-tenure issues	184
9.4	Analyzing costs and benefits of water harvesting	184
9.4.1	Costs in water harvesting	185
9.4.2	Benefits of water harvesting	186
9.4.3	Economic feasibility analysis	187
	9.4.3.1 Micro-catchments for field crops	188
	9.4.3.2 Macro-catchments in sub-Saharan Africa	189
	9.4.3.3 Examples from China and India	190
	9.4.3.4 Some general recommendations	191
9.5	Integrated approach to planning and management	191
9.5.1	The role of government agencies	193
9.5.2	Community participation	193
9.5.3	Gender representation	195
9.5.4	Farmers as managers	195
9.5.5	The role of experts and donor agencies	196
9.5.6	Adoption or non-adoption of interventions	197
9.6	Water harvesting and sustainability in agriculture	198
9.6.1	Resource sustainability	199
9.6.2	Ecological sustainability	200
9.6.3	Social sustainability	200
9.6.4	Other sustainability aspects	201
	9.6.4.1 Economic sustainability	201
	9.6.4.2 Technological sustainability	201
	9.6.4.3 Political sustainability	201
10	Water quality and environmental considerations	203
10.1	Introduction	203
10.2	Water harvested for human consumption	203
10.3	Water harvested for animal consumption	204
10.4	Water harvested for crop production	206
10.5	Water quality considerations	207
	10.5.1 Rooftop and courtyard systems	207

10.5.2	Runoff water from on-farm micro-catchment systems	211
10.5.3	Long-slope water harvesting	211
10.5.4	Floodwater harvesting	212
10.6	Impacts on downstream ecosystems and biodiversity	214
10.7	Water-borne diseases	215
