Transport Phenomena

1 Colloid Facilitated Transport In Natural Porous Media: Fundamental Phenomena and Modelling.....	3
D. Grolimund, K. Barmettler, M. Borkovec	
1.1 Introduction.....	3
1.2 Colloidal Particles.....	6
1.3 Fundamental Phenomena.....	7
1.3.1 <i>In-situ</i> Mobilisation of Particles.....	7
1.4 Transport and Persistence.....	14
1.5 Structural Changes.....	18
1.6 Colloid Facilitated Transport.....	19
1.7 Conclusions and Outlook.....	22
References.....	24
2 Influence of Na-bentonite Colloids on the Transport of Heavy Metals in Porous Media.....	29
G. Metreveli, F. H. Frimmel	
2.1 Abstract.....	29
2.2 Introduction.....	30
2.3 Materials and Methods.....	32
2.3.1 Substances and Sample Preparation.....	32
2.3.2 Titration Experiments.....	33
2.3.3 Adsorption Experiments and Modelling.....	34
2.3.4 Transport Experiments.....	36
2.4 Results and Discussion.....	37
2.4.1 Influence of pH Value on the Aggregation of Na-bentonite.....	37
2.4.2 Adsorption of Heavy Metals onto Na-bentonite.....	39
2.4.3 Influence of Na-bentonite on the Transport of Heavy Metals.....	42
2.5 Conclusions.....	49
Acknowledgement.....	50
References.....	50
3 Colloid Transport Processes: Experimental Evidence from the Pore Scale to the Field Scale.....	55
T. Baumann	
3.1 Abstract.....	55

3.2 Pore Scale Phenomena.....	57
3.2.1 Visualization and Quantification of Colloid Transport on the Pore Scale: The Micromodel-Approach.....	57
3.3 Column Scale Phenomena.....	64
3.3.1 Visualization and Quantification of Colloid Transport on the Column Scale: Magnetic Resonance Imaging.....	64
3.3.2 Assessment of Colloid Mass Transfer in Laboratory Columns.....	67
3.4 Pilot Scale Experiments.....	70
3.4.1 Colloidal Transport on the Pilot Scale.....	70
3.5 Colloid Transport on the Field Scale.....	74
3.5.1 Colloidal Transport in Uncontaminated Environments.....	74
3.5.2 Colloidal Transport in Contaminated Environments.....	76
3.6 Outlook.....	80
References.....	81
4 Transport of Colloids in Filter Columns: Laboratory and Field Experiments.....	87
R. Siepmann, F. v. d. Kammer, U. Förstner	
4.1 Introduction.....	87
4.2 Laboratory Studies of Colloidal Transport Behaviour.....	90
4.2.1 Used Materials.....	90
4.2.2 Optimization and Adaption of Analytical Devices.....	91
4.2.3 Laboratory Experiments.....	97
4.3 Field Studies.....	103
4.3.1 Contamination of the Test Site.....	103
4.3.2 Event-Based Characterization of Runoff.....	105
4.3.3 Pilot Plant for the Clean-up of Runoff.....	107
4.4 Discussion and Conclusions.....	110
4.4.1 The Importance of Agglomeration Effects.....	111
4.4.2 Ionic Strength as the Main Problem for Runoff Filtration.....	112
4.4.3 Physical Factors Influencing Filtration.....	112
4.4.4 Improved Filtration Methods.....	113
References.....	113
Biocolloids and Biofilms	
5 Colloid and Microbe Migration in Granular Environments: A Discussion of Modelling Methods.....	119
N. Tufenkji	
5.1 Introduction.....	119

5.2 Classic Methods Used to Model Colloid and Microbe Migration in Granular Porous Media.....	120
5.2.1 The General Advection-Dispersion Equation.....	121
5.2.2 Equilibrium "Adsorption" of Particles.....	121
5.2.3 Kinetic Attachment and Detachment Processes.....	122
5.2.4 Irreversible Attachment onto Sediment Grains.....	122
5.2.5 Microbe Inactivation or Die-off.....	123
5.3 Relevance of Classical Modelling Approaches and Proposed Modifications.....	124
5.3.1 The Equilibrium Adsorption Mechanism is Considered Inappropriate.....	124
5.3.2 Deviation from CFT in the Presence of Repulsive Electrostatic Interactions.....	125
5.3.3 Existing Approaches Fail to Predict the Particle Collision Efficiency, <i>a</i>	126
5.3.4 Larger Microorganisms May be Affected by Physical Straining	129
5.3.5 Surface Biomolecules Can Enhance or Hinder Microbe Attachment	131
5.3.6 Growth and Death Rates of Microorganisms Are Highly Variable	134
5.4 Concluding Remarks	135
Acknowledgements.....	136
Notation.....	136
Symbols.....	136
Greek Symbols.....	137
References.....	137
6 Influence of Biofilms on Colloid Mobility in the Subsurface	143
M. Strathmann, C. F. Leon-Morales, H.-C. Flemming	
6.1 Colloids and Biofilms - an Introduction	143
6.2 Biofilms in the Subsurface	144
6.2.1 What Is a Biofilm?	144
6.2.2 Extracellular Polymeric Substances	145
6.2.3 Environmental Role of Biofilms	147
6.3 Biofilms and their Influence on Hydraulic Conditions in Porous Media	148
6.4 Biofilms and their Influence on Sorption Processes	152
6.5 Biofilms and their Influence on Colloid Mobility	153
6.5.1 Colloids in the Subsurface - from Anorganic to Biotic ...	153
6.5.2 Retention of Colloids in Presence of Biofilms	156
6.5.3 Remobilization of Biofilm-Bound Colloids	161

