

Contents

1. Introduction	1
1.1 Purpose of This Book	2
1.2 Basic Material Characterization and Preparation	2
1.2.1 Hydrogenated Amorphous Silicon	2
1.2.2 Nano-Crystalline Films	5
1.2.3 Fullerenes	8
2. Basic Concepts of Low-Mobility Transport	11
2.1 Localization	11
2.2 Definition of Transport Parameters	14
2.3 Experiments to Probe the Carrier Transport	16
3. Transport in a-Si:H and Its Alloys	21
3.1 Basic Experimental Results	21
3.2 Time-Resolved Photoconductance	22
3.2.1 Trapping in Shallow Band-tail States	23
3.2.2 Drift Mobility	24
3.2.3 Electric Field Profiles	26
3.2.4 Transition From Shallow to Deep States	27
3.2.5 Trapping in Deep States	28
3.2.6 Correlation Between Shallow and Deep States	29
3.3 Unipolar Devices	30
3.3.1 Light-Activated Charge Storage Device	30
3.3.2 Thin-Film-Transistor (TFT)	30
3.4 Recombination-Limited Transport	32
3.4.1 Undoped a-Si:H	33
3.4.2 Doped and Alloyed Films	33
3.4.3 Structural Relaxation Effects	35
3.5 Bipolar Transport: a-Si:H Solar Cells	36
3.6 Summary	39
4. Transport in Porous TiO₂ and TiO₂-Based Devices	41
4.1 Basic Characterization of Porous TiO ₂	41
4.1.1 Structural Characterization	41

VIII Contents

4.1.2	Doping	41
4.1.3	Quantum Confinement	44
4.2	Photoelectric Properties	45
4.3	Solid-State Hetero-Junctions	52
4.3.1	Schottky Barrier Devices	52
4.3.2	Semiconductor Hetero-Junctions	52
4.3.3	Quantum Dot Hetero-Junctions	54
4.4	Devices	59
4.4.1	The Eta-Cell Concept	59
4.4.2	Material Selection and First Experimental Results	61
5.	Transport in C₆₀	65
5.1	Basic Results	65
5.1.1	Dark Conductivity	65
5.1.2	Photocurrent Spectra	66
5.2	Intra-Molecular Excitation Scheme	67
5.2.1	Theoretical Background	67
5.2.2	Experimental Results for the 00-Transition	69
5.3	Intermolecular Charge Transport in C ₆₀ Films	70
5.3.1	Quantum Generation Efficiency and Carrier Range	71
5.3.2	The Nature of Transport States in C ₆₀	73
5.3.3	Mechanism of Charge Transport	75
5.3.4	Electron and Hole Drift Mobilities and Recombination Times	76
5.4	Effect of Oxygen	78
5.5	Discussion of Transport Results	81
5.6	The Polymer–Fullerene Solar Cell	82
6.	Conclusions	83
	References	87
	Index	97
