<i>Contributors</i>	xi
<i>Foreword: The Art of Reversing Heart Disease</i>	xix
I. Introduction to Cardiac Disease	1
<i>Erin Bohula and Richard T. Lee</i>	
1. Cardiovascular Disease: The Leading Cause of Death	1
2. Conventional Treatment Strategies	2
3. Myocardial Regeneration	4
4. Summary and Concluding Remarks	5
References	7
II. Growth and Differentiation of the Developing Heart	11
<i>Bram van Wijk, Gert van den Berg, Maurice J. B. van den Hoff and Antoon F. M. Moorman</i>	
1. Introduction	11
2. Myocardium	14
3. Endocardium	21
4. Epicardium	26
5. Cardiac Regeneration	30
References	33
III. Does Heart Regeneration Occur?	45
A. Cardiac Regeneration in the Newt	45
<i>Thilo Borchardt and Thomas Braun</i>	
1. Introduction	45
2. Morphological Characteristics of Cardiac Regeneration in Newts	46

3.	Generation of Newly Formed Cardiac Tissue by Partial Dedifferentiation of Mature Cells	49
4.	Proliferative Potential of Newt Cardiomyocytes <i>in Vivo</i> and <i>in Vitro</i>	50
5.	Future Perspectives and Conclusions	52
	References	53
B.	Zebrafish Heart Regeneration	59
	<i>Robert J. Major and Kenneth D. Poss</i>	
1.	Introduction	59
2.	Zebrafish: A Unique Vertebrate Combination of Regeneration and Modern Tools	60
3.	Heart Regeneration in Zebrafish	63
4.	Homeostatic Cardiac Growth and Maintenance in Zebrafish	72
5.	Future Progress on Zebrafish Heart Regeneration	74
6.	Summary	75
	References	76
C.	Regenerative Potential of the Mammalian Heart	81
	<i>May Liang-Lam and William C. Claycomb</i>	
1.	Introduction	82
2.	Overview of the Cell Cycle	82
3.	Studies Establishing the Phenomenon of Cell Cycle Withdrawal in the Postnatal Mammalian Heart	84
4.	Experimental Manipulations of Mammalian Cardiomyocytes During Development	87
5.	Experimental Manipulation of Mammalian Cardiomyocytes during Postnatal Development	92
6.	Adult Stem Cells Found in the Mammalian Heart	95
7.	Summary and Concluding Remarks	96
	Acknowledgments	97
	References	97

IV. Repopulation of the Heart with New Cardiomyocytes	105
A. Induction of Cardiomyocyte Proliferation	105
<i>Machteld J. van Amerongen and Felix B. Engel</i>	
1. Introduction	105
2. Cell Cycle Activity in Healthy and Diseased Hearts	106
3. Induction of Cell Cycle Progression <i>in Vitro</i>	109
4. Therapeutic Inventions	120
5. Summary and Concluding Remarks	126
Acknowledgments	129
References	129
B. Multipotent Progenitor Cells in Regenerative Cardiovascular Medicine	135
<i>Jason T. Lam, Alessandra Moretti and Karl-Ludwig Laugwitz</i>	
1. Introduction	135
2. Diverse Cardiovascular Cell Lineages Arise from Multipotent Embryonic Progenitor Populations	137
3. Resident Cardiac Stem/Progenitor Cell Populations of the Fetal and Adult Heart	141
4. Nuclear Reprogramming as a Technique to Obtain Human Multipotent Cardiovascular Progenitor Cells	144
5. Summary	147
Acknowledgments	148
References	148
C. Circulating Progenitor Cells	155
<i>Masamichi Koyanagi and Stefanie Dimmeler</i>	
1. Introduction	155
2. Hematopoietic and Endothelial Progenitor Cells	156
3. Mesenchymal Stem/Progenitor Cells	164
4. Summary and Concluding Remarks	166
References	166

D.	Pluripotent Stem Cells for Cardiac Repair	175
	<i>Kara White Moyes, Scott D. Lundy and Michael A. Laflamme</i>	
1.	Introduction	176
2.	Undifferentiated Pluripotent Stem Cells: Derivation, Phenotype, and Culture	177
3.	Phenotype of Cardiomyocytes Derived from Human Pluripotent Stem Cells	180
4.	Avoiding Tumor Formation: Approaches to Deriving Enriched Preparations of Cardiomyocytes from Pluripotent Stem Cells	184
5.	Other Challenges to the Development of Cardiac Therapies Based on Pluripotent Stem Cells	191
6.	Preclinical Experience with Cardiac Repair Using Pluripotent Stem Cells	195
7.	Summary and Concluding Remarks	201
	References	202
V.	What is the Paracrine Effect of Stem Cells?	219
A.	Stem Cell Therapy for Heart Repair: The Paracrine Paradigm	219
	<i>Massimiliano Gneccchi, Maria Mirotsoiu and Victor J. Dzau</i>	
1.	Introduction	219
2.	Paracrine Mechanisms	221
3.	Future Direction in Stem Cell-Mediated Paracrine Mechanisms	232
4.	Conclusion	239
	Acknowledgments	239
	References	240
B.	Delivery Systems to the Heart	247
	<i>Kathryn M. Rafferty and Michael E. Davis</i>	
1.	Introduction	247
2.	Cell-Based Delivery Systems	249
3.	Paracrine Factor-Based Delivery Systems	254

4. Microparticle-Based Delivery	255
5. Hydrogel-Based Delivery	256
6. Non-Viral Gene Delivery Systems	258
7. Future for Cardiac Delivery Using Biomaterial Scaffolds	260
References	261
VI. How to Create an Artificial Heart <i>Ex Vivo</i>?	269
A. The Mechanical Heart	269
<i>JoAnn Lindenfeld and Patricia A. Kelly</i>	
1. Introduction	270
2. History	270
3. Situations in Which to Consider a Mechanical Heart	271
4. Mechanical Hearts: Types of Devices	272
5. Mechanical Hearts: Specific Devices	274
6. Clinical Trials	282
7. Use as an Assist in Myocardial Recovery	286
8. Complications	287
9. Costs	290
10. Future Directions	291
References	292
B. Engineered Heart Tissue	299
<i>Thomas Eschenhagen and Wolfram-Hubertus Zimmermann</i>	
1. Introduction	300
2. Is there a Clinical Need for Tissue Engineered Myocardial Patches?	300
3. Ideal Properties of an Engineered Myocardial Patch	303
4. Principal Strategies in Tissue Engineering	307
5. Heart-Like Tissue Structure	310
6. Bottlenecks	316
7. Perspectives	318
Acknowledgments	319
References	319

VII. The Complexity of Organ Regeneration	327
<i>Tatyana Novoyatleva and Felix B. Engel</i>	
1. Introduction	327
2. The Complexity of the Heart	328
3. Regeneration of the Heart	331
4. From Regeneration Model System to Therapy	334
5. The Extracellular Matrix	336
6. Summary and Concluding Remarks	338
Acknowledgments	339
References	339
VIII. Cell Therapy Trials in Patients with Coronary Heart Disease	345
<i>Kai C. Wollert</i>	
1. Introduction	345
2. What Have We Learnt from the First Clinical Trials?	347
3. What Can We Expect from Ongoing Clinical Trials?	354
4. Where do We Go from Here?	360
Acknowledgments	361
References	361
<i>Index</i>	369
