MARMARA UNIVERSITY FACULTY of PHARMACY

*From 1963 to the Future
Pursuing the Science,
Serving to Pharmacy*

WHY BEING A PHARMACIST?

- Pharmacists are one of the crucial rings of the chain formed by doctors, patients and other health care professionals in the health sector.

- Pharmacists are demanded people due to their wide knowledge on any kind of drug-related subjects.

Based on above listed qualifications;

- They have the opportunity to find employment and promote easily in various areas of pharmaceutical industry like research and development, quality control, quality assurance, patents, manufacturing, regulatory affairs, clinical research, marketing and product management, cosmetology, biotechnology and phytotherapy.

- They have the opportunity to work in public and private hospitals and take part in clinical pharmacy staff depending on their expertness.

- After graduation, pharmacists have the opportunity to specialize in various branches of pharmacy, like drug or patient-centered, and take part in the academic staff of one of the great number of pharmacy faculties in the country. Besides, they can be an researcher in ever increasing number of research centers and technology institutes.

- There is also the opportunity for the graduates to have their own business and work in pharmacies.

WHY MARMARA UNIVERSITY?

According to the OSYM rankings, our faculty has been among the top three favorite pharmacy faculties since 2008.

You will have the opportunity to access modern and innovative education via our young, dynamic, highly motivated academic staff that both produce and teach science.

You can keep professionally updated benefiting from the computer laboratory and the active learning center of our faculty.

You can improve yourselves via contributing science, culture and art activities at the student club center during your free time.

You can benefit from "career days" in which seminars regarding professional subjects take place and get the opportunity to have applied training from the members of the drug industry and trade associations.

You can conduct your graduation thesis in the Central Research Laboratory and Marmara Drug Formulation Development Unit which are fully equipped with highly technological devices.

After graduation, you can keep in touch with the faculty and professional environment via Alumni Association.

You can invest in your career via the various masters and doctorate degree programs.

OUR FACULTY

- Is the first pharmacy faculty that completed and started to practice the 5-year education syllabus.

- Is fully accredited by the National Association of Pharmacy Accreditation for 6 years as of 6 January 2015.
