Contents

1 Introduction **13**

2 Background **17**

2.1 Prosodic and International Structure 17
2.1.1 Annotation Schemes 19
2.1.2 Intonational Meaning 36
2.2 Information Structure 41
2.2.1 Basic Concepts 43
2.2.2 Modern Hierarchical Theories 53
2.3 Defining Contrast 61
2.3.1 Alternative-Sets 66
2.3.2 A Definition Problem 77
2.3.3 Prosodic Issues 81

3 Production Experiment **89**

3.1 Hypotheses 91
3.2 Method 93
3.3 Preprocessing and Annotation 102
3.3.1 Preprocessing 103
3.3.2 Annotation 104
3.3.3 Description of Acoustic Variables 106
3.4 Results 111
3.4.1 Contrast *Makes* a Difference 112
3.4.2 Peak Height and Peak Alignment 118
3.4.3 Analysis of Rheme Accents 123

3.5 Discussion . . . 125
3.5.1 Evaluation of the Method . . . 125
3.5.2 Summary . . . 129

4 Perception Experiments 131
4.1 The Choice of Perception Method . . . 132
4.1.1 Material from Production Data . . . 132
4.1.2 Identification Tasks . . . 135
4.1.3 Rating Tasks with Resynthesised Material . 137
4.2 Influence of Peak Height and Peak Alignment . . . 142
4.2.1 Manipulation I (late peak = late trough) . 143
4.2.2 Manipulation II (late peak = low trough) . 149
4.2.3 Evaluation and Conclusion . . . 154
4.3 Influence of Peak Height and Segmental Duration . 159
4.3.1 Pilot Studies for Non-Contrastive Contexts 159
4.3.2 Experiment . . . 165
4.4 Alternative Functions of Prosody . . . 172
4.5 Summary and Conclusion . . . 175

5 Impacts for the Prosody-Semantics Interface 181
5.1 Review: Categorical Perception Experiments . . . 183
5.2 GToBI Labelling Experiment . . . 187
5.3 Discussion . . . 200

6 Discussion 207
6.1 Summary of Experimental Results . . . 208
6.2 Selected Theoretical Aspects and Future Work . . 213

Bibliography 223

A Production Experiment 247
A.I Dialectal Origin of Speakers . . . 247
A.2 Stimuli . . . 248
A.3 Fillers . . . 256
A.4 Qualitative Results . . . 264

B Material for Perception Experiments **271**
B.I Parallel Constructions for Rating Experiments . . 273
B.2 Focus-inducing Questions 275
B.3 Extended Non-Contrastive Contexts 276