6.6 Conclusions.....	164
References.....	167
7 Subsurface Transport of Heavy Metals Mediated by Biosolid Colloids in Waste-Amended Soils.....	175
A. Karathanasis, C. Johnson, C. Matocha	
7.1 Materials and Methods.....	176
7.1.1 Biosolid Samples.....	176
7.1.2 Colloid Generation.....	177
7.1.3 Soil Monolith Preparation.....	177
7.1.4 Physical, Chemical and Mineralogical Characterizations.....	177
7.1.5 Colloid Leaching Experiments.....	179
7.1.6 Statistical Analysis.....	179
7.2 Results and Discussion.....	180
7.2.1 Colloid Elution.....	180
7.2.2 Metal Elution in Association with Biosolid Colloids.....	185
7.2.3 Potential Transport Mechanisms.....	195
7.3 Summary and Conclusions.....	197
7.4 Outlook.....	198
References.....	199
 Colloids and Contaminants, Engineering Aspects	
8 Ion - Colloid - Colloid Interactions.....	205
W. H. Van Riemsdijk, L. Weng, T. Hiemstra	
8.1 Introduction.....	205
8.1.1 NOM and Metal (Hydr)Oxides.....	205
8.1.2 Surface Complexation Models.....	205
8.1.3 Ion Speciation in Soils, Sediments and Water.....	206
8.1.4 Interactions between Colloidal Particles.....	207
8.1.5 Modelling Particle Adsorption.....	207
8.2 Ion Binding to Natural Organic Matter.....	209
8.2.1 Ion Binding to NOM.....	209
8.2.2 WHAM and NICA-Donnan Model.....	209
8.2.3 Application of the NICA-Donnan Model to Purified FA and HA.....	211
8.3 Ion Binding to Metal (Hydr)Oxides.....	213
8.3.1 Modelling Ion Binding to Metal (Hydr)Oxides.....	213
8.3.2 MUSIC and CD Model.....	215
8.3.3 Applications of MUSIC Model to Proton Adsorption to Metal (Hydr)Oxides.....	217

8.3.4. Applications of CD Model to Ion Adsorption to Metal (Hydr)Oxides	218
8.4 Modelling Ion Speculation in Natural Samples.....	221
8.4.1 Ion Speciation in Soils, Sediments and Water.....	221
8.4.2 Empirical Modelling Approaches.....	221
8.4.3 Geochemical Equilibrium Calculations.....	222
8.4.4 From the Model System to the Field.....	222
8.4.5 Multi-Surface Model.....	224
8.5 Adsorption of Natural Organic Matter to Minerals.....	226
8.5.1 Adsorption of NOM to Oxides.....	226
8.5.2 Effects of NOM Adsorption on Ion Binding.....	227
8.5.3 Challenges in Modelling Particle Adsorption	229
8.5.4 Adsorption Energy of Variable Charge Particles.....	230
8.5.5 LCD Model Concept.....	234
8.5.6 Vision for Future Development.....	235
Acknowledgements.....	236
References.....	236
9 Release of Contaminants from Bottom Ashes - Colloid Facilitated Transport and Colloid Trace Analysis by Means of Laser-Induced Breakdown Detection (LIBD)	251
R. Köster, T. Wagner, M. Delay, F. H. Frimmel	
9.1 Introduction.....	251
9.2 Methodical Background of the LIBD.....	253
9.2.1 Theoretical Aspects.....	253
9.2.2 Features of the LIBD.....	257
9.3 Materials and Methods.....	257
9.3.1 Colloid Facilitated Heavy Metal Mobilization.....	257
9.3.2 Coupling of a Column Leaching Unit with LIBD.....	259
9.4 Results.....	261
9.4.1 Colloidal Mobilization of Heavy Metals from Bottom Ashes.....	261
9.4.2 Online Detection of Particle Release with LIBD.....	265
9.4.3 Conclusions.....	269
Acknowledgement.....	270
References.....	270
10 The Role of Colloid Transport in Metal Roof Runoff Treatment	273
A. Schriewer, K. Athanasiadis, B. Helmreich	
10.1 Introduction.....	273
10.2 Materials and Methods.....	274

XII Contents

10.2.1 Specification of the Local Conditions.....	274
10.2.2 Technical System.....	274
10.2.3 Sampling.....	276
10.2.4 Analytical Methods.....	276
10.3 Results and Discussion.....	277
10.3.1 Quality of the Roof Runoff.....	277
10.3.2 Phase Distribution.....	279
10.4 Conclusions.....	284
Acknowledgements.....	285
References.....	285
Index.....	287
